ATHENS REPORTER OFFICE

THE CIGARETTE LICENSE

On Friday the by law for licensing the sale of cigarettes in the municipality comes into force.

Every owner or keeper of a store or shop in the said Village of Athens who either directly or indirectly sells by retail any cigarettes or cigarette musical programme was rendered.

Mrs Judson and Miss Loverin converges or cigarette tobacco, unless tributed a pleasing piano duet. Miss such owner or keeper of shop have previously taken out the license required under this by-law, shall for each offence be liable to the penalty hereinafter enacted for an infraction of the by law. Thus reads the by-law, the penalty referred to being not more than \$50 and costs and the license \$75 a year

This license is generally recognized as being prohibitive and the coming into force of this by-law is doubtless the end of the cigarette trade here. Whether it will affect the prevalence of cigarette smoking is yet to be proved. To correct a custom that has existed for so many years is a

remondous task for any by-aw. This is the second event in the his ory of the village which marks the influence of moral reform. The local option by-law wiped out the liquor trade. It was thought by many that the lack of whisky would kill the town but years have come and gone and it is now evident that Athens States and could regard the various The cutting out of licenses by this means in the surrounding country has, The address was much appreciated by of course, helped this village. It now remains for these same villages to icense their cigarette trade, for Athens is the centre of a large area from which it draws its floating population.

RAILWAY MEETING

The Ottawa & St Lawrence E ectric Railway Co. held a public meeting in the town ball on Thursday evening, Feb 25 Considering the weather the attendance was large and it was evident that the people of Athens are waking up to the benefits that would be derived from the existence of an electric railway. Mr A. E Donovan who had been

advertised to be present was cailed to and was unable to attend. Mr Francis Sheldon presided and Mr Brown and Mr Morden addressed the meeting. Mr Brown in the course of his remarks said that the Railway was re-ceiving strong support all along the route, but Athens had disappointed him by its backwardness. He made The puck when within reach was slammed toward the opposite goal. an earnest appeal to the audience to There were, however, some individual guarantee the success of this section of rushes, which, lacking the backing of the road by becoming interested to the team failed to pass the defence. extent of enough shares per population to show that Athens would back it in He referred to some disparaging redeclard that they arose from selfish interests and that no fraudulent scheme could thrive on public meetings and discussions. At these meetings the Holmes' whistle. audience is asked to inquire into any question on which they are not clear.

The power for the line will come from Iroquois and the Madawaska The surveyors have gone over the line from Rockport to Athens and have calculated that the cost of construction will be much lighter than was at first thought. The country is practically ideal for an electric railway.

People are, as a rule, skeptical of all ventures, especially those in which they are asked to invest and more especially so of railroads. However, the terms of investment are such that the company will have to put the road in commission as early as con-

struction will allow. An electric railway through Athens would mean many market gardens, the produce of which could be put in Ottawa or Montreal markets every morning. Huge strawberry patches would be found around the village. Orchards, raspberry and blackberry gardens would prove profitable. Charleston Lake would be a new place in the summer. There are many cottages there now owned by Athenians and with an electric service the hot weather could be enjoyed and business men could obtain recreation which is an essential of business often overlooked.

Lesson X. March 7, 1915.

Saul Anointed King-1 Samuel 8; 1-10. 27. Print 9. 17-10. 1.

Commentary.-I. Asking for a king (8, 1-22). It can not be known definitely how long it was after the great victory of Israel over the Philistines a Ebenezer, that the demand was made for a king. During Samuel's old age he called upon his sons to share the responsibility of the judgeship with him, and made them judges in the southern part of the land. Joel and Abiah, Samuel's sons, were far from possessing the excellent qualities of their father. They were partial in their judicial det sions and were guilty of accepting bribes. The elders of Israel were so displeased with their conduct that they wen to Samuel and told him of the evil conduct of his sons, and asked him to give them a king, such as the nations about them had. Samuel knew that it was God's will that Israel should be ruled by judges and that the theocracy should continue. He was grieved at their de mand for a king, and went to the Lord in prayer regarding the matter. The Lord assured Samuel that the people Lord assured Samuel that the people were not rejecting him as judge, but were rejecting himself and told him to listen to the demand of Israel for a king. He should tell them plainly, and the state of however, what they must expect from a king Samuel carried the Lord's mesage to the people and told them how king would oppress them., II. Saul and Samuel meet (9. 1-24).

1-14. The Lord knew where to put his hand upon a man whom He could make king of Israel. Kish, of the tribe of Benjamin, was "a mighty man of power." and he had a son who was "a choice young man." He was a head taller than the rest of the people. If Israel desired a powerful man as king, then surely Saul would meet their demands. It was a peculiar train of pro-vidences that brought Saul to Samuel's notice. Kish had a herd of asses and these animals were highly prized then, and are still in the East. They had strayed away, and naturally Sau was sent, and a servant with him, to find them. Saul failed to find the ass-

es, but he found Samuel, whom the Lord would have him meet. 15, 16. Just the day before this the Lord had told Samuel that on the next day he would send to him the man who was to reign over the people, and he should anoint him king. 17. Samuel saw Saul-God's appointments were perfectly timed. Saul arrived at Ramah at the right time. Samuel was expecting the future king to appear Samuel would know that Sau was the man, for God at once assured Shall reign over my people-Literally, "Shall restrain my people. A peculiar word, contrasting the re-straints of a settled government with the license of the time in which "every man did that which was right in his own eyes" Judges 21: 25).—Kirkpat-rick. 18. Where the seer's house is— Saul's one desire was to learn where his father's asses were; he was seeking these and not a kingdom. thought the seer would be able to help him locate the lost animals. 19. The high place—Samuel had erected an altar unto the Lord (Judges 7: and it was probably on the high place here mentioned. God had said that there should be but one centre of worship, but the condition of affairs in Israel was unsettled, and it may have been permissible to have altars aside from the one at the tabernacle. shall eat with me to-day—Samuel had already honored Saul by bidding him to go up before him, and he fur-ther honored him by acting as his This was entirely unexpected by All that is in thine heart— Samuel would at once tell Saul about the lost asses, but not until the next day would he make known to him his great work. Saul may have had some ort of intimation from within that he was to perform an important sernation. 20. They are found-Saul desired to know about the lost animals, and he found out, but he learned much more. Samuel was seer, but he knew about the asses be cause the Lord told him, and he told nime not only to relieve Saul's mind, but to assure him of the authority he had in giving him a message from the Lord. On whom is all the desire of Israel—The desire of Israel was for a king, and since Saul was the man whom God had chosen, the people's desire was toward him, though they did not know whom God would give them. 21. The smallest of the tribes of Israel—The tribe of Benjamin had been all but exterminated about three centuries before.

22. Into the parlor-"Into the guestchamber."-R. V. Chiefest place-This is a double superlative. It indicates that the piace of highest honor was given to Saul. That were bidden-It occasion of a sacrificial feast. About thirty persons" were invited by Samuel to eat with him in the house, and these, probably, were present. The rest ate outside, 23. Pring the portion—We note from this portion. the portion—We note from this verse that Samuel was expecting the future king to come to him on this day, and king to come to him on this day, and had, accordingly, given directions have a particularly choice portion reserved for the distinguished guest. 24. Took up the shoulder—The right leg was the priest's portion, and would fall to Samuel. He reserved this for Saul as a mark of henor. III. Saul anointed King (9.25-10: 1.)

111. Saul anointed King (3.25-10; 1.) 25. Communed with Saul—Nothing is sail regarding the nature of the conversation. We may reasonably suppose that they spoke of the condition and needs of the nation. Upon the tep of the house—The flat roofs of Oriental houses are much used as places for rest conversation and slowing is for rest, conversation and sleeping. I has been suggested that upon the housetop Samuel and Saul could be readily seen, and the people present would know the honor conferred u, on Saul by the prophet 26. The spring of the day-The rising of the day, or dawn. Abroad-Out of the house. 27. Bid the servant pass on-That Samuel Abroad-Out of the house, 27. might be alone with Saul. That I may show thee the word of God-The time

had now come for Samuel to make fully known to Saul the fact of his di-vine appointment as king. 1. Vial of oil—The Hebrew is emphatic, "the flask of bil"; probably the only an-oluting oil described in Exod. 30: 23-33, which Samuel had prepared for this express purpose.—Whedon. Pcur-ed it upon his head—By this act Saul was set apart for a distinctive work, as men were set apart by this cere-

IV. Saul proclaimed king (10: 2-27.)
As Saul was leaving Samuel, he was told of three signs that would confirm to him the message he had received from the Lord through Samuel. He would meet men by Rachel's tomb who would report the firling of his father's asses. He would meet three men going up to Bethel, who would give him bread As a third sign he would meet a company of prophets and he himself would prophesy and would be changed into another man. Samuel later called the people of Israel toge-ther at Mizpeh and explained to them that the reason a king would be given was that they had rejected God. Saul was chosen by lot as king. This was in harmony with what had already been done. The people acknowledged him as their king. The inhabitants of Gbeah, however, would not honor

Questions-Why did the children of Israel ask for a king? What had been the nature of the government? What directions did the Lord give Samuel regarding their demand for a king? Explain how Saul came to meet Samuel. How did Samuel treat Saul? Describe the anointing af Saul. What signs did Samuel give to Saul? Dessigns did Samuel give to Saul? Describe the meeting at Mizpeh. How did the people of Gibeah treat Saul?

PRACTICAL SURVEY. Topic.—National revelution.

I. A rejection of divine sovereignty. II. Based on internaional rivalry.

I. A rejection of divine sovereignty. demand for a king was in a constitutional manner and came pefore Samuel with all the weight of a formal decision on the part of the representatives of the nation. We can scarcely imagine the feelings of Samuel as he heard their desire express-ed. The tide of popular feeling did not swerve him, but he was deeply wounded by Israel's evident aversion to God's time and ways. Their proceedings were premature and hasty and conducted without reference to the will of God. Israel's wish to have a king to lead them out to battle betrayed a thirst for war and a distrust of the Lord's power to defend them. Decline in the theocratic belief and life was ever the one sign of weakness in the Hebrew commonwealth. Much of his life-work seemed to Samuel to wasted unless the form of uel to be wasted unless the form of government under which he had brought the land to prosperity continued. The Jewish nation could not appreciate Samuel. His intense and consistent godliness was not popular among them. Their moral status was unworthy of the free government God had given them. Samuel's strong, pure character towered in magnificent sub-limity above the fickle, selfish age in which he lived. When his ungrate ul country called him to resign his office as judge after long years of honorable and acceptable service, and to yield his authority to another, Samuel did not resent or complain. His conduct sets before us the wisdom of timely concession, the nobility of self-renunciation. Though Israel's request was an affront to Samuel, he never seemed so great as in the last scenes of his public life. He towered high above the infirmities of ignoble minds. The Lord explained the case to Samuel and told him what to do Samuel found relief for his burdened heart, sympathy under bitter disap pointment, guidance in great perplex ity, submission to the Lord, strength for painful duty, composure gneral excitement and confidence in a glorious future. God assured Samuel that while the people professed deep concern about the moral depravity of Samuel's sons and the welfare of the tion, they were, in reality, off their God. He was reminded that this was not a new case of sudden re fusal of the divine sovereignty.

II. Based on international rivalry The elders of Israel were actuated solely by political motives. In vain did Samuel warn them of the disapproval of God and the costs of their decayed monarchy. Their desire to rival and compete with other nations was loosening their connection with Jehovah as ruler. The basis of their revolution was in effect their rejection of a theoracy for a constitution-al monarchy. Israel resented the al monarchy. Israel resented the thought of being considered in any way inferior to the surrounding na-tions. Only a man of ripened wistions. Only a man of ripened wis dom could have presided over so farreaching a change. Personal humili-ation was lost sight of in Samuel's desire to save Israel from the full con-sequence of their sins. He gave his services as phophet as faithfully when the question was injurious to himself as on any occasion. Having ascertained the will of the Lord concerning his people. Samuel aimed at nothing but to carry it into effect with nothing but to carry it into enter with courtesy, tenderness, dignity and grace. Infallible wisdom guided Sam-uel and Saul in their meeting, prepar-atory to kingly rule in Israel. Saul's appointment was of God, and the purpose of it was the deliverance of his people. Samuel found much that was good in Saul, reverence for his father, diligence in business, modesty and humility. He was warm-hearted dignified and sincere. He ext no vanity upon his elevation. conduct gave promise of a bright fu ture. The true purpose, of life was unfolded to Saul by Samuel. Everything was calculated to impress on Saul that his elevation to the royal district was not simply good fortine, but he and the said th but he and the people must see the and of God in it.

was an outburst of an hereditary vice.

PLACING THE BLAME.

In the weighing of testimony concerning the war now being waged, one need in doubt that the future historian will foul that the Future historian will foul that the Fussian military caste with the future historian will and that it might easily have been avoided.

