STATE OF MIND. A man from Nova Scotia and one from British Columbia spoke at the same luncheon during the Canadian Manufacturers' Association convention at Hamilton. The Maritime manufacturer pleaded for further assistance for the Maritime Provinces and asked for greater co-operation from the central provinces in helping the provinces by the Atlantic Coast to solve their problem. The British Columbia manufacturer spoke with a note of keen optimism. He pointed out that the manufacturers on the coast were not close to their markets. They were not in close contact with the Maritimes, and they had highly freight charges to contend with. They had no shipping subsidies and no other favor. Yet they were going ahead and their business, working hard, and not only were they making British Columbia prosperous, but they were optimistic. Perhaps this little study in contrasts is not without food for thought.—Financial Post.

CHEERFUL CIGARS Enjoyment in Every Cigarette

TOURIST TRAFFIC ADDING MILLIONS TO OUR REVENUE. Visitors From States Alone Spent \$150,000,000 Here Last Year. The potentialities of the tourist industry as one of the important sources of income of the Dominion are again illustrated by an analysis which the Highways Branch of the Federal Department of Railways and Canals has just published. The study shows that the revenue during 1924 for the motor tourist traffic alone was in the neighborhood of \$143,405,900. The figure is necessarily an approximation, but it illustrates something of the proportions of the industry as well as suggesting what could be done in this direction were a little studied attention paid to the systematic attraction and entertainment of tourists. One of the leading factors in the building up of the tourist traffic is the construction of good highways. It has been estimated that, on the average, our tourist visitors spend upwards of \$150,000,000 annually, and this average is increasing year by year. The Department of the Interior estimates that 7,370,000, or 48 per cent, of the automobiles in the United States are owned by citizens living in States contiguous to the international border or waterways. There are, therefore, some 25,000,000 potential tourists to Canada in these states. The figure which is necessarily an estimate, illustrates the possibilities in the development of better highways, especially those running north and south. The northern towns would thus be benefited and the outlying territory opened up, as its potentialities better known. No country possessing the admirable climate and scenic beauty of Canada can afford to overlook the development of its tourist traffic. Distribution of the Traffic. The registrations of all types of motor vehicles in the various provinces last year reached the total of 659,321, which was an increase of 11 per cent over 1923, while the 1923 figure was 13.65 per cent larger than that of 1922. The general increase in the number of tourists has been very rapid. During the one to six month period it grew 34 per cent, for the two to thirty day period it increased 290 per cent, and for the one day period, 272 per cent. Ontario reaped the largest revenue from this source. In fact, more than half of the total came to Ontario. Quebec was second with approximately one-

YOUR OWN TOWN
Your own town is where your home is, where your vote is cast, where your children are educated, where your neighbors dwell, and where your life of the greater part of it is spent.

The news that comes from our Washington correspondent of the United States Government's pleasurable business to dispose of, and of the 20 to 50 per cent. Mr. Mellon proposes to take off the income tax, an income tax already insignificant compared with our own, will make many British mouths water.

It is estimated that Vancouver will ship approximately 25,000,000 bushels of grain of the 1924 crop. Shipments already total 21,188,000 bushels. Commitments for almost 1,000,000 additional bushels have been made.

The Railway Problem.
Le Canada. "The Canadian Pacific Railway is prosperous and its prosperity has been and is one of the most beneficial elements in the welfare of the Dominion. The railway therefore is closely related to our economic position. As it is urged that there is not enough traffic for two great railways in competition, and that we cannot hope there will be enough traffic in certain parts of the country in the near future, it would seem that the hypothetical success of the National Railways can be obtained only at the expense of the private company. In one event as in the other, it is the country that will suffer in the long run. In these circumstances it will be the part of wisdom to give due consideration to the project submitted by the Committee of the Senate looking to the working amalgamation of the two railways and their operation by one and the same Board of Administrators. If the present situation is persisted in, either we must continue to pay in deficits enormous sums of money or else we shall lose the relief that can be obtained in the direction pointed out by the Senate Committee."

