This man would be the world's super-buyer. Into his hands the nations at war with Germany would place approximately, \$10,000,000,000; year, a store of money exceeding the fabled fortunes of the ancient Incar and with no parallel in modern history. The purchases for the American army and navy are estimated a approximately \$3,500,000,000 for the first year of the war.

So far has the program progressed that the officials already have a definite idea as to whom they will choose as no final decision has been reached as to whether one man or a small commission will be chosen, indication are that it will be one man and his selection will be made probably withing the next fortnight.

These words are used in a French army order conferring the fifth palm on the flag of the famous foreign legion for gal'antry in the recent fighting in Champagne. The regiment is unique in the number of times mentioned and decorated.

The staif correspondent of the Associated Press visited the legionaries in their rest camp, where they were recupe ating and filling their ranks and heard personal narratives from of icers and men whose conduct is so in ghry praised. No matter what the men's nationality—and citizens of no fower than 51 nations are represented among the legionaries—after joining they immediately became imbued with the regiment's glorious traditions. They have been always where the fighting was hottest.

Three Battalions Remain.

When the war started six battations, forming two regiments, were sent to the front. Now only three battalons remain, fused into one regiment. Among them are still Ameri-

as well as from all the republics of central and south America. There are men from every British colony, from all the countries in Europe. Asia and Africa, and also a number of Frenchmen who have been attracted to the legion on account of its adventurous career. Many Russians, Begians, British, Italians and Rumanians have recently been transformed to their own armies, reducing turred to their own armies, reducing the legion's strength, but Spaniards, Swiss and South Americans are join-

Outflank Position.

The advance of the battallon operating to the west of Auberive was retarded for some time by the opposition of an unknown series of German entrenchments formidably armed in what is known as the gulf. It was impossible to attack frontally across the half-mile of open ground, but the le-glonaries succeeded in outflanking the position and made their way fighting for every foot, along a communication trench until they had carried the whole position. They threw fifty thousand of their own hand grenades in the course of the five days, besides many thousands of German grenades they dis-

which dominate the Ailette Valley from the Vauclere and Californie Plateau. This success gives the French a clear field of observation over important German defences. The recent French advance in the Champagne, which gave them the last of the high ground and observation of the Rheims Plateau, it seems, forestalled a German offensive designed by Von Hindenburg, it is said, was an eye-witness of the German rout. The French keep up their great dash and supreme courage in spite of their losses, in fact, the soldiers have attained a mood of exhaltation on account of their uniform progress. Nivelle is striving to create another Sedan and his plans, it is said, have yet a fair chance of succeeding.

General Nivelle still retains the active command of the fighting group

of French armies, as shown by despatches from the front. The French Government, therefore, really made its recent changes with the object of improving the army control and not because Nivelle's work caused them disappointment. General Petain, a past master in the art of warfare, as commander in chief, and General Foch, as chief of staff, relieve Nivelle of some of his more burdensome extraheous duties and allow him to concentrate on the immediate task before him. The changes also had as part of their origin the need to silence the tongues of the worst types of French politicians. They do not imply any alteration in the offensive policy of the French.

The resumption of an intense artillery action on the Julian front heralds the resumption of the Italian advance. The chief fighting, so far, has had for its object the storming of all the western heights which lead to the plateau, east of Gorizia and dominate that town. The Italians are striving to bring the Austrian lines of communication under the fire of their guns. The present drum-fire reported, however, is proceeding on the Carso Plateau, on the road to Trieste. In order to proceed with the invasion of Austria-Hungary, so as to impose the allied terms at Vienna, the Italian army is moving forward on a broad front. NEW TORONTO

Its Industries and Real Estate

New Toronto has been active for the past twelve months in securing large industries. They have the right argument—Real Estate is low. Today the Goodyear Tire & Rubber Company and the Du Pont Fabrikoid Company are completing their buildings and will be operating within a month or two. The Goodyear Tire & Rubber Company will employ fifteen hundred hands and the Du Pont Fabrikoid Company one hundred. Brown's Copper & Brass Rolling Mills have enlarged their plant and are increasing their staff considerably. Brown's mills are compelled to house hundreds of men in their own buildings, owing to the shortage of houses. What is to become of the new population? Conditions are serious.

