THE
MERCHANTS' ALMANAC.
 1846.

Explanation of the Calendar Pages.

At the head of the respective pages for each month are given the ordinary Tables of the Changes and Quadratures of the Moon. These Tables—together with the three first vertical columns of each page—it is presumed need no explanation.

The fourth and fifth columns shew the mean times of the rising and setting of the sun. The quantities are only set down to the nearest minute. The uncertainty of the *observed times* of the rising or setting of Heavenly Bodies, on land, caused by the varying amount of Horizontal Refraction, and the general liability to the intervention of terrestrial objects in such observations, renders a closer approximation unnecessary for ordinary practical purposes.

The sixth column contains the Moon's place in the signs of the Zodiac.

The seventh column contains the mean times of the rising or setting of the Moon. These quantities are only set down to the nearest minute, for the reasons mentioned in respect to the Sun.
