THE NIGHT DAY CHRONOMETER: SECOND HAND, GOOD AS NEW.

Poetry.

THE RECUIR. BY MARIAN PAUL AIRD.

A wreck!—a foundering wreck! A shuddering cry! 'Tis the boat that's crashing—creaking deck Of your ship in agony!

The wave rolls mountains high, The leaping, foaming tide, Like a wave is tossing you ship on high— 'Tis the tempest's sport and pride.

You flag for succour pleas'd, A suppliant—'tis the strife; From the mouth of death it intercedes Like a death-doomed soul for life.

Who'll breast the angry wave, And wrestle with the storm, And snatch from the depth of an ocean grave Each hunger-stricken form?

The Captain spoke his fears— His impotence to save, And loudly called for volunteers; Out spoke a seaman brave—

"Launch the boat!"—'tis here a cry— "I'll brave the warning tide, My life for theirs, a brother die— On the boiling surge I'll ride."

The life-boat mounts the wave, Like an angel-form appears Amid the storm that here brave, As the sinking vessel here nears.

With toil, and thirst, and hunger dimly, From the sinking ship he drew; With baviour hard, each dying one, Of that tempest-stricken crew.

The last, from the laboring barque, Was brought, like a night stone In that wilderness of waters dark, It sunk with a gulging moan.

Then a shout of gladness rose, Like a song of victory! As he came like a conqueror 'mid his foes, And set the captive free.

'Twas a wreath for that hero brave, Who nobly 'mid the strife, For brother-men, 'mid wind and wave, All worthless cast his life.

Literature, &c.

EFFIE STANLEY. BY LAURIE.

CHAPTER III. It was New Year's Eve. The city resounded with joy and hilarity. Merely chimed the sleigh-bells, as prancing steeds sped onward with stately gait.

The fancy stores were crowded with eager-tongued buyers in selecting beautiful and costly gifts for the morrow, while without, wrapped in surprise and admiration, at the endless variety of beautiful things, stood some little half-clad folk, low-lying with earnest eyes, the tempting display in the brilliantly-lighted window.

Why does he turn away from that curiously carved top, and miniature drums, and the countless articles before him calculated to suit his taste, and gaze so long and wistfully at a wax doll that stands in the corner? Ah! he thinks of the dear little sister at home, and of the untold delight that doll would bring her; and then his lip quivers, and the big tears roll down his young cheeks, for he knows that poverty denies her not only every childish toy, but often bread enough to eat.

pavement, until he was suddenly arrested by the salutation of a friend just returned to the city.

Leaving the disappointed Clarence, let us follow our old friend Effie, as, with the noiseless speed of a bird on the wing she glides swiftly from street to street, then threading several narrow alleys, weaving through the throngs, she enters at length before a building far more miserable in appearance than that in which we first found her located.

Up the rickety flights of stairs, she hurries with the same breathless haste, pausing not until she reaches the landing, when, softly raising a latch, she enters her home.

Let us glance for a moment within that wretched room. Upon a narrow couch, pale, washed to a shadow, evidently in the last stages of consumption, lies that wretched mother, so cherished, so idolized by her only child.

It must have been stern necessity, indeed, to have called that child away even for a moment, at such a time, and stern indeed it was.

Depending solely upon her weak support, she had endeavored to produce those weary stitches to supply every want, Effie was compelled to leave her helpless parent alone, and carry home the fruits of her nightly labor, with the scanty pittance due for her exhausted strength.

But alas! how often had she, in the struggle with this world, Mrs. Stanley's health soon failed, so that she became utterly unable to assist in her maternal support, and though Effie toiled night and day, yet pining and starved Effie in the night; they did not succumb, however, to their pitiful fate, but the still more wretched one in which we find them.

Yet Effie felt that her mother could endure anything, if her cherished mother only might be spared.

But ah! fond daughter, do not secrete mightiness; steal over your spirit, as day by day you see that fled mother sinking?

That hectic flush, that lacking cough, do they not whisper that she, so loved, is passing away? But let us turn to another scene.

Within a magnificent mansion, on the same New Year's Eve, was assembled a gay crowd of wealth and fashion.

Amid the brilliant throng of fair faces and fair forms that graced the room, the young lady, Effie, sat in the midst of the throng, her eyes fixed upon the one who sat opposite her.

story of which our Effie slumbers. Notwithstanding the deafening tumult, she remains insensible, wrapped up in that heavy, deathlike sleep.

