NATIONAL PROGRESS.

There is nothing in the world which does not progress on the one hand or decay on the other. With nations in that respect it is the same as with individuals, and as it happens with the individual that the sooner he has reached the highest point to which his nature will allow him to be elevated, the sooner the decaying process begins, so happens it with nations. Forms of government are less material than people imagine; they are the result rather than the causes of progress. As surely as day follows night do free institutions follow popular emancipation. The very instant that a people free themselves from irresponsible control do they take upon themselves a governing authority. Young countries are always progressive; but there are old countries progressive too. Russia has made great strides of late years. From a state of semi-barbarism she is rapidly emerging, and her political institutions are being as rapidly ameliorated. The Czar is as yet omnipotent, but his omnipotence is not that of previous Czars or Czarinas. The nobles will first rebel, then the peasantry. That which happened in the reign of King John, in England, and only a few years ago happened in Hungary, will ultimately happen in Russia. Russia is making political progress while other nations are politically and commercially decaying; her greatest greatness is to be attained, their greatest greatness has been attained. The progressive principle is no where so evident as in positively new countries or in colonies. In these, the progress is readily perceptible. From utter helplessness, with them there is just one step to independence, and that step taken, nothing can impede their advancement. Thus, we have seen the United States emerge from the condition of colonies to the position of independent States, and have seen them stretching their limits and adding to their power—ship upon ship added to their navy, their population rapidly increasing, and, indeed, their political power and commercial greatness quickly extending. And yet this has been done independently of party. It is not the ascendancy of this or that political clique which has led to such results, but rather it is that the country must necessarily reach the highest position which its circumstances of climate, situation, and population will allow, and that the highest position has not yet been attained. As it is and has been with the United States, so will it be with Canada. Nothing can stay the progress of this country. Neither prejudices, nor passions, nor any feeling whatever will much interfere with it. Party policies may attempt much, but assuredly will not succeed in checking our onward progress. We need not pursue the subject farther. This train of thought was induced by the following remarks in Blackwood, by an Englishman abroad writing on "American Politics"—"Whoever may be the President however, the United States will hold on the even tenor of their way—increasing every day and every hour in material prosperity—augmenting in population and resources. They will not interfere in the affairs of Europe, notwithstanding all Kossuth can say; they will not again attempt to surprise Cuba, under cover of a Creole revolution, till a more favorable opportunity. They will coquet with the Sandwich Islands; push their feelers into the open oyster-shell of Mexico, and as far as the narrowest part of the Isthmus, feeling a destiny which impels them thither. They will flatter and court the Canadians, who hate them; construct railroads and canals as highways for enterprises of all kinds; settle, populate, cultivate, develop wild districts and undiscovered resources; display many of the best, and many of the worst features of the Anglo-Saxon character, with here and there a touch of all the different nations which they are absorbing into themselves; and in the end, I believe, before magnitude causes disjunction, or corruption produces decay, will become what they believe themselves to be now, one of the greatest people that the earth has ever seen." That which is asserted as being the certain destiny of the United States will be also our certain destiny. The time will be when the people of this country will also not only consider themselves but in reality be a great people, by means of railroads, canals, steamships, and emigration.—[Quebec Morn. Chron.

THE WOLVES AND THE RAILROADS.—During an excursion to Northern Indiana a few days ago, we learned that since the tracts of the railroads around the lake were laid down but one single wolf has been seen or heard of south of them, and it is thought that he had never been north since their construction. The farmers of Twenty-Mile Prairie and adjacent country, no longer troubled about herding their sheep in pens during each night, as they were formerly. The wolf is at all times exceedingly suspicious of traps, and is not disposed to venture near iron or steel, however tempting the bait may be that lies near it; hence their fear of crossing the railroad track to commit depredation on the flocks in the farming country south. At

night, too, when they leave their dens, the locomotive pass, and their hideous and strange noise is not calculated to inspire the varmints with any remarkable degree of confidence and security from danger.—[Chicago Tribune.

IMPORTANT TRIAL IN ALBERT COUNTY.
The Mining Case Settled!—A telegraph despatch was received yesterday from Hopeville, Albert County, stating that the important trial relative to the Mining License in this County, between Edward Allison, and Wm. Cairns, Esquires, Defendants, and Dr. Gesner of Nova Scotia, and others, Complainants, has at length been decided in favour of the Defendants. The Court opened on the 20th July. His Honor Judge Wilmut presiding, and the case occupied fourteen days, during the whole of which time the greatest patience and attention was manifested by the Jury, which, we believe, was specially summoned for the trial, and consisted of some of the most intelligent men to be found in the County.

Never perhaps at any previous trial in New-Brunswick was so much interest manifested as to the result, nor was there ever a greater array of scientific men from the Colonies and the United States examined on either side, both as to the Geological position of the Mine and surrounding country, and the chemical properties of the article in dispute. Drs. Robb, Wetherall, Lidy, Anticell, and Professor Taylor were examined on the part of the plaintiffs, and Professor Silliman, Drs. Percival, Hayes, Jackson, Torry, Elliot, Dock, and Messrs. Teschemacher and Poles, on the part of the defendants. The results of experiments on both sides were also exhibited, and on the cross-examination of one of the plaintiff's witnesses, it appeared that an article which had been produced on the trial in Halifax, labelled "Hillsboro' Asphalium, from Albert, New-Brunswick," and which had been used as part of the proof to establish the mineral to be Asphalium, and as coming from the mine, and its immediate vicinity, was in reality a piece of frotelium found near a Naphth spring across the Petitcodiac, in the County of Westmorland, upwards of 10 or 12 miles from the mine, being in no way connected with it, and entirely different in its aspect and characteristics from the mineral taken from the mine itself. It might be superfluous to add that this person was not one of the witnesses above named.

We learn that the impartial conduct and diligent attention of His Honor the Judge have been highly spoken of, while the patience and intelligence of the Jury may be safely commented upon.

The Counsel for the Plaintiffs were D. S. Kerr, Albert J. Smith, and C. Miller, Esqrs. For the Defendants, the Hon. Attorney Gen. Hon. J. H. Gray, and J. M. Johnston, and A. C. Palmer, Esquires.

The result of this trial proves two important facts, namely, that the Jury, in addition to negating the trespass, have found the article in dispute to be Coal, and not Asphalium, and that satisfactory evidence has been produced of a rich supply of Minerals, &c., which must add to the revenues of the County of Albert, and prove highly beneficial to the Province at large.—[Newbrunswick.

PROGRESS OF LIFE AND DEATH.—From Hunt's Merchant's Magazine, the following curious statistical memoranda have been taken, deduced from the late census of the United States:—

"Among the interesting facts developed by the recent census, are some in relation to the laws which govern life and death. They are based upon returns from the State of Maryland, and a comparison with previous ones. The calculation it is necessary to explain, but the result is a table from which we gather the following illustration: "10,268 infants are born on the same day and enter life simultaneously. Of these 1,243 never reach the anniversary of their birth. 9,025 commence the second year, but the proportion of deaths still continues so great, that at the end of the third only 8,183, or about four-fifths of the original number survive. But during the fourth year, the system seems to acquire more strength, and the number of deaths rapidly decreases. It goes on decreasing until twenty-one, the commencement of maturity and the period of highest health. 7,134 enter upon the activities and responsibilities of life—more than two-thirds of the original number. Thirty-five comes, the meridian of manhood; 6,302 have reached it. Twenty years more, and the ranks are thinned. Only 5,727, or less than half of those who entered life fifty-five years ago, are left.—And now death comes more frequently.—Every year the ratio of mortality steadily increases, and at seventy there are not a thousand survivors. A scattered few live on to the close of the century, and at the age of one hundred and six the drama is ended.—The last man is dead."

