The copy filmed here has been reproduced thanks to the generosity of:

Library
Agriculture Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque
Agriculture Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Tous les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "À SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

ACCEPTED FOR PUBLICATION

MARCH 4, 1857.

JOSEPH HENRY,

Secretary S. L.

P R E F A C E.

S. I.

THE plan of the present publication is the same as that of Melsheimer's *Catalogue of Coleoptera of the United States, revised by Prof. Haldeman and Dr. Leconte*, adopted by the Smithsonian Institution, and published in 1853.

It is intended to be merely a *list of the species already described*, and *not a synonymous catalogue*; that is to say, that among the species enumerated, many may be synonyms, without being yet known as such. In the present state of the knowledge of American diptera, the publication of a complete synonymous catalogue is impossible; but a list like the following, is an indispensable preparatory work for the further study of that branch of Entomology.

This catalogue differs from Melsheimer's, in comprising not only the species inhabiting the United States, but those of North America in general, including Mexico, Central America, and the West Indies. Many species described originally as belonging to the last-named countries, may subsequently be found in the southern parts of the United States. This extension of the plan of the catalogue may therefore prove useful, in sometimes preventing a species already described from being considered as new, when only found for the first time within the United States.

A further addition, by which this catalogue differs from Melsheimer's, will be found in the mention of the localities, where each species has been discovered. This addition was the more necessary, as the geographical limits of the catalogue had been extended.

I have omitted all species marked simply "America," or those of which the country was entirely unknown.

In a list like this, completeness is the principal merit; the systematical arrangement is of but secondary importance. I have retained generally the generic groups adopted by Meigen and Wiedemann, avoiding the subdivisions introduced by modern authors. In cases only, when a new genus had been especially adopted for one or several new species, and had not been detached from an older genus, I have retained it, supposing that its characters were of sufficient importance to justify its formation. In the distribution of the *Asilidae*, *Acroceridae*, *Stratiomyidae* and *Tabanidae* alone, I follow closely Walker's *Supplement to the List of Diptera of the British Museum*, completing only its omissions.

For the species within each genus, I have adopted the alphabetical order, so as to facilitate reference. Analytical tables for determining the specific names, cannot be constructed from descriptions only, without comparing the specimens themselves. Attempts of this kind generally prove failures, and serve only to encourage the fabrication of new species, by giving a false security to the describer.

In quoting Macquart's *Diptères Exotiques*, I have always mentioned the volume and the page of the *Mémoires de Lille*, in which this work has been published, as well as the volume and the page of the separate edition. The numbers of the plates and figures are the same in both editions.

Dr. Harris's *Catalogue of Insects of Massachusetts*, contains many names of species which have never been described, or have been so since, under other names, but I have considered it useful to mention his names in my Catalogue. These species belong, in part, to Mr. Harris's collection, which is still extant, and some have been described lately by Mr. Walker, who retained Mr. Harris's specific names. Others also may be found in collections in this country, or abroad, labelled with Mr. Harris's names: the wide-spread connections of this distinguished entomologist, making this supposition very probable. I have thought these reasons a sufficient excuse for a deviation from the original plan of a catalogue which was intended to comprise only *described* species.

Although Walker's *List of the Diptera of the British Museum* gives the description of the new species only, I have quoted all the North American species mentioned in it, for the reason that as this collection embraces probably the largest number of species of

North American diptera now extant, it is always interesting, in a list, like mine, to find its catalogue.

In the present catalogue, I occasionally refer to *Say's manuscript notes*. These notes, in Say's own handwriting, I found in a copy of Wiedemann's *aussereuropäische Zweiflügler*, which belonged to Say, and is still preserved in the Library of the Academy of Natural Sciences in Philadelphia.

The compilation of this catalogue has been suggested and encouraged by the Smithsonian Institution; and I earnestly hope such encouragement, seconded by the assistance of all friends of natural history, and collectors in all parts of the United States, may further the progress of this branch of entomology as rapidly as the study of the Coleoptera of this country was furthered under similar auspices!

On the opposite page will be found a few brief directions for catching and preserving specimens of diptera.

R. OSTEN SACKEN.

WASHINGTON, D. C., March, 1857.

DIRECTIONS FOR COLLECTING AND PRESERVING
DIPTERA.

For catching dipterous insects, use nets, like those employed in catching butterflies.

The best way of preserving diptera after having caught them, is to pin them immediately. A slight compression of the chest between the fingers is sufficient to kill without crushing them. I prefer rather short pins, but their thickness ought to be in proportion to the size of the insect. When pinned, the insect must be a little above the middle of the pin.

Diptera do not keep well in spirits. This mode of preserving should, therefore, be resorted to in cases only when no other can be conveniently used.

FABRICIUS, O.—Fauna Grœnländæ. Hafniæ et Lipsie, 1780. 8vo.

