UNIVERSITY'S NEW SCIENCE HOME

Formal Opening of Physics Building—Means Much to Education.

The splendid new physics building, which has been built on the university grounds, under the new regime was yesterday afternoon formally declared open by the Lieutenant-Governor Sir Wm. Mortimer Clark, in Convocation Hall, before a large and representative assemblage of Toronto's professional and social classes. Dr. Falconer presided, and amongst those seated on the platform were:

Premier Wilfrid Hon. Dr. Pyne, Hon. Col. Matheson, Sir Wm. R. Meredith, Chief Justice Moss, Dr. Pritchett, and G. R. R. Cockburn, Lady Clark and Miss Clark were present.

Dr. Falconer introduced Dr. Loudon, the ex-president of the university, who prefaced his detailed sketch of the steps which had been taken and of the difficulties which had been overcome in founding the department of physics in the university and of bringing it to its present pitch of prosperity by publicly offering to his successor, Dr. Falconer, his hearty congratulations upon his appointment. He had been the day previous, he continued, highly gratified in hearing Dr. Falconer's conception of the place and function of the university in the state, and also by the unanimity with which Dr. Falconer's appointment had been approved by the other universities represented by the faculties, by the alumni, and by the friends of the institution.

He explained that the establishment of the physical laboratory had been the outcome of long and arduous discussion, and from its modest beginnings in 1858 down to its present magnificent proportions, they had been compelled to surmount many obstacles. About 1870 the claims of technical education were brought before the legislature, and steps were then taken to establish an agricultural as well as a technical college. Strong representations were, however, made against either institution having any connection with the university, and at that time and for years afterwards their students had been denied the privileges and advantages of practical instruction in the laboratory. The first equipment for the physical laboratory was provided in 1876. And the disastrous fire of 1880 had in many ways proved to be a blessing in disguise, as it led to the present building.

In the early days the volume of work in the laboratory was very small, compared with what it had since become, and in 1876 the strongest of the staff consisted of one-half of a professor. (Laughter.) This strength had now been increased about tenfold. In recent years the room had become congested and so superstitiated that it was decided to inaugurate a public movement in order to secure a new laboratory. This movement was organized by the Alumni Association, as well as by the authorities of Victoria University, Colleges, and by the Royal College of Dental Surgeons.

But eventually and now happier days have dawned, and most important changes had been made in the equipment of this department, improvements which had only been rendered possible through the recent improvement in the finances of the university.

Her ship had at last come home, and her golden age was just begun. The phrase, scientific equipment, now possessed a new and extended meaning, and many labor-saving devices were practically abolished former difficulties connected with experimental work. It was at the present time only necessary to touch a button and the thing was done.

He repeated for their comfort and consolation in the future what had been said to him in their early days, so full of difficulty. As for the eminent scientific man abroad who was now laboratory was progressing he had told this gentleman that their efforts in respect to colleges, and nothing but ill-will. "Then," replied this gentleman, "you are getting on."

In regard to the department of physics under its new head he expressed the hope that after a long and fitful fever it had entered upon a period of well-earned repose, during which it would devote itself in peace to its great work. That the students, learning to use their hands as well as their heads, would imbibe the true scientific spirit. That this department would be the home of research, and that its staff would unite with other departments in an organized band, in order that the country might realize, as it has yet done, that the true object of the university was to add to the sum of human knowledge, whether in the domain of arts and letters or in the world of science. (Applause.)

A Substantial Building.

Prof. McLennan warmly commended the rapidly shown in the erection of the new building, which enabled them to begin their professional work in it next week, and expressed his hearty acknowledgments to those who had forwarded the work. The building was graceful and well-balanced in design, and a fitting complement to convocation hall. Its foundation was laid in concrete, and the first storey was built of sandstone, while the remainder was constructed of brick with Roman stone facings and finishings. The floors were laid with concrete and covered with tile. They possessed practically a fire-proof building, or perhaps, it might be better described as a slow-burning building. A fire must pass thru at least nine inches of brick, and then

A Great Change Impending.

It looks very much as if Ontario and the people of Ontario were about to come into control of the distribution of electrical energy from Niagara Falls. With that must follow municipal ownership of the street railways and electric power and light franchises of Toronto and some other cities.

The province may have to play a big game involving large engagements, and the City of Toronto may have to do the same; but if they do it will only be that anything they take over is taken over at the actual costs involved, plus interest, and that no public money liquidate either bonus stock or supply exploitation profits.

If Ontario can control the electrical energy of the falls, if our cities can own their local traction and their local electrical energy supply, Ontario may be in a very few months one of the greatest industrial areas on this continent.

The day is near for a new kind of courage in provincial and municipal affairs.

HUNDRED LIVES LOST IN FIRE AT WU CHOW

HONGKONG, Sept. 17.—Hundreds of houses and many boats and pontoons were destroyed to-day by a fire at Wu Chow, on the Siakiang River, about 150 miles from Canton. About 100 lives were lost.

The conflagration is said to have been due to incendiarism in connection with the recent establishment of a new interior customs station at Wu Chow, the inhabitants of which are bitterly opposed to any extra taxation.

The fire was put out after a kerosene depot had exploded. Property valued at a quarter of a million dollars was destroyed.

Looking is now going on in Wu Chow, but all the foreigners there are safe.

MR. KING DENIES.

Never Stated That Asiatic Labor Exceeded That of Whites.

In regard to a Vancouver despatch, quoting W. Mackenzie-King in favor of Asiatic labor, Mr. King said last night:

"The despatch is wholly incorrect and misleading. I have not at any time in any place given any such expression of opinion as to the employment of Asiatics. Were it not that the despatch has come from Vancouver, and that it is therefore possible that my name has been given by mistake for another, I would under existing circumstances regard the item as a deliberate fabrication for the purpose of making trouble."

ELECTROCUTED AT DUNDAS.

Fallen Wire Kills a Respected Citizen.

DUNDAS, Sept. 27.—(Special).—Samuel Sutton, aged 67, was electrocuted on Main street to-night by a fallen electric light wire.

He leaves a widow and grown-up family.

An inquest has been called by Coroner Bertram.

GIANNETTI A SUICIDE.

Hope of the return of the missing witnesses was abandoned at the A. Giannetti inquest last night.

The proceedings were closed and a verdict of suicide returned by the jury.

WHERE ERROR IN BIG BRIDGE?

Best Brains Planned—Skilled Workmen Put Together—No Craft, Yet it Fell.

OTTAWA, Sept. 27.—(Special).—The omission which has been making an enquiry into the causes of collapse of the Quebec bridge brought its Canadian sittings to an end in Ottawa this afternoon, and goes to New York next week.

Mr. Holgate, the chairman, after the last witness had been examined, said: "We found absolutely no trace of dishonesty or graft in connection with the construction of the bridge. This seems to be the case of the best engineering brains on the continent and the very best accepted engineering methods being on trial."

"As far as the government's connection with the enterprise is concerned, it seems to us that everything is quite regular, and everything was done that should have been done."

TEN YEARS FOR BROKER FORMERLY OF TORONTO

J. D. Edwards Guilty of Fraud—Sold Shares in Investment Protective Association.

WINNIPEG, Sept. 27.—(Special).—J. D. Edwards was sentenced to 10 years in the penitentiary for the theft of \$82 from Dr. G. C. Matheson, a dentist. Edwards sold shares of the Investment Protective Association to Matheson, which Magistrate Daly pronounced a fraud from start to finish.

Magistrate Daly said that Edwards was formerly convicted in Toronto. In that city the prisoner was in business as a broker. He issued a contract to sell many shares of stock with the Astoria Coal Co. These shares Edwards sold, but the returns were not satisfactorily made to the company. Before he had been in confinement long he was pardoned by the minister of justice.

PIRATE IN TOILS.

Blood of Ancestors Inspires Disastrous Voyage.

Herbert Rendle, 31 Matilda-street, with two companions heard a street piano playing "A Life on the Ocean Wave" yesterday afternoon. The blood of his Viking ancestors began a sailor's horripile in his veins and the party went waterwards.

At the Q.C.Y.C. meetings they met up with a trim ship owned by William Butler, 155 West Richmond-street. She was uninhabited and the bold marines went aboard.

They hoisted her sails and put out into the wild waters of the bay. Bounding the sheltering lee of a friendly dock they encountered adverse winds and battled bravely with the storm until driven ashore at the foot of George-street, only to find the irate owner awaiting them.

Rendle was nabbed and turned over to P. C. Ross (110). He is charged with theft of the boat. His companions escaped.

SHOOT'S FRIEND, THEN SELF.

MONTREAL, Sept. 27.—(Special).—In the main billiard-room of the Checker and Chess Club, East St. Catharines-street, Miss Celanie LaPointe, a dressmaker, this afternoon fired a revolver at the club manager, Ludger Houle, wounding him, and then shot herself in the head. Her life is despaired of.

Houle was fired at while his back was turned, and the bullet entered behind his right ear. He will probably be entirely recovered in a few days.

The parties had been friends for ten years.

DID NOT HEAR TRAIN STRUCK DOWN ON TRACK

Young Man Severely Injured While Walking on C. P. R. Roadway.

Elmer Goulet, 21 years, a laborer, was struck by an eastbound C. P. R. train north of the Winchester-street bridge at 5.15 o'clock yesterday afternoon. His skull was fractured and his shoulder injured. He is in a serious condition at St. Michael's hospital.