Her Majesty's Brig Sappho, Capt. Cochran, whose arrival we announced in our last, and whose hardy "blue jackets"

have given life to our town at this monotonous season will leave port, we understand, to day, for the fishing grounds to the westward. If there be any detection in the invading of our waters on the part of our wily and too successful enemy, by all means let the offenders be punished:—let them be made to feel that our privileges must be kept as inviolate as their own. If "Monsieur Tonson" be permitted from time to time to escape the crime, or in other words the arm of the law, well may he figure and parley and laugh at us for our absurdity! The men of war steamers now expected will at once sweep our waters, and with the combined exertions of the above vessel and the "preventives" already despatched in charge of Messrs. Tobin and Finlay, the best results are likely to follow.

European Intelligence.

SEVEN DAYS LATER FROM EUROPE!

The steamship Niagara arrived at Halifax, Yesterday morning, at 4 o'clock, bringing Liverpool dates to the 24th July.

The steamer Pacific arrived at Liverpool on Wednesday the 21st. The City of Glasgow, for Philadelphia, sailed on the 21st with 104 passengers.

The Cotton market was firmer. The total sales of the week amounted to 64,190 bales. The Grain market continued depressed, and transactions in all articles were of the most limited character. Western Canal flour was quoted at 16s. to 19s.; Baltimore and Philadelphia, 19s. to 19s. 6d.

STATE OF TRADE.—In the manufacturing districts trade generally has not been so active a tone, buyers acting with great reserve, and as many old contracts are running out, they have sought to renew them on more advantageous terms, in which they have been disappointed. Spinners are equally desirous of entering upon fresh engagements, but are unwilling to concede, consequently the business is limited in amount, both in goods and yarns, but with symptoms of more activity.

Money in England continues very abundant, and discounts easy. Closing price of Consols on Friday 10s for money, and 100s for account.

Freights at Liverpool to the United States remain nearly as last quoted.

THE ELECTIONS.

The Parliamentary elections were almost over, and according to the most careful classification, the new House of Commons stands thus:—For the Ministry, 325. Opposition, 272. Majority for the Ministry—fifty three.

In the above are included as Ministerialists, forty liberal Conservatives. Between 30 and 40 places were still to be heard from. Of the above, are 167 new members, who take the seats of 172 of the old House, who retired or were defeated.

Thos. Gisborne, Esq., who but for the state of his health, would have been brought forward by the liberal interest, at the late election for Nottingham, died during the week from disease of the heart, having been for upwards of 20 years an active reformer.

At a Yacht race at Cowes on Thursday, the American was distanced 2 minutes and 3 seconds by a Yacht named the Arrow.

FRANCE.

The French papers are filled with accounts of the reception of Louis Napoleon at Strasburg, where he appears to have been received with every demonstration of respect. The most striking feature in the reception ceremonies was a cavalcade of 1200 mounted peasants acting as escort to 120 car loads of young girls, the prettiest in their respective villages, and dressed in their holiday costumes. It is estimated that 120,000 strangers were attracted to Strasburg by the fête.

On Monday the President crossed the Rhine in Baden, where similar demonstrations awaited him. It is rumoured his visit to Baden is connected with matrimonial projects, and that the lady whose hand he aspires to is the Princess Caroline Stephanie De Vasa, born in 1831, grand daughter of the Duchess of Baden, and related to the deposed Royal family of Sweden.

Field Marshal Excellences was thrown off his horse on the road from Servis and was killed.

More political arrests continue to be made. Petitions for the establishment of the Empire are again being got up in several places under the patronage of the local authorities.

ITALY
Turin papers give the particulars respecting the recent arrests at Milan and other cities. About 60 persons were arrested in the Province of Mantua, among them the Arch Priest of Revera and six other clergymen.

The 'Opinion' of Turin, from Rome, mentions the arrest on suspicion of liberalism, of Count Tancred Mosto, with six other young men of honorable families in Ferrara.

The warrants were not issued by the Pontifical authorities, but by a civil Austrian commission sitting at Bologna.

The long pending trial of the Amazzilli brigands has been concluded, and three of the chiefs have been sentenced to death. It is stated that the Pope is much dissatisfied with the conduct of the Archbishop of Paris, but wherefore is not known.

The present year seems likely to be one of mark in the annals of this city and Province.—Most of the many of our people engaged in the lumber trade last winter have realised a handsome remuneration from their labor. Sufficient quantities have been got to market to supply the current demand, and enough remains over in available streams to meet the requirements of the fall trade which is likely to be active and remunerative. The agricultural interests of the country have not been neglected, and the accounts from all the districts about us are very favourable. Hay, which was feared at one time would be short, will be very nearly an average crop.—Grains are on all hands promising an abundant harvest, and so far the reports from the potatoes are more satisfactory than might have been expected. Our gardens and orchards are yielding generous supplies of vegetables and fruits. Everything about us is indicative of plenty, and full of incentive to gratitude and hope.

In our City the mechanics and labourers are all employed steadily and profitably. Fredericton is rising renewed from the effects of the fire, and even now presents an appearance you were to November, 1850. If the Fathers of the last generation could walk up Queen Street as it is, they would be sorely puzzled to believe themselves in Fredericton, some of their old familiar places have been wonderfully "puffed by fire," and the handsomer ranges of lofty and elegant brick buildings which Messrs. Barker, Doherty & McTavish, and Hatheway & Small have had the taste and spirit to erect, afford evidence of a large advance upon Fredericton architecture of the last age. Above and below, and behind these handsome structures, others of less pretensions, yet of very considerable value and beauty abound in great number, and in every stage of progress, attesting the courage and the independence of our people, and proving that, as a community, we are making a profit of a loss.—[Fredericton Head Quarters.

ALBERT COUNTY.—We alluded last week to the Albert Coal Mining Company, in which Messrs. Allison, Cairns and others are concerned, and the benefit to be derived by the Province from the exportation of such large quantities of its mineral treasures.—The parties in whose possession the mines are at present, are carrying on the work with great energy, having already expended a heavy amount of capital on the undertaking, and the result of this new trade springing up will not be long in producing a great alteration upon the appearance of Hillsborough and the surrounding country. We have also to notice another undertaking of great importance to the Province, situated in the same County, viz: the Albert Building Stone Company near Harvey. This concern is carried on under the superintendence of Messrs. Lang and Stirling, two Scotch gentlemen who have an interest in it with C. D. Archibald, Esq. There are now seventy five men busily employed raising stone from this quarry, for which a ready market is found in New York and Philadelphia, the quality being very superior. During the present year it is expected 4000 tons will be exported, and next year probably 30,000 tons.

Within a few miles from the stone quarry, a valuable Slate quarry has been discovered and there are now eight men employed in clearing away the surface, with a view to commence extensive operations. We have received a specimen of the slate, which we have placed in the reading room for inspection. The Gypsum mines, owned and worked by Mr. Fowler, at Hillsborough, will also prove a valuable source of export when the arrangements are completed for working them on an extensive scale.

