FARMERS SEND REPLY TO THREE PREMIERS

They Dispose of the Difficulties Outlined by the Premiers and Hold to Their Opinions--Some Facts and Figures to Prove Their Contentions--Monopoly Not Necessary to Safeguard Financial Interests of Provinces.

The following is the reply which the Interprovincial Council of the farmers associations of Alberta, Saskatchewan and Manitoba has sent to the premiers of the three provinces:

To the Hon., the Premiers of Manitoba, Saskatchewan and Alberta, Gentlemen:

The Interprovincial Council of Farmers' Associations, having considered your memorandum in reply to our proposals that the governments of the respective provinces, "provide by purchase or construction, or both, at each shipping point where a considerable quantity of grain is shipped, necessary facilities with up-to-date equipments for weighing, cleaning and loading grain," we beg to submit in reply:

"That in so far as you state that we take the position that nothing further can be hoped for by amendments to existing legislation in so far as regarding internal elevators is concerned, and to obtain what your executives desire, you request that, in so far as the three Provinces are concerned, a system of government ownership and operation of grain elevators be inaugurated."

That fact states the position we take as to the utility of any further restricting legislation and properly interprets the meaning of our requests. Nothing in your memorandum seems to convey the impression that there is any constitutional or legislative difficulty in the way of your granting us that request.

The "constitutional difficulty" you set forth, only applies to matters that are outside of and not necessary for the carrying out of the requests made by us.

We propose to deal categorically with the difficulties set forth in clauses 1, 2, 3 and 4, commencing on page 7 of your memorandum.

1. "To wholly and absolutely control, regulate and govern the storage and handling of grain." The request we made requires no fuller power in this respect than those now enjoyed by the owners and operators of privately owned elevators.

2. "To prescribe, control and regulate the weights and grades of grain, subject to no alteration or review by any other authority." The only powers required with respect to weights and measures are those now enjoyed by every elevator operator in the province, viz: the power to weigh in and out on standard scales, and power to compel common carriers to deliver the same weight of a commodity as that which can be proved to have been entrusted to them. With respect to grades, we do not request you to grade grain, everything being stored in special bins, and placed at the disposal of the owners of grain, whether the producer or the purchaser.

3. "To fully control all Transportation Companies, Railways, etc., in the matter of expropriation of cars, and in other respects to provide such regulations and restrictions respecting these companies as shall be essential for the convenient and satisfactory handling of grain." The provisions of the Railway Act, the Grain Act, and the regulating power vested in the Board of Railway Commissioners amply protects you in carrying out of proposals.

4. "Generally all such powers and authority as to trade and commerce and the weighing and grading of grain as may be necessary to give the provinces complete, inherent and extrajurisdictional jurisdiction in the premises in every respect. This is to say, full authority within the provinces and also outside where the grain may be handled at Terminal Points."

In reply to this clause it may be said that elevator companies, including those operating under provincial charters, such as farmers elevators, now enjoy all necessary privileges and powers for the carrying on of the business of receiving, warehousing, cleaning, shipping and transacting of business connected therewith, which is all that our people require of you.

The only power the governments require as to weight is that enjoyed by every elevator in the province. The proposal does not involve the provincial government undertaking the grading of grain, everything being stored in special bins, placed at the disposal of the owners of grain, whether ownership was acquired by

growing or purchasing. Nor do we think it necessary that, in order to carry out our proposition, you should have any further control over transportation companies.

We submit further that legal monopoly is not necessary to safeguard the financial interests of the provinces. Hence, no "constitutional difficulty" presents itself in that regard, as the government system will have a virtual monopoly because of the impracticability of the present system (due to causes which we will show further on), remaining in the field in opposition to the government. Nor do we consider that it would necessitate any further heavy financial responsibility on the part of the provinces as the full expense of the system will be chargeable to the grain passing through the elevators.

We ask you to provide only the necessary storage facilities at any given point. At many points there are more elevators than are required. We anticipate that storage equal to one third of the amount of grain marketed at each shipping point will be sufficient. We absolutely DO NOT wish to interfere with the use of the loading platforms.

The safeguarding from financial losses in the fact of the demand for these facilities, and the power possessed by the provinces, to limit the storage to the capacity that is found necessary to properly and reasonably meet the demands upon it.

It can easily be determined by inquiry to what extent the use of loading platforms at any point would be lessened by the opportunity to use storage facilities, when the suspicion of improper practices in those facilities is removed. Our investigations lead us to believe that a large percentage of those persons now using the platforms, would gladly avail themselves of the opportunity of employing the government system of storage and shipping facilities—the ability to clean before shipment being an especially valuable privilege.

Your memorandum states that for 12 months, ending 31st August, 1908, 1,334 elevators, with a storage capacity of 39,724,000 bushels, within the three provinces shipped approximately 42,000,000 bushels of wheat, and that 12,500,000 bushels were shipped from loading platforms. This is to say that the 1,334 elevators received and shipped an average of 31,484 bushels. An elevator can, in a season, handle 150,000 bushels as easily and almost as cheaply as 30,000 bushels, therefore you can readily see the enormous drain the maintenance of so much unnecessary storage is, on the resources of the provinces.

To illustrate how it works out, the Farmers' elevator at Miami last season handled 150,000 bushels of grain, which gave them a revenue of 14 cents per bushel or \$14,500.00. Three other elevators at the same point handled 67,000 bushels, or an average of 22,333 bushels. They would necessarily have to charge about 8 1/2c per bushel to have the same revenue as the farmers elevator had on a charge of 1 1/2c per bushel. The whole elevator system of the three provinces would have to charge about 6 1/2 cents on every bushel they received to have a revenue equal to the Miami farmers elevator.

We submit that a government elevator at every shipping point in the three provinces would be in a similar position to that in which the farmers' elevators are now. The storage capacity has increased at interior points during 1908 by nearly four million bushels—now standing at about 43,300,000 bushels. Up to the 30th Nov. they received about 43,400,000 bushels, having at that date thirteen millions in store. Nothing can be more eloquent than those figures in showing the need that exists of the government taking full charge of and regulating the storage system in order to husband the resources of our farm population.

The system now in operation permits the elevator owners to charge enough to make the operating of the elevators pay, regardless of the quantity of grain they handle. Nothing short of government intervention will prevent the continuous duplication of elevators.

You will recall that at our conference at Regina we discussed the advisability of operating the proposed system by an independent commission. We are of the opinion that this

SHANTUNG SILKS

A SALE EVENT Months ago we made a lucky purchase of Shantung or Raw Silks. They're here now, and are the biggest silk chance you will have this year. In the natural linen shade, fine knobby finish, good firm quality. These silks are easily laundered and give wonderful wear.

- 26-in. wide, per yard 50c
- 33 " " " 65c
- 35 " " " 85c

Colored Shantung Silks

We have this desirable silk in a splendid range of colors: tan, brown, green, reseau, sky, Alice blue, pink, cardinal and white. These silks were dyed in France and are perfectly fast colors. No other silk stands so much wear. For Blouses, Summer Suits, etc., they are excellent. 26-in. wide. Special, per yard 75c

Verona Satin Directoire Cloths

This material bids fair to be the most popular fabric of the year for Tailored Suits and Skirts. It has a rich, soft glove finish and comes in plain or self stripes. We have it in browns, blues, greys, toupes, reseau, grey, etc. This goods is excellent value at our price, 85c and \$1.25 per yard.

R. H. Williams & Sons, Limited THE GLASGOW HOUSE

ALBERTA ELECTIONS

Majority of Constituencies in the North—Calgary and Edmonton Each Have Two Members—Sixty-one Bills Passed at Recent Session.

Edmonton, Feb. 26.—The fourth session of the first legislature of Alberta was formally prorogued Thursday afternoon by his Honor Governor Bulvey, after a session of exactly six weeks. His Honor gave assent to 61 bills passed during the session, and to the vote for supply.

