THE Advantages offered to the Public by this Institution are MANY and IMPORTANT, and the Rates of Premium quite as LOW as

and the states of Premium quite as LOW as security so the Assured, and safety to the Office, will admit of.

The following are some of the advantages offered by this Society:

The peculiar Benefits secured to the Assured by the principle of the LOAN Department.

One half of the Premium for the first five years may be paid by the Assured's own Note. These Notes need not be paid, but may remain on Interest, to be deducted from the Policy on the death of the Assured.

Insurers can at all times demand, as a right, a Loan to the extent of two-thirds the amount of Premium they have paid—upon deposit of their Policy, and guaranteeing it will be kept in force. This important advantage removes the fear so many entertain of being obliged, through pecuniary emberreasment, to let their Policies lapse, and at a time such a provision is absolutely needed for their families.

No Charge for Stamp Duty, nor for Medical Examination.

No Charge for Stamp Pusy.

THE great and decided success which has
attended this institution has induced the
Directors to REDUCE the RATES originally
required in British North America to the ordinary
European Rates. The result of such Reduction
is to stable parties to avail themselves of the important hencits of Life Assurance at much lower
Rates of Premium than those of any other Assurance Company transacting business in Canada.

The Directors have also resolved to extend to
British North America the advantages afforded by
the HALF CREDIT RATES of FREMIUM
which have been an highly approved, and are so
generally adopted by Policy Holdern in the United

MONDAY, JULY 15, 1850. Father Chiniqui, who had favorable opportu-nities, during his sejourn in the United States, to arrive at a telerably correct opinion as to the number of his countrymen who are now residents of that country, confesses and deplotes the fact, of that country, confesses and deplotes the lact, that two hundred thousand French Canadians have voluntarily abandoned the land of their birth, withdrawn from a soil to which their attachm became a proverb, and are now contented and prosperous as American citizens. The statistics of the city of Montreal, embodied in the census published a few days since, exhibit a marked deline in the ranks of the French Canadian population, even since 1832; and the Sentinelle du Peuple asserts, that during the present year at least one hundred thousand French Canadians, "the youth and vigor of the land," will voluntarily expatriate themselves. The migration of nomade tribes is a necessity and a habit. The ade of barbarous races, when pressed by powerful enemies, astounded Europe in the 7th and 9th centuries; but there is nothing analogous to the self-imposed exile of our French Canadians in medern history, unless social or political evils prompted the act. The small animosities gene-

lonialism, train the writers in the Mineree to race. To reply to such accusations would, by implication, admit their truth. We waive all saions of the kind, save when we are told that Mr. Lafontains can control the Legislature by his French Canadian votes, and that he is jusby his French Canadian votes, and that he is jus-tified in organizing an armed Casairy force, like "Captain Portin's Dragoons," to overawe the electors of Montreal; but we have no idea of suffering Mr. Lafontaine or the Minerve to sever rough they claim a different ancestry; and we discern in the social and political future to which we aspire, any considerations which would repay us for a war of races; neither can we perrepay as lot a water recent annual can be pro-ceive any advantage peculiar to any class in the community which Elective Institutions would confer; common interests neutralize the asperities even of national distinctions. At the majority of public meetings in Canada, speakers fishing for popularity always contrive to lng in some sounding phrases about fostering immigration and encourag-ing settlers, as if Canada stood with open arms to embrace them and feed them ; and a perusal of the eeches delivered in Great Britain, when emigration is the theme, would lead an uninformed man to fancy that labor was only requisite to secure af-fluence to the settler in this Colony. Who can explain the practical refutation of a theory ocular demonstration teaches us to reject? The indus-try, rigid economy, and prevailing sobriety of the s qualifies them to extract a subsistence from the soil, and to adhere, with a fondness bordering on pertinacity, to localities which immigrants shun. Yet we have the evidence beimmaigrants shun. Yet we have the evidence before us, not of casual departures, but that of thousaids and hundreds of thousands. Some deepsected and widely-apread feelings of discontent
must inove the masses. Free from religious peraccuton, dwelling under the shadow of a richly
andowed Cherch, in frequent communion with an
idolized elergy—to whem their departure is a
cause of regret and positive pecuniary loss—we
are forced to the conclusion, that political disabilities, which they cannot fathom or shake off, imlities, which they cannot fathom or shake off, im-pose an alternative, from which experience has pose an alternative, from which experience has removed the gloomy veil of uncertainty, and which is now adopted under the attractive allurements the pioneers of the race have discovered in the United States. If we yield our assent to the lan-guage of the self-constituted guardians of French Canadian interests, we must believe that Mr. Laontaine is, de facto, the dictator of the day, hav and the attributes of cons ing at his command the attributes of constitutional power. If this be so, how comes it that he wastes his energies and time in balancing the claims of office-holders, and quenches his devotion to French Canadian nationality, by erecting some obscure fellow-countrymen to a post, for which nature, education, and habits unfit him. If a ing at his com obsears follow-countrymen to a post, for which nature, education, and habits unit him. If a Statesman, he must confess that radical defects exist to explain the depopulation of the land—defects which, irrespective of natural projudices, it is his duty to probe and extirpate, and, as a political leader, resting his claims to power upon the popular support of a distinct race, he stablifies himself when he suffers the sources of his influence to west away. Occupying a different sphere from Mr. Lafontains, we view the movement under other aspects. We deplore the cause of the emigration, but not its consequences, they will hereafter be fruitful to the country. A residence in the United States will strip the French Canadian of those local projudices which here sink him into heing the dupe or tool of designing men; and those who drawn of framentiting to future years the consolidated symbols of French Canadian nationality, must confect the futility of a delineion which such how tends to disperse.

