WONT ACCEPT THE HONOR

Marquette, Mich., Aug. 3-Mayor Rush C. Culver of this city was nominated at Deroit for governor on the democratic ticbut he said last night that he would ot accept the nomination. He was chosen without his consent or knowledge.

REPORT WAS INCORRECT

(Special to The Daily News) (Special to The Daily News)
Grand Forks, Aug. 3—George Davis, who
was sentenced by police magistrate Cochrane in the police court a couple of days
ago to three months' imprisonment at hard bor and fined \$100, was charged with unding with intent to do grevious bodily narm, and not wounding with intent to kill, as previously reported.

MACHINERY

Long Delay in Arrival of Power Plant is About to End.

Allis-Chalmers Bull ck Company Explains Past Hitches and Promises Speedy Completion of Contract.

His Worship Mayor Gillett is of the opinion that the long delayed installation of the hydraulic machinery at the city power plant is at least measurably in sight at last.

ably in sight at last.

The mayor has been urging the company having the contract to make a definite statement, and yesterday obtained the following telegraphic message from J. A. Milne, Montreal, mangager of the Allis-Chalmers-Bullock

"Answering telegram of 9th, car-load electrical apparatus, complet-ing Montreal portion of order, shipped August 3. Allis-Chalmers Co. advised August 1 that generator would be shipped from Cincinnati about first of this week and accord-ing to instructions were to notify our Nelson office direct regarding waterwheel shipment, completion of which has been delayed owing to strike situation. Have telegraphed our district manager to see you immediately on his return to Nelson.

District Manager J. O. Gillice handed worship the following self-explanatory communication last evening:

To the Corporation of the City of Nelson, and His Worship Mayor Gillett: Gentlemen-Agreeable to your repeated requests relative to the delivery of the hydro-electric unit for the city of Nelson, we are pleased to submit the following in-formation from our factories:

All the electrical apparatus, with the exception of the generator, has been shipped from Montreal under date of August 3rd, and the generator was shipped from Cin-cinnati under date of August 6th. The balance of the shipment we expect to make by Aug 35, but may be delayed a little longer than this date.

This company has been handcapped on

This company has been handcapted account of the general moulder's strike for the past three months, which has made it extremely difficult to secure castings on all our work. We have secured the making of all the balance of our castings. for the Nelson job from outside parties, and at the rate these are being delivered all shipments will be completed before the time above specified. We have done everything possible under the circumstances to rush this work, even to trying to turn out rush this work, even to trying to turn out some of this work with apprentices. This, however, resulted unsatisfactorily as the workmanship was not what we cared to end out. We have done everything posng a matter over which we had no control, it has been impossible for us to do so.

The above explains fully the efforts that

are being made by our company to carry cut their contract. Respectfully submitted.
ALLIS-CHALMERS-BULLOCK, Ltd. ALLIS-CHALMERS-BULLOCK, Ltd.

J. O. Gillice, District Manager.

Nelson, B. C., Aug. 10, 1980.

While ratepayers will hardly agree with Mr. Gillice's |closing statement that "the above explains fully the efforts that are being made by our com-pany to carry out their contract," they will gather from the rest of the letter the completion of the machinery, tions for the event. ordered some thirteen months ago, and its shipment here and subsequent installation, are now measurably in sight, course that the company

carries out the terms of Mr. Gillice's atest letter. It was hoped at first that the power plant might be in working order for the Dominion day celebration; later it was confidently expected that the inauguration would at least take place at exhibition time, if not before. Now if the machinery is in place in October this community will be thankful.

FERNIE NOTES

(Special to The Daily News) (Special to The Daily News)
Fernie, Aug. 10 — J. Turnbul, general
manager of the bank of Hamilton, accompanied by H. A. Aytwin, the assistant
inspector of branches, was in town yesterday on business connected with the bank.
While in Fernie they visited the Coal
Creek mines and were much surprised at ompleteness of the machinery used

or handling the coal.

The bush fires around Fernie have not been altogether put out yet, but a con-

Corsan left for the coast last night he Great Northern, where he will join Corsan, when they will take a holi-Master Teddy Ambrey, who has been aying with Mrs. G. G. S. Lindsey for

the Great Northern.

KOMURA IS INCENSED ntreal, Aug. 10-Baron Komura, the these ambassador to Great Britain.
Sht announced, through Hon. T. Nosse,
all general to Japan in Canada, that interview published in the Canadian and attributed to nim was fictitious king of Great Britain, it was out question that he should give an

The situation at the city reservoir remains practically unchanged. The water service has held its own, but up to 9 o'clock last night the looked for gain had not appeared.

At the hour mentioned the water level was three feet down or a foot be-

low the danger mark.

With the reservoir full, as it should be, there are a million gallons of water in reserve—half a day's supply at the rate the water is now being used. The city engineer is of the opinion that this reserve must be maintained in order to protect the city from a fire

standpoint.

Properly the reservoir should be full in the morning but this is not the case now and while a gain is being made each night it is not sufficient to make up the day's loss.

Citizens are again urged to stop all stans.

waste of water, otherwise special steps will have to be taken to limit the supply for all purposes, that for lawn sprinkling and garden use coming first. The gain made at the reservoir tonight and particularly tomorrow night season no more water should be wasted.

ORDER TWO NEW SHELLS

FOAT CLUB WANTS EXTRA SINGLE AND DOUBLE SCULLS.

NEW MORAL CODE IS LAID DOWN FOR THE MEMBERS.

An important meeting of the Nelson Boat club was held last evening at the clubhouse when matters in connection with the N. P. A. A. O. regatta were wound up and arrangements made for

wound up and arrangements made for the future.

It was decided to order at once new single and double racing shells to be delivered as quickly as possible. This will permit more entries from Nelson in future regattas. Several members stated that they had lost clothing and other articles from their lockers in the clubhouse during

the present season and the matter was finally settled by passing this resolu-"That any member wearing clothes which are the property of another member or opening another member's locker, without permission, be expelled from the club after a warning."

Another complaint was that several oarsmen had been rowing lately in decidedly decollette costume and the motion to fit their case reads as fol-

lows:
"That any member of the club rowing in other than full rowing costume be expelled after being warned." Messrs. F. D. Arundel and W. H. Maudesley, being out of the city, their places on the executive will be taken by Messrs. N. S. Fraser and T. Del Des-

Brisay.

The date for the club's fall regatta was set for Thursday afternoon, September 6th, and the committees are now actively at work making preparations for the event

After passing resolutions of thanks to the citizens and others for assistance in the successful N. P. A. A. O. regatta here last month, the meeting ad

Worcester, Mass., Aug. 10.-There was isplented sculling, a number of interesting races and three or four close and exciting finishes in the elimination contests that opened the thirty-fourth annual regatta of the national association of amateur oarsers of lake Quinsignond today and nen on Lake Quinsigamond today and nine events were run off without a hitch, despite the misty rain that fell

requently during the forenoon. The association senior single sculls, run off in two heats, was the event to which oarsmen have looked forward to which carsmen have looked forward for several months. Eleven of the fastest scullers in the country started. The survivors for the finals tomorrow are Harry S. Bennett, Springfield; Frank Vesaely, New York; E. McGee, oronto; and John O'Neill, Halifax

Another interesting contest developed in the first heat of the intermediate singles and as a result of it Warnock singles and as a result of it warnock, of Springfield, and Major, of the first Bohemian, will have Henderson, of Winnipeg, and Thomas McGee, of the Ravenswood club, as competitors in the

finals tomorrow.

The sport closed with a fine contest between the Argonauts of Toronto, the New York Athletics and the Wachusett of Worcester. All three were lapped as they neared the finish and while the New Yorkers spurted, they could not catch the Canadians, who won by half length, with the Wachusetts third by ree-quarters of a length.

BRADSTREET'S REVIEW New York, Aug. 10-Bradstreet's tomor-

Canadian trade reports are still opti-mistic, and wheat crop deterioration in the Northwest due to heavy rains is reported

he had seen no Canadian newspaper men and that he was incensed at the clever but misguided enthusiasm which had led reporters in Ottawa and Vancouver, especially, to attribute ideas to him which he had never warranted, not having submitted to the interviewing since he had landed on Canadian soil on his way to the court of St. James.