At length, she is aroused, and starting wildly up, she comprehends the danger, she endeavors to flee; but the excitement is too much for her, she overthrows her frame, her strength fails, and swooning, she falls helpless upon the floor.

Oh! is there no one to save? must she perish in the flames?

Below, just escaped from the burning building, an Irish woman, rather hither and thither, ejaculating in the greatest distress, "Sure, and there's a sweet young lady up stairs that'll be burnt intirely if she ain't got out!"

A noble form moves quickly towards her, and hurriedly inquiring the location of the room, enters the burning building, notwithstanding the remoteness of bystanders. It was Clarence Hamilton.

Up, up those stairs, at the peril of his own life—another life was at stake—and that was enough. He gained the room, he knew not how, and hastily laid himself upon the floor, the flames of the fire fell full upon his face.

"That face! oh, unexpected bliss! the object of his daydreams, the angel of his nightly visions.

With a thrill of joy he clasped the inanimate form, not a moment was he to be lost, he reached the foot of the first stairway, almost at a bound; the next he reached, the flames had reached.

There was no other way, and with his precious burden he rushed through the flames and suffocating smoke, he emerged, he stood on the threshold, he gained the street just as the burning roof fell in, and the whole became a solid mass of flame.

Rushes of applause rent the air, but he heard little of it; he had received his reward.

Hastily entering a carriage, he was soon at his own home, and just as he laid the fainting girl upon the sofa, Mrs. Hamilton, a noble-looking woman, clad in widow's weeds, entered the drawing-room.

As Clarence briefly narrated what had transpired, she immediately approached the young stranger, and with maternal care applied the usual remedies to restore her consciousness.

As she did so, her eye fell upon a small miniature in a plain gold setting, attached by a silken cord to Effie's wrist.

As Mrs. Hamilton took it in her hand to examine it more closely, an involuntary cry burst from her lips. "Effie, Effie, Woodworth, my dearest friend, is it possible? How came this here? Can this be your daughter, my Effie, whom I have been speaking so often in my letters? But how came she in New York, and in such a condition, too?"

"Where, where is her mother? Poor, poor Effie, she has been gone, but your child shall be cherished for her sake, my Effie, my dear friend, as her son informed her that an Irish woman had told him that the young girl was an orphan, her mother having been buried only the day before."

"How could she have been so long in the world, my dear friend, when she had lately returned?" Effie had often heard her mother speak of Mrs. Hamilton, expressing a wish that her beloved friend were still in New York, unaware that she had returned to her native land.

But to return to Effie. Long did the two watch over her, watching in vain for the least sign of returning consciousness; but at length she slowly opened her eyes, and murmured half audibly, while a smile played about her lips. "I thought I was heaven. Father was there, and mother; and oh! the angels sang sweetly, so sweetly! Then something dreadful came, a fire! yes, there was a fire! the flames were all around me," she continued shuddering.

At this Mrs. Hamilton soothed the bewildered mind of the poor girl, and with her cool hand resting upon her throbbing brow, at length the wearied orphan slept.

Six months passed away and brought a glorious evening in the month of June. With a silvery radiance the moonlight fell upon the beautiful grounds of a stately mansion.

Amid the clustering roses and murmuring fountains that embellished the grounds, walked Clarence Hamilton.

His eyes rested alone, his eyes rested fondly upon the features of a fair young girl who leaned upon his arm. Surely he should know that sweet face to be Effie Stanley's.

How beautiful she looked in the full moonlight; so tranquil, so sweet, and so bright a smile played about her lips, and her large, dark eyes were suffused with bright tears; but they were not tears of sorrow.

A rich glow came and went upon her cheek, as the low tones of her companion fell upon her ear, while she gazed at him with a look of intense interest, yet of divided glance, with which she returned his look of fondling love, told that some new joy was trembling in each bosom.

The flowers might have told strange tales of what had been, had they been breathed within their hearing; they might have whispered that a bride had been won beneath that starry sky, and that the lifelong affections of two loving hearts had been forever pledged.

A few months later, and a gay party were gathered within the splendid mansion of Mrs. M., one of the elite of the city. The parlors were already filled, when suddenly the doors were thrown open, and Mr. and Mrs. Hamilton were announced.

All eyes were fixed upon the lovely face of the young girl, for she came gracefully forward, leaning upon the arm of the proud husband.

What was the astonishment and chagrin of the young lady, also recognized in the young wife of the wealthy, talented, aristocratic Clarence Hamilton. Effie Stanley, the more despised seamstress, who, of late, had been so strangely insinuated.