Today the legislature was dissolved, the date for the new elections being set for March 22nd, with nominations March 15. Both Conservative and Liberal conventions will be held throughout the province during the next two weeks. The Rutherford administration will open the campaign by a mass meeting in Edmonton, Monday evening, March 1st, which will be addressed by all the cabinet ministers. This will be the first time all the members of the cabinet have appeared on the same platform at the same time.

The thirty-nine constituencies into which the province has been divided are as follows:

In the northern half—Athabasca, Peace River, Pembina, Lac St. Anne, Stony Plain, St. Albert, Sturgeon, Paken, Victoria, Edmonton city (2 members), Strathcona, Vegreville, Vermilion, Wainwright, Leduc, Wetaskiwin, Ponka, Lacombe, Camrose, Red River—Total, 20 constituencies, 21 members.

In the southern half—Innisfail, Oids, Didsbury, Banff, Gleichen, Okotoks, High River, Nanton, Claresholm, Crow's Nest, Pincher Creek, MacLeod, Lethbridge City, Lethbridge district, Cardston, Calgary City (2 members), Medicine Hat, Ribstone, Stettler—Total 19 constituencies, 20 members.

The cities of Calgary and Edmonton are not divided into two constituencies each, but the whole electorate will vote for two candidates.

GIRL WAS DUPED TO NORMALIZE MAN

Windsor, Feb. 25.—A young woman whose name is unknown, called on Police Magistrate Leggatt today and swore she was married in the magistrate's outer office last Tuesday afternoon by a tall dark man, who said he was a minister. The magistrate was in his office the entire afternoon. The young girl who says her home is in Gross Point, Mich., states that the "minister" handed the marriage certificate to her husband, who promptly tore it up. The supposed husband denied the marriage and later fled. It is undoubtedly a false marriage, but the nerve of performing it in the city hall, especially in the outer office of the police magistrate, to give the marriage some color, is one of the boldest and most extraordinary on record.

MURDERED BY TRAMP

Hamilton Girl is Shot by Tramp Who Was After Money—Girl Refused to Stop Screaming—Police Believe the Man Was Crazy.

Hamilton, Ont., Feb. 25.—Ethel Kinrade, the second daughter of T. L. Kinrade, principal of the Canon street school, was murdered this afternoon by a tramp thief at her home on one of the best and busiest residential streets of the city. No trace of the murderer can be found tonight. The victim, 24 years of age, was in the house with her elder sister Florence. The latter found a stranger in the hall. He followed her to the kitchen, produced a revolver and demanded money. She gave him \$10. The other sister Ethel, came down the back stairs and "blatantly" screamed. "Shoot us or I'll shoot" shouted the robber. The girl became hysterical and kept on screaming. The thug shot and again commanded her to keep still. She continued screaming and he emptied the revolver into her body. Five bullets took effect, one piercing the heart and another the head.

The thief then turned on the elder sister with the empty revolver and said that unless she kept quiet he would finish her. She tried to wrench the revolver away but he freed himself and jumped out the parlor window and disappeared. That was the last seen of him.

The man had been seen loitering around the house all day and as he had been around before Mrs. Kinrade decided to go down town and report him to the police. She had hardly left the station when the phone rang and a message came that the daughter had been murdered.

The murderer was described by the elder sister as thick set, 5 feet, 7 inches tall and about 35 years of age. He was dark complexioned, with a heavy dark moustache. The police regard the deed as that of a crazy man.

New York, Feb. 25.—An attempt is being made by the physicians of the Harlem hospital to normalize a man of 27, who has the stature and mental development of a boy of nine. They are feeding him on certain portions of a sheep to replace secretions which have been missing from his body since he was six months old. Harry Needleman is the patient. "When he was six years old he fell from a chair and injured his neck," the man's father, told the doctors. He was taken to the hospital and to save his life his thyroid glands were removed. Without these glands doctors say both physical and mental development is three or four times as slow as with them. The doctors hope that within three or four years they may bring him to a normal condition.

CHAPPED FROM FINGERS TO ELBOWS.

Boys' Agony Relieved by Zam-Buk.

If you are suffering from badly-chapped hands you will be able to comprehend a little of the agony which Henry Walker, of 14 Manufacturers Street, Montreal, endured before Zam-Buk gave him relief. His mother, selling of the case to a Press representative, said:—

"Henry works with his shirt sleeves pulled up above his elbows, and passing from a warm room to the biting cold, as he was obliged to do, he got the worst case of chapped hands and arms I have ever seen. From his fingers to his elbows was one mass of raw flesh, with bad cracks here and there. Whenever he washed it brought tears to his eyes, the pain was so acute. He used all kinds of ointments and salves, but nothing relieved him really until he tried Zam-Buk. The pain seemed to take away the burning and smarting almost at once. The cracks began to heal, and a few applications of the balm cured him. His hands and arms are now smooth and soft."

"We have also used Zam-Buk for other emergencies. I sustained a burn on one of my fingers. Zam-Buk took the fire out and healed up the sore. It really seems a wonderful household preparation. On one occasion my son Harry had his feet frozen and swollen and discolored, but Zam-Buk both relieved the swelling and removed the discoloration. Zam-Buk is so handy and so effective almost all ailments keep a supply handy."

Miss Hattie Bertrand, of Salisbury, (Ont.), says: "Every winter I suffer from chapped hands, but I have found a cure in Zam-Buk. Applied at night, it heals the cracks by morning, and takes away all the soreness. Similar effects follow its use for eczema, scalp sores, blood poisoning, ulcers, ringworm, children's sores, cuts, burns, and bruises. It also cures piles. All druggists and stores sell at 50c. a box; or post free from Zam-Buk Co., Toronto, or price.

What it Meant to Bill. Patrick Jones, New York's superintendent of school supplies, was talking at a dinner about corporal punishment. "Corporal punishment in our schools is no more," he said, "and that is a good thing. Undoubtedly, though, many a boy showed wonderful pluck."

Deafness Cannot be Cured. Deafness cannot be cured by any means, but the deafened portion of the ear can be treated. Deafness is caused by an inflammation of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

Minard's Liniment Cures Colds, etc. An amusing anecdote relating to the King's recent stay at Brighton was related the other evening by Rev. Cecil Maunsell. The reverend gentleman, who vouched for the authenticity of the story, said that a few days ago a boy walked up to his Majesty as he was strolling along the esplanade at Hove, and said to him:— "Mister, can you tell me the time?" "Yes," replied the King, taking out his watch, "it is a quarter to one."

Ayer's Coughs of Children. Especially night coughs. Nature needs a little help to quiet the irritation, control the inflammation, check the progress of the disease. Our advice is—Give the children Ayer's Cherry Pectoral. Ask your doctor if this is his advice also. He knows best. Do as he says.

A LIVELY PHASE.

And the Poor Dear Girls Didn't Enjoy It a Bit.

"Aren't you afraid to go home alone, girls? If you'll wait just a few minutes John will be home, and he will be glad to go over with you." Thus spoke Mrs. Smith to three young ladies who lived 200 yards down the road and who were about to leave her house after an evening call. "Oh, no, we're not afraid! We'll just get out our hats, and then if any one comes for us we'll give battle. This was from the youngest of the three, who flourished a long and dangerous looking pin, finally jabbing it into an imaginary foe. The two others took their hats in their hands, and the three, bidding good night to their hostess, made their way down the path to the gate, all on the alert and in readiness to repel attack. They were as brave and bold as ever warriors were. They turned from the front yard into the road and started toward home.

"Girls, what's that?" The three stopped and listened, but only for a moment. Away back on the road they could hear the footfalls of a man. They went on at a rapid walk. The footsteps of the man grew nearer, and they could hear that he was walking more quickly than he had been. The girls walked faster. The man walked faster. The girls almost ran. The man was coming nearer, and he almost ran. The girls broke from their walk and scurried rapidly on. They were but a little distance from their front gate now. Then, oh, horrors! This man began to run after them! They did not have the strength to scream out. It was all they could do to keep on running. The villain was almost on them now, but they were just a few feet away from their front gate. They got to the gate, opened it, and their pursuer was upon them. They would probably have fainted, but they caught a glimpse of the man who had chased them, and it was the brother of two of them.