The man was walking on the track when struck. He made no effort to get out of the way of the train, which was in charge of Engineer Charlton and Conductor Baker.

The man is said to live at Clarence Creek, near Ottawa, and has friends at 831 Willow-street, Toledo, Ohio. He may recover.

OUTBREAK OF BOXERISM.

Italian Priest and Number of Converts Murdered.

SHANGHAI, Sept. 27.—An outbreak of Boxerism has occurred at Nankiangien, in the southern part of the Province of Kiangsi.

An Italian priest and a number of converts have been murdered at the Village of Tavouli, and the Lazarist Fathers Mission at Kanichowfu has been burned.

The missionaries escaped to Ktatu, whence they telegraphed for assistance.

MISSIONARIES ALL SAFE.

SHANGHAI, Sept. 27.—Advices received here from Kanichowfu say that the Protestant missionaries there are all safe.

Theatre Party.

A box party at the Alexandra last night included Sir Wilfrid Laurier, Sir William and Lady Mulock and Mrs. Cawthra Mulock.

COMPANIES TO DIVIDE CONTRACT FOR POWER

Electrical Development Co. Negotiating With the Ontario Government.

G. T. Blackstock and H. H. Macrae, on the part of the Electrical Development Company (of the Pellatt-Nicholls syndicate), had an interview with the premier yesterday morning to ascertain whether it was not possible for this company to make arrangements with the government for the supply of power to the Hydro-Electrical Commission, presumably on terms similar to the offer made by the Ontario Power Company.

Hon. Messrs. Matheson and Foy and W. K. McNaught, ex-M.L.A., and Wm. Lobb, the solicitor of the Hydro-Electric Commission, were present.

If terms are arranged the Ontario Power Company will supply power for a certain area in the western portion of the province and the Electrical Development Company the balance.

A subsidiary company of the latter—the Toronto & Niagara—already has transmission lines erected from Niagara Falls to Toronto, as well as at Brantford, so that in the event of their coming into the agreement for the supplying of power they could at once furnish it to a number of municipalities on the lines named, provided that the latter finally decide in favor of the government's power project as it affects them.

POLICE OFFICER DRUNK.

Suspended by Police Magistrate Comfort.

ST. CATHARINES, Sept. 27.—(Special).—Another lively meeting of the police commissioners is now expected owing to the second police constable, within three weeks, having been, it is said, found drunk on duty. Yesterday, it is alleged, William Groat, whose appointment was strongly opposed by Judge Carman at the meeting two weeks ago, was reported helplessly drunk in the vicinity of Walland Station, Geneva-street, and was taken to headquarters by Sgt. McCarthy, where he was suspended by Chief Parrish, who reported the facts to Police Magistrate Comfort, secretary of the commission.

ACCIDENTALLY KILLED.

How Italian Came to His Death at Toronto Junction.

That Nichelo Gioinazzo came to his death from being accidentally struck by a passing locomotive on the Canadian Pacific Railway at Toronto Junction on the 18th day of September last, was the verdict reached by the jury under Coroner McKelhan at the inquest held last night at the city hall. It was the coroner's first inquest.

The evidence of Auxiliary Foreman Walden went to show that the man must have been lighting his pipe and that had he been watching, the accident would have been averted. Walden saw the engine coming and pluckily tried to pull the deceased off the track in doing which he got a nasty blow on the shoulder.

J. D'Ortonio, the first Italian witness interrogated, said that one engine had come along belching much smoke, which wholly enclosed himself, the deceased and another Italian who was walking along with them. The next moment he heard a shout and saw the deceased under an engine. He himself escaped, as he was walking behind the track, while the deceased was inside the rails.

"G.G.E." DROPS CAUSES SCARE

General Meeting Called Regarding New Issue in the English Market.

Canadian General Electric stock has once more become a bomb in the local market. Its recent drop to 102 causing a shiver to pass thru the entire financial arena. Sales yesterday as low as 102 1/2 caused numerous private conferences between brokers.

Some of the day's transactions were reported to have been for the account of London shareholders, who had taken the stock when it was first put out on the English market, and who found it difficult to unload on the English Exchange.

The downfall in General Electric has become a matter of extreme importance in financial circles. The stock at one time sold as high as 235, and although there has been no reduction in the dividend, which is still 10 per cent, the price of the shares is more than cut in half.

Ugly rumors were afloat regarding the company in the street yesterday, but none of these could be confirmed. It is admitted that the company is heavily involved in debt to the Canadian Bank of Commerce. The current loans from the bank at the last annual meeting of the company were \$1,122,883, and it is stated that this account has been increased since that time.

To pay off the bank and to provide working funds the shareholders at a special meeting decided to increase the capital by \$2,000,000 preferred stock and \$1,000,000 common stock.

The original proposition was to make the preferred stock preferred both as to assets and dividends, but at the meeting of shareholders this was changed to preference only as regards dividends.

RUMORS DENIED.

Frederic Nicholls, the general manager of the company, has been in London the last few weeks in connection with financing the new issue, and according to the opinion of local financiers he has found it impossible to get British subscriptions to the preferred stock except under the original arrangement. It is stated that the original proposition was to make the preferred stock preferred both as to assets and dividends, but at the meeting of shareholders this was changed to preference only as regards dividends.

ONLY PARTIAL SUCCESS.

A Toronto financier who is in close touch with the affairs of the General Electric Co. said that the success in the stock to-day was caused by a rumor, circulated by a coterie of bears, that the attempt to float the new issue of preferred stock in London, Eng., had been unsuccessful. This, he says, is a very unimportant matter, and that the company and think it a shame that some people are endeavoring to embarrass so substantial a Canadian institution. I am informed that the Toronto brokers are advising their clients to sell their holdings for the purpose of buying the stock in at a low figure. The company is controlled by a directorate of substantial business men and the dividend paid has always been warranted by the earnings.

GENERAL MEETING CALLED.

Yesterday a circular letter was issued to shareholders notifying them that a general meeting has been called for Oct. 28 to authorize a bylaw meeting the English wishes. The evidence of Auxiliary Foreman Walden went to show that the man must have been lighting his pipe and that had he been watching, the accident would have been averted. Walden saw the engine coming and pluckily tried to pull the deceased off the track in doing which he got a nasty blow on the shoulder.

RUDYARD KIPLING TALKS TO FUTURE CANADIANS

"Nation's Poet" at Montreal, Says His Plans Are Indefinite—Will Come to Toronto.

MONTREAL, Sept. 27.—(Special.)—Rudyard Kipling stated this evening that he would not address the Montreal Canadian Club during his present visit to this city, but he promised that on his return from the west in two or three weeks he would give the club an address.

Asked as to his intentions with regard to the Toronto Canadian Club, Mr. Kipling said he had no definite plans, but would speak there either on his way or on his return journey, probably the latter. Mr. Kipling with his wife will leave here early next week on his journey westward.

"Yes," he replied to a reporter, "I've come to Canada and I expect to be here for several weeks. Your country has undoubtedly made wonderful progress since I was last here ten years ago, and it will indeed be most interesting for me to note as I go thru your principal cities what progress has been made in this direction. I have followed closely your doings out here, and it's a great pleasure for me to be among the Canadian people once more."

MONTHS OF AGONY

A Severe Case of Rheumatism Cured by Dr. Williams' Pink Pills.

"For many weary months I suffered untold agony. I could not walk. I could scarcely raise myself to a sitting posture. I was under medical care, but in vain. Finally I tried Dr. Williams' Pink Pills and they have restored me to my former healthy condition."

This strong statement was made to a reporter recently by Mr. Charles S. Keddy, formerly of Kingston, N.S., but now in Montreal.

Mr. Keddy is a carpenter by trade, and is now able to work every day. He adds: "I cannot speak too highly of Dr. Williams' Pink Pills, as they cured me after other medicine failed. While I was living at Kingston, N.S., I was seized with rheumatism in its most violent form. I was compelled to take to my bed, and for months was an invalid. I was so weak that it was difficult for me to raise myself to a sitting posture. It is impossible to tell how much I suffered day and night, week in and week out. The pains were like piercing swords. I had medical attendance, but it failed. Then I tried medicines advertised to cure rheumatism, but with the same result—rheumatism wasted. One day when hope had almost gone a friend advised me to try Dr. Williams' Pink Pills. I told him my experience with other medicines, but he assured me that these pills would cure rheumatism, so I sent for a supply. After using a few boxes I was able to leave my bed, and from that on my restoration to health was rapid. I am now as well as ever I was, and have not had the slightest touch of rheumatism since. The change they have wrought in my case is simply miraculous, and I can strongly recommend Dr. Williams' Pink Pills to anyone suffering from any form of rheumatism."

Rheumatism is rooted in the blood. Rubbing the aching limbs with liniment and outward remedies cannot possibly cure it. You must get the rheumatic acid out of the blood and Dr. Williams' Pink Pills is the one sure medicine to do this, because they actually make new blood. That is why these pills cure rheumatism, headaches and backaches, neuralgia, indigestion and the secret ailments that make miserable the lives of so many women and growing girls. Sold by all medicine dealers or by mail at 60 cents a box or six boxes for \$2.50. From The Dr. Williams Medicine Co., Brockville, Ont.

HAMILTON, Sept. 27.—(Special.)—Thomas Stanton, a racetrack follower, was arrested to-night on the charge of using abusive language to a Pinkerton man. Detective Coulter made the arrest.

Mary Coughlin, the woman who figured in the Barker assault case, was arrested to-night on the charge of being drunk. Kitty Burke was also run in for being drunk and disorderly.