SAFE INVESTMENT

Buy land where you are sure to make a profit. These factories are substantial and have come to stay. It is a wonderful opportunity for builders, as all our land is in the active belt. Buy now while prices are low.

Increase in British Preference to Fifty Per Cent. Among the Proposals.

This amendment was subsequently This amendment was subsequently ruled out of order, but came up again by arrangement on the motion to go into supply, the budget resolutions confirming the proposals of the government in respect to the business tax being meanwhile concurred in. Mr. Oliver, in support of his resolu-tion, called attention to the fact that the revenues of the government for 1917 had increased by \$100,000,000 over those of 1916. This was an enormous increase, which did not reflect any development in the country. Our cities, he said, showed no expansion, the question of preferential treatment the question of preference and question of preference and question of preference and question of preference and question and agricultural increase was at a standstill. In 1910 the area under cul-

embargo on all wheat shipped to the head of the lakes in the fall of 1916. Their action, he said, must have been taken with the concurrence of the Dominion Railway Commission and the Dominion Government. Mr. Oliver, speaking to the terms of his amendment, said, the western farmers but he found no difficulty in revising amendment, said, the western farmers had little use for tariff taxes and none at all for protection. They were quite willing that wheat be admitted free of duty, so that the people of

west, altho Frank B. Carvell, Liberal inember for Carleton, N.B., supported the Oliver resolution in something like a free trade speech.

Sir Thomas White dealt admirably with the situation. He declined to discuss the various ftems in the customs tariff affected by the resolution, but said that it was absolutely out of the question for the government at this time to reduce its revenue by lowering tariff duties. This was not, he said, the proper time to discuss tariff.

He quite pertinently asked why Mr. Oliver did not put his free rade views into practice during the many years he was a member of the during the faurier Government.

Saguency and to the double track should have torn up the double track of the Canadian Pacific along the north shore of Lake Superior. To these objections Sir Thomas replied that the government had gone for counsel and had been guided by the advice of Sir Henry Drayton of the Downing Railway Commission. Dominion Railway Commission.

Canada is Developing.

Currie Unsubdued.

Upon the orders of the day. Col.
John A. Currie (N. Simcoe) rising to a question of privilege, took issue with the minister of militia respecting the pay of colonels in the permanent force.
A number of these colonels, he said who never intended going to the front were getting double the pay of officers of similar rank at the front.

Demands Tariff Revision.

When Sir Thomas White moved that the budget resolutions reported from the committee of ways and means be read a second time and concurred in, Hon. Frank Oliver offered by way of amendment a resolution declaring that the tariff should be revised downward in the following respect:

1. That wheat, wheat flour and all other products of wheat be placed upon the five list.

To a divice of Sir Henry Drayton of the Dominion Railway Commission.

Canada is Developing.

Continuing, the finance minister said he had no apology to make for the increase in the revenue. The government had to have increased revenue, not only for war expenditure, but to say that our cities were not developing. There was not much building in a time like this in a city like Toronto, but there were no vacant houses. There was less homesteading in the west than formerly, because upon the five list.

We would do wonderfully well to hold our own. As a matter of fact, the munition industry has brought a high state of prosperity to the country.

Tariff is Mainstay.

The farmers of Western Canada had the long the five list.

The farmers of Western Canada had never been so prosperous as they were today. Sir Thomas said it was unnecessary to discuss in detail the 2. That farm implements and machinery, farm tractors, mining, flour and sawmill machinery, and repairs for same, rough and partity dressed lumber, illumination, lubricating and fuel oils, cement and fertilizers be added to the free list.

3. That staple foods and food products (other than wheat and flour), domestic animals and foods therefor, be admitted into Canada free of duty when coming from and being the product of any country admitting like Canadian articles into such country free of duty.

4. That substantial reductions be made in the general tariff on all armachinery, form and the same and foods.

The minister went on to show that the discuss in detail the amendment. This was no time to revise it downward. In the first place we absolutely needed the revenue that tariff produced. For years to come the tariff would be our main to downward. In the capital. It may be averted, but Ottawa feels that anything may have but Ottawa feels that anything may have founded to revise it downward. In the first produced. For years to come the tariff produced. For y

Must Postpone Preference.