On the whole, Albert County has at present the appearance of rapidly rising into importance, possessing as it does such varied and extensive mineral resources, besides being one of the finest agricultural districts in the Province of New-Brunswick.

TRUTH.—The temple of truth is indeed built of stones of crystal: but inasmuch as men have been concerned in rearing it; it has been consolidated by a cement composed of baser materials. It is deeply to be lamented that truth, itself will attract but little attention, and less esteem, until it be amalgamated with some party, persuasion or sect. Unmixed and undiluted, it too often proves as unfit for currency as pure gold for circulation.

Sir Walter Raleigh has observed, that he that follows truth too closely, must take care, that she does not strike out his teeth: He has little to fear from truth, but as much to fear from the pretended friend

LAW RESPECTING NEWSPAPERS

Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscriptions.

If Subscribers order the discontinuance of their papers, the publisher may continue to send them till all arrearsages are paid.

If Subscribers neglect or refuse to take their papers from the office to which they are directed, they are held responsible till they have settled their Bill, and ordered their papers to be discontinued.

If Subscribers remove to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible.

of it. He, therefore, that is dead to all the smiles, and all the frowns of the living, alone is equal to the task of writing a history of his own times, worthy of being transmitted to times that are to come.

Advantages of the early and continued cultivation of Vocal Music. It improves the voice, in speaking and reading, by giving smoothness, volume and variety to the tones. The voice, like every other faculty, is strengthened by use. If a child life a given weight every day, we all know his strength will be gradually increased, provided he is not forced to exert himself beyond his strength. So the voice by constant exercise will continually improve, provided it is not strained beyond its natural compass. The voice, it is true, may be greatly injured or even destroyed, by forcing it, particularly on the high notes; but under proper and judicious directions, it will daily improve by use. This is in strict analogy with the common laws of exercise, applicable alike to the physical, intellectual, and moral powers of man. Children, in their amusements, are often exerting their voices to their utmost extent, and this without injury, because they do not go beyond their natural tones. Criers in the streets of large cities, acquire an astonishing power of voice by this daily practice; yet who ever heard of such persons or any public criers losing their voices, in consequence of such exertion? It is dangerous to use the voice in singing, only when it is dangerous to use it by much talking; that is, when the lungs are affected by a cold, or otherwise diseased. This is the common cause of a ruined voice. Persons who are fond of music, often force the lungs in singing when in an unhealthy state, and by excessive irritation bring on permanent disease. Singing not only tends to strengthen the voice, but also gives smoothness and variety to the tones in speaking. It is as necessary to give a pleasing variety to the tones in order to produce good speaking as good singing; and the organs of sound should be as much under the control, in the former case as in the latter.

THE IMMENSITY OF THE UNIVERSE.—As a proof of what an immense book the heavens is and also of the indefatigability of the student man in turning over its leaves, Dr. Nichol, in his work describing the magnitude of Lord Rosse's telescope, says that Lord Rosse has looked into space a distance so tremendous, so inconceivable, that light, which travels at the rate of 200,000 miles in one second; would require a period of 250,000,000 of solar years, each year containing about 32,000,000 of seconds to pass the intervening gulf between this earth and the remotest point to which this telescope has reached! How utterly unable is the mind to grasp even a fraction of this immense period; to conceive the passing events of a hundred thousand years only is an impossibility, to say nothing of millions and hundreds of millions of years. The sun is ninety-five millions of miles distant from the earth, yet a ray of light will traverse that immense distance in 480 seconds; long as the distance may seem to be passed in so short a time, what comparison can the mind frame between it and that greater distance which, Dr. Nichol and Rosse demonstrate would require every second of that time to represent more than five hundred thousand years! And recollect the study of astronomy is not only useful to excite emotions of grandeur and sublimity at such discoveries; but it is the basis of navigation and of our note of time, and unites the strictness of mathematical reasoning and the most certain calculations.

DEPTH OF THE OCEAN.—Captain James Ross found 16,000 feet west of Cape Good Hope, which is the height of Mt. Blanc, and he sounded with the plummet 35,400 feet, or 27,600 English feet, without touching bottom, west of St. Helena. Dr. Young assigns to the Atlantic a depth of a league—that is, 13,400 feet; and to the Pacific Ocean a league and a third, or about 18,000 feet. Certain inland seas, like the Mediterranean and Caribbean, have greater depths than would be expected from their proximity to the land; and seem to be sunken basins, the form of which is connected with the volcanic phenomena of which they are the seat.

TO REMOVE GREASE SPOTS FROM WOOLLEN CLOTHES.—Make a thin paste of flour and water, and lay it on the tarnished places. It should remain sufficiently long to become perfectly dry, when, upon brushing it off with a stiff brush, the spot will have disappeared. If any remains of it are observable the operation should be repeated. This is a very cheap and efficacious method of removing blemishes from clothes that have become soiled. The oil's substance which accumulates so abundantly on the collars of coats and other garments, in consequence of the oleaginous quality of the hair, may be removed by this means, and the cloth rendered with a luster primitive brilliancy and gloss. We have tried many experiments for removing greasy spots from woollens, but none so expeditious and successful as the above.

SHIPS, COLONIES, AND COMMERCE.

Canada, on the whole, is possibly at this moment more prosperous than she has ever previously been, and works of great magnitude are going on in every section of the Province. The very fires, which fell so heavily, when they occurred, upon Montreal, have afforded employment to many hands, and given food to many mouths. New railroads and steamship enterprises are daily engaged in. The country, in a word, is going wonderfully ahead. But, nevertheless, there is a dullness in almost every article of export from this port, which, as Mr. Borrowman, in his circular, remarks, may be partly accounted for by the great deficiency in tonnage this year, as compared with the two immediately preceding years, at the same date. Contrasted with last year there is, this year, a deficiency of 198 vessels or 78,268 tons. Yet in this falling off of ships there is nothing alarming, however disagreeable and unprofitable, to our lumber exporters it may be. It arises partly from new and unexpected circumstances, assisted by, as our Board of Trade foreman would say, and strongly pointed out when expressing their opinions with regard to the repeal of the navigation laws, an injurious competition of foreign vessels, which, when vessels are plenty, being more cheaply navigated than British ships, so reduce the rate of freights as to make the voyage to Quebec unprofitable to the ship-owners of our own country. The new and unexpected circumstances are the discovery of gold in Australia, the exodus from every port in the United Kingdom resulting therefrom, and the consequent great demand for shipping to carry the outgoers to the land of Ophir. But, if by these circumstances we suffer on the one hand, we gain on the other; for, so great is the demand for new ships, that no sooner does a colonial vessel appear than she is bought up, being considered cheap at any price; and, in truth, for carrying emigrants, Quebec ships are especially cheap at any price, being unusually of a very large class; lofty between decks, and having spacious and airy cabins. In addition to this, vessels built at this port are now, in point of workmanship and material, admitted to be inferior to no other vessels afloat; indeed the ships launched this spring by our Lees, Gilmours, Parkes, Munps, Vathians, Jones, Russells, Valins, Nesbitts, Baldwins, &c., in point of speed, will compare favourably with some of the finest Boston clippers. There has been also great improvements made in the shape as well as in the material of our port built ships; and it gives us pleasure to learn that the improvement is being appreciated in England, and that ship-building will be entered into on an unusually large scale the coming winter. The old adage is now exemplified—"It's an ill wind that blows nobody good"—for, though our exporters of lumber and produce are suffering from a deficiency of arrivals, our ship-builders are rejoicing in an increased demand for new vessels, attributable to the very cause which has produced "a dullness in almost every article of export from this port." There is much cause for general rejoicing. The country is advancing, at an astonishingly fast rate, in wealth and population, the people are becoming more energetic and self-reliant, and instead of repining over misfortunes which are partial in their operation, as was once the case, our monied houses now merely change their businesses, wisely taking advantage of that which promises well, or in other words, sagaciously quitting the sinking ships, they are taking refuge and will migrate in the new ones, which are at present in so much favor.—Quebec Morning Chron.