that defeat has attended upon every motion to ex-tend the franchise—but we are not aware that any member has proposed to impart to every cit-sen who can read and write the privilege of vot-ing. If such a proposition were submitted to the House, it would be interesting to learn the argu-ments of our Liberal Ministry—adverse to such a measure. They are profuse of their expressions of liberality; yet they contrive to cloud their wouls in such a tissue of sophistry that it is not always easy to unmask them. A plain, explicit request to give every citizen who can read and write a vote, would draw the Ministry from their lair; to resist the application would decude them of the last shred of disguise, and reveal their naked maly, that, under our electoral law, the truder who pays his hundreds per annum as a tenant, is of less importance at the polls, than the carter

he employs to perform his drudgery. Our Cabinet have voted against reducing the lovernor's salary, on the plea, that he might Governor's salary, on the plan, that he inight leave, and a Military Governor supply his place. Nothing like a plausible excuse. If they were ing the office Elective, and thus avoid a Military dictator. Responsible Government logic is very uzzling, and fast falling into disrepute.

posse. We extract the lollowing passage as ample of his reasoning and evidence:

Passing not long since on the Baltic, from Travelmunde to St. Petersburg, in a Russian steamer, in the month of June, the engines being stopped, at mid-day in a third fog, the chaptain said, "I cannot see ahead, and arn made personally responsible for running any vessel down." I was pleased with this precedition to secure life. It was the first time I had every been in a steamer at sea during a third too, that I din dot consider myself on the borders of eternity. Belying to the capability, who was a most excellent man in his way, if said—"I like thirs; but suppose the fog remains a week!" He replied "Seven days, then, shall we be compelled to remain here."

This is the precaution excellent which had suppose the fog remains a week!" He replied "Seven days, then, shall we be compelled to remain here."

This is the precaution excellent which he power of steam, in order to make the work of desolation more certain in case of coming in contact with some object, could never have been considered possible with the Rassians.

But we Americans and English possess so much of the go-a-head rivalry, that every species of power which can be devised, is obtained to said speed and shoren the time of the passage, without reflecting that the increase of speed in this way grantly increases danger, Repeatedly in crossing the Atlantic, by hight and day, all sail has been they in the Atlantic, by hight and day, all sail has been they for the first of the seamers, during the dashes inghus, bickest now storms and denset fogs—at times when it was so thick that no object could be seen beyond, the jub-boom, and none could possibly have, been avoided which was in our trick. ing prevailed.

We are glad to see from the names and returns that the Medical Faculty at least is not accusted by the feeling of nationality which has disfigured other associations in

the community.

The meeting consisted of fifty members, including proxies, of whom 30 were of English extraction and 90 of French. In the appointments of governors exteen of the twenty French were elected, and only 20 of the 30 English, shewing a spirit of liberality, which ought to guide the members of every society, in which the two races are brought to act together for a common purpose.