Placing Table Silver. Where and How Forks and Spoons "Ought to Go." Many inexperienced hostesses who wish to give a more or less formal luncheon or dinner are not quite sure how forks and spoons should go. Custom varies somewhat in this respect, and just at present it is not so much in favor to have an array of silver resembling a jeweler's display at each plate. Only enough for one or two courses are laid.

Cure for Nerves. They May Be Calmed by Silence, Solitude and Sleep, Says One Writer. In an article on "Nerves" published in Harper's Bazar the story is told of one of our noted scientists who went to Dresden to consult the famous specialist for broken down nerves. On hearing his symptoms the great physician said indifferently:— "Ach so! It is probable that you have—yes, all the geliebten [learned] have neurasthenia naturally." The remedy suggested was "play golf and go to Egypt. You can get Munch beer in Cairo, though it is disgustingly expensive there."

Scott's Emulsion. "I purchased a bottle of Scott's Emulsion and immediately commenced to improve. In all, I think I took 14 bottles, and my weight increased from 133 pounds to 184 pounds in less than six months. I know from personal results the efficacy of Scott's Emulsion."—FRED R. STRONGMAN, 417 Bathurst St., London, Ont.

Had Given Up Hope. But Dr. Williams' Pink Pills Restored Vigorous Health. Medicines of the old fashioned kind will sometimes relieve the symptoms of disease, though they never touch the disease itself; they never cure. Ordinary medicines leave behind them indigestion, constipation and headaches. Purgatives leave behind them feverish and weakened. On the other hand, Dr. Williams' Pink Pills do direct good to the body; the blood and the nerves. They fill the veins with new rich blood; they tone and strengthen the nerves; they cure diseases by rooting it out of the blood. They always do good—they cannot possibly do harm.

Scott's Emulsion. built him up, as it has thousands of others. The strengthening and flesh-producing properties of Scott's Emulsion, are unequalled by any other preparation, and it's just as good for the thin, delicate child as for the adult. Be sure to get Scott's. It's been the standard of the world for 35 years, and it is worth many times the cost of the numerous imitations and substitutes.

Scott's Emulsion. ALL DRUGGISTS. Scott & Bowne, 126 Wellington St., Toronto.

When Your Child Has a Cold

Are you satisfied with anything that you can do for your child's cold?

Or do you search out a medicine of proven value such as Dr. Chase's Syrup of Linseed and Turpentine. How few cases of consumption there would be if every child's cold were looked after as it should be. "Did you ever think of it in this way? It is the neglected cough and cold that leads to the dreadful lung diseases sooner or later. From repeated attacks the lungs are weakened and there comes pneumonia or consumption with their dreadfully fatal results. How watchful parents should be of their children. How careful to use effective treatment instead of trusting to cough mixtures which are often of little value or of harmful effects. Because it is prepared from linseed, turpentine and other simple but wonderfully effective ingredients, Dr. Chase's Syrup of Linseed and Turpentine is particularly suitable as a treatment for children's coughs and colds.

Sunken Reefs. The mishap of the cruiser Yankee brings forth the comment that it is the more remarkable as occurring in the coast "perfectly charted." Preliminary that the Yankee got off her course in a dense fog, it may be said that, while our coast is as well charted as that of any other, it is not so well characterized by many of the points. The methods of surveying the ocean floor to locate reefs and shoals are now undergoing a revolution which when fully accomplished, will reveal to the mariner many dangers which have heretofore escaped record. The old way of finding out reefs and rocks not evident to the eye was by sounding. Now the coast survey proceeds by "sweeping"—that is, by sinking to the depth a pipe-hat, which is trailed along by two boats, one at each end of the cable passing through it. Any obstruction encountered is immediately perceptible and is at once noted, located and observed. Coastal waters are carefully "platted", and each plat is thoroughly gone over. The superiority of "sweeping" over "sounding" is made evident by the fact that in a comparatively limited area of the Maine coast, covering rather more than forty linear miles, fifteen reefs have been discovered heretofore uncharted. It often happens in sounding that the lead line avoids some narrow spindle of rock whose point is just below the surface of the water and which goes uncharted. When the cruiser Brooklyn was gashed by one of these unsuspected pinnacles on our coast a few years ago it was found to be isolated and surrounded with deep water up to within a few feet of its base. Sweeping will minimize the probability of repetitions of such accidents.—Boston Transcript.

McGuigan's Energy. He is Famous Among Railwaymen as a Snow-Fighter. It is doubtful if people realize how big a man is the individual who is about to build a snow-fighter. F. H. McGuigan, the name, by the way, since many are in doubt in this matter, is pronounced as if spelled "McGuigan" and not "McGuigan" in order to help his widowed mother he started out as a water boy on a construction gang until he resigned the position and went to work for the Trunk Railway. Mr. McGuigan's life was one of strenuous activity. On one occasion when, as superintendent of the snow-fighters, he was fighting a snow blockade, he never took off his clothes for seventy-two hours. For forty-eight hours he had not eaten a bite of food, and he had nothing to eat except sandwiches eaten on standing up between rushes at the snowbanks. Talking of that long time the mariner many days. McGuigan's life was one of strenuous activity. On one occasion when, as superintendent of the snow-fighters, he was fighting a snow blockade, he never took off his clothes for seventy-two hours. The West THE WEST COMPANY, LIMITED 1775 Ross Street, Regina, Sask.

R. J. WESTGATE Editor and Managing Director

WEDNESDAY, MARCH 3, 1909.

Don't Bother About Truth.

Our morning contemporary which has its destiny guided by a gentleman who claims to be an honest and upright man, is very fond of casting slurs upon other papers which do not coincide with their second fiddle idea.

On the examination for discovery on October 5th, 1908, the managing editor of the Leader whose company was the defendant in a civil action over publishing statements made by Premier Scott about H. W. Laird, answered questions as follows:

- Q. You have no information in your possession which would entitle you to plead that the charge was true? A. No, I have not in my possession. Q. You have no such information? A. I have no such information. Q. You hope to get information by which you can plead the truth of this libel, don't you? A. I don't hope for it at all. Q. The fact of the matter is that you are prepared to publish this thing if Mr. Scott tells you without enquiring whether it is true or false? A. I have full confidence in Mr. Scott's statements. Q. And you publish these things without enquiring whether it is true or false, if Mr. Scott says so? A. If Mr. Scott makes that statement I am prepared to publish it. Q. Have you made any enquiries to verify this matter one way or the other? A. I have not. Even after the articles were published and their truth denied, the editor of that paper did not make any attempt to find out the truth of falsity of statements made in his paper. On his examination for discovery on 25th of January, 1909, he answered questions as follows:

- Q. Now on your previous examination, Mr. Kerr, you stated that you had no knowledge or information of the grounds for believing the truth of the alleged libel, didn't you? A. Yes. Q. Have you any grounds now? A. No. Q. No more than you had then? A. No. Q. Don't know any more about it? A. No. Q. Have you tried to verify it? A. No. Q. Taken no steps in the matter? Q. You have no information other than you had at that time? A. No. Q. You have taken no further steps to verify this matter? A. No. Q. Yourself or your company? A. No. From the above quotations it will be seen that the editor of the Leader cares not whether what is published in his paper is true or not so long as it serves the purpose of his master, the pigmy premier.

Editorial Notes The Leader will publish whatever Walter Scott tells it to publish, whether true or false.

Will the provincial government government speak out and let the farmers know how they are going to

give protection to the farmers against hail for the coming season. Mr. Langley made a promise on behalf of the government at the recent Grain Growers' convention that protection was to be afforded.

