The Elusive but Definite "Touch of Style"

Individualizes Farrah's

"College Brand Clothes"

For Men and Young Men

Suits for men and young men that compare very favorably with the product of the "exclusive" custom-tailor, but of course the custom tailor cannot begin to duplicate them for much less than double the price at which these exceptional garments are offered. If you know good cloth, if you are particular about the various points of style, if you can appreciate what we mean when we say that these suits are "hand-made" garments, then you will realize that these are exceptional values which we are offering in response to the general desire for a radical lowering of men's clothing prices

\$32.⁵⁰ to \$42.⁵⁰

VERY SPECIAL OFFERINGS

for particular people who wish to be well dressed but still do not wish to spend much money at this time of year, we recommend Beaver and Atlas brands from

\$16.⁵⁰ to \$37.⁵⁰

Newcastle.

REGULAR MEETING TOWN COUNCIL

The regular monthly meeting of the Town Council was held in the Police Court Room on Thursday April 21st at 8 o'clock p. m. Present, Mayor Fish, Ald. Atkinson, Dalton, Durick, Doyle, Locke, Mackay and Sargeant.

The report of the civic election was received and ordered filed.

On motion of Ald. Sargeant, seconded by Ald. Atkinson, Ald's Durick, Mackay and Locke were appointed a committee to nominate standing committees for the ensuing year.

The following report was presented:—

To His Worship the Mayor and Members of the Town Council:—
Gentlemen,

Your committee would recommend the appointment of the following standing Committees for the ensuing year

Finance—Ald. Locke, Durick, Ritchie.

Public Works—Ald. Durick, Sargeant, Doyle.

Police & App. to Office—Ald. Atkinson, Doyle, Locke.

Petition, Bye Laws etc.—Ald. Ritchie, Atkinson, Doyle.

Park & Fire—Ald. Dalton, Mackay, Sargeant.

Light, Water & Sewerage—Ald. Mackay, Dalton, Ritchie.

Industrial & Publicity—The Mayor with the Whole Council.

Sgd. W. L. DURICK
Chairman

The above report was received and adopted. Two letters from Geo. M. McDade with reference to a claim of Mrs. O. McGowan were read and were referred to the Petition Committee. A request from W. E. McEvoy for a reduction of taxes was read and referred to the Petition Committee.

The Housing Committee submitted the following report.

In view of the information so far obtained, it is the opinion of this Committee that it may be advisable to adopt a Housing Scheme involving not more than \$15000.00 and we would recommend that a Committee be appointed to go into the matter in detail and if they find it advisable to submit a definite Housing Scheme to the Council at the next meeting.

Sgd. A. H. MACKAY
Chairman

This report was received and adopted. Mr. E. A. McCurdy who was present was heard on the Housing question regarding insurance etc and on motion Aids. Ritchie, Locke and Dalton were appointed a committee to take up the question. C. J. Morrissy M. L. A., who was present addressed the Council, congratulating the Mayor and Aldermen elect, and promising any assistance possible. The Finance Committee recommended the following bills for payment which were passed and ordered paid.

Miramichi Publishing Co. Ltd. \$147.13
Newsome & Gilbert 12.30

The Public Works Com. recommended the following bills for payment which were passed and ordered paid.

Owensboro Ditcher & Grade Co. 590.00
P. Hennessy 94.23
W. J. Hogan 3.80
James Robinson 699.44

The Light & Water Com. recommended for payment the following bills which were passed and ordered paid.

N. B. Brokers Ltd 8678.71
Can. Gen. Electric Co. Ltd 364.61
Maritime Foundry Co. Ltd. 640.55

The bill of A. Dalton for \$16.00 from the Police Com. was passed and ordered paid.

The Mayor stated that he had several requests for relief from people in need and advised the doing of any necessary or contemplated work as soon as possible in order to provide employment.

Ald. Doyle spoke of the advisability of having a Clean-Up Day and after discussion it was moved by Ald. Durick, seconded by Ald. Doyle and carried "That Tuesday, May 3rd be observed as Clean Up Day, and that it be properly advertised."

Ald. Doyle, stated that he thought it would be advisable to allow the

ST. GEORGE'S DAY IN ST. ANDREW'S

The memory of England's Patron Saint was duly honored last Sunday morning, in our local Anglican Church. A good congregation gathered in the Sacred edifice, appropriate hymns were sung, and an inspiring sermon was given by the Rector of the Parish, the Rev. Mr. Bate.

Although the day previous—Saturday—was really England's feast day, for her Saint, it is more likely, the day was observed as here on Sunday throughout the vast Empire upon which "The Sun never sets. The wide world over, wherever an Englishman found his dwelling place, their thoughts of the glorious past, and England's Martyr Saint, would be sure to enter.

Christians in the legions of Rome, had introduced the Gospel faith among the Ancient Britons, and it is asserted in histories of the Early Church, that St. Paul himself extended his missionary labors to what is now England when he travelled "to Spain and Gaul, and the Isles of the West." Certain it is, that in the very first centuries, a Christian Church found place in the Motherland. St. George was one of the Christian host, and during his short life, displayed all the qualities of a noble, faithful Christian Soldier. Born in the year 270 A. D. his career ended, as a glorious Martyr, in the year 303. He chose rather to obey the voice of Heaven, than the voice of a persecuting Roman Ruler, whose authority he defied. He gave up his life, but his name will never die while an Englishman lives to hold up the red cross of St. George, on its field of white, in the banner of England.

The well loved Rector of St. Andrew's, chose as his text the words found in the 2nd Chap. of the 1st Epistle of Peter, at the 17th verse "Honour all men. Love the Brotherhood, Fear God, Honour the King." The opening hymn was the beautiful 255 and the National Anthem, hymn 253, closed the service. A deep Spirit of reverence, earnestness, and enthusiasm, was shown through out the whole service.

MISTAKES COST MONEY

The securing of Electric Power for the Town of Newcastle is a matter which is now receiving the attention of our Town Council. This matter is a most vital one, and one which requires careful consideration in every minute detail. The present Power Plant has about outlived its usefulness and for the past few years large deficits have been made in operating the plant. It is thought by some that there is no necessity for such deficits while others are of the opinion that it is impossible to operate the present plant without making a deficit. This is a matter which also should receive the careful consideration of our Mayor and Aldermen. Notwithstanding this difference of opinion, the time is not far distant

street lights to burn all night instead of as at present, and the Light Committee promised to give the matter consideration.

The Mayor enquired if the Council had any definite information regarding the possibility of the Town securing Hydo-Electric Power, and Ald. Durick said that while the Council had no definite information, a committee from the Commercial Club had taken the matter up with the N. B. Water Power Commission and the information they had received was encouraging. It was moved by Ald. Durick, seconded by Ald. Sargeant and carried that the Light and Water Committee be a Special Committee to act in conjunction with the Commercial Club in considering Hydro-Electric matters.

On motion the Council adjourned.

YOUNG-ADAMS AT OPERA HOUSE

H. Wilmot Young and Marjie Adams the ever popular stars with Newcastle theatregoers are returning to the Dime Opera House and presenting three performances. The first being on Wednesday night April 27th. A beautiful Irish Comedy entitled "True Irish Hearts" a comedy that is brimful of pretty songs and dances. Both Miss Adams and Mr. Young are seen to advantage in the play, and in addition to the play there will be six big new vaudeville acts, making the show continuous with out waits between acts.

On Thursday afternoon they will present the old favorite drama "Uncle Tom's Cabin." This is a play that never grows old, and Miss Adams is a star in the role of Topsy.

On Thursday evening, which will positively be the last appearance of the Company, they will present a comedy drama in four acts "The Trail of the Lonesome Pine."

This is one of the best comedies now being presented to the Canadian people.

