April 20, 1879.

A NOTED BUT UNTILTED WOMAN.

(From the Boston Globe.)

There is a good likeness of Mrs. Lydia E. Pinkham, of Lynn, Mass., who above all other human beings has been truthfully called the "Friend of Women," as some of her correspondents love to call her. It is a picture of a woman who is the outcome of a life of suffering, and is a picture of a woman who is a blessing to the world.

On account of the great likeness of Mrs. Pinkham, it is recommended and prescribed by the best physicians in the country. One says: "It works like a charm and saves much pain. It will cure the worst form of falling of the uterus, Leucorrhoea, irregular and painful menstruation, all ovarian troubles, inflammation and Thrombosis, Flooding, all Displacements and the consequent spinal weakness, and is especially adapted to the change of life."

It permeates every portion of the system, and gives new life and vigor. It removes fatigues, restores vitality, cures all craving for stimulants, and relieves weakness of the stomach. It cures Bloating, Headaches, Nervous Prostration, General Debility, Sleeplessness, Depression and Indigestion. That feeling of bearing down, causing pain, weight and backache, is always permanently cured by its use. It will all times, and under all circumstances, act in harmony with the law that governs the female system.

It costs only 25 cents per bottle or six for \$1.50, and is sold by druggists. Any advice required as to special cases, and the names of many who have been restored to perfect health by the use of the Vegetable Compound, can be obtained by addressing Mrs. P., with stamp for reply, at her home in Lynn, Mass.

For Kidney Complaints of either sex this compound is the most abundant testimonial shows.

"Mrs. Pinkham's Liver Pills," says one writer, "are the best in the world for the cure of Constipation, Biliousness and Torpidity of the Liver. Her Blood Purifier works wonders in the special line and bids fair to equal any compound in the pharmacy."

All must respect her as an Angel of Mercy whose sole ambition is to do good to others.

Philadelphia, Pa. Mrs. A. M. D.
Factory at Standstead P. Q.—Trade supplied by Wholesale Druggists.

KIDNEY-WORT
THE GREAT CURE
FOR
RHEUMATISM
AND ALL THE AFFECTIONS OF THE KIDNEYS.

As it is for the relief of the most distressing of the human system, and as it is a cure for the most common of all diseases, it is a most valuable remedy. It is a cure for the most common of all diseases, it is a cure for the most common of all diseases, it is a cure for the most common of all diseases.

It is a cure for the most common of all diseases, it is a cure for the most common of all diseases, it is a cure for the most common of all diseases, it is a cure for the most common of all diseases, it is a cure for the most common of all diseases.

It is a cure for the most common of all diseases, it is a cure for the most common of all diseases, it is a cure for the most common of all diseases, it is a cure for the most common of all diseases, it is a cure for the most common of all diseases.

Selected Reading.

A Real Romance.

The following story is told in the Brockville Recorder: Something like a real romance occurred lately in a respectable hotel in Montreal. The facts connected with which are vouched for by one who knows. In the aforesaid hotel, a road agent of a respectable company boarded, while in the city. In the same hotel an American lady was domiciled. The lady was pleasantly and accomplished. The young gentleman at first viewed the lady admiringly at a distance, but too timid to approach. Day by day his interest in the lady grew stronger. He had never spoken to her, nor she to him, and so far as he was concerned, this was what he most earnestly desired he might do. In this dilemma he applied to a friend for advice. Do you go at the same table? asked the friend. "Yes," was the reply. Then I would advise you the next time you dine to "ask the lady to pass the salt."

All right, sighed the love sick hero. The following day he intended to put his friend's advice into operation, but was unfortunately interrupted by the lady asking him to "please pass the salt." Broken, till at last the lady asked the gentleman to "please pass the salt." The gentleman at once handed the lady his business card, and thus settled the matter. By all the while the couple enjoying each other's company at concerts, operas, &c. At length this state of matters was perceived to the States. The lover was perplexed, and again applied to his friend for advice, who at once advised him to pay the question, and thus settle the matter. He did so, and received for an answer that she was willing to become one with him, saying that the happy day would be the day of his wedding.

To this the gentleman at first demurred, as he had certain business matters to fix. He then wrote to his employers resigning his situation and leave the rest to her. He complied, they were married, and went to the States. He was a Canadian gentleman learned that he had married a young widow worth \$250,000. In his happiness he did not forget the friend who had advised him to "ask the lady to pass the salt."

