Dispatches read in the House of ommons confirm the reports that an armistice of a week had been arranged between the Mussulmans and Christians at Selinos, Island of Crete, at the instance of the British, Italian and Russian consuls. Mr. Curzon added that the consul had done his best to calm the Christians, intimating that the Christian outbreak at Selinos was due entirely to the belief that the Christians had been massacred at Canea, and to the encouragement received from the presence of the Greek warships and soldiers. Both Christians and Mussulmans declared that order and Mussulmans declared that order

TURKEY. London, Feb. 25.—In the course of a speech delivered in London last evening, Right Hon. George J. Goschen, First Lord of the Admiralty, defended the action taken by Great Britain in regard to Cretan affairs, in terms similar to those used in the House of Commons. Mr. Goschen also repudiated the assertion that the itish Government was acting in the interest of Turkey. The British ships, overawing the Mussulmans in the seaports of Crete, he declared, had saved thousands of Christians from massacre. Besides this, the British ves-sel were harboring refugees and supplying them with the Lecessaries of life. Lord Salisbury and Right Hon. Lord Salisbury and Right Hon A. J. Balsour, First Lord of the Treasury, Mr. Goschen announced, would make clear statements in Parliament regarding the future of the island. Meanwhile, he declared, no one who had read the decirations of Mr. Balfour, M. Hanotaux, the French Minister of Foreign Affairs, and Baron Marschal Von Bieberstein, the German Foreign Minister, will believe it possible that Crete will ever return

to the rule of Turkey.
The London Daily News says that the statements to be made in Parlia-ment by Lord Salisbury and Mr. Eastfour regarding the Cretan situation are to the effect that the powers have agreed to Lord Salisbury's proposals, and have decided to liberate Crete from direct Turkish rule. An Athens dispatch says: Two of the most influential newspapers of the town, the Akropolis and the Nea Hemea, urge that in deference to the demands of the powers, the army be

"Of course some explanations are required. For instance, Ontario receives some \$200,000 more from the Dominion act and subsequent legislation; but on the other hand the Provincial Government of Quebec received \$663,087 from licenses, while the Ontario Government appears to have received only \$286,172, the balance being left to the municipalities. Moreover, Quebec levied nearly half a million by direct taxation, while Ontario had only the duties on successions, which brought in \$165,-100.

## The Inauguration.

Preparations for the Event of Next Week.

The Great Ball at Washington and the Dresses to be Worn.

From the Independent.

Time is speeding on, and signs of the inauguration are at every turn, and preparations for the ball well under way. Not the least interesting thing to many people, though not all women, is the published account, describing in detail Mrs. McKinley's in-augural ball gown. We are informed that it is a "Paris fabric" made in Chi-cago. This recalls the gowns worn by Mrs. Harrison and Mrs. Morton at the scribing in detail Mrs. McKinley's Inaugural ball gown. We are informed that it is a "Paris fabric" made in Chicago. This recalls the gowns worn by Mrs. Harrison and Mrs. Morton at the ball when Mr. Harrison was inaugurated. The material was not a "Paris fabric" but brocaded satin of American manufacture. The patterns were designed by an American woman, Mrs. Harrison's having the golden-rod brocaded in pale yellow on the silvergray satin ground. Every article in the gown was of American manufacture, even to hooks and eyes, and the silk for the loom was grown and spun in America. The idea of protection thus carried out was, of course, premeditated, and Mrs. Harrison and Mrs. Morton were extremely proud of their ball gowns, which were quite as rich and elegant as the finest gown of "French creation" seen at the ball. They were unique, for the pattern of each was dstroyed, and no more of the brocades were ever manufactureed, as they were designed and woven expressly for the inaugural ball. Mrs. Harrison had a small piece left afer her gown was completed, and about a year later she used it for dressing a doll, which was sent over to New York to a charity bazar, and the doll was sold for \$100. The little girl who got it was not only the happy possessor of a lovely doll, but a historic tool in the series of the work and where every one is more cases, and a few bottles in the more aggravated forms, or a permanent cure.