The voice of the Commercial men is. The Young Adams Coy is the best playing this season. Be sure and secure your seats early they are now selling at Dickson & Sons.

tant when other methods for obtaining Electric Power for our town will have to be looked into. At present, negotiations are going on with the object of securing current from the Hydro-Electric Development on the Nepisiquit River in Gloucester Co. This may or may not be a feasible solution for the present condition of affairs. It is an acknowledged fact that Newcastle made a mistake, a number of years ago, when it was decided to establish the present Electric Lighting System. This mistake has cost the town thousands of dollars, and it behooves one and all to be most careful, that in future a similar mistake will not be made. To avoid such a mistake it would be advisable to secure the services of a capable Electrical Engineering Expert to guide the town in any action which it might take. By doing so, the possibilities of making mistakes would be eliminated and the money spent for such a man's services would be well spent, and would receive the hearty approval of all citizens. Furthermore, the opinion of the citizens should be considered in this question and before any definite action is taken in the matter the ratepayers should be made conversant with all the details, and they should be given an opportunity to express their approval or disapproval of the matter, by the holding of a plebiscite.

We have a Water Power Development on our own river, which, if enough pressure was brought to bear, would be developed and would place us in a much better position than we otherwise would be in. This fact should not be lost sight of, and it almost would appear to be a certainty that if we go headlong into this Nepisiquit proposition without the guidance of a capable engineer, we will forever eliminate the prospects of having our own Water Power developed. MISTAKES COST MONEY! AVOID THEM.

What the town wants is POWER, an abundance of it and at as cheap a price as it is possible to obtain it. Industries will then come to our town, which we are sadly in need of. Then and then only, will our town be considered by industrial enterprises.

Harry L. Babbirk Gains 17 Pounds

New Brunswick Farmer and Lumberman has Health Completely Restored by Tanlac.

"I don't believe there is another medicine that could have done what Tanlac did for me," said Harry L. Babbirk, farmer and lumberman of Elgin, Albert County, N. B.

"After I had the flu winter before last I didn't seem able to get my strength back. My appetite was so poor I ate no breakfast at all and did not eat much at any meal. I lost weight and strength steadily, and while I tried to work, I would play out in a few hours and have to go home. This kept up so long I grew despondent, and it was certainly well known news to me when I heard how Tanlac was helping so many people who were troubled like I was.

"I found everything good said about this medicine was true. I had been taking it only a short time when I could see a big change. I was soon eating a hearty breakfast and had a big appetite all the time. By the time I had finished four bottles I had gained seventeen pounds in weight. I even got rid of a nagging cough that had bothered me for a long time.

"I feel fine now, and can do a big day's work every day in the week and still feel fresh and strong. I don't intend to get run-down this winter, so I am buying another bottle of Tanlac as a safeguard. I think this grand medicine should be in every home."

Figure It Out For Yourself

Honestly now! Could you get for \$50. any other prescription which would give the same all-round service and satisfaction that a box of Zam-Buk does?

Zam-Buk is a combination of powerful, healing, herbal extracts, so refined and compounded that wherever there is any kind of soreness of the flesh, or diseased tissue or abnormal condition (such as inflammation, festering or blood-poisoning) it almost immediately soothes and heals. It stops bleeding. It is highly antiseptic—kills disease germs. It is suitable alike for the hardened skin of the worker or the tender sensitive skin of a child.

Zam-Buk is 100% pure herbal medicine. It contains no animal fat nor mineral impurity. It cannot go rancid.

"For seven years we have used Zam-Buk in our home" writes L. B. Andersen, of 1407, E. 22nd St., Minneapolis. "We simply could not get along without it. Whenever any of the children, my wife or I, happen an accident, we promptly apply Zam-Buk. It saves many a doctor's bill."

Our National Railways

The public is anxious naturally to know what effect the acquisition by the Government of the Grand Trunk Railway System in Eastern Canada and United States will have on the operating results of Canadian National Railways. From the financial point of view much of course depends on the rates, and on a general proper relationship of expenses to earnings being re-established. This may be brought about through wage reductions in United States that would likely become effective in Canada. The general level of freight and passenger rates in United States will probably not be reduced until the United States Railroads begin to earn their full 6% on the value of their properties devoted to transportation. These problems are, however, not peculiar to the Canadian National Railways, but affect all lines on this Continent.

There has been no great change insofar as tonnage is concerned between the year ended, June 30th, 1919, and the twelve months ended December 31st, 1920, although the latter period will no doubt show a greater volume. The latest available statistics for all Canadian railways however are those contained in the Government's blue book for the year which will be satisfactory for the purpose of this article which is to draw attention to the possible improvement in the National Railways freight traffic situation through consolidation as affecting the important factor of

practically all of the industrial and long haul traffic. The lines of the Grand Trunk Railway System serve commercial centres in Ontario and Quebec and the company enjoys excellent traffic arrangements with United States Railways. Naturally a great deal of this industrial tonnage has to be moved considerable distances in Canada. The merging of the lines of the C. T. R. with those of the present C. N. R. will make possible the extension of the average haul on the entire system.

The measure of a railway's freight density is the number of tons of freight it handles in a year per mile of line. Every shipment handled is worked out in ton miles. For example: If a carload of grain weighing 33 tons is moved 1,000 miles, that movement produces 33,000 ton miles, and similarly if 100 carloads or 3,300 tons are moved 10 miles that movement produces 33,000 ton miles. It is obvious that the terminal expense factor and many other items make the long haul traffic the more desirable.

The tons moved one mile in 1919 for what will comprise the consolidated National System numbered 12,559,062 which total divided by the mileage operated. (Lines in Canada only)—20,089.67 miles, means that in 1919 the freight density was 625,000 ton miles per mile of line. The Canadian Pacific Railway's freight density (from the 1919 Blue Book) was \$41,569 so that it is seen that in this respect the National System has quite a lead to overcome. This superiority of the C. P. R. in freight density, however, is not the result of that System originating on its lines a greater number of tons of freight either actually or on a per mile basis; it is caused by the greater haul which the C. P. R. gets out of its tonnage, and it is in this particular that the consolidation of the Grand Trunk and the present National lines should make possible a great improvement in the results of operation of the Government owned-system. The C. P. R.'s average haul is 443 miles as against the Canadian Northern Railway System's average of 326 miles, the Canadian Government Railways average of 260 miles and the Grand Trunk's 197 miles. Under co-ordinated management the average distance haul of the National System should be greatly increased which would of course cause a corresponding advance in its freight density position.

As far as originated tonnage is concerned more than half the tonnage of all Canadian Railways originated on the National System when the Grand Trunk Lines are included. In fact, no a mileage basis 1000 tons originate per mile of line on the consolidated National System as against 1200 tons per mile of line originating on the C. P. R. The effect of a 10% increase in average distance hauled, which is not too much to expect, would be to, in five years, increase the ton miles per mile of road by more than 50%.

Assuming the National System will move 12,375,000,000 ton miles in the first year of co-operated management, with an average haul of 275 miles, which would produce for 20,100 miles, a freight density of 615,670 ton miles per mile of line, the density could be increased in five years to 957,313 ton miles per mile of line by merely increasing the average distance hauled by 10% per annum. This would put the National System on much more of an equality basis with the C. P. R. which System had a similar density in 1913, and exceeded it in 1916, 1917, 1918 and 1920 when its density averaged just over a million tons per mile of line. In producing the National Lines there has been no allowance made for an increase in originating tonnage, nor for any increase in tonnage received from connections, but merely for an increase in the length of haul received from each ton now available. If during the five year period, tonnage originating on the consolidated National System and received from connections also increased, it would be easier actually to effect the increase in density and in view of this, and the results that have been obtained elsewhere, the assumption of a 10% increase from all sources should be possible of attainment with anything like pre-war development.

It is seen that the addition of the Grand Trunk's freight traffic would certainly more than counterbalance any advantage which the C. P. R. had previously over the Government-owned lines, although allowance has to be made for traffic interchanged between the Canadian National and the Grand Trunk which should not, of course, be counted twice. Making ample allowance for this feature might reduce the total tonnage from 51,317,860 tons to a total for the consolidated system of 50,000,000 as compared with the Canadian Pacific's total of 25,804,741 tons.