Fish boiled in stock instead of water will not taste flat.

WINTERING BROOD SOWS.

Contrary to the general opinion the pig is one of the cleanest of animals under favorable surroundings. It never litters its house if it is possible not to do so. Since this is true it should be encouraged to follow its natural instincts through the medium of clean and sanitary environments. The New Jersey Agricultural Ex-

periment Station at New Brunswick. N. J., in its attempts to find a plan of wintering brood sows which would provide not only for the proper exer cise of the sow but also for clean and sanitary surroundings, has adopted the colony house method. The colony house which is an "A" shaped struccan easily be moved from place to place, is easily kept clean and provider warm and comfortable winter quarters for the sow. By placing these houses at the far end of a field and compelling the sows to come twice daily to the other end of the field for their feed otherwise inactive sows get the exer cise essential to the production of larger, stronger litters of pigs in the

At the New Jersey station additional protection is afforded the sows by sur-rounding the colony houses on the north side with a wind break of cornstalks, straw or other available ma-terial. This break is placed about three feet to the rear of the house and consists of a frame work of wire fence filled in to about one-half the height of the house with the materials

suggested.
The colony house has two openings; one a door at the front to enable the sows to go in and out; the other, a door in the rear, hinged at the top, which may be raised to admit sunlight or for ventilation. This door is in tended also to afford a convenient means of getting at the sow at farrowing time. In extremely cold wea-ther, when the doors must be kept closed, the problem of ventilation is solved by a small window covered with canvas, which is located in the rear, just below the apex of the roof.

The plan followed at the New Jersey station is to keep about three sows which are bed for spring farrowing in each colony house, the number of depending chiefly on the size of the sows. Three houses are placed side by side and anywhere from eight to ten sows taken care of in the group. It has been found that when kept in these houses disease is less apt to break out among the animals, and if it does oc-cur it is much more readily controlled and kept from spreading.

As farrowing time approaches each sow is put in a separate house, which is placed in a separate lot also. This is necessary for several reasons. When two sows are together and one is far-rowing her pigs are liable to be destroyed by the other one. The first sow may become excited at the presence of another and trample her own pigs. It often happens also that two sows under these conditions will fight each other, injuring or killing the pigs in their movements. The practice is to isolate the sow a week before she

When pigs are a week old two sows which have previously been together may be assigned to the same field or pen, but separate houses should be

used until the pigs are weaned.

Where a sow is to farrow in March
the New Jersey station has found it advisable, in addition to providing a dry pole at farrowing time and at night until the pigs are several days old These precautions are taken to avoid the chilling and hence weakening of the young pigs. For late spring, sumnot necessary. Hogs naturally seek a ground floor during those seasons, as Hogs naturally seek a it is cooler

Great care is used to keep the houses clean and healthful. Clean bedding is placed in them as often as needed. They should be disinfected with some reliable disinfectant before turning sows in for the winter, and especially at farrowing time in the spring. In general the New Jersey station recommends disinfecting about once every three months with a 2 per cent. creolin solution or other compounds of creo sote; with air slaked lime, whitewash, chloride of lime, crude carbolic acid or other commercial disinfectant. The

!um mivkoogGc!!J dY-O nyshrdl houses should be cleaned out occasionally in the winter, air slaked lime applied and new bedding laid down
The New Jersey station figures the cost of one of its colony houses, including lumber and with home labor, at \$10. Inasmuch as the houses last indefinitely with a little care and can be moved around at will, their cost cannot be considered exorbitant. Both sows and hogs can be handled with

greater convenience and more cheap-

through the utilization of the col-

The Pennsylvania Experiment Staconcludes, as the result of tests, that the amount of silage fed to the breeding ewes should be limited to two pounds daily per head. Experiments rest of at this station give proof that feeding to-day

corn silage as a sole roughage is fatal to pregnant ewes in a high percentage of cases. For that reason, conclude the experimenters, it should be fed in conjunction with other roughages, as alfalfa or clover hay, allowing two pounds as a maximum amount of orn ilage to be fed to the pregnant ewe.

Feeding of spoiled silage often causes death of lambs.

The cause or yellow leaf of sour cherries in June is given by one of the Cornell experts as fungus gaining entrance. trance three weeks before the velloy spots disappear. It must be fought by a preventive spray of three or four applications of Bordeaux mixture

Winter vetch is used at all the ex-periment stations. Twenty pounds to the acre are sown with oats in prefer ence to barley. Vetch is preferred to clover because the little hairy sprouts cover the ground better and it is believed to take less moisture from the

The young colt is easily handled and remembers all you teach him as long

as he lives. You should plan to have a better garden this year than you did last year. Plant on generous lines. Plan that the rows may be straight and long, so as to admit horse cultivation. See that there is nothing in the garden but vegetables; fruit trees have no place in the garden; they belong in the orchard. Nothing larger than current or gooseberry bushes should be allowed a place in the garden, and these should be placed in one side of the garden

and it long rows.

Field peas sown at the rate of two bushels per acre with one bushel of oats are now largely used by dairymen. The combination is cut just when the peas begin to pod and used as a hay It is the cheapest feed that can be raised, and means a big increase in milk and butter fat. Furthermore leaves the soil in good condition for another crop, as the peas gather nitro-gen out of the air and store it in the ground for the next crop.

Is Your Tongue Furred? Have You Headache?

TRUE PROPHECY

Was That Made of Germany Food Shortage.

London cable: Lecturing here last night before the Royal Society of Arts on the enonomic position of Germany, Professor W. J. Ashley, dean of the faculty of Commerce in the University of Birmingham, declared Germany was to-day in precisely the position economists pictured in 1900, when they urged the building of a big Ger man navy to protect that country's food supplies brought in from abroad. The situation has arisen, in spite of Germany's fleet, when the country was obliged to depend upon herself for food, the speaker stated

Professor Asuley cited many reasons for stating that the German authorities have not known with accuracy since the war began how much really was available, and have been throughout in a state of painful un-certainty, very different from the unsuspecting confidence of the German They have been driven, declared, to adopt one measure after another in their efforts to deal with the food problem. In Professor Ash ley's opinion, under the best of condi tions, and assuming all imaginable docility on the part of the German nation, the people will be subjected to an irksome and disturbing regime if foreign supplies continue to be cut off.

foreign supplies continue to be cut off.
No dramatic breakdown of the en-German economic organization need be expected, the speaker said, but if the allies continued to command the seas, unemployment and short time would become increasingly prevalent, and distress would grow to alarming proportions.

SOCIALIST DEPUTIES ON TRIAL.

Petrograd, via London, Cable.-Trial of five Socialist Deputies, charged with treasonable conspiracy, began vesterday, with the doors of the courtroom open to the public. The Dumaites, with other Socialists on Nov. 17 in a house on the Viborg road, eight miles from Petrograd, as delegates from a Socialist organiza-tion to oppose the war, because they feared a Russian victory would strengthen the Government and result in reactionary measures. T meeting, and the discussion which took place there, resulted in the arrest of the men who were arraigned

SWANSEA, ONTARIO

THE POULTRY WORLD

HEALTH OF BREEDING FOWL.

At this season among the breeders the question of the day is fertility of the breeders who are to make or may mar the future output of the 1915 hatch. To many beginning poultry operations the question of fertility enters but little in their minds, and with the common idea of just mating a given number of females with a male will give them eggs that will have fertility to properly incubate hatch and afterward rear a fine lot of chicks as good, if not better, than the parent stock. Yet, even with the old breeders, this obtaining of fertile eggs in the unnatural season is a problem, one that many factors enter into, and one that many factors enter into, and one that each year requires study and the attention of small essentials that to the average beginner seems of no im-

Not all breeders handle the breeders in the same manner, and under the slightly different system seem to have a fair measure of success; but with all those that have had success in this line the foundation is very near the same. Health is the first important step. No fowl should be retained in the breeding pen, male or female, that has not, or is not, in good health. It requires nerve to discard a good fowl because of ill health, or one that has been ill and through doctored efforts has recovered. But the safe way is to discard all that have not a clean bill of health for the future success of the

flock.
Hens in good conditions mated to well-matured cockerels will give the best average results in the majority of cases, although well-matured, early hatched pullets mated to strong cock birds will give good results. The number of females to each male for best results depends largely upon the breed, condition of birds and environment. One male to twelve or fifteen hens is the general rule with the lighter breeds early in the season, such as Leghorns, etc.. With many experienced breeders one male to six or eight is the with Plymouth Rocks, Orpingtons and Rhode Island Reds, increasing the number as spring approaches.

To obtain the best fertility-forced

egg production must be avoided, and the fowls made to exercise for a number of hours during the day in a litter of straw. Pu'lets can be fed liberally than hens. With the latter there is apt to be a tendency to put on too much fat for best results. many cases the dry mash is kept from the hens, and only a variety of grains fed. Others open the mash hoppers during the afternoon only, allowing the hens to consume all they wish during this period. These systems of feeding depend largely on the condi-tion of the fowls. All must have enough to eat to mainain heat, and for tne making of the egg; but the over-feeding of the breeding pen is one evil that many indulge in at the expense of strong fertility, especially during the early part of the year, when exer-cise is confined to the poultry buildings a large part of the time. Male birds should be watched carefully. They go into the breeding yards in perfect condition, but especially if with hens will not consume their share of food, and in course of time become poor in flesh. A little extra pains should be taken and extra feed provided for such males to keep them in proper condition.

It is well to have an extra male to place in such breeding yards, unless a special mating is desired. In such case the one male will be compelled to stay in the pen. Green feed in the form of sprouted oats, caobage and beets must be supplied, fresh water, oyster shell, charcoal and grit, always before them, and a careful watch each day that the pen is getting the required amount of food and exercise. They cannot, for best results, be handled in the same manner that the regular layers are, and the extra care and attention will mean better and stronger fertility.

NOTES.

There is no one best breed or var-ety. Money and pleasure can be derived from any of the popular breeds of to-day. The success with them lies wholly in the proper management of the fowls. Nearly all the standardbred fowls can be made good egg pro ducers by safe and sane breeding. One is more apt to succeed with the fowls they admire most, than to try and be successful with some breed known for egg productiveness which they do not

The early chick is a profit payer in the majority of cases. But the poul-try keeper must have proper brooding quarters to successfully rear the chicks. There are many days in the early spring that are cold and wet, and chicks during spells of bad weather must have good quarters.

Pull tegether, progressive poultry keeper wishes it. There are just as many worthless culls under the name of utility as there is in the fancy, and the fancy in the main is just a higher art in poultry breeding. No real progressive creeder will neglect utility qualities in his flock. The one that does will not long stay at the top of

the he.p.

Breeding each year from late-hatched pullets that were forced for egg production during the winter has been one cause for poor fertility and still poorer hatching results, and the chicks natched did not show the thrift of those hatched from properly aged and cared for breeding stock. One cannot be too careful in the handling of future breeders, one of the main props to successful poultry.

ANOTHER "TRANSPORT" YARN.

Berlin, via London, Cable.---According to despatches reaching Ber-lin from ports on the North Sea, the Norwegian steamer Orla, when coming through the English Channel re certly, sighted a quantity of floating wreckage, in which there was to be seen some British military uniforms. It was supposed that this military clothing was from some British trans-port which had been sent to the bot-

have seen the fellow to this." he sald, as he scrutinized the wreath of eglantines and the crest of Seton-Lin-

eglantines and the crest of Seton-Linlithcow embroidered in the instep.

"You have seen the fellow to that,
my lord?" echoed the surgeon.

"Yes, in the hands of Cautain Douglas. It was a relix of his childhood.
He showed it to me before he left
Engluand for the Crimea. No doubt
he bas it still in his possession." replied the earl, as he carefully laid the
mute witness aside, and proceeded to
the examination of the faded writing
on the paper. He read as follows: on the paper. He read as follows:

Seton, March 18—
Memoranda of the facts relating to
the secret birth and concealment of
the first-born son of Eglantine, Barlead me to suspect that Benjamin was more than a distant kinsman of the family. Oh! good Heaven! If your story be true, as you believe it, how much, how dreadfully, how awfully, has my brother been wronged!" said the young earl earnestly.

The surgeon looked at him in amazement and admiration. Here was no selfish consideration of his oness of Linitingow, and William Douglas, of Douglas Cheviot, late a lieutenant in her majesty's — regiregiment of foot, stationed in Canada. I was called to Ornoch Castle, in this shire, on the night of March — 18 to attend the Baroness of Linlitingow

At twelve, midnight, she gave birth to a male child, and immediately fell into a syncope.

Besides mysolf, only Lady Shetand and the nurse were present. Circumstances that are known to all the parties interested in this statement—and none others need see it—rendered it expedient, for the sake of the family beam to consent the high the high statement. ily honor, to conceal the birth of this child, and he was committed to me to be disposed of.