The Bahama Banks. Among the remarkable natural curiosities of the globe, may be numbered the enormous plain covered with sand, of an extent almost equalling the sterile deserts in Africa and Asia, which lie under water, to the eastward of Florida and the Gulf Stream.

The Bahama Bank extends from the Little Bahama, the Great Bahama, and the Salt Key Banks.

The Little Bahama Bank extends from the Little Bahama Reef, in lat. 37° 50' N. and lon. 70° 11' W. West to the island of Abaco, the southern extremity of which is in lat. 25° 33' N. and lon. 77° 16' W.

The Bahama Bank, in its greatest width, extends from east to west and is bounded by the Atlantic Ocean on the east, and the Gulf Stream on the west, and occupies a space of 800 square miles.

The Bahama Bank, in its greatest width, extends from east to west and is bounded by the Atlantic Ocean on the east, and the Gulf Stream on the west, and occupies a space of 800 square miles.

glades of soft, green turf, are of a darker and richer green. The ground avenue of elms is some hundreds of years old, and is always majestic and venerable.

No carriages or horses are permitted in Kensington Gardens; but its shadowy lanes are sacred to pedestrians, and are especially the haunts of thousands of lovely children.

It is said that as many as two hundred thousand persons have been in Hyde Park and Kensington Gardens at once. Regent's Park comprises about three hundred and thirty-six acres of land, ornamental plantations, drives and carriage roads.

It has a younger look than the other, and among its attractions are the Royal Botanic Garden, with its rich collection of plants, and the Zoological Garden, some twenty acres in extent, where may be seen thousands of living animals.

But these luxuriant groves, drives and carriage roads? It has a younger look than the other, and among its attractions are the Royal Botanic Garden, with its rich collection of plants, and the Zoological Garden, some twenty acres in extent, where may be seen thousands of living animals.

**Saint John Grammar School.**  
The annual examination of this Seminary will be commenced on Monday the 1st of August. Several new Pupils can be admitted. The branches taught are, Latin, Greek, Mathematics theoretical and practical, History, Geography, and all the branches that constitute a good English Education.  
JAMES PATTERSON, PRINCIPAL.  
July 19, 1853.

**NOTICE TO THE PUBLIC.**  
ARRANGEMENTS have been made with the Postmaster General of the United States, in relation to the future of the mail route from this City, and BOSTON, PORTLAND, and EASTPORT, by the Steamer "Eastern City," and in charge of Mr. Benjamin M. Flint, who has been appointed Steam-boat Mail Carrier under the United States Post Office Department.  
The Regulations will be precisely the same as those under which Mails are at present conveyed by Colonel Favor of the "Admiral."  
Until further notice, therefore, Mails will be closed for one or other of the above named States, on Monday, Wednesday, and Friday Mornings, and Letters to be thus forwarded must be posted at this Office fifteen minutes before the time advertised for the departure of the boats, after which time, none can be received, but Col. Favor on board the "Admiral," and Mr. Flint on board the "Eastern City," will be prepared to take charge of loose letters from the time of closing at this Office until the boats leave.  
The Rates of Postage chargeable on letters thus forwarded are the same as by the land route, viz: Six Pence currency or ten cents the half ounce to all parts of the United States, except California and Oregon; and ninepence currency, or fifteen cents, to the latter places. The prepayment of this postage will be optional, and may be made by affixing postage Stamps, not less than the whole post- age, or an equivalent amount of Postage labels can be taken. It must be borne in mind however, that loose letters forwarded in charge of Col. Favor or Mr. Flint, cannot be prepaid in money, they must either be prepaid by affixing postage stamps, or forwarded unpaid.  
J. HOWE, P. M. G.  
General Post Office, St. John, 18th July, 1853.

**Select Boarding & Day School FOR YOUNG LADIES,**  
CONDUCTED BY MISS THOMSON, Assisted by her Father, Elder THOMSON, A. M.  
St. John, N. B.  
IN the Government and discipline of the School, due regard is had to the health, happiness and improvement of the pupils; and while every reasonable indulgence is granted, the great objects of education are kept constantly in view. viz:—the full development and proper training of the physical, intellectual and moral energies, and the formation of habits of industry, punctuality, good order and strict economy in the use of time.  
The Educational and Domestic arrangements offer all the facilities for other pupils. There is also a separate preparatory department for younger pupils.  
Miss Thomson's school for the year, her classes will be opened on the 17th of June, and re-opened on the 11th of July, on which day she hopes all her pupils will be present. Persons having claims against her pupils will be given the opportunity of presenting them for regular business, and a synopsis, with terms forwarded on application.

