## Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the Images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been reshelved to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

10x	14x	18x	22x	26x	30x
12x	16x	20x	24x	28x	32x

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

1	2	3
4	5	6

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par le dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur le dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

LABORATORY  
OF THE  
INLAND REVENUE DEPARTMENT

BULLETIN No. 91.  
WHITE LEAD IN OIL, 1903.

OTTAWA, Nov. 4, 1903.

W. J. GERALD, Esq.,  
Deputy Minister of Inland Revenue.

SIR,—I beg to present this report regarding 147 samples of white lead in oil which, in accordance with your instructions of August 11 last, were collected in the various districts of the Dominion as follows:—

	Number
Nova Scotia and P. E. Island.....	24
New Brunswick.....	16
Quebec.....	18
Montreal.....	15
Kingston.....	14
Toronto.....	16
London.....	14
Manitoba and North-west.....	18
British Columbia.....	12
Total .....	147

The table appended to this report gives the names under which these samples were sold, and the results of their examination in this laboratory, as well as the names of the vendors and furnishers of the samples. Besides ascertaining the absence of 'barytes,' the commercial name of the mineral, barite, finely ground, or its percentage when present, search was made for acid-soluble sulphuric acid and lime, in order to detect adulteration by sulphate of lime or by common whiting. These, it will be observed, were very seldom found, the chief adulterant being barytes. The table also gives in the remark column the conclusions drawn by myself from the results of the testing, according to which the total number of samples examined may be classified as follows:—

Genuine.....	100
Slightly impure.....	2
Adulterated, but not sold as pure .....	2
Adulterated, but sold under special names .....	25
Adulterated, sold as white lead.....	12
Prepared paints not sold as white lead .....	6
Total .....	147

In explanation of the foregoing it may be stated that the samples characterised as genuine are those which have been sold as pure in accordance with the provisions of the Act in restraint of fraudulent marking. This Act prohibits the use of the terms 'pure' or 'genuine,' for white lead in oil, unless the article has the composition specified in schedule A of the Act. The two 'slightly impure' samples were no doubt intended for genuine, and the very small amount of insoluble matter present was probably accidental. The two samples 'not sold as pure' have been called adulterated, although the vendor showed good faith in making the declaration. The large number of samples sold under special names have been named 'adulterated' in accordance with former practice, and because their sale contravenes the spirit of the Adulteration Act, which defines an article as adulterated if 'any substance has been mixed with it so as to reduce, lower or injuriously affect its quality or strength.' Besides, the special names do not indicate the 'mixed' or 'compound' nature of these samples as required by the Act; neither do they declare to the purchaser that he is being served with an inferior article. Twelve samples were sold simply as white lead, but were largely adulterated, and were not labelled as 'compound' or 'mixture.' Finally, seven samples were purchased by the inspectors which were plainly declared to be 'paints' by the vendors and are known to be articles quite different in character from 'white lead in oil.'

I have the honour to be, sir,  
Your obedient servant,

THOMAS MACFARLANE,  
*Chief Analyst.*