Certainly it would be most unwise even apart from this, to revise the tariff at this time; it would mean a dislocation of business in the middle of the war. After the war was over there would be a tariff revision, but he was not prepared to say whether it should be a revision upward of downward; that would have to be determined by within the empire and to our allies should be postponed until after the ndstill. In 1910 the stee provinces war. By that time we would probably war. By that time we would probably have a number of trade treaties that have a number of trade treaties that increased to 16,500,000 acres. In 1911 ft increased to 16,500,000 acres, and in 1912 to 18,000,000, but after that there was a startling diminution in the increase of acreage which only rose to 18,398,000 in 1917.

Startling Charges.

Mr. Oliver then made some rather startling charges in connection with the recent rise in the price of wheat. He said the western farmers had parted with their 1917 crop for \$1.75 a bushel, but by market manipulabecause to make any change would mean the destruction of business. Moreover, it was providing a satisfac-tory tariff from a revenue standpoint. People who talked about doing away up to \$3.00 a bushel.

The farmers, in a way, had been compelled to sell because the Canadian Pacific, the Grand Trunk Pacific and the Canadian Northern put an embargo on all wheat shipped to the band of the least of the feather of the feather of the least of the feather of the feather of the least of the least of the feather of the least of t

but he found no difficulty in revising it upward. As a matter of fact, there never was a better time to revise the tariff than at present, for the people were now prepared for taxation. He elieved that a federal income tax would yield a large revenue. The City of Toronto might only get half a million dollars on a two per cent. tax, but for war purposes the British Government was assessing a graduated income tax which ran up to forty per

Many articles in the tariff produced little or no income. We had a tariff duty of sixty cents a barrel on cement, but it only yielded to the government a revenue of six thousand dollars a year. The common stock of the Canada Cement Company was all water, yet it was today selling for sixty cents on the dollar, and the cry would be made that we could not take off the duty without injuring innocent olders of the stock.

As a consequence it has for some time been the practice to retain in England all under the age of 19, thus, in effect, raising to that minimum the age of those who face the actual ordeal. There are many who believe it would be wisdom to place still higher the age at which our soldiers should be called upon to serve. "The United States bill recently passed fixes the minimum age in that country at 21 years. After full consideration of all the circumstances, and particularly of the views of those actually in charge of our troops overseas, the government has come to the conclusion that in putting into practice the principle of compulsory service the better course is to fix the age of 20 years as the lowest at which compulsion shall be applied." racking hardships as those of more

By a Staff Reporter.

Ottawa, May 23.—On the report of the military hospitals commission to the house of commons by Sir James Lougheed, president of the commission, earnest emphasis is laid upon the necessity of measures to deal with the problem of absorbing into civil life after the war tens of thousands of returned Canadian soldiers. The report concludes with a discussion of future problems based on the experience of the commission in its close contact with the men who are returning. "The problem of the commission in its close contact with the men who are returned soldier is the most important economic and political question before the people of Canada, and members of the commission have given it close study and careful thought.

"A few of the directions in which is steps may be taken, to prepare for peace can be summed up by a reference to the following;

"A few of the directions in which is the provincial power will have to be found for many thousands of men.

2. It will be necessary to engage in public works such as the building of a transcontinental highway,

3. A policy of assisted land settlement should be put into operation, both federal and provincial.

The departments and commissions interested in the various problems are grouped as follows:

Vocational training for the men in hospital, and re-education for those unable to follow their occupations was taken up at an early stage but no percentages were available. A vocational secretary was appointed in January, 1916, and an immediate survey of typical groups of patients was January, 1916, and an immediate survey of typical groups of patients was made. It was found that the proportion of men so disabled as not to be able to return to their previous occupations was small, Later figures show that in France the proportion is less than one per cent. Reasons are given for estimating that the total will be higher in Canada.

Reference is made to the difficulty of getting instructors, and disabled men are being employed where possible. The work of vocational training and re-education is only in its infancy, and there will undoubtedly be a considerable development as men come to realize the advantages offered.