Poetry.

THE CHILD'S DREAM.

"Oh, I have had a dream, mother, So beautiful and strange; Would that I could sleep on, mother, And that dream never change."

The Ancestry of the French Empress.

It has been remarked that truth occasionally brings out in bold relief circumstances which appear much more unlikely to happen than the wisest dreams of fiction ever conceived.

Nearly a century back, a highly respectable gentleman, William Kirkpatrick, Baronet of Closeburn, was proprietor of the estate of Conehath, in the parish of Caerlaverock, where he resided.

Thus the great grand-daughter of the proprietor of a small estate in Dumfriesshire now occupies the throne of France. We hope that the Empress, now that she has attained such an exalted position in this world, will show by the prudence of her conduct, and beneficial influence she may have in her power to exercise over her husband, that she may be employed as to tend towards the preservation of peace in Europe, and to justice and moderation towards the people of France.

Now in nothing that we feed out to cattle is there so wide a difference as in hay, and it is a solemn duty for every farmer, in the first place to cultivate those grasses which shall contain the greatest quantity of nutritive matter: in the next place to cut and cure and house it in such a manner as to preserve these ingredients in the best possible manner, and then to feed it out so as to supply the cattle with enough and have none wasted.

There are several species of plants, which grow in our moving lands, that make excellent fodder, which are not, strictly speaking, grasses, although generally reckoned so. Among them may be enumerated clover, yellow weed or buttercup, (Ranunculus), as it is sometimes called—white weed or oxeye daisy—scouring rush or gun bright. Of the above, clover is the only one that is sown or cultivated.

The circumstances of the murder are remarkable, and form the subject of a fine ballad by the late Charles Kirkpatrick Sharpe. Lindsay and Kirkpatrick, were suitors for the hand of the same lady; the latter was preferred, and Lindsay was a wedding guest at the castle of Caerlaverock. In the dead of night Lindsay stole up to the bridal chamber, and stabbed his successful rival to the heart and escaped on horseback. When the deed was discovered the men at arms went off in pursuit. A storm had arisen, and Lindsay confessed had ridden round, in a place away from the castle gate. He was taken and executed at the castle gate. The barony was afterwards restored to the Maxwells. The grand-daughter of the Sir James Kirkpatrick already mentioned, was offered a peerage by the government of the day, which he refused, giving as a reason that he would rather be at the head of the family than at the tail of the lords. The present head of the family, and possessor of the ancient title, is Sir Charles Kirkpatrick, Baronet residing in London, whose father, Sir Thomas Kirkpatrick, Bart., was for many years the be-

loved and venerated Sheriff of Dumfriesshire. The narrative concludes with the following curious revelations:—

It is not a little remarkable that this is not the first occasion on which a family from the south of Scotland has furnished a bride to the Bonapartes. Jerome Bonaparte, the only surviving brother of the Great Napoleon, and who now lives in Paris, sharing so far in the fortunes of his nephew, married, in the United States, a Miss Paterson, who was a grand-daughter of one Robert Paterson, better known in Scotland, and indeed over the world, as "Old Mortality."

RANDOM THOUGHTS ABOUT HAYING.

We stated in our last that grass should be cut when in blossom, as the greatest quantity of the matters necessary for the nutriment of cattle was then most generally throughout the plant.

By cutting it at this time, the changes which would have taken place at successive stages of its growth are arrested, and these matters preserved.

In order, however, to preserve them in the best manner, the grass should be dried, or, in other words, the cut grass should be exposed to heat sufficiently long to expel the water from it and leave the other substances.

Hence it will appear very evident to every one that it should not be exposed to any moisture, such as dew or rains. Moisture will dissolve portions of the sugar, gum or mucilage, which is contained in the plant, and if soaked sufficiently long, nothing will be left behind in the hay but vegetable fibre.

It would probably be better if grass could be dried under cover, but as this is out of the question, the greatest care should be taken to keep off dew or rains after it begins to dry.

Hence the hay-caps, which are nothing but pieces of cotton-sheeting placed upon the hay-cocks, answer an admirable purpose in case of storms coming on before the hay is sufficiently dry to put into the barn.