Judge Snider's Decisions.

Judge Snider has given his decision in the arbitration proceedings in connection with the separate school board rates. He finds that the board last year lost taxes on an assessment of \$341,765, which it was entitled to. Seventy-one persons who had previously given notice that they wished to be put down as separate school supporters, 18 who had been changed from separate to public school supporters by mistake, and 200 who had given in notice too late should have been assessed as separate school supporters, according to the judge's finding.

Mrs. Urquhart, secretary of the Children's Aid Society, has resigned, and Miss Forbes has been elected in her place.

The street railway has given down the city's latest proposition, and insists that the permission to widen the devil strip from four to five feet must be given unconditionally.

Mayor in Hot Contest.

Mayor Stewart and Beach Commissioner VanAllen are having a hot contest over the tearing out of the roadway separating the two filtering basins. Mr. VanAllen insists upon compensation for David Fitch, and the mayor says that the commissioner is impudent to suggest such a thing.

About 325 members of the Canadian Manufacturers' Association, with their wives, visited the city this morning. The ladies were taken for a drive about the city, while the men inspected the factories.

Mike Malone, who was shot at Niagara Falls about two weeks ago, has recovered sufficiently to come to Hamilton, and this morning he got into a fight. The police arrested him on a charge of being drunk and disorderly.

JURY AWARDS DAMAGES TO MAN WHO BEGAN ROW

Thanksgiving Day Fracas in the Ward Aired Again in Civil Court.

The jury in the row assizes yesterday brought in a verdict that Joe Gurofsky should pay \$700 and his brother Louis \$500 for damages for injuries inflicted upon an Italian, Domenico Trevani, during a fight on Thanksgiving Day. Trevani had started a fight in which he finally got a bullet in the leg. Frightened, he jumped thru a plate glass store window, receiving injuries to his limbs which have permanently crippled him. One of the jury is quoted as saying that they pitied him and so awarded him damages.

Justice Teetzel, in his charge to the jury, had pointed out that the plaintiff had been acting in a violent and lawless manner and had brought on the disturbance which ended in his injury.

Joseph Gurofsky's story of the fray, as a result of which he has already served a brief imprisonment, is that on Thanksgiving Day Trevani and two companions, coming down Chestnut-street, lost his aged father who, when he remonstrated, was assaulted and stabbed in the shoulder. Louis went to the rescue and was also assaulted. His ear being slashed with a knife, while his hand was bitten. When he got loose he took refuge across the road. A few minutes after he saw Trevani at Edward and Chestnut-streets and rushed to his aid. He was then recommenced. Joseph, whelping up to his postoffice and branch bank, at Agnes and Chestnut-streets, was told by Rabbi Bernstein that Louis was fighting three men who had tried to rob the office. Although he has a lame leg he started to aid and plunged thru a store window to hide. Then the fire department came along and broke up the riot.

"I don't mind the jury soaking me because I fired the shot, but how did they find Louis to blame?" he complained last night, but he will join his brother in an appeal against the verdict. A razor, a razor blade and a table knife were found on the Italian after his arrest.

Then the fire department came along and broke up the riot.

CLIMAX AT BEACH.
Big Show Provided for Park Farewell To-Day.

On Monday the work of dismantling Scarborough Beach will begin, but to-day and to-night there will be lots of fun at the closing ceremonies. The park has been drawing large patronage even during the unpleasant weather, and to-day's crowd promises to be very large. There will be several special features for the closing day. Conducted in Canada and the United States, all the shows will be running full blast, and an express street car-service is promised. In addition to all this the beach management will make an extra illumination of the grounds, which are already brilliant with electric lights.

THREE FAVORITES FIRST FRIDAY AT HAMILTON KING'S DAUGHTER WINS FEATURE AT GRAVESEND

Willis Green Beats Glimmer—Blueen, Birmingham and Jupiter Win at Odds.

Three favorites, three long-shots and the second choice, Willis Green, in the feature race, were the winners on Friday at Hamilton. The afternoon was fine and warmer than the two preceding days. There was a sprinkling of rain during the last race. The crowd was up to the standard, and included the usual excursion load from Toronto. The Grand Trunk train made fast time both ways, arriving at the track shortly after 2:30 and returning by 7 o'clock. The track was fast and the scratches few.

In the 1-1/2 mile race, for three-year-olds and up, all four accepted the conditions. The Valley Farm candidates, Glimmer, was at once installed a four favorite, being backed from 4 to 5 down to 1 1/2. Nothing longer than 4 to 5 on Willis Green being longer than 4 to 5. Glimmer was fairly well played at post-time. Blueen was well backed for the place, and Lulu Young for the show. Moreland had Wills Green running as soon as the barrier went up, and first time on the stand Glimmer was fifteen lengths behind. Moreland was the favorite his head till too late. He closed strongly rounding the turn, but had little more than the winner on reaching the wire. Dela Strome took the show from the Jumper in the last sixteenth.

Goes Fast and Taunt, favorites, won their races easily. Gills was second to Goes Fast in the first race, while Ketchum, Ketchum, Taunt had a long race, the strongly-backed Lady Karma in the third, Master Lester a poor show. Gold Note a good thing, had poor racing luck.

Escutcheon, the third winning favorite, had to do his best to land the sixth race. Ida Reck was ahead of Cousin Kate, because Carroll put up a poor finish. Next to the favorite Webber carried most money.

Birmingham, backed at long odds, was much the best in the fifth. Frank Collins, also well played, second, and Herman Johnson, third. W. O'Neill started split favorites, and neither was prominent. The big field of a dozen went off to a poor start.

Jupiter, about whom as long as 80 to 1 could be had, won the last race easily. Flavius, favorite, second, and Sam Bernhard coming fast at the finish for the show. Curus and The Englishman had strong support.

The Saturday card is of seven races, with a 1 1/4 mile handicap as the feature.

Ocean Rates Lowest in Years.

Mr. A. F. Webster, the Canadian agent of the well-known Cunard Line, sailing from Toronto every Tuesday and Saturday for Liverpool, received advice yesterday morning that there has been a further reduction in the first cabin rates to go into effect immediately. The big new steamer "Lusitania," 32,000 tons, will now carry first-class passengers for \$75.00, the "Coronia" and "Campania" for \$70.00, the "Lucania" and "Campania" for \$65.00 and the "Etruria" and "Umbria" for \$60.00. New York to Liverpool. Never in years has the rate been so low as at present and it may be years again before the Cunard Line will offer such low rates to the public.

NEWFOUNDLAND'S TROUBLES.

A cable from St. John's, Newfoundland, states: "An imperial rescript forbidding the service by any colonial authority of any legal process regarding fishery rights aboard any American vessel, and suspending all colonial statutes authorizing colonial officials to seize American vessels for alleged fishery offences, was proclaimed here today."

Our political constitution nowhere authorizes such a document as an "imperial rescript"; nor does it confer any power on the crown, or its imperial ministers, to "forbid the service of any legal process regarding fishery rights aboard any American vessel" by the officers of a colonial government.

On the contrary, both the imperial and colonial laws prescribe that all British and foreign vessels within the limits of any British or colonial waters shall be subject to the jurisdiction of its courts, as will be seen by the following clause of the British Merchant Shipping Act of 1894:

"655.—Where any district within which any court, magistrate has jurisdiction, siting under this act, or under any other act, or at common law, for any purpose whatever, is situated on the coast of any sea, or abutting on, or projecting into, any bay, channel, lake, river, or other navigable water, every such court, justice, or magistrate, shall have jurisdiction over any vessel being on, or lying or passing off, that coast, or being in or near that bay, channel, lake, river or navigable water, and over all persons on board that vessel, or for the time being belonging thereto, in the same manner as if the vessel or persons were within the limits of the original jurisdiction of the court, justice or magistrate."

"712.—This part of this act shall, except where otherwise provided, apply to the whole of Her Majesty's Dominions."

The power to prosecute for infractions of Newfoundland law is vested in "its" responsible ministers of the crown, and they are constitutionally responsible to the legislature of Newfoundland for their exercise of the prosecuting power to enforce the criminal law of the colony. And this alleged "imperial rescript" can in no sense override that responsibility, for Newfoundland possesses responsible government similar to that possessed by Canada. And no statesman, or constitutional lawyer, in Canada would say that our government would be bound to recognize and obey any such "imperial rescript," or any kind of imperial order "suspending all colonial statutes." Any such exercise of an imperial power would be unconstitutional, and what is unconstitutional is revolutionary.

oath. The act then provides that "if the master of the said vessel shall have engaged, or attempted to engage, any person (Newfoundlander) to form part of the crew of the said vessel, in any port, or on any part of the coast of the island, such vessel and her cargo and tackle shall be forfeited."

Evidently this clause of the *modus vivendi* has been agreed to without regard to the rule of British law which negatives the right of a subject to go outside British jurisdiction with the intent of violating British law.

And it seems to be in conflict with another clause of the British Merchant Shipping Act, which enacts: "Where any person, being a British subject, is charged with having committed an offence on board any British ship on the high seas, or in any foreign port or harbor, or on board any foreign ship to which he does not belong, or not being a British subject, is charged with having committed any offence on board any British ship on the high seas, and that person is found within the jurisdiction of any court in Her Majesty's dominions, which would have cognizance of the offence if it had been committed on board a British ship within the limits of its ordinary jurisdiction, that court shall have jurisdiction to try the offence, as if it had been so committed."

