There always have been, and presumably always will be a certain percentage of the seekers after learning who leave off their quest until the shadow of ex-amination has completely descended and visions of the long summer vaca-tion are already before their pleasure-sated eyes. Then, with only a couple of weeks, or perhaps only a couple of days, to cram their brains with the knowledge necessary to pass the dread gamut of the examiner, the de-votee who travel's in learning's path rather tardity, awakens to a sense of votee who travel's in learning's path rather tardily, awakens to a sense of oppertunity lost. All during the year there have been temptations to for-sake the delights of the academic life and to become entangled in the gay sounds of pleasure, which have been known in rare cases to appeal to the undergraduate with a tendency to-wards lowity rards levity.

made by W. C. Bennett should be gone into. Contrary to the wishes of the pro-perty committee the women's court will stay where it is. The room was a required by the city auditor, but the controllers were against the proposal. The city dreasurer reports that the taxes cannot be collected in four in-stalments this year, as it takes six months to get the bills ready. The controllers will recommend to council that the contract for the Rose-dale section of the Bloor street viaduct be awarded to the Dominfon Bridge Co. The tender, which included the lower deck, was \$312,418. It will be constructed without this at a cost of \$298,555.

A real estate man valued the property, which has been expropriated by the city, at \$60,000. Balmy Beach Park will be run with-out a commission this year, as the controllers are against the appointing of a new one. The park has been run by a commission since East To-ronto was annexed to the city. The fact that the full skirt has met with such quick response and abso-lute favor discloses the reason. The empire and the moyen age type are seen sharing equal honors at ev-ening functions, the one fashloned from many widths of lace, chiffon or taffeta, with a tight little black velvet bodice in decided contrast; the other a loose pointed net tunic, attached at the hip line to the straight upper part by a band of beaded net, the entire worn over an underfrock of taffeta, cut on princess lines. **A Decided Contrast**. # "48"---SIX---A COMFORTABLE, THE ROOMY; SIX-CYLINDER

We have drawn on every resource of our thirteen years of automobile building experience to produce, in the "48"-Six, a car which will combine power and speed with comfort, safety and economy of operation.

Strength and durability have not been sacrificed to secure extreme lightness, for we know that in the last analysis the car which wins the approval of the motoring public must have, not only speed, but endur-ance. It must be a car that will stand hard driving over indifferent roads; it must do as good work after two or three years of use as when new-and it must be able to take rough roads at a good speed without discomfort to the passengers.

It is such a car as this that we have in the Jackson "48"-Six. Four full elliptic springs guarantee tire economy, and, with the luxurious uphol-stery, assure the owner of perfect riding comfort. The six-cylinder motor, of the same silent type which has helped to build the Jackson reputation, has full forty-five horsepower, with the per-fect balance which makes it run smoothly and evenly at high speeds. It can be throttled down to a slow walking speed on the high gear, and can be accelerated to fifty miles an hour within a few hundred feet. It is of latest European design, which combines speed and flexibility with the

greatest fuel economy. Both the "48"-Six and the Olympic "46" are driven from the left, and the control levers are in the centre. The driver may enter the car from either side—both doors can be opened and both running boards are

With its mechanical excellence backed by our thirteen years of experi-ence, we can recommend this new six as a car which will satisfy the most critical driver.

# The Olympic Forty-Six with More Power---Simplified Construction and a Lower Price

Simplicity is the keynote of 1915 design, and the Olympic "46," from its stream-line boly to the last detail of chassis construction, has been

many shocks which they would otherwise sustain. Further endorsement of this construction comes constantly from Jackson owners, who tell us of having exceeded by from 50 to 75 per cent. the mileage guaranteed

The motor, of the same silent type which has so long been a feature of Jackson design, has been made slightly larger, and the five horsepower which we have added provides a reserve for the hardest road conditions. "No Hill Too Steep, No Sand Too Deep" has for many years been the Jackson slogan, and the surplus power of the Olympic "46" enables it to make good under any circumstances.

The Jackson engineers have made many experiments with various types of springs, with a view to securing the greatest possible riding com-fort and reducing tire wear to the lowest point. They have proved beyond a doubt that the full elliptic spring has from 33 1-3 to 100 per cent. more flexibility than other types, and that this flexibility relieves the tires from

by the tire manufacturers.

It is conceded by all who have used Jackson cars that their extreme ease of riding permits them to be driven faster over rough roads than other cars with less flexible springs. The effective speed of the Olympic "46"—the speed at which passengers can ride with comfort—is far above the average.

The improved type of carburetor used on the Olympic "46" has reduced the gasoline consumption, so that this model will travel further to the gallon than many smaller, but less efficient, cars. The Olympic "46" will run reliably and economically, its motor is silent, and the car throughout, with reasonable care, will run just as reli-ably and silently the third and fourth years as the first.