Eighteen diptera are described.

FITCH, Dr. Asa.—An Essay upon the Wheat-fly and some species allied to it. Albany, 1845.

This is the first edition, which was published in the American Quarterly Journal of Agriculture and Science, vol. ii. No. 2. It contains the descriptions of *Cecidomyia tritici*, Kirby; *Cec. caliptera*, n. sp.; *Cec. thoracica*, n. sp.; *Cec. tergata*, n. sp. A second edition appeared in 1846, in the Transactions of the N. Y. State Agricultural Society, vol. v. A new species, *Cec. boralis*, is separated in this edition from the former, *C. caliptera*, and full descriptions with figures of both are given.

“ The Hessian Fly. Albany, 1846. (2d edit. 1847.) With a plate. Published originally in the American Journal of Agriculture and Science, vols. iv., v. (1846). Reprinted afterwards in the Transactions of the N. Y. State Agricultural Society, vol. vi. (1847).

“ *Cecidomyia salicis*, n. sp., described in the American Quarterly Journal of Agriculture and Science, vol. i. p. 263.

- FITCH, Dr. Asa.—Winter Insects of Eastern New York. (In the American Journal of Agric. and Sci., vol. v. pp. 274—284.)
 N. sp. *Culex hemalis*, *Chironomus nivoriundus*, and *Trichocera brumalis*.
- " Survey of Washington County, New York. (In the 9th vol. of the Transactions of the N. Y. State Agricultural Society.)
 Several species occurring in that locality, are mentioned in a popular way.
- " First and Second Report on the Noxious, Beneficial, and other Insects of the State of New York. Made to the State Agricultural Society pursuant to an appropriation for this purpose from the Legislature of the State. Albany, 1836. (With four plates.)
 Before the publication of the Second Report, the first had been distributed under the title of First Report, etc. 1835. This work contains 21 new American diptera.
- FÖRSTER, J. R.—Novæ Species Insectorum. Centuria I. London, 1771.
Tabanus americanus, n. sp. (*T. ruficornis*, Fab., according to Wiedemann).
- GRAY, G. R.—In E. Griffith's Animal Kingdom. (London, 1824—33. 16 vols. With engravings.)
 Several N. American species are figured in the 15th vol. The descriptions by Gray are very incomplete.
- GREEN, Dr.—Natural History of the Horse Bee. (In Adam's Medical and Agricultural Register, vol. i. p. 53; and in New England Farmer, vol. iv. p. 345.)
Gastrus veterinus, Green (Fab?).
- GUÉRIN-MÉNEVILLE, F. E.—Note sur deux Insectes Parasites de la cochenille qui font un grand tort à cette culture en Amérique. (Read in the Academy of Sciences in Paris on the 13th of Nov. 1848. Conf. Guérin's Revue Zoologique, 1848, p. 350.)
Baccha cochenillivora, n. sp. from Guatemala.
- GUÉRIN et PERCHERON.—Genera des Insectes. Paris, 1831—35. (With plates.)
Culex mosquito, R. Desv., from Cuba; and *Tabanus flavus*, Maeq., from the U. States, are figured.
- HALDEMAN, Prof. S. S.—Description of several new and interesting Animals. (In the American Journal of Agriculture and Science, vol. vi. p. 193. With figures. 1847.)
Cecidomyia robiniae, n. sp.
- HARRIS, Dr. Thaddeus William.—A Treatise on some of the Insects of New England, which are injurious to Vegetation. Second edition. Boston, 1852.
 The first edition of this work was published in 1841, under the title of A Report on the Insects of Massachusetts, injurious to Vegetation. The second edition contains many additions.

HARRIS, Dr. Thaddeus William.—Catalogue of the Insects of Massachusetts. (In Prof. Hitchcock's Report on the Geology, Botany, and Zoology of Massachusetts.)

Prof. Hitchcock's Report had two editions; in the first (1833), Dr. Harris mentioned only the generic names of the insects, adding the number of species belonging to each genus. In the second edition (1835), the specific names are also given; many of them are mere collection names, having never been published.

HAUSMANN.—Entomologische Bemerkungen. Quoted by Wiedemann (Auss. Zw. ii. 106, 4) under the head of *Milesia ornata* (*Syrphus trifasciatus*, Hausm.). I never saw this work.

ILLIGER.—Neue Insecten. (In the Magazin für Insectenkunde, vol. i. p. 206.)
Midas fulvifrons, n. sp. from Georgia.

KIRBY, Will.—Fauna Boreali-Americana; or the Zoology of the northern parts of British North America, by J. Richardson, assisted by W. Swainson and Will. Kirby. London, 1829-37. 4 vols.