Alluding to a "disablement fund," the report says:

"That such a fund will be necessary in the future is certain. There have been a number of instances, and in the future there will be a great many more, where men who have no claim whatever on the government are in financial difficulty. To meet this situation a considerable sum will be necessary especially for emergency necessary, especially for emergency purposes such as tiding over a period of illness or unemployment."

exemptions are being sparingly allowed.

The government has just issued a resolution urging the Indian community to take more active steps to make recruiting for the Indian regiments more worthy of the name and aspirations of the country. All the government departments are now working vigorously in connection with the waf. The munitions board has just established nine centrally controlled branches for the chief industries, that are independent of provincial borders.

Women Not to Be Humbugged. In giving the franchise to six million women in Great Britain it goes without saying that a new heaven and a new earth are as definitely expected as the earth are as definitely expected as the old earth is definitely passing away. We may have to wait some time for the effects to be manifest, just as the world had to wait some time after 1832 before the effects of the first reform bill began the effects of the effe the effects of the first reform bill began to be seen, but a lot of things have happened in Great Britain since 1832 which never could have come to pass had the

reform bill not passed first. Talk about bringing in the new world to redress the old is trite compared with what bringing in the woman's vote to reform humanity will prove to be. And we may make our minds up that the experiment of giving the women a vote would not have been tried had it not been proven that no worse muddle of affairs was possible than men unaided have made of them.

Very few politicians who have assented to the changed policy are able to explain clearly to themselves why they have done so. In most cases, especially for the professional politician, it has some against the grain. The usual explanation is that the vote is given on have taken in war work. Some of the leaders have been honest enough to admit that this is inadequate and not the impossible to have it ready for deaccount of the remarkable share women real reason. The remarkable share that coration day (May 24) we have arwomen have always taken in peace work would be a still more valid reason. Subconsciously, however, men are beginning to understand that their bluff of democracy and self-government is only a bluff and largely a fallacy, and that behind the subterfuges lurks the convictions of the subterfuges lurks the convictions of the subterfuges lurks the convictions of the subterfuges lurks the conviction of the subterfuges lurks the subterfuges lurks the conviction of the subterfuges are ranged to have them use the enclosure ranged to have the subtle ranged hind the subterfuges lurks the conviction that a gross injustice has been done to women right along and that the whole race suffers on account of this injustice. To apply the belated remedy of the franchise is the obvious thing, and politicians dearly love to do the obvious thing There is a continual competition as to which party will do it first. Woman's suffrage was perfectly obvious, however recondite the occasions, however inscrutable the probable results.

The real psychology of the change is that the weight of responsibility of misgoverning the world has become too great for man to bear alone, and tho he never admit it, especially if he is a of the awful calamity of the great war to call in his always active partner to share his responsibilities. It will be found also, wherever there is an objection to suffrage on the part of the women, that the real reason is the objection to share responsibility-not the objection to share authority. As a matter of fact, most of the prominent women who object to suffrage are notoriously among the most active managers and wirepullers to be found. The answer given by one politician to the objection that the women did not want to vote-the answer that they would not be compelled to do so-was not satisfactory to the objector simply because it did not dispose of this question of responsibility. The vote is the women's; if they fail to use it the responsibility remains just as

much as if they did. It must be patent that the entry of a new element like that enfranchized by the new act will involve entirely new policies. The greatest perhaps will be the equalizing of the rights and privileges of men and women in all kinds of CONDUCTOR KILLED ways. Women do not need to become coarser, while it remains open to men to become gentler. The German attitude towards women must perish from the earth. Nor do women need to become industrial slaves while science and machinery continues to work such miracles

as we have seen in the last three years But one revolutionary change is coming, and it is coming as much in self-ing to adjust the trolley pole at the defence at the instigation of the men intersection of Bloor and Yonge themselves as from any pressure on the street, yesterday morning, Arthur part of women. It is the equalization of the wage standard wherever men and women compete in labor. The greatest women compete in labor. The greatest crushed between his own car and the munitions board. He said that the mistake men ever made was to allow them in wages. Equal pay for equal work should be the rule and will be the when women have the influence and authority of the vote. By no amount of sophistry can it be shown that a woman doing exactly the same work as a new took of the street. Southbound, the proposed line to be of a temporary character. Breaking Down the Doctrinaires. Dr. Macallum, F.R.S., in his address to the Royal Society of Canada at Ottawa, looked forward to the new age which everybody has in mind at present, "that new world which is the old," as Tennyson so daintily reminded us, and he asserted that all the old shibboleths would be discarded, and that "mankind would see things as they are." Perhaps. In a world where all things are becoming, we fear we shall only be able to see them as they are for the time being. Even science has

been willing to recognize the mutability of what had been deemed unchangeable. "Free trade and protection, the laisses faire doctrine, individualism, socialism and all the creeds and counter-creeds, will be only memories from the past, because the conditions to be will refuse to be solved by doctrinaires and idealists. Thus Dr. Macallum.