Tumor Rodway seems been laboring in child. For years Dr. Radway has been laboring in the vineyard of medical science in improving the vicinity and the vicinity accomplished, so that every inserted in the vicinity accomplished, so that every ingredient used in Radway's Sursaparillian Resolvent and the Ready Relief and Radway's Pills are the pure curative principle of Sarsaparillian Resolvent and the survey sarsaparillian Resolvent and the form of the weak decoctions of the way's Sarsaparillian Resolvent and the survey sarsaparillian Resolvent and the Radway's Sarsaparillian Resolvent and the survey sars was sold for \$100. The little girl who got it was not only the happy possessor of a lovely doll, but a historic doll as well.

The former etiquette carried out on

inauguration day, of the outgoing President entertaining the incoming at luncheon, has been of late observed by a dinner instead, given on the evming preceding the inauguration. This, of course, gives more time, and is more satisfactory, for it is far more convenient. I think the change was made at the close of President Cleveland's Mrs. Civeland entertained Mr. and Mrs. Harrison at dinner on the evening before inauguration day. Presi dent and Mrs. Cleveland will give Mr. and Mrs. Hobart on the evening of the third of March. It has been he custom for not only the new Pre sident and his Cabinet to attend the inaugural ball, but the ex-President and his Cabinet also, bringing together the two Administrations on this occasion

RADWAY'S SARSAPARILLIAN RESOLVENT cures with astonishing rapidity SOLVENT cures with astonishing rapidity diseases hitherto considered incurable, and invests those marked with the seal of death with new life, vigorous health and strength, with the purest and richest blood that ever flowed through the veins of man, woman or child.

Dr. Radway, New York—Dear Sir: For tencouragement of others in similar circum stances to what I have been, I think it right for me to return my heartfelt thanks to you for the beneit! I have received from the use of the Radway medicines. I had been afflicted over six years with tumor in the abdomen. Had been to six of the best doctors I could hear of in Iowa. They all told me the same story, that my trouble was out of the reach of medicine, and that it would in time kill me. I happened to see in your Almanac about tumors being cured. I immediately, as a last resort, resolved to try your treatment. To my great surprise I soon experienced good effects, and with only using three bottles of the Resolvent, one of the Ready Relicf, and by continuing on with the Pills longer, I was completely cured. I was so enlarged that I was 4 feet 2 inches around, while now I measure 2; feet around. Before using your medicine I had not laid down in six months. Now, if this sketch will be of any benefit to suffering humanity, I am willing to have it published. Yours with respects.

Key West, Fla., Feb. 25.—A passen-ger from Havana, who has just landed that Dr. Ricardo Ruiz was killed by Fonsdievela, the Spanish Governor of Guanabacoa. He says Gov. Fonsdievela visited Dr. Ruiz in his place of confinement and violently questioned the prisoner. The latter resented the Governor's brutal manner, and this so angered Fonsdievela that he seized a club, struck the unfortunate man on the head and so caused his death. Havana, Feb. 25, via Key West.— There is anxiety in official circles as to the outcome of the strained rela-tions existing between the United States consul-general here, Gen. Fitz-hugh Lee, and his Government on account of the solitary confinement here for nearly 300 hours of Charles Frank-Scott, an American citizen, in vioation of treaty rights. New York, Feb. 25.—The World this morning has the following special dispatch from Washington, Feb. 24: "The residuation of Consul-General Lee, for ded from Havana by mail, has been recived."

blegram was received at the State Department today from Minister Taylor, saying that Minister De Lome had advised the Madrid Governmen to accede to any request the United states Government might make. President Cleveland has sent a peronal dispatch urging Gen. Lee to re-onsider his resignation, basing his request partly on the ground of past friendship. In response to this the President received today a long tele-gram from the general informing him on plain terms of his controversies with Secretary Olney as to what constitutes proper protection of American citizens in Cuba. In a much shorter dispatch, Gen. Lee notified Secretary off here last night between Queen's Olney that his conclusion to immediately retire from the office of consul-Secretary Olney cabled to Gen. ## Mother's Congress.

Interesting Message From Its President

To the Women of America - The Objects of the Organization Ably Set

Forth.

Washington, D. C., Feb. 24.-The first National Congress of Mothers cannot fail to form an epoch in the history of social movements at the end of the nineteenth century. Viewed from the standpoint of the work accomplished in the past six months, I do not hesitate to say that the organization has a brilliant future. sketch the past work is to outline the future spirit, ends and aims of the National Congress of Mothers.