The fourth volume, containing the entomological part, is by W. Kirby; nine new species are described. (*Culex punctor*, *Tipula pratorum*, *Aspistes analis*, *Empis luctuosa*, *geniculata*, *Tabanus affinis*, *zonata*, *Musca cadaverum*, *mortissequa*.)

" A Supplement to the Appendix of Capt. Parry's Voyage in 1819, 1820, containing Mammalia, Birds, Fish, and Marine Invertebrate Animals, by Edw. Sabine; Land Invertebrate Animals, by W. Kirby, etc., in 4to. London, 1824.

Ctenophora Parrii, *Chironomus polaris*, n. sp.

LAMARCK, J. B.—Histoire Naturelle des Animaux sans Vertèbres, etc. 1ère édit. 7 vols. Paris, 1815-22. 2e édit. 11 vols. Ibid. 1835-45.

The insects form the third volume of the first, and the fourth of the second edition. I have quoted the first edition. Some typical forms only of American insects are mentioned in this work, and no new species described.

LATREILLE, P. A.—Histoire Naturelle, générale et particulière des Crustacés et des Insectes. 14 vols. Paris, 1792-1805. (This work forms a part of Sonnini's Suites à Buffon.)

" Genera Crustaceorum et Insectorum, etc. 4 vols. Paris, 1806, 7 et 9.

" The articles on Entomology in the Nouveau Dictionnaire d'Histoire Naturelle, etc. Comp. above Bosc.

All these works contain the mention or description of some typical forms from N. America, but no new species.

OLIVIER, G. A.—Several entomological articles in the Encyclopédie Méthodique are by him, and contain descriptions of American species.

PALISOT DE BEAUVOIS, A. M. F.—Insectes recueillis en Afrique et en Amérique, etc. in fol. Paris, 1805–21. With plates.

Several *Tabani*, one *Chrysops*, and one *Syridaceous* insect from N. America, are described and figured.

PALLAS.—Reisen durch verschiedene Provinzen des Russischen Reichs. 1st vol. St. Petersburg, 1771.

On page 475 a *Culex caspius* is described, which Curtis (Ins. of Capt. Ross's voy.) identifies with an American species.

RONDANI, Camillo.—*Tabanus cheliopterus*, n. sp. from Carolina, described by him in the Annali delle Scienze Naturale di Bologna, 1850.

ST. FARGEAU and A. SERVILLE, authors of several articles in the Encyclopédie Méthodique, in which American diptera are mentioned. (No new species.)

ADDITION TO THE LIST OF AUTHORITIES.

POEY, Felipe.—Memorias Sobre la Historia Natural de la Isla de Cuba, Tome I. Habana, 1851—54, contains the description of
Oecacta furens Poey.—*Gen. et sp. nov.*

While the last sheet of this Catalogue was in press, the 11th volume of the *Linnaea Entomologica* (Berlin, 1857) was received, containing a very able paper of Dr. Gerstäcker, on the *Stratiomyidae* (*Beitrag zur Kenntniß der exotischen Stratiomyiden*). As this article describes several new species from Cuba and Mexico, the following changes and additions in the Catalogue become necessary.

On page 14, the genus *CYPHOMYIA*, should read thus:—

Cyphomyla Wied.

albitarsis Fab.—Guyana, Columbia (Gerst.); Yucatan (Macq.).—
Fabr. Syst. Antl. p. 80, n. 12 (*Stratiomys*). Macq. Dipt. Exot. 1er Suppl. p. 48, 3. Mém. de Lille, 1844, p. 176 (*C. fenestrata*). Walker, List, etc. V, 16 (*id.*). Gerstäcker, l. c. p. 300.
elegans Wied.—Mexico.—Wied. Auss. Zweifl. II, 58, 8. Walker, List, etc. V, 15. Gerstäcker, l. c. p. 316 (*gen. nov. Euparyphus*).
fenestrata Macq.—*Vid. albitarsis*.
pilosissima Gerst.—Mexico.—Gerstäcker, l. c. p. 292.
tomentosa Gerst.—Mexico.—Gerstäcker, l. c. p. 294.
varipes Gerst.—Mexico.—Gerstäcker, l. c. p. 283.

On page 15, between *STRATIOMYS EMARGINATA* and *FLAVICERES*, there must be inserted—

euchlora Gerst.—Mexico.—Gerstäcker, l. c. p. 328.
fenestrata Gerst.—Mexico.—Gerstäcker, l. c. p. 327.

On page 17, below, a new species must be added to genus *CHAUNA*.
erruginea Gerst.—Cuba.—Gerstäcker, l. c. p. 340, tab. iii, fig. 7.

On page 26, insert among the *Acroceridae*, the genus

Eulonchus Gerst.

smaragdinus Gerst.—California.—Gerstäcker, Stett. Entom. Zeit. 1856, p. 360.