What is to be known as an Eastern Farm-life Promoting Association has been formed in New York, the object being to deter if possible the young men from going west. While everyone will appreciate the motive of this campaign, the west has such attractions that Horace Greeley's advice will still be followed to a very large extent.

Mr. Wainwright at the Board of Trade banquet at Quebec, denied that Sir Wilfrid Laurier had projected the idea, originated with Mr. Hayes, says the Mail and Empire. The Grand Trunk proposed a sensible and business like line, that would have given us a second transcontinental at little expense, to the country. Then Sir Wilfrid Laurier added what railway men describe as "the fool end" of the railway, namely, the part that runs through the Far North, and threatens to ruin the intercolonial by duplicating that line. The sensible part belongs to Mr. Hayes, the fool part to Sir Wilfrid.

Some idea of the amount of money that is sent out of the country, chiefly by immigrants who establish themselves in Canada, was afforded by a return in the House last week showing the total amount of post office money orders issued last year. In 1908 over \$9,000,000 was transmitted in this way to 12 countries, which amounted in the aggregate to the sum already stated. Nearly half the total amount went to Great Britain \$4,200,000, while Italy comes next with \$2,300,000, and Austria third with \$1,541,000. Incidentally it would seem that there has been a large immigration from Denmark since 1906 when only 641 money orders were taken out, and none during the previous year. In 1908, \$16,500 was sent home by Danes resident in Canada.

Press Comment (Nokomis Times.)

The Regina Leader should imitate the example of the paper it tries to imitate and daily remind Hon. Walter Scott of at least one of his promises: "If I cannot prove my charge against Mr. Laird, I will certainly resign."

(Ottawa Citizen.) Over 81,000 people die in Canada every year, and it is estimated by scientific men who have studied the question of public health that one-third of that number die of preventable diseases while yet wage earners and of value to the state as citizens adding to the wealth of the community. From a monetary standpoint Canada loses every year over \$27,000,000 from lives sacrificed unnecessarily.

"I purchased a bottle of Scott's Emulsion and immediately commenced to improve. In all, I think I took 14 bottles, and my weight increased from 133 pounds to 184 pounds in less than six months. I know from personal results the efficacy of Scott's Emulsion."—FRED R. STRONGMAN, 417 Bathurst St., London, Ont.

Let us send you a copy of Mr. Strongman's letter. He had a trying experience, had got run down

Scott's Emulsion build him up, as it has thousands of others. The strengthening and flesh-producing properties of Scott's Emulsion, are unequalled by any other preparation, and it's just as good for the thin, delicate child as for the adult. Be sure to get Scott's. It's been the standard of the world for 35 years, and is worth many times the cost of the numerous imitations and substitutes.

DR. PRICE'S Cream Baking Powder Made from cream of tartar derived solely from grapes, the most delicious and healthful of all fruit acids.

It was pointed out that a strong agitation was being worked up in order that measures might be taken to prevent loss of life at level crossings, but while 207 people were killed in this way last year, over 27,000 died of diseases that are just as preventable if proper measures were taken.

A large annual expenditure is taken to guard against, and stamp out, cholera. Not a cent was expended to stamp out tuberculosis. "The moral is," said Dr. Black, "that it is better to be a hog than a man, and thus be worth saving." Polluted water supply causes typhoid fever and it is only a matter of supervision and expenditure of money to detect the pollution of the water supply and prevent typhoid epidemics. A polluted milk supply is peculiarly fatal to children, of whom we lose 31,000 every year under five years of age, most of them done to death by bad milk.

(Bystander in Toronto Sun.) The King has proved his winning manner in Germany. Now let him try it in Ireland. If royalty had done its manifest duty by visiting Ireland once a year, we should never have heard of Home Rule, and the United Kingdom would not be, as it is now, in imminent danger of dismemberment. What the Irish peasant wants is not a republic, for which he has neither aptitude nor taste, but his potato field. Even George IV., a figure far from imposing or fascinating, was received with enthusiasm and made an impression, which forced O'Connell to strike a loyal attitude for a time. Queen Victoria, when early in her reign, she went to Ireland, had a rapturous reception, and she would always have been as safe in Phoenix Park, as she was at Osborne or Balmoral. She knew she was falling in her duty and resented any hint upon the subject. A court officer, who alluded to it, received a rebuke which obliged him to resign his post. Down to the time of George IV., that people so manifestly disposed to personal loyalty, had never seen its king, except as an invader. The case of John, who went, not exactly as an invader, but for a hostile purpose can hardly be treated as an exception. Why do not ministers press the point of the importance of which they must be conscious.

(Toronto World.) President Roosevelt has resolved to inaugurate a movement for the organization of a world conference to consider a scheme for saving the wood, water and fuel of the universe. All civilized nations are asked to participate and the general invitation was issued by the assistant secretary of the state department on Friday last. With it went a statement showing the need for co-operation in conserving the world's natural resources. This general invitation, it is expected, will act as a sander of international sentiment on the subject and enable the scope and character of the gathering to be gauged. About the value and importance of such a conference there can be no doubt. More especially as regards the timber supply the world, it experts everywhere are to be believed, is now within measurable distance of a famine. Not only so, but in countries where extensive denudation of the forests has been allowed, the volume of the streams has been sensibly, in some cases largely diminished. At the present rate of consumption the more readily available coal resources are also being rapidly depleted and the president and his advisers are confident that a convention where ideas can be exchanged and some general policy adopted will be strongly supported. At a luncheon on Friday President Roosevelt took occasion to express himself earnestly in favor of the project, and was heartily supported by the Canadian and Mexican representatives at the North American conference. Mr. Gifford Pinchot, the United States chief forester, has suggested that as a preliminary measure such a world conference should undertake a complete inventory of the natural resources of the countries that agree to entertain a general scheme of conservation. This might be followed by a discussion of the methods already in force for reforesting and otherwise guarding watersheds, and the economic mining of coal and profitable grazing of pastures. The proposal is really an extension of the united conservation program adopted by the North American convention. New countries are just as deeply interested in the object as the older nations now suffering actually from the wasteful methods of the past,

(Calgary News.) Come on, let's make fun of the farmer. Let's repeat some motheaten jokes about the "rube." Let's call his son a "haysced" and his daughter a "jay." Let's sneer at his wife. For we are city folks. Let's make the farmer ashamed of his job and drive his children to the study toment and the grimy mill with their dilted outsoles. And then when we all get to be city folks we will be a "smart" nation. We will be up-to-date. And then we will all starve to death. Isn't the farmer a joke? Haven't all the "funny" papers said so for 20- or 50- or 600 years? Do we realize that there are only two classes of people in the world: people who live on farms and people who live on farms? Do we realize that ever in the world's history there have been more farmers than there have been of all other people combined? Think then, that not a mill, mine, factory, shop, theatre or railroad could exist were it not for the farmer. He furnishes the raw material from which our food and our clothes are made. All our luxuries represent the profit on the farmer's produce. There is just man and earth in all this great problem of life. The earth yields a living to man and exacts his labor as her price. The farmer applies his labor to the earth and brings forth grain and timber and wool and leather and meat. Then the rest of us take what the farmer has wrested from nature's storehouse and, giving him as little as possible in return, proceed to lugle with the fruit of the farmer's toil in order that we may each have an excuse for eating three meals,

wearing clothes, and sleeping shelter. The mines are needed to furnish materials for machinery to work up the farm product; for railroads and ships to haul it; for coals to measure it with; for wires with which to fence the land or upon which to telegraph market quotations. The brokers gamble in it; the bankers loan on it; the lawyers argue about it; the doctors care for the bodies of the farmers and the rest of the world which is working over farm produce. The preachers are paid out of the crops to care for our souls. Stop and think if you can conceive of a single human being—including hopes—whose very life does, not depend, daily upon the skill and industry of the farmer. There is no one.

