Escape.

NEW YORK, Feb. 24.—Found frozen in a snow derift and apparently dead, after Friday's storm, Wm. Ferry, a farmer, near Anthony, N. J., lay for 10 hours in a undertaking shop. But for the absence of the undertaker he might have been buried alive. Ferry was found lying in the snow. The body was cold, and the supposed corpse was taken to an undertaking establishment, Half a dozen neighbors gathered to watch over the body. KING EDWARD'S VISIT Recalled by the Coming of Prince Henry to New York. New York Post.)

New York Post.) Forty-two years and five months ago New York last received a royal visitor, from an European power. It was on October 11, 1860, that Albert Edward, Prince of Wales, now King Edward Vil, of England, travelling under the tille of Earon Renfrew, arrived from Philadelphia toward the close of his American tour. His four days' stay in the city was of about the same length as the coming visit of Prince Henry of Prussia, and it furnishes the only pre-edent the city authorities have for an even of this nature. As the Prince of Wales came in a special vessel sent by the British government, and landed on British soil, in Canada.there was no protunity for exercises on his arrival

representatives of President Roosevelt, te the army, the navy and the city of New York, and a great crowd lined s the way into the city to see and cheer f the Sailor Prince of Germany. The great storm against which the Kron Prinz Wihelm had struggled h for days, and which had glazed the Atlantic coast in an armor of ice, had lost its force and resigned itself to warm sunshine and cheery blue skies, so there were no regrets that the royal guest was a full day late for the entertainment provided for him. The genius of Marconi, reaching out from the storm swept coast, had definitely located the belated liner and made certain the hour that she would reach d Sandy Hook. Admiral Evans and staff met the prince. Arriving at the pier Prince thenry went on board the imperial yacht Hohenzollern, which is to be his f nome while in New York. There he freelved official calls, which at 3.30 p. m. he set out to repay. Last night he gave a dinner on the yacht, and later attended a reception in his honor at the club-house of the Deutsches Verein. Yankee Editors Make Merry at the Expense of the Truro Man.

(The New York Times.)

Hooray for Gourley! Not the grun John Gourlay of Barble, who lived in a house with green shutters, but S. E. Gourley of Colchester, Nova Scotia, who, with his blue nose high in the air, told the assembled statesmen of Ot-tawa on Wednesday that, however it told the assembled statesmen of Ot-tawa on Wednesday that, however it might be with the British government and the British parliament, he, person-ally, yearned and pined to begin fight-ing the Yankees within twenty-four hours, and would promise in air months to capture Washington and an-nex the whole United States to Canada. That's great! It's also full of swetest consolation for the inhabitants of this country, for it will go far toward re-consolation for the inhabitants of this by removing the fearsome suspicion long entertained that the production and utilization as habit not less dis-ting maniacs was a habit not less dis-ting the probosic may never grow pale, and wish that he may live and raucous-ly yammer until-well, until he cap-tures Washington and annexs the Un-ited States to Canada. He may be of-fensive to his own people, they may deplore his manners, and be humiliated by his folly, but on this side of the border he will be regarded with af-fectionate interest as a living demon-stration that our burdens are no heav-ler than those of our neighbors. If, now, Gourley will only say something about a 'wall of free' he will magni-ficently prolong the parallel he has so well begun. Boston Journal.

well begun. Boston Journal.

Boston Journal. There seems to be "truculency" on the other side of the frontier as well as on this. Witness the case of that Nova Scotian member of the Canadian par-liament who is sure that if the and his family were to go into the trenches for six months, in deadly war against the United States, they would capture Washington and annex the United States to Canada. Is the Canadian brand of whisky even more potent than the Kentucky variety? (New York Daily Tribune.) arms in the trenches would not be a we are still lacking those heavy guns on Fort Dufferin and Fort Howe. in Truro. Mr. Gourley might easily Members of the French Chamber o Deputies and the Austrian Reichsrath must look to their laurels. Those re presentatives of the effete civilization have some traps set, and capture large must look to their laurels. Those re-presentatives of the effete civilizations of the Old World may have thought that they had a monopoly of parlia-mentary Billingsgate, but the sturdy sons of the Blue Grass and the off-spring of Our Lady of the Snows will convince them of their error when the American exchanges reach Paris and Vienna. Mr. Wheeler, of Kentucky, had a few days the start of Messrs. Bourassa, of Papineauville, Quebec, and Gourley, of Truro, N. S., but, with good running, these gentlemen who are en-gaged in the innocent pastime of plung-ing the Dominion of Canada into war with the United States, will soon be on even terms with him. When the flery young orator from Paducah hears of the defiance hurled at his country by Mr. Gourley, who, with his family, would "go into the trenches and stay there for two years if need be, to fight for the rights of Canada," perhaps he will train his rapid firing guns on the bloodthirsty Canuck instead of Prince Henry; and if Mr. Gourley ever really does, as he threatens, capture Wash-ington and annex the United States to Canada, it is fervently to be hoped that he may capture and annex Charles Kennedy Wheeler, M. C., who might fitly be condemned to spend his years of exile alternately within the respect-ive limits of the township of Truro, N. S., and the parish of Papineauville, Quebee. (Portland Daily Press.) Nova Scotia seems to have developed numbers of them, to be grilled or hang ed at his good pleasure. Or he might dig a trench and pick them off with his trusty moose gun. It is really doubt-ful if this country wants to annex the United States, anyhow. If we did so, we would have to include Mr