He sent the gentleman a cheque for \$2,000 with a letter of thanks for his kind advice in a rebelling him to become a rich and happy man, through the possession of a wife and a loving woman. The gentleman who tendered the advice, felt dubious as to the reality of the cheque, and did not present it to the bank for some days. At last he put the matter to the test, and was informed the money had been lying in the bank at his order for a number of days. And so the romance ended to the satisfaction of all parties interested. We may state that the gentleman who received the cheque was at one time a resident of Brockville.

EGYPTIAN AFFAIRS.
LONDON, Oct. 5.—The "Times" Cairo correspondent telegraphs that he has good authority for stating that the British Government is in the June of the present year, the Egyptian Government will be proved by documents in the possession of the authorities.

A despatch from Cairo to the "Times" states that the Egyptian Government is in the June of the present year, the Egyptian Government will be proved by documents in the possession of the authorities.

he had arrived at the conclusion that the department had not been fully acquainted with the character of the organization, and that there would be no objection on the part of the Government to the connection of any of its employees with the Brotherhood. Although there had been an objection to it in the first instance, the department had used every means in its power to obtain positions elsewhere for the members of the Brotherhood who were dismissed, while in the city. Those who had families and for whom removal to other places would have been inconvenient. The members of the organization would now receive the favourable consideration of the Government, as it was satisfied that their objects were the elevation of their own class and the encouragement of worthy conduct on the part of locomotive engineers. The members of the Brotherhood are enthusiastic in their appreciation of the uniform country they have received in Ottawa, and the kind consideration given to them by the Minister of Railways, the Premier, and other members of the Government with whom they have come in contact.—Mail.

Vagaries of the Comet.
Rochester, N. Y., Oct. 9.—Professor Swift, the astronomer, says:—"No damage need be apprehended from the comet, as it has already made its nearest approach to the sun, and is now receding. All reports about its falling into the sun are purely sensational." In his opinion it is not the comet of 1880, but may be possibly that of 1843. This comet is moving in a curve of eight or ten years. The comet of 1880 was, as is generally believed, that of 1843. This certainly can't be the same. The most interesting question just now is whether the comet has divided or not. Professor Swift has searched carefully, but has not found evidence of this, although the appearance of the nucleus indicates that it is liable to do so at any time.

Phelps, N. Y., Oct. 9.—Prof. Brooks this morning discovered that the nucleus of the comet was greatly elongated and clearly split into two unequal parts, a small crescent-shaped envelope also being thrown off in front of the head.

The separation of the nucleus of the comet into three parts was again seen this morning by M. C. Mayne. This observation bears out his theory that the fragments revolve about a common centre of gravity, alternately closing and separating. The separation occurred in periods of about four days.

The Salvation Army Causing Riot.
A serious riot took place at Dufermeine, in Scotland. For weeks very serious disturbances have been caused by processions of the Salvation Army. The magistrates intimated to the Salvationists that they could no longer obtain police protection. The result was that long before the usual hour of the procession last night an enormous crowd collected near the hall, in which the Salvationists meet, and, finding that the latter did not make their appearance, they attacked the hall, the doors and windows of which they smashed. The mob afterwards took possession of the town, and destroyed all sorts of movable property they could lay hands on. Stones, bricks, boxes, barrels, &c., were freely used, and many people were badly injured. The main streets were looted, the policemen utterly powerless to exercise the least authority, and for hours the wildest disorder prevailed. The petition by the ratepayers praying for the protection of the magistrates is in course of signature. It is feared that special constables will have to be sworn in.

A Florida Alligator Story.
Jim Russell, a son of Maj. Russell, famous during the Florida war, now makes a precarious living in South Florida as a guide to visiting sportsmen. For a bonus of \$25 Jim will kill an alligator for the sportsman. St. John and bring up an alligator. He actually brings them out of their holes. Strange as this may seem it is the oldest way of catching an alligator. They dig holes in the river banks just below the surface of the water, and crawl into them. Jim dives down, crawls in rapidly and seizes the saurian by the tail, who, startled, immediately backs out. Jim holds on, keeping his legs stiff clear of the bank, when he draws away, and the "gator, rising to the surface for air, is slain by waiting gunners in the boat. This has become common sport on the Upper St. John River.

Six day Pedestrian Contest.
Birmingham, Eng., Sept. 30.—A six-day pedestrian contest for Sir John Astley's long distance championship belt was concluded here to-night. Littlewood made 415 miles and 6 laps, doing 414 miles in 70h. 20m. 35s. thus beating Dobler's record in America, of 414 miles in 72 hours. Littlewood takes the belt and £50. Day of Birmingham was second, 377 miles and Corbett of Aberdeen third, with 347 miles. Pearce of America finished sixth, with a score of 305 m. 81. The competitors walked 12 hours daily.