While driving rivets in the paint locker, one of the hot pleces of steel fell to a quantity of varnish causing it to into a quantity of varnish, causing it to explode. Robert and William H. Wilson

WHOLE CITY

Sheriff Tuck Executes a Big Judgment Against Slocan.

Mayor, Council and Clerk all Try to Resign, but can Find no One to Take

Slocan City is in the clutches of the law. Sheriff Tuck has served a notice upon city clerk Morrison that an in-stallment of a debt owed to C. E. Smitheringale must be paid before. September 4 and if not be will immedistallment of a debt oved to C. E.

Smitheringale must be paid before. September 4 and if not he will immediately levy a rate which will cover the amount, now \$560 plus other expenses of collection, assessment, advertising and traveling. This rate, Sheriff Tuck declares, immediately becomes delinquent and if not immediately paid the defaulter, each rategayer in the city possibly will have his property seized and sold to satisfy the alloted portion of the judgment assessed. Sheriff Tuck declares he has no option and that if the city council will not pay he will have to proceed with the stern measures outlined. This is not the worst of the matter. The present amount of the debt, \$560, is but a portion of a larger debt of \$2,000 for which notes have been given by the municipality or Slocan City and which are now falling due one after another.

The first note went by default and due one after another.

The first note went by default and

judgment was given, also by default, when proceedings were consequently taken. The suit was instituted by C. E. Smitheringale to recover for expenses it curred by him in printing a municipal delinquent fax list some two years ago in his paper, the Slocan Drill of Slocan City, now defunct. The tax list was given to Editor. Smitheringale by City Clerk Smitheringale and as the two offices were united in one person the city council never disputed the amount but merely remarked that it could not be paid. After months of delinquency the debt was arudgment was given, also by default, marked that it could not be paid. After months of delinquency the debt was arranged by notes being given for the amount and when the first of these notes became due last spring it was dishonored, hence the present proceedings and the likelihood of others.

Mayor MacNeish has paid a visit to Mount Pleasant, Vancouver, in the hope of softening the heart of the newspaper man but told the sheriff that

Sheriff Tuck, on the way to the oface of the city clerk of Slocan waving

blue paper—
"I hate to do it, my word I do! But 'tis my duty to seize the town. Smith-eringale has lost all patience, and who can blame him? He should have had his money on that printing bill months But the town hasn't a dollar to "The city clerk is out, Mr. Tuck," replied the office boy.
"Out where?" the sheriff demanded.

"Fishing."
"The d—, ah he is." Looking the writ, "and this must be served -, ah he is." Looking at day. Ah, I remember, substitutional service on Mrs. City Clerk will dohand me that municipal act, young

Ah, yes, section 293, that's it-"The sheriff shall deliver a copy of the writ to the clerk of the council, or leave such copy at the office or dwell-ing-house of that officer with a state-ment in writing of the sherift's fees,

Exit to the house.

Mayor Macnish (hectoring up and down and across his office)-To be of not to be. That is the question.
Whether proud Slocan now shall assign
for the benefit of creditors, lose its precious charter, and good name, or make another levy to pay off its debts and so opposing end them. Yes, and yet will the ratepayers stand for it?
Ah, my soul, I fear it. By heaven, but we're up against it? Oh, how I do repent me that I hold this office. Ah. happy, brilliant, thought, Horatio, I shall resign. By heaven yes, this very 4th of August. Goes to desk, write out resignation and rushes to office

making.)
When the councillors heard of the mayor's action, they, too, prepared their resignations. But they are still undelivered for there appears to be no one authorized to accept them. A mayor may resign to the council or the council to the mayor, but when both go out—well, the municipal act never expected that any Canadian city would come to that.

of September.

Then the thirty days shall have expired, the time the statute gives a town or city to satisfy an execution against

BRITISH PAPER OPPOSES LOWER CHINESE HEAD TAX.

P. R. OFFICIAL SAYS MOVE WOULD BE A GOOD ONE

London, Eng., Aug. 10.—The Birming-ham Post says that whoever used his syes and nose in the Asiatic quarters in the towns and villages along the Canadian Pacific coast will have little sympathy with the petition of the Vic-toria salmon canners and Kootenay fruit growers for a reduction in the tax

fruit growers for a reduction in the tax cn Chinese. Asiatic immigration into Canada, the Post says, should be discouraged in every way.

Allan Cameron, general traffic agent of the C. P. R., interviewed regarding the Post's (criticisms, said he could imagine no better class of settlers in a country like the west of Canada. They are strong, hardy, healthful, resourceful, capable, cheerful and obedient to law.

Washington, Aug. 10.—Chinese labor will be given a thorough test on the Panama canal. Contracts calling for 2,500 Chinamen for canal work have been prepared and advertisements will soon be issued by the isthmian canal commission asking for proposals from London agents. If the plan proves a success, it is likely that many more will be secured to do the work that is too hard for the Jamaicans now employed there in large numbers.

Organized labor has offered much opposition to the use of contract Chinese labor. The Jamaican workmen have proven inadequate and sufficient Spaniards cannot be had immediately to push the work. President Roosevelt, secretary Taft, chairman Shontz and other men prominently identified with the canal work are known to have delayed employing Chinese until it became evident that the other help available was not equal to the demands. The administration hus taken the position that the canal must be dug at any cost, and aithough the president urged that there be no haste in employing Chinese, he did not stand permanently. According to the figures compiled the following are the tonnage came evident that the other help avail-able was not equal to the demands. The administration has taken the position that the canal must be dug at any cost, and although the president urged that there be no haste in em-ploying Chinese, he did not stand per-manently in the way of the present plan.

July Tonnage Was Low, Due to Work of Improving Plants—Rich Ore From the Skylark

(Special to The Daily News)
Phoenix, B. C., Aug. 10.—Today is
pay day for the large mining and
smelting concerns in the Boundary, the
amount of cash to be distributed by
them and by the railway companies a
few days later, who haul the ores and
mining supplies and smelters' products,
being about the same as last month,
namely, about \$200,000. As nearly as
can be ascertained the pay of the
Boundary for the month of July is as
follows:

was sorted at the mine, the sorting was not very closely done. These returns are considerably larger also than any heretofore received from shipments from this property.

Two other cars of ore were sent out recently from the Skylark, one of second-class ore to the Granby smelter, which gave about \$50 per ton, and any which gave about \$50 per ton, and any second-class ore to the Granby smelter, which gave about \$50 per ton, and another car of third-class ore, heretofore considered of little value, which returned \$25 per ton, the returns from the entire three cars last shipped being most satisfactory to those interested. Sinking of the main incline of the Skylark mine from the 150-foot level to

Skylark mine from the 150-foot level to the 250-foot level, is actively going on, about 65 feet of the work having been done. It is confidently anticipated that done. It is confidently anticipated that the ore bodies in the Skylark will be found in place at the lower level, and should this prove to be the case, it would appear to add greatly to the value and permanence of the property. The Skylark is owned by a close corporation, the members of which are nearly all mining men and, with one or two exceptions, are residents of Phoe-nix. They bonded the property in Oct ber, 1904, for \$30,070, and have net every payment prongily from the pro-ceeds of the slipments, being able how to meet the last payment that is now due for several months hence. Should the mine continue to improve, it is likely that an air compressing plant will be secured and even more extensive exploitation be undertaken in the

CHECKING THE RAILWAYS

(Special to The Daily News)

Ottawa, Aug. 19—The railway commission intends to send out an inspector throughout Canada this fall in order to ascertain whether the railway companies have compiled with the law regarding air brakes and automatic couplers. He will also examine the general equipment of each line in order to ascertain that the interests of the public are properly safeguarded.

"COMPANIES ACT. 1897" NOTICE is hereby given that Sidney Stockton Taylor of the City of Nelson. Barrister at Law, has been appointed the attorney of the "Dundes Mining & Milling Company" in the place of Joseph Duhamel ent has been revoked.

CANADA'S GREAT R

P. A. O'FARRELL SINGS A P THE DOMINION'S HERIT

BRIGHT LETTER WRIT THE DAILY NEWS FROM QU (Special Correspondence Quebec, July 30.—Standing

porch of the magnificent Chates tenac and looking out over St rence's noble tide and cliff-bound I am irresistibly wafted back imes and other worlds-to the Hanoverian and Bourbon kings the story of Quebec and Wol Montcalm and the elder Pitt com to me. Lally won, or would ha an empire in the east for Fran thefavorites and sycophaniswayed its king lost that empsent Lally to the scaffold. It we france but its degenerate kin lost India and Canada. In the o moment of his career George II his sceptre in the hands of Willia and with that was born the Brit pire. He founded the Anglo-Indi pire and he annexed Canada Britain.