Courier contains the annual report of J. S. Hamilton, president of the board of trade. It shows that Brantford is an enterprising and growing town, and that the merchanis are very much alive to its interests. The following are extracts from Mr. Hamilton's ad-dress to the board:— During the year new members were added at every regular meeting and our membership at the close of the year had increased to 244. 1901 has been a prosperous year to the business men and manufacturers of Brantford, and I understand that in the export trade the manufacturers have held their own. The Adams Wagon Company have erected fine buildings and have done a steadily increasing trade. The Can-ada Farmers' Cordage Co., who took over the old Consumers' Cordage Com-pany's buildings, commenced active op-erations during the summer. Another Brantford concern, the Balley Cut-lery Company, has taken over the old Wincey Mill property, and are prepar-ing to increase their output. In addition to these improvements extensions have been made by other Brantford's factories. The following figures regarding Brantford's factories. CHIEF NEWEL BEAR

An Indian 104 Years Old, Who Was Born at Andover.

PRESQUE ISLE, Feb. 21.-Newel Bear, who was chief of the old Tobique Indian tribe sixty years ago, has reached the advanced age of 104 years, and is probably the oldest Indian alive

In a sproadby the order infinite arrest today. He was one of the greatest poachers in Aroostock county near the Tobique river, and has caused much trouble although he was never caught and tried in court, a fact no doubt due to pity for the old man. Every fall, he and his oldest son, go to the woods and stay until the spring, when they return home with quantities of furs and make an annual trip to New York, where they receive a good price for the hides. He has always enjoyed perfect health until about ten years ago, when he

He has always enjoyed perfect health until about ten years ago, when he began to feel hinself losing flesh and growing weaker. He started for the woods and began to eat beaver meat, and at once felt new strength, and now claims that the beaver meat saved his life. There are four generations of his family alive, and this is especially rare in Indian families. His oldest son, Peter, is now over sevenly years old, and is one of the oldest Maine guides under Commissioner Carlton.

and is one of the oldest Maine suides under Commissioner Carlton. Newel has guided many New York sportsmen in his day, over long jour-neys, but now he goes on short trips only, as he says he wishes to sleep in his own home at night, for he knows not when the Great Spirit may call bim only, as he may no might, for he knows his own home at night, for he knows not when the Great Spirit may call him. day when Lord Kitchener is telling of the entrapping of another small body of British troops by Boers to the south of Johannesburg, and Mrs. De Wet is assuring correspondents at the Pieter-maritizburg concentration camp that she would rather see her husband die than give up, one of the best-known hotel keepers in Europe is announcing plans for immediate establishment of a large hotel of the first class in Jo-hannesburg. As the principal proprie-tor puts it, "the war will make no dif-ference in our plans. Englishmen al-ready have begun to flock down there, and there are many others whom busi-ness calls to South Africa." Only a short time ago a correspondent of the Sun in Pretoria resported that tran-quility prevailed there, in Johannes-burg and in much of the surrounding country, and that business was boom-ing and real estate values advancing. Growing industry, impatient of inter-ruption, has begun to encroach upon the battlefields in a way that must soon bring the hopeless struggle to a close. In this spectacle of the inrush of business interests, only temporarily stayed by the impediments of security against protracted conflicts in future. -New York Commercial Advertiser.

Dutch Have A Great Engineering Work in View.

Work in View. The Dutch are going to drive the sea out of Holland. The sea has been a good friend to Holland, and has kept the little country many imes from be-ing invaded by the Germans. It has also driven out French and Spanish who have invaded. But now the world looks peacefully at the Dutch, and so the Dutch ore going to dismiss the sea from their country. But they reserve unto themselves the eternal possibility of calling it back to their assistance whenever they need it. And when they call the sea will come. The Zuyder Zee has pushed its way clear into the middle of Holland, and is at present occupying 2,500,000 acres of land that would be good if it were dryed and turned into homesteads for farmers. Some of those who are going to take up homesteads in the new lands are those Boers who are neither killed mor captured, nor reconciled by the British. Under order of the state general, and with aproval of the gueen. the Dutch

nor captured, nor reconciled by the British. Under order of the state general, and with aproval of the queen, the Dutch engineers are going to start a broad causeway from North Holland to Fries-land, straight across the Zuyder Zee. A railroad will run from shore to shore, on the top of this huge dam. The driving out of the sea will cost in all about \$42,000,000. The work will be completed in about 20 years. It will reach first from the North Holland shore to the little Island of Wieringen, and thence to the oposite Friesian mainland at Priaam. Its length is thus about 25 miles.