Mrs. A. Nelson, Brantford, writes:—"I was a sufferer from Chronic Dyspepsia for eleven years. Always after eating, an intense burning sensation in the stomach, at times very distressing, causing a drooping and languid feeling, which would last for several hours after eating. I was recommended by Mr. Poppelwell, Chemist, of our city, to try Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure, and I am thankful to say that I have not better for years; that burning sensation and languid feeling has all gone, and food does not lie heavy on my stomach. Others of my family have used it with best results."

THE UNIVERSITY.—In reply to an inquiry, we may state that the salaries of the members of the University Faculty since the recent increase are as follows: Dr. Jack, President, \$2,200; Dr. Bailey, \$1,600; Dr. Harrison, \$1,400; Prof. Bridges, \$1,300; Prof. Rivel, \$775. The salary of the Registrar, Mr. Hazen, is \$500.—Farmer.

Agiculture.
Comfortable barns save fodder. At the same time promote the growth and thrift of the stock. Cattle kept in warm barns require less food to keep up the temperature of their bodies than do those which are kept in cold ones. The temperature of the body must be maintained at its normal position, that of about ninety-eight degrees. If the surrounding temperature is down to zero it is evident that there must be a great loss of heat from the animal. Every one knows that if the animal were killed the temperature would soon fall to nearly the same degree as that of the surrounding air, yet the less of temperature which would take place is no more rapid than is constantly going on from the body of the living animal. The great loss of heat is supplied by the burning up in the system of some of the food taken in the fat of the body. If the animal is exposed to a very low temperature it will require nearly all the food ordinarily eaten to keep it from freezing. This is a method of keeping cattle warm which does not pay. It is far more profitable to provide warm barns to keep the cattle warm which does not pay. It is far more profitable to provide warm barns to keep the cattle warm which does not pay.

Storing Turnips.
Of all roots perhaps the turnip is the most impatient of heat. It starts to grow on the slightest vocation. In a cellar if put over forty degrees, one may find it growing freely, after an incarceration of but a few weeks. It is growth which is the great enemy of preservation, and it is heat which excites growth. There is a natural heat in roots when put in a heap; a little heat from one root and a little more from another, soon makes a pretty high degree; but in the open field this is carried off by the open air. Under cover this natural heat is not carried off; it accumulates, and where the roots could get at them, and covered with straw to prevent rapid thawing, they would keep better than if covered with earth, which rather serves, as we say, to collect the heat. Keep in view the fact that heat is more likely to injure them than cold, and a very low degree at that.—Germantown Telegraph.

The Union Advocate.

Established 1867.

NEWCASTLE MIRAMICHI, N. B.

WEDNESDAY, OCT. 18, 1882.

ANNUAL SCHOOL MEETING.

The Annual School Meeting in District No. 7, Newcastle, held in the Temperance Hall on Thursday, was very poorly attended. This is doubtless owing to the change made in the law requiring the meetings to be held in October instead of in January as formerly. In the neighboring Province, in many places, the Annual School Meetings are held in the evening of the day appointed, in order to allow those who cannot leave their employment in the day time the privilege of doing so in the evening. As very few persons other than the merchants and proprietors of establishments can possibly attend meetings during work hours, we suggest to the Trustees the propriety of changing the hour from 10 a. m. to 6.30 or 7 p. m., or of meeting at 10 a. m. to adjourn to a more reasonable hour, when future meetings called to order, Mr. W. S. Brown was elected Chairman.

The Trustees Report was read and received, and on motion, after a short debate, was read section by section—most of the sections passing without discussion, excepting the one relating to the school in the lower part of the District, and that in which the Trustees asked for an expression of opinion relative to the re-opening of the High School. The dominant opinion was that the lower school should be opened in the winter season, and the High School re-established as soon as there were pupils ready to enter the higher grades. The Trustees explained that they had under consideration the re-organization of the Departments in the Academy by which the High School can be carried on with little or no extra expense to the District.

The document submitted by the Trustees we publish in full, for the benefit of those who were unable to attend the meeting.

REPORT

OF SCHOOL TRUSTEES FOR DISTRICT NO. 7, NEWCASTLE, FROM 12TH JANUARY 1882, UNTIL 1ST OCTOBER 1882.

The Trustees beg to submit the following Report:

SCHOOL ENROLLMENT.

Winter Session. Summer Session.