After I had recovered my patient

his life, and I attended him in his last illness, and on his deathbed. I was with him when he sent in haste for your father and mother, saying that from her syncope, and got her, under, the influence of morphia, into a re-freshing sleep, I took the child, and, while the mother slept in unconscious-ness. I carried him to the little ac-port of Kilford, and to the house of the woman whom I had already en-gaged to take charge of a new-born child when it should arrive, without telling her the real parentage of the

astounding statement."

"Certainly, my ford. I should surely rever expect you to receive this statement without proof. To begin with, then. I must remind your lerdship that at the time of your elder brother's birth. I was the pupit and assistant of Dr. Seton, the medical attendant of your mother."

"Her' maternal instincts were true. It did concern him. Dr. Seton died, and was buried; and I, his assistant and heir, Christopher Kinlock, succeeded to his property and to his he hard years passed on. The This woman, by rame Magdalen Hurst, was stewardess of the coasting steamer Shaft, but was at this time confined of her first child, a boy.

On reaching the hut where the woman Magdalene Hurst lodged with an old midwife by the name of Jean old midwife by the name of Jean old implying by the name of Jean Craig, I found that my patient was in a profound sleep, and that her child had died while she slept.

"On that wild March night, when ceeded to his property and to his "Not by all! Not by my father and my mother! I think that all their Immediately occurred to me means by which I might conceal the existence of Eglantine Seton's child more effectually than by simply putting him out to nurse. I broached my plan to the old woman in attendance, and need such arguments as continued. my mother: I think that all their lives they have been troubled, at times, by the recollection of the doctor's deathbed, and speculation as to the nature of that disclosure which rian to the old woman in attendance, and used such arguments as convinced her of the expediency and propriety of substituting the living infant for the dead one. I clinched my arguments by the gift of a few guineas. And I secured her secrecy by a threat of the consequences to herself, as well las to others, should she betray the trust. The clothing of the dead and the living child was then exchanged. The living child was laid at the bosom of the foster-mother, and the dead one was taken to Seton Old Church, and buried.

lagdalene Hurst was led to believe that the child on her bosom was her and Eglantine Seten was told the child who filled the nameless coffin at Seton Old Church was

woman, Magdalene Hurst, who, while in a state of unconsciousness, had been bereaved of her own babe, and had had this one, your infant elder brother, dressed in its clothes and put in its place by her side, and so palmed off upon her as her own. Pardon me, Lord Wellrose, for telling you these truths."

Was an old case. I had emptied it all control is apparent contents, and then ordered it be carried away to the auctioneer. But in moving the old, mouldering desk, it fell to pieces, and revealed a secret drawer filled with papers. I took possession of the papers, which at first glance seemed to be only old love letters and old memoranda of In a few weeks. Magdalene Hurst, stewarders of the Shaft, went back to Lendon, taking with her the foster-child whem she believed to be her love letters and old memoranda of debts—secret debts, I mean. I had no

child whem she believed to be her own, and whom she had named Ben-jamia, after his supposed father. Feeling now the infirmities of old are creeping upon me, and knowing that I may be called suddenly hence, and not wishing to take such a secret toway with me to the grave, nor yet deeming it expedient to divulge it at this present time. I make these mema morbid curiosity incited me to read when I should find time, I bundled them all up and packed them into my

"Does Captain Douglas know of the existence of this document?" "No, my lord, he does not," answered the surgeon.

cd the surgeon.

"Have you mentioned or hinted to him, in any way, the fact of the discovery you have made?"

"No, my lord; no. I deemed it best, for many reasons, not to do so. In the first place, he was in a condition of weakness with tendency to hemorrhage of the lungs, that made absolute quietness vitally necessary. Any exquietness vitally necessary. Any ex-citement must have been very dangercitement must have been very danger-ous, and would have been probably fa-tal to him. In the second place, I thought it due to your family to make the communication first to yourself, my lord, or to your father, the Duke of Cheviot. In the third place, we were my lord, or to your father, the Duke of Cheviot. In the third place, we were very near England when I made the discovery, and before I had thought over the subject many days, I found myself in Southampton waters. I hope your lordship thinks that I did well." "You did well" said the earl with "You did well," said the earl, with

much emotion.
"Your lordship thinks the proof of your brothers birth conclusive?"
"Yes, I think it conclusive." With

the corre oborative testimony we have in our hands, I think it quite indisput-able. But, oh gracious, Lord of Heaable. But, oh gracious, Lord of Heaven, how bitterly has my brother been wronged in all these years!" groaned the earl, covering his face with his

"Your lordship takes no thought of yourself at all in this matter," said the surgeon in amazement.

Why should I? No one has injured me. But, great Heaven! how he has wronged! Doctor, we must save him. The best medical skill in England in Europe—in the world, must be en-gaged for his restoration in life and

The surgeon gravely shook his head. The surgeon gravely snook his neau.

"My lord," he said, "I tell you frankly, I have no hopes of saving Captain
Douglas' life. He was born with a
constitution enfeebled with the sufferings of his mother, ever before his birth; that feeble constitution was further undermined by the privations and exposures of his infancy and childhood; and it has received its death-blow in that awful winter before Sebastopol, and in that last fatal wound, received when he planted his colors upon the walls of the citadel."

"I tell you no! He must and shall be saved! All my fortune shall be devoted to his service. The best medical shill in the world shall be secured for

"Ah, my lord, there is a limit to the "Ah, my lord, there is a limit to the power of wealth, and to the skill of physicians. They cannot raise the dead; they cannot restore the dying!" "Then God can! Prayer shall aid work, and we shall save him yet!" said the young earl in holy triumph. CHAPTER XXXIII.

When the surgeon hed left the room, the Earl of Wellrose went to his newly discovered brother's chamber. He found the invalid sleeping calmly. He stood by the bed and gazed compassionately upon the fair, wan unconscious face.

"He must take my titles and estates away from me, and yet heaven only

away from me, and yet heaven only knows how much I love him! And an! Lord of heaven! how cruelly and bitterly he has been wronged!" tyoung earl murmured as he gazed.

Then, with his own hands, and with almost womanly tenderness and care, he drew the coverlet up over the delicate chest, closed the curtains, and overed the gas.

Then he opened the communicating

door and passed silently into his own His valet was there, ready to attend

shall not require anything mere to-night, Perkins. You can go," said

his lordship.

The valet bowed and withdrew. Lord Wellrose threw himself into

an armchair beside a table, with his sting upon the to head howed upon his hand. He felt no disposition to retire to rest. His mind was oppressed with thought, of the startling revolution he had resting the startling revelation he had received from the surgeon. He could not for an instant doubt its truth. Beyond for an instant goald its truth, beyond all question Benjamin Douglas was his elder brother, the son of his parents by their first rash, childish mar-

But the heaviest of all was thought how that elder, even in help-less infancy, had been cast down into the lowest depths of the social helis, while he, the younger, had always liv-ed in the heaven of family love, and

that I may be called suddenly hence, and not wishing to take such a secret away with me to the grave, nor yet deeming it expedient to divulge it at this present time. I make those memoranda for the information of those whom it may in future concern, and for those only, knowing that they will guard as I have guarded, the honor of the house of Seth-Linlithgow.

Signed with my hand and sealed with my scal,

Alexander Seton

Of the Village of Seton, physician and surgeon.

to the end, Lord Wellrose folded it After reading this strange document carefully and held it in his hand, and fell into deep thought.

Dr. Kinlock refrained from breaking in upon his reverie. At length Lord Wellrose inquired:

while he, the younger, had always lived in the heaven of family love, and intellectual culture, enjoying privileges that should are blessings of beth.

But now fell instice must be done to finat deeply injured elder brother. As wheaver cost to himself, the younger, or to anyone else.

As he could not sleep, he drew his clear to the table, drew writing materials toward him and verte two letters. The first and least innecreated to the house opened and aired, and rooms got ready to receive him and toss gaests, who expected to reach Scton on the evening of the fourth day from the date of that lytter The second, and nost innecreated to his father, the bulle of Cheviot, at

"At length, however, the old nurse, who had been Dr. Seton's only confederate in this 'pious fraud,' as the old doctor honestly considered it, came upon her deathbed, and, being smitten with remorse, summoned Magdalene thurst to receive her confession. And when Magdalene came she told the astonished woman of the fraud that had been put upon her. And then, before she could utter another word, she died, leaving the woman in perfect ignorance of the real parentage of her foster-child, or of any clue by which she might discover it." "The last part of this story I have beard already, from Benjamin. There the name of Benjamin Hurst. I took little account of it at the time." "It was the name he bore once, as I suppose you now know." said the Quick Help For Chest Soreness! All Congestion Made To Go Quickly!

Protest Against the Government's War Tax.

This month's Montreal Pharmaceutical Journal contains the following editorial protesting against the Dominion Government's plan of raising taxes for the sale of patent medicines. The article is well worth perusal:

Two very important meetings have just taken place in Montreal - the Wholesale Drug Association of Canada and the Proprietary Trade Association of Canada. These meetings were both held for the purpose of considering the war taxes proposed, and which very seriously affect both tne manufacturers of medicine and perfumes and the traffic of the distributors the wholesale druggists. A general meeting or the retail druggists has meeting or the retail druggists has been called and will take place this week. A reconsideration has been asked of the Government and a depu-tation will present the views of the trades interested at an early date.

objections to the new measure of taxation as voiced in these meet-ings with unanimity are several in The tax proposed, it shown amounted to from 15 to 40 per usual trade selling prices The tax being imposed on the price of sale at retail to the public represented on that basis of calculation from 10 per cent. to 20 per cent. No other business or industry was taxed to any business or industry was taxed to any such extent, and many important lines would actually face ruin if the meas-ure was persisted in by the Govern-

Instead of yielding for the war a large amount the prohibitory nature of the tax would defeat the object sought and ruin prosperous and legitimate business enterprise in manufacturing.

The Minister of Finance will be approached on the basis of asking inves-tigation in detail, it being claimed that tigation in detail, it being claimed that the treatment of the manufacturers and dealers as well, in the branch af-fected, is unfair and unjust. The goods involved, it can be shown cannot stand any such charge, and also have al-ready been taxed for the same pur-pose in respect to all the crude mater-ial employed in manufacturing and ial employed in manufacturing and producing same.

The general tariff advance of 71/2 per cent. applies to the ingredients used and as well also certain advances enand as well also certain advances en-acted last year at the "War Session" of Parliament. Alcohol is one im-portant item with many manufacturers who have to bear the Inland Revenue tax of 3.96 per gallon on spirits. In principle it cannot be held as just to principle it cannot be held as just to tax ope and the same article under several headings. It is a tax on the poor and sick. The manufacturers cannot bear it on goods that can continue in sale—medicines are the poor man's doctor. This attribute of proprietary medicine was recognized by the Government of the United States only recently. Perfumes were taxed by stamp, but medicines were struck from the proposed tax list in recent from the proposed tax list in recent revenue measure brought about through the present war affecting the income of that Covernment. hoped the Government will reconsider and it is confidently expected this will be the case if the Minister will look into the details available, which onstrate that an injustice is being done by the action proposed, and which cannot have had mature or careful consideration by the officers of department recommending. MISS THE REAL CAUSE.

HER MISSING NECKLACE.

Saint-Hilaire Finally Awoke and Restored It to His Wife.

The innocent ignorance of much engrossed men of science as to ordinary matters is illustrated by an amusing anecdote of Geoffroy Saint-Hilaire the younger. Saint-Hilaire was accus-tomed to bury himself in his labora-tory, where he did not allow the affairs of his household to disturb him, and Mme. Saint-Hilaire was careful to guard him against all worry of domes

tic matters.
In his laboratory he was accustomed, being a naturalist, to have various strange animals, after the fashion of Rossetti. Of these a monkey was or Rossetti. Of these a monkey was his favorite. His wife possessed a necklace of diamonds, of which she was naturally proud. One day this necklace was missing. Madame was in despair and had the house searched, with the acception of Saint History. with the exception of Saint-Hilaire's room. She knew his dislike of being disturbed, and moveover she had not disturbed, and moveover she had not entered this room for a long time, so that she could not have left the dia-

that she could not have left the diamonds there.

A few days later at one of Mme.
Saint-Hilaire's "at homes" her husband appeared, and a woman among the guests who supposed he knew of the disappearance of the disappearance the disappearance of the diamonds asked him if they had been found.
"What diamonds?" he asked. He

called his was and questioned her.
"What sort of a looking thing was this that you have lost?" e described the diamond necklace.

"Ah," said the zoologist, "for several days my baboon has had in his posession, generally worn about his neck, a similar thing to that described."
"But why did you not tell me?" his exclaimed in indignation.

"Why," answered Saint-Hilaire, "I supposed that it belonged to him. He eemed to be very fond and proud of

Naval Collision Mats.