about 25 miles. This huge dam will have two sluice ways into the sea, and it is by means of these sluices that four large tracts of land in that part of the Zuyder, which is shut in on three sldes by the land on the fourth by the dam, is to be drained. When the tide in the out-er sea is going out the sluices will be opened and the water within will flow

KING'S COUNTY NOMINATIONS

A very large crowd attended the nomination proceedings at Hampton on Saturday, and it was clear that the majority of those present were support-ers of Mr. Sproul, the oposition candi-date. Speaking continued from two till seven o'clock. Ora P. King was the first to speak, and was followed by Mr. Sproul, to whom Mr. Pugsley re-plied. Mr. Hazen was the last speak-er.

The The solemn protestations of Mr. King and Mr. Pugsley with respect to the Rothesay Hats were greeted with laughter by the crowd, who enthusiast-ically cheered the oposition speakers when they showed up the injuity of that transaction. Mr. Sproul and Mr. Hazen keenly criticised the whole pol-icy of the present government, and set forth the policy of the opposition. On the whole, the meeting was one of the liveliest political gatherings that has been held in Hampton for some years. solemn protestations of Mr. King Mr. Pugsley with respect to the

NUMBERING THE HOUSES.

As yet not a great number of people have applied to the city engineer for the proper numbers for their houses. The ten days given by the police to have this work accomplished will run out this week, and it is understood that on next Monday delinquent household-ers will be called upon to give reasons why their residences are not properly suplied with numerals. It looks as if this day of the numbering of the peo-ple would take rank in popularity with dog day in the police court. Upon those who have not compiled with the law fines will be imposed. The num-bers must be at least an inch and a quarter in height and placed in a posi-tion easily seen.

A number of residents object to the enforcement of the law at the present time. They claim that it is impossible in this cold weather to get enamel figures to stay in place and these are generally used.

PROPOSED ATHLETIC LEAGUE. The Trinity Athletic Association

The Trinity Athletic Association have secured an option on the B, and A. grounds for the coming season and will endeavor to have the co-operation of the other city athletic associations in the matter. If this can be success-fully arranged, the payment of the rent will be equally divided between the different clubs, but even though the others are not willing to join in the formation of a league Trinity is determined to carry the affair through alone and will pay the whole cost of the grounds. b) the other ends and the same successfully arranged, the payment of the rent will be equally divided between the different clubs, but even though the others are not willing to join in the formation of a league Trinity is determined to carry the affair through alone and will pay the whole cost of the grounds.

authorities towards this family was a matter of comment among the police today. Two weeks ago Andy Irvine got clear of the police court because he had se-cured a job in the woods at Spruce Lake and would be busy there until April. He was let go upon promising to take the road to Spruce Lake at once, and his first remark when ar-rested on Saturday night for being drunk on Charlotte street was to the effect that he supposed he would be given the road to Aroostook this time. He was mistaken. The journey this morning was short-from the court room to jall-and Andy will remain un-til April, in a place where there is no wood to be cut. Wesley McKeown, who was captured after a long chase by Officer Semple, and placed under arrest on the charge of fighting on City Road, stated that he had been attacked by two persons whose names he did not know and that he had only acted in self-defence. This did not exactly agree with the state-ment of Officer Burchill arrested John McGlone for being drunk on Main street between one and two o'clock Sunday morning, the prisoner lectured him on the enormity of his crime and in no polite language pointed out that the officer was not a geniteman. This did not in any way interfere with his arrest, and he was fined this morning eight dollars or twenty days. Patrick McCloskey, drunk on Mill street, and Alexander McAllister, drunk on City Road, had nothing to say for themselves. When the latter was searched, a revolver was found in his pocket. It was not loaded. McAllister was. Both of these prisoners were find eight dollars or twenty days and McAllister paid.

received it, his father being away. On Saturday he gave a similar order to the same firm. It was delivered as the other had been, but this time the elder Williams was at the yard and dis-claimed all knowledge of the order. It was subsequently discovered that young Williams had quietly removed the first bafe and sold it to his own advantage. Consequently the action that lodged him behind the bars⁶ last night.

This morning the prisoner was re manded

AS TO IMMIGRATION. It is understood that at the present session of parliament a bill will be presented in regard to immigration. The present regulations are proving very unsatisfactory and the commis-sioners at the different ports of landing find themselves without authority to deal with many cases which appear before them. The proposed legislation is said to be along lines similar to that mow in existence in the United States with the exception of the sections pro-hibiting allen labor.