IMPORTANT REMOVAL FROM WASHINGTON.—New-York, August 6th.—A despatch from Washington says, that Webster and Crampton have agreed upon a temporary settlement of the Fishery question; that the latter has written Government urging a suspension of orders issued, and the withdrawal of the additional naval force, the subject being under discussion in the Senate and postponed till the 12th inst. In the House, an amendment has been adopted to the Appropriation Bill, authorizing the President to levy light-house duties on Foreign Vessels, intended doubtless as retaliation against the fishery restrictions.

Mr. Crampton has ordered Admiral Seymour to make no more captures until further notice.

The American Ministers at London and Berlin have obtained permission to return home. Their successors have not yet been appointed.

The Coroner's Jury in the case of the steamer Henry Clay, have rendered a strong verdict, implicating the officers and hands, who have all been arrested and held to bail in \$10,000 each.

There was a destructive fire at Savannah on the 3d inst. 60 or 70 houses, mostly wood, were burned.

The steamer Niagara arrived at Boston about 5 p. m. on the 5th.

The new Wesleyan Church is rapidly advancing to completion. It is one of the most thoroughly built wooden buildings we have seen, and promises admirably to suit the requirements of the congregation. The front elevation of this stately structure will be very beautiful, and its design does great credit to the architectural skill and taste of Mr. Stead.

We may remind our friends near and remote that the Bazaar in aid of the funds of the above church is to come off on the 26th of this month, and that every exertion is being made to make it rival in interest and attraction the far famed and very successful

effort of last year. We are told some very choice specimens of foreign and domestic skill are coming in, and hear especial praise awarded to some late receipts of Canadian Indian work, which are said to surpass anything of the kind ever exhibited in New-Brunswick. We have no doubt the affair will be made very pleasant, and its object well entitled to extensive patronage.—[Head Quarters.]

To the Editor of the Standard.

"A hit, a most palpable hit!"—H. H. L.

SIR,—Permit me, through the medium of your paper, to suggest to the inhabitants of St. Andrews in general, and to the "Magnates of the town" in particular, that the most marketable and profitable, if not creditable plan they can adopt to set the Market House Clock "a-going," would be, in my professional estimation, to bring it to the hammer.

AN AUCTIONEER.

THE STANDARD.

WEDNESDAY, AUGUST 11, 1852.

EUROPEAN AND NORTH AMERICAN RAILROAD.

ROAD.—We learn from St. John papers, that there is now a prospect of a move in the right direction in railroad matters in that City. Two Engineers in chief, (sent out by Mr. Jackson,) Messrs. Beattie and Campbell arrived at Halifax in the Niagara, and are no doubt in St. John by this time. The survey of the railroad is to be commenced as soon as these gentlemen make up their staff of assistants, which are to be selected from among the Engineers belonging to this Province. Mr. Morton, C. E., from Portland, has arrived at St. John, and it is said, will be employed by the stockholders, on their part. Mr. Jackson, one of the contractors, is expected to arrive in the next steamer at New-York.

On our first and second pages we have copied two articles from the "Quebec Morning Chronicle," one of the leading Journals of Canada; they will repay a perusal.

The loss sustained by the late destructive fire at Montreal, has been ascertained by the Executive Committee to be nearly £500,000!—An application is to be made to the Government for a loan of £200,000, from which aid may be given to enable proprietors to rebuild. The City is to become liable for the repayment of the amount, while the management shall be entrusted to commissioners appointed by the Government, and responsible for the due performance of their duties.

The United States Steam-frigate Mississippi arrived at St. John on Saturday, and on Monday last fired a salute. Commodore Perry and Capt Adams of the Mississippi proceeded on Tuesday morning, to pay their respects to the Administrator of the Government. The Citizens of St. John intend inviting the Officers of the steam frigate to a public Ball on Thursday evening.

Property in St. John is said to have advanced within a short time. Paddock's wharf with its appurtenances, was sold a few days since, for the large sum of £7,000.

Commodore Perry paid a visit to Admiral Owen, at Campo-Bello, on Friday last.

We understand that A. C. Morton, Esq., C. E., of Portland, arrived in this City on Thursday evening, and that Messrs. Beattie and Campbell, the Railway Engineers from England, who came out in the Mail steamer Niagara to Halifax, will probably arrive this evening by the way of Dorchester. It is reported that Mr. Archibald passed through St. John on Wednesday, on his way to New-York, to meet Mr. Jackson, M. P.

Railway matters now seem to be on the way of progression, and we trust that nothing may occur to mar the present favorable prospects.—[Courier.]

The proprietors of the steamer Admiral, on learning that the Hon. Daniel Webster contemplated visiting New-Brunswick, promptly tendered to him the hospitalities of their splendid vessel, and have, received a letter from the Hon. Secretary of State, politely acknowledging their attention, and informing them that matters of great national importance render it impossible for him to accept their proffered courtesy at present.—[ib.]

RAILWAY BETWEEN HALIFAX AND DIGBY.—The talk is that Mr. Morton is to be employed to make a survey of this route, and that steamers are to be established between Digby and St. Andrews, by the aid of Nova Scotia enterprise; and there is a further talk, that Mr. Howe's political friends and constituents in Cumberland, will soon talk very loudly in the matter, and so plainly that the talk will not be mistaken, and put down as "mere talk." The present line of steamers between St. John and Digby will not be taken out of their route; and the talk is that there will be a full set of no diminution in number after the Digby and St. Andrews line is established. Let the Nova Scotians unite with the New Brun-

wick line, on their Cumberland border, and our word for it, that the talk will then be that the prosperity of both Provinces is materially benefited, in spite of all the talk in the meantime, to the contrary.—Chronicle.

RAILWAYS IN MAINE.—We are informed that a meeting was held last week, in Bangor, for the purpose of organizing operations to carry forward the Maine portion of the European and North American Railway. For the portion of the road between Waterville and Bangor, (fifty-five miles) four hundred thousand dollars have been subscribed, and it is not contemplated that there will be any difficulty in speedily completing this portion of the line. For the road eastwardly, one hundred thousand dollars was subscribed, and it is expected that the credit of the City of Bangor will be loaned to the extent of one million of dollars. It may, therefore, be considered a settled point, that our friends in Maine will be quite ready to meet us at the Boundary.

It is not known that any movement has yet taken place in Nova-Scotia, for the purpose of redeeming the pledges made at the Portland Convention; but we feel satisfied that common sense and the force of public opinion will soon guide the present contending parties into the right track.—[ib.]