The Dressing Room is spacious, and provided with overy fashilty for comfort and case that could be dealered by the most fusticious. In the usual appliances and agreeable preparalions for the toilet, the maneful shelves of the outer Hall or Store are supplied with the Perfunges of Araby, Parisian, Essences, fragrant oils and fancy soaps in every variety, shape, and color. Mr. Macrow. is his present enterprise, hat, with other of our famey soaps in every variety, shape, and color. Mr. Macrow, in his present enterprise, hat, with other of our citizens, led the way towards the improvement of this elegant Street, and we trust they will be generously sustained and liberally patronised. In the immediate precisions of Dolly's fine Boef and Chops, and the well-known cincis of Dolly's fine Beef and Chops, and the well-knows courtesies and amiable character of the excellent Mr. Cooper, who so liberally dispenses money-leiters to his friends, Mr. Macrow ought certainly to resp a rich and txtensive harvest from the faces and heads of his nume-ous friends—the public at large.

his reasoning amounts to.

Nor is the conduct of certain Members of the opposition free from censure for the part they took in the matter. When they found themselves caged in their own trap, through the petushness of the Inspector General, they ruised the cry of complaint. Mr. Sherwood, (of Toronto,) while the claimed for the opposition the merit of proposing £400, said he thought the sum ought to be £500.

ing £400, said he thought the sum ought to se £500.

Mr. Hincks took advantage of this, and with an ironical affectation of surprise said he had expected that his seceptance of the amendment would have given the greatest satisfaction. He, however, overdid the thing in attempting to fix the charge of inconsistency on Mr. Holmes, who expressed an opinion that the Post Master of Montreal should get a larger sum than the Post Master of Hamilton and other smaller places, although he had not previously declared for £400. The inspector General, therefore, to make out a charge of inconsistency against him, went to the Retrenchment Committee, where he declared the Member for Montreal had been the greatest of all the advocates of retrachment. The charge of inconsistency Mr. Holmes denied.

Finally the amendment for £400 was carried.

Mr. Smith (of Durham) moved that the blank

motion was rejected.

Mr. Boulton (of Toronto) moved that it be £750.
Nose came the tag of war. The Ministry would

them on to grasp at the highest prize. The result
was a defect of the Ministry! The amendment

Sketch of the President, U. S.

Hoe. Millard Fillmore, Vice President of the United States, was born in Summer Hill, Cayuga county. New York, Jaunry 7th, 1800. His factory New York, Jaunry 7th, 1800. His factory was in early life, in working at the clother's trade, and during that time devoted all his leisure hours to reading and study. At the age of nineteen, he attracted the notice of Judge Wood, of Caying event, who cook him into his office. In 1821, he removed to Buffala, and entered a law office, teaching for his maintenance until the year 1823, when he was ticensed to practice in the court of common pleas. In 1827, he was admitted an attempt of the Supreme Court of the state of New York. In 1829, he was elected a member of the Assembly from Eric county, and twice re-elected. He was elected to Congress in the Fall of 1832, and after the expiration of his term resumed the practice of his protession. In 1836, he was again sent to Congress, and was subsequently re-elected for another term. During this acssion, he was placed at the head of the committee of ways and means. In 1844, he was nominated by the while party as their candidate for Governor. In 1847, he was elected Comptroller of the state. In 1848, he was elected Vice President of the United States, and on the 4th March, 1849, he eatered upon the duties of the office.

be pondered upon deliberately by the people of sum at first named for the Postmaster General, though in that item there was surely as much room to make a reduction of £50 as in the case of the Postmasters for such places as Montreal and Toronto as there was to accept a reduction from £500 to £400. If the Inspector General believed, as he professed to believe, that the public service would suffer, if the figure were reduced below £500, which he himself had proposed, then he, as a member of the Government and a guardian of the public interests, was bound to have stood up maniforly in their defence. But no; "you may injure the public service," he says; "we have our majority with which we could protect those interests, but we permit the wrong, and throw on you the responsibility." The Inspector General did not make use of these words, but that is what his reasoning amounts to.

Nor is the conduct of certain Members of the conduct of the substance of the army being used for bad purposes, we might not be so much opposed to increasing it terminates the conduct of certain Members of th might not be so much opposed to increasing it temporarily, as the wants or protection of the country required, but we are not. DIED.