With all of this we are quite willing to grouped.

fumble dignity at the toiler's bench and

humble dignity at the toiler's bench and the investigator's laboratory.

There is no finality for science, any more than for commerce, for politics, or the fashions. While the world changes, science must change also, Radium has let a lot of light into the brains of the world in the last ten years, and we believe the dootrinaires and idealists of science must revise their conclusions, as well as those in other walks of life.

It is the chief glory of science that it

It is the chief glory of science that it is democratic beyond measure. All the scientific men have to sit at each other's feet, whether they like it or not. If they can do so with a good grace, it is to the advantage of the humanities, but, in any case, it disposes of the doctrinaires and the dogmatists, and it gives the idealists a new direction.

Veterans' Arch.

Editor World: It was intended to build a temporary arch to be used on the day we as veterans decorate our monuments by the great war vete-rans and their relations and friends who have been called upon to mourn by loss loved ones with any wreaths or hope to have the arch completed by July 1, when it may be used in this connection. We hope all interested will take advantage of our proposal. Ary suggestions will be gladly ceived and acted upon by us.

Spectator Walks With Australians Thru the Ruins of Peronne.

Modern war in its full intensity, its perfected organization, and in its infinite detail of attack and resistance, as shown by the new war film the British Government has just released for public exhibition, and which will be presented in Toronto next month by Messrs. Jule and Jay J. Allen under the auspices of The Toronto World, is a vastly different thing from what it was in the days of the great Na-

The new official picture, while it does not include all the warring nations in the scope of its record, is still the most detailed and comprehensive war picture yet filmed, according to descriptions reaching here from Great Britain. It confines the field of vision to the gigantic struggle of the British Empire on the western front. Here is enough alone to make a thousand pictures. Several million men in mortal combat means not only the men actually on the firing line and the front trenches, but men in the sky, men at the artillery stations, men on the com munication lines, men at work with a concentrated purpose and under a supreme intelligence, guided by a gen-eral plan which dovetails the energies of millions. A marvelous accomplish-ment for a nation unprepared at the start. And a marvelous picture of the otherwise well nigh incomprehensible organization necessary to make victor jous war against the war-trained German hosts is that which the government of Great Britain has just given to the public.

to the public.

Spring Offensive.

The spring offensive of 1917 marked the beginning of the German retirement from France. The struggle is still raging, and the work is not yet done. But the result of the operations which culminated in the fall of Bapaume and the capture of Perqune is to show what can be done by the British armies when the time is ripe. The new film shows what was necessary to do to drive the Germans out of the entrenched and fortified positions of two years' standing. It shows the actual victory and the trisitions of two years' standing. It shows the actual victory and the triumph. And it shows something of the

The Reason For

Of three men, all wearing a size 15 W. G. & R. shirt, one may have a thin neck. one a medium heck and one a stout neck. Only for the medium neck should the same size collar as the shirt be worn. The thin neck requires a collar a quarter-size smaller than the shirt. The stout neck a quarter-size larger.

Look in your looking glass and see if a 1/4 size larger or smaller W. G. & R. collar would improve your neck appearance or add to your comfort.

TOO COLD AGAIN TO

Game Postponed for Third Day This Week-New Outfielder Reports.

The weather was on a rampage again yesterday and the game at the Island was postponed for the third successive day. Mortreal also felt the cold blasts and there was no game there. Only two International games were scheduled.

Two fixtures in the National and a like number in the American League were postponed.

Outfielder Altenberg reported to the Toronto management yesterday and he will play against Buffalo today.