On Wednesday last James S. Hubble, John Reid, Jr., and Margaret McLeod were brought up for examination in the Court of Mr. Justice Hart, charged with a serious offence, which we understand to be as follows:

The deponent, Richard Close, of Kings-clear, was spending the night in the house of Mr. Hubble, who keeps tavern at the west end of the city. He (Close) had fallen asleep and was aroused to consciousness by finding his clothes on fire—the fire having already communicated to his person, and burning him dreadfully. It appeared that his clothes below the knee and upwards had been saturated with spirits, and then set on fire. The case created great interest, and continued to occupy the attention of the Court during the greater part of the day. Dr. Murphy who is attending Close, stated that his life was in danger, but we understand that the symptoms are since then more favourable. The three already named were committed for trial, and have not yet been admitted to bail. The general opinion is that the act was more wanton than malicious; but be that as it may, whoever may be the perpetrators, the whole case admits of little palliation.—[Fredericton Reporter.]

The London Morning Herald says "that the belief is more prevalent than the present Chancellor of the Exchequer, under the Administration of Earl Derby, will be able to realize what was the dream only of the late Sir Robert Peel, by reducing the 500 millions of 3 per cent into 2 1/2 per cent stock, at an immense saving to the nation. An operation of such immense magnitude in its consummation must of course demand a skill and ability commensurate in carrying it into effect, and this and their qualifications may be reasonably anticipated from the financial talent which has presided so far over the Councils of the Administration."

NARROW ESCAPE OF THE QUEEN.—A correspondent of the Court Journal states, that a few days since, while her Majesty and her Royal Highness Prince Albert were walking within the now dismantled walls of the building in Hyde Park, which was but a few months since the glory and pride of this kingdom, a beam of wood, of enormous size and weight, fell close to the Queen—so close as to have given rise to feelings of the most painful excitement amongst the distinguished personages by whom she was surrounded.

Four young men, who emigrated from England to Australia less than five years ago, invested their funds in the purchase of a large tract of land or sheep walk. This land is now found to extend completely across a large mining district, and a company have just offered the fortunate proprietors one million of money for the property, besides a handsome royalty on all the produce of the "diggings."

Prince Albert was last week, out almost every morning with the brigade of Foot Guards in Hyde Park. We are much gratified to see the steady and skillful manner in which his royal highness handled the brigade, the movements being, without exception of the practical and not the showy character usually practised.—Naval and Military Gazette.

French courage proceeds from variety, the German from pluck, the Turkish from fanaticism and opium, the Spanish from pride, the English from coarseness, the Dutch from obstinacy, the Russian from insensibility, but the Italian from anger.

FLYING SHIP.—Rufus Porter, now at Washington building a flying ship, in his semi-monthly report to the stockholders, says: "The fibrous material for the float and saloon has been all furnished, and the sewing and making up the float are now in progress, and we may have it ready for inflation in two weeks."

REVENUE CUTTER SUNK.—Serious Loss of Life.—The Revenue Cutter Taney, Captain Martin, was struck by a small steamer on the 1st p. m., about a mile and a half below Governor's Island, thrown on her beam ends and sunk.

There were about thirty composing her crew and officers on board, of whom four are known to have perished, and six are supposed by Captain Martin to have shared the same fate.

The mast head of the vessel remains out of the water, and the survivors took refuge

in the top, whence they were rescued by the steamer Thomas Hunt, but not until most of their number were nearly exhausted.—New-York Evening Post.

Albany August 3.—An extra from the Wolcott Standard, Wayne & Co., states that on Saturday afternoon it was advertised that Mr. R. Sands, circus performer, would among other things walk across the ceiling with his feet upwards and his head downwards, by means of a scientific apparatus appended to his feet. The experiment was successfully made by Mr. Sands, and the audience went away perfectly satisfied, except one individual who said Mr. S. could not perform the feat of the circus. Mr. Sands offered to exhibit the same performance in any place where a ceiling having a smooth surface of sufficient strength to sustain his weight could be obtained. The large room in the town hall was selected, to which Mr. S. repaired, and commenced walking over the ceiling at an elevation of eighteen feet from the floor. He had proceeded several steps, and was in the act of returning, when a large portion of the plaster gave way, and he was precipitated to the floor and killed instantly, his neck being broken.

Mr. Sands, the acrobat, did not walk on the ceiling of a Town Hall in Wolcott; the ceiling did not break down; he did not break his neck, but performed it (swag) on Monday last. The whole narrative of his death, widely circulated, was a hoax.—Boston Paper.

THE WHEAT HARVEST.—From all parts of the country, says the Toronto Patriot, of July 27th, we continue to receive most cheering accounts of the excellence of the wheat crop. To the northward of this, the fall wheat harvest has fully begun and the crop is excellent, having entirely escaped the ravages of the rust. The spring wheat cannot, of course, be yet considered quite safe from this much dreaded disease; but it may be confidently hoped that it will meet with a similar exemption. We learn that the crops in the neighbourhood of Port-Hope and Cobourg, though not so forward as to the Westward, are uncommonly fine.

The following extracts will give an idea of the general state of the crops in different parts of the country:—
The crops.—The hay crop has been abundant—it is all secured now. The wheat harvest has begun in earnest—the crops are dead ripe, and much difficulty is found in finding men to work in the fields; the crop is the best we have seen for many years.—St. Catharines Constitutional, July 21.

Our farmers, after securing their hay crops in first rate condition, have now commenced cutting down their wheat, which is understood to be of the whole a fair average crop. Heavy dews fall every night, but we have had no rain for three weeks or a month, and the gardens are suffering for want of moisture.—Niagara Chronicle, 22d.

SURROGATE COURT.

County of Charlotte. In the matter of the Estate of Phineas Nevin, late of the Parish of St. Stephens in the County of Charlotte, deceased. WHERAS James Bowes, one of the Executors of the said deceased, hath this day filed his Account, with the said Estate, and hath prayed that the Creditors and next of Kin of the deceased, and all persons interested in the said Estate, may appear and attend the passing and allowance of the said account.

Notice thereof is hereby given to all the Creditors and next of Kin of the said deceased, and to all Persons interested in the said Estate, and they are hereby cited to appear before me at a Court of Probate, to be held at the office of the Registrar of Probates in Saint Andrews, in the said County of Charlotte, on Monday the twentieth day of September next, at the hour of noon, to attend the passing and allowance of the Account of the said Executor. Given under my hand and the Seal of the said Court, this thirteenth day of July, A. D. 1852.

(Signed,) H. HATCH, Sur. Judge. G. D. STREET, Registrar of Probates.

ADMINISTRATOR'S SALE.

PURSUANT to the Order of the Surrogate for the County of Charlotte, I hereby give Notice, that I will sell at Public Auction, at my residence in Saint Stephens, in the said County, on Thursday the 16th day of September next, at the hour of twelve, at noon—

The Right and Title of the late JOHN CHRISTIE, in and to the following described land property, viz.—
A Lot of Land situate in St. Stephen, in the County of Charlotte, known and described as Lot No. Five, in class letter D. in the grant to Donald and others, containing 100 acres more or less.

Also, another Lot of Land, situate in St. James, in the said County, known and described as Lot No. 24, in the third or Western division of the Grant to Peter Christie and others, containing 100 acres more or less; in such portions as may be necessary for the payment of the debts of the Estate.

GEORGE CHRISTIE, Administrator of the Estate of John Christie. St. Andrews, 4th Aug. 1852.