We desire to have it always a univers a non-sectarian organization. We want no social distinctions, no unnecessary parliamentary rules and regulations, no laws or bylaws. We will have only the broad code of sister women laboring for the great end of womanhood, the training of good men and women for our glorious Republic. As Hans Balin says: "Let there be fewer studies of isms and asms and more attention given to the bone and sinew of our country, the growing boys and girls. Let there be fewer balls and fancy dress for the

children, and good, healthful play in comfortable garments substituted inized effort on the part of both par-ents, and not of mothers alone. But because mothers from the earliest ages have been the recognized factor in the forming of the character of the child, I have endeavored first to attract and concentrate the attention of maternal love to this great movement.

Again, the history of our country has clearly shown hundreds of times that when women take hold of a measure it focuses national attention. Where the end of an organization is such a noble and elevating one, it will, I know, be heartily indorsed by the masculine as well as feminine element of our people. The earnest enthusi

that the seed has already fallen on good soil. We expect a speedy and abundant harvest.

It is with the consciousness that the ly broke my heart when he didn't even child is of primary importance in solving the social problem of latter-day civilization that the National Congress of Mothers called upon the nation for a hearing. There are those who claim know me. And then when they took to think that misery, the sin and the degradation in the world today, must have its counterpart in the ages to come, even as this age is now reflecting the lower depths of life that have been obscured by the twilight of ages. This is a terrible belief, one which acculowitedges evil as a more potent factor than good. Such a theory could not maintain Unself in the face of evidence offered by the pupils in any properly conducted kindergarten. The places of annual meeting will be likely to vary each year, so that the members all localities will be equally provided with an opportunity for attendance. The national officers will maintain a permanent office in Washington. They will supply literature explaining the purpose of the congress; they will give suggestions as to books lpful to clubs and to individuals interested in this work; they will pre-pare a programme for the annual conerence, and notify all the members of the city selected for such meetings. In addition to this, an account will e kept at the national office progress of all work which will not be given at the annual meetings through delegates. In this a perfect history of this movement will be yearly recorded.

l'o Investors... The COLORADO GOLD MINING AND DEVELOPMENT COMPANY, in presenting their guaranteed stock, offer an investment yielding three times what the Savings Banks pay, just as secure, with every prospect of a much larger dividend and an opportunity of increasing the value of your investment many

This is an opportunity seldom offered, and worthy of the serious consideration of those looking for an absolutely safe, yet profitable, investment.

So confident is the Company of its position and future profits, that in subscribing for the number of shares desired it is not necessary to pay the full amount down unless you wish, as we will accept 25c per share, leaving the balance to be deducted from dividends declared until the stock is fully paid for.

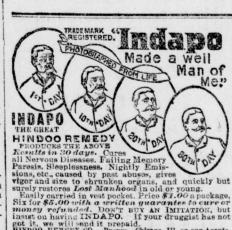

We believe the cash and stock dividends declared within the next two years will more than return the present cost of the shares, leaving the fortunate holder with his stock at no cost to himself and greatly enhanced in price.

The body of ore in sight in four Kern County property is enormous in quantity, and by reducing the cost of mining and milling to less than \$2.50 per ton, as the improvements about to be undertaken will do, should enable the Company to pay dividends of three times the present rate. There is no guess-work about this, for our product being gold never varies in value, and knowing the cost of production enables us to estimate our profits with an absolute certainty impossible in any other business.

Send for our prospectus. It will interest you and is worthy of a careful perusal, showing, as it does, a company conducted on a business basis, and the most successful of its kind in the Dominion to-day. Personal interviews invited.

Interesting Information Concerning

Recent Surgical Operations. In the 29th annual report of the inspector of asylums for Ontario, already referred to by The Advertiser. there is interesting information in regard to certain surgical operations performed at the London asylum in the cure of mental diseases. The work, which has been conducted under the general supervision of the superintendent of the asylum, Dr. R. M. Bucke, has been largely in the hands of Dr. charge, there was a gas light there Died in a Doctor's Office - A Revolver to show is that operations performed primarily for the purpose of removing tissues from certain classes of female