Some farmers are disposed to bury the hay in the barn as soon as it will any way do, and if it appears to be a little green, to sprinkle salt over it as they pack it away. The salt absorbs the surplus moisture and becomes dissolved, and thus prevents any fermentation. Others prefer to give their grass an ultra drying before they pack it away.

The late Joseph R. Abbot informed us that he used to dry his hay at least a day longer than most people before he put it into the barn, and that as a consequence he never had any dusty or smoky hay. How this may be we do not know. The proper way is to dry it just so long as it will require to be dried in order to expel the water to such a point as to prevent any fermentation when stowed away in the mow. When this is done, and there has been no exposure to moisture, the hay will be of good color, elastic and nutritive. Such hay is worth much more than that cut late, after the sugar, gum, &c., has become changed, and the ripening seed has absorbed from the stalk most of it in order to supply it with the materials necessary to constitute a mature seed.

Such hay, if judiciously fed out to cattle and other stock, will make them gain nearly as fast as they will at grass. We do not pay attention enough to these facts. We are apt to consider almost any dried grass as good hay; and, without paying any further attention to it, think we do our duty to our cattle if we tie them fast by the head, and throw over to them about such a quantity (as near as we can guess) of dried grass "hit or miss."

White weed, and yellow weed, when dried in this way, make excellent fodder. The principal objection to white weed is, that it is apt to crowd other grasses out, and it yields but comparatively a light crop itself, but the yellow weed and clover will grow well with other grasses.

The scouring rush, or joint rush, is a water plant. It is singular, that it grows best where the water will stand an inch or two above its roots, and yet it contains a large amount of saccharine matter, and if cut at the right time, and cured right, cattle will eat it during the winter with great avidity, and milk cows do better upon it than any other fodder. It seems to resemble corn stalks more closely than any other of the forage plants. But little is known in regard to propagating the plant. It generally comes in spontaneously, where the water covers the surface of the ground a very little during the summer, on the margin of ponds and streams, and affords to those who have it a rich source of fodder for cows during the winter.

Many a farmer possessed of acres of cultivated land, which in its present state is a source of neither pleasure or profit, is convinced of the necessity of increasing its productiveness, but is in the dark as to how the work is to be done.

He may be unable to purchase specific manures; or from many in general use, not know which to select. Or—as many have done—he may have erred in applying foreign fertilizers. Perhaps gypsum, sown on low wet land, proved less valuable than sand from the wayside; and guano, placed in the hill, killed the young corn.

Now, to all who, in the use of specific manures, have failed to reap the anticipated reward, we beg leave to speak of a way, in which your farms can be made more productive, and that, too, at a very trifling expense. And the expenditure is an item which should enter the account of every farmer, for economy is essential to prosperity.

Add first—your barn-yard, in which, perhaps, for a want of a cellar, all your manure is thrown to be dried by the sun, and drenched by the rain, till little is left, except the worthless vegetable fibre, with which to dress your soil. Can't something be done here?

As it is, it may be the highway or the brook As it is, it may be the highway or the brook As it is, it may be the highway or the brook

And your pig-stye? Is it not a fit companion for the barn-yard? Is it not often flooded with water? Does not your hog, for want of better employment, undermine his fence, and break forth from his enclosure, to the serious injury of the garden or cornfield? Give your hog plenty of leaves, potato-tops, and grass sods, and his labor will be turned to some account. He will earn you from ten to twenty dollars in the course of the season, and in the fall fill just as large a barrel, as if he had spent his life in idleness or mischief.

But perhaps you say, "the substances above spoken of, as materials from which to manufacture manure, are worthless,—that spread upon the field they will not increase the crop." In their present or natural state they may be indifferent fertilizers; and so is hay, before eaten by stock, and wood, before reduced to ashes.

The Potato Rot. H. Penoyer, of Union County, Ill., writes to the St. Louis Republican that he has found a perfect cure and preventive of the potato rot, and which also restores the potato to its primitive vigor, and the product is not only sound, but double the size, consequently producing twice the quantity, on the same ground, and the vines grow much larger, and retain their freshness and vitality until the frost kills them. The remedy is as follows:—

Take one peck of fine salt and mix it thoroughly with half a bushel of Nova Scotia plaster or gypsum, (the plaster is the best), and immediately after hoeing the potatoes the second time, or just as the young potato begins to set, sprinkle on the main vines next to the ground, a table-spoon full of the mixture to each hill, and be sure to get it on the main vines, as it is found that the rot proceeds from the sting of an insect in the vine, and the mixture coming in contact with the vine, kills the effect of it, before it reaches the potato.

