**© 1984**

The copy filmed here has been reproduced thanks to the generosity of:

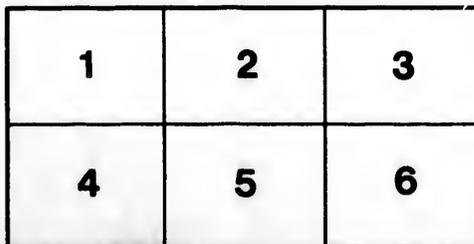

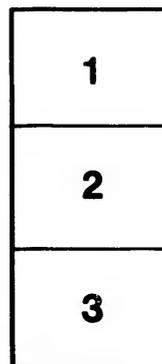

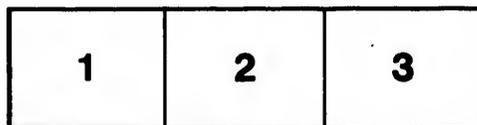

Library of the Public  
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives  
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

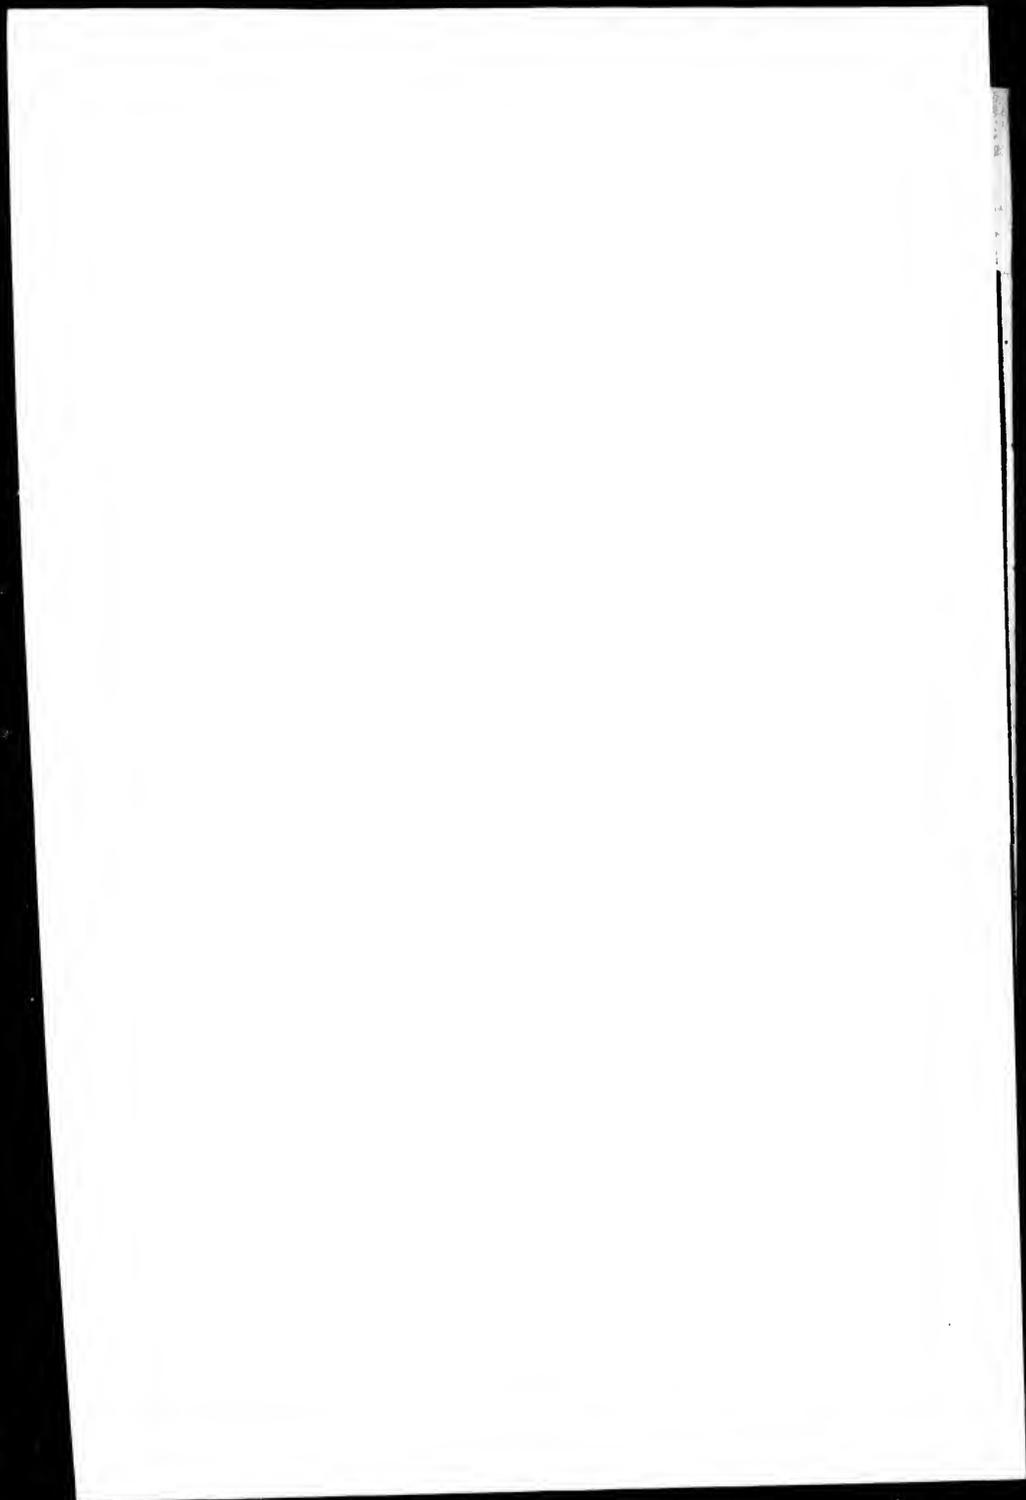

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

AND SOLD ALSO BY OTHER BOOKSELLERS.

Price \$9 per Gross, 4s. 6d. per Dozen, and 7½d. Single.

JOHN JONES, Printer St George Street, St. Lawrence Suburbs.

## EXPLANATION.

In the following Calendar, the times of the Sun's rising and setting are the times shown by a correct time-piece when the sun is in the horizon. The column marked Sun south, are the times shown by a correct time-piece when the centre of the sun is on the meridian, or in other words, when it is noon by a correct noon mark, or dial. For example, when it is noon by the Sun on the first day of January, it would be four minutes after twelve o'clock by the time-piece. The other matters are so plain as to need no explanation.

### NAMES AND CHARACTERS OF THE PLANETS.

☉ The Sun.	♿ Mercury.	♃ Jupiter.
☾ The Moon.	♀ Venus.	♄ Saturn.
♁ The Earth.	♂ Mars.	♃ Herschel or Georgiann

### NAMES AND CHARACTERS OF THE ASPECTS.

- ♋ Ascending Node.      ♎ Descending Node.
- ♌ Conjunction situated in the same Longitude.
- ☐ Quartile, or when their Longitude differs 3 signs.
- ♁ Opposition, or differing 6 signs.

### SIGNS OF THE ZODIAC.

Aries, ♈	March.	Leo, ♌	July.	Sagittarius, ♐	Nov
Taurus, ♉	April.	Virgo, ♍	August.	Capricornus, ♑	Dec
Gemini, ♊	May.	Libra, ♎	September.	Aquarius, ♒	Jan.
Cancer, ♋	June.	Scorpio, ♏	October.	Pices, ♓	Feb.