Had France a Pitt, the valley St. Lawrence and the valley of the sissippi, the country of the Great and the territory beyond to the would have been colonized and oped under French and not unde lish influences. Pitt in his to regime smashed France's pow America and shaped the destiny America and shaped the destiny new world. It was Pitt's genus picked Wolfe for the conquest o bec, it was Pitt that made Englan tress of the sea. The dull-witted the Third could never brook hir his throne, and the mighty mi England's greatest modern stat was compelled to see a variety. was compelled to see a vapid m undo most of his work and wreck the empire which his geni created. The folly, the perversi the pretensions of George III Pitt insane and the American o to revolution.

These are the memories borne

These are the memories borne vista such as this I now behold for heights of Quebec. The elder P Burke alone of the statesmen of age foresaw the mighty destinying the people who were slowly oing the new world. Neither the G nor the still more degenerate ki France had the remotest concept it. To the rulers of France and land a century and a half ago, A was a land for slaves, for reven for court favorites to plunder. had no higher conception of its d Was it possible that Pitt could have seen the time when a commerce a than any ever seen upon the That the Mersey would float upon tawence? Was it possible that he have beheld in a vision Quebec a er mart of commerce than Livern Bristoi? It were hard indeed to but changes have taken place fa but changes have taken place to passing any ever dreamed of mighty mind of Pitt. Quebec a estuary of the St.F.Lawrence will the the seat of a commerce greater that the world has yet seen. For Que the eastern gateway of the commerce is faster than the commerce of an faster than the commerce of any try ever grew before, with the po exception of the United States of ica. Canada has already girder world its own fleets of transoliners. Last month I left Liverpone of her great ships, the Empr Britain. Five hours before we le Mersey, I saw the Campania sail but it was landed in Quebec an reached Montreal a day ahead opassengers who sailed on the Cam That is a portentious fact. I four Empress of Britain as fine a sever sailed the seas. Hardly wout of sight of the Irish coast than foundland was in view and the las of the voyage were passed look

foundland was in view and the las of the voyage were passed look the coast of Nova Scotia and the of the St. Lawrence.

The rooms, the appointments at catering on the Empress were al could be desired by the most fast traveller, and long before he r Quebec he can have his baggage ined by the customs officers and ed to its destination. When Quereached, all he has to do is to s take him to any part of Cana America. It is true that Quel some six or seven hundred miles Liverpool than the port of New it is true also that the Quebec ro it is true also that the Quebec ro fords more constant communicatio land throughout the voyage, but jaded traveller the escape fron abominable inquisitorial methods American custom house officials outweigh almost any other adv There is no waiting at the pier i bee and no absurd and gross ex by express companies and cab of And the returning tourist en ro Chicago, St. Louis, St. Paul and land and Seattle will soon find ou he will save time and money by I his periodical trips to Europe in dian ships such as the Empress o ain. This is a very extraordinary in the development of inter-ocea fic. The swiftest fleet of ships I ing the Pacific ocean are owne operated by the Canadian Pacifi way. There is not one of them loaded to its full capacity every and it is the ambition of the sam and it is the ambition of the sam pany to own and operate the fleet best and most comfortable ships between America and Europe, a magnificent Empress ships have outclassed some of the finest shi

ing out of New York. Canada is creating great ocean fleets of its own to handle its own merce and to capture a large in the tidal wave of American tra the tidal wave of American tra Europe. I commend these facts study of American transportation nates, who allow English and (firms to reap the lion's share of the en harvast of American en harvest of American ocean tr en harvest of American ocean street commend these facts also to the orities at New York and Bosto Washington, that they may devis scheme to do away with the interangence, delay and extortion travellers entering American posubjected to. But the great less Americans is that Canada is be

uth 20 chains; thence east 40 chains more less along the lake shore to point of

tial post, thence north 10 chains; thence ast 20 chains; thence south 10 chains; nce west 20 chains more or less along he lake shore to point of comme

CANADA'S GREAT RICHES

P. A. O'FARRELL SINGS A POEM OF THE DOMINION'S HERITAGE

A BRIGHT LETTER WRITTEN TO THE DAILY NEWS FROM QUEBEC

(Special Correspondence) Quebec, July 30.—Standing on the porch of the magnificent Chateau Frontenac and looking out over St. Law rence's noble tide and cliff-bound shores am irresistibly wafted back to other times and other worlds-to the days of Hanoverian and Bourbon kings. Here the story of Quebec and Wolfe and Montcalm and the elder Pitt comes back to me. Lally won, or would have won, an empire in the east for France, but thefavorites and sycophants that swayed its king lost that empire and sent Lally to the scaffold. It was not France but its degenerate kings that moment of his career George II placed his sceptre in the hands of William Pitt. and with that was born the British empire. He founded the Anglo-Indian emire and he annexed Canada to Great

Had France a Pitt, the valley of the St. Lawrence and the valley of the Mississippi, the country of the Great Lakes and the territory beyond to the Pacific would have been colonized and devel-oped under French and not under English influences. Pitt in his too brief regime smashed France's power in America and shaped the destiny of the new world. It was Pitt's genius that picked Wolfe for the conquest of Que-bec, it was Pitt that made England mistress of the sea. The dull-witted George the Third could never brook him near his throne, and the mighty mind of England's greatest modern statesma was compelled to see a vapid monarch undo most of his work and almost wreck the empire which his genius had created. The folly, the perversity and the pretensions of George III drove Pitt insane and the American colonies

to revolution. ese are the memories borne of rista such as this I now behold from the heights of Quebec. The elder Pitt and Burke alone of the statesmen of their age foresaw the mighty destiny awaiting the people who were slowly coloniz ing the new world. Neither the Georges nor the still more degenerate kings of France had the remotest conception of it. To the rulers of France and Eng-land a century and a half ago, America was a land for slaves, for revenue an for court favorites to plunder. The was it possible that Pitt could have fore-seen the time when a commerce greater than any ever seen upon the Thames or the Mersey would float upon the St. Lawrence? Was it possible that he could have beheld in a vision Quebec a great-er mart of commerce than Liverpool or Bristol? It were hard indeed to tell but changes have taken place far surpassing any ever dreamed of in the mighty mind of Pitt. Quebec and the estuary of the St. Lawrence will become the seat of a commerce greater than any the world has yet seen. For Quebec is the eastern gateway of the commerce of Canada and that commerce is growing faster than the commerce of any country ever grew before, with the possible exception of the United States of Amer-Canada has already girded the world its own fleets of trans-oceanic liners. Last month I left Liverpool in one of her great ships, the Empress of Britain. Five hours before we left the Mersey, I saw the Campania sail away, but I was landed in Quebec and had reached Montreal a day ahead of the passengers who sailed on the Campania. That is a portentious fact. I found the Empress of Britain as fine a ship as the passenger and the campania as fine a ship as the campanial of the campania as fine a ship as the campanial of the campania as fine a ship as the campania as fine as the campania as fin Empress of Britain as fine a surp ac-ever sailed the seas. Hardly was she out of sight of the Irish coast than Newfoundland was in view and the last days of the voyage were passed looking at the coast of Nova Scotia and the shores

catering on the Empress were all that could be desired by the most fastidious could be desired by the most fastidious traveller, and long before he reaches Quebec he can have his baggage examined by the customs officers and checked to its destination. When Quebec is reached, all he has to do is to step off the ship and board the train that will take him to any part of Canada or take him to any part of Canada America. It is true that Quebec is some six or seven hundred miles nearer iverpool than the port of New York; it is true also that the Quebec route af fords more constant communication with land throughout the voyage, but to the jaded traveller the escape from the abominable inquisitorial methods of the American custom house officials will outweigh almost any other advantage. There is no waiting at the pier in Quebec and no absurd and gross extortion by express companies and cab drivers. And the returning tourist en route to bicago, St. Louis, St. Paul and Portland and Seattle will soon find out that he will save time and money by making his periodical trips to Europe in Cana-dian ships such as the Empress of Brit-This is a very extraordinary phase the development of inter-ocean traf-The swiftest fleet of ships ploughof inter-ocean trafing the Pacific ocean are owned and rated by the Canadian Pacific rail-There is not one of them is not loaded to its full capacity every voyage and it is the ambition of the same com pany to own and operate the fleetest and est and most comfortable ships sailing between America and Europe, and the magnificent Empress ships have already outclassed some of the finest ships sail-