The collision mat, which is carried The collision mat, which is carried by all warships, is a very valuable part of the vessel's equipment and often prevents a ship sinking when she has been badly hit by the enemy. The mat varies in size from ten to fifteen feet square and is made of sail-cloth into which has been inter-woven a number of "thrums" or pieces of tarry hemp closely knif topieces of tarry hemp closely knit to-

In case of the vessel being damaged In case of the vessel being damaged by shells or collision the mat is low-ered and held over the hole by tho ropes which are attached to it. The pressure of the water forces the

mat closely over the gap and thus temporarily stops the leak till it can be closed from within.

FIRST AID FOR **WEAK DIGESTION**

Like Nearly Every Trouble Afflicting Mankind Is Indigestion Due to Poor Blood.

Almost everybody experiences times when the organs of digestion show painful signs of weakness. Some slight disturbance of the health starts the trouble; then the patient takes a dislike to food, and dull, heavy pains in the abdomen give warning that the distinct to 100d, and dull, neavy pains in the abdomen give warning that the stomach is unable to do its proper work. Sometimes a false craving for food arises; if this is satisfied the result is additional torruse flatulance. sult is additional torture-flatulence, a drowsy depression, sick headache and nausea are common signs of indigestion. The foolish practice of takgestion. The foolish practice of taking drastic, weakening purgatives at such times should be avoided. Indigestion arises from stomach weakness and the only effectual method of curions the story of th ing the trouble is to strengthen the feeble organs of digestion by supplyreceive organs of ulgestion by supplying them with richer, purer blood. This is the true tonic treatment by which natural method, Dr. Williams' Pink Pills achieve great results. These pills make the rich, red blood needed to strengthen the stomach, thus imto strengthen the stomach, thus imparting a healthy appetite and curing indigestion and other stomach-disorders. Mr. Thomas Johnson, Hemford, N. S., says: "For five years I was a great sufferer from indigestion which wrecked me physically. I suffered so much that for days at a time I could not attend to my business. I had smothering spells so bad at times that I was afraid to lie down. I doctored and tried many medicines, but with no benefit. I saw Dr. Williams' Pink and tried many medicines, but with no benefit. I saw Dr. Williams' Pink Pills advertised to cure the trouble and decided to try them. I had not been taking them long before I found that I had at last hit upon the right medicine. This improvement in my that I had at last hit upon the right medicine. This improvement in my health was constant, and after I had used ten or twelve boxes I could eat and digest all kinds of food, and I felt physically better than I had done for years. I shall never cease to praise Dr. Williams' Pink Pills for they proved a real blessing to me."

You can get these pills from any dealer in medicine or by mail at 50

CARRIES DAVIES ACQUITTED.

Jury Finds Her Not Guilty of Murder In Massey Case.

TORONTO, March 1 .- Loud cheers from a crowded court room greeted the verdict of not guilty which freed Carrie Davies of the charge of killing Charles Albert Massey in the criminal assizes on Saturday at 12.30. The young woman whose fortitude has been remarkable throughout the whole trial broke down and wept when the words were spoken. The police woman at her side led her out of the dock toward her sister, Mrs. Fairchild, and the two kissed each other affectionately

"Perhaps the jury has taken a view of the case not absolutely in accordance with strict rules, but they have rendered substantial justice," said Chief Justice Mulock. "I think when you committed the act of killing Mr. Massey you practically had lost all control of yourself. moment of having a guilty intent or really appreciating what you were about to do. You have had a very strict bringing up by your parents, and you have maintained the highest regard for honor, morality and wo-manhood. It is this which caused you to take the stronger view of what Mr. Massey had done, but notwith-standing, your education and your training were such as to fill you with alarm at the possible consequences of meeting him again under the circum-

"Through the very highest motives you did a thing you will regret all your life."

The verdict completely clears the ccused of any responsibility in connection with the death of Massey, as the jury had the option of bringing in either a murder verdict, a manslaughter verdict, or one of not guilty.

Offer of Sharpshooters Declined. LONDON, March 1.-Lord Cheylesmore, presiding at the winter meeting of the National Rifle Associations. said that he had asked the War Office if they would permit them to raise a battalion of Bisley shots. The War Office refused this request, so they had formed a school of muskethey had formed a school of musketry. The offer to place Bisley camp and ranges at the disposal of the army was at once accepted. After serious consideration the council had decided that it was impossible to hold a Bisley meeting this year.

Sunday Amusements To Be Tested. MONTREAL, March 1.— H. P. Hill, manager of His Majesty's Theatre, appeared before Recorder Semple Saturday charged with conducting a Sunday concert where admission was charged. The case is to be test-ed by the Lord's Day Alliance and has been brewing for some time past. Mr. Hill pleaded not guilty and will appear some time this month.

German Ghoul Sentenced. RENNES, France, March 1. — A German soldier named Carl Vogelsgang, of the 26th Saxon Infantry, a native of Eisleben, has been sentenced here by a French court-martial to military degradation and death, hav ing been found guilty of pillaging

ARTILLERY IS LANDED

Allied Forces Now Occupy Ruined Dardanelles Forts.

Inner Strongholds Were Under Fire Saturday and Those on European Side Have Been Silenced - Encampments of Soldiers Are Also Shelled — Constantinople Scared by Returning Wounded.

LONDON, March 1. — A despatch the Exchange Telegraph from Athens says:

"The allies have disembarked detachments of artillery near the de-stroyed Dardanelles forts and British and French flags are now flying over

"The fleet continued a bombard-The fleet continued a bombard-ment of the inner forts Saturday af-ternoon. A powder magazine was blown up. There were numerous vic-tims. The fleet had reached as far as the lighthouse, near Fort Kilid Bahr. The forts on the European side have been reduced to silence. Mine sweep-

ing operations continue.
"There are 50,000 Turks on the European side and 15,000 on the Asiatic side."

The allied fleet on Friday fired a thousand shells at the Dardanelles forts, says a despatch from the Athens' correspondent of the Havas Agency of Paris. The message continues

"The British fleet discharged its guns at a distance of 18 kilometres (about 12 miles). The battleship Gau-(French) distinguished herself, contributing largely to the destruc-tion of Fort Seddel-el-Bahr. Saturtion of Fort Seddel-el-Banr. Saturday forty vessels advanced as far as Fort Orkhanieeh and swept the Turkish encampments. They then bombarded In Tepeh, which they destroyed.

"Submarines, protected by French

"Submarines, protected by French vessels and aeroplanes, constantly moved about. Mine-dragging was effected methodically.

"According to information from authoritative sources the arrival of numerous injured soldiers caused a panic in Constantinople. Special trains are constantinople. trains are constantly under steam at Haidar Pasha ready to transport the imperial family and the treasury to

the interior of Asia.
"During the bombardment of Sedd-

"During the bombardment of Sedd-el-Bahr munition depots blew up, killing many defenders, among whom were numerous Germans."

After having completed the de-struction of the forts at the entrance of the Dardanelles, the allied fleet of British and Franch warrhing the British and French warships, the greatest which has ever been in action, is now attacking the inner fortion, fications which heretofore have stood between Turkey and invasion by the

More serious work is now ahead, for the all-important fortifications are at Kilid Bahr and Chanak, which are at Kilid Bahr and Chanak, which guard the narrowest part of the straits, which the fleet is now ap-proaching. There is no doubt, how-ever, that the allied commanders have instructions to make their way to Constantinople in spite of all ob-stacles and have heep supplied with stacles, and have been supplied with the best means for carrying out these

orders.
The Fort Dardanus, which the ships attacked Friday after the entrance to the straits had been swept of mines, is not far from the narrows, and it is probable that the big, and more important attack has begun by this

Reports from neutral Balkan states say that the residents of the islands in the Sea of Marmora have been ordered to evacuate their homes, that an imperial train is waiting to take the Sultan to Asia Minor.
The Admiralty's Saturday night

statement says: "The entrance to the Dardanelle as guarded by four principal fort namely, Fort Erthogroli, Fort Sed-dul Bahr, Fort Orkhanish Tabia and Fort Kum Kalossi Tabia, which will be described as forts A, B, C, and D. These forts were armed as follows: two 9.2 guns; B, six 10.2 guns; two 9.2 guns; D, four 10.2 guns and two 5.9 guns.

"The weather having improved, although the wind was still from the south, the attacks on these forts was sumed Thursday morning (Feb. 25) at 10 o'clock. The Queen Elizabeth, Agamemnon, Irresistible and Gaulois Agamemnon, irresistible and daulois began by deliberately bombarding forts A, B, C, and D respectively at long range. Fort A replied. One shell at 11,000 yards hit the Agamemon billion these more properties. emnon, killing three men and ser-ously wounding five. The Irresistible and Gaulois made excellent progress on forts C and D, while the Queen Elizabeth concentrated with great ac

curacy on fort A, putting both of its guns out of action by 11.30 a.m. "The Vengeance and Cornwallis "The Vengeance and Cornwere then run in under cover of range fire and engaged fort A at close range. The reduction of the fort was completed, while forts C and D pened a very slow and inaccurate

fire.
"The Suffern and Charlemagne "The Suffern and Charlemagne next delivered an attack on forts C and D, advancing to within 2,000 yards of them. It was then seen that they were in no condition to offer an effective resistance. The Vengeance, Triumph and Albion were then ordered in to complete the reduction of the forts. All four were reduced by 5.15 n.m. 5.15 p.m.

"Sweeping operations, covered by a division of battleships and destroyers, were immediately begun. The enemy set fire to a village at the entrance as darkness fell.

trance as darkness fell.

"A report has been received of the operations of Feb. 26. The straits had been swept up to four miles from the entrance. The Albian and Majestic, supported by the Vengeance proceeded to the limit of the swept area and began an attack on Fort Dardanus and some new batteries which had been erected on the Asia tic shore. The fire in reply was in-effective."

Frank Lunny, a Winnipeg fireman. died of injuries sustained when the hose wagon on which he was riding collided with a street car.

VICTORY IS INCREASING

Russian Triumph at Przasnysz Spreads Over Wider Area.

Value of German Advance In East Prussia and Northern Poland Is Destroyed by Russian Coup and German Strategic Points Are Threatened by Slavs-Big Battle Certain In the South.

LONDON, March 1. - The most cheering news from Russia for some time was given out by the Petrograd War Office Saturday night, when it reported that the German retreat, which began at Przasnysz is spread-ing over a constantly widening front which began at Pizzshysz is spreauing over a constantly widening front,
and in some places is assuming a disorderly rout. Forty officers and
3,600 soldiers have been taken prisoners and the Russian captures are
constantly increasing, while the Cossacks are giving most effective pursuit. The town of Przasnysz, which
the Germans had occupied, was recaptured by the Russians. On the rest
of the front the Germans have appeared to pass to the defensive, where
they are not retiring.
Russian advance guards have been ing over a constantly widening front,

Russian advance guards have been engaged with the enemy on the roads to Symo and Sorey, from the left bank of the Niemen. North of Grodno the enemy confined his operations to

an intense fire.
The Daily News has the following despatch from Frederick Rennet, its Petrograd correspondent:

"Against the central German col-um in north Poland the Russians on Friday delivered a determined attack. The Germans held the line stretching thirty miles through the Przasnysz region. Przasnysz is at the junction of the only system of causeway roads in north central Poland. They are able to support motor traffic from Soldau and Mlawa, and also westward to Plotsk and southward to Narew. Near Pultursk the Germans assembled a vast quantity of motor vans for a swift raid upon the Narew, with the object of reaching the railway northregion. Przasnysz is at the junction of object of reaching the railway north-east of Warsaw, but the Russians ateast of warsaw, but the reasonable attacked with a number of swift armored cars with light guns.

"Capt. Gourdon, the pioneer of this

arm, dashed within thirty paces of a German field battery and shot down the gunners, but he himself was killed and his adjutant, Prince Vatch-

adse, was wounded.
"The Russian infantry repeatedly broke the German line, about half of which seemed to be composed of raw recruits or old Landsturm men. They began to surrender early in the afternoon in big groups. Young German cuirasseur officers were commanding the infantry companies, and Uhlan captains were commanding battalion. Close fighting brought the Russians across the main roads immediately southward and westward of Przasnysz. The German infantry fled in disorder towards Soldau, clamber-Przasnysz. The German infantry fled in disorder towards Soldau, clambering upon the motor vans, hundreds of which were packed along the roadside. The Russian artillery, however, shot off many of their wheels, and the road was choked as darkness approached, bringing deeper confusapproached, bringing deeper confus-ion. The greater part of two regi-ments surrendered outside the town at 11 o'clock at night. The Russians re-entered the town, where they took vast quantities of ammunition and supply wagons.