At the Village of Hull, Ottawa, ou Wednesday, the 10th July, aged 29 years, Grones Dalmousts Wansar, second son of Ruedlass Wansar; Esq. The premature decease of Mr. Wansar is one of great regret to all who know him for his estimatic qualities. He died after much suffering, but full of hope. His domine, at an early as age, remands us that "in the midst of tife we are in drath;" and his death is rendered doubly melancholy from the circumstance of having lost, but a short fortnight before, a kind and affectionate wife, who but six weeks previously had consigned her sidest child to the grave, where they now rest, leaving behind them a lovely and interesting orphan of only one year old, who, through the blessing of God and the kinduces of its relatives, it is to be hoped, may never feel its loss.

TURKISH BLACK SALVE. UNDER THE PATRONAGE OF THE HONORABLE

THIS SALVE, prepared from the original Receipt procured from a celebrated Turkish Hakim, (physician) of Smyrna, in Asia Minor, and which has obtained an unprecedented celebrity in Great Britain and the East Indies, from the astonishing Cures performed by it in both these countries, has lately been introduced into Montreal. As might be expected, its porularity has followed it, and its use is becoming general among all classes. The Proprietors, prompted by the very flattering reception it has met with in the Metropolis, have determined on extending its usefulness to all other parts of Canada; and, for that purpose, have established Agencies in all the principal Cities. They flatter themselves that when its wonderful properties shall become more generally known, they will meet with that encouragement which the introduction of such a valuable medicament into a country justly entitles them.-The contracted limits of an advertisement necessarily precludes their entering into any adequate detail of its merits, but, for the information of the public, they intend to publish, from time to time such statements of cures as have or may occur, and for the present will content themselves with merely enumerating some of the complaints for which it has been used with the most complete success—Such as Swollen Glands, Broken Breasts, White Swellings, Whitlows, Scalds from Steamboat explosions, or other causes, Burns, Fever boat explosions, or other causes, Burns, Fever Scald Head, Gun-shot Wounds, Bruises, Boils, Frostbites, Wens, Chilblains, Ulcerated and Common Sore, Throats, and Bonions. If used in time it will prevent or cure Cancers, also, Swellings arising from a blow on the Breast, Ring Worm, Pains in the Back, Rheumatism, Gout, Pains, in the Chest, Palpitation of the Heart, Complaints in the Liver, Spine, Heart and Hip, Rushing of Blood to the Head, Swelled Face and Toothache. In fact, it is impossible to enumerate half the complaints that have been cured by the application of this Salve. It is very portable-will keep in any climate, and requires little or no care in its application, as it may be spread with a knife on any substance, such as chamois leather, linen, or

brown paper. d'Armes; SAVAGE & Co., Notre Dame Street; URQUHART & Co., Great St. James Street ; W LYMAN & Co, St. Paul Street, and in all the principal Cities in Canada. July 3.

ANALYSIS OF THE ST. LEON WATER.

I HAVE submitted to analysis the Water from the Sources of St. Leon, and find it to be strongly saline. It contains chloride of sodium in large quantity with magnesis and lime, partly as earbonates, dissolved by the excess of carbonic neid, and partly as chlorids. Like most of the other saline water of the country, it contains bromine and iodiac; in addition to which, I have detected in small quantities, salts of bety tes and strontia, which had hitherto been men with only in the waters of Varennes. In its general characters, it is alied to the Sources of Caxton, Plantagenes, and the Intermittent of Calesdonia.

The contents of one pound of 7000 grains, as calculated from my analysis are as follows:

Chlorid of Sodium.

Chlorid of Sodium.

Olivers of Strontium,

Chlorid of Strontium,

Chlorid of Galcium,

GREAT ENGLISH REMEDY 11:-THE ROST VALUABLE SPRING AND SUMMER MEDICINE IN THE WORLD? HALSEY'S FOREST WINE!

Putronized by the Nobility and Medical Faculty
of England, and externed the most extraordinary Medicine of the Age.

MEDICINES containing Molasses or Liquorice, like the boasted Sarsaparilles, require
many large bottles to produce the alightest change
in health. The Forest Wine's altogether a different
article. It contains no Syrupa logive it candistency,
but acquires the excellent flavor and powerful medicinal qualities from the vegetable plants of which
it is composed. The Forest Wise combines the
virtues of the