The problem before the management of Canadian National Railways, when consolidation is accomplished therefore is to convert the tonnage into the greatest number of ton miles possible, by increasing the National System's haul to the full extent that the Country permit. This is where the Shippers and Consignees, too, have an opportunity to co-operate in improving the situation by giving instructions to route some of their long haul business by the National Lines. The advance that has been outlined here is one that can reasonably be expected. It will not however take place immediately on consolidation being effected, but should be a steady progression spread over a period of years.

Final Choice For Big Fight

New York, April 19—The Dempsey-Carpentier heavyweight championship bout will be fought in Jersey City on Saturday, July 2.

This announcement was made by Promoter Tex Rickard here today. Rickard said he has not made final choice of the actual site in Jersey city. Three different sites are under consideration, all of which offer excellent transportation facilities.

Rickard said that while both Newark and Atlantic City offered favorable sites, the hearty co-operation of the Jersey City authorities and Chamber of Commerce, as well as proximity to New York, were factors which lead to the final choice.

Nova Scotia Coal Costs More Than Ohio Products

Ottawa, April 19—Further evidence given before the fuel commission of the Canadian house of commons today showed that the Grand Trunk Railway was able to take coal from its own mines in Ohio carry it by rail to Lake Erie ports, thence to Montreal by boat paying all charges, duty and exchange and allowing for profits, at \$7.94 a ton.

The price charged by Nova Scotia mines per ton delivered in Montreal is \$8.10 a ton.

"Tomorrow the commission will hear the sales manager of the Dominion Coal Company for explanation of the difference in price between coal from Nova Scotia and coal from American mines.

W. D. Marrs Is Victim of Sleeping Sickness

Moncton, April 20—The death of W. D. Marrs, whose case has claimed a great deal of attention for the past week, occurred at his home, 64 Enterprise St. For the past week or ten days Mr. Marrs has been ill with what was designated as sleeping sickness. For some time the late Mr. Marrs was in an unconscious state.

He was 43 years of age and was one of the best known C. N. R. brakemen, running for the most part, on north bound trains. The late Mr. Marrs was a valued member of Westmorland Lodge No. 3, Knights of Pythias, also Prince Albert Lodge, No. 26, I. O. O. F. He also was a member of the I. O. F. and of the B. of R. T.

ALARM OF FIRE

An alarm of fire was sent in last Friday night at 11.15 o'clock for a fire in Mr. Fraser Harris' Barn on Castle Street. It proved to be some bedding in a stall which in some way had become ignited. The Fire Department responded and quickly extinguished the blaze. No damage was sustained.

WOMEN OF MIDDLE AGE

May Pass the Critical Period Safely and Comfortably by Taking Lydia E. Pinkham's Vegetable Compound.

Regina, Sask.—"I was going through Change of Life and suffered for two years with headache, nervousness, sleepless nights and general weakness. Some days I felt tired and unfit to do my work. I gave Lydia E. Pinkham's Vegetable Compound a trial and found good results, and I also find it a very helpful Spring tonic and useful for constipation from which I suffer much. I have recommended Vegetable Compound to several friends, and am willing you should publish this."—Mrs. MARTHA W. LINDSAY, 810 Robinson St., Regina, Sask.

If you have warning symptoms such as a sense of suffocation, hot flashes, headaches, backache, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness, inquietude, and dizziness, get a bottle of Lydia E. Pinkham's Vegetable Compound and begin taking the medicine at once. We know it will help you as it did Mrs. Lindsay.

BEAVER FLOUR

MAKES BETTER BAKINGS

THE reason why BEAVER FLOUR makes such light, flaky pastry, and such excellent bread, is—it is a blended Flour.

BEAVER FLOUR is a combination of the world-famed Ontario Winter Wheat scientifically blended with enough Western Hard Wheat to give it strength—the resulting product is flour unsurpassed for high quality and richness of flavor.

Try BEAVER FLOUR and note the marked improvement in your bakings.

OBITUARY

MR. THOMAS W. HERBERT
The funeral of the late Thomas W. Herbert took place at 3 o'clock Sunday afternoon April 18th and was largely attended. Services were conducted in St. Mary's Church by Rev. Father Michaud, and interment took place in St. Mary's cemetery. The late Mr. Herbert was one of the best

known residents of the Miramichi and passed away on Friday from infirmities of old age at the ripe old age of 85. He is survived by two sons, William of Newcastle and James of Bangor, Maine; also three daughters, Mrs. Wm. Condon of Newcastle, Mrs. Simpson of Boston, and Miss Nell Hoversberg of Newcastle.

JOHN MALONEY
The death of Mr. John Maloney took place at his home in Rogers-

ville on Friday about midnight. The deceased was only confined to his bed for a short time, but was not in good health for a year or more. Mr. Maloney was engaged in the lumber business all his life, working up from a small beginning to a place among the largest operators. He was a genial fellow, beloved by all his acquaintances. There survive, besides his widow, five daughters and two sons, Misses Marian, Irene, Bertie, Anna and Hazel at home and Messrs. William of Newcastle and Patrick of Rogersville. Funeral was held Monday morning from his late residence. Interment at Rogersville. Deceased was 66 years of age.

JOHN SULLIVAN
The death of Mr. John Sullivan, an old and respected resident occurred at his home at Underhills on Saturday evening, April 9th. Deceased had been in failing health for some time, bronchitis being the immediate cause of his death; he was 77 years of age. Seven daughters and one son survive to mourn the loss of a kind and loving father. The daughters are, Mrs. O. Gillespie, Upper Blackville; Mrs. Allen Jardine, Renous; Mrs. Thomas Curtis, Upper Blackville; Mrs. Daniel Sullivan, Houlton, Me.; Mrs. Miles Porter, Duluth, Minn.; Mrs. Scott Coughlan, of Coughlans' and Mrs. John Harris, at home; Ernest Sullivan, the only son is also at home.

The funeral was held on Monday, April 11th; the service being conducted by Rev. Mr. Montgomery; interment was made at the Holy Trinity Church, Blackville. The pallbearers were, Allan Scott, Thomas Curtis, Theophilus Gillespie James Sullivan and Donald Cowie.

MRS. ELIZA ARMSTRONG
The death of Mrs. Eliza Armstrong took place in the Miramichi Hospital early Monday morning April 25th. Deceased had been ill for a number of months with heart trouble, and was confined to her bed at home during the winter months. About a month ago she had recovered sufficiently to be able to move around in her own home, but two weeks ago had another attack which obliged her to return to her bed. On Thursday, April 21st, she was taken to the Miramichi Hospital where she succumbed on Monday morning. Deceased was in her 77th year and was a daughter of the late Mr. and Mrs. James Russell of Newcastle. Deceased married the late Robert Armstrong of Youhall, Bathurst, Gloucester County, where she lived up to the time of her husband's death about seven years ago. She then returned to Newcastle where she has since lived with her sister Miss Agnes Russell.

The late Mrs. Armstrong was a devout and worthy member of St. James' Presbyterian Church and took an active interest in all church work. She was beloved by both young and old and her demise will be felt by a large circle of friends and relatives. She leaves to mourn one daughter Helen, two sisters, Miss Agnes Russell and Mrs. John Jones of Newcastle and one brother, Mr. Samuel Russell of Belleville, Ont.

The remains will be taken to Bathurst on Wednesday, where interment will be made.

New Brunswick's Health Week

There are fully 8000 cases of Tuberculosis at present in New Brunswick. Many of these will sooner or later marry and become parents, thus at least creating a disposition in the generations to follow favoring its development.

All of the 8000, if neglected, will in many ways become a menace to their fellow citizens, and a financial and physical liability to the Province. We have in New Brunswick at present 180 beds for the care of the 8000. Therefore the struggle with Tuberculosis, here as elsewhere, demands the mobilization of all Society Forces, public and private, official and voluntary.

ATTEND THE PUBLIC HEALTH MEETINGS NEXT WEEK AND LEARN HOW TO PROTECT YOURSELF.