High School, 12 25
Advanced Dept., 44 55

REQUIREMENT OF AN ASSESSMENT OF \$1050.00 FOR 1883-84 IN ROUND FIGURES.

In the management of the school service has been our aim, and we have endeavored to maintain the schools in a state of efficiency.

The Teacher of the Chaplain School tended all religious exercises in the school.

The Teacher of the Primary Department, Miss Pritchard, is a woman of energy and is throwing an amount of energy into the work which cannot fail to be productive of the best results.

At the last annual meeting it was decided to adopt the suggestion of the Trustees that the St. Vincent's (as-called) be closed during the summer months. The parents in use of this school as a strong desire that the school should be re-opened. As the result of careful inquiry we find that at least thirty children would attend under an efficient teacher. As many of the children are too young to come to the school in winter we recommend that the school should be re-opened on the 1st of November.

In accordance with a resolution of the last Annual Meeting the High School was closed for one year. We await the decision of the Department on the recommendation that a school be re-opened on the 1st of May 1883. In the meantime we hope for an expression of the intention of this Meeting in the matter.

Inspector Cox's Report to the Trustees is on the whole satisfactory; and when compared with Reports of previous years, shows that our schools are generally reaching the standard of excellence so much desired by all friends of Education. Towards this desired end parents could very materially assist by insisting on a more regular attendance on the part of their children. Irregularity of attendance is a great drawback to the successful working of our schools. Our staff of teachers is an efficient one, and where the success attained has not been commensurate with the labor expended, we feel that it is due to the want of diligence on the part of the teachers, but to causes that are more or less preventable were the parents fully alive to all that absence from school involves. As a means of insuring regularity of attendance and general good conduct, we beg to recommend that a sum be apportioned for the granting of 1st, 2nd and 3rd prizes in each of the departments, each prize to be awarded on the report of the Teacher. We believe that the cost would be fully met by the increased amount received from the County Fund on account of the larger average attendance of pupils that would be secured by the District.

We are pleased to report that harmony has existed between the teachers and parents of the schools, no difficulties have occurred during the year requiring the interference of the Board.

The Trustees regret to say that they meet with frequent complaints about the multiplicity of studies, coming from parents who wish their children to study only the practical branches. To all such persons we commend the following extract from a recent address by Principal Crockett:—Let us beware also of any general cry, coming sometimes from friends and sometimes from our own sources,—that this is a new country of ours, and that our course of instruction should be practical. There is abundance of what is called practical in the course. But eliminate from the studies of youth everything that has not a direct practical bearing on the pursuits of life, and that is the meaning of the cry, and you will have a people exclusively practical,—materialists of the grossest kind,—whose heads are always downward bent. Let us have then on our course some subjects whose tendency is to give man a true view of himself and his relations to society."

Respectfully submitted,
JOSEPH HAYS, } Trustees,
A. C. SMITH,
J. M. FERGUSON,

The Secretary read account of Receipts and Expenditures up to the close of year.

Auditor Williston submitted a Report in which he stated that he could not properly audit the accounts without having the Assessment list, for the use of which he had asked the Trustees, but had been refused.

The Trustees showed that the Assessment List could not legally pass out of the hands of the Collector, complications might arise if it were done, and the District suffer loss on account of said list being out of the hands of the Collector when persons are called to pay.

It was stated, in this connection, that from the date of closing the accounts and up to the day of holding the meeting, there had been paid in school taxes amounting to between four and five hundred dollars.

The Trustees stated that all other papers had been tendered to the Auditor.

The Meeting accordingly refused to receive the Report. On motion, a committee consisting of Messrs. J. D. Creighton, Donald Morrison and J. J. Anslow, was appointed to examine the accounts.

Joseph Hays, Esq., the retiring Trustee, was unanimously re-elected.

The sum of \$2500 was voted for school purposes for the year. On motion the Trustees were authorized to expend a sum not exceeding \$120 in prizes to three of each department in the District.

On motion, Mr. D. Morrison was appointed Auditor.

Mr. Brown vacated the chair, upon which he was presented with an address, announcing that of the meeting for the satisfactory manner in which he had discharged the duties of Chairman.

At 1.45 the meeting adjourned sine die.

Miramichi Trade.