Under this clause, if Newfoundland fishermen go out to sea beyond the three mile limit of the Newfoundland coast waters, and the master of an American fishing vessel "not being a British subject" there engages them as crews on his fishing vessel, he may when he returns to a Newfoundland port, "be charged with having committed an offence against the laws of Newfoundland on the high seas," and the Newfoundland crew as accessories. And the law officers of the crown would be bound to prosecute—notwithstanding the *modus vivendi* or imperial rescript; for both the supreme court of Newfoundland and the judicial committee of the privy council in the *Admiral Walker* case in 1891, held that a *modus vivendi*, not authorized by law, was no defence as an "act of state," to protect an imperial officer from the consequences of an illegal act.

The law has been thus summarized in a late article in *The Contemporary Review* by Mr. Justice Hodgins: "A *modus vivendi* cannot operate to dispense with, or suspend, or otherwise render inoperative, or unenforceable, any statute law of the empire, or of any colony. And it is trite knowledge that the Bill of Rights declares that the pretended power of suspending laws, or the execution of laws, by regal authority, without the consent of parliament, is illegal."

SIR WILFRID LAURIER AT TORONTO.

There is not much new in Sir Wilfrid Laurier's speech. The premier always speaks well and usually to the point. No man has more completely the gift of stating a defence so as to make it appear to be founded upon common sense. Whether he really deserves closer relations with Great Britain or no, he states a case which seems to be unanswerable when he says that his government has given a preference to Great Britain; that it has repeatedly asked for reciprocal preferential trade arrangements; but that they could not interfere in British politics or dictate to the British people how to manage their own affairs.

Logically it might seem that Canada as a state of the empire should furnish her quota of soldiers and sailors for the permanent defence of the empire. But for all that, the good common sense of Canada will endorse the declarations of the prime minister. "We live," he declared, "upon a continent where we never think of war. We live on a continent where we have no standing armies and are satisfied to depend for our defence upon a citizen militia."

The premier announced that he intended to push through the "all-red line." He has a faculty for striking the popular imagination and in this ambition he will be joined by the great majority of the people of Canada. Indeed, the majority is so vast that the project cannot become a party question.

Perhaps the most important part of the speech was to the effect that the whole question of Japanese immigration is to be investigated by a royal commission. This commission will no doubt visit Japan and by the time they get back a great many Japs will have entered the country. The premier says that he does not intend to be stampeded, nor does he intend to do anything in a panic. There is reason to believe that personally he will incline to leave the treaty undisturbed, unless public opinion grows too strong for him to resist.

The reception accorded to the prime minister by the bi-partisan and representative assembly was cordial and in line with many similar demonstrations. Apart from his office, and aside from party politics, Sir Wilfrid Laurier occupies in Canada a position as most commanding and always unique.

THE QUEBEC BRIDGE DISASTER.

Probably the Greatest Shock Ever Successfully Withstood by a Masonry.

The significant fact outstanding from all others in connection with this bridge disaster is that two pieces of cement masonry withstood without damage to them the tremendous impact, after the instant collapse of the 17,000 tons of steel (equivalent to 850 large cars) supported by the pier closest examination of the pier disclosed no damage to be in as perfect condition as when completed. Their incredible strength and stability are demonstrated by the shearing almost through, without the least damage to the masonry, of some of the largest of the steel columns and girders. They stand as monuments, not only to the honesty of the responsible contractor, but to the unceasing vigilance of the superintending engineer.

Mrs. Arthur Haverstock Makes Public Statement.

Tells of Her Belief in the Undying Merit of Dr. Hamilton's Pills.

"Halifax, N.S., Sept. 27.—When interviewed at her home at 194 Argyle St., Mrs. Haverstock was quite willing to talk of her peculiarly unfortunate case. "I was always blue and depressed, felt weak, languid and utterly unfit for any work. My stomach was so disordered that I had no appetite. What I did eat disagreed. I suffered greatly from dizziness and sick headache and frequent nervous breakdown. Upon my druggist's recommendation I used Dr. Hamilton's Pills. By cleansing the blood, I felt better at once. Every day I improved. In six weeks I was a well woman, cured completely after different physicians had failed to help me. It is for this reason that I strongly urge sufferers with stomach or digestive troubles to use Dr. Hamilton's Pills." Dr. Hamilton's Pills strengthen the stomach, improve digestion, strengthen the nerves and restore debilitated systems to health. By cleansing the blood, long-standing impurities, by bringing the system to a high point of vigor, they actually chase away weariness, depression and disease. Good for young or old, for men, for women, for children. All dealers sell Dr. Hamilton's Pills of Mandrake and Butternut.

Political Intelligence

The following letter from B. A. Macnab, managing editor of the Montreal Star, will be read with interest: Editor Toronto World: In a number of Liberal newspapers has appeared a report of a speech delivered at Essex, Ont., by Mr. B. A. Macnab, B. Ayesworth, minister of justice, in which a reference to myself appeared, as follows: "The testimony was on to state that a Mr. Macnab represented in these matters a parliamentary committee from Ottawa."

"These matters," Mr. Ayesworth had previously set forth, were centered about a sum of some \$30,000 contributed by Mr. Hugh Graham (of Montreal) for the use of the Conservative party in the Quebec district in the campaign of 1904. To quote the hon. minister of justice: "Mr. Graham's sworn testimony was that out of his own pocket he had contributed \$20,000 to the organizer of the Quebec district—not the Province of Quebec—but the district surrounding the City of Quebec."

Mr. Ayesworth then intimated that this money had been corruptly expended; or at least he had no evidence to the contrary. But with that intimation I do not propose to deal, other than to draw attention to Mr. Ayesworth's admission immediately afterwards that his own contribution in Durham had cost him \$1000. Now there are 20 seats in the so-called Quebec district. Fourteen hundred dollars—the sum which he has just told, honestly by Mr. Ayesworth—expended in each of the 20 Quebec constituencies would amount to \$28,000. But there are several constituencies in the district in question where expenditures for legitimate election expenses would mount up higher than in rural districts. The hon. minister of justice, therefore, invited a puzzle it out for himself: Fourteen hundred dollars spent in Durham constitutes a clean election for Mr. Ayesworth, but the same sum—and a fraction over—spent in a Quebec district constituency constitutes a ground of attack upon Mr. Borden and the Conservative party in general.

The contentions urged at Essex by Mr. Ayesworth were deliberate misrepresentations, contrary to any evidence, grossly exaggerated and charged with the reckless and irresponsible character of the political questions. In law—so say his intimates—the minister of justice is a "low-down" man, but in public life he has gained an unenviable reputation for foolish doings and sayings. He it was, when sitting in parliament as minister of justice, applauded by hand-clapping and the hurrahs of the house for judgment. He weakened another otherwise strong arraignment of Hon. G. E. Foster by declaring that his charges were equivalent to that of McGill, the convict ex-official of the Ontario Bank. He put himself at a low plane, when, to offset "that wine, women and song" charges he turned heel and went raving in dead men's graves, in order to institute a campaign against Sir John A. Macdonald and his own disreputable associates. Who believes his statement that an investigation of Mr. Borden's Halliwell connection resulted in the disqualification of the opposition leader, sheltered, as it is, behind the qualifying "and cowardly" "I tell Hon. Mr. Ayesworth that he is making of himself a laughing stock. And now to my own case: " . . . A Mr. Macnab represented in these matters a parliamentary committee from Ottawa."

I admit the statement. But "these matters" were classified to be of Mr. Graham, and as they were distorted by the minister of justice, are of different texture. Mr. Graham simply refers to the re-arrangement and distribution of L'Evenement; newspaper; the minister of justice takes his words and distorts them out of all their original and true meaning and application in order to make it appear that I was not only engaged in corrupt work myself, but also in connection with a grand jury and a parliamentary committee of the Conservative party.

Bearing in mind that the subject under examination in court is the distribution of a newspaper during the campaign, and that the question of campaign contributions had not been reached at that stage, the following verbatim report of the evidence given by Mr. Graham at Quebec, on May 23, 1905, is a complete answer to the statement of Mr. Ayesworth: "Mr. Pelletier, K.C. (questioning Mr. Graham): 'Were you working in some cases together with Mr. Macnab?'" "Mr. Graham: 'I was representing a parliamentary committee in Ottawa in some matters.'"

Q. "Oh, we are not with the parliamentary committee at the moment—I am asking—"

A. "I think that Loranger matter has got something to do with the parliamentary committee, if I mistake not."

And again Mr. Graham testified, in the same connection: "Mr. Macnab was doing a good deal of work in connection with THESE MATTERS."

Quite true. I worked in conjunction with a parliamentary committee in compiling a Speaker's handbook; in arranging the enlargement and increased distribution of L'Evenement; in transferring a record of votes and proceedings in parliament from L'Evenement to Mr. Loranger (mentioned by Mr. Graham) of the Jacques Cartier Club, Montreal, and in sending French campaign literature to the Acadicians of the Maritime Province.

The plain statement of fact will illustrate, and bear confirmation of, the fatal facility with which a responsible minister is wont to snatch at garbled statements, and run into them a meaning which may best serve his partisan ends for the moment, regardless of the dignity of his office and the momentous importance of elements of truth and fair play.

City Water Bad Again

Dr. Amyot, the Ontario Government bacteriologist, has no delusions about the dangers city water holds. He tells Toronto that there are ferocious bacteria in the city supply, and the authorities recommend boiling it to make it safe.