PRIVATE SALE
A Private Sale of Household goods etc at Mrs. Geo. B. McInerney's, Corner of Wellington & Henderson streets, Chatham. Goods may be seen between the hours of 12 and 3 o'clock.

KEEP IN MIND
Watch for the Rexall Store One Cent Sale on May 5th, 6th and 7th. Keep these dates in mind.

The Miramichi Utility Poultry Club

In order to stimulate a greater interest in Purebred Poultry, the club arranged with Mr. G. A. Wilson of Poultry Division, Ottawa, to inspect some of the local breeder's stocks. Below is a list of Breeders whose flocks have been inspected and the following matings are offered for sale.

R. A. Snowball, Chatham, N. B.

SINGLE COMB WHITE LEGHORNS
Pen No. 1 In this pen are all the birds that qualified for Record of Performance at the Egg Laying Contest at Nappan, N.S., 1920 which won three prizes. Also a selected lot of nice hens that have trap nest records of 150 eggs and better.
Pen No. 5 Headed by Cock that has produced my best layers and mated to all record of performance hens with records from 154 to 207 eggs in the 12 months. Only two hens in this pen with records under 173 most of them from 185 to 207. Pullets from this same breeding have already laid 160 eggs from the first of November to the first of April.

BARRED PLYMOUTH ROCKS
Pen No. 2 Headed by Imported Cockerel mated to pullets now under record of performance from the same breeder whose pullets at Ottawa last year won 3rd place in the B. P. Rock class. These pullets have trap nest record of 60 to 80 eggs in 15 weeks. Only limited quantity of eggs from this pen for sale.

PRICES OF EGGS PER SETTING OF 15
Pen No. 1 Single Comb White Leghorns \$2.00
Pen No. 5 Single Comb White Leghorns \$3.00
Pen No. 2 Barred Plymouth Rocks \$3.00
To club members 50cts. per setting off above prices.
Fawn and White Indian Runner Duck Eggs \$1.50 doz.

Geo. E. Fisher, Chatham, N. B.
Woodburn Farm, Phone No. 20

BARRED PLYMOUTH ROCKS
Pen No. 1 This pen is headed by an imported Cockerel "Miss Kelso" strain and is a pedigreed bird. His grand dam had a record of 272 eggs in one year. He is mated up with 12 nicely barred pullets.

BARRED PLYMOUTH ROCKS
Pen No. 2 This pen is headed by a big strong, well shaped two year old Cockerel imported Guide Bird and has ten well bred pullets with him.

WHITE WYANDOTTES
Pen No. 3 This pen is headed by a two year old bird bred by R. A. Snowball and has eight well developed pullets with him.
Price of eggs per setting of two've \$2.00.
50cts. reduction to members of our Club.

H. Williston, Newcastle, N. B.
Breeder of Martin's "Dorcas" Strain of White Wyandottes
Our birds are all Government Inspected and no female is in our breeding pen whose laying capacity is under 150 eggs for the year. Cockerels which head our pens are bred from heavy producing males, whose dams laid under trap nests 223 and 227 eggs. Eggs from these matings
\$2.00 for 13. \$3.50 for 25
50c off this price to Club Members.

Sale commences at 3 o'clock. Tea Served from 4 to 7 p. m. In addition there will be a sale of Fancy Work and Candy.

Admission, 10c. Tea, 25c.

"We Saw Your Letter In the Newspaper"

"YES." "And is that correct what is said about Dr. Chase's Nerve Food?" "Yes, it is absolutely true." "But why do you recommend it?" "For two very good reasons. First, because it fully restored my health and strength when I was weak, wornout and very greatly discouraged, and, second, because I believe it is a duty as well as a pleasure to let other women know about so superior a treatment." "I never used Dr. Chase's Nerve Food, but I got interested in that Woman's Advertising Contest they had, and nearly every woman I

met seemed to be talking about it. Then I saw your letter, and knew you would tell me about it." "Well, you know how weak and miserable I was for years in spite of all the doctors could do for me. I was nervous, irritable, restless and sleepless. Thought sometimes I would go out of my mind from worry and depressed spirits. I need not tell you how well I am now. You can see for yourself. There is the whole story, and all the credit is due to Dr. Chase's Nerve Food." "I get your viewpoint now. It would be a sin and a shame if you did not tell others." Dr. Chase's Nerve Food, 50 cents, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Pruning Of The Apple Orchard

The foliage of a tree is the manufacturing centre where food materials from the soil combine with those from the air to form the tissue building materials. The larger the active leaf area therefore the better the growth. Definite experiments covering four years in Virginia indicate an average increase of trunk growth of 1.93 inches on lightly pruned trees, 1.69 inches on moderately pruned trees and 1.61 on heavily pruned trees. In other words the greatest growth will result where no pruning is practised. Pruning is necessary, however, to direct the growth so that an evenly balanced strong tree may be formed and surplus and undesirable branches not allowed to develop. The directing of the growth during the early years of the tree is of particular importance. The ideal tree is probably that which has the first branches about 24 inches from the ground and 5 to 6 branches which form the frame of the tree spaced evenly as far apart as possible. Particularly desirable is it to remove the next to the last top branch which if left will form a weak top because of the forked crotch formed with the top limb.

Heading back at planting time is necessary to balance the loss from cut off roots because of digging. Tests made at Kentville show an average growth of 4.82 inches the first year and 2 inches the second year where newly planted trees had three quarters of their growth removed, whereas similar trees not headed back made a growth of 1 inch, the first year and 2.4 inches the second year.

Strong growing branches should be suppressed by heading back and weak branches not pruned at all. If the whole tree is weak a severe heading back in the spring will throw greater vigour into the remaining buds and thus bring about a more vigorous development. But if there are weak branches on one side of a tree and strong ones on the other the reduction of leaf area on the weak branches will tend to further weaken these branches because of the strongest sap flow toward the greatest foliage area, obviously there fore a reduction of foliage area on the strong branches will lessen this tendency and throw more growth toward the weaker branches.

The central branch should be allowed to maintain the lead, this however not for the purpose of forming a pyramidal tree with a central leader but so that from it several well spaced scaffold limbs may be developed thus forming a more desirable type of tree than if scaffold branches are developed on side limbs only. After a few good scaffold branches are formed on this central leader, if the tendency is toward a pyramidal form with central leader extending high into the air having many branches radiating from it this should be checked, thus forming a tree combining the desirable features of the pyramidal form and eliminating the undesirable open centre form of tree.

To balance the tree the heading back of strong growing branches is necessary. This heading back tends to develop side branches and attention must be given to the elimination of some of these that too many scaffold branches are not formed. The whole aim should be to build up a framework that will carry large crops of fruit and at the same time not have an over abundance of large branches.

Sunlight is essential for vigorous leaf growth and also for ripening the fruit, a dense growth is therefore objectionable and the preventing of this should for the most part consist of annual removal of such small branches as are likely in time to extend to where other more desirable branches should be. The judgment

Health in The Household

Health comes first. And how important to health is properly cooked food. Give your children and other members of the family, light, fluffy biscuits, cake, without that soda-y taste. And delicious apple dumplings, all made with.

Care of Seed Potatoes

(Selection) In arranging for the seed supply of tubers from one's crop, the first steps should be taken during the growing season to get the seed from healthy, vigorous, large-yielding hills. When harvesting time comes these hills should be gathered separately from the rest of the crop. The tubers should be sun dried and all showing cuts, bruises or disease of any kind, thrown out. Such supply can then be kept for a seed area for the following season.

Where the main crop is destined for this seed trade, equally good care should be taken in the harvesting and sorting before going into winter storage. If the weather is bad at digging time, and the tubers have to be taken wet from the field, they should be spread out to dry on a barn floor or other airy place and be re-sorted before going into storage.

(Storage) The best storage for maintaining vitality of seed tubers has not, so far as the writer is aware, been absolutely determined. Seed from a dry cellar with temperature running from 40 to 50 has been equally vigorous with that from a moist cellar at a temperature of 34 to 38, though, of course, there would be great loss of bulk and weight in the former case. Potatoes kept in pits with excess of moisture and minimum of ventilation have also given vigorous plants.