Compare our lives in Canada today with those of our forefathers fifty years ago. In those days there were few railroads, no motor cars, no telephones, no lighting plants, no radio, nor a thousand other things that make life worth living today. In spite of the fact that conditions are not as good as we would like them to be, Canada is a good place to live in, and your town is the best town in Canada.

BYING LESS FROM UNITED STATES.
Canadian Purchases Show Decline For Year Ending May 31st.
Ottawa.—Canadian purchases in the United States again show a decline in the 12 months ending May 31st, imports from the United States were five hundred and eleven millions, a drop of seventy-two millions as against the year ending May, 1924. Exports to the United States were four hundred and twenty three millions, a declining of five millions from the year previous. Canadian purchasers in the United Kingdom were one hundred and fifty two millions, practically the same figures as for the year previous. Exports to the United Kingdom were three hundred and ninety one millions, an increase of nine millions over the previous year.

"The American people are certainly not decaying, but already they are asking themselves very seriously whether their still young republic is growing up in the image and likeness of the sturdy, liberty-loving, serious-minded men that founded it. Their fathers migrated to the States in search of liberty. Today, most of the liberty enjoyed by United States citizens is enjoyed in open violation of some law or ordinance which the police are unable or unwilling to enforce.

When Their Majesties King George and Queen Mary paid their official visit to the British Empire Exhibition at Wembley shortly after the reopening, they boarded the miniature Canadian Pacific train and made a trip around "Treasure Island" and expressed great interest in all they saw.

FIREMEN RESIGNED
Windsor, N. S., Volunteers Had Dispute Over Fair.
Windsor, N. S.—This town was temporarily without a fire department following the resignation of the volunteer fire-fighting force as a protest against the action of town authorities in refusing the members of the department permission to conduct a fair with alleged gambling devices. The men were attempting to raise money to pay the expenses of entering the team in the firemen's fair to be held this month in Charlottetown, but the town authorities refused to permit the operation of the wheels of fortune and similar games of chance which formed the nucleus of entertainment.

"While to a large extent law-breaking and not law abiding is the rule and not the exception in life, American law-makers and bureaucrats have become legalists, men unable to see the purpose for which a law exists, but only the law itself. In the last ten years or so 500,000 laws, mostly of a prohibitive character, have been enacted in the United States. In the same period Great Britain passed 17,000 laws, mostly regulative. This legalistic spirit has brought all law into contempt.