Dr. Amyot Says City Water Contains Some Sewage Bacteria. "Boil the drinking water," is the advice of Dr. Amyot, the Provincial Analyst, to the people of Toronto.

Your own doctor will tell you that boiled water isn't good for anybody as a regular beverage.

Your own palate will tell you what disagreeable, mawkish stuff boiled water is.

Your own household will tell you what an expense, what a bother it is to have to boil water, then cool it, yet what other way is safe?

The simplest way: Drink York Springs Water, certified as to purity, limpid, crystal clear, flowing from a spring forty feet underground, in a region where contamination is made impossible by scientific safeguards.

York Springs Water makes you certain your health will be benefited by copious water-drinking, which, in itself, prevents many diseases.

York Springs Water is zestful and gratifying, instead of insipid—wholesome, instead of dangerous—economical, too.

The stress of that spirit of investigation had passed by, but its effect had been enormous. And while the result of this progress had swept away much of that which had to do with tradition, it had left true religion as clear and as firm and as substantial as it ever was in any day or at any time.

Dr. Hoskin then introduced the lieutenant-governor, Sir William Mortimer Clark, who said he felt it a very great honor to have his name in any way connected with this great university, which he called it a great university advisedly, because the number of students attending the physical laboratory service, in the British empire, with but one exception, the University of Edinburgh.

The University Ideal.

A great deal is said from many and diverse points of view on the subject of "college spirit," "university ideal" and kindred subjects. That these conceptions differ in any essential from a limited application of the doctrine of human brotherhood is very doubtful. It is impossible to do more than form a faint idea of the meaning of "esprit de corps." That is the students' conception, their obvious duty, their honor.

The university ideal belongs to the more advanced stage, and properly to the faculty. When we hear the increasing cry of "Let us have practical men," we bow to the wave of public opinion, and to the spirit of a scientific, or, as Arnold would have said, a "mechanical," age.

Practical men have not always done the most progressive work in the great movements of progress. Would anyone living the daily life by side with Dante, with Sir Thomas More, with Shelley, or with Goethe, have advocated their claims to practicality?

Undoubtedly to his own generation our Lord must have seemed a dreamer. The dreamers have their office, none higher, and especially should find a haven of refuge in college walls. They are not designed for great material success, but their spirit is pervading, and in them lies the hope that we shall not in one day be a nation of people who are able to eat, but that the day shall come when every man shall be able to think clearly and with enlightenment. To this end universities are built, and professors installed in them, and to this end we hear much said about the "university ideal." This conception requires the idea so hastily discarded into the average schoolchild, that immediate sugar plums follow good conduct. It rather realizes that all good work is inspired from the very nature of it—that sugar plums do not fall ripely into the mouth of him who has just planted the tiny slip that is to be a tree, and that the half-baked talismans are benefited by the laboriously sown seeds of the wise. What good did the prophets do Solomon?

Undoubtedly he had not inadvertently made a good bargain with a power not to be gained in any other way. He had been assistant professor in university all his life, patiently pursuing a course modeled on a conception of the diffusion of culture in a world given over to the pursuit of dollars. Strange as it is, that the "busy" people of practical occupations do not realize from what source the ideas which are their daily bread have emanated.

A thousand little storage cells contain the conserved power of the sun and provide the energy for the student who must exert in existence, without recourse to themselves, yet no one accuses them of impracticality. Unfortunately that it is otherwise with the student.

It is a constantly recurring exhortation that young folks who do not do things for themselves, in this respect we are nearly all of us eternally young. We want experience, sensation, novelty, and culture teaches to indifferent eyes the lesson of the everlasting sameness of human nature, and therefore of life.

Thus, the university conception stands rather as favoring ideas than as things, and in imparting the sacred truth about our little tin images of prosperity, fame and what not, has the inspiring substitute to offer up an unattainable ideal.

Anglican Young Women's Club

Arrangements have been made to reopen the physical culture classes in connection with the Anglican Y. W. Club, under the direction of Miss Edith Pearson, who carried on the work so successfully last year. Other classes in all departments of work will also be arranged—practical cookery, scientific dressmaking, millinery, fancy work, vocal and instrumental music, English literature, elocution, bookkeeping, penmanship, and English shorthand, etc. Those desiring to enroll their names are invited to do so on Monday evening next, Sept. 30, at 8 o'clock, in St. Stephen's Schoolhouse, corner Bellevue-avenue and College-street—senior membership \$1, junior 50 cents. All young women will be made welcome.

Personal.

At 7 p.m. Wednesday, Sept. 25, a very pretty but quiet wedding took place at the home of Mr. and Mrs. John Love, 994 Gerrard-street, when their only daughter, Miss Eva Viola Stonehouse, was united in marriage to Mr. G. Ogg of Hagerman. The ceremony was performed by Rev. W. Ernest Baker, pastor of Simpson-avenue Methodist Church. The bride wore a gown of de sole, with a Brussels net veil, and carried a shower bouquet of white carnations and ferns. She was attended by her cousin, Miss M. Hodgson of Toronto, while Mr. Gordon Stonehouse supported the groom.

Later in the day, the happy couple left for a trip to Detroit and Buffalo, the bride traveling in a smartly tailored tweed and plumed hat.

The marriage of Miss L. M. Beauchamp (Birdie), daughter of Mr. and Mrs. G. Beauchamp, to Mr. Starford Hamilton McKee will take place in St. George's Church Monday, Sept. 30.

Mrs. William Roof left last week on a visit to her son in Vancouver. Mrs. Roof will spend the winter in Southern California and on her return from California will reside in Vancouver.

On Thursday afternoon was held the regular monthly meeting of the Toronto District W. C. T. U. Fine arrangements were made and members urged to be present at the coming annual convention, to be held in Jarvis-street, on Tuesday at 8 p.m. Monday afternoon and continuing three days. It was also decided to hold a social at the Y. W. C. A. on the afternoon of Oct. 24, commencing at 3 o'clock, the Frances Willard Home Board and the monthly district meeting to be held in the morning of the same day at the hours of 10 and 11 o'clock respectively. Mrs. Annie O. Rutherford, superintendent for that department, will conduct the school of methods.

On Thursday morning the Frances Willard Home Board met, for the transaction of their usual monthly business. Mrs. Crawford, matron, gave a report of the girls passing thru the home during the month and of those sent to situations. Miss Cowan, treasurer, reported 170 hours spent at the station during last month; 264 families assisted, young girls sent to the home, also to the Y. W. C. A. and to friends; of the needs of the month, with 100 trains coming in each day, and so many women and girls coming to our city desolately ignorant of city life and needing the assistance such as she is able and willing to give.

A social will be held at the rooms of the western branch of the Young Women's Christian Association, 237 Dufferin-street, on Tuesday at 8 p.m. All young women are invited. Admission free.

Mr. and Mrs. Fred W. Heath of Montreal, who have been spending the past week in Toronto, leave for home today.

Mr. and Mrs. T. H. Hopkirk of New York City have returned after a two weeks' visit to their mother, Mrs. Curley, 27 Denison-avenue, Toronto. Mr.

SAYS THIS IS BEST

A leading health journal, in answering the question, "What is the best prescription to clean and purify the blood?" prints in a recent issue the following:

Fluid Extract Dandelion, one ounce;
Compound Salsone, one ounce;
Compound Syrup Sarsaparilla, four ounces.

A well-known physician states that these are harmless vegetable ingredients, which can be obtained from any good prescription pharmacy.

This mixture will clean the blood of all impurities. In just a few days the skin begins to clear of sores, boils and pimples. It puts vigor and energy into run-down, debilitated men and women. For many years Sarsaparilla alone has been considered a good blood medicine. But while it built up and made new blood, the impurities remained within and the good accomplished was only temporary. Sarsaparilla, however, when used in combination with Compound Salsone and Fluid Extract Dandelion, works wonders. This combination puts the kidneys to work to filter and sift out the waste matter, uric acid, and other impurities that cause disease. It makes new blood and relieves rheumatism and lame back and bladder troubles.

The Sacred Heart Church, East King-street, was the scene of a very pretty wedding on Monday morning, Sept. 16, at 10 o'clock, when Miss Clara LeDuc, daughter of Mr. and Mrs. Joseph LeDuc of Bradford, was united in marriage to Mr. Wilbert E. Carpentier of Toronto, the Rev. Father Lamarche officiating. The bride, who was given away by her brother-in-law, Mr. N. E. Charbon, wore a very pretty traveling suit of broad cloth with cream plumed hat. Both bride and groom were unattended. After the wedding breakfast was served at their new home, later in the day the happy couple left on the 9 o'clock train for a trip to Montreal.

On Thursday night the ladies of the Manufacturers' Association had a pleasant party by themselves to please Shea's, and a chic supper afterward in the grillroom at the King Edward. Some of the ladies voted it the pleasant party of the whole week.

Theatres Next Week

For one of the first times upon other than a New York stage, J. M. Barrie's delightful play, "Peter Pan," now made famous throughout the country by Maude Adams' wonderful interpretation of the name part, will be performed at the Princess Theatre for a week beginning on Monday with Wednesday and Saturday matinees. The cast and production will be exactly the same, to the minutest detail, as those which all last season and this charmed the audiences which thronged the Empire Theatre, New York.