"This victory more than destroys the value of the German advance east-ward and southward, and the Mazu-rian Lakes northward advance of the Russians from Przasnysz again threatens the Soldau-Niedenburg tailway and prevents the Germans from further increasing their forces against the Neimen river line. The Germans are shelling Ossoviec fortress with 11 and 19 but sorties from the garrison captured several scouting parties which were attempting to establish obser-vations points for the German artil-These howitzers had been exchanged by the Austrians for the German guns, which are now shelling the Russian position on the Dunaketz, especially south of Tarnow, in south-

The Russians are increasing their advantage over the Austrians in the region of Stanislau. They seized the outer screen of villages west and south of the Austrian army. Another column from the Dniester presses from the north. The position is regarded as ready for a big battle.'

No Reduction In Prices.

ST. CATHARINES, March 1.—Although it was reported to the Lincoln and Welland Vegetable and Fruit Growers' Association, at a meeting here, that the Dominion Canners had refused to retain the old price of 30 cents per bushel for to-matoes for canning, a resolution to reseind the motion passed a few weeks ago, pledging the members to decline to accept the lower price, failed to receive a seconder, and the chief topic of discussion was that the **crop** of tomatoes should be curtailed this year, and the growers should go into raising more staple foods, such as beans and grains, and thus help the patriotism and production movement.

Russians Abroad Must Serve. LONDON, March 1 .- The Russian consul-general here has issued a statement received from Petrograd announcing that Russians abroad will henceforth be liable to military service and must return immediately to Russia. Those belonging to the classes called to the colors who remain abroad after March 1 will be liable to punishment, according to the Russian law.

Strike Is Called Off.

GLASGOW, March 1. - The peremptory order of the Government on Friday for the resumption of work to-day by the shipyard engineers at the Clyde yards, who went on strike for an increase in wages has produced speedy results. Committees representing the strikers decided Saturday to advise the men to return to work immediately.

CARRIES DAVIES ACQUITTED.

Jury Finds Her Not Guilty of Murder In Massey Case.

TORONTO, March 1.-Loud cheers from a crowded court room greeted the verdict of not guilty which freed Carrie Davies of the charge of killing Charles Albert Massey in the crimcharles Affort Massey in the criminal assizes on Saturday at 12.30. The young woman whose fortitude has been remarkable throughout the whole trial broke down and wept when the words were spoken. The police woman at her side led her out of the dock toward her sister, Mrs. Fairchild, and the two kissed each

other affectionately.

"Perhaps the jury has taken a "Perhaps the jury has taken a wiew of the case not absolutely in accordance with strict rules, but they have rendered substantial justice," I strict Mulock. "I Chief Justice Mulock. "I when you committed the act of killing Mr. Massey you practically had lost all control of yourself. Therefore you were incapable moment of having a guilty intent or really appreciating what you were about to do. You have had a very about to do. You have had a very strict bringing up by your parents, and you have maintained the highest regard for honor, morality and womanhood. It is this which caused you to take the stronger view of what Mr. Massey had done but not not standing, your education and your training were such as to fill you with alarm at the possible consequences of meeting him again under the circum-

'Through the very highest motives you did a thing you will regret all your life."

The verdict completely clears the accused of any responsibility in connection with the death of Massey, as the jury had the option of bringing in either a murder verdict, a man-slaughter verdict, or one of not

Offer of Sharpshooters Declined.

LONDON, March 1 .- Lord Cheylesore, presiding at the winter meeting of the National Rifle Associations, said that he had asked the War Office if they would permit them to raise a battalion of Bisley shots. The War Office refused this request, so they had formed a school of musketry. The offer to place Bisley camp and ranges at the disposal of the army was at once accepted. After serious consideration the council had decided that it was impossible to hold a Bisley meeting this year.

Sunday Amusements To Be Tested. MONTREAL, March 1. — H. P. Hill, manager of His Majesty's Theaere, appeared before Recorder Sem ple Saturday charged with conducting a Sunday concert where admission was charged. The case is to be test was charged. The case is to be tested by the Lord's Day Alliance and has been brewing for some time past. Mr. Hill pleaded not guilty and will appear some time this month.

German Ghoul Sentenced.

RENNES, France, March 1. — A German soldier named Carl Vogelsgang, of the 26th Saxon Infantry, a native of Eisleben, has been sentenced here by a French court-martial to military degradation and death, having been found guilty of pillaging while under arms, of arson, and of despatching French wounded.

ARTILLERY IS LANDED VICTORY IS INCREASING

Allied Forces Now Occupy Ruined Dardanelles Forts.

Inner Strongholds Were Under Fire Saturday and Those on European Side Have Been Silenced — Encampments of Soldiers Are Also Shelled — Constantinople Scared by Returning Wounded.

LONDON, March 1. — A despatch the Exchange Telegraph from

"The allies have disembarked detachments of artillery near the destroyed Dardanelles forts and British and French flags are now flying over

them.
"The fleet continued a bombardment of the inner forts Saturday afternoon. A powder magazine was blown up. There were numerous victims. The fleet had reached as far as the lighthouse, near Fort Kilid Bahr. The forts on the European side have been reduced to silence. Mine sweep-

ing operations continue. "There are 50,000 Turks on the European side and 15,000 on the Asiatic side."

The allied fleet on Friday fired a thousand shells at the Dardanelles forts, says a despatch from the Athens' correspondent of the Havas Agency of Paris. The message con-

"The British fleet discharged its guns at a distance of 18 kilometres (about 12 miles). The battleship Gaulois (French) distinguished herself, contributing largely to the destruction of Fort Seddel-el-Bahr. Satur-day forty vessels advanced as far as Fort Orkhanieeh and swept the Turkish encampments. They then bombarded In Tepeh, which they de-stroyed

"Submarines, protected by French vessels and aeroplanes, constantly moved about. Mine-dragging was ef-

feeted methodically.

"According to information from authoritative sources the arrival of numerous injured soldiers caused a panic in Constantinople. Special rains are constantly under steam at Haidar Pasha ready to transport the imperial family and the treasury to the interior of Asia.

"During the bombardment of Sedd-el-Bahr munition depots blew up,

el-Bahr munition depots blew up, killing many defenders, among whom were numerous Germans."

After having completed the destruction of the forts at the entrance of the Dardanelles, the allied fleet of British and French warships, the greatest which has ever been in action, is now attacking the inner fortifications which heretofore have stood fications which heretofore have stood between Turkey and invasion by the

More serious work is now ahead, for the all-important fortifications are at Kilid Bahr and Chanak, which guard the narrowest part of the straits, which the fleet is now approaching. There is no doubt, however, that the allied commanders the arrived commanders have instructions to make their way to Constantinople in spite of all obstacles, and have been supplied with the best means for carrying out these

orders. The Fort Dardanus, which the ships attacked Friday after the entrance to the straits had been swept of mines, is not far from the narrows, and it is probable that the big, and more important attack has begun by this

Reports from neutral Balkan states say that the residents of the islands in the Sea of Marmora have been ordered to evacuate their homes, that an imperial train is waiting to take the Sultan to Asia Minor.

The Admiralty's Saturday night The entrance to the Dardanelle was guarded by four principal namely, Fort Erthogroli, Fort Sed-dul Bahr, Fort Orkhanish Tabia and Fort Kum Kalossi Tabia, which will described as forts A, B, C, and D. nese forts were armed as follows: two 9.2 guns; B, six 10.2 guns; two 9.2 guns; D, four 10.2 guns

nd two 5.9 guns.

"The weather having improved, although the wind was still from the south, the attacks on these forts was resumed Thursday morning (Feb. 25) at 10 o'clock. The Queen Elizabeth, Agamemnon, Irresistible and began by deliberately bombanding forts A, B, C, and D respectively at long range. Fort A replied. One shell at 11,000 yards hit the Agamemnon, killing three men and seriously wounding five. The Irresistible and Gaulois made excellent progress on forts C and D, while the Queen Elizabeth concentrated with great uracy on fort A, putting both of its

guns out of action by 11.30 a.m.
"The Vengeance and Cornwallis were then run in under cover of long range fire and engaged fort A at close range. The reduction of the fort was completed, while forts C and D pened a very slow and inacqurate

fire.
"The Suffern and Charlemagne next delivered an attack on forts C and D, advancing to within 2,000 yards of them. It was then seen that yards of them. It was then seen that they were in no condition to offer an effective resistance. The Vengeance, Triumph and Albion were then or-dered in to complete the reduction of the forts. All four were reduced by .15 p.m.

"Sweeping operations, covered by a division of battleships and destroy-ers, were immediately begun. The enemy set fire to a village at the entrance as darkness fell.
"A report has been received of the operations of Feb. 26. The straits

a report as been received of the operations of Feb. 26. The straits had been swept up to four miles from the entrance. The Abbin and Majestic, supported by the Vengeance proceeded to the limit of the swept area and began an attack on Fort Dardanus and some new batteries. Dardanus and some new batteries which had been erected on the Asiatic shore. The fire in reply was in-effective."

Frank Lunny, a Winnipeg fireman, lied of injuries sustained when the nose wagon on which he was riding collided with a street car.

Russian Triumph at Przasnysz Spreads Over Wider Area.

Value of .German Advance In East Prussia and Northern Poland Is Destroyed by Russian Coup and German Strategic Points Are Threatened by Slavs-Big Battle Certain In the South.

LONDON, March 1. — The most cheering news from Russia for some time was given out by the Petrograd War Office Saturday night, when it reported that the German retreat, which began at Przasnysz is spreading over a constantly widening front. ing over a constantly widening front, and in some places is assuming a disand in some places is assuming a disorderly rout. Forty officers and 3,600 soldiers have been taken prisoners and the Russian captures are constantly increasing, while the Cossacks are giving most effective pursuit. The town of Przasnysz, which the Germans had occupied, was recaptured by the Russians. On the rest of the front the Germans have appeared to pass to the defensive, where they are not retiring.

they are not retiring.
Russian advance guards have been engaged with the enemy on the roads to Symo and Sorey, from the left bank of the Niemen. North of Grodno the enemy confined his operations to

an intense fire.

The Daily News has the following despatch from Frederick Rennet, its Petrograd correspondent:

"Against the central German column in north Poland the Russians on Friday delivered a determined attack. The Germans held the line stretching thirty miles through the Przasnysz region. Przasnysz is at the junction of the only system of causeway roads in north central Poland. They are able to support motor traffic from Soldau M'awa, and also westward to Plotsk and southward to Narew. Near Pultursk the Germans assembled a vast quantity of motor vans for a swift raid upon the Narew, with the object of reaching the railway northeast of Warsaw, but the Russians attacked with a number of swift armored cars with light guns.

"Capt. Gourdon, the pieces of this."

"Capt. Gourdon, the pioneer of this arm, dashed within thirty paces of a German field battery and shot down the gunners, but he himself was killed and his adjutant, Prince Vatchnades, was wearen. nadse, was wounded.

The Russian infantry repeatedly broke the German line, about half of which seemed to be composed of raw recruits or old Landsturm men. They began to surrender early in the afternoon in his afternoon in big groups. Young German cuirasseur officers were commanding the infantry companies, and Unian captains were commanding battalion. Close fighting brought the Russians across the main roads immediately southward and westward of Przasnysz. The German infantry fled in disorder towards Soldau, clambering upon the motor soldau, clamber-ing upon the motor vans, hundreds of which were packed along the road-side. The Russian artillery, how-ever, shot off many of their wheels, and the road was choked as darkness approached, bringing deeper confus-ion. The greater part of two maion. The greater part of two regiments surrendered outside the town at 11 o'clock at night. The Russians re-entered the town, where they took vast quantities of ammunition and supply wagons.

"This victory more than decision."

"This victory more than destroys the value of the German advance eastward and southward, and the Magurian Lakes northward advance of the Russians from Przasnysz again threatens the Soldau-Niedenburg tailway and prevents the Germans are shelling Ossowiec fortress with 11 and 12-inch howitzers, but sorties from the garrison captured several scouting parties which were attempting to establish observations points for the German artillery. These howitzers had been exchanged by the Austrians for the German guns, which are now shelling the Russian position on the Dunaketz, especially south of Tarnow, in south-

eastern Galicia. "The Russians are increasing their advantage over the Austrians in the region of Stanislau. They seized the outer screen of villages west and south of the Austrian army. Another column from the Dniester presses from the north. The position is regarded as ready for a big battle."

No Reduction In Prices.

ST. CATHARINES, March 1 .- Although it was reported to the Lin-coln and Welland Vegetable and Fruit Growers' Association, at a meeting here, that the Dominion Canners had refused to retain the old price of 30 cents per bushel for tomatoes for canning, a resolution to rescind the motion passed a few weeks ago, pledging the members to decline to accept the lower price, failed to receive a seconder, and the chief topic of discussion was that the crop of tomatoes should be curtailed this year, and the growers should go into raising more staple foods, such as beans and grains, and thus help the patriotism and production movement.

Russians Abroad Must Serve. LONDON, March 1.—The Russian consul-general here has issued a statement received from Petrograd announcing that Russians living abroad will henceforth be liable to military service and must return im-mediately to Russia. Those belonging to the classes called to the colors who remain abroad after March 1 will be liable to punishment, according to the Russian law.