When potatoes are first stored there should be free ventilation to carry off all latent heat and moisture and to reduce temperature to below 40. If the floor of storage is very damp the bin had better be raised by a wooden floor. If it is dry there is nothing gained by the floor. If bins, are very deep (over six feet) they had better be broken up by hollow partitions placed not more than ten feet apart; though the writer has

seen potatoes keeping well in very large, deep bins.

The storage should be so constructed as to keep cool in the Spring. It should be possible to keep it below 40 degrees, to prevent sprouting until such time as the tubers are wanted.

(Forced Sprouting) For an early crop, it is a common practice to take the seed tubers to a light room of about 60 degrees temperature by the 20th March, to give them four to six weeks to warm up and sprout. A thick green sprout not more than a half inch, long is wanted. The exact gain in growth from this treatment has not been determined. In one trial at the Experimental Station, Fredericton, the growth as between seed so treated and seed taken immediately from the cellar, was very slight. Plants from the sprouted seed were only from two to three days ahead of the others.

(Disinfection) To kill any spores of common scab, and, to some extent, Rhizoctonia, the potatoes should be treated with a disinfectant. The safest to use of heavy and greater strength of 40 gallons of water. The tubers are best bagged and then immersed for two hours.

Investigators are now trying out methods of disinfection whereby the use of heat and greater strength of solution will materially hasten the process of disinfection.

(Cutting the Sets) Experiments have proven quite clearly that the most economical way to use seed is to cut in sets weighing not less than one ounce and not more than two ounces, with from two to three eyes to the set. Cutting by a machine or a cutting board may be economical in large commercial operations, but as when using these the size of sets and number of eyes cannot be well regulated nor elimination of internal disease carried out, the advantage of speed may not be good economy.

To make sure that no sets infected with Black Leg, Fusarium Wilt Late Blight and other possible troubles are planted, the best procedure is, first to throw out all cut and bruised tubers, cut a thin slice off the stem end and then discard any tubers showing discoloration. Two knives should be used, one kept standing in a can of formalin solution; immediately a discolored potato is cut, the knife used should be put in the disinfectant and the other knife taken.

As the sets dry out quickly then cut and will heat if left in piles or barrels, they should be coated with dust, Gypsum, or land plaster, is one of the best materials to use, and if from two to four quarts is spread through the barrel of seed the sets will keep cool and firm without deterioration for days and even weeks. Air slacked lime is frequently used and sometimes road dust and sulphur lime. If not thoroughly slaked, may injure the eyes and makes the sets unpleasant to handle.

A Warm Store A Cold Draft

The man or woman behind the counter is in constant danger of contracting colds. An overheated store, and the drafts from the continually opening doors—that's what causes it.

SHARP'S BALSAM

of Horse and Anise Seed — a winter health preserver for indoor workers—is the most reliable remedy for all such conditions. It almost instantly remedies incipient colds, and affords quick and grateful relief in more chronic cases, finally completely correcting the condition. The popular cold remedy for 70 years. At all drug and general stores, 25c. The Canadian Drug Co., Limited, ST. JOHN, N. B.

Spring Forest Fires

One of the most dangerous seasons of the year in regard to forest fires is now approaching and it behooves all who go into the forest on any business to be careful with fire. When the snow leaves the forest, last year's leaves, grass and twigs are left as dry as tinder, and a lighted match or cigarette stub thrown down carelessly falls into material as inflammable as a barrel of shavings. After the spring rains come on and the new grass and new foliage starts the danger is greatly reduced. People do not realize that just at the close of winter, through which there is scarcely any danger from fire in the woods, comes on the most dangerous season. Care by all who go into the woods at

this time means a great reduction in the fire-hazard.

Celery Culture

Apart from the delicate flavour of celery, it has certain medicinal properties and its consumption should be encouraged. There seems to be a general impression that remarkable skill is required to grow this excellent vegetable, but although it cannot be grown with the same ease as carrots any many others, attention to a few details makes its culture possible in any garden without an undue amount of work.

Any rich garden soil will grow good celery, which must have an abundance of fertility to draw upon. If tender, well-developed stalks are to be obtained, if the soil becomes dried out even with an abundance of plant food succulent stalks are not likely to develop. Plant food and moisture are both essential if growth is to go on uninterruptedly. Celery grows best in the fall or early spring, because the soil is damper and cooler. The aim should be to furnish conditions and, as hot dry soils can be made cool and moist by watering or mulching, it is not a very hard task to keep a small area of celery moist during the dry periods.

When preparing for your vegetable garden, set aside some well rotted stable manure for a row of celery. Dig or plow out a space about sixteen inches deep and into this scatter the manure about four inches deep; then work in your soil, thoroughly mixing it with the manure. If the garden is one which has been well manured for years, scatter a coating of manure broadcast and work it into the soil. A good commercial fertilizer scattered broadcast at the rate of two thousand pounds per acre and well mixed with the soil to a depth of five or six inches will grow good celery without manure if moisture conditions are right.

Do not set the plants on ridges. It is not necessary to set in a trench, but it facilitates watering if the ground along the row is slightly below the soil level. After planting see that the ground between the rows is kept stirred, so that less watering and the surface around the plants will be necessary. If watering is done, this tends to compact the surface soil around the plants, and as soon as dry enough this should be broken by very shallow hoeing. Deep hoeing close to the plant should be avoided, as the roots are shallow feeders and should not be disturbed. A mulch of horse manure may be placed along the row, which may do away with hoeing entirely, thus saving moisture and keeping the soil cool.

Blanching may be started when the plants are six inches tall, by placing boards at each side of the row and holding them in place with stakes, or earth may be pressed up to the plant after first gathering the stalks together so that soil will not get into the crown. It is not necessary to blanch all at once and a little hand-lining of the plants by working some soil up to it will tend to an upright rather than spreading growth until blanching is desired. Drain tile set over a plant is excellent for blanching. Any material that eliminates light from the plant will serve the purpose and in two or three weeks under such treatment White Plumbe or Paris Golden will blanch if active growth is being made.

If sucker growths develop, these should be removed before blanching in order to get even heads with good stalks. Celery rust, which sometimes is troublesome, is overcome by using Bordeaux mixture, the plants being kept covered by spraying every ten days.

Celery seed will germinate about two weeks after planting during which time the soil should be kept damp. The seed may be placed indoors and when seedlings appear should be placed in a bright window. In two weeks the plants may be singled out and transplanted to one and a half or two inches apart. In another month these will have developed into good plants for setting to the open ground. It will be seen that it takes about two months to develop good plants. Seed sown March first should develop plants for setting May first. For later plantings and fall crop seed started the middle of April or beginning of May will give good plants for setting in June. Seed sown thinly in a seed flat may be transplanted directly to the open ground without transplanting to other seed flats. Shallow seed hats and transplanting boxes are best.

It is unnecessary to have more than three inches of soil for starting or growing plants. The plants may be cut out with a square of soil, thus avoiding injury because of the soil being removed from the roots, as is necessary if plants are not first transplanted into flats. The plants should be set in rows three and a half feet apart and six inches apart in the rows. Any good garden soil will develop thrifty seedlings and the plants may be raised in a good bright window or in a hot bed. The variety Paris Golden Self Blanching, is one of the best sorts. Seed started here April third and plants set to the open ground June tenth, were ready for use on August twenty ninth.

"Cold in the Head"

is an acute attack of Nasal Catarrh. Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the System, cleanse the blood and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System, thus reducing the inflammation and restoring normal conditions.

Has Booze In Solid Cubes

Westfield, April 20—Professor L. B. Allyn, Westfield's noted pure food expert, could be a millionaire over night did he so desire. The explanation of this is that Professor Allyn has recently exhibited some solid cubes, one of which when consumed would have the same effect as a flask of good whiskey. These cubes can be carried about in the pocket and are soluble in water, and Professor Allyn admits that they have the same effect as a "shot" of whiskey.