The "Advance" of last week gave some information with reference to the trade of Miramichi, a part of which we condense. For the quarter ending 30th Sept. 1882, more dutiable goods had been imported into Chatham, than in the corresponding period last year, the duties for the quarter being \$240,000 in 1881, and \$240,000 in 1882. In 1881, the value of goods on the frontier was \$1,481,140,77, as against \$1,936,93 in 1881. In both places there was a greater amount of goods on the frontier, carrying 40,619,000 sup. ft. deals, 2,586,968 pieces of lumber, 1236 tons timber, as against 117,000 sup. ft. deals, 2,081,000 pieces of lumber, 1334 tons timber for the corresponding period in 1881. Newcastle, 30th Sept. 1882, 100 vessels, 2,250,000 sup. ft. deals, 496,000 pieces of lumber, 505,000 sup. ft. deals, 857,000 pieces of lumber, 1839 tons timber during corresponding period in 1881. The grand totals are—1882, 183 vessels, 87,000,000 sup. ft. deals, 2,081,000 pieces of lumber, 1334 tons timber. 1881—230 vessels, 104,410,000 sup. ft. deals, 2,338,000 pieces of lumber, 1839 tons timber. The total value of exports from Miramichi for quarter ending 30th September, 1882, according to the figures of the customs, is \$816,222, as compared with \$741,818 in 1881. Of this amount Newcastle contributed \$329,532 in 1882, and \$354,119 in 1881.

Blackville and Derby Agricultural Society.

Blackville, 12th Oct. 1882.

DEAR ADVOCATE.—I beg to drop you a brief account of the Ploughing Match which was held at Blackville on the 10th inst.

The day was splendid and the number of horses and neat cattle was much larger than on last year's gathering.

The Ploughing Match was well contested. Fourteen aspirants drew reins for the honors of the field. The animals were all of the best, and the ploughmen were all of the best.

Gelding, 2 years old—Michael Mahoney 1st prize, 1st prize, 2nd prize, 3rd prize.

Gelding, 2 years old—John Hollahan, 1st prize, 1st prize, 2nd prize, 3rd prize.

Spring Calf—Philip Kelly 1st, Cavan Brophy 2nd.

Spring Calf—James Walsh 1st, Wm. Cavan 2nd.

Spring Calf—Thomas Coughlan, 1st, Cavan Brophy 2nd.

NOTICE TO CONTRACTORS.

SEALED TENDERS, addressed to the undersigned, and endorsed "Tender for Carriage Works," will be received until TUESDAY, the 1st inst., in the office of the undersigned, for the construction of a Breakwater at Carquest, Gloucester County, N. B., according to a plan and specification to be seen on application at the Office of the Collector of Customs, Carquest, where printed forms of tender can be obtained.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, the blanks properly filled in, and signed with their actual signatures.

Each tender must be accompanied by an accepted bank cheque, made payable to the order of the Honorable the Minister of Public Works, equal to five per cent. of the amount of the tender, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to complete the works contracted for. If the tender is not accepted the cheque will be returned.

The Department will not be bound to accept the lowest or any tender.

By F. H. ENNIS,
Secretary.

Department of Public Works,
Ottawa, 2nd Oct., 1882.

MAIL CONTRACT.

TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday 27th October, for the conveyance of Her Majesty's Mails, on a proposed Contract for four years, twice per week each way, between
McLaughlin and Kenos Bridge,
from the 1st January next.

Conveyance to be made in suitable vehicle drawn by one or more horses, subject to the approval of the Postmaster General.

The mails to leave Kenos Bridge on Monday and Friday of each week at one o'clock p. m., or as soon as practicable after arrival of mail from Newcastle, reaching McLaughlin via Kenos River in one hour from hour of departure. Returns to leave McLaughlin same days at 2 o'clock p. m., reaching Kenos Bridge via Kenos River in one hour from hour of dispatch.

Printed notices containing further information as to conditions of proposed contract may be seen, and blank forms of tender may be obtained at the Post Office of McLaughlin, Kenos River and Kenos Bridge.

JOHN McMILLAN, P. O. Inspector.
St. John, 15th Sept., 1882. 1 3w.

MAIL CONTRACT.

TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday 27th October, for the conveyance of Her Majesty's Mails, on a proposed Contract for four years, once per week each way, between
Dooktown and Shinnickbarn,
from the 1st January next.

Conveyance to be made in suitable vehicle drawn by one or more horses, subject to the approval of the Postmaster General.

The mails to leave Dooktown on Saturday of each week at 7 o'clock a. m., reaching Shinnickbarn in four hours and thirty minutes; and on Friday, returning to leave Shinnickbarn same days at 2 o'clock p. m., reaching Dooktown in four hours and thirty minutes from hour of dispatch.

Printed notices containing further information as to conditions of proposed contract may be seen, and blank forms of tender may be obtained at the Post Office of Dooktown and Shinnickbarn.

JOHN McMILLAN, P. O. Inspector.