Strike Is Called Off.

GLASGOW, March 1.— The peremptory order of the Government on Friday for the resumption of work to-day by the shipyard engineers at the Clyde yards, who went on strike for an increase in wages has produced speedy results. Committees representing the strikers decided Set presenting the strikers decided Sat-urday to advise the men to return to work immediately.

OBITUARY

Charles Richard Green

While bagging straw in his barn at the Tin Cap on Feb. 27 at 8.30 preparatory to removing to Brockville, Mr Charles Richard Green, one of Eliza-bethtown's best known residents, suddenly collapsed and expired. Assisting him in the work was Alonzo Vout, who immediately gave the alarm. The deceased fell and expired immediately.

The late Mr Green was born on the farm on which he died. Recently he decided to live a retired life and sold his farm, its stock and implements. He had rented a dwelling on Pearl street and part of his furniture is already here. his intention being to complete the removal next week. Besides his wife, who was Miss Martha Rath, of Kemptville, deceased is survived by one sister and two brothers, namely, Mrs W. H. Webster, Bellamy's; Messrs George Green, Boston, Mass.; and Edward Green, of Cornwall. In religion the late Mr Green was an An-

The funeral took place from his late residence Monday afternoon at 2 o'clock to the Brockville cemetery vault .- Brockville Recorder.

John McMachen

The death coursed Sunday morning of Mr John McMachen, who resided with his son, Mr Jonah McMachen, on the second concession of Elizabethtown. He had been ill about two months. He was 78 years of age and was born in the township of South Crosby near portion of his life, taking up residence with his son five years ago.

He followed farming all his life. He leaves to mourn his loss one son, Jonah, of Elizabethtown, and one daughter, Mrs Samuel Godkin of Lyndhurst. He also is survived by three brothers, viz.: Wilson McMachen of Elgin, Thompson McMachen of Plum Hollow, and William McMachen in Michigan. He was a life-long Methodist in religion and a true type of Canadian manhood. The remains were taken on Monday to his daughter's home near Lyndharst and the funeral was held on Tuesday afternoon. -Recorder.

D. Edith Wiltse

The death occurred at Legrand, Michigan, on Saturday evening, Feb. 20th, of D, Edith Wiltse, fourth daughter of the late Smith Wiltse and beloved wife of Dr A. W. Truesdell. The deceased passed away after a lingering illness of several months, being in her fifty-tourth year.

She leaves to mourn her loss, besides her husband, two sisters and two brothers, Mrs A. J. Love, Lyndhurst; Mrs G. E. Thomas, Bellevue, Kentucky and John Wiltse of Escott and Clayton Wiltse of Athens. Her many triends extend to the bereaved relatives their sincere sympathy.

GEO. E. McGLADE, CITY AGENT of the Village of Athens on February Fifth, 1915 Brockville City Ticket and Telegraph Office, east corner King Sc. and Court House Ave,

By-Law No. 207 February

A By-Law of the Village of Athens in the County of Leeds to License and Regulate Owners and Keepers of Stores and Shops (other than Taverns and Shops holding Licenses under the Liquor License Act) where Cigarettes are sold by retail.

Whereas Municipal Councils are empowered by Section 583, Sub-section 28 of the Consolidated Municipal Act, 1903, to pass By-Laws for licens. ing and regulating the owners and keepers of stores and shops (other than taverns and shops holding licences under the Liquor License Act) where tobacco, cigars or cigarettes are sold by retail :

And Whereas it is desirable and in the public interest that the sale of cigarettes in the Village of Athens by stores and shops (other than tayerns and shops holding license under the Liquor License Act) should be licensed; Therefore the Municipal Council of the Corporation of the Village of

Athens enacts as follows: 1. One moth after the passing of this By-Law and upon the first day of January in every ensuing year there shall be taken out by every owner or keeper of a store or shop (other than the owner or keeper of a tavern or shop holding a license under the Liq-uor License Act) in the Village of Athens, who sells or keeps for sale by retail any cigarettes, cigarette wrap pers or cigarette tobacco, a license, for which said license the person or persons obtaining the same shall pay at Jones' Falls, where he spent the major the time of taking out such license the sum of Seventy-five Dollars.

2. One month after the passing of this By-Law, every owner of a store or shop in the said Village of Athens who either directly or indirectly sells by retail any cigarettes or cigarette wrappers or cigarette tobacco, unless such owner or keeper of shop have previously taken out the License required under this By-Law, shall for each offence be liable to the penalty hereinafter enacted for an infraction of this By Law.

3. It shall be lawful for any Constable or Peace Officer in the Village of Athens or for any person appointed by the Corporation for the purpose, to enter into any shop or store where it cigarettes are sold is suspected that and to demand of the owner thereof to be shown any cigarettes which he has in stock and to make a memorandum of same for such purpose as the same may at any time be required.

4. Notwithstanding anything hereinbefore contained the Municipal Council of the Village of Athens may by resolution reduce the amount of the license fee for the remainder of the current year to such a sum as they may think desirable, provided, how ever, that such sum shall not be less than will amount to at least 625 Dollars per month for every month during which the license is granted during the year 1915.

5. Every license issued under the provisious of this By-Law shall signed by the Reeve and by the Clerk of the Village of Athens and shall have attached thereto the Corporate Seal of the said Village and may be in the form following:

Received from in consideration of which the said on the First Day of January, A. D., 19 and ending on the Thirty-first Day of December, A.D., 19....

.......... Clerk Reeve Seal

6. Every holder of a license to sell cigarettes by retail shall keep the said license prominently posted up in t e store or shop where such sales take

7. Any person or persons guilty of an infraction of any of the provisions of this By-Law shall upon conviction before the Reeve or any Justice or Justices of the Peace of the United Counties of Leeds and Grenville on the oath or information of any credible witness torfeit and pay at the discre tion of the said Reeve, Justice or Justices convicting, a penalty not exceeding Fifty Dollars for each offence, exclusive of costs, and in default of payment thereof forthwith it shall and mavabe lawful for the Reeve, Justice or Justices aforesaid to issue a warrant under his hand and seal to levy the said penalty and costs, or costs only, by distress and sale of the ollender's or offenders' goods and chattels and in case of no sufficient distress to satisfy the said penalty and costs, it shall and Reduced Fares in effect March 1st may be lawful for the Reeve, Justice or Justices convicting, as aforesaid, to commit the offender to the common gaol of the United Counties of Leeds and Grenville for any period not exceeding twenty one days unless the fine inflicted, and the costs, if any, in cluding the costs of the distress and of the committal and conveyance of the offender to the gaol be sooner paid.

Passed, signed and sealed in open Council this Fifth day of February, A.D., 1915. G. E. Holmes,

Reeve I hereby certify that the above is a true copy of a By-Law passed by the Municipal Council of the Corporation

State-Aided Mining. In every Australian state the Govin every Australian state the Government gives liberal assistance to the mining prospector, and one of the best means adopted is that of establishing reduction plants where the mineral ores are treated cheaply for the individual prospectors. In Western Australia 52 Government betteries have been established the western Australia 52 Government batteries have been established, the capital cost being \$1,500,000, and during the past fifteen years they have returned to the prospectors gold to the value of \$2,000,000. Some of the most prosperous mining districts in Western Australia over their existin Western Australia owe their exist ence to the provision of public-crushing facilities by the Government.

Parliamentary Courtesy. The story is told of one all night sitting of the British House of Com-mons, during which one member, who was sleeping in one of the division lobbics with his handkerchief over his face, was allowed to remain undis-turbed throughout the voting by members of each side who thought he "one of the other side."-Pall

BLUNDERS OF ARTISTS. Curious Examples In the Dome of the

National Capitol. In the dome of the capitol at Washington there are eight great paintings carefully designed and executed by the artists for the adornment of the nation's greatest building. Yet five of them are either defective in technique or in error as to natural or historical facts.

One of the best known pictures is that in which Washington is shown resigning his commission to the Continental congress. There are two young girls, almost life size, standing in the foreground. They are very pretty young girls, but one of them has three hands. One left hand rests on the shoulder of her companion; another left hand is round her companion's waist. Doubtless the artist Trumbull painted both hands to see which pose he preferred and then forgot to paint out the superfluous hand.

Diagonally across the rotunda is the painting of the baptism of Pocahontas. Sitting in the foreground is Opecan canough, the uncle of Pocahontas. He is barefooted, and the artist has given him six toes on his left foot.

In the painting of the landing of Columbus, which used to be reproduced on the five dollar banknote, the artist has painted three flags. They are very well drawn, but one is blowing east, one west and one south, which indicates a very variable condition of the wind on that famous day.

In the picture of the surrender of Cornwallis General Washington is conspicuous seated upon a white horse. is hereby licensed | But General Washington was not presto sell cigarettes in the Village of Ath- ent at the surrender. Cornwallis did not surrender his army in person, but sent a subordinate officer to do so. Ac cordingly Washington detailed an officer of corresponding rank to receive the surrender. It would have been a breach of military etiquette for Wash: ington to be present.

The fifth picture, "Signing of the Declaration of Independence at Philadelphia on July 4, 1776," is wrong only in the title. The Declaration of Inde-pendence was adopted on July 4, but it was not signed by the members of the congress until Aug. 2, 1776 .-Youth's Companion.

No Use For Fresh Air. Old time doctors had no faith in the virtues of fresh nir. Andrew Boorde in his "Compendyous Regyment of Dietary of Helth." published 1542. writes: "To bedward and also in the morning use to have a fire in your chamber, to waste and consume evil vapours within the chamber, for the breath of man may putrify the air within the chamber. In the night let the windows of your house, specially of your chamber, be closed, let your nightenp be of scarlet, and this, I do dvertise you, to cause to be made a good thick quilt of cotton, or else of pure flocks or of clean wool, and let the covering of it be of white fustian and lay it on the feather bed that you do lie on."-London Chronicle

GOODBODY-WHITE

In the Methodist church at Soperton at 8 o'clock on Thursday evening last a very pretty wedding took place when Rev R. Calvert, B.D., united in marriage Miss Drina White, daughter of Mr and Mrs Edwin White, Soperton, to Ralph Goodbody, son of Mr and Mrs W. H. Goodbody, Delta. The bride was attended by her sister, Miss Bertha White. Wilfrid Goodbody, brother of the groom assisted him.

Following the wedding ceremony the near friends and relatives of both families assembled at the home of the brides's parents, where a reception was

riends in Brockville. Mr and Mrs W. Halliday attended ome in Athens.

the funeral of the late Erastus Row-Owing to the storm on Wednesday placed in the Athens vault.

DEWELL-STANTON

Mr Thomas C. DeWell of Chantry and Miss Mattie A. Stanton were united in the holy bonds of matrimony on February 24 at the home of the bride's parents, Mr and Mrs George Stanton, Elgin. The ceremony was performed by Rev J. P. McFarlane of

the Elgin Methodist church. The parlor was tastily decorated with evergreens, the arch bearing "DeWell-Stanton" in large white letters, and a large wedding bell of the same color. At high noon the wedding march was played and sung by Mrs J. P. McFarlane and Mrs F. A. Stanton. Mr Hollis Chant was groomsman and Miss Sarah Stanton, bridesmaid. Luncheon was served on tables arranged in the form of an L, ornamented with tulips, daffodils and maiden hair fern.

Mr and Mrs DeWell spent their honeymoon at Ottawa and are now at home to their friends at their residence in Chantry.

FERGUSON-TENNANT

On February 24 at three o'clock at St. John's mause, Brockville, Rev S. S. Burns united in marriage Mr David Sanderson Ferguson and Miss Eula Elizabeth Tennant, both of Junetown. The contracting couple were attended by Mr and Mrs John Herbison.

PLUM HOLLOW

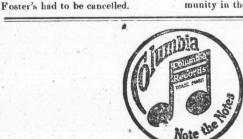

Mar. 1-On Wednesday afternoon last our neighborhood was saddened by the death of a much esteemed resident in the person of Mrs Coleman

Kilborn. The late Mrs Kilborn was 46 years of age. She had been in poor health for a number of years being a sufferer with the terrible disease tuberculosis. She underwent seven operations but to no avail. During her last sickness she bore her sufferings with patience and resignation.

She is survived by her husband. brothers, C. B. Barber, Plum Hollow, and E. C. Barber, Yonkers, N. Y.

The funeral which was largely attended was held in the Baptist church Rev Mr Hagar (Methodist) conducted the service assisted by Rev Mr Collins (Baptist) The body was

He's Back at Work Strong and Hearty

One More Splendid Cure By Doda's Kidney Pills.

Quebec Man who Suffered for a Long Time from Kidney Disease Finds a Complete Cure.