of the St. Lawrence.
The rooms, the appointments and the

ing out of New York. Canada is creating great ocean-going eets of its own to handle its own commerce and to capture a large part of the tidal wave of American travel to Europe. I commend these facts to the study of American transportation mages, who allow English and German irms to reap the lion's share of the gold n harvest of American ocean traffic. I mend these facts also to the authies at New York and Boston and Vashington, that they may devise some eme to do away with the intolerable nnoyance, delay and extortion that travellers entering American ports are subjected to. But the great lesson for Americans is that Canada is building

her own commercial fleets to handle her ever growing traffic and that there must be something rotten in the State of Denmark when America cannot do the same.
Sometimes I find Americans who are

supremely sceptical of Canada's growth and destiny. It is not an ill natured scep-ticism; the same thing exists in England. Not one man in a million over there ha Not one man in a million over there has the slightest conception of the prospects and possibilities of Canada. From end to end of the dominion there is abounding life, energy and prosperity. The amazing industry and thrift of the French element is fast transforming into meadow, orchard and wheatfield the fertile vales and dells of Oueric that a generation past were of Quebec that a generation past were of Quebec that a generation past were clothed with primeval forest. There is not a city or hamlet of Ontario that is not surging with life and energy, and the city of Toronto is unquestionably one of the most progressive and ambitious metropolitan cities of the world.

But it is not in Quebec or Ontario tha you see the secret of the great, new life and hope of the dominion of Canada. The people of Quebec and Ontario have hardly yet risen to the full conception of the destiny in store for the dominion. Travel from Montreal to North Bay through the valley of the Ottawa and you will see on every hand evidences that a new Canada is being evolved—a Canada of wonderful industrial activity and achievement; but you see also that its growth is slow, conyou see also that its you see its beautiful capital city gloriously situated above the Ottawa river, and its piles of magnificent government buildings, which yet leave a sleepy impression on your mind, as if the rulers of the dominion have even still some probabilities of their own or their country's rulers of the dominion have even still some misgivings of their own or their country's destiny. It is not very long ago since lord John Russell, accompanied by Tom Moore, visited Canada. He was a great English statesman in his day and his word was more potent in the political affairs of Canada than the wishes of the people of Canada combined. It was while boating canada combined. It was while boating with lord Russell on the Ottawa that Moore caught the plaintive melody that he wedded to the immortal song "Row,

he wedded to the minorate Brothers, Row."

The English statesman and the Irish poet saw in Canada a lonely and picturesque country from which England would forever draw material for its wooden walls and its commercial navles. They never dreamed that Canada was to become the granary of the world, nor had they the dreamed that Canada was to become the granary of the world, nor had they the least conception that in a generation the seat of power would be transferred from Westminster to a parliament house to be built upon a lonely cliff overlooking the river over which they were then gliding. What would lord John Russell have said if told that hardly would he himself have disappeared from the busy stage of life to the silence and oblivion of the tomb, before the people of Canada would have assumed the shaping of their own destiny and the moulding of a nation that would yet rank among the greatest. Lord John Russell is but a memory and his shade

and the moulding of a nation that would yet rank among the greatest. Lord John Russell is but a memory and his shade owes whatever immortality it possesses to the friendship of Moore. The Canada of his day is dead also, but another and happier has taken its place.

Canada has the greatest waterpower in the world. It is available everywhere, from Dawson City to Montreal, from Vancouver to Quebec. It is waterpower that lights its cities, digs out the gold and copper and silver and lead and nickel from its mines, and it is waterpower that will ultimately run all its railroads and place Canada among the foremost manufacturing nations of the world. You see the beginning of those things at Sault Ste Marie, and at Ottawa, at Vancouver, and at Montreal, at Toronto and at Bonnington Falls. Recoilect that Canada is but in the infancy of its great industrial and commercial career. Western Canada is yearly sending out through the Soo canal from the ports of lake Superior a tonnage greater than out through the Soo canal from the ports of lake Superior a tonnage greater than all Canada furnished a generation ago. Port Arthur or Fort William may be called the port of Winnipeg, and over the great lakes Canada now exports 100,000,000 bushels of wheat yearly, and more hogs and steers than all Canada raised when Tom Moore and lord John Russell were enjoying a summer holiday on the Ottawa. Indeed, when the dominion government enabled sir William Van Horne and his associates to run out the Canadian Pacific railway to the Pacific ocean, there were but few Canadians who did not deem the enterprise a to run out the Calman the results the Pacific ocean, there were but few Canadians who did not deem the enterprise a mad one. Western Canada, between the great lakes and the Rockies was then a howling wilderness. There was scarcely a hog or a steer or an acre of wheat raised west of lake Superior. A motley crowd of hunters, trappers, half breeds and Indians were scattered over the boundless prairies of the west, but they were as remote from civilization as a dusky Arab, or the Soudaness slave traders. To the world at large Western Canada was a vast,

mole from civilization as a dusky Arab, or the Soudanese slave traders. To the world at large Western Canada was a vast, unpeopled desert and nothing more, and it was that desert that the builders of the Canadian Pacific and the fathers of the dominion of Canada undertook to transform into a region of happy homes and cultivated farms, and the transformation has, indeed, been marvellous.

Recollect that the prairies and rolling foothills of the Canadian west cover an area greater than all continental Europe, if we eliminate Russia. Recollect that in this territory there are 1,000,000,000 acres of rich and prolific soil that will yield bread and beef and pork and butter and cheese and milk and cream and honey to feed a billion people. Recollect that there is room here for a farm population of 250,000,000 and you will get some idea of the vastness of the wonderful country that 30 years ago was wilderness and desert. Staid and conservative men looked upon the builders of the Canadian Pacific as the wildest of dreamers, but the Canadian Pacific has developed into the greatest and most perfect transportation system ever known and the wilderness of western Canada is now being gridironed with railroads more rapidly than any part of the world has ever known before. Something like \$200,000,000 has already been appropriated for immediate railroad construction in the Canadian northwest and that is to be pushed as fast as men can be secured to do the work. The Hill system is pushing its tentacles up through this wonderful country and the Mann and Mackenzie system has already thousands of miles built. Another Grand Trunk Pacific is pushing through it out to the Pacific, while the Canadian Pacific is rushing work at a hundred different points to feed its mighty railroad. North, south, east and west railroad construction is moving onward and yet the cry, and the need for more railroads is heard on every side. Hundreds of thousands of pioneer farmers ward and yet the cry, and the need for more railroads is heard on every side. Hundreds of thousands of pioneer farmers of Nebraska. Minnesota, the Dakotas and Kansas, have sold out their lands in America and migrated across the Canadian border and settled in the Canadian Northwest and are changing it into a rich and cultivated land. The wilderness of the past generation is already becoming the gran-

ary of the world. The finest pork and beef and poultry raised on the American con-tinent can be had in the wonderful pro-vinces of Alberta and Saskatchewan and this vast country has become the El Dor and of the home seekers of Europe and America. How happy is the lot of the European exile who leaves behind him a nightmare of balleful political and econo-mic conditions and settles here in a land of overflowing plenty under conditions more advantageous to the tiller of the soil than those enjoyed by him in any part of Europe

or America.
Run out over any one of the railroads Run out over any one of the railroads through this vast agricultural country and you will see the wondrous evolution taking place, the older settlers dwelling in fine farm houses in the midst of groves and gardens and highly cultivated fields and fine herds of cattle, the settlers of today living still in tents while the land is being slowed and the wheat sown. When that is plowed and the wheat sown. When that is done the log cabin or the little wooden shack will shelter the ploneer till he reaps his crop. There will be many a long day before him ere his toll is done, before he before him ere has not is done, better has guitable shelter for his little folks, ere the land has brought to the high state of cultivation in which he sees his neighbors, but he knows that the land is rich and the crops certain to yield great and his is the joy of life transforming the wilderness into fields of golden grain and rich meadow and he toils and is happy. There are those who will not envy the