HOUSE FOR SALE.

The Dwelling House of an Premises, owned by Mr. John R. McFarlane, and occupied by Dr. E. Bayard, in Water-street, immediately opposite Mr. John Irwin's, being described on the plan of the town plat of St. Andrews, as water lot, block letter A, Bulkeley's division, with a frontage of 41 feet 5 inches on Water street, and extending about 74 feet back. The House is well finished and faithfully built, contains two shops, fitted up with counters and shelves, and sitting rooms in the rear, with parlor, dining, and bed rooms on the second floor. The land is held in fee simple. If not disposed of by private sale previous to the 15th day of September next, it will on that day be sold at public auction.

For terms, and further particulars, apply to THOS. TURNER ODELL. St. Andrews, July 20, 1852.—[if.]

FOR SALE, one valuable BUILDING.

LOT, 80 by 160, fronting on Monague and Harriet streets, opposite Barber Brown's residence. Also, a LOT in latter L, Parr's division, with the COTTAGE thereon, adjoining Jas. McCarty's.

Terms liberal, and made known on application at the Standard Office.

FOR SALE.

The House and Lot in Water-street, the property of Mr. Samuel Woodside, known as the Green House. The House is spacious, and well adapted for two families. The lot 40 by 80 feet. This property is so generally known, that a further description is deemed unnecessary.

The terms, which will be liberal, made known on application to George D. Street, Esq., Counsellor at Law, or to the subscriber.

Rowing boats classed, and prizes awarded the
same as sailing.

REGULATIONS.

All boats entering for competition, to be the
property of members of the society, and to be in
thorough order, as used in fishing; no extra can-
vas or false keels allowed; terms of Race and
Regulations will be published a fortnight before
the day of Meeting.

In all cases with parties showing fish, a certi-
ficate from two members of the society, or to the
actual quantity caught, will be necessary.

All fish for competition must be delivered to the
secretary at Welshpool, not less than one day
previous to the Exhibition.

Judges of Dried Fish—Thaddeus Stimpson and
Joseph Patch.

Judges of Pickled Fish—Pierce Flagg, and J.
M. Parke.

George Young will act as Umpire for the above
descriptions.

Judges of smoked Fish—John Calder and Ben-
jamin Parker. Luther Brown will act as Umpire.

Judges of Nets—Jus. Patch and Wm. Flagg.

Boats & Vessels—J. Brown, J. P. & Joseph
Faich, Capt J. J. Robinson, Umpire.

ROBERT CAMPBELL,
Secretary, pro tem.

Campbello, 8th July, 1852.

Valuable Properties for

SALE OR TO LET.

THE Dwelling House, Stores and

Wharf, in the town of St. Andrews,
formerly known as the Jones' property.

The Dwelling House, Out-Houses and
Wharf, in said town, formerly known as the
O'Neil property.

100 Acres of Land in St. James, about
one hour's drive from Milltown, St. Ste-
phen.

100 Acres of Land in St. Patrick, through
which the St. Andrews & Quebec Rail-
road is projected, and in which, or in its
immediate vicinity, will be established as
Depot, which will very materially enhance
its value.

15 Acres of Land within five minutes'
walk of the town of St. Andrews, a deligh-
ful situation for a Country Seat. If not
shortly disposed of, it will be laid off in
suitable lots for building purposes, and let
on leases of improvement.

The subscriber begs to announce to the
Public, that he has had his Lands, which
are within ten minutes' walk of Chamcook,
laid off, and will sell or lease Building Lots
on advantageous terms. It is evident, that,
owing to the Railroad (passing through it)
possessing a safe and commodious harbor
accessible at all seasons to vessels of the
largest tonnage, with an unlimited and up-
rized water power, on which there are
already some manufactories, with others on
the most extensive scale proposed and on the
eve of springing into immediate operation,
that Chamcook is one of the most desirable
situations within the British North Ameri-
can Colonies, for the Capital, the Me-
chanic, and operator. In view of which
the said Building Lots are offered to the
Public. Terms reasonable.

B. R. FITZGERALD.

Saint Andrews, June 30, 1852

NOTICE.

Assessors Notice

NOTICE is hereby Given, that the un-
designed Assessors will receive at
the store of John Lockhart, until the 10th
June next, statements from all who are
liable to be assessed for the current year in
the Parish of St. Andrews, of the Real and
Personal Properties and Income they pos-
sess, in order that correct information may
be received, and complaints prevented after
the assessment is completed. These state-
ments must be sworn to before a Justice of
the Peace, as the Law requires.

St. Andrews, June 28, 1852.

ST. JOHN NURSERY.

J. HARRIS has just received from Lon-
don, via Boston, a good collection of
GARDEN SEEDS.

Farmers and Gardeners would do well to have
these Seeds, as they are excellent samples, and
many of the kinds are of new and improved qual-
ity. At this Nursery the variety of TREES,
PLANTS, SHRUBS, ROOTS, SEEDS, &c.,
are extensive, particularly the DABLIA, of
these J. H. has about 30 new kinds of a novel
character, blended with perfection—a desidera-
rum, raised after 25 years incessant perseverance.
Every thing suitable for the Kitchen, Fruit,
and Flower Garden, will be sent to order.
Chipman's Hill, St. John. April 2, 1852.—1

Reynolds, of, in, and to, all the following lots, pieces, tracts, or parcels of land, situate, lying and being on the Lepreux river, in the Parish of Pennfield and County of Charlotte; together with the mills, houses, barns, and other erections and improvements thereon, or in any-wise appertaining to the same:—Viz:—
Lots Nos. 1, 2 and 3, containing 330 acres, purchased from Augustus W. Whip

Lot No. 49, containing about 40 acres
Also, 4 tracts purchased from James H. Bartlett, containing, respectively, 40, 60, 70, and 30 acres each; and also, 4 acres conveyed by Stephen C. Foster to Robert Bartlett, and by him assigned to the said Reynolds.
The same having been seized and taken to satisfy an execution at the suit of David Cannon, John Mc M. Cannon, John Alexander Black, and John House Barry; endorsed to levy £113 10 5, besides Sheriff's fees, &c.
THOS. JONES, Sheriff of Charlotte.

JUDSON'S CHEMICAL EXTRACT OF CHERRY AND LUNGWORT,
FOR THE CURE OF
Coughs, Colds, Hoarseness, Spitting of Blood, Night Sweats, Asthma, Liver Complaints, and CONSUMPTION.
DO NOT NEGLECT IT.
CONSUMPTION.
Can be and, as been cured in thousands of cases by this only certain remedy.
JUDSON'S CHEMICAL EXTRACT OF CHERRY AND LUNGWORT, and no remedy has ever before been discovered that will certainly CURE CONSUMPTION.
The most strongly marked and developed cases of Pulmonary Consumption where the lungs have become diseased and altered, and the case so utterly hopeless, as to have been pronounced by Physicians and friends, to be past all possibility of recovery, and at times thought to be dying, has been cured by this wonderful remedy, and are now as well and hearty as ever. It is a compound of medicines which are peculiarly adapted to, and essentially necessary for the cure of COUGHS AND CONSUMPTION.
Its operation is mild, yet efficacious; it loosens the phlegm which creates so much difficulty, relieves the cough, and assists nature to expel from the system all diseased matter by excretion, producing a most delightful change in the breathing and chest, and this, after the prescriptions of the very best medical men and the inventions of kind, sorrowing friends and Nurses, have failed to give the smallest relief to the Consumptive sufferer.
THOUSANDS OF CONSUMPTIVE persons have been deceived in buying medicines which were said to be infallible cures, but which have proved only palliatives, but this medicine is not only a palliative but a cure for ulcerated lungs. It contains no deleterious Drugs and one trial will prove its astonishing efficacy, better than any assertions or certificates in curing consumption and all diseases of the Lungs, such as Spitting of Blood, Coughs, pains in the side and chest, night sweats, &c. &c.
About 1000 certificates of almost miraculous cures, performed by this medicine, from some of the first Doctors, Clergymen, and Merchants, have been sent us for this medicine, but the publication of them looks too much like Quackery, [will show them to any person calling at our office.] This medicine will speak for itself and enough in its own favour wherever it is tried.
Caution.—This medicine is put up in a large bottle, and you must find the name of Comstock & Brother, Proprietors, New York, on the splendid wrapper around the bottle. All orders must be addressed to Comstock & Brother, No. 9, John St., New York.