Professor Allyn recently exhibited some of the cubes at a meeting of paper making officials. Publicity was given to Professor Allyn's unique exhibit, as a result of which he has received inquiries and offers for the formulae of the cubes from many sections of the country.

However, Professor Allyn has no desire to violate any of the prohibition laws of the country, and the cubes are on exhibition at his laboratories here and will remain on exhibition.

Some concerns have even been bold enough to make known their desires to Professor Allyn of placing the cubes on the market for sale.

OTHER TABLETS NOT ASPIRIN AT ALL

Only Tablets with "Bayer Cross" are Genuine Aspirin

If you don't see the "Bayer Cross" on the tablets, you are not getting Aspirin—only an acid imitation.

The "Bayer Cross" is your only way of knowing that you are getting genuine Aspirin, prescribed by physicians for over nineteen years and proved safe by millions for Headache, Neuralgia, Colds, Rheumatism, Lumbago, Neuritis, and for Pain generally. Made in Canada.

Handy tin boxes of 12 tablets—also larger sized "Bayer" packages can be had at drug stores.

Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monocristalline Salicylic Acid.

While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company, Ltd., will be stamped with their general trade mark, the "Bayer Cross."

Athletics For Chatham's Young

Chatham, April 19—A meeting of the Chatham Athletic Association was held in the town hall this evening. Officers for the ensuing year were elected and preliminary steps taken towards the formulating of plans for the coming summer. There was a large attendance of the young men and a number of other citizens interested in the effort to have clean manly sports provided for the youth of the town under the direction of competent leaders.

Rev. Mr. Wilson Gone To Ottawa

Fredericton, N. B. April 23—Rev. W. D. Wilson, general secretary of the N. B. Temperance Alliance and former chief inspector under the prohibition act in New Brunswick, has gone to Ottawa to consult with temperance leaders of the Dominion regarding the next united move of the prohibition forces following the victory in the referendum in Ontario yesterday towards the realization of their efforts to make a dry Canada.

The next referendum in sight now in Canada is that which was asked for in New Brunswick by resolution passed by the Provincial Legislature at its recent session. Monday, June 27th, is the date suggested by the Alliance for the vote.

"If you can't—keep sprightly, and full of pep—you must have something the matter with your physical condition. You are probably—much run-down! Try a bottle of Dr. Wilson's HERBINE BITTERS"

A harmless tonic, made from the principles of Nature's herbs. It has a wonderful, curative power, which tends to relieve those suffering from Kidney or Liver Trouble, Dyspepsia, Constipation, Jaundice, etc. It removes all impurities of the blood, and protects the system against further disorders.

 The Brayley Drug Co., Limited, St. John, N.B.

Distribute Liquor At Fredericton

One of the wholesale liquor vendors of the city appeared before the New Brunswick Liquor Commission which met here yesterday afternoon and supplied them with considerable information desired by them, among other things the quantity and quality of the liquors now stocked by the two wholesale vendors of the province, the National Drug and the Brayley Drug Companies' whose stocks may be taken over by the commission to meet the requirements of the retail vendors until they book up a stock from other sources.

Distributing Centre
 The Hon. F. J. Tweeddale, chairman of the board, stated last evening that Brigadier-General Macdonnell had given the permission of the militia authorities for the use of the stone barracks at Fredericton as a liquor storehouse and distributing centre.

Mr. Tweeddale estimated that a staff of from six to eight would be required to handle the liquor.

Going to Montreal
 The board, which is composed of the Hon. Mr. Tweeddale, Martin Maguire and F. A. Bentley, are to go to Montreal next week where they will inspect the stocks of the wholesalers there, and will meet representatives of Old Country distillers, with a view to purchasing a stock of high grade liquors. It is the intention of the board to purchase nothing but the best, and as Mr. Maguire was for many years in the wholesale liquor business there is little doubt but that they will get what they desire. Mr. Maguire has estimated that from 65,000, to 75,000 cases will be required to meet the retail vendors' demands for one year.—Standard.

VINCENT DANIEL FORAN
 The death of Vincent Daniel Foran the little son of Mr. and Mrs. John Foran, occurred on Friday after a short illness. The funeral took place on Sunday afternoon at 2 o'clock; services in St. Mary's Church, and interment in St. Mary's cemetery.

The Prince of Wales presents Boxing Shield to Jewish Lads' Brigade. Colonel Patterson receiving the medal.

Reciprocity Agreement Defeated By Twenty One

Ottawa, April 13—Hon. W. S. Fielding's reciprocity amendment to the motion to go into supply was defeated in the House of Commons at 11.30 tonight by 100 to 79, a Government majority of 21.

Ottawa, April 14—On a motion to go into supply in the House this afternoon, Hon. W. S. Fielding moved, seconded by Hon. W. L. MacKenzie King:

"That in the opinion of the House the Government should bring in a measure to approve, ratify and confirm the agreement respecting reciprocal trade between the United States and Canada signed at Washington on the twenty-first day of January, 1911, by Hon. P. C. Knox, on the part of the United States, and by the Hon. W. S. Fielding and the late Hon. William Patterson, on the part of Canada, which agreement remains on the statute book of the United States.

Turning to a discussion of his motion, Mr. Fielding stated that some months ago the Fordney Tariff Bill had been introduced in the United States Congress. This bill made many changes in the tariff to the manifest disadvantage of Canada.

Illustrating the disadvantages to Canada under the Fordney Bill, Hon. Mr. Fielding gave the House the taxation schedule under the reciprocity treaty, the present tariff and the Fordney Bill.

The Fordney Bill had not become law in the United States because the former President, who was a Democrat, had vetoed it. Since that time, however, there had been a change of presidents in the United States and a Republican President now occupied the place formerly occupied by President Wilson. The bill was again before Congress, and again there was danger of it becoming law. Canada was not dependent upon the United States. She would be prepared to show that she was not, if necessary. On the other hand, the United States was not dependent on Canada. She was probably the most self-contained country in the world. But both countries could get along better if they had friendly trade relations.

The reciprocity agreement of 1911 was still on the statute books of the

United States, said Mr. Fielding. Therefore, Canada was justified in assuming the position that it was still open to us to adopt this agreement. There never was a time when good commercial relations were so needed between Canada and the United States. We must not allow barbed wire entanglements in the line of tariff obstruction to spoil the good relations between the two nations.

Sir Henry Drayton

Sir Henry Drayton said that he agreed with Mr. Fielding that the most cordial relations between Canada and the United States should be encouraged. Canada was immeasurably the best customer of the United States, and was doing more business with her than the whole of South America. Both sides of the House, he thought, were agreed on the point of good relations but they might differ on ways and means of maintaining them. It might look like a sham practice to try and put the reciprocity pact through under present conditions. The Minister of Finance said that the imports into Canada from the United States for seven months amounted to \$792,000,000. The exports were approximately \$514,000,000.

Everyone was borrowing—governments, provincial and municipal, and the individuals. All were borrowing to discharge their adverse trade balances with the United States and to meet interest and other carrying charges on their debts. This money also had to be borrowed at high rates of interest.

To the suggestion that in view of the Fordney Tariff proposals, Canada should take immediate action, Sir Henry declared it would not be proper for the Government to enact a retaliatory measure. The Americans were merely conducting their own business. A Canadian tariff should be based on the standpoint of the Dominion's best interest only.