there are those who will not entry the life of the ploneer. They prefer the flare and flames of the city with its heartaches and its tragedies, but to me there is something supremely sweet in a life passed amid he odor of plowed fields and flowery mead Out in Alberta, not far from the glor-ous peak known as Crow's Nest, I chanc ious peak known as Crow's Nest, I chanced upon a Tipperary peasant who had grown to manhood in that wondrous golden vale overshadowed by Cashel's Sacred rock. His father had but 12 acres or land, and after the rent was paid, there was not enough left to properly clothe and feed the family. It was grinding toll was not enough left to properly clothe and feed the family. It was grinding toil from year's end to year's end and from dawn to dark, and as the children grew up there was nothing for them but exit if they would escape a life of poverty and drucgery in Ireland. Twenty-five years ago my Tipperary friend came to Canada and his strong arms helped to run out the Canadian Pacific across the desert and mountains. He was thrifty and industrious and by the time the railroad was completed had accumulated a neat little sum, though he had not forgoften the folks at home. He bought a section of land, of 640 acres, in Alberta for \$2.50 an acre. In time more railroads came and his cattle multiplied and he was growing 40 bushels of wheat each year off this land. Then he sent to the old country for his sweet faced peasant girl, whose memory was ever with him, and married her. He had already built a home for her out in the wilderness. There it is over there nestling in groves and flowers. On every hand one sees highly cultivated fields or rich pasture or golden grain and herds of cattle as fat as any raised in Tipperary's golden vale. Look at those rosy faced children with blue eyes and golden hair romping on the lawn, happy as larks, and see how father and mother enjoy their play and merry peal; of laughter. Every tree and shrub and flower was planted by the master of those broad acres, those rich pastures and fields of golden grain tree and shrub and flower was planted by the master of those broad acres, those rich pastures and fields of golden grain were all created out of the wilderness by him; those fine herds of cattle and flocks of sheep are all his and so are the him; those fine herds of cattle and flocks of sheep are all his and so are those extensive barns and outhouses. He owns now 2000 acres of the finest land and at Coleman he has a substantial balance with his bankers. He lives like a patriarch. His daughters will be educated at Montreal and his sons will go to the Jesuits at His daughters will be educated at about and his sons will go to the Jesuits at Spokane. The Irish land lords to whom his sires paid tribute for generations do not live as well nor are they today as rich as sires paid into are they today as rich as he. He is the creator of his own fortune and all that you see surrounding his house. Ask him how he likes this country and he will burst forth in a eulogy. He will tell you that last fall he harvested 20,000 bushels of the finest from 500 acres of land. He will show you returns from 200 head of cattle he had recently shipped to Birkenhead, where they fetched the highest prices. He will tell you of the long, cool, delightful days that are his in Alberta, the bright, blue skies, the beauty of the dawn, the glory of the golder. sunsets of this Arcadian land. He der, sunsets of this Arcadian land. will tell you that the winters are not bitwill tell you that the winters are not bit-terly cold as in Winnipeg or 'Illinois, for the Chinook winds come over frequently from the Pacific wafting warmth and mois-ture and balmy breezes to the people of these happy regions. In the land of his birth there was nothing for him but drud-gery and poverty, while here he is priv-ileged to be an empire builder, for has he not helped create out of the desert and wilderness a grat, new, rich and pros-perous country.

And this is the type of the men who And this is the type of the men who are creating a rich and prolific land out of the wilderness of, a generation ago.

These pioneers are Dutch, French, Irish, Swede, Italians and Russians, as well as Canadians and Americans. They are all enthusisatic about the country and all proud of being there in the upbuilding of a great, new country. In ten years this country will be raising as much wheat as the United States, and before the century closes it can grow wheat enough to supply the world with bread. These are portentious facts worthy of consideration and study.

study.

Moreover, Canada with unrivalled and untouched and unlimited waterpower and its cheap food supply is destined to beits cheap food supply is destined to become a great manufacturing country. Already great steel plants have been built
at Sydney, Nova Scotia, and at Sault Ste.
Marie. At the Crow's Nest Pass of the
Rocky mountains are coal fields of immense extent, from which is produced the
very finest quality of coal. It is but a mense extent, from which is produced the very finest quality of coal. It is but a question of time when British Columbia will take her place as a great producer of steel and iron, for the raw material is there in boundless quantities. Moreover, British Columbia ranks among the richest mineral countries in the world. Its mines of gold and copper and silver and lead and zinc are of fabulous extent, and less great seaports on the Pacific are the its great seaports on the Pacific are the hts great seaports on the Pacific are the natural gateways of ever increasing commerce with the orient and Alaska. Ponder on all these facts and you will begin to realize the prospects and possibilities and the mighty destiny of the dominion, and in your mind's ever you can see the and the mighty destiny of the dominion, and in your mind's eye you can see the flags and ships of all countries crowding one another on the mighty river that rolls croward to the sea past the heights of Quebec. P. A. O'FARRELL.

NO MORE SECRECY. New York, Aug. 8.—The Mutual Life Insurance company was ordered by Justice Giegrich today to furnish a correct list of its policy holders to the international policyholders'

THE WEEK IN MINING

Le Roi No. 2 Company Has Obtained Control of the Vancouver.

Excellent Showing of Mining Lompany for Year-Good Reports Continue from One Lardeau District.

The past week has ben an unusually active one in mining circles all over the district and the chief incidents are only referred to briefly in this summary.

Yesterday a transaction was closed her hrough Paul S. Couldrey, manager of the Le Roi No. 2 mine at Rossland, whereby the Le Roi No. 2 company, which has been making handsome profit this year, has obtained control of the Vancouver, a well known shipping silver-lead property in the Slocan. The ore is not wanted for fluxing but the company desires to branch out. It is un-derstood that the deal includes the sur-rendering of the lease held by M. S. The new owners will actively evelop the Vancouver and increase the

force at work.

The excellent financial showing mad at the annual meeting of the Second Re-lief Mining company, held here yester-day is a matter of congratulation. The details of the year's work and the re-celpts will be found appended. While no definite news is forthcom-

ing regarding the reported rich find at the Silver King, the officials admit that unusually rich ore has been encountered in satisfactory quantities.

The reports from the Lardeau of further rich discoveries continue to come

in and some of the specimens brought to this city have caused a sensation. The details of the first smelter returns from the Summit property, the bonding of the Nevada, Columbia and the Ed-ward D. in the Sheep creek section, all make very pleasant reading to mining

men. At Rossland a satisfactory strike is reported on the well known White Bear, and a shipment of 60 tons from that property will appear in next weeks output as well as 1200 tons milled at the Le Roi No. 2, both of which items arrived here too late to be inserted in to-

day's statement.

Over in the Boundary it will be noted that the Snowshoe appears in the shipping list for the first time in two and a half years.

The output of the several mines and the receiving at the various smelters for the

receipts at the various smelters for the past week and year to date, in detail are

As an appendix to his decision in the Pendray case at Victoria, the text of which was published in Sunday's issue of The Daily News, commissioner Pet-ers submits to the lieutenant-governor in council the following statement explaining his reason for deciding as he did. Summarizing the charge and his verdict, he says: "The charges were:

did. Summarizing the charge and his verdict, he says: "The charges were:

1. That Mr. Green, or some person in the department, gave away the amount of the Pendray tender to Mrs. James Anderson, or some other person, before 12 o'clock on the 7th October, with the object of fleecing Pendray.

2. That Mr. Green agreed to lease the lot in question to Mr. Pendray at a nominal rent, under a threat from Pendray that unless the land was given to him he would expose the whole transaction.

2. That the tender put in by Mrs. Loggie was not really hers, but that her name was only used as a blind, and that the real tenderer was Anderson.

After carefully considering all the evidence adduced, and I have been careful to obtain every witness who could give any information, I am clearly of the opinion that none of the charges are true, and that the evidence given very clearly establishes their falsity, and with regard to the whole transaction nothing has been done by Mr. Green, or any official in the lands and works department in the slightest degree worthy of censure.

I shall proceed to give my reasons for

ment in the slightest degree worthy of censure.

I shall proceed to give my reasons for this finding. The first charge is a very serious one. It would be apparent that if information as to any particular tender is given out to other tenderers, the whole system of sale by tender would be useless. Such a proceeding is not only unfair to the person whose tender is disclosed, but is calculated to cause loss to the province by tending to keep down the amount of subsequent tenders.