A New York despatch says: John McGraw, manager of the New York Ghants. is trying to do his bit. Standing on a rough wooden platform in a building on, Chambers street, he pleaded for army, navy and marine corps enlistments. The baseball leader was cheered by the crowd. Scattered about the room were many of his players. Harry Hempstead, president of the club, had a seat on the platform.

dent of the club, had a seat on the platform.

"I know the baseball fans are willing to make a fight," said McGraw, "because I have watched them long enough to find that out. We are not making this fight because we want to take anything from anybody. We are making it because we stand before the world as the one country which believes that every man should have something to say as to how he is governed. That means a free country. We are fighting for freedom just as much now as when our great-grandfathers fought for it right in this neighborhood in 1776.

"We figure it is a fight for the greatest thing in the world—a man's personal liberty—and I don't know of a ball player who isn't ready to go to a finish on that account. Fivery one of us is first of all again for our own-courtry, the United States."

Chatham, May 23.—The Chatham municipal purchasing board will offer ratepayers flour at five dollars a hundredweight, more than two dollars and a half below the present market price, within the next few days. Secretary George H. Wards, at a meeting of the committee this morning, produced samples submitted by a western Ontario miller, stating that the firm had agreed to furnish large quantities of the flour at the price stated. The flour has been put to the test, and is said to be entirely satisfactory.

The Royal Grenadiers Chapter, I.O.D. E., met at St. Thomas' parish house. Important business was discussed and arrangements made for the band concert. The women in charge of the booth in the armories will be Mrs. Ritchie, Mrs. Greig, Mrs. J. Phillips. The Grenade Club presented \$100 to the chapter, to be used in placing a cot in the preventorium in memory of fallen Grenadiers. Mr. Brock, lieutenant, 10th R.G. gave \$10 towards the prisoners war fund, and overseas badges were presented by the regent to two members. One hundred and fourteen graves were decorated on May 12 and 13. Mrs. Kenneth Dunstan and 25 girls spent the day cutting up seed potatoes for the four-acre plot near Upper Canada College, and they did not peel them. Mr. Dunstan assisted in the carrying up of the potatoes from the cellar. Prof. and Mrs. Playfair McMurrich are spending a week in Ottawa.

The dinner of the Ontario Dental Association at the Carls-Rite last night was a very successful one, over 300 sitting down in the beautiful dining room, which was gaily decorated with flags of the allies and pretty lights, the tables being arranged with silver vases of beauty roses and silver candelabrum.

Perhaps the best and most effective way of illustrating the real value offered by the R. S. Williams & Sons Co., in their great semi-annual Clearance Sale of used and "nearly-new" pianos and players is to state that they have reduced nearly all of these instruments (except the organs, squares and a few uprights) \$50.00 to \$100.00 under what they were marked before the sale—and these former prices were at least equal to the values offered anywhere else.

SALE LASTS ONLY FEW DAYS. The sale, as is usual with With liams great offerings, lasts only a fedays, and disappointed customer from former events can testify to the Autopiano, Apollo and others.

Some of the instruments are very old and suitable only for summer cottages or small homes, but the majority of them are instruments that have had but little use, having been taken from homes where no one could play in exchange for player-pianos, or having been used for recitals, rentals or demonstrations.

The work of the Williams repair department on these instruments has in many cases made them equal to new in their appearance, and some of them would easily pass for new if not labeled as used.

SOLDIER POET RECITES VERSES OF TRENCH LIFE

In, plain and unassuming manner Sergt. R. Hampton, late 18th Battalior C.E.F., recently invalided home from the front, gave a recital of his own poems at the Foresters' Hall lass evening, assisted by Miss Lillian Vist violinist, and Madame Ella Montagu Penley at the piano. The poems were all composed while in the trenche and are mostly descriptive hattly pieces and are strongly marked by their dramatic force. The "Listenin Post," "The World in Tears," "The Grouser," and "The Ration Party, were all given in a forceful manner and were typical of trench life, while the dainty title "To Little Sister Recores" gained the poet the most applause.