Allen's Mills, Portneuf, Co., Que. March 2.—(Special.) - Another splendid cure by Dodd's Kidney Pills is that of Michael Gauthier, a well-known resident of this place. Mr. Gauthier was for a long time a sufferer with a pain in his head caused by kidney casease, and at length got so bad the had to quit work. Dodd's coney Pills cured him. He is back at work, strong and hearty, and naturaily he feels that he wants all who suffer from kidney disease to know that they can find a cure in Dedd's

Kidney Pills.
For Dodd's Kidney Pills not cnly cure the pain or ache that is causing the most distress, they put the kloneys in good working, and all the impurities and poisons are strained out of the blood. The result is that new strength is carried to every part of the body. That's why so many sufferers cured by Dodd's Kidney Pills sum up their condition, "I feel like a new man." New energy is new life. You can't have it with sick kidneys. With healthy kidneys you must have it. Dodd's Kidney Pills must have it. Dodd's make healthy kidneys.

WHAT WAR MEANS

Wanton Destruction May Mark the Progress of an Army.

"All is fair in love and war," runs the old saying, and Mr. E. A. Vizetelly in his volume of reminiscences, "My Days of Adventure," proves the truth of it. Referring to the appearance of the railway station at Nantes during

the Franco-German war, he says:
"Never since have I seen anything
resembling it. A thousand panes of glass belonging to windows or roofing had been shivered to atoms. Every mirror in either waiting or refresh-ment rooms had been pounded to pieces, every gilt frame broken into little The clock lay about in fragments; account books and printed forms had been torn to scraps; parti-tions, chairs, tables, benches, boxes, nests of drawers, had been hacked, split, broken, reduced to mere strips of wood: the large stoves were over-turned and broken and the marble marble refreshment counter, some thirty feet long and previously one of the fea-tures of the station, now strewed the floor in particles, suggesting gravel It was indeed an amazig sight, the more amazing as no such work of destruction could have been accomplish-

without exertme labor.
When we returned to the inn for

dinner I asked some questions. "Who did it?" The first German troops that came

re, was the answer.
"Why did they do it? Was it hewires and destroyed some of the per-manent way?"

"Oh, no. They expected to find something to drink in the refreshment set about breaking the fixtures.

Minard's Liniment Cures Dandruff.

Radium in the Upper Atmosphere. Hess, of the Vienna Radium Institute, has recently published the results of some remarkable experiments. He has investigated the penetrating radiation which occurs in the upper atmosphere by means of balloon as-cents, and he arrives at the startling conclusion that at a height exceeding 2,000 metres there is a rapid increase in the intensity of the penetrating rays. At these heights the penetrating rays from the earth itself would be absolutely negligible, while that from the radium emanation in the air, which has its origin in the earth and is of limited life, must be, at any rate, less than at the surface. So that it would seem we must assume some extra-terrestrial source for these radia-The conclusion that a great part of the penetrating radium cannot from the known radio-active constituents of the earth and atmosphere is one that mus tevoke general interest, and calls for the further radio-active exploration of the upper

SOURCE OF SHELLAC.

Insects Producing It Are Victims of Their Own Industry.

of Their Own Industry.

Scale insects of the group coccidae are responsible for one of India's most interesting exports, lac, the export value of which amounts to nearly \$9,000,000 annually. Lac is the resinous exudation of the insect. The insects live upon the twigs of certain trees, and soon become covered with a resinous secretion that increases in thickness, protecting the body and the eggs.

When a colony, consisting of a few adult females and one or two males, find their way to a new branch, they attach themselves to the bark, and having pierced it with holes through which they draw up the resinous juices upon which they feed, they become fixed or glued by the superfluous excretion, and after a time die, the females forming by their dead bodies little domes or tents over the myriads of minute eggs which they have laid. In a short time the eggs burst into life, and the voung, which are very minute, swarm over the twig in such countless numbers as to give it the appearance of being covered with blood red dust. Generation after generation dwells upon the same twig until it is enveloped in a coating of the resinous exudation often half an inch thick.

In the beginning the insect was muchor collected for the dye in contrains.

resnous extuation often han an inch
thick.

In the beginning the insect was much
collected for the dye it contains. Later
when the use of the resin became known
the demand for the dye began to diminish, until now if has been almost completely displaced by coal tar colors. After separating the resin from the coloring metier the former constitutes the

PICTURESQUE ICE FIELDS.

Scenic Beauties of Uncle Sam's Glacier National Park.

That the ice fields of Glacier National Park present some of the best examples of active glaciers now found in the United States, is a statement made by W. C. Alden in a Government pamphlet. "They have a splendid setting in magnificent alpine scenery," says Mr. Alden, "unsurpassed in grandeur anywhere. Hidden away in the recesses of the mighty mountain ranges, these rare and wonderful features form a climax to many of the interesting trips open to the tourist. "There are in the park about ninety

There are in the park about ninety small glackers, ranging in size from Blackfeet glacier, with its three square miles of ice, down to masses but a few acres in extent, yet exhibiting the characteristics of the relations. characteristics of true glaciers. "After examining these features one

can easily picture to himself as he looks down the valleys the great rivers of ice which in ages past cascaded from the cliffs below the upper cirques, converging as tributaries from cirques, converging as tributaries from the many branch valleys and united in great trunk glaciers. In imagination he can see these great glaciers, many hundreds of feet in depth, filling the great mountain valleys from side to side and deploying thence upon the bordering plains. He seems to see cordering plains. He seems to these mighty engines plucking away the rock ribs of the mountains, smoothing, grinding and polishing the irregu-larities and sweeping away the debris to be spread on the plains below. These glaciers developed and extended three miles and efforcement when the three miles, and, after each develop-ment, the congealed masses matted away on the return of milder climatic conditions, until at length only the small cliff glaciers of the present day are left lurking in the protected re-cesses at the heads of the capacious

"Many of the rock walled amphi-"Many of the rock streams for theatres are no longer occupied by ice, but from all there issues streams fed by the melting snow or ice. These by the melting snow or ice. These plunge over the cliffs in beautiful, fooming cascades, and rush on down the mountain gorges. The melting glaciers left many inclosed basins, large and small, and in these the waters rest awhile, and mirror in their crystal depths the dark green of the surrounding forests, the rich colors of the rugged mountain walls and the deep blue of the cloud-flecked sky. On, again, from lake to lake, the waters flow and finally start down their long ccurses to the sca to merge at length with the chill waters of Hudson Bay, the balmy tides of the Gulf of Mexico or the rolling billows of the Pacific.

(London Advertiser) A section of the American press greatly agliated these days as to "sports" and "sportsmen." There is a vast guar-between the two. The spor sman plays the game, whatever its nature, for love of the game itself. He sticks to the rules and regulations in the spirit as well as the and regulations in the spirit as well as the letter. Defeat does not cast him down, and in victory ne does not "rub it into" his riva. On the other hand, the sport thinks of nothing but victory. His motto is to win by fair means if you can, but by foul means rather than lose. He becomes an adept at breaking the rules without being penalized and glories in it.

Somebody has said that as a man plays, so he lives. If that be true, there is danger of too many sports getting into our national life. We wart more of the sportsman's spirit in our social, commercial an political life. Slipperfness in our games tends to develop the same trait in the real business of life. When you want somebody to tie to, somebody who will play the game fair, you are going to pass up the sport in favor of the sportsman every time.

where The Keys of the Universe. In the year 1694 William Patterson

ounder of the Bank of Scotland, conceived the grand project of planting on the isthmus of Darien a British colony which, in his own words, "should secure for Great Britain the keys of the universe, enabling 'their possessors to give laws to both oceans and to become the arbiters of the com-mercial world." This colony was actually founded at a place still known as Puerto Escoces, but its people were The way to resumption is to resume. as Puerto Escoces, but its people were subsequently forced by the Spaniards to evacuate and return to Scotland.

OUTER FORTS OF THE DARDANELLES REDUCED

The Great Allied Fleet Completes First Part of Task.

Has Hard Work to Do'Ere Constantinople

London Cable.—The reduction of the all the forts at the entrance of the Dardanelles by the Anglo-French pattleship squadron is announced in the classification of the bread is obtainable, only black Anatolian flour ill-ground and mixed with all the forts at the entrance of the Dardanelles by the Anglo-French battleship squadron is announced in a statement issued late to-night by the Official Press Bureau. The allied fleet was able to attack the Turkish forts at close range. Rapid developments in the situation are expected, as the Admiralty states that

the operations are being continued. The statement issued by the Press Bureau says:

"The Secretary of the Admiralty announces that, the weather modersting, the bombardment of the outer forts of the Dardanelles was renewed at eight o'clock this morning (Feb. 25). After a period of longrange fire the squadron of battleships attacked at close range. All the forts at the entrance to the straits were successfully reduced and the operations are continuing."

AN IMPORTANT ACHIEVEMENT. The combined Anglo-French fleet, which consists of 32 ships, has been bombarding the positions at the entrance of the straits intermittently for more than two months.

The feat is regarded in official cir-

cles here as one of the most important accomplishments of the allied powers since the beginning of the war, and predictions are freely heard now that the fall of Constantinople will come before long. Naval experts, however, admit that this is perts, however, admit that this is merely the first step in a stupendous task, and that enormous efforts will be required to force a passage of the rest of the straits, which are lined with strong forts and modern defen-sive works for a distance of forty miles on both sides. Furthermore, the Turkish fleet, which, under such conditions, is not to be despised, is supposed to be stationed in Nagara at the narrowest part of the waterway, and extensive mine fields have been planted at strategic points. The allied fleet is under command

of Vice-Admiral Carden, and is the strongest aggregation of warships on the allied side with the exception of the British home fleet, it comprises vessels of all classes, including submarines and destroyers, and has a strong detachment of aeroplane and sea-planes convoyed by the aeroplane ship, Ark Royal.

The strongest units under the Brit-ish flag are the battle cruiser Inflexible, which carries 12-inch guns, and the battleships Agamemnon, Corn-wallis, Vengeance and Triumph. Under the French flag are the battle-ships Suffren, Gaulois and Bouvet. In addition to bombarding the Dardanelles the fleet has also paid some attention to the Turkish forts on the Island of Tenedos, in the Aegean, and It is said that seven warships did considerable execution there yesterday.

A PORT FOR RUSSIA.

One of the most important changes British foreign policy in the past added years was announced this hundred years was announced afternoon in the House of Commons Secretary, when he stated in reply to a question from the floor of the House that England is willing to abandon her traditional opposition to Russia's acquisition of a "warm water" port, and will support the intention recently expressed by M Sazanoff, the Russian Foreign Secretary, to the effect Russian Foreign Secretary, to the effect that Russia intends permanently to days to bring forces from Bukowina, occupy Constantinople.

Close upon this momentous declaration came the announcement that the Anglo-French Fleet, the medium through which Russia may eventually accomplish the extension of her subero of influence, had reduced the Turkish forts at the entrance, to the Dardanelles and a despatch from Salonica saying that the Ottoman Government was so much alarmed at the progress of the attack that crown jewels and the Government records had been removed to the interior. Previous advices have stated that the Ottoman archives had been taken to Adrian-

Turkish submarines Bosphorous are said to be showing activity in preparing to meet this

latest danger. PROVISIONS RUNNING SHORT. The Morning Post has received a despatch from a correspondent in Constantinople, dated February 17, in which he says: "Owing to the bad

potatoes. "A few English have been arrested and sent to the interior. The Sultan has everything ready to pack up and flee, as the Government fears sub-marines are coming up. I have a view of the sea from my window. and it was funny to see the torpedo boats steaming dead slow looking about for submarines. The Germans here also became very nervous at the time of the sinking f the Messudiyeh. "Enver Pasha came back and or-

dered a complete new outfit of uni-forms. I presume the Russians got the last lot. Troops have been drawn from Adrianople for a new army "When the submarine came up the Turks fortified Kadikeny and Prince's Island and dug trenches by the forts at Carak on the European side. The Turks were frightened out of their

NEXT MOVE

The British and French naval authorities do not fear the mined area as much as they do the forts, which they will now set about reducing and over which they will over which they will have the vantage of a preponderance of heavy guns. Hitherto the defences of the guns. Hitherto the defences of the straits have been almost impregnable, history recording only three instances n which warships have passed through without permission of the Turkish authorities.

Once into the Sea of Marmora the fleet will still have a hard fight to get to Constantinople, for Turkey has some modern submarines that are likely to prove the state of the constant of the state of the constant of the con to prove very efficient under their German commanders. It is be-lieved that if the Anglo-French ships once get as far as Nagara roads the once get as far as Nagara roads the Turkish fleet will flee to the protec-tion of the Bosphorus, and will per-haps prefer to take their chances with the Russian Black Sea squadron to waiting for the foe from the west.

CARPATHIANS NOW CLEARED OF GERMANS

Austrian Defenders Forced by Russ to Concentrate in Exposed Position.

STILL FIGHTING

Czar's General, Reported Prisoner, is Doing Good Work Yet.