The Agrarian Spokesman

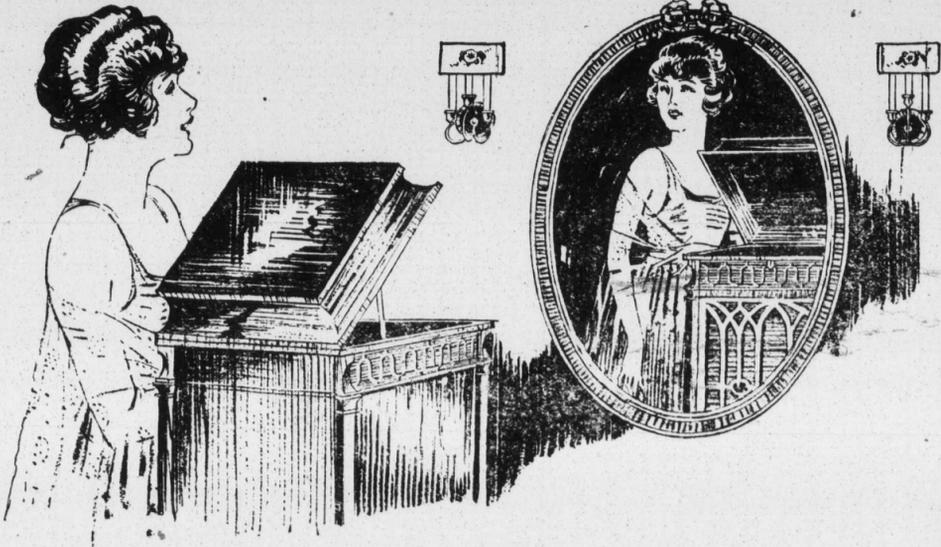

Dr. Michael Clark, (Red Deer), who announced himself as the spokesman for the Progressives and at the request of Hon. T. A. Crerar, supported the Fielding amendment. Dr. Clark said any man with humane instincts and a world outlook would agree with Lloyd George that what the world needed today more than anything else was the restoration of international trade.

Citing the query of the Minister of Finance on whether or not Canada was not already trading to a sufficient extent with the United States, Dr. Clark said:

"No, we are not. The more we trade with them, the wealthier we will become; the better off we will be."

Dr. Clark contended that the adverse balance of trade was not because of buying too much, but from borrowing too heavily. Canadian currency was more inflated than American because the United States was nearer a gold basis. If asked the question he would say that the proposed agreement would benefit Canada in the matter of trade balance because it would create a larger market in the States for Canada's natural products. He heartily endorsed the war mark of the fiscal zeal of the official Opposition. He hoped members on the Government side, who

Music's Perfect Mirror

The NEW EDISON "The Phonograph with a Soul"

The New Edison is like the perfect mirror that reflects form and feature, true to every line and subtlety of coloring. It gives you an exact RE-CREATION of the singing or playing of the living artist or artists.

Mr. Edison spent 7 years of his time and 3 millions of his dollars to develop the perfect realism of the New Edison. He has proved this perfect realism by comparing the New Edison with living artists 5,000 times before more than 5 million people. The New Edison is positively the only phonograph which can sustain this test.

We have, for you, a proof on offset paper of the famous Franklin Booth Etching of Mr. Edison, as he looks today. Size 12 x 19 inches. Bears no advertising matter; suitable for framing. Just fill out the ballot,—and bring or mail it to us.

Closure Defeated by 19 Majority
Ottawa, April 13—The closure motion carried on a standing vote by 100 to 81, a Government majority of 19.

Bullet From Lung Through His Throat

Philadelphia, April 20—Extradition of a bullet from a lung, where it had become imbedded, through the breathing tubes and the throat, has been accomplished at Jefferson Hospital. Not only that, the feat is said to be the first occasion when a bullet fired into a lung has been removed without the aid of a lancet.

Chronologically, the story started in Nanticoke, Luderne county, last week, when and where Stanley Butt, a seventeen-year-old mine worker, was accidentally shot in the back. Application of an X-ray showed the bullet imbedded in the lung, where the Nanticoke and Wilkesbarre surgeons declared it would be almost certain death to apply a knife or lancet.

One of the surgeons mentioned the apparatus called the bronchoscope, which long has been in use at the Jefferson College and Hospital for removing foreign objects from human interiors. He suggested that Butt make the journey here and take a chance on getting the bullet out through his throat rather than have

it abscess and cause hemorrhage.

Operation Successful

The bronchoscope was applied to Butt. With this aid the bullet was eliminated through the boy's throat and mouth.

The bronchoscope is a thin silver pipe, varying in length from twelve to sixteen inches and in diameter from one-tenth to one-eighth of an inch. It is connected with a small electric battery, by means of which a light is produced in the end of the tube, where also magnifying glasses of varying strength can be inserted. Its principle is that of a periscope, but inverted. Instead of being used so one may look upwards from below it enables one to look downward from above. Through the opening of the bronchoscope, forceps and other holding instruments may be inserted for the purpose of removing substances from the organs affected.

In the case of Butt the bronchoscope was inserted through the larynx and through the windpipe into the right lung. Butt left the hospital two days after the operation and went back to his home in Nanticoke.

Political Letter From Ottawa

Ottawa, April 18th, 1921—An attempt by the Opposition to roll back the stones from the sepulchre of Reciprocity, was the most significant development of the past parliamentary week. It was significant, not so much from the fact that it shows that Mr. King and his followers still care more for an economic theory than for their country's prosperity, but rather for its revelation of the utter unreliability of the Opposition leaders' word. It is only two months since the by-election of West Peterborough. In that election Mr. King pledged himself to make no change in the tariff unless and until the country had an opportunity to pronounce upon the question. "Do not let them (the Government) deceive you," he said, "the Liberal party would never think of touching the tariff policy of this country before a general election." Now this was a specific pledge, given without reservation. Yet the same Mr. King and the same Liberal party stood in Parliament a few days ago and demanded a sweeping change in tariff policy, not after an election, not after the people were heard, but at once. They moved that the Government "accept, confirm and ratify," the Reciprocity agreement of 1911, practically a fiscal revolution.

Under the circumstances only two conclusions are possible; Mr. King was dishonest with either the electors of Peterborough or with the House of Commons, or he was dishonest with both. In either case the position is a pitiable one, for it indicates that the Liberal Leader is still back at the old obscurantist game of trying to achieve power by trickery and deceit.

Nor is the position of Mr. King much more alluring, judged from the standpoint of policy. Reciprocity with the United States would have been had in 1911, it would be catastrophic in 1921. Canada last year bought goods to the value of a billion dollars from the United States and sold only half a billion in return. The consequence is that, with such an enormous balance against us, the Canadian dollar is at a heavy discount in New York, this resulting not only in humiliation, but in a tremendous hardship as well. Now the question the average Canadian must ask himself is this: "If a billion dollars worth of American goods are flooding this country now injuring Canadian industry menacing Canadian

labor and undermining the value of the Canadian dollar, what would happen with duties swept away, as is proposed by Mr. King? The answer, of course, is clear. It is that apart altogether from the vital question of the loss of revenue which would be involved, apart from the further fact that the Americans just now are talking of heightening instead of lowering their tariff, acceptance of Reciprocity at this stage would be little short of economic suicide. And so the House of Commons voted the proposition down, a not insignificant fact being that, despite the Agrarians, the majority of Western members voted with the Government. Even pronounced low tariff men like Mr. Henders, an ex-president of the Manitoba Grain Growers, could not swallow Mr. King's folly.

Having thus revealed himself in a game of double-dealiny as well as willing to commit the country to a desperate discredited policy, Mr. King capped the climax of a bad week by engineering, or permitting his followers to engineer a filibuster against a proposition which deducted to its simplest terms merely asked that the Government live up to its contracts. When, four years ago, the Government launched upon a shipbuilding programme, it was because it was urgently called for by the submarine war. The Opposition at that time gave the proposition hearty support. The party which in 1915 had fought so hard to have shipbuilding established in Canada (Mr. Pugsley urged it even though it turned out a financial loss) the Liberals saw in the programme not only an attempt to foil Von Tirpitz, but also a vindication of their stand; and leaders of the party, like Mr. Lemieux and Mr. Fielding lauded the proposal to the skies. When last year the Government asked for a vote to complete the programme, there was no protest. The Opposition, in fact, was anxious to share the credit for the building up of a merchant marine, and still regarded it as a justification of their stand in the naval debate of 1913. This year however, there was a change. Everywhere in the world shipping suffered; ocean rates declined, there was a surplus of ships, scarcity of cargoes, and consequent loss; and the Opposition trimmed their sails to suit the new wind. Thus, when the Government this week asked for a vote of eight millions to complete contracts to which the whole House, Liberals included, had been a party, the Opposition led by Mr. Duff, fought it tooth and nail. Their position was well described by Mr. Meighen, who said: "You supported our programme, and you were a party to these contracts. You joined with us in ordering ships, but you refuse to join with us in paying for them." The Opposition attitude in fact, was an utterly unupportable one. The money asked for was either spent or contracted for, and a refusal to vote it would simply have meant that some of our own people would have been defrauded of money which they had earned; and so the Government suppressed the Opposition's obstructionist tactics by an application of closure. A similar measure had to be adopted to pass an interim supply bill to which Mr. King, for reasons not quite clear, took exception.