Sergeant Hampton is a native a Manchester, England, and prior to the war had been in this country to about nine years. He was engage in the building trade in Calgary when his wife and family now are. Live Stock Market

There was a better all-round tone to the Union Stock Yards market yesterday, and while trading was not on a very extensive scale, between the fresh arrivals, 55 cars in all, and the last of Monday's heavy receipts, a lot of good stuff was turned over and cleaned up. There was a good all-round demand and the market for all kinds of cattle might be classed as steady to strong. There was a slightly better market for bulls and butcher cattle, and generally speaking it closed strong at Tuesday's prices. There might have been an advance of 10 cents on some lines, and the general impression was that next Monday's receipts might fall rather below than above those of a week ago, accounting for the general firmness. There was an exception in the case of stockers and feeders, for which the demand is not very good.

Medium cows were lower and good butcher covers and bulls were steed to the constitution of the stockers and feeders, for which the demand is not very good.

Medium cows were lower and good butcher covers and bulls were steed to constitute on the market and the trade on the value of cattle on the market and for supplies.

The trade in calves was faship active. The trade in calves was faship active. The trade in calves was faship active.

Medium cows were lower and good butcher cows and bulls were steady, with prospects about the same. 'A few good decks' of steers sold at \$12.10. The sheep trade was easier, while the calf trade was steady with Tuesday's quotations. Good sheep, to go back to sheep, sold all the way from 10c to 12c. Good yearlings sold at 16c, light sheep at 10c to 12c, with sheared sheep 3c off these prices. The general outlook for the sheep trade is undoubtedly easier. There was a heavy run of hogs, about 2000 in all, but prices held steady around \$17 fed and watered. Some of the commission houses were inclined to think that the outlook for hogs was for lower prices and characterized the feeling at the close of the market was weaker. Not withstanding the holiday the regular market will go on today as usual.

TWO YEARS REQUIRED TO COMPLETE SCHOOL

Many Delays Responsible for Waste Interest in Building

Elaborate Structure. The cry of extravagance so often raised by the ratepayers against the board of education is to be accounted for when facts regarding the new Park School, now in course of erection, are made public. For over two years the work has been under way. The original cost of the school was \$195,000 for the building and \$20,000 for the site, making a total of \$215.000. The interest on investment at for the site, making a total of \$215,-000. The interest on investment at six per cent. is \$12,900 per annum or over \$1000 per month, and the total interest on the two years wait for the completion amounts to \$25,800. Some of the trustees expressed surprise at the elaborate character of the construction, when they visited this school, Trustee F. P. Hambly remarking, "Enough money has been spent on the stone work at this school to nearly build another school."

HARGRAVES ORE SHIPPED REGULARLY

Resumption of Operations Last Fall Brought Quick Results.

Probably no mine in Cobalt reprefents revival and "come back" more than Hargrave. Hargrave is a study in mining failure and success—a commentary on changing conditions in Cobalt. Hargrave, no less than Beaver and Timiskaming, with very deep ex-ploration work under the diabase, represents what may be called in a measure the rebirth of Cobalt.

Hargrave Silver Mines, Limited, began business in 1908. The properties remained closed down thru the years 1914 and 1915 and the greater part of 1916. Production up to time of re-sumption was around 500,000 ounces of silver. The stock at one time sold up to 77c a share. The authorized capital is 2,500,000 shares and the stock of the company is now selling on a basis of about \$300.000.

has contributed the bulk of Cobalt production. In the conglomerate formation the veins are fairly continuous, which means that you can rely on the ore. But in the diabase territory you get a pocket and then it is gone, and then you get another pocket. The trouble with some Cobalt properties has been that the pockets in the diahas been that the pockets in the that-base formation do not occur often enough to make it profitable to work them. Hargrave has the famous Kerr Lake No. 3 vein in its diabase forma-

Aver ready for shipment. This single shipment which is being made, or will he made, in the near future, will more han equal the entire year's production of Hargrave in 1913. In addition to nent the company has been hipping ore from the dump or under-round regularly thru December, Janury, February, March, April and up to he present time. Shipments from th lump are made to the Dominion Re-luction Company, of Cobalt.

BETTER FEELING IN MINE MARKET

McIntyre Made Nice Rally-Renewed Demand for Stocks Perceptible.