Petrograd Cable. The Russians with large floating reserves, into the Stanislau position for the attack on

In Eastern Galicia the Russian rear columns that are withdrawing from Bukowina have halted the enemy often enough to give time for the main Wyszkow Pass. The opening movements of the battle succeeded in separating this numerically stronger Austrain army from the mountain defences and from the Austro-German first day the Austrian battalion south of Stanislau during the general de-ployment began doubling towards the Russian lines, waving several white flags. The Austrian commander turned his machine guns on these men, killing most of them.

FORCED TO CONCENTRATE.

The Russian tactics in Southeastern harbors along Austrian concentration in this exposed ment when the allied warsups up the straits. The proposed loan of \$50,000,000 by Great Britain to Russian depends in a measure on the marketing of the crops of ccreals in the cauthern Russian provinces. that Russian transports on the Black recently in Hungary into the lines on Sea are about to embark an army for the Dunajec River for the reinforcer

Germany Will Sequestrate All Belgium Business.

Paris cable .--- A despatch from Berne, Switzerland, reports an announcement by the Wolff Agency (an official German news agency) that Germany is to turn all business enterprises in Belgium over to her own subjects and those of her ally, Aus-

The announcement is that at Brussels, Gen. Von Bissing, the military governor, has directed the sequestrating of business enterprises in the king-dom, owned by subjects or citizens of nations with which Germany is at war. The effect of this will be to close all banks, shows, factories and business enterprises conducted by Belgians even in Brussels itself, where the Germans have never been opposed. It will affect the business of Antwerp and other cities in a similar way. It serve shortly to increase vastly number of persons dependent upon the outside world for subsistence.

WALES AT FRONT

Heir to Throne Was On the Firing Line.

Cable. -- A Daily News London special correspondent writing from somewhere in France describes a visit of the Prince of Wales to the firing line. A major led the way and imme diately benind was a short, slight figure clad in regulation khaki. He was wearing "a British warm" with the collar turned up and a Sam Brown helt with revolver, etc. His boots were covered with the familiar mud and he looked a keen young officer. Following were two or three staff officers. The major explained the nature of the defences from this point, and then from a spy-hole pointed out the Gernan lines about 500 yards distant, with our front line of trenches between Meantime occasional bullets cracked overhead. The Price of Wales was The Price of Wales was actually on the firing line. He listened eagerly to the explanations of the various officers, and after a stay of a few minutes his party returned.

TWO DAYS IN TRENCHES. Definite information of the exploit of the first Canadian expeditionary force since its entry into the war zone in France was received in Toronto yesterday, and was read amid great plause by Lieut.-Col. Ponton, of Belleille, to the Ontario Associated Boards of Trade, now in session in the As-

of Trade. According to the message the Canadians have held with great valor and success the first line of trenches within a hundred yards of the Germans, and after a centinual vigil lasting over two days are now billeted in the rear, where they will enjoy a few days' rest before returning into the arena again. It was stat-ed that the Canadians covered themed that the Canadians covered them-selves with glory under their baptism of fire, and that there were rew casualties. The excellent marksmen-ship of the gunners also brought credit upon the Canadian artillery

corps.

The message was received yesterday afternoon by Lieut. Col. Fonton from Mr McLaren Prown, on of Postmas-ter Adam Brown, of Hamilton, European manager of the Canadian Facific Railway, who quoted from a letter sent to him from Lieut. R. D. Ponton,

sent to him from Lieut. R. D. Ponton, ton, a son of Lieut.-Col. Ponton.

The cablegram, which was dated Thursday forning, read as follows:

"I have just received a cheerful letter from Richard (Lieut. R. D. Ponton) from France, dated Feb. 21st. He is quite well and occupied the first line of trenches with the Canadians, which were within one level dated for the first line of trenches with the Canadians, which were within one level dated. dians, which were within one hundred yards of the Germans, during the past 48 hours. The behavior of the Canadians was splended and they returned dians was splendid and they returned O. K. to their billets for a few days' rest after their baptism of fire. All are very fit, and only slight casualare very fit, and only slight casual-ties occurred in the Canadian infant y. These were principally caused by the German snipers. The Canadian artil-lery proved quite equal to the occa-sion."

FOR TETANUS

Rockefeller Institute Has Invention to Combat It.

New York Report .- Announcement was made to-day on behalf of the of an apparatus and the discovery of a new method of treatment, toth designed to reduce the mortality from tetanus among soldiers wounded on European bastleffeids. Twenty-five apparatus, it was said, had already been sent to Europe by the institute for use on the battlefield, and patents to the invention had been thrown open so that whoever wished might manufacture and use the apparatus.

The institute's investigators have found, it was said, that most of the deaths occurring among wounded men are due to tetanus, and that the prevent method of treating tetanus has drawbacks which make it impossible to save as many of the wounded as might be saved by a more available method.

An injection of a solution containing epsom salts into the membranes of the spinal cord is a part of the method of treatment, it is announced. To Dr. F. J. Metszer, of the institute. is given credit for the new method. The belief is expressed that with this method of treatment and the use of

TRADE BOARDS IN CONVENTION

Want Refining of the Metal Placed Under Government Control.

MORE GRAIN

Hamilton Men Urge for Greater Production Throughout Canada.

Toronto Report .- The fourth annual meeting of the Ontario Associated Boards of Trade opened in the assembly hall of the Toronto Board of Trade yesterday morning. The attendance was the largest in the history of the association, more than 100 members being present.

The delegates received a warm re-ception from the Toronto members and were also officially made welcome by Premier Hearst on behalf of the Pro-vancial Government, and Mayor Church

on behalf of the city.

During the convention a number of important questions will be considered. The chief one water came before the meeting yesterday was that of nickel and copper refining, under the supervision of the Federal Government, and after a thorough discussion of the question it was decided that Associated Boards of Trade of Ontario will present a resolution to the Dominion Government asking that the Government take under its control the refinnickel and copper, and that it would be to the best interests of the Pritish Empire that these ores be refined in Canada.

After a sharp fight a resolution was passed to this effect. It was introduced by William Taylor, of Owen Sound, and seconded by J. F. Black, of Sudbury, and read as follows:

Whereas, we believe the people of Ontario as a whole, desire the assurance that should any future occasion arise the nickel produced in the Dominion of Canada, in so far as the refined product goes, should be under the control of the Government, and Whereas, the Hon. Minister of Lands, Forests and Mines has nounced that it is the intention of the Government to appoint a royal

"Resolved that this Associated "Resolved that this Associated Boards of Trade assembled highly commend their action, and we as a body sincerely trust that the men appointed will be non-political, practical and thoroughly impartial.

"And be it further resolved that it

is in the interest of the Dominion of Canada and the British Empire that the refining of all nickel, copper and mattes be under Government control and be refined in Canada.

A resolution was put before the neeting that Mr. D. W. Brodie and L. O'Connor, of Sudbury, that the motion be not sent forward to the Government. This was lost, however, and when the vote on the original resolument. tion was brought up it was found to be a tie. On a second vote the motion

carried by a majority of five. The question of a larger production of grain was also brought up by the Hamilton Board of Trade in a resolution asking the Dominion Government to adopt such legislation as supply the necessary means to supply suitable people with equipment to

engage in agricultural pursuits.

Mr. D. B. Woods, of Hamilton, in ntroducing the motion, said that the British Empire was looking towards Canada to supply its food. "The great cry of to-day is not so much more men

as more food," he said, "and while our patriotism is beyond question, our production is not up to the mark. If we would develop our agricultural re-sources we would be doing the Empire a service which would be of inestim-Continuing, the speaker drew attention to the great wheat belts in North-

ern Ontario and the West, and suggested that the unemployed problem would be solved by the back to the farm movement. He was in favor of the Government granting assistance to such people as would be able to develop into successful farmers. Canada. he declared, should be the source of food supply of the Empire. After a great deal of discussion it was decided to leave the motion over

so that it could be dealt with by the executive. It was the feeling of the meeting that something should be done to get the farmers and monufacturers together in a special convention to discover the conductor. tion to discuss the problem before the Boards of Trade expressed any utani mous opinion on the question

A resolution was also passed asking that the commercial laws of the va-rious provinces should be modified and made uniform throughout the Domin ion in an effort to render the carrying on of business less complicated and to make the collection of debts and the realization upon the assets of insolvent

realization upon the assets of moorest and dishonest debtors less difficult. President A. J. Young, who presided ed over the convention, in his address declared that from a commercial point of view Ontario was sound. He deplored the great war, which has destroyed so much life and property, but was proud to say that the Ontario business men had not been oversome by any panic and that they had ral-lied to the Empire slogan of "Busi-

ness as Usual. ANNUAL BANQUET.

"As to the man, however high up he may be, who would use his position as a Government contractor to supply inferior material or to obtain an excessive profit, if there is any criminal law in the country he should be put behind the bars and kept there s an example to others."
This vigorous declaration by Mr. N

W. Rowell, leader of the Ontario Opposition, at the banquet of the Associated Boards of Trade of Ontario in the Toronto Board of Trade room prought an instant and emphatic en dorsation. The delegates rose and cheered the sentiment. Mr. Rowels referred to the case of the faulty shoes as lacking the very first principles of patriotism. He declared that it was a mistake to suppose that Germany ex He praised the manner in which the businessmen had met the situation in Ontario. The war, he declared, had stimulated manufacturers and farmers.

Sir Adam Beck told the story of the Hydro system, and appealed for sup-port in the great new scheme of Hy-dro-radials. He reviewed its history port in the great new scheme of the dro-radials. He reviewed its history from its birth, when it was strongly opposed, until the present, when many "do not care if the duty on coal many "do not care if the duty on coal many "do not care if the duty on coal many "do not care if the duty on coal many "do not care if the duty on coal many of the care that walkers of the care that walkers of the care that the raised 7½ per cent. ad. valorem. of 70 per cent., you still have your white coal as free as the air." Sir Adam pointed out that instead of great industrial centres there would be dreds of smaller centres. ds of smaller centres, which was proper course in building up a great country.

"Give us help in the radial scheme and we will show Canada and the Empire what the people can do in de-veloping a country."

Hon. F. G. Macdiarmid, representing the Ontario Government, declared a man could do good service by using Canadian goods. He did not want manufacturers to take advantage of the war to enhance prices. The farmthe war to enhance prices. The farmers had responded to the appeal by increasing the fall wheat acreage by

Mr. L. H. Clarke, proposing the toas! to Hydro railways spoke of the fight that Sir Adam Beck had in promoting his scheme. Other speakers were Mr. Arthur Hewitt, Mr. J. C. Marriett and Mr. A. J. Young. President J. W. Woods, of the Toronto Board of Trade,

White of the Sun Life North Crosby; Mrs Samuel Bowers, Assurance Co. was in town with Mr Ogdensburg, and Miss Teresa Kelly at

> The chances of university students securing situations as forest rangers in Northern Ontario during the coming summer are at a discount. Owing to new conditions and a policy of conomizing in the department of lands, it is stated to be the intention to employ only experienced men and northern colonists who are out of work. One nundred fewer men than last year will be employed.

Col. G. Sterling Ryerson, President of the Canadian Red Cross Society, announces that Mrs .Grant Needham of Toronto will deliver an address in Young Athens on Wednesday, March 10th at . S o'clock p.m. Topic: "What the on the above date.

It is said that a rural mail carrier, thoughtful and observant, after driving through farming districts in Kansas, finally reported that the reason so many boys leave the farm is that "Willie's calf grows up to be dad's cow." That carrier of rural mail certainly is able to say a great deal in a few words.

A bean supper will be held in the basement of St. Paul's Presbyterian church on Monday, March 8, followed by an illustrated lecture in the church auditorium on "A Trip Through Eng land, Scotland, France and Switzer-land with note book and camera" by Rev C. W. Shelley of Brockville. Supper from 6 to 8, lecture at 8 sharp. Admission 25c.

railway.

Refreshments were served. The young ladies who had charge of the afternoon's entertainment received a hearty vote of thanks from the In
**Tenders for crushing the stone required for road purposes in Rear Yonge and Kscott, 1915, will be received up to March 20th next. The Township crusher and wagons may be used, a defender of the received a defender of the received a contractor may furnish the entire outfit. Address tenders to R. E. CORNELL. Attens hearty vote of thanks from the Institute.

A New Hymnal

The matter for a new Presbyterian hymnal came in for some consideration at the meeting of the Lanark and Renfrew Presbytery. Rev Mr Fraser of Smith's Falls, advocated the elimina-tion Kipling's Recessional and another hymr, claiming them to be too academic. One of the other clergymen stated that at least two of the hymns. "Shall We Gather at the River," and "God Be With You Till We Meet Again,' contained a two-step measure. Lowry declared that there were coctrinal error and unscriptural teaching in the proposed new hymnal; also it contained a great deal of doggerell and drivel. At any rate the Presbytery decided to go into the matter of a new Canadian Presbyterian hymnal at a special meeting in Carleton Place on March 4.