### CHRONOLOGICAL CYCLES.

Dominical Letter,	F	Solar Cycle,	28
Golden Number,	16	Roman Indiction,	12
Epact,	15	Julian Period,	6552

### COMMENCEMENT OF THE SEASONS.

Vernal Equinox—Spring begins	March	21st	2h. 7m. morning.
Summer Solstice—Summer begins	June	21st	11h. 7m. evening.
Autumnal Equinox—Autumn begins	Sept.	23d	1h. 5m. evening.
Winter Solstice—Winter begins	Dec.	22d	6h. 28m. morning.

### ECLIPSES.

In the year 1839 there will be only two eclipses, both of the sun, and both invisible at Montreal.

I. The first will be a total eclipse of the sun, on the 15th day of March; at 9h. 19m. in the morning. This eclipse will be central and total to a considerable portion of South America and Africa. The path of the central eclipse will first touch the American continent on the western coast of Chili; pass across Buenos Ayres and Brazil, in a northeasterly direction, thence across the Atlantic to the coast of Guinea, thence across the continent of Africa to Egypt, and will terminate near the northern extremity of the Red Sea.

II. The second will be an annular eclipse of the Sun, on the 7th day of September. at 5h. 29m. in the evening. The visibility of this eclipse will be confined to the Pacific Ocean. The path of the central and annular eclipse will commence upon the earth near the Island of Japan, and taking a southeasterly course will pass a little to the southward of the Sandwich Islands, and terminate near the western coast of Chili.

**31 Days. OCTOBER, 10th Month. 1839.**

But most of all bid man adore  
 The Giver of his plenteous store;—  
 Bid him in humble accents raise  
 Cheerful songs of grateful praise.

New Moon, 7th day, 9h. 19m. Morning.

1839.

1839. NOVEMBER, 11th Month. 30 Days.

Yea bid man look to Him, who crowned  
The culture of the teeming ground,  
In time to come for friendly aid,  
Midst life's alternate light and shade.

New Moon, 6th day, 3h. 17m. Morning.

# 31 Days. DECEMBER. 12th Month. 1839.

That when our *years* of life shall close,  
Our bodies may in peace repose,  
Till they ascend to bliss on high  
No more to toil—no more to die.

New Moon, 5th day, 10h. 7m. Evening.  
First Quarter, 13th day, 4h. 54m. Evening.  
Full Moon, 20th day, 3h. 50m. Morning.

**POST OFFICE DEPARTMENT.**

**REGULATIONS.**—Letters for the United States must be post-paid to the Lines, and those intended to go that way for Europe, must be post-paid to the port from which they will depart.

All Letters for Bay Chaleur, Berthier, (below.) Bic, Cacons, Gaspé, Isle Verte, Kamouraska, Rimouski, Rivière du Loup, (below,) River Ouolle, St. André, Ste. Anne Lapointière, St. Jean Port Joli, St. Roch des Aulnets, St. Thomas, and Trois Pistoles, which are to the eastward of Quebec, are despatched from that office only.

Unless attention is paid to the above notices, any letters put into the offices will remain there and be lost to all concerned.

A letter between Montreal and Halifax, 2s1d; Fredericton, 2s6d; Miramichi, 2s6d; and St. Andrews, New Brunswick, 1s10d.

A letter between Quebec and Halifax, 1s9d; Fredericton, 1s4d; Miramichi, 2s4d; and St. Andrews, New Brunswick, 1s6d.

*List of Post Offices, and Rates of Postage (in pence) and Post Office Distances to them from Montreal and Quebec.*

LOWER CANADA.

**B** Berthier, and River du Loup marked (\*) are lower down the river.

Letters for Europe, intended to go by way of Quebec, must be post paid to that place, and those meant to go by the Halifax route must be post paid to Halifax.