CARTON'S RING-BONE CURE.
For the cure of Ring Bone, Blood Spavin, Bone Spavin, Windgalls, and Splint—a certain remedy.
CARTON'S CONDITION POWDERS FOR HORSES AND CATTLE.
The changes of weather and season, with the change of use and feed, have a very great effect upon the blood and sinuous fluids of horses. It is at those changes they require an assistant to nature to throw off any disorder of the fluids of the body that may have been imbibed, and which, if not attended to, will result in the Yellow Water, Heaves, Worms, Bots, &c. All of which will be prevented by giving one of these powders, and will at any time cure when any symptoms of disease appear, if used in time. They purify the blood, remove all inflammation and fever, loosen the skin, cleanse the water, and invigorate the whole body, enabling them to do more work with the same feed. The action of these powders is direct upon all the secretory glands, and therefore have the same effect upon the Horse, the Ox, the Ass, and all Herbivorous animals—all diseases arising from or producing a bad state of the blood are speedily cured by them. Remain

GROCERY & PROVISION STORE.
JOHN B. BALSON,
Respectfully announces to the inhabitants of St. Andrews, and vicinity, that he has opened the store next Phasman's Hotel where he has received a large supply of Groceries and Provisions, suitable for this market, consisting of—
SUPERFINE FLOUR, in bags and Barrels; Fancy Biscuits, Meal, Tea, Coffee, Brown and Crushed Sugar, Molasses, Mould and Dip Candles, Brown and Fancy Soap, Fine and coarse Salt, BARLEY, Mustard, Pepper, Ginger, Allspice, Salsaparilla, Nutmegs, London Pickles, Pepper Sauce, Lemon Syrup, CONFECTONERY, Dates, Tobacco, Cigars, Snuff, Pipes, Sarsaparilla, Blacking, Baking and Washing Soda, Boots and Shoes, Tails, Brooms, &c. &c.
Which, together with a great variety of other articles, will be sold at the lowest prices for cash.
CORDAGE in store, Coils of ALDOR, a lot of Grind Stones, &c. &c.
St. Andrews, June 17, 1851.

FRUIT TREES.
THE NURSERY and ORCHARD of the Subscriber, consisting of nearly Forty Thousand Trees, are now offered for the inspection of the Public and for Sale. Persons planting these Trees may be assured of success, as every possible precaution has been used in the selection of varieties; all that have not proved hardy have been discarded, and those which have not yet fruited have been propagated with the advice of the most distinguished cultivators of New England and Canada.
The Subscriber flatters himself that his assortment is unrivalled for this climate, as it contains nearly all the varieties of Apples and Pears which have proved valuable in cold and extreme climates, with many new and pleasing sorts lately brought from Russia, England, Germany, Canada, and the Northern States.
Price of Grafted Apple Trees, assorted, one shilling each.—Any person or number of persons ordering 1000 or upwards in one lot may, if desired, have a credit of two or three years for half the amount, and receive the trees free of freight at any place within the Province.
FRANCIS P. SHARP.
Woodstock, Oct. 22, 1851.—31

BLANKS

ask for 'CARLTON'S CONDITION POWDERS, and take no others.
CARTON'S NERVE AND BONE LINIMENT FOR HORSES,
and for the cure of all diseases of man or beast that require external application, and for contracted cords and muscles, strengthen weak limbs, and is also used for sprains, bruises, saddle galls, scalled legs, sores of all kinds on horses.
CARLTON'S articles for Horses and Cattle are prepared from the recipe of a very celebrated English Farrier, and will cure ninety-nine cases out of one hundred of the above complaints. They have been used by Farmers, liverymen, stage proprietors and others, with the most marked and decided success.
CAUTION.—You can be genuine unless you find the name of J. Carlton Comstock on the wrapper of each article.
COMSTOCK'S VERMIFUGE.
This is the most extraordinary remedy for Worms ever used; it effectually eradicates Worms from both adults and children. It cannot harm the most delicate infant or strongest adult, and never fails to completely root out and destroy all kinds of Worms. The cost, 25 cts. per bottle, puts it within the reach of all, and all parents who are without it are wantonly exposing the lives of their children to those fell destroyers of youth, "Worms." Look for the name of Comstock & Brother, proprietors, on the wrapper of each bottle.
RHEUMATISM.
Comstock's Nerve and Bone Liniment, is warranted to cure any case of Rheumatism, Gout, Contracted Cords, and Muscles, or stiff joints, strengthen Weak Limbs, and enable those who are crippled to walk again. Comstock & Brother, Proprietors, New York, and none genuine without their name on the wrapper.
TOOTHACHE.
DR. KLINE'S Drops, for the cure of the Toothache. It is with confidence that we can recommend it as a reliable cure in all cases, without any injury to the teeth of gums. Price 25 cts.
CARTON'S LINIMENT FOR THE PILES.
It is now used in the principal hospitals, and is the private practice in our country by an immense number of individuals and families, and most certainly for the cure of the PILES, a most extensively and effectually as to be believed, and is where its effects are witnessed. Extra supply in the following complaints:—
For Dropsy.—Creating extraordinary absorption at once. Swellings.—Reducing them in a few hours. Rheumatism.—Acute or Chronic, giving immediate ease. Sore Throat.—By Gargles, Ulcers or Colds. Croup and Whooping Cough.—Externally and over the chest. All Bruises, Sprains, and Burns, Curing in a few hours. Sores and Ulcers.—Whether the result of long standing, and fever sores.
It operates upon adults and children in reducing rheumatic swellings, and loosening coughs and tightness of the chest by relaxation of the parts, has been surprising beyond conception.
CAUTION.—All of the above named articles at special only New York by Comstock & Brother, No. 9, John Street, for Dealers from Broadway.
Sold also in St. Andrews, by Odell & Turner, D. Clarke, S. L. Tilly, St. John, L. Ryder, S. Stephen, J. W. Brayley, Frederick, B. Ferguson, Woodstock; G. Spear, Robinson, also by our Agents in every Town in New Brunswick. Enquire for Comstock's Almanac for 1852 which is given gratis.

