IMPORTANNT DISCOVERY.—A Paris journal states that the bad smell and taste of butter may be entirely removed by working it over in water mixed with cloride of lime. The discovery was made by a Brussels farmer, whose practice is to take a sufficient quantity of pure cold water to work it in, and put in it from 25 to 30 drops of chloride of lime for every ten lbs. of butter. When it has been worked until the whole has been brought into contact with the water, it should be worked again in pure water, when it will be found to be as sweet as when first made.