### MONTREAL WHARFAGE RATES.

The Commissioners for improving and enlarging the Harbour of Montreal, having given notice, that the rate of Wharfage authorized by the Provincial Statutes, 1st William IV., chap. II, and 2d William IV., chap. 30, to be levied in the Harbour of Montreal, are to be paid to the Collector and Comptroller of Her Majesty's Customs at this Port, who have undertaken to receive the same. The rates are as follows, viz.

Vessels from sea, for each day they remain in port 2s 6d each  
On Goods landed therefrom, 3d per ton measurement.  
Sten(Boats and their Barges, for each day they remain in port, 2s 6d each.  
On Goods landed therefrom, 1d per ton measurement.

Durham Boats, 3s each trip. River Crafts, 5s each trip. Ferry Boats impelled by steam, 2s 6d each trip. Bateaux, 1s each trip. Boards and Planks, 5s per raft. Fire Wood 2d per cord. On Ashes Shipped on board any vessel, boat, barge, or craft, 2d per barrel. On Beef and Pork shipped on board of any vessel, &c. 1d per barrel. On Flour and Meal, shipped on board of any vessel, &c. 1d per barrel; and in kegs, 1d. Tallow, Bee's Wax, and Honey, in barrels, 1d per barrel; and in kegs, 1d per keg. On Wheat in bulk, 1d per 100 bushels. On Oats, 3d per 100 bushels. On other Grain and Seeds, in bulk, 6d per 100 bushels. On Barley, Rye, Peas, Wheat and other Grain or Seeds, in barrels, 4d per barrel. On Apples, 1d per barrel. On Leaf Tobacco, in hogshead, 4d per hogshead; and in half hogsheads, 2d per half hogshead. On manufactured Tobacco, in kegs, 1d per keg. On Leather, in rolls, 1d per roll. On live Horses, and Pork in carcasses, 1d each. On Horses and Neat Cattle, 2d per head. On Stones from the quarries, 6d per ton. On Sand and Limes, 1d per ton.

### TOLLS ESTABLISHED FOR THE LACHINE CANAL.

	s.	d.		s.	d.
Boat, &c., of 5 tons and under	6	3	Wheat or other Grain, per bushel	0	6
" between 5 and 20 tons	8	9	Butter or Lard, per barrel	0	0
" between 20 and 60 tons	12	6	Salt, per ton	0	0
" between 60 and 80 tons	15	0	Hops, per 100 bundles	1	0
" above 80 tons	20	0	Passengers, adults, each	3	0
Fire Wood, per cord	0	6	" children each	3	0
Timber, per ton	0	8	Horses and neat Cattle, each	0	6
Merchandise or Liquors, per ton	1	9	Hogs, Sheep, Goats, Calves, or Dogs do	0	16
Ashes, per barrel	0	5	Stone or Brick, per ton	2	6
Beef or Pork, per barrel	0	3	Lime or Sand, per hogshead	0	3
Flour or Rice, per tierce	0	4	Shingles, per thousand	0	3
Flour or Rice, per barrel	0	2	Standard Pipe Staves, per do	1	5
Flour or Rice, per half barrel	0	1			

The said rates are for the whole distance between Lachine and Montreal, (9 miles,) and so in proportion for each mile of that distance, but boats, &c. loading or unloading below Lock No. 4, whether in ascending or descending, pay the same as if they passed through all the Locks. A fraction of a mile is deemed a whole mile.

Commissioners of the Chamby Canal. Hon. Samuel Hatt, W. Macrae, Timothé Franchère, René Boileau, jun. and Eustache Supras. Augustus Kuper, Secretary.

## For the Montreal Almanac, for 1839.

### AGRICULTURE.

THE improvement and prosperity of agriculture is of the first importance to the inhabitants of the Canadas of all classes.

Both the soil and climate of the Canadas are generally favorable for agriculture, and what is chiefly required to ensure its prosperity, is, that, skill, industry and sufficient capital should be applied to the judicious cultivation and management of the soil, cattle and produce.