Meanwhile a committee of Parliament has been formed to inquire into certain phases of the railway problem. Its main task will be to ascertain how much information the National Railways management can turn over to Parliament without endangering it with its great rival the Canadian Pacific, and while no one expects the committee to work wonders, nearly everybody is disposed to give it a fair chance. Another committee from which something concrete is expected is that appointed to deal with the question of fuel supply.

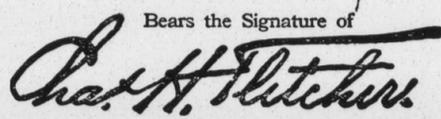

The Budget is still to come. Ordinarily this would mean that the session would be greatly prolonged, but as there is not much of other legislation, and as it is now seems quite probable that the Government in view of the fiscal uncertainty in the United States and other countries, will delay its own tariff proposals, it is altogether likely that prorogation will come within two months.

"Conservation of human life is the greatest obligation inherited from the war, it is the greatest necessity of the reconstruction period." N. B. Health Week.

Children Cry for Fletcher's CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?
 Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

EAGER CROWDS

The big sale which Messrs A. D. Farrah & Co., are conducting in the Old Park Store opened on Saturday morning. From early morning until late at night, crowds upon crowds of eager buyers filled the store and streets. The crowds were so eager that it became necessary to keep the door of the store locked until those who were fortunate enough in gaining admittance had been waited on. Then the door was unlocked and it only required about one minute for the store to fill again and the door had to be locked again. The many customers report that this sale is unprecedented in values and they are taking full advantage of it. The sale continues this week.

THINK SIMILAR FERRY BOAT WOULD ANSWER

The matter of providing a new ferry boat to ply between Chatham and Ferryville is engaging the attention of the government. The boat now in use is inadequate for the needs of present day traffic, and to replace it with another of similar design would be a very costly piece of business. The suggestion has been made that a cable driven boat similar to that in use at Gondola Point would meet the case and cost considerably less. J. S. Martin, M. L. A., one of the members for Northumberland, and Capt. Bullock, the well known Miramichi boatman, paid a visit to the Gondola Point ferry for the purpose of inspecting the same and reporting on the question of the suitability of such a boat for the Chatham ferry. After the inspection these gentlemen expressed themselves as very much pleased with the boat, and that in their opinion one of similar type would fill the bill at Chatham, provided there was not too much interruption of the traffic from ocean steamers.

MISS CARMEL McCARRON TENDERED SURPRISE PARTY

Friends of Miss Carmel McCarron, daughter of Mr. and Mrs. Matthew McCarron, Moncton, N. B. gathered at her home on Cameron street Tuesday evening and tendered Miss McCarron a surprise party on the eve of her departure for Chatham, where she will enter the Hotel Dieu Hospital as a student nurse.

During the evening dancing was indulged in and many of the party's personal rendered several very pleasing vocal numbers. About midnight refreshments were served, shortly after which the party tendered their respects to Mr. and Mrs. McCarron a very pleasing host and hostess and withdrew to their respective homes. Miss McCarron, who left Moncton on Saturday for Chatham, N. B., was made the recipient of a very nice ivory set. With the presentation, which was made by Miss Clare M. MacKasey, an address, very suitably worded, was read by Miss Lillian Sullivan.

Miss McCarron will be followed by the very best wishes of her many friends here for success in her chosen profession.

PROTECTIONISTS NUMEROUS

Protectionists at the Police Station each night are becoming very numerous, owing to unemployment. Four applied for protection last week and another last night.

CHATHAM WINS

A good game of Basket Ball was played last night in the Temperance Hall between the Newcastle Baptist C. S. E. T. Team and the Chatham St. Luke's C. S. E. T. Team.

A large audience witnessed the game which provided many exciting moments for the spectators. The visitors won the game by a score of 22 to 15.

"IN MEMORIAM"

In sad and loving memory of Mrs. E. S. Vye, wife of E. S. Vye, who died April 23rd 1919, also Mrs. A. Johnson wife of Allan Johnson and daughter of E. S. Vye who died May 8, 1916. We who love you, sadly miss you. As it dawns another year, In the lonely hours of thinking, Thoughts of you are always here, Friends may think that we forget you When at times they see us smile, But they little know the sorrow, Which the smile hides all the while. "THE FAMILY"

April 23rd, 1921.

The Fateful Years For Every Woman

How to Overcome Troubles That Afflict Women Only.

So far as a woman's health is concerned, probably the most fateful years in her life are those between 45 and 50. Many women enter this period under depressing conditions, through overstrain in household cares, or a neglected condition of the blood, and so they suffer heavily. Among the commonest symptoms at this time are headaches, pains in the back and sides, fever flushes, palpitation, dizziness and depression. It is well to know that these variations of health can be relieved by home treatment. What women stand in need of all their life, but never more so than in middle age, is rich, red blood. As a tonic for the blood and nerves, Dr. Williams' Pink Pills are always useful, but especially will they help women at this time. Among those who have found benefit through the use of Dr. Williams' Pink Pills is Mrs. J. A. McDougall, Rhodena, N. S., who says: "I was greatly troubled with nervousness, palpitation of the heart, dizziness, and a generally run down condition. It was only with difficulty that I could do my work, and although I had been taking medicine for some time I did not improve. Finally a friend advised Dr. Williams' Pink Pills, and I got a supply and began taking them. The result more than met my expectations, and I am feeling better than I have done for years, sleep well, eat well, and do my household work much more easily. In my case the pills certainly did what you claim for them."

Dr. Williams' Pink Pills are sold by all dealers in medicine, or may be had by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

PILES

Do not suffer another day with Itching, Bleeding, or Protruding Piles. No surgical operation required. A little of our Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c. a box; all dealers, or Edmundson, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 2c. stamp to pay postage.

ECLIPSE OF THE MOON

An eclipse of the moon was observed here Friday morning. The face of the moon was almost entirely obscured at 3 a. m.

ON 10 HOUR BASIS

Fredericton, April 21—The planing mill in connection with the Victoria mill operated in this city by Fraser Companies, Limited began operations this morning on the basis of a ten-hour day. The crew is composed of local men and some of them were members of Local 120, International Timber Workers' Union which declared against going to work at the Victoria mill except on the basis of a nine-hour day.

Rheumatic Pains

Are relieved in a few days by taking 30 drops of Mother Seigel's Syrup after meals, a retreating. It dissolves the lime and acid accumulations in the muscles and joints so these deposits can be expelled, thus relieving pain and soreness. Seigel's Syrup, also known as "Extract of Roots," contains no opium or other strong drugs to kill or mask the pain of rheumatism or lumbago, it removes the cause. 50c. a bottle at druggists.

Clearing Out Sale

EVERYTHING MUST GO

We have decided to sell out our entire stock, and to do so in the shortest time possible. We intend giving some great bargains.

We are starting the sale with a well-assorted stock of goods usually kept in a Hardware Store, practically no old stock, but all good saleable goods.

A discount of 20% will be given off the general line of Shelf Hardware, while special prices will be given on other lines. This is a great chance to get some good Bargains in Hardware.

Come Early before our stock becomes depleted