COMIC AND SERIOUS

He (in despair)—How shall I ever make an impression upon you? You have a heart of adamant. She (cooly)—You might try a diamond. Johnnie, I will give you a quarter if you will get me a lock of your sister's hair. Gimme four bits an' I'll git you de whole bunch. I know where she hangs it nights.—Houston Post.

"I notice," said Mr. Sharp at the boarding house, "that Miss Flirt gets a great many letters in gentlemen's handwriting." "Perhaps," said young Mr. Pert, "she has been inviting sealed proposals."—Baltimore American.

He was her "very best young man" and she was doing all she could to encourage him. "Did you know," he asked "that I passed your house last evening?" "Of course I did," she answered promptly. "Did you think I wouldn't know your step?" And the young man grew thoughtful and grave, for he had passed in a cab.

A lady on board an ocean liner seemed very much afraid of icebergs and asked the captain what would happen in case of a collision. The captain replied: "The iceberg would move right on madam, just as if nothing had happened," and the old lady seemed greatly relieved.—Success.

A young teacher whose efforts to inculcate elementary anatomy had been unusually discouraging at last asked in despair: "Well, I wonder if any boy here can tell me what the spinal cord is." She was met by a row of blank and irresponsible faces till finally one small voice piped out in great excitement: "The spinal cord is what runs through you. Your head sits on one end, and you sit on the other."—Rochester Herald.

Misery in Stomach.

Why not start now—today, and forever rid yourself of Stomach trouble and Indigestion? A dieted stomach gets the blues and grumpiness. Give it a good eat, then take Pape's Diapessin to start the digestive juices working. There will be no dyspepsia or belching of Gas or eructations of undigested food; no feeling like a lump of lead in the stomach or heart burn, sick headache and Dizziness, and your food will not ferment and poison your breath with nauseous odors. Pape's Diapessin costs only 50 cts. for a large case at any drug store here, and will relieve the most obstinate case of Indigestion and Upset Stomach in five minutes. There is nothing else better to take Gas from Stomach and cleanse the stomach and intestines, and besides one triangle will digest and prepare for assimilation into the blood all your food the same as a sound, healthy stomach will do it. When Diapessin works, your stomach rests—gets itself in order, cleans up—and then you feel like eating when you come to the table, and what you eat will do you good. Absolute relief from all Stomach Misery is waiting for you as soon as you decide to begin taking Diapessin. Tell your druggist that you want Pape's Diapessin, because you want to be thoroughly cured of Indigestion.

PAYS DAMAGE FOR LIBEL. Edmonton, Alta., Feb. 24.—The case of M. A. Harpell, of Wainwright vs. the Chronicle Publishing Company, of Strathcona, was heard in the supreme court before Mr. Justice Stuart, and resulted in judgment of \$500 and costs against the Chronicle. The action arose out of certain statements published in the Chronicle before the recent Dominion election, in which the plaintiff was charged with being a certain notorious Miley Harpell, who was accused of ballot box stuffing in connection with Ontario elections some years ago. The statements played a prominent part in the election in Strathcona constituency and were repeated from platform to platform. Judge Stuart in giving judgment, severely censured the defendants, stating that they were in no way justified in making the assertions they did.

MALONE SENTENCED

Simcoe Chief of Police Gets Life Sentence for Attempting to Murder His Fellow Policeman—The Judge's Address to Prisoner.

Simcoe, Ont., Feb. 24.—Imprisonment for life in the Kingston penitentiary was the sentence imposed by Chief Justice Mulock on Archibald W. Malone, found guilty by a Norfolk county jury of attempting to murder his fellow constable, William Wilkins, on the morning of December 1st last. The jurors was out two hours and ten minutes. The jurors returned to the court room at 7.35. "Have you agreed upon a verdict?" asked the clerk. "We have," said the foreman, "It is guilty."

W. E. Kelly, K.C., counsel for the defendant, asked that the jury be polled. Every man of the twelve said "guilty" in a clear voice. "What have you to say Malone, why the sentence of the court should not be passed upon you?" said his lordship. "My counsel will speak for me, my lord," replied the prisoner. Mr. Kelly pointed out that his client had four children, that his record had previously been good, that he had served in South Africa, and had soldiered for Britain for eight years. The judge said he had no doubt of the correctness of Const. Wilkin's evidence. Addressing the prisoner, he said: "You were employed and trusted as a police officer, sworn to protect the people of the town as to lives and property. Shortly after your appointment to the force you started on a career of crime. You engaged Wilkins as your assistant. In some way you obtained the mastery over him; your mind was apparently the stronger. It was not unnatural that he should feel to some extent compromised by what he had done. His duty was to report to the authorities; he did not do so. From that moment he seemed to become as clay in your hands. In November there were three crimes in rapid succession. At the end of that month, it seemed to come to your mind that your duty lay in the removal of your comrade. You seem then to have prepared details for your crime. Nothing but a kind providence prevented his death. You sought to take the life of the man you had made a criminal. The criminal code says your act made you liable to imprisonment for life. In the case of imprisonment for life there is always an opportunity for executive clemency."

His lordship then passed sentence of life imprisonment. Malone showed no emotion while sentence was being passed, but Mrs. Malone broke into tears when the sentence was pronounced. Mr. Kelly asked for a reserve case, but was denied Malone was given a few days to straighten up his personal affairs. The crime for which A. W. Malone, former chief of police of Simcoe, Ont., was sentenced to life imprisonment, was the shooting of his assistant Constable Wilkins. The latter met his chief about 1 o'clock on the morning of December 1, 1908, in a park in the town. As he approached the appointed spot he was fired upon several times, and received wounds which it was believed at the time would cause his death. He had a miraculous recovery. Immediately after the shooting he named Malone as his assailant and the latter was arrested and tried on the charge, the evidence indicating that Malone had coerced Wilkins into a career of crime during which the two men acting in conjunction, accomplished the robbery and destruction by fire of several business places in Simcoe.

The Chinook

Sweet wind of God, thou Chinook breeze! The crocus blooms, the willows burst Where mothers, with their trembling knees, Went stumbling at the winter's worst. Dumb silence held the cursed land, And man and horse were equal brutes; But lo! last night the mallow had Came whistling, sweet as southern flutes. The rolling prairie's all a-stream; In bluest skies the white clouds dream, And water flows by bank and rift. Winter's keen smart and wary ride, The sodden brown of last year's grass, Are gone like smoke, for far and wide The range is greening as we pass. The pinto strikes fresh gopher-mines Upon the Chinook's fragrant path, And we forgot in spring's sweet signs, We ever knew the winter's wrath. —S. A. White, in The Canadian Magazine for March.

BAT. NELSON ABROAD Battling Nelson, telling his life story in the Chicago Tribune, refers as follows to his trip to Europe:

I was met by a committee of English sports and escorted to London. There I put up at the Cecil hotel. I had a great time for a couple of days and then accepted an engagement at one of the big music halls at Newcastle on the Tyne.

As I stood there in swell clothes I couldn't help going back to the day I liked the Terrible Unknown in Wallace's circus and had my coat and vest stolen as well as my highly prized Waterbury watch.

I met with such overwhelming success as a drawing card that two days after my opening night I was signed for a twelve-week contract in the city of London on the Holborn Empire circuit.

SUFFRAGETTES SENTENCED

English Women of Rank Among Those Who Have Been Sentenced for Causing Disturbance—Took Sentence Cheerfully.

London, Feb. 24.—Among the thirty or more suffragettes arrested this evening were Mrs. Pethick Lawrence, Lady Constance Lytton and daughter of a former vicar of India, Miss Stratford Dugdale, daughter of Commander Dugdale and cousin of Hon. Wm. R. W. Peel, who was elected yesterday in a by-election as a member of the house of commons for Tansley, Miss Daisy Solomon, daughter of the ex-premier of the Cape Colony and Mrs. Catherine Elizabeth Corbett, an aristocratic supporter of the suffragette movement.