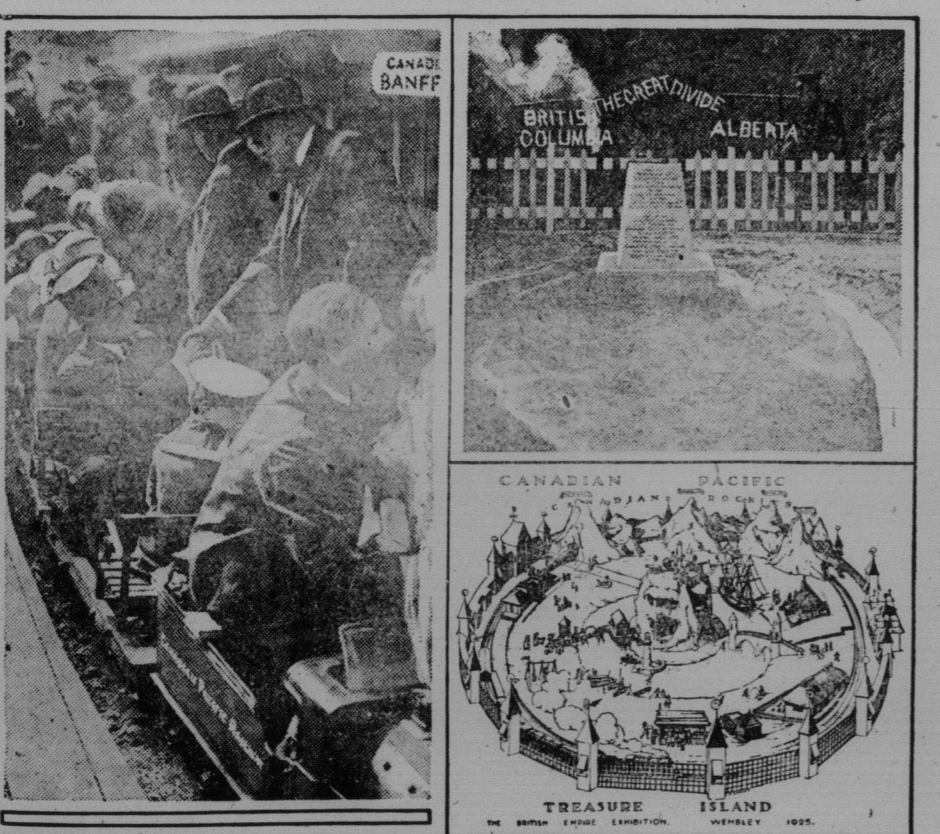

"Widespread prosperity, easy money, the ubiquitous motor car, the corruption of those in authority, have made real crime scarcely less prevalent than the universal commission of mala prohibita, inflicted by doubtful methods on a nation that does not want them. With the wave of crime has come an equal wave of social depravity. Prohibition is forcing prosperity and industry upon the working classes, but according to the testimony of Americans themselves, it is debauching the flower of the nation's youth. Citizens might have gone the same way with us here in Great Britain if our wealth had similarly accumulated. It has not. Far from it. And we as a nation are neither better nor worse, nor indeed very different in any respect, from what we were before the war. This thought may console us a little. As we flounder in an abyss of industrial depression, it need not deter us from trying to find a way out."

Building permits issued in Canada during the first quarter of 1925 were 10.25% and 1.25% greater than in the first three months of 1924 and 1923, respectively. There were also 5.5% greater than in the first quarter of 1922, 46.5% higher than in 1921 and 4.3% above the 1920 total. The aggregate value of building permits issued for the first quarter of 1925 was \$19,672,937, compared with \$17,846,000 for 1924 and \$19,441,159 for 1923.

There is every possibility that the Provincial Government of British Columbia may this year complete the construction of the scenic highway connecting Golden on the main line of the Canadian Pacific Railway with the summer resorts of Banff and Lake Louise. When this link, much of which was built during the past two seasons, is completed it will make one magnificent triangle through the heart of the Canadian Rockies.

FUNERAL MARCH, PLEASE
There was a man in our town,
And he was a speedy guy.

Toot, toot! Ding, dong! Good Night!

A Wonderland for Children at Wembley

Viscount Jellicoe, former Admiral of the British Navy during the Great War, shaking hands with Sir George McLaren Brown, European General Manager of the Canadian Pacific Railway, at the miniature Banff Station and seated on the miniature C.P.R. train which takes travellers around Treasure Island. Viscount Jellicoe is remarking: "This is but another of the great things the Canadian Pacific Railway is doing and I am sure that the Canadian Pacific trains are going to prove in conjunction with the wonders of Treasure Island one of the drawing cards of the (Wembley) Exhibition." The engine which draws this train is a replica of engine No. 2008. The Island is intended most of all to delight children who obtain views of a sandy beach on which Robinson Crusoe and Man Friday disport themselves. There, too, the children dig in the sands to their hearts' content and there are caves and Noah's Ark with chaises of moving animals; pirates and seventeenth century ships, characters out of fiction such as Pan and Wendy, Long John Silver and Jim Hawkins, Tweedledum and Tweedledee. The train passes through the Connaught tunnel and winds in and out of the Canadian Rockies through the Great Divide. There are realistic scenes of Banff and Lake Louise and a part of wild animals while from the sands the children climb by pony tracks to the summits of many famous peaks in the Canadian Pacific Rockies.

Mr. John Riley is working on the bridges between Annapolis and Bridgetown with Mr. Ira Wright. The rain will make the grass and crops grow. Mr. and Mrs. James Banks and daughter Alice, and two sons, Oakie and Wilton, of Bear River, spent Sunday last with her daughter, Mrs. Avarad Robar.