A useful knowledge of the theory and practice of agriculture is essentially necessary to every man who would cultivate a farm successfully, and this can be acquired by those only who receive a suitable education. The education of the agricultural class is, therefore, indispensable to the due improvement and prosperity of agriculture in these fine provinces.

### WHEAT.

For the last few years, the ravages of the wheat-fly has been very destructive to this most useful grain throughout a large portion of the Canadas, particularly in the lower province. The farmers in consequence, did not sow the quantity last year, that they were accustomed to do formerly. I do not believe that any remedy can be applied that will preserve a crop of wheat from partial destruction by the wheat insect, if it should come into ear between the 25th of June and the 15th July. In ordinary seasons, wheat sown in the month of April or early in May, will be in ear about the last week of June or first week of July. If it is not sown until the 18th to the 21st of May it will not come into ear previous to the 15th July; and if that month and the following should happen to be dry, late sown wheat may escape the fly and produce a good crop. If, on the contrary, these months should happen to be wet, there is scarcely a chance that a late sown wheat will escape rust or mildew, that will be as destructive to it as the fly could be. The risk in sowing wheat late, is, therefore, considerable, and perhaps should not be incurred to any great extent by the farmer, when he can substitute some other crop, that would be more certain, and equally profitable.

### BARLEY.

Is next in value to wheat, and generally a more profitable crop for a farmer to cultivate in Canada. It is probable, however, that if barley was generally cultivated instead of wheat, a

ready sale, and remunerating price could not be obtained for it, unless it could be exported to a foreign country. Barley can be manufactured into excellent flour by proper dressing, and this flour mixed with flour of wheat in the proportion of two or three parts to one, will make good bread. Barley is subject to damage by the wheat-fly, but not to such an extent as wheat. If it could be sown so early, that it would be in ear previous to the 25th of June, it would escape the fly, as the fly does not make its appearance before that period, but from that time to the 15th of July, the insect continues to deposit its eggs in the ears of wheat and barley immediately after they are shot out, and before the grain is formed. The climate, and much of the soil of Canada is well adapted for growing barley in perfection, provided it is properly cultivated. The soil requires to be well pulverised, either by fallow, or by a green crop. Sowing in drills, from nine to twelve inches apart, is much practised in England. I have no doubt, the same mode of cultivation would answer well in Canada, both for barley and wheat.

#### OATS

Is the next useful grain, and does not require very careful cultivation. Early sowing, on moderately fertile soil, that is sufficiently drained and well ploughed, will ensure a good crop, generally. The first day that the soil is fit for the harrow in the spring, oats should be sown. The produce from early sown oats that has been properly cultivated, is greatly superior to that which is generally obtained from late sown oats. It will make infinitely better oat-meal. Indeed oats that do not arrive at perfect maturity are not fit to be manufactured into oat-meal. Oat-meal is an excellent substitute occasionally for the flour of wheat, and is now made use of to a great extent in Lower-Canada. The Canadians, of French origin, are getting into the habit of using it, and there is no doubt the consumption of this article of food will be greatly increased.

#### PEAS

May be raised in Canada in great perfection. Dry, stony or sandy soils are the most suitable for them; and even these soils should be ploughed into very narrow ridges. Peas require early sowing.

#### BEANS

Of all varieties, might be profitably cultivated here. The quantity grown at present is trifling, and might be increased a hundred fold. When properly cultivated, they leave the soil

they a  
crop.

sible t

Mess

they are grown upon in a good state of preparation for a grain crop. Windsor, and French or Kidney Beans, are excellent for the table; and the Horse-Bean, is the very best food for horses. Early sowing is necessary, and all the varieties of the bean should be sown in drills, and kept perfectly clean. Strong soil is considered the best for the horse-bean.