Such a play as "Peter Pan"—so steadily a topic of theatrical interest and general comment in England and in America—scarcely calls for additional exposition. It has been the subject of extraordinary praise in the prose and poetry of many famous writers. It has been lauded for its exquisite sweetness by W. Dean Howells. But perhaps its finest merit is contained in this sentence from a letter from Mark Twain to Miss Maude Adams: "It is my belief that 'Peter Pan' is a great and uplifting benefaction to this sordid and money-mad age; and that the next play on the boards is a long way behind it." The long as you play Peter Pan, a young couple, have three children—Wendy, John, and Michael—and a dog nurse, Nana, who bathes and dresses the little Darling children. Peter Pan, a boy who would not grow up, comes in and introduces them to all sorts of adventures.

On Monday the Royal Alexandra Players will make their first appearance in Toronto at the Royal Alexandra. This company does not depend on the advance notices, which may be given it, all the management asks is to be allowed to let the audience be the judges and pronounce the verdict. As has already been rumored around the city this organization has the endorsement of Mr. David Belasco, who is known as the greatest producer of plays in America. The first offering of the company will be "Mrs. Dane's Defence," a four-act society play, the one in which Miss Margaret Anglin achieved her greatest success. This is a play which has been written by his friends and confederates, that to his cleverest work. The story deals with life in "swildom" in London, where a society woman, Mrs. Dane, is put on her defence for something that is supposed to have happened some years previous. The play has been given in many difficult situations. As the policy of the house has been changed, matinees will be given Tuesdays, Thursdays and Saturdays, at 25c and 50c. Evening prices 25c, 50c, 75c and \$1.

To those who have seen and tried to fathom some of the Royal Alexandra's mystifying illusions heretofore offered individually by Magicians Kellar and Houdini, the assertion that the feature offering of the Grand during the coming week will surpass even the best of their own, is not an exaggeration. "The Sailor" and the "Enchanted Monkey" of "Magic Kettle" will seem impossible. Nevertheless, the assertion is not without foundation. In the new world-famous spectacle, when one sees an ethereal human form paraded before his very eyes and reaches out to grasp it, but finds nothing material to lay hold of, it is time for a self-inflicted pinch to determine if it be all a dream. After the pinching if he looks again, sees the same thing, grasps for it a second time, only to thrust his hand thru the still visible but nebulous form, certainly he must admit the possibility of supernatural manifestations or the presence of wonderfully clever magicians. This is the condition that exists in the spectacle scene, and its producers claim nothing of the supernatural—hence must be given credit as magicians of excellent quality.

ON ORDER CHARGE DEPENDS \$40,000 LEGACY

Descendants of Edward Higgin Must Establish His Innocence Before Can Inherit Estates.

SANDWICH, Sept. 27.—(Special).—The division of an estate valued at \$40,000 depends on a search that is being made among the Sandwich records regarding the trial of Edward Higgin on a charge of murder half a century ago.

According to the recollections of old residents, Mrs. Mary Higgin, wife of the freight handler on the old Great Western Railway, met death in February, 1858, under circumstances that pointed to foul play. Her body was found in the home of the family, a log cabin on Sandwich-street west, opposite white Riverside Park is now located, with the head crushed in, apparently with a blow from a cordwood stick. Suspicion fastened on the husband, but on his trial John O'Connor, who was counsel for the defence, succeeded in clearing him.

Recently descendants now living in New York have become heirs to an estate by the death of a relative in Ireland, but the property is tied up in such a way that before dividing it they must establish the failure of the murder charge against Higgin, and the search is being made in their behalf.

Y. M. C. A. OPENING. New Departures for the Benefit of the Members.

This is opening week at the Y.M.C.A. on Yonge-street. The gymnasium classes are now in full swing. Next week the English school will be opened. Last year there were 387 in attendance, and Mr. Platt says that he thinks there will be fully as many this year.

A wholly new thing is what will be known as the Association Luncheon Club. It is to be run on the same lines as the Canadian Club, only on a much smaller scale. The first luncheon will be held on Oct. 25, when Senator Ross will address the members.

HOME EXHIBITORS COMPLAIN. United States Cream Separators Get Best Locations.

There was some complaint during the exhibition that the most favorable situations in the dairy building were given to American manufacturers of cream separators, putting Canadian manufacturers into less conspicuous places.

Dr. Orr was interviewed by the gentleman representing the Hamilton concern, and he stated that if they were not satisfied with the space provided them they had the privilege of withdrawing but good sport assured, and it seems plain that the United States separator companies were given a great deal more space than their Canadian counterparts.

Haunts of Gig Game. Moose, the monarch of the northern forests, are found in goodly numbers in New Ontario. Plentiful in Temagami, where guides can be secured and good sport assured, an open season Oct. 15 to Nov. 15, both days included. Call at Grand Trunk City Office, northwest corner King and Yonge-streets, and obtain free copy of "Haunts of Fish and Game," a beautiful illustrated booklet descriptive of the different territories and containing all information, maps, etc.

LOUISIANA'S SLOW RUN NOT ATTRIBUTED TO FOG

Makes Eastbound Voyage in Five Days Four Hours—Stokers Blame Bad Coal.

QUEENSTOWN, Sept. 27.—The Cunard Line steamer Lusitania, from New York Sept. 21, arrived here at 3.35 a.m. today, the passage thus occupying 5 days 4 hours and 19 minutes, or 3 hours 25 minutes more than her outward run. The only record broken was that of the Lucaania of the same line.

Sandy Hook lightship was passed at 6.37 p.m. Saturday, Sept. 21, and the Lusitania had consumed 389 miles up to noon Sunday, Sept. 22. Her run daily were: Monday, 524 miles; Tuesday, 525 miles; Wednesday, 530 miles; Thursday, 528 miles; and at 3.35 a.m. yesterday to Dault's Rock, making the total distance, 2867 nautical miles, at an average speed of 22.8 miles per hour.

The comparative slowness of the voyage cannot be attributed to fog. On only one day, Monday, was fog entered on the log, and the ship ran 524 miles that day, only six miles below her best day's work. On Tuesday, Wednesday and Thursday a strong easterly wind, with a rough sea, was encountered.

The American coal was said by the engineers not to have been so satisfactory as the coal used during the westward trip, and the stokehole work was not altogether up to the proper mark. But the confidence of the engineers in the Lusitania's ability to beat all competitors when things are running smoothly is a mark of means it would be no punishment.

LONG TERM FOR BOY BURGLARS. Albert Pett, aged 17, goes to the penitentiary for three years and William Marshall, same age, for four years, as punishment for four cases of house-breaking.

Pett's mother pleaded with the magistrates that he should not be sent to Kingston, but his worship said it was the best place for him and he would learn a trade.

SIR WILFRID'S STROLL. Sir Wilfrid Laurier, Prime Minister of the Dominion of Canada, yesterday morning strolled along the south side of West Queen-street, finding a source of interest in the numerous pawnshops and Chinese stores and seeming particularly amused by the squirrels and snakes in a naturalist's shop.

Consumption Begins With a Cough. The cough racks and tears the tender tissues of the throat. Inflammation supervenes, and then serious bronchial trouble is established. The important time is at the beginning. Stay the progress of the cough by using fragrant healing Catarrhose, which reaches to the bronchial tubes, throat and lungs. Catarrhose destroys disease germs, stops the cough, heals sore spots, clears the nose and throat of discharge. Catarrhose soothes, never irritates. Guaranteed for every form of catarrh. For lasting cure use Catarrhose. Two months' treatment \$1.00; trial size 25c.

Charge Full Thru. Inability to pay a contract had been made, or even suddenly implied, in bringing a plumber from Philadelphia to Toronto, resulted in the magistrate yesterday dismissing the charge of violation of the alien labor law brought against Fred Armstrong and W. J. McGuire.

Wouldn't Go to Hospital. When Nicola Larosa had a leg broken by a piece of pipe falling on it in a trench at York and Front-streets he furiously resisted the entreaties of the police, who wanted him to go to the hospital. Larosa was being taken home. He has a wife and five children in Italy.

Perfect Manhood

Our "Restorine" CURES are The BEST. Dear Sir:—Have finished taking your 30 days treatment, and am in every way improved. I weigh 20 lbs. more, and am much stronger, and my nerves are very much better.

WE hail from Hull and want Grocers and all other users everywhere to see that they are fully stocked with EDDY'S Self-Opening PAPER BAGS the strongest and most perfect on the market.

Health of body, strength of mind, steadiness of nerves are the best and most precious gifts man can lay upon the altar of his conjugal love. Restorine operates on the nerves which control the sexual system, and infuse into it, power and vigor. No such thing as failure in life, is possible if perfect manhood; it is the lack of vital force, and the depletion of sexual energies that makes failures of men. Restorine awakens a man to a sense of restored vitality and power. Why be weak when you can so easily become strong? Frools are the test. Sworn testimonials sent you on receipt of name. Five Days' Trial Treatment sent absolutely free. Write To-Day.

EXPLOSION OF OIL SCATTERS THREE MEN

Lantern Causes Bad Accident—One Body Hurlled a Hundred Feet.

NEW YORK, Sept. 27.—Twenty thousand gallons of crude oil stored in a tank in the Borough of the Bronx exploded with terrific force while three men were drawing oil from it early today, killing the men almost instantly. The dead are James Cooper of Unionport, James Reilly of Westchester, and Richard Smith of Van Nest, all of which villages are in Westchester County.

Free to Men Until Cured.