The ground upon which the charge in question was founded was that one Percy Brown (Pendray's agent, a real estate agent of repute, had stated that before 12 o'clock on the 7th October, Mrs. Anderson had come to his office and shown that she knew the exact amount of Pendray's tenders.

had come to his office and shown that she knew the exact amount of Pendray's tender, and had stated the amount to him. Brown, and told him he should bid more if Pendray wanted to get the property, and from this it was assumed that Mrs. Anderson must have obtained her information from the department.

The evidence satisfies me that Mrs. Anderson did not know the amount of the

derson did not know the amount of the Pendray tender, but from calculations made by other parties (to whose evidence made by other parties (to whose evidence I will refer) she was possessed of a very close estimate of what Pendray would probably tender; that when she went into Mr. Brown's office she was by no means certain of the amount of the Pendray tender; that she went there for the purpose of getting information upon this point, and by the rather sharp ruse of pretending to have information, which she did not have, she threw Mr. Brown off his guard to such an extent that he himself actually gave an extent that he himself actually gave her the required information and satisfied her that the calculations she already had were correct, so that if knowledge of the Pendary tender was obtained at all it was obtained-not from Mr. Green, but from Mr. Brown. I may say that Mr. Brown now practically admits this to be the case

now practically admits this to be the case in his evidence.

The history of how the Loggie tender came to be put in is as follows: The notice calling for tenders came to the eye of Mr. Murray, a real estate agent, and he immediately came to the conclusion that he would try to get one of his clients to tender. He was moved to do this for two reasons. Firstly, he had been concerned in the sale to Pendray of his property at Sehl's point, and he contended that in Second Relief 16 233 the sale to Fendray of his property at Sehl's point, and he contended that in some way (not necessary to inquire into) at Eugene 23,689 the sale to Fendray of his property at Sehl's point, and he contended that in some way (not necessary to inquire into) he had not been well treated in the matter of the commission, and that Mr. Brown had reaped the reward of his (Murray's) work. He felt sure Pendray would tender for the lot, and he thought he might get even with Pendray on the old score if he got some one else to tender enough to beat Pendray's probable tender. Secondly, he saw a fair chance of making money on the

leal.

Having concluded he would induce som person to tender he made a careful cal-culation to ascertain what Pendray would probably tender. I may say that Mr. Murculation to ascertain what what he probably tender. I may say that Mr. Murray was in a peculiarly good position to make this calculation. He was intimately acquainted with the property and with Pendray's ideas of value, and I see nothing surprising in the fact that he and Pendary came to about the same valuation. The result of his calculation was that he concluded that Pendary would probably value the property at \$3000. That in order to cover the value he (Pendray) would probably tender \$2000, or thereabouts, and that a second tender of \$2000 would be successful. Having come to the conclusion he approached Dr. Gibbs on the subject, showed him the calculations and tried to get him to tender. Dr. Gibbs was not then able to go into the matter. He next tried Mr. Laird and gave him the same information. If we stop at this point it will Mr. Laird and gave him the same mation. If we stop at this point it will be seen that before Mrs. Anderson or her husband had anything whatever to do not led husband had anything whatever to do with the transaction Murray had settled the amount of any second tender he could get, and had given the figures to Dr. Gibbs and Mr. Laird, who were both called as witnesses. It is clear that Murray got no information from the department, but that the amount of \$2000 was arrived at by well considered calculation. I think a fair consideration of this evidence removes every shred of suspicion that might arise from the fact of the tenders being so nearly of the same amount.

the fact of the tenders being at the same amount.

Up to Thursday before the tenders were to be put in, Murray had accomplished nothing, but on that day he met Mr. James Anderson at his club, and laid the matter.

of the property. Anderson seemed pleased with the proposition and spoke of some person in Seattle who might take it. Anderson told his wife about the matter, and particularly upon Friday evening Anderson and his wife talked the matter over, and it is clear Anderson gave his wife the particulars of Murray's calculation. On Saturday, at about 11:30 a.m., Mrs. Anderson had the interview with Brown referred to.

Brown's office is on Broad street, near PETERS GIVES REASONS

PETERS GIVES REASONS

TELLAS WHY HE DISMISSES VANCOUVER WORLD CHARGES

CASTS A DOUBT ON TRUTH OF MRS.

ANDERSON'S STORY.

Brown's office is on Broad street, near Trounce alley. At the very same time, and also that it was an accident that he should be on Broad street grown was accident that he should be on Broad street just when his wife was at Brown's office. I have my doubts on that point. I am disposed to think the whole thing was arranged between Anderson and his wife beforehand. I will state my reasons for that view later, and will now continue the narration of the facts. When Harrison and Anderson met, Anderson explained the position of the I will state my reasons for that view later, and will now continue the narration of the facts. When Harrison and Anderson met, Anderson explained the position of the affair to Harrison and gave him the figures and advised him that it was a good chance. Harrison immediately went to Mrs. Loggie, who is a stenographer at the Driard hotel, and laid the matter before her, with a strong recommendation that she should tender. As a result of this, she, in company with Harrison drove down to the department and put in a tender. Neither Anderson nor his wife had any communication with Mrs. Loggie, In fact, she did not know either of them. I am perfectly satisfied that so far as Mrs. Loggie is concerned she put in the tender relying solely on the judgment of her friend and advisor, Harrison, and that she did so for her own benefit, and was not acting for anyone else. Mrs. Loggie gave her evidence in a very satisfactory manner, and by the production of her book, which she allowed me to see, showed very clearly that she was well able to finance a transaction, of this kind. The charge that Mrs. Loggie was acting as a blind for the Andersons was in reality not strongly urged. In fact, in an article in the issue of the World of the 18th May last, it was practically withdrawn. Whilst entirely believing that the Andersons did not hope at some later date to try and obtain an interest in the deal if Mrs. Loggie succeeded—probably by repurchase from Mrs. Loggie, I am satisfied that the Andersons had no interest whatever in it, I am not satisfied that the Andersons had any hope to get into the transaction later on or not, and in any case I have only the evidence of the Andersons upon the point, and the last few lines of Mrs. Anderson's evidence referring to her having by signal told her husband that the amount of the tender was right, and her subsequent complete change of this statement, such a change being made at the instance of her husband, convince me that no finding depending solely upon their evidence can safely be made.

As to

shows that no such threat was made, and there is no foundation whatever for the charge.

As to the third charge, namely, that Mrs. Logsie was merely a blind for the Andersons, I have already disposed of this.

I might stop at this point as what I have already geported disposes of all the matters referred to in my commission, but in fairness to the editor of the World, I think it proper to express the opinion which I have formed—that the editor of the World cannot be blamed for publishing the charge that information had been given out at the time he did. I am further induced to express this opinion, upon the ground that Mr. Taylor, counsel for Mr. Green, cross examined Mr. Higgins very closely with a view to showing the contrary. In order to arrive at a just conclusion on this question I must put myself in the position of the editor at the time he published the articles and forget the evidence that I have before me now, but which he did not have then. I think the story told by Mr. Brown, unexplained by further evidence, was calculated to arouse suspicion—a suspicion which has happily, been completely removed.

Appended hereto is a complete report of the evidence and all proceedings had before me, with the several exhibits produced, also the original commission... All of which I respectfully submit.

FREDERICK PETERS, Commissioner 30th July, 1906.

OFFICIALS OF DOMINION COPPER CO. LOOKING OVER SMELTER

FORCE AT THE SNOWSHOE MINE IS GREATLY INCREASED

(Special to The Daily News)

Phoenix, B. C., Aug. 4.—Al party of officials and friends of the Dominion Copper Co., Ltd., are in camp, on a trip of inspection of the mines and smelter of the company, arriving over the Great Northern. They include Warner Miller, president of the company, of New York; M. M. Johnson, consulting engineer and managing director of the company, of Salt Lake city; Arthur M. Wickwire, director, member of the law firm of

managing director of the company, of Salt Lake city; Arthur M. Wickwire, director, member of the law firm of Untermeyer & Marshall, New York; S. W. Trayler, engineer, head of the Trayler Engineering Co., New York; H. H. Melville, lawyer, Boston, and D. E. Woodbridge, M.E., of Duluth, with the United States Steel Corporation.