The high social position of many who are taking part in the movement makes the action against them more and more embarrassing to the government.

The police abandoning former tactics of barring the approach to the house of commons adopted the new plan of breaking up the procession close to Caxton hall. They permitted the suffragettes to proceed simply by couples escorted by small parties of spectators. Finally, Mrs. Lawrence, the leader and several others were arrested.

The news caused much excitement in Caxton hall. Mrs. Saul Solomon volunteered to lead a second deputation to the house, this met the same fate but provoked more street scenes and a much larger number of arrests.

A third deputation started from the hall, but this time the destination was Brook's Club where the premier was dining. Near St. James palace a large force of police descended upon the procession, compelling it to break ranks, and more arrests were made. Only two or three women reached the doors of the club where they were stopped by the police and sent away.

The women who were arrested were locked up for the night and will be arraigned in the Bow street court tomorrow.

London, Feb. 25.—Refusing to give security for their future good behavior, the women suffragists who were arrested last night while attempting to reach Premier Asquith, to present to him a petition in the interests of the cause, were today sentenced to imprisonment. Most of the terms were for one month. An exception was made in the case of Mrs. Pethick Lawrence, who, having a previous conviction against her, was sentenced to two months imprisonment.

Lady Constance Lytton, sister of Lord Lytton, and daughter of the former vicar of India, warned her friends that if they secured her release by providing security, she would repeat her offence.

Mrs. Lawrence made a brief address to the judge on behalf of her fellow prisoners. She asked the magistrate to note that the arrested women did not belong to the disorderly or law breaking classes, but were women of honorable reputation, and that many of them had done service for the welfare of the community. They would not consent to be bound over to keep the peace, Mrs. Lawrence declared, and she claimed that they were entitled to treatment as political prisoners.

Most of the twenty-eight women sentenced took their punishment in dignified silence. One asked not to be given the insulting alternative of being bound over, because that would be, she said, "simply suggesting that I am a coward; not a woman at all." All of the women were committed to the "second division" which in the case of the second batch of prisoners who belong mostly to the educated classes, entails drastic changes in food and method of living.

They will all be garbed in the rough and uncouth ready-made prison garments spotted with a broad arrow, and their food will be the ordinary prison fare of thin porridge, watered cocoa, and a small allowance of meat and potatoes once a day. They will not be allowed to communicate with each other, and they will be obliged to exercise in single file in the prison court yard. In spite of this far from alluring prospect, all the women went off to their uninviting captivity, giving outwardly signs of the utmost cheerfulness.

Scott Was Buried. Rev. Thomas Lawson of Radisson, Sask., states that he has in his possession a statement written by one Setter, of Poplar Point, Man., in which the writer states that in the spring following the assassination of Thomas Scott by the Lepine party at Fort Gary, a corpse was found on the banks of the Red River in the vicinity of St. Peter's. Mr. Setter personally identified the remains as his although the body was decomposed. Several assert that the remains were none other than those of Thos. Scott. The ears showed plainly that the person when alive wore ear rings. There was a rope around the neck. This rope was frayed, the inference being that a weight had been attached to it for the purpose of sinking it

SCOTT DENIES

That He Is to Be Appointed to the Railway Commission—Thinks the Idea Simply Absurd—Calder Tells About Railways and Telephones.

Toronto, Feb. 24.—The story that I am to be appointed to a position on the board of railway commissioners for Canada, is absolutely untrue, and was originated by the opposition paper in Regina. It is perfect nonsense. The proposal was never even suggested to me and moreover was never even thought of by me." This emphatic statement was made by the Hon. Walter Scott, premier of Saskatchewan, in an interview tonight. He dismissed the idea as being "simply absurd."

The premier had nothing but good things to say of the board, however. Judge Mabee and his colleagues were working wonders in the west, he declared. As to the general conditions in the west, Premier Scott said, "Every one is happy and all are looking forward to a grand season."

When asked as to the development of various railways and provincial telephone systems he referred the interviewer to the Hon. J. A. Calder, commissioner of railways and telephones who was present. The minister said that roughly speaking, there would be about 500 or 600 miles of railway and about the same length of telephone lines constructed during the present year.

As to whether grain will be shipped to Europe via the Pacific, Premier Scott said that would soon be a matter of first importance in the west. At present the states on the Pacific, California and others were sending grain around the horn, and he felt sure that when the route was shortened there would be a great change from the existing conditions.

Mr. Scott is not enjoying the best of health and was only stopping over tonight in Toronto. He leaves tomorrow in company with Geo. W. Brown of Regina, for a six weeks' trip to Jamaica in the hope that his health will improve.

Premier Resigns. St. John's, Nfld., Feb. 25.—Following the issuance tonight of a proclamation by Governor MacGregor postponing the legislature until March 4, Premier Bond notified his supporters that his resignation will be handed in in a day or two. Sir Edward Morris will be called upon to form a government.

Lewis. C. Shirkey is expected home today. A very successful dinner and dance was held at the Lewis school house Wednesday, 24th ult.

Coyotes are plentiful in the neighborhood.

A box social is to be held at the Lewis school house St. Patrick's day, and the money will in all probability be applied towards the purchase of a school house organ.

Feb. 27th, 1909.

What will appear very interesting to many people here is the article taken from a New York daily paper, giving a simple prescription, which is said to be a positive remedy for back ache or kidney or bladder derangement, it taken before the stage of Bright's disease:

Fluid Extract Dandelion, one-half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces. Shake well in a bottle and take in teaspoonful doses after each meal and again at bedtime.

A well known druggist here at home, when asked regarding this prescription, stated that the ingredients are all harmless, and can be obtained at a small cost from any good prescription pharmacy, or the mixture would be put up if asked to do so. He further stated that while this prescription is often prescribed in rheumatic affections with splendid results, he could see no reason why it would not be a splendid remedy for kidney and urinary troubles and back-ache, as it has a peculiar action upon the kidney structure, cleansing these most important organs and helping them to sift and filter from the blood the foul acids and waste matter which cause sickness and suffering. Those of our readers who suffer can make no mistake in giving it a trial.

EASY TO MIX THIS

Prepare at Home by S aking Ingredients Well in a Bottle.

BUYING PHONES

Negotiations Under Way for the Purchase by this Province of the Bell System Along Similar Lines to Manitoba Deal.

Montreal, Feb. 26.—At the annual meeting of the Bell Telephone Co. it was stated that negotiations are progressing with the Saskatchewan government looking towards the purchase of its telephone plant there by the province. Representatives of the province are in the city conferring with the company. No figures are given in the announcement. The matter is along lines of the purchase of the system in Manitoba by the government of that province.

Foxleigh. A meeting of those interested in forming a rural telephone company in this district was held in Stirling school Saturday afternoon to discuss the situation. Over twenty were in attendance. T. Walsh Turner from the telephone department of the provincial government, was present and explained the work to be done in the formation of a company. It was decided to form a company and build a line if proper arrangements could be made. The provisional directors were chosen as follows: President, M. H. Westgate; Sec-treas., W. C. Lowe; Directors, E. Day Wilson, Andrew Ormiston, and F. Lihel.

The secretary was instructed to get information as to cost of material, connections to be made and list of shareholders. When this information is secured another meeting will be held.

Robert Cowan is at present under the doctor's care in the hospital at Regina.

Foxleigh Glee Club visits Condie on Tuesday evening to give a concert in St. James' parish hall.

Mr. Chas. Boulding who has been visiting at Victoria, is expected to return shortly.

It is rumored that the bachelor girls of this district will give a dance in the future.

Pelletier Party Safe. Winnipeg, Feb. 26.—"Excepting Sergeant Donaldson, who was drowned at Marble Island last fall on the way to Fullerton, Inspector Pelletier and his party are quite safe, having arrived at Fort Churchill on Jan. 11, 'the day I left.'" This statement from Constable Brown, R.N.W.M.P., who came in from Fort Churchill under orders today, completely dispels the rumor regarding the disaster to Inspector Pelletier and his party in the far north.