With good, vigorous health everything is possible—wealth, happiness, success. Without it there is only failure. Electricity furnishes all that goes to build up a strong, hale, confident, successful man—iron for the blood, vim and fire for the nerves and brain, strength for the muscles, good digestion. It does all that medicine do, as well as what they fail to do. In my forty years' success I have proved this by the thousands of wrecks I have restored after other treatment failed. To convince every sufferer from debility, varicocele, loss of power, rheumatism, I have given my famous Electric Belt absolutely FREE UNTIL CURED.

COBALT---Two Cars of Ore From Temiscamingue Net \$225,000---COBALT

COBALT STOCKS LOWER IN SYMPATHY WITH N.Y.

Trading in Mining Shares Dull Under the Influence of the Larger Markets.

World Office, Friday Evening, Sept. 27. In sympathy with the New York market, Cobalt stocks were weak today, Trethewey selling down to 56 on sales amounting to 1200 shares. Temiscamingue brought 79 for 1000 shares. Brokers claim that this is one of the best purchases on the list, owing to the fine showing of the ore shipped to the smelter. It is thought this stock will jump over par so soon as money comes up.

Peterston Lake was again active, 6000 shares selling at 17 1/2 and 17 1/4. It is thought by many that there is something important impending in Peterston Lake: change of control or something of a similar nature to this Nova Scotia was active around 22 and 21 1/2 for several thousand shares, but no news of importance concerning future developments has as yet been published.

NEW GOLD CAMP OF LARDER LAKE NORTHERN ONTARIO

We earnestly recommend that you purchase the Highland Mary Gold Mines stock at 10 cents per share. This advice means riches to you. The time is not far distant when Highland Mary will be paying large and continuous dividends. By buying now at a price you can afford to pay you will be a participant in these assured profits.

As we have heretofore stated in our circular letters and advertisements, we are willing to stake our standing and reputation on the present conditions and the future outcome of the Larder Lake district and as to its possibilities. We believe it will be the most wonderful gold field that the world has produced. When we make these assertions it is after we have made most searching and thorough investigations. We do not believe that a financial house who has every facility at its command, having a number of experienced mining men in the field, and reliable and trustworthy mining engineers could go to more pains regarding the actual worth of a gold camp than we have done. We have been most cautious and we are very particular as to what we recommend for investment. We have built up a big business and the investors who place confidence in us and follow our advice number many thousands. We guard the interests of our investors just as closely and with as much care as we do our individual investments. This is the reputation we have attained among the investing public. We have gone to great expense in ascertaining the true merits and real conditions of the Highland Mary properties. In order to satisfy ourselves beyond question we despatched various crews of men to make examinations. They were supplied with all the necessities, such as hand drills, dynamite and camp outfits.

They have visited all of the properties, have blown out the ore, and we have had same assayed, not only by our own assayists, but by others. The proofs that we have obtained demonstrate beyond question the great values of the HIGHLAND MARY.

The properties consist of 30 claims of 40 acres each, making a total acreage of 1200 acres. The claims are in the locality of the famous Reddick claims, the Proprietary Gold Fields and the wonderful Blue Bell and Lucky Boys properties. Law and Co. have experts and engineers who are rated among the best engaged in examining and reporting on properties. Only those properties which have every indication of richness are handled by us; all the others are turned down as too risky. Our engineers and experts are in the field at a great expense, and it would not pay us to make a report on and sell the stock in any worthless company.

We are looking far into the future, and we thoroughly realize that the only way to hold our customers and keep them interested is for them to invest their money in stocks that have merit and that are sure winners. THE MAN OR WOMAN WHO INVESTS THEIR MONEY THROUGH US CAN SIT DOWN AT THEIR HOMES AND FULLY REALIZE THAT WHATEVER FUNDS THEY HAVE INVESTED HAVE BEEN WELL PLACED.

You can absolutely depend that the officers and directors of the Highland Mary will expend the money received from the sale of Treasury stock in the development of the property. We wish to call your attention to the fact that 1,000,000 shares of the stock of this company are for the absolute use and benefit of the Treasury.

10c. PER SHARE (PAR VALUE \$1.00, FULLY PAID AND NON-ASSESSABLE.)

If you will compare the price, 10c per share, and the organization and incorporation of the Highland Mary against any of the other companies now upon the market, you cannot but realize the great percentage there is in favor of your investing your money in this stock in preference to any other.

Capitalization of Highland Mary, \$3,000,000. Par value of shares, \$1.00, 1,000,000 shares in the treasury for development purposes.

Do your brokerage business through a responsible house of many years' standing. The financial house of Law & Co. was established in 1880-17 years of unflinching business integrity has installed this house--now Law & Co., Limited--among the foremost financial brokerage institutions of Canada.

Coming to the most vital point of all, when you interest yourself in Highland Mary you are becoming a partner of people who are practical mining men, who have made fortunes out of mining, and who are willing to wait the development of this property to make their fortunes.

TWO CARS OF SILVER ORE WILL NET ABOUT \$225,000

One 30-Ton Car From Temiskaming Nets \$114,750--Big Vein on Nipissing.

Interest in Cobalt matters to-day centres largely on the intentions of those who control the Nipissing. In the camp it is now known that a wonderful new vein has been located, but its exact location is still a mystery, except to the few. No one is allowed on the property, but the great activity prevails and an immense amount of work is being done. Enlargements to the existing plant are being erected and others are under construction.

Men from Cobalt in the city to-day, who are usually well-informed, state that the existence of the new vein has been known to the officers of the Nipissing for the past two weeks, and during that time steady efforts have been made to knock the stock down to par, or close to par. These efforts have so far been unavailing.

The new vein is by far the richest to date. It is known that the assays showed almost twice the value that were looked for, and neither the Big Bonanza nor the Kendall equals it in richness. Three hundred men are now at work on this property, and the number will be doubled in the near future, according to the authority now being quoted.

Floyd Harman, the superintendent at the Temiskaming, has just returned from the east, where he has been looking after a shipment of silver-bearing ore. Manager Director Shilling, the smelter returns of the first car amounted to \$114,750, and this money was received for 29 tons of ore. The second car contained a similar amount of as rich ore, so that this company will have \$225,000, a truly marvelous showing for a shipment of silver-bearing ore. Manager Director Shilling, on and Supt. Harman are now busily engaged in having their shafts deepened and are doing surface work on the Gans lot, which adjoins. Mining Engineer Barnett's present visit to Cobalt is exciting much curiosity. It is known that on his visit last year he made an examination of the Nipissing. He also spent some days on the Jacobs, and his reports are favorable, and point to a lot in the world's metropolis. The Town Site mine is one of the propositions that have been put on the

A RICH MINE. Temiskaming Cobalt Has Ore Up to \$1,000,000 Already Stopped Out.

One broker yesterday told The World that Temiskaming Cobalt was destined to become the richest mine in the north country. He claimed that already there was enough ore stopped out to warrant a return of \$1,000,000, and that the two carloads of ore shipped to the smelter would run into \$125,000. He also claims that the mine is easily worth \$2,000,000. Needless to state, he takes a very optimistic view of the future of the Cobalt country generally.

Union President Arrested. HALLEYBURY, Sept. 27.--A crowd of boys broke up a meeting of the miners' union last night. Mr. McGuire, president of the union, in trying to restore peace, used one of the boys rather roughly and was arrested.

PEAT BED IN WEST ZORRA. WOODSTOCK, Sept. 27.--(Special.)--A bed of peat, covering 25 acres of land, has been found on the farm of James Murray, superintendent of the Canadian Penco Co. The farm is situated in lot 21, con. 8, West Zorra. The peat bed is over 10 feet in depth and is capable of turning out an unlimited supply of fuel.

Canada-Cuba Land and Fruit Co., Limited

THIS COMPANY owns over 140 square miles of some of the best citrus fruit and tobacco lands in Cuba. The company owns and operates 110 tobacco plantations. There is an established English-speaking colony, with church, schools, stores, postoffices (with four mails weekly), hotel, sawmill, warehouses, docks (at which steamers call twice each week), and the railway, now built and trains running to within four miles of the property.

THERE ARE in the colony more than seventy of the finest fruit plantations to be found in Cuba, containing in the aggregate nearly 500 acres, now planted in oranges, grape-fruit, pineapples and other fruits, showing the most healthy and marvelous growth possible.

EVERY SETTLER is perfectly happy and contented and the best references we can give you are the settlers themselves, who will assure you of their satisfaction and future prospects. This colony is in no experimental stage, but absolutely proved to be what we have always claimed for it; the results prove this without a doubt.

TEN ACRES planted as an orange orchard means an income for life, when the grove comes into full bearing, of from \$2700 to \$5000 per annum.

WRITE for further firm founded fruit facts, when prospectus, etc., will be sent you by return mail. Title unquestionable; deeds issued at once when purchase completed.

WHY GIVE A SICK MAN POISON?

You wouldn't think of taking poison when you are sick. If you knew it, yet there are thousands of men, weak, sick and debilitated, taking poison day after day and wonder why they don't get well. Most of these men are not aware that the dose given them is poison. If they were, the chances are it would not be taken. You never know what the doctor puts in his prescriptions. That is the reason so many are taking poison and don't know it.

The doctor must use poison, for without it he could not ease pain for a minute. He puts it in nearly all of his prescriptions whether the patient is suffering from a chronic ailment or from a bad cold. Some of these poisons are mercury, arsenic, opium, cocaine, and various preparations. Most all the medicines that you buy in drug stores contain poison in large quantities.

The only way to cure pain or disease is to help Nature. Drugs don't cure. Nature will cure the disease if she has the power to give you that power; that's why I am so successful.