Accompanied by manager T. R. Drummond, the party yesterday visited the Brooklyn, Stemwinder, Rawhide and Idaho mines of the company, an excellent find of copper ore having recently been made in the lower working of the Brooklyn mine, running 2.3 per cent copper and \$4 in bold with some silver. Today they will visit Greenwood and the company's smelter at Boundary Falls, where preparations are being made for the installation of a third furnace, the largest yet used in any smelter in Canada. The officials are pleased with the way things are going at the mines of the company and will spend several days in the Boundary.

The British Columbia Copper Co., Ltd., has received one of the three mamnoth furnaces which it is installing at the smelting works, and it is now on its foundations. The other two will follow soon from Milwaukee, where they are being manufactured. J. E. Mc.

the smelting works, and it is now on its foundations. The other two will follow soon from Milwaukee, where they are being manufactured. J. E. Mc-Allister, the manager, expects to have the first furnace blown in some time by the end of this month, and the entire plant in operating order in September. The improvements at smelter and mines will cost about \$400,000.

The force at the Snowshoe mine, which was recently re-opened, has been increased to 20 or 25 men. The pumps are being kept steadily at work unwatering the shafts, and a couple of shipments of ore were made to the Trail smelter this week for sampling purposes. George S. Waterlow, of London, England, representing the old Snowshoe company, stated that the lease for the property to the Consolidated Mining & Smelting Co. of Canada, Ltd., is for two years, or when 125,000 tons of ore have been shipped from the mine, when a price will be agreed on if possible.

SECOND RELIEF PROFITS

EXCELLENT FINANCIAL SHOWING OF LOCAL COMPANY

MORE THAN PAID FOR PURCHASE PRICE IN A YEAR

The annual general meeting of the Second Relief Mining company was held at the head office of the company in this city

yesterday afternoon.

yesterday afternoon.

President A. B. Cooper of Nelson, was enabled to present to the shareholders a remarkably satisfactory statement, the details of which are appended.

The property is situated 13 miles southwest of Erie and was purchased from Finch and Campbell of Spokane, a year ago last March. The present company was formed and active work commenced a year ago last April. It will be noted that the subscribed capital was \$30,000 and that the net profits to June 39 last were \$23,086.52. The receipts from bullion and concentrates amounted to \$85,843.16, and the mine profit was \$21,033.16. To the net mine profit must be added the net value of some 18 tons of concentrates at the mine, or about \$7000. The financial statement, which is an eminently satisfactory one, to June 30, 1906. eminently satisfactory one, to June 30, 1906, is as follows.

PROFIT AND LOSS ACCOUNT

Cr.
Receipts bulion and concentrates..\$85,843.16

Mine operation and surface labor. \$35,983.40 Mill operation, ore sorting, etc. 11,033.48

Tram, hauling, marketing, etc. 8,092.69

Maintenance 1,553.44

Management and general expenses 3,148.05

Nelson office expense 88.70

Mine profit for period 21,033.46 \$85,843.16 Mine profit, above \$21,033,46 Boarding house profit 1,859.48 Stores acct. profit 143.61 \$23,086,56

Plus the net value of about 18 tons of concentrates at the mine awaiting ship-ment, estimated at \$7000. The officers and directors of the com-pany, who were all re-elected yesterday

for the current year, are as follows:

President, A. B. Cooper, Nelson; vicepresident, O. E. McElfresh, Osage City,
Kansas; directors, J. E. Hyde, Redding,
Kansas, and senator H. B. Miller, Osage

BEWARE THE U. S. BRAND.

Koenigsburg, Aug. 8.—At a meeting of the German butchers association held here today it was decided to apply to the imperial government to precautions to protect the trade of German butchers from unscrupulous Americans, and that no foreign tinned meat be used for the army or navy.

AT THEIR OLD TRICKS. Columbus, Ohio, Aug. 8.—Reports of the analysis of about fifty samples of potted ham, potted chicken and luncheon sausage and similar canned meats show the presence of preserva-tives. One sample labelled "Potted chicken" was found to be veal.

VANCOUVER'S WIN AGAIN. Vancouver, B. C., Aug. 8.-The result of the lacrosse game today between Vancouver and the Maple Leafs was 5 Vancouver and the Maple I to 4 in favor of Vancouver.

HONORABLE JOHN COSTIGAN New Brunswick's "Grand Old Man" comes out strongly in favor of "Fruit-a-tives." Who has not heard of the Honoralde John Costigan? He is to-day one of the most powerful, as well as one of the oldest, figures in Canadian politics.

He was one of Sir John Macdonald's ablest lieutenants, and for nearly 20 years held various portfolios in the cabinet.

To-day at the age of 71, he is the idol of the electors of New Brunswick, and a power to be always reckoned with in Parliament.

His rugged eloquence—biting sarcasm—and ready repartee—make him at once the dread of his opponents and the delight of his conferes.

When a public man of the Hon. John Costigan's position voluntarily testifies to the marvelous cure effected by "Fruit-a-tives," it is bound to carry convincing weight with the whole Canadian people.

Was ever medicine put to a severer test than this?

Here was a great Public Official, who had suffered for more than 30 years with Chronic Constipation. The leading physicians of Ottawa prescribed for him without affording any permanent relief. Finally, as a last resort, "Fruit-a-tives" were ordered. And in THREE MONTHS, Mr. Costigan WAS WELL.

"Fruit-s-tives" did in THREE MONTHS, what doctors and drugs failed to do in THIRTY YEARS.

Unlike liver pills, anti-bilious pills and all preparations containing calomel, cascara, senna, licorice, etc.—"Fruit-actives" act like fruit DIRECTLY ON THE LIVER. They are also also as a sense as a sense as the sense as a sense a arouse this organ to vigorous health—strengthen it—and increase the flow of bile. It is the bile, given up by the liver, which enters the bowels and makes them move.

Unless the liver is active and excretes sufficient bile to move the bowels regularly and naturally every day, there is bound to be Constipation. And the only remedy that

will cure Constipation is one that puts the liver in a healthy, active condition as "Fruit-a-tives" do. active condition as "Fruit-a-tives" do.

Do you suffer with Chronic Constipation?

Are you billious?

Is the liver inactive?

Is the stomach out of order?

Does the head ache?

Do your kidneys trouble you?

Is the akin disfigured with pimples?

Is the appetite poor?

Take "Fruit-a-tives." They sweeten the atomachergulate the liver, kidneys and bowels-clear the skim-and build up, strengthen and invigorate the whole system.

FRUIT-A-TIVES LIMITED,

Carnefac Stock Food 15 THE

ROCK FORMING MINERALS (Continued)

Amphiboles are the next most impor tant minerals. They are divided into with other metals frequently present. In several classes according to the way color it is usually red or brown. composition. Hornblende is the chief mineral of this class. It is essentially and iron. There are distinct groups of ing the aluminous, embracing the more abundant dark green, brown and black original rock. varieties Hornblende has abundantly riginally aujite . The pale non-aluminous hornblendes are found among gneisses, crystalline limestones, and other netamorphie rocks, whilst the dark varieties, though also found in similar si nations, sometimes even forming the entire masses of rock as in hornblenderock, are the common forms in granitic extent in the formation of rocks. Caland volcanic rocks, like svenite, diorite,

Pyroxene Groups.—The most important minerals in this group are the of deposition from water or as a secre-sujites. They like the hornblendes, are tion by plants and animals; (2) as a civided into two groups, first the nonluminous or pale green varieties; seblack varieties, such as the common ery similar to that of hornblene nale variety being chiefly in gneisses, marble, etc., and the darker varieties ener as essential constituents into many igneous rocks such as diabase, basalt

Olivine is another important silicate of magnesia and iron. It forms an essential ingredient of basalt and occurs especially of ordinary limestone or arain many galebros. As its name would gonite. It is called bitter spar on ac-

ironstone or spathic iron; usually occurs Garnet.—This mineral is often an crystalline in association with metallic ores, also in beds and veins of many crystalline rocks particularly with lime-

Of the remaining rock forming min-erals gypsum and barytes are the chief sulphates; apatite, or phosphate of lime, the principal phosphate; and fluorite, or fluorspar, the most abundant fluoride. The sulphides have already ben tacken up in previous articles.

CORRESPONDENCE T. T., Nelson, B. C.—The large piece of rock you left is an ordinary silicious country rock, mainly composed of quartz. The smaller piece is a schistose rock.

