Impediments to Marriege, etc., resulting from excesses.

Price, in a sesied envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the use of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically. This Lecture should be in the hands f every youth and every man in the land.

Mr. W. D. Le Sueur opens the ball in December Popular Science
Monthly with a reply to Goldwin

Sir:—I entirely concur in the position taken by your editorial of 30th November on "Railway Accidents and the Bleck System," although I fear it may be some time before common sense triumphs over inevitable red-tapeism in this serious matter. You may remember that Mr. W. D. Le Sueur opens the ball in December Popular Science Monthly with a reply to Goldwin Smith's criticism of Herbert Spencer's Data of Ethics. To make any adequate comment on this article would require more space than we can justly devote to the subject, important though it is. One remark, the evolutionary theory does not do," says Mr. Le Sueur, "is to reconcile us to the miseries that have abounded and still abound in the world, as possibly having their explanation and justification in some supernatural scheme of government. If the sufferings borne by our fellow-creatures are any part of the Divine scheme, as Mr. Smith hints may be the case, what confidence can we feel that we are right in trying to allayiate then?"