GET A BETTER CROP BY THINNING FRUIT.
To secure larger fruit and eliminate the inferior grades and at the same time conserve overladen trees, J. H. Gourley, horticulturist at the Ohio Agricultural Experiment Station, recommends thinning. In a year of large crops, orchardists may remove a portion of the fruit just after it has started to develop or "set" in order to secure a high percentage of extra fine fruit. If apples are thinned to one fruit to the cluster and 5 to 8 inches apart on the branch a much better produce can be expected and usually just as many bushels. The energy of the tree is conserved for future crops, and less propping is necessary to keep the branches from breaking. The excess fruit is removed by holding the cluster in one hand, while the smaller and imperfect specimens are removed by the thumb and first two fingers of the other hand. Small shears may be used in which case the stems are cut rather than entirely removed. Step ladders should be used, where possible instead of putting ladders in to the tree, and the work done thoroughly as one proceeds.

Heft it Once! Then You Will Want One for Your Own Kitchen
The very feel of it will make you want to own it. It balances so nicely, seems to be just right. The handle is rigid and does not tip around like a hinged handle. That means no slipping, scalded hands or accidents. See how you fill it? You lift the hinged lid and can fill it right under the tap or by dipper because the opening is at the side, not the centre. Most important, these new up-to-date kettles cost no more than the old fashioned kettle.

"Tempt me!"

deceased brothers, 28 in number, whose remains lie in Riverside cemetery. The lodge ceremony was very nicely carried out but proceedings were somewhat marred by an untoward incident. On arriving at the cemetery the procession found the caretaker, Mr. Wm. Shaunwhite mounting guard behind it, expressing his intention of keeping out the officers and members on the ground that they had no official permit to enter. Such a proceeding has been, we are informed, unheard of in local annals. The lodge entered naturally regarding the protests of Mr. Shaunwhite. The cemetery directors are about to hold an investigation into the circumstances.

ROCKEFELLER FUND PLANS NEW TYPE OF DOCTOR

Foundation to Train Physicians as Counselors, Teaching People How to Live and Be Well.

WILL REPLACE PRACTITIONER

Diet, Exercise, Mental Fitness, Recreation, Among New Aims to Be Taught.

The doctor of the future will be a health counselor, teaching people how to live rather than simply how to avoid sickness...

Three quarters of the medical profession today consists of the general practitioner, and this group, President Vincent asserts, will be developed in the health counselors.

Activities Are Widespread

The Foundation helped to spread international knowledge about medical equipment and teaching methods through surveys by staff members.

In China it maintained a modern medical school and teaching hospital in Peking; aided three other medical schools and seventeen hospitals in that country.

It kept a mobile staff on guard against the yellow fever in Mexico and Central America, and at the request of Brazil joined in an attack upon this disease from eleven centers along the Northern Coast.

Red Hot July Days Hard On The Baby

July—the month of oppressive heat; red hot days and sweltering nights; is extremely hard on little ones. Diarrhoea, dysentery, colic and cholera infantum carry off thousands of precious little lives every summer.

BRITAIN WANTS \$60,000,000 ON ALLIED DEBTS.

Does Not Want U. S. to Get Ahead in Collection.

London—Sixty million pounds is the sum Great Britain has mentioned in her note to the Allies concerning her debts as the amount she would gladly receive from them as soon as possible.

It is the American claims on Europe which have induced her to raise the question at this time.

Not that Great Britain questions in the least the right of the United States to get all she can from the European debtors or is concerning herself in the least with what terms she likes to give.

The reasoning by which the note arrives at \$60,000,000 as the amount which Great Britain would receive gladly at present is also dependent on the American debt.

Up to the present she has paid Washington \$80,000,000 and against that she is willing to write off the \$20,000,000 which has been received from German reparations.

WICKED TO DISTURB THE DEAD

It is wicked to dig up graves and disturb the dead.

When a business firm is right in one great fundamental, it is generally correct in all of its policies—and that is what wins success.