DE. HALSEY—DEAR SIZ:—liaving taken your Forest Wine and Pills to remove a disease of the Liver, from which I have suffered averely for upwards of ten years; and, having adhered chaely to the directions which I have sourced my health, notwithstanding all who knew me thought my case incurable. Frevious to taking the Wine and Fills, I had recourse to the best medical treatment, but continued to grow worse to an alarming degree. Some of my friends spoke despairingly of my case, and tried to persade me from making use of any advertised remedica; and, I doubt not, but what there are hundreds who are dissuaded from taking jour excellent Mediciase, in consequence of the deception and inefficiency of many advertised remedies put forth by unprincipled men, in faming advertisements. But, what a pity it is that the deception used by others should be the means of dissuading many laboring under disease, from making trial and being cured by your excellent remedies. Humanly speaking, they have saved my life; whee I commenced making use of them, I was in a wratched condition, but began to experience their good effects in less than 'three days and, in six weeks from the time I purchased the Medicines, to the great surprise of all my friends, I was entirely dured, and had increased filteen pounds in weight, having taken one bot of the Fills and two bottles of the Wine. Would be God that every poor sufferer would avail himself of the same remedies!

MINERAL WATERS POINT DU JOUR, PARISH OF L'ASSOMPTION.

POINT DU JOUR, PARISH OF DASSOMPTION.

THESE truly valuable WATERS are distinguished for the large quantity of Bromine and Iodine they contain, and are acknowledged auperior to all other Medicinal Waters. They are the most agreeable refreshment of the description that have yet appeared. They can be used cold to the greatest degree in the most oppressive heat of Summer, and that without altering or affecting injuriously the health of the person using them; upon the contrary, they are found to improve and strengtheg. The large number of cures effected by the use of the above Waters, enable us to recommend them to the public as an excellent remedy in a very great number of cases. The names of a few only of the persons of celebrity, who have given their written recommendation of the Waters, are here given. These, however, show the happy results arising from their application:—

ST, JORGET'S CONVEST, May 14, 1850.
Sin,—I observe with pleasure that the Mineral Waters, their source at Point du Jour. Parish of the Assomption, are acquiring the cabbrity they deserve, or myself, who am, parhaps, one of the first that alluded a them in the newspapers, in the year 1839, I can issuir, int since then I have had occasion to try various Mineral Vaters, nevertheless I have never doubted that the prevence must be given to those of Point du Jonre-having syself had much experience.

Medical Hall, 7, Great St. James' Street.

THIS Valuable Preparation has been before the public for unity years, during which time it has been expressively osed, and has proved emisently successful in all those datebeen in which this medicine is prescribed. It is considered by Physicians of the present day the very best Redicine for re-establishing the constitution after it has andergone the effects of Mercury. In Chrome Rheumentism, the most marked effects have been produced by the use of Sarasparilla | who fire continued use is often attended with improvement of appetite and dispersion, increase of strength, the production of a more healthy state of mind, and the pulliation, or, in some cases, commisted disappearance of various morbid symptoms, as Erupinds, Ulcerations, poins of a Rheumentic character, Sec., Sc.

Drs. McCalloch, Campbell, McDond, and Francer, who have extensively used it in their practice, have knowly fastered the Proprietor with the following Certificates when the pleasure in busing tentimony to the faithful manner in which you prepare year Phile Eartest of the Compound Decetion of Sarasparilla. This I am emploid to do, on account of several of my pulicute having derived the greatest benefit from its use.

For Containtrional Sphilis and Chronic Rheuminism, I have prescribed it with the most marked effects, I can, I have prescribed it with the most marked effects, I can, therefore, without the least hestination, recommend your preparation as one possessing all the Medicinal quilities of the Compound Decection of Sarasparilla, while it is at the same time more palutable, and less apt to derange the Strunch.

A COMPOUND FOR SHAVING.

This delightful article is totally different and far superior to anything yet invented for shaving. The base of it is derived from the Amode, or "noup plant," or California, and thus the use of strong alkali, so burtful to the skin, it avoided. It is vegetable and detergent properties have the purest and most nouristing effects on the skin,—it another and allays irritation, and has a fine, thick, erramy lather which does not dry ou the face. It is a decided buxiny to shaved with this incomparable scap,. It is done up it elegant style, calculated either for the dressing case of the "rough and ready" t. traveller, or the toilet of the most fastidious connoisseur. BOGLE'S AMOLE,

Gassow, 12th January, 1847.

Sta.—I have great pressure in informs 2 you of the great good your asceilent COUGH LOZENGES have done me. In Javensber, 1845, I caught a severe cold from riding two or three miles, out very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December jass. I tred all kinds of medicines, but they were of no avail. I was then advised to key your Lozenges, which I did only to please my friends; but before I had finished a to 5d tim, my voice, to my great joy, came back to strong as over.