#### POTATOES.

The value of potatoes is so well known to the farmer that it is needless to recommend their cultivation. They have lately become subject to a disease called "Dry-rot" in the seed planted, that has produced very extensive failure in the crop for the last three years. The best remedy against this disease, is, to plant whole potatoes. If this plan is adopted, and the potatoes sound when planted, there will be no danger of failure. Every farmer who has had the dry-rot in his potatoes, should, if possible, obtain a change of seed from potatoes that was not affected by the disease. Middling sized potatoes are the best to plant, and they may be placed in the drill at from twelve to fifteen inches apart. Early planting is essential to the production of a good crop.

#### CARROTS AND PARSNIPS

Might be profitably cultivated for various uses. By proper cultivation, they may be produced in great perfection. Light soil is most suitable for the carrot, and strong soil for the parsnip. Drill culture is the best.

#### HEMP AND FLAX.

The cultivation of these plants is neglected in the British American Provinces, very much to the prejudice of the farmer. Heavy crops, both of hemp and flax, might be raised by proper cultivation. Mills for dressing hemp and flax, are, however, necessary to be constructed, *first*, because the crop would be lost to the farmer if he could not prepare it for sale, and without machinery, this cannot be effected.

In order to raise crops in the greatest perfection, the perfect draining of the soil is necessary. Without this, it is impossible to farm to advantage in British America.

WM. EVANS.

## A PERPETUAL WEATHER TABLE.

BY DR. HERCHELL.

The following Table constructed by the celebrated Doctor Herchell, upon a philosophical consideration of the attraction of the Sun and Moon in their several positions as to the earth, and confirmed by the experience of many years actual observation, may, without doubt, suggest to the observer, what kind of weather will probably follow the Moon's entrance into any one of her quarters, and that as near as the truth, that it will be very seldom found to fail.

	SUMMER.	WINTER.
If it be a new or full Moon, or the Moon enters into the first or last Quarter, at the hour of 12 at noon, or between the hours of 2 and 4.....	Very rainy	Snow or Cold
4 to 6.....	Changeable	Fair and mild Fair
6 to 8.....	{ Fair, if wind West { Rainy, if N.E. to S.E.	{ Fair and cold, { If Westerly, mild with snow { If Easterly, mild with snow
10 to midnight...	Ditto	Fair and Frosty { Very cold, unless wind N. E. to S. E.
Midnight to 2.....	Fair	
Forenoon.	{ 2 to 4..... { 4 to 6..... { 6 to 8..... { 8 to 10..... { 10 to 12.....	{ Cool, with frequent showers { Rain Stormy Snow, if wind easterly Snow, if wind westerly

N. B.—The above Table was intended for the climate of Great Britain. It has been altered so as to suit the climate of Lower-Canada, and will probably be found useful.

The earliest indications of a change in heavens from fair to bad weather, is the formation of the description of cloud in the upper parts of the atmosphere, commonly called curl cloud, a pale white woolly cloud, constantly varying in size and form. When it assumes a clotted appearance, or discharges itself in one wide unvarying paleness, it will soon be observed to thicken and darken, and to assume a form which every body can judge of.

The winds from South East to North East in summer are rainy; in winter stormy with snow. In April, May and June, North Easterly winds are often dry and of long duration.

The winds from the South West to the North West are at all times dry and cold in winter, and dry and warm in summer.

The North wind is of short duration and always chill and dry, occurring almost exclusively in the spring, and in the change from summer to autumn.

The Southerly wind is uncommon, sometimes very violent, but of short duration, accompanied by heavy rain

# H. O. M'LEOD, BOOKSELLER AND STATIONER,

AND DEALER IN FANCY ARTICLES AND CHILDREN'S TOYS,  
68, NOTRE DAME STREET, (*Opposite the Court House.*)

GRATEFULLY acknowledges the patronage hitherto extended to his establishment from his friends and the community in general. And as he has made very considerable and valuable additions to his stock this season, which he will sell at reduced prices, FOR CASH, during the winter, would again respectfully solicit a continuation of their kind support.

Among the great variety of Printed