It appeared yesterday as if the pubc was beginning to get a glimmerng of the unprecedented bargains which are offering at the present time n the local mining market. Tho trading was not so large in volume as on the previous day there seemed to be a better demand for stocks and a nore confident tone was in evidence thruout the day. The timidity of public investment

speculators in their failure to take advantage of the present low levels brought about by the recent depression is in sharp contrast to their anxiety to buy last fall. People were then, figuratively speaking, falling over themselves to buy stocks at prices in some cases a hundred per cent, higher than they are now. It is true that since that time the shortcent. higher than they are now. It is true that since that time the shortage of labor has become more acute but with exception of Dome and Hollinger this has not exercised a very serious effect on the other properties. High costs have proven a large item, particularly with the gold properties, but in the silver group this factor has been more than offset by the higher price for the white metal. The fact that McIntyre, altho maintaining its production and having paid already one dividend of 5 percent, with another one payable in a week, has dropped in price from \$2 per share in January to \$1.35 this week is a fair indication of how drastic has been the discounting of all the various adverse factors, realizing this the public still take the attitude so aptly expressed by a local realizing this the public still take the attitude so aptly expressed by a local broker as "anxious to buy, but afraid."

GOOD CROP NEWS IMPAIRS WHEAT

Bia. Chicago Market Fell Four to Five Cents During Yesterday.

Chicago, May 28.—Bearish sentiment prevailed today in regard to wheat, owing chiefly to favorable weather and croop reports, and to continued forced restraints on buying. The market chosed steady, four cents to five cents net lower, with July at \$2.27 and \$5eptember at \$2.01. Com finished \$4c off to \$6c up, oats down \$6c cent to \$7c to \$6c.

Improved crop conditions in virtually all sections of the domestic wheat region were shown by the governments's weekly report and by more private detailed advices. vices. It was said that the winter crop has had ample moisture now to last for some time and that the cool weather which has been the rule was auspicious for the best rosults.

Agreement was general that the seeding of spring wheat in the main producing states would not exceed that of last year, but increase in other territory was declared to be nearly certain to offset any possible reduction in the principal region of supply.

possible reduction in the principal region of supply.

Harvesting of new wheat was reported to have streted already in Texas. The total amount of business in future deliveries was estimated at only 200,000 hushels. Considerable significance was attached to announcements that important purchases of wheat for the United States were being made in Austrafia and that Japanese vessels were relieving the scarcity of ocean tonnage available for shipments to San Francisco or other American Pacific coast cities.

Consider Mines

IT IS TIME TO FORGET THE MARKET. IT IS QUITE DISTINCT FROM THE MINING INDUS-TRY. IT IS THE MINES THAT PAY DIVIDENDS. IT IS THE MINES THAT HAVE THE ACCUMU-LATED ORE RESERVES. WHETHER THE MAR-KET IS POUNDING AROUND BOTTOM OR NOT, IT IS SAFE FOR THE INVESTOR TO PURCHASE SELECTED MINING STOCKS NOW. THERE ARE OPPORTUNITIES FOR PROFITS THAT NEVER BEFORE EXISTED IN THE HISTORY OF MINING. THE MAN SELDOM SUCCEEDS WHO WAITS FOR THE BOTTOM OF THE MARKET. BUY SAFE. BUY NOW. WE RECOMMEND FOUR GOLD STOCKS: DOME, HOLLINGER, McIN-TYRE AND DAVIDSON—THE FIRST THREE, BE-CAUSE THEY ARE GREAT PRODUCERS, AND THE DAVIDSON, BECAUSE IT IS A NEAR PRO-DUCER AND ITS FUTURE IS ASSURED.

Winnipeg, May 23.—Winnipeg October wheat closed 5%c down, on a fluctuation of 11c. Winnipeg oats closed ½c lower, and 11c decime. Barley closed 3c lower, and flax 3c lower for May and 3½c lower for July.

The general improvement in world crop movements and the opening of the winter wheat harvest in the United States were the factors in the lower prices. There was practically no change in the cash situation.

Deportation of Belgians Is Resumed by Germans

Havre, May 28.—The Germans have resumed the deportations of Belgians, according to information received by the Belgian Government. Three thousand persons are reported to have been deported from the suburbs of Brussels since the beginning of May.

The deportations of Belgians was reported to have ceased last month, owing to the representations made to Berlin by Pope Benedict and protests from some of the German Socialists.
