The ordinary cough or cold, resulting perhaps from a trifling or ameonacious exposure, is often but the beginning of a fatal sickness. AVER'S CHERRY PECTORAL has well proven its efficacy in a forty years' fight with throat and lung diseases, and should be taken in all cases without delay.

The regulations for the working of the Judicial Commission instituted over a year ago by the Pope's Most-proprio have been distributed to the prelates who form part of that commission. These regulations were drawn up immediately after the publication of the Most-proprio in October last. This commission will act as a court of justice to settle all difficulties which may arrise between the persons living within the Vatican, which is allowed, by the Italian Law of Guaranteess, the privilege of extra-territoriality, and, consequently, Italian law has no force within the walls of the Vatican.

Acording to the London Times, a new agitation, an offshot of the Land League, is apringing up in the west of Ireland and threatens to give serious trouble. It is on the part of the shepb-rds, and has quietly grown to formidable proportions, nearly 2,000 members, it is said, being now enrolled. Its spirit is similiar to that of the League, and its mode of action modelled after the same pattern. Its members refuse to take the situations from which members have been unjustly dismissed, enforce certain regulations as to wages and dwellings, and refuse to work for obnoxious persons. Meetings are regularly held, new members enrolled, and money subscribed more liberally in proportion to the means of the members than in the National League.