Sergt. Donaldson who lost his life was a native of Ontario, and was a highly regarded member of the Constabulary. Cons. Brown could give no details of his death. Referring to his own trip south, Const. Brown said he left the far north post on

ABUSING PRIVILEGES

Ministers at Ottawa Accused of Abusing Their Franking Privilege—Election Literature Sent Free Between Sessions.

Ottawa, Feb. 27.—The feature of the session yesterday was a lively discussion of the abuse of the franking privilege during the debate on the post office department in committee of supply. Five cases of franks were presented to the postmaster general for judgment in which three ministers were concerned. A large quantity of Liberal literature had been franked after the last session. The initials were not clear, but appeared to be "R.F.C." and it is believed by some to be Sir Richard Cartwright.

Hon. Rodolphe Lemieux was unable to identify the frank and demurred the idea that it was a minister of the crown. As to exercising the privilege after the session, Mr. Lemieux referred to the pre-election session of 1904, when parliamentary corridors were blocked with campaign literature sent by both parties.

Regarding the Liberal weekly political letters franked "J.B.," the solicitor general expressed the opinion that the Hon. Jacques Bureau had not abused the franking privilege; it was party work.

Mr. Taylor, New Westminster, called in an exaggerated instance of a contemptible form of petty graft.

Hon. Mr. Bureau declared he had no apology to make. Hon. Mr. Lemieux declined to frame franking regulations, although he permitted the abuses to exist.

Martin Burrell, Yale-Cariboo, believed in doing what was best for the country regardless of party.

Hon. Geo. E. Foster declared that abuse of the franking privilege was the same as theft, and the burglar who took money from the post office should be sent to prison. He regretted the fact that the solicitor general was glorifying in abusing his privileges. Referring to frank "S.A.F. M.A." on election literature, which the postoffice decided came from the department of agriculture, Mr. Foster hardly thought anyone would have the gall to use Hon. Sidney Fisher's frank without the latter's consent.

Mr. Fisher stated that he had given no authority to use his frank.

Dr. Clarke, Red Deer, deprecated Mr. Foster's introduction of resolutions into the debate. He thought Mr. Burrell should rebuke Mr. Foster, and advise he would not go to Mr. Foster for an example of high-mindedness.

Clarke Brabury, Selkirk, remarked that tons of campaign literature came into his constituency and all through the west a day or two before the election. He was glad to see the postmasters stand. An enquiry should be made and the guilty party punished.

Mr. Barr appealed to Mr. Foster that he had never franked a letter for one not strictly entitled to it.

Mr. Foster denied calling the solicitor general a robber. He could not be responsible for the manner in which some parties interpreted his speech, and compared Dr. Clark to a fly buzzing between the bull's horns. The fly thought he was doing a big thing, but it did not bother the bull.

Arthur Meighen, Portage la Prairie, asked what was the minimum salary paid to postmasters. Mr. Lemieux answered \$35 a year. Mr. Meighen cited the case of the postmaster in Dauphin, where, he said, the postmaster had to meet trains in the small hours of the morning, and was paid an annual salary of one dollar per year. This was paid quarterly, said Mr. Meighen, and the bank charged twenty-five cents negotiating a cheque.

Mr. Lemieux replied that there was one postmaster who was paid only 99 cents by the department, but who made \$600 or \$700 by reason of his position in the mail service which gave him a reputation as a regular and dependable carrier.

John Herron urged more frequent mail service in the west, but Mr. Lemieux replied by stating that in the mail routes made recently he sympathized with the people and was doing the best he could. Over six million dollars was voted before the house adjourned.

ANOTHER BANK FOR WEYBURN. Mr. A. F. Angus, the manager of the Bank of Montreal at Regina is in town in the interests of that institution. That part of the Waverly hotel lately occupied by a pool room, has been secured, and in a few days this magnificent banking institution will be in a position to do business for the public. The fact that this bank is locating here, speaks well for this town. This makes the fourth bank that is located in this growing town. While the banks now doing business here have striven as well in the past, we are sure that all will gladly welcome this new enterprise. We are certain that with the coming days the business of Weyburn will so increase as to afford ample openings not only for a new bank, but for many more business enterprises to locate among us. The more of these

VETERANS' MEETING

Col. S. B. Steele Elected to the Presidency—Associations From All Provinces Affiliate—Parade Dinner at Rideau Hall.

Ottawa, Feb. 28.—At a meeting of Canadian South African Veterans Saturday over which Major Winters presided, it was intimated that eleven associations were now affiliated, including Halifax, Charlottetown, St. John, Quebec, Montreal, Ottawa, Toronto, London, Winnipeg, Regina, Calgary, Vancouver and Victoria.

W. A. Lowry intimated that he had interviewed Hon. Frank Oliver, who informed him that the veterans could hold their grants for a year without performing settlers' duties, and in other such matters would be treated with consideration.

A committee was appointed to which such matters as distribution of the South African patriotic fund will be referred. It was decided not to interfere on behalf of the other associations of veterans who are endeavoring or might endeavor to secure land grants. The following officers were appointed: President, Col. S. B. Steele, Calgary; vice president, Major C. F. Winters, Ottawa; secretary, Andrew Miller, Ottawa; provincial vice presidents, Nova Scotia, Major W. O. Weeks, Charlottetown; New Brunswick, Major B. R. Armstrong, St. John; Ontario, Col. J. S. Ryerson, Toronto; Manitoba, Major A. C. Macdonell, Winnipeg; Saskatchewan, Lt. Col. Saunders, Regina; Alberta, W. A. Lowry, Calgary; British Columbia, Capt. W. Hart, Melgat.

On Saturday evening the Paardeberg dinner was held at Rideau hall. About a hundred officers were present. Earl Grey, who had Sir Frederick Borden on his right and Gen. Sir Percy Lake on his left made a particularly happy speech. The proceedings were informal.

Let your religion make you more considerate, more loving and attractive, more able to think and act enter into the pleasure and interest of others.—Arthur C. A. Hall.

enterprises that can come to us the better. While they do business, getting part of that which they do at first from already existing firms, yet they also create more business, so that the loss at first is soon regained in the increasing volume of trade. —Weyburn Herald.

TO LOSE LICENSE

Maple Creek, Sask., Feb. 27.—There is much comment among the four hotel keepers as to which hotel will lose its license. According to the present law the town is entitled to three hotels while there are four now. The strong feeling among the majority of the citizens is that they desire rather to have local option than the present system. Whiskey is being sold in other places than hotels. Temperance people and many others desire to have a vote taken on local option this year.

BOTTLED SUNLIGHT

Boston, Mass., Feb. 28.—That he has successfully solved the problem of storing up the sun's rays and converting them into electrical energy, a problem on which the scientists of the world have been diligently working, is the claim made by a Boston inventor, George S. Cove. Mr. Cove demonstrates the success of his invention by lighting his workshop at 468 Somerville avenue, Somerville, with electricity generated from a simple apparatus on the roof. Electricians from the Institute of Technology, who have watched with interest his experiments, declare themselves enthusiastic over his success. Cove says he can build a household machine for \$100 which will last ten years.

Local and General

Mr. and Mrs. J. Fenner, of Francis are in the city.

J. F. L. Embury has been appointed a member of the public library board.

The Regina city band will enter the band competition to be held in Winnipeg next July.

Chas. Boulding returned on Saturday from Victoria, where he has been spending several months.

Douglas Angus of the Bank of Montreal staff has been transferred to the branch at Victoria, B.C.

A. F. Angus was at Weyburn this week arranging for the opening of a branch of the Bank of Montreal.

F. C. Tate, M.L.A. addressed the students of the Federal Business College last evening on "Our Flag."

N. B. McInnis and L. Rankin left for Winnipeg on Sunday to attend the Grand Encampment of the I.O.O.F.

Mrs. F. N. Darke received word last Thursday of the death of her father, Joseph Wise of Charlottetown, P.E.I.