If you are sick or ailing in any way it is because of the failure or breaking down of your vital organs. The reason why you fail to do your work is because it lacks the electricity.

When it is doing its work right the stomach generates electricity, as applied by my Belt. Electricity is a force from the old system of drugging. It does by natural means what you expect drugs to do by unnatural means. Instead of swallowing a lot of poisonous drugs which wreck the nerves and stomach, you apply my Belt about your body and feel the soothing, glowing force of electricity penetrating your vital organs, giving health and strength to every part that it weak.

Dear Sir:-I write to let you know that your Belt has cured me, and I am entirely satisfied with your treatment. I then gave it to my sister-in-law, and she, too, was entirely cured, after being treated by many different doctors, and also being told that she would never get well, and she was so weak that she could not get up. This book tells in plain language many things you want to know and gives a lot of good, wholesome advice - no professional tommyrot.

If you can't call, I'll send this book, prepaid, free, if you will enclose this coupon.

Consultation free. Office hours-9 a.m. to 5.30 p.m. Wednesday and Saturday to 8.30 p.m.

DR. M. O. MOLAUGHIN, 115 Yonge St., Toronto, Canada.

Dear Sir:-Please forward me one of your books as advertised. 9-17-07

CITIZENS' MEETING WILL DISCUSS MANY TOPICS

North Toronto Ratepayers Meet To-Night—Corner Stone Laying in Junction—Items.

TORONTO JUNCTION, Sept. 27.—In police court to-day Fred Finch, a young man who was arrested last night for trespassing on C.P.R. property, and who was trying to beat his way on a train, was fined \$2 and costs by Police Magistrate Ellis.

Work on the new portable buildings for Western-avenue school will commence next Monday morning, and if weather conditions are favorable for building operations the schools will be ready for occupancy in two weeks.

Mr. Smith takes strong objection to this statement, as he declares he said nothing of the kind. "I have never at any time been received with more courtesy by the city officials," he stated to-night, "than I was by Mayor Coatsworth and the board of control on Tuesday last. I have met the city officials before and I will meet them again half a dozen times if necessary, and I believe that annexation can be brought about if the negotiations are conducted in a courteous and business-like manner. Last year I dropped the agitation for annexation because the city was not prepared to listen to us or discuss annexation seriously on any terms, but this year it is different and the city is now just as willing to negotiate as we are."

Harvest thanksgiving services will be held in St. John's Church, Toronto Junction, on Sunday next, Sept. 29. Rev. Canon Dixon will preach in the morning and Rev. L. E. Skey in the evening. Mr. Rechab Tandy will assist the choir at the evening service.

'The House that Quality Built'

Haberdashery Hints

For men who want to wear the best. We can emphasize best in quality, best in style, and at the same time put a double emphasis on the fact that we ask no "fancy" prices for anything we sell.

"Direct importers"—those are the two words that get you more high-class wear for less to pay than at most any exclusive store you may go shopping to.

Fall underwear, \$3.00 a suit and up. Fall gloves, \$1.00 a pair and up. Fall neckwear, 50c and up. Fall Half-Hose, 50c a pair and up. Fall shirts, \$1.50 and up.

77 KING STREET WEST. Tailors and Haberdashers

that will be placed in the cavity in the stone will be a list of names that Town Clerk Conron has prepared, which includes the mayor and council, members of the public school and collegiate institute boards, and officers and officials of the corporation of the Town of Toronto Junction.

Sunday, Sept. 29, is women's missionary day at the Annette-street Methodist Church. Rev. Dr. Hazelwood will preach in the morning and Dr. Retta Kilburn of China at the evening service.

Mrs. Harrison, who at present resides with her mother, Mrs. Thomas 69 East Annette-street, will remove in a few days to 23 South Union-street, where she intends to open a first-class boarding house. Rooms will be accommodated, and the house is fitted with all modern improvements.

The public schools of the Junction had a "day off" this afternoon. The children were treated to refreshments on the grounds, after which the prizes for the field-day sports were distributed by the teachers.

After a six months' illness of phthisis Frederick James Edward Plummer died to-day, aged 37. His late residence was on Gilmore-avenue. The funeral will take place from William Speers' undertaking rooms at 11 a.m. to-morrow to Prospect Cemetery.

The ownership of The Toronto Junction Tribune has passed into the hands of A. W. Law, who for 12 years held the position as secretary of the company. The issue of next week will be entirely under the editorial and business control of Mr. Law.

The Sterling Business College, to be opened on Oct. 1, will be conducted under absolutely individual teaching system.

Use Connell's Coal for satisfaction. Egg, stove and nut \$5.50 per ton; pea coal \$5.50. Junction head office and yard, corner of Weston-road and Dundas-street. Phone 22.

NORTH TORONTO. Public Meeting Gives Promise of Being Important.

NORTH TORONTO, Sept. 27.—The contractors for the erection of the new bank building on the corner of Yonge-street and Kensington-avenue are pushing the work with all diligence. This afternoon the cornerstone was laid, but without masonic or other honors, with the exception that D. A. Radcliffe, manager of the local bank here, was present.

The Young Men's Club of the Eglington Methodist Church held a debate at their meeting last night on the subject, "Resolved, that North Toronto needs single fare to all parts of the city."

A full assortment of the leading and most approved patent medicines at the lowest prices at Tandy's drug store, corner Yonge-street and Eglington-avenue.

George Cook, ex-principal of Waterloo School, will teach geography and typewriting at the Sterling Business College, about to be opened on Dundas-street.

A brass band will be in attendance to-morrow at the laying of the cornerstone of the new Methodist Church, which is being built at the corner of Annette-street and High Park-avenue. The ceremony will commence at 2.30 p.m. and will be conducted by the Rev. P. E. Shore, M.A., B.D., Toronto, a former pastor of Annette-street Methodist Church. Among the documents

is responsible for many diseases. Cows fed on semi-rotten brewery or distillery grain cannot give pure milk. The health authorities should prohibit the brewers and distillers from selling grain for such a purpose. Local option men are being boycotted, and probably it is a good thing. It may open up the whole question of a pure milk supply. Local option is a panacea for many ills. It works wonders wherever introduced. It will help milk dealers. Vote Local Option.

Correct Hats

Hat fashions change, like everything else, and a hat can make or mar a man's appearance. Every hat we sell is a good block, made by those who are famous in the hat world—Knox, Peel, Christy, Stenson and Glyn.

Soft Felts, \$2 to \$8. Derbys, \$2.50 to \$5. Silk Hats, \$5 to \$8.

We sell Umbrellas at \$1 to \$12, and every requisite in Men's Underwear and Furnishings, at fair prices.

will preach in the Eglington Presbyterian Church both morning and evening on Sunday.

EAST TORONTO.

A meeting of all those favorable to the Conservative cause in East Toronto will be held in Society Hall on Monday evening next at 8 o'clock sharp.

The East Toronto baseball team play the Evangelists for the championship of the town league this afternoon at 3 o'clock on the Athletic Field.

Percy Shaw, who has been connected with the well-known firm of R. G. Dun & Co., mercantile agency, for the past three years, leaves on Sunday for Calgary, where he has been appointed assistant manager to their branch office.

The York football team will meet All Saints to-day on the latter's grounds.

Special progress is being made with the laying of the water main from the Woodbine eastward, some 800 feet already being opened up. One month will probably see the work well completed.

St. Saviour's Church Guild yesterday elected these officers: President, Mrs. Blaylock; vice, Mrs. Osborne; secretary, Mrs. Taylor; treasurer, Mrs. Wm. Emperingham. Regular meetings will take place every month during the season.

F. E. Brown of Toronto visited his parents here for a few days. He left Tuesday on a business trip to Edmonton.

The Women's Institute held their monthly meeting at the residence of Mrs. Houston, Nashville. The Woodbridge Institute was present and gave the program.

Special sermons for children will be preached in Nashville Presbyterian Church Sunday, Sept. 29.

Harvest "son" soda water works are refurbishing the inside of their stables with cement floors and latest designs of feeding fixtures. Ed White of Valore has the contract.

Construction work on the railway here will be pushed now night and day. Another contractor with a large gang of men has secured a night work contract.

Arthur Bevin has improved the appearance of his property by the erection of a neat wire fence around it. Farmers thru this district are busily engaged in cutting corn and taking up potatoes. The yield is fair.

NORWAY.

Early Morning Blaze Gives Suburbanites Bad Scare.

NORWAY, Sept. 27.—About 5 o'clock yesterday morning fire broke out in a large two-story dwelling house in course of erection on Castle-avenue, and the lower part of which was occupied by a Mr. Murdoch.

The fire is said to have been caused by the explosion of a lighted lamp, which Mr. Murdoch was carrying, while engaged in working around the building. Storey building adjoining also destroyed, as was Mr. Murdoch's.

Neighbors formed themselves into a bucket brigade and assisted in keeping the fire from spreading to other and nearby houses, tho it was at one time feared that a number of them would go. The fire station on East Queen-street was communicated with. There is no hydrant in Norway and nothing could be done along that line. The families in each of the burned houses had narrow escapes. The fire loss on baby \$1500, but the amount of insurance, if any, could not be learned.

CLOTHING THOUGHTS

There are many degrees of goodness in Men's Clothing. The Suits and Overcoats we sell measure up to a mark that cannot be bettered.

They represent the best that our judgment and money can procure. We invite you to make a little inspecting trip to our Men's department; to see our goods is to be convinced that they back our claims.