C. R. CUMBERLAND, Auditors.

The President, Mr. H. H. Beck, in moving the adoption of the Report, said : I have much pleasure in presenting the Report of the Directors, which, having regard to the exceptional conditions which have existed during the past year, will, I feel sure, be considered a very satisfactory one by the Shareholders. The net earnings of the Company for the year after payment of interest, cost of management and all other expenses amounted to \$162,075.85, being over 16 per cent. on the Company's Paid-up Capital.

management and all other expenses amounted to \$162,075.85, being over 16 per cent. on the Company's Paid-up Capital.
 After payment of four quarterly dividends at the rate of 10 per cent, per anometic states of \$100,000, there remained at the credit of Profit and Loss Account the sum of \$101,812.63, and the Board of Directors have decided, in view of the effect of present financial conditions on securities, to appropriate a certain sum for possible depreciation in the value of securities, and the sum of \$76,000 was set aside for this purpose, instead of adding to our Reserve Fund. The sum of \$26,-\$12.63 has been carried forward to the credit of Profit and Loss Account.
 Although the increases in the Company's business have not been as large as would have been the case under normal conditions, yet we are pleased to be able to report that very satisfactory progress has been made, especially in the amount of funds entrusted to the Company.
 A subscription of \$2500 has been given by the Board of Directors to the Canalar Patriotic Fund, and also a subscription of \$200 to the efficient service rowing the Man da a resolution confirming these will be submitted for your confirmation.
 I desire to bear witness to the efficient service rowing by the Company's and in London, England, and also, on behalf of the Company, to express our appreciation of the very satisfactory returns received from our agents in Scotland, Mossrs. Marwick, Mitchell, Peate & Co.

Mossrs. Marwick, Mitchell, Peate & Co. Before closing. I would like to express our thanks to the members of the Com-mittee of the London, England, Branch, and also to mention the careful and thorough attention given by our Inspection Committee, consisting of Messrs. H. S. Strathy and W. H. Hunter, to the inspection of the Company's securities. We deeply regret the loss by death during the year of Sir George W. Ross, one of the Directors, and also a member of the Inspection. Committee. His place on the Board was filled by the election of Mr. Walter Harland Smith, and on the In-spection Committee by Mr. H. S. Strathy. I have much pleasure in moving the adoption of the Report. The president then called upon the General Manager, Mr. J. M. McWhinney, who said :

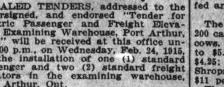

The year which has just passed has been one without parallel in the memory of any person present here today, and while it has to some extent lessened the activities of octain classes of business, the experience gained and the new con-ditions resulting will be of great value and assistance to companies like our own. which are chiefly interested in the safe investment of money in what are sup-posed to be the very safest form of such recurities—viz., Trustee Investments. To a Trust Company seeking to make safe investments in mortgages, for in-stance, its chief reliance must be placed on what I call the permanency of the valuation of the property on which the money is loaned.

valuation of the property on which the money is loaned. It is of no advantage to a Trust Company If it relies on the valuation of an appraiser, who certifies that the property is worth so much, notwithstanding the exist that he is able to confirm his valuation by the fact that an immediate sale of the property for the amount of his valua ion can be made, if the value of the property in the district in which it is situated has been inflated by speculation, ba-cause eventually these prices must recede to what is the actual valuation. For this reason it has been the polley of this Company not to make loans in places where, insour opinion, the price of property was unduly inflated or it was impos-sible to ascertain the actual valuation, and we have therefore chosen our mortgage icoans based on the conservative valuation of a farm, instead of property in certain

# FROM THE BOOTS UP

Almost everything necessary for the outfitting of Men, Women and Children is included in our week-end offering. Remember quality first is the watchword of our buyers, and this applies not only to Clothing but to food stuffs and furnishings as well.

Come to the store if you can, but if not use the telephone and we'll give you the same good service. Money back if not satisfied.

# **Big Boot Purchase From Eastern Factory**

No quantity is too large, and our buyer is always ready with a spot cash offer for such a lot of footwear as the boot purchase we made for Saturday's selling. An eastern boot factory cleared to us a big lot of boots at a very low price; travellers' samples of highest custom-grade and "floor stock" boots, in a beautiful range of popular styles for winter wear. Some of the leather-lined styles for men are extra heavy for out-of-door wear, and have triple thick viscolized soles. On sale Saturday as follows:

Men's Goodyear Welt, Hand-Sewn Boots, Saturday, \$2.49—4500 pairs of High-Grade Boots to select from; styles and weights to answer any purpose; cloth and dull calf tops; patent colt, button, lace and Blucher Boots, with plain or toecap vamps; gunmetal calf, button, Blucher and lace Boots; tan willow calf and winter calf button and lace styles; British army tan calf, military patterns, and waterproof black and tan calf Boots; soles suitable for dress, street, business and service wear; some are viscoliz-ed, and reinforced to keep the water out; Goodyear welts, hand-sewn, prevailing fashion-able toes and heels; also plenty of the conservative kinds; an opportunity to save money on high-class, comfortable, shape-retaining footwear; widths A to E in the lot, sizes 5 to 11. Regularly \$4.00 to \$7.00 values. See window display. Saturday 2.49