A hockey team from Weyburn defeated the Regina boys here last Thursday evening, the score being 4 goals to 8.

The Trades and Labor Council has written to the city council advocating the extension of the city franchise to householders.

Frank Lee, a well known and trusted employee of the Northern Crown Bank at Saskatoon is missing, and so is about \$5,000 in cash.

Dr. J. L. Barry, who has been practicing in Regina has moved to Radisson, Sask., where he has taken over the practice of Dr. Snyder.

Mr. T. Zeats, the new chief of police arrived in the city on Saturday and on Monday assumed his duties. Mr. Harwood will remain on the staff for a time.

The death occurred on Sunday evening at 1630 Angus street of Jane Martha Price, aged 63 years. The funeral is being held today and is conducted by Geo. Speers.

Personal—Anyone acquainted with Mr. Fredk. Garwood, fireman, will confer favor by sending his address to the West Office at once. Something to his advantage. Important.

Regina is to be in the professional baseball league this year. The Western Canada League which was formed last Monday will consist of Calgary, Edmonton, Brandon, Winnipeg, Lethbridge, Regina, Medicine Hat and probably Moose Jaw.

The death occurred at Grand Coulee last Monday morning of Elizabeth Curry, aged 6 years and 18 days, from diphtheria. The father of the child and the family had just arrived from the east last Thursday. The funeral which was held yesterday was conducted by Geo. Speers.

It is not generally known that veterans' scrip may be filed on by women, but it has been officially announced that any woman British born or declaring her intention of becoming a British subject, may act as proxy in doing the duties. In this way a husband and wife may each hold government land.

A deputation representing the combined athletic associations of the city waited upon the city council on Monday evening and urged upon the council the advisability of enclosing Dominion square and making it suitable for athletic purposes. The deputation consisted of P. McAra, Jr., Dr. W. A. Thomson and Rev. G. C. Hill.

Books of all classes to the number of 2,472 were loaned by the Public Library during the month of February, as against 1,117 for January. The circulation was made up as follows: Philosophy 11; Religion 36; Sociology 34; Natural Science, 29; Useful Arts 20; Fine Arts 22; Literature 47; History 63; Travel 67; Biography 52; Fiction 1,706; German 74; Juveniles, 252. For the week ended Saturday last the figures were 636 against 678 for the preceding week. There are 662 borrowers on the register.

Sir Andrew Fraser, lieutenant governor of Bengal, is coming to Canada to attend the National Missionary Congress, March 31st to April 4th, upon the invitation of the Canadian Council, ably seconded by Mr. John H. Mott, who is in England doing special work in connection with the college. Sir Andrew was moderator of the Presbyterian General Assembly of India last year, and is one of the most zealous workers in that country. His son-in-law, Rev. J. H. Oldham of Edinburgh, is the secretary of the committee in charge of the World's Conference of Missions to be held in Edinburgh, June 1910.

A decision has been given in Vancouver that a real estate agent cannot receive a secret profit on a purchase. An agent was instructed to buy a certain piece of land he had listed at \$220. This he obtained at \$180 and put the difference in his pocket. A second bit of land was represented as demanding more than \$220 and the purchaser paid it, the agent again making the difference. The court held that the real estate

man was in the position of an agent to the buyer and that therefore it was his duty to acquire the lots as cheaply as possible. His commission was to have been made out of the vendor.

Last Saturday was the anniversary of the surrender of the great Boer General Cronje, at Paardeberg, in 1900, with his army of 5,000 men and six guns, to the Imperial forces under Field-Marshal Earl Roberts, after a running fight lasting five days. This was the big fight in which the Canadians contingent received its baptism of fire. Many members of the Dominion force were, in fact, killed and wounded in the charge which was instrumental in causing the Boers to surrender. This was one of the first real successes of the Imperial Army in the war and was followed on Feb. 25th by the relief of Ladysmith by Lord Dundonald, and on March 7th by Lord Roberts' triumphant advance on Bloemfontein, which surrendered to the British forces six days later.

John Andreas, a blind resident of the east end died early last Thursday morning at the home of his son-in-law, John Nesmat. On Wednesday evening he ate his evening meal and appeared in his usual good health. He got up about two o'clock and being unable to get into bed again, called upon his daughter for assistance. He died shortly after being helped to bed. Dr. Black was called in about 9 o'clock next morning and he reported the circumstances to the coroner, Dr. Thomson. On account of the suddenness of the death of the old gentleman, suspicion had been aroused and the coroner decided to hold an inquest. The jury consisted of J. N. Stewart, Geo. Ross, J. Noonan, Geo. Webb, Geo. Ferguson and Hugh Armour. The contents of the deceased man's stomach was examined by Dr. Charlton. As a result he reported that there was nothing therein which would have caused death and the jury brought in a verdict of death from heart failure.

FOR SALE Four well-broken oxen, young and in good condition. Apply to W. SIMPSON, 48-51 Box 966, Sec. 10-18-30. Regina.

NOTICE Notice is hereby given that application will be made by the Grand Trunk Pacific Branch Lines Company to the Parliament of Canada, at the present session thereof, for an Act amending the Act of Incorporation, a Statute VII, Chapter 96, by empowering the said Company to lay out, construct and operate a line of railway from a point on the company's authorized line at or near Regina, Province of Saskatchewan, thence westerly to Moosejaw, a distance of about 46 miles, and to issue bonds, debentures or other securities in respect thereof to the extent of thirty thousand dollars per mile.

W. H. BIGGAR, Solicitor for Applicants, Montreal 15th February, 1906. 47-51

LADIES' SUITS

Some Remarkable New Spring Suits at \$20.00

For you, Madam, with a proper desire to save. It's no great art to provide style in a \$100.00 garment—almost any maker can accomplish it. But to make the woman who wears a \$20.00 suit look notably well dressed—that to us is a far greater triumph. See how well we've achieved it in these smart New Spring Suits at \$20.00.

Two Splendid Styles

One is with a four-buttoned medium length coat, has one breast and two side pockets, trimmed with self material, fancy mercerized lining. Skirt is severally gored, model finished like the coat with self trimming, cloth is a very fine Serge—a material that will give good wear.

Another is a strictly tailored style in the new Shadow Striped Worsted. You might easily pay a tailor several times the price and not get one half so disfigured.

It will pay you to see them at once as good things do not linger here.

GINGHAM, CHAMBRY, ZEPHYR AND MARATHON CLOTH For New Spring Dresses and Suits

Fresh as the morning dew and as pretty as human skill can turn them out. These lovely Dress Materials carry a touch of summer along with them. This display of charming Cotton Fabrics look so serviceable and so deliciously cool and summerly in their sheer weaves that you could not resist the temptation to buy now. Certainly selections never will be better, and never to our knowledge have we offered better value.

DAINTY GINGHAMS—In plaid and stripe effects, good evenly wove materials, warranted fast colors. The color range consists of pinks, fawns, greys, blues, greens, etc. 34-in. wide. 15c, 25c and 35c per yard.

BEAUTIFUL CHAMBRY—In plain and fancy colors. These goods are reckoned to be best washing and wearing material on the market for summer wear. Our assortment for this season beats all previous records, and the values are undoubtedly the best ever offered. Extra wide. 15c and 25c per yard.

ZEPHYRS—Delicious cool summer fabrics. Often we have our customers remark: "These goods are sweetly beautiful," when shown through our stock. Dainty two-toned stripe and fancy designs in scores of shades to select from. 30-in. wide. 10c, 25c and 35c per yard.

MARATHON CLOTH—This is a medium weight material. Make up splendidly for Spring Suits. Will wear and launder to your entire satisfaction. Beautiful range of shades and effects to choose from. Good wide widths. 15c per yard.