The smaller piece is a schistose rock. Both will carry gold in small quantities. F.E.C., Salmo, B. C.—Your samples are as follows—(1) calcite or crystalline limestone; (2) the same colored bluish; (3) the same colored brownish; (4) a schistose rock; (5) this sample really requires to have a microscopic examin-ation of it made, though it apparently consists mainly of hornblende it belongs to a class of apparently a kin to diorite; (6) chiefly composed of hornblende (see today's article): (7) is a sandstone carry-

ing a fair percentage of lime. s. R. M., Trout Lake, B.C.—Your sample is a clay-ironstone, but as you say, it must contain a considerable amount of spathic iron in the latter's deep brown form. Spathic iron is a carbonate of iron and is often found in combination with clay or talc when the name clay ironstone is applied to it.

J. W. Kaslo, B. C.—The mineral in the piece of quartz you submit for exam—

The attendance was not a record the piece of quartz you submit for examination is too small to determine correctly. It would be advisable to obtain P.S. Crawford Bay-Your sample con tains ruby silver, gray copper and gal-ena in quartz. It will probably run high them on and assist financially.

for it is a specular hematite, with a deep red streak which seemed to you to deep red streak which seemed to you to indicate proussite.

T. L., Ymir, B.C.—Your rock is chloritic rock and will probably only carry a very small percentage of nickel

W. B., Erie, B. C.—Your No. 1 sample is a very dark brown variety of zinc blende; will most likely carry good gold values. No. 2 is a graphitic schist. No.

L. S., Kokanee, B.C.—The fine powdery substance you send is an infusorial earth. It is sometimes put up in boxes and sold as electro-silicon for cleaning brass, and silver ware.

TWAS AN EASY VICTORY

NELSON BOYS DEFEATED ROSS LANDERS BY TEN TO ONE.

COAST LACROSSE ROW DEVELOPS INTO A FREAK BABY SHOW.

The lacrosse match at Recreatio park yesterday afternoon was some-thing of a walkover for the home team for out of town games occurred in Rossland in about the first ten minutes and from that time the issue was never in

The old trouble about getting players for out of twon games occurred in Ross-land in this instance and they came over rather weak. The report from Rossland that Sangster was en route to Vancouver to join the team there proved to be an error for he is to be stationed in the Golden City for the Jenckes Machine company. He came over with the Rossland team yesterday, but eight days on the train had told on nis condition. Even with this handi cap however, he put up a good game for the visitors.

But to the game itself. Nelson won

by ten goals to one and had the locals been so minded they could have rolled up an extra one or two in the last quarter. W. H. Deacon was prevailed upon to act as referee and he started the fun only half an hot. site.

Rossland rushed the Nelson goal but
the strong defence saved and the ball

went to centre where it see-sawed back and forth with an occasional shot on the Rossland flags which were saved excellently by Campion. Donahue and Stead came together rather heavily and the former went down with a nasty cut which necessitated the attentions of Dr. Hall. The injury was caused by an accident and was greatly regretted an accident and was greatly regretted by both sides. Facing off it was seen that Stead was resting to even up the teams. A minute's play, however, re-suited in first blood for Nelson, C. Jeffs doing the trick. Time, five minutes and twenty seconds. The next goal was shot in quick order by Steel and Nelson had a lead of two. Time, fifty seconds. This concluded the scoring for the

two. Time, fifty seconds.

This concluded the scoring for the first quarter but there was hard playing and Campion covered himself with glory by making some marvelous stops between the Rossland flags. Then Dr. Hall, who had just returned from attending to Donahue, was required to look after a bad cut which McQuade had suffered. This was caused by

Bishop but was entirely unintentional. Play was resumed with all men on and Rossland made a strong attempt to score but the Nelson defence again demonstrated its value. The ball went the other way and Stead placed it in the net. A longer interval of play then intervened before Wallace again located the nets. At half time the score was four goals to nil in favor of Nelson

As for the actual play, it could not be called brilliant although at times both teams put up some very pretty lacrosse. The Rossland boys lacked team play and were very poor in their passing while Nelson used a neat combination and their passing was noticeably better. The star player of the day was the Rossland goal-keeper, Campion, and he certainly played a grand game. It was largely due to his excellent work that the score against Rossland was not very much larger. Rossland was not very much larger. Sangster and Archie Macdonald put up good lacrosse but were fighting a losing

game. Steel was the bright and shining luminary on the Nelson team and Ber Davidson also loomed up occasionally As for the referee, as did not have much to do but he seemed to be in an awful hurry to get it done. The rules call for ten minutes rest at half time but Deacon was only going to allow five. Both teams had it in for him for this but Deacon was remark-

The attendance was not a record breaker but Manager Deasy hopes that the crowd is only holding back for the big game next Thursday with Regina. The local team will stand a good chance of winning from the visitors and ought to have a crowd of rooters to chee

Sir Thomas Shaughnessy' Gift to Nelson Agricultural Society

Trophy Promised'a Year, Ago Will Soon bo Finished and Will be Immediately Shipped West

President J. J. Malone of the Nelso Agricultural society has just received a letter from Sir Thomas Shaughnessy otifying him that in accordance with his promise made here last year when visiting the exhibition, a handsome Sterling silver cup, made of silver mined, smelted and refined in British Columbia, will be sent on here immedi-ately to be offered as a prize for the fruit and vegetable display at this year's fair.

year's fair.

Everyone who knows the president of the Canadian Pacific railway is well aware that a retentive memory is one of his many striking characteristics. Sir Thomas has in the present case given another demonstration not merely of his faculty for remembering, but of his fondness for keeping a promise once given. In his letter to Mr. Ma-lone, herewith appended, Sir Thomas draws attention to the fact that his handsome and very acceptable gift to the association is presented by himself individually and not in his official capacity as president of the C. P. R. The fair directors at their next meeting will decide just exactly what dis-position is to be made in the prize list

of the "Shaughnessy cup."

The letter from Sir Thomas to Mr.

Malone is as follows:

Montreal, July 31st, 1906.

J. J. Malone, Esq.,
President Nelson Agricultural and
Industrial Association,
Nelson, B. C.

Nelson, B, C.

Dear Sir:—

When at Nelson last year I had the pleasure of attending the exhibition of your association and promised a cup to be competed for in the fruit and garden vegetable department as the committee of your association might determine. There has been great delay about getting the cup completed but the silversmiths now advise that they will be able to send it to me in the course of a able to send it to me in the course of a few days. It will, I think, be a very handsome one, made of silver mined, smelted and refined in British Colum

I notice that your prize list is already out, so that the cup may be too late for this year. However, if you will kindly tell me to whom to send it,

it will go forward by express just as soon as it reaches me. Please understand that I am giving this cup individually and not as president of the Canadian Pacific Railway company.

Yours truly, T. G. SHAUGHNESSY.

SEEKING EASY GRADE

goals to nil in lave.

The second half opened well for the stors, Roy Clothier making a pretty sh and scoring their first goal. Steel aought that it was time for another or Nelson and got it, and five minutes later he added another and just before quarter time Bell thought he ought to be in the running, so scored too. This made it seven to one.

In the last quarter Nelson made three tallies Steel scoring twice and in Stead once. Deacon thought things were too slow, so he ruled off Joes were too slow, so he ruled this slow in the Grant Northern to be deat this slow. Malliken had the Grant Northern to be deat this slow in the form the J grade on this section has long been a matter of common knowledge, and the Great Northern people are by no means satisfied to construct on the present located line without a further attempt to find some more feasible route. Two engineers have been doing more or less work in this connection and a vigorous effort will at once be made to solve the problem if possible

and show up something a little better than a 2.5 per cent grade.

His honor judge Clements was present at the county court sittings which opened at 10:30 this morning. The knowledge that the case of Rex vs. Jones was to come up for hearing created more than usual interfor hearing created more than usual interest in the proceedings. This was an appeal from conviction by the stipendiary magistrate last June on a charge of undervaluation for customs of a team of horses by J. W. Jones of this city. Jones was fined \$100 and had to pay \$133 in costs. Jones appealed the case and at the July sixtings it was adjourned at the request of counsel for the crown until today. Inspector of customs J. S. Clute of Vancouver, was on hand this morning as a witness. The crown was ready this time but the appel-lant was not. D. Whiteside, counsel for Jones, produced affidavits as to the imposbility of securing some of their importan witnesses from the other side of the line, and asked for an adjournment, and the matter will now be thrown over to the