HEALTH where 'tis SOUGHT.
Holloway's Pills.
CURE OF A DISORDERED LIVER AND STOMACH, WHEN IN A MOST HOPELESS STATE.
Extract of a Letter from Mr. Matthew Harvey, of Chapel Hill, Virginia, Scotland, dated the 15th of January, 1850.
Sir—Your valuable Pills have been the means, with God's blessing, of restoring me to a state of perfect health, and a time when I thought I was on the brink of the grave. I had consulted several eminent doctors, who after doing what they could for me, stated that they considered my case hopeless. I was a last resource got a Box of your Pills, which soon gave relief, and by persevering in their use for some weeks, together with rubbing night and morning your Ointment over my chest and stomach, and right side, I have by their means almost completely cured, and to the astonishment of myself and every body who knows me.
[Signed] MATTHEW HARVEY
CURE OF A CASE OF WEAKNESS AND DEBILITY, OF FOUR YEARS' STANDING.
Extract of a Letter from Mr. Smith, of No. 5, of Thomas Street, Gilson Street, Lambeth, dated Dec. 12th, 1849.
To Professor Holloway.
Sir—To be so long as I have been in your hands, I have been in a state of extreme weakness and debility, with constant nervous headaches, giddiness, and sickness of the stomach together with a great depression of spirits, I need not state that nothing could benefit me as I had been in many medical powers informed that they considered that I had some spinal complaint beyond the reach of cure, together with a very disordered state of the liver, making my case as complicated as that of any man I have ever known. One day being unusually ill and in dejected state, I saw your Pills advertised, and resolved to give them a trial, more perhaps from curiosity than with a hope of being cured, however I felt no doubt myself better by taking them, and so I went on persevering in their use for six months, when I am happy to say they effected a perfect cure.
[Signed] WILLIAM SMITH.
(Frequently called EDWARD.)
CURE OF ASTHMA, OF TWENTY YEARS' STANDING.
Extract of a Letter from Mr. J. K. Heydon, 78 King Street, Sydney, dated 10th of November 1849.
To Professor Holloway.
Sir—I have the pleasure to inform you that many extraordinary cures of Asthma have been effected here by means of your Pills. One is that of a Lady residing near the "Rozzack," who for twenty years had been unable to make the slightest exertion suffering very fearfully from shortness of breath, coughing, and spitting, but is now, to the top of the chest, as expressive, after the use of your Pills, of perfect health. Another case is that of Mr. Caton, Tailor, Hutchinson's Buildings, Clarence Street, who was so dreadfully bad that he was confined entirely to his bed room for six months, prior to his having taken your Pills, and attended regularly by his medical man, who pronounced him to be in a dying state; yet he, likewise, to my knowledge, has been restored to perfect health by the use of your Pills, and rubbing your Ointment night and morning into his chest.
[Signed] J. K. HEYDON.
ASTONISHING CURE OF THE EARL OF ALDBOROUGH
By this Miraculous Medicine: after every other medicine had failed!
Extract of a Letter from the Earl of Aldborough, dated Villa Marina, Leghorn, 21st Feb. 1845.
To Professor Holloway.
Sir—Various circumstances prevented the possibility of my thinking, before this time, of your kindness in sending me your Pills as you have now taken this opportunity of sending you an order for the amount, and at the same time, to add that your Pills have effected a cure of all my ailments in my Liver and Stomach, which all over the Continent had not been able to effect; nay! not even the waters of Carlsbad and Marienbad. I wish to have another Box and Pot of Ointment in case any of my family should ever require either.
I remain, with much respect,
Your most obliged and obedient servant,
[Signed] VLDOROUGH.
TIME should not be lost in taking this Remedy for any of the following diseases:—Rheumatism, Consumption, Fits, Debility, Gout, Retention of Urine, Ulcers, Blotches on the skin, Venereal Affections, Scalds on the skin, Venereal Indigestion, Scrofula, or King's Evil, Worms of all kinds, Erysipelas, Inflammation of Bowels, Female Irregularities, Colic, Jaundice, Stone and Gravel, Secondary Symptoms, Liver Complaints, Weakness from whatever cause, Lumbago, Consumption of Bowels, Fevers of all kinds, Piles, Tic Douloureux, &c. &c.
These Medicines in England are sold at 1s. 12 2d, 4d, 6d, 1s. 22s. and 33s., each Box and Pot.
There is a considerable saving by taking the large size.
Sold by all Vendors of Medicines throughout New Brunswick, and by A. H. Thompson, St. Stephen; Billings & Dyer, Eastport, and
ODELL & TURNER, St. Andrew

ODELL & TURNER, St. Andrew

FRUIT TREES.
THE NURSERY and ORCHARD of the Subscriber, consisting of nearly Forty Thousand Trees, are now offered for the inspection of the Public and for Sale. Persons planting these Trees may be assured of success, as every possible precaution has been used in the selection of varieties; all that have not proved hardy have been discarded, and those which have not yet fruited have been propagated with the advice of the most distinguished cultivators of New England and Canada.
The Subscriber flatters himself that his assortment is unrivalled for this climate, as it contains nearly all the varieties of Apples and Pears which have proved valuable in cold and extreme climates, with many new and pleasing sorts lately brought from Russia, England, Germany, Canada, and the Northern States.
Price of Grafted Apple Trees, assorted, one shilling each.—Any person or number of persons ordering 1000 or upwards in one lot may, if desired, have a credit of two or three years for half the amount, and receive the trees free of freight at any place within the Province.
FRANCIS P. SHARP.

SURROGATE COURT.
COUNTY OF CHARLOTTE.
In the matter of the Estate of Daniel Cunningham late of the Parish of Saint David in the County of Charlotte, deceased.
WHEREAS Lachlan Douglass administrator of the said Daniel Cunningham deceased at the time of his death, hath this day filed his Account with the said Estate, and hath prayed that the Creditors and next of Kin of the deceased, and all persons interested in the said Estate, may appear and attend the passing and allowance of the said account.
NOTICE thereof is therefore hereby given, to all the Creditors and next of Kin of the said deceased, and to all persons interested in the said Estate, and they are hereby cited to appear before me at a Court of Probate, to be held at the Office of the Registrar of Probates in Saint Andrews, in the said County of Charlotte, on Saturday the Tenth day of APRIL next, at the hour of one in the afternoon, to attend the passing and allowance of the Account of the said Administrator.
Given under my hand and the Seal of the said Court, this tenth day of December A.D. 1851.
(Signed) H. HATCH, Surrogate Judge.
Geo. D. Street, Registrar of Probates.

HOUSE OF ASSEMBLY.
The following were adopted as Standing Rules in the Session of 1851—
37th.—That no Bill of a private nature or petition for money or relief, shall be received by the House after the fourteenth day from the opening of the Session, but inclusive; and that the Clerk of this House do, one month previous to the meeting of the Legislature, cause fifty printed copies of this Rule to be sent to each of the Clerks of the Peace in the several Counties for distribution, and cause the same to be inserted in the Royal Gazette, and in Newspapers in such County where Newspapers are published.
38th.—That this House will sustain no application for allowances to Teachers of Common or Parish Schools, unless it shall be certified by at least two Trustees of Schools for the Parish where such School has been taught, showing the time actually taught—the Teacher to be licensed—the cause why such Teacher was not certified to the Sessions in the ordinary way—and that such Teacher was not compelled to discontinue his or her School on account of any improper conduct.
Dec. 24. CHAS. F. WETMORE, Clerk