THIS unrivalled and popular Sewing Thread can now be supplied by the Subscriber—the sole Agent for the Manufacturers—in any assortment and quality to suit customers. He can with confidence recommend the Six Cord to the trade and consumers generally.

No. 4, Water-street.

W. TISDALE & SON Are receiving ex "Bellairrig," from Liverpool— 110 RINGS IRON WIRE, from No. 4 to 10 40 casks Ox and Horse NAILS, 120 bags SPIKES, 4 to 10 inch, 2 casks Sad Irons; 1 case Wire Grating; 2 casks round point SHOVELS, 1 cask Vicker's hand, tenon, mill and other Files, 40 casks Ox and Horse NAILS, 120 bags SPIKES, 4 to 10 inch, 57 do. The Road to Health.

Holloway's PILLS. CURE OF A DISORDERED LIVER AND BAD DIGESTION.

COPY of a Letter from Mr. R. W. KIRKUS, Chemist, 7, Prescott Street, Liverpool, dated 6th June, 1851. To Professor HOLLOWAY. SIR—Your Pills and Ointment have stood the highest on our sale list of Proprietary Medicines for some years. A customer, to whom I can refer for any enquiries, desires me to let you know the particulars of her case. She had been troubled for years with a disordered liver, and bad digestion. On the last occasion, however, the violence of the attack was so alarming, and the inflammation set in so severely, that doubts were entertained of her not being able to bear up under it; fortunately she was induced to try your Pills, and she informs me that after the first, and each succeeding dose, she had great relief. She continued to take them, and although she used only three Boxes, she is now in the enjoyment of perfect health. I could have sent you many more cases, but the above, from a lady of the attack, and the speedy cure, I think, speaks much in favor of your astonishing Pills. (Signed) R. W. KIRKUS.

AN EXTRAORDINARY CURE OF RHEUMATIC PAIN, VAN DICMEN'S LAND. COPY of a Letter inserted in the Hobart Town Courier, of the 1st March, 1851, by Major J. Walsh. MARGARET MCKENZIE, aged 30 years, residing in New Town, had been suffering from a violent rheumatic fever for upwards of two months, which had entirely deprived her of the use of her limbs; during this period she was under the care of the most eminent medical men in Hobart Town, and by them her case was considered hopeless. A friend prevailed upon her to try Holloway's celebrated Pills, which she consented to do, and in an incredible short space of time they effected perfect cure.

CURE OF A PAIN AND TIGHTNESS IN THE THORAX AND STOMACH OF A PERSON 94 YEARS OF AGE.

From Messrs. Thers & Son, Proprietors of the Lym Advertiser, who can vouch for the following statement.— August 2nd 1851. To Professor HOLLOWAY. SIR—I desire to bear testimony to the good effects of Holloway's Pills. For some years I suffered severely from a pain and tightness in the stomach which was accompanied by a shortness of breath, that prevented me from walking about. I am 94 years of age, and notwithstanding my advanced state of life, these Pills have so relieved me that I am desirous that others should be made acquainted with their virtues. I am now restored, by their means, comparatively active, and can take exercise without inconvenience or pain, which I could not do before. (Signed) HENRY COE, North Street, Lym, Norfolk.

AN EXTRAORDINARY CURE OF THE GRAVEL, AND A MOST DANGEROUS FEVER COMPLAINT. COPY of a Letter addressed to J. K. Hayden, Esq., Sydney, New South Wales, dated Feb. 1851. SIR—A Mr. Thomas Clark, a Settler at Lake George, was for a considerable time seriously afflicted with a complaint of the Liver, together with the Gravel. His medical attendants, after trying all their skill, candidly told him that he was hopeless, and any further efforts would be in vain. In this situation, and when expecting every day to terminate his existence, a friend recommended him to try Holloway's Pills, and as a last resort he did so, the first gave him considerable relief, he therefore persevered in taking them according to the directions, and is now restored to health. He will feel great pleasure in confirming this statement, or even make an affidavit to the same effect, should it be required.

(Signed) G. WILLIAM JONES, Proprietor of the Goulburn Herald, New South Wales. WONDERFUL EFFICACY OF HOLLOWAY'S PILLS, IN CASES OF INDURCY. Persons suffering from Indurcy, either about the turn of life, or at other times, should immediately have recourse to these Pills, as hundreds of persons are annually cured, by their use, of this distasteful complaint in its different stages, when all other means had failed. These celebrated Pills are wonderfully efficacious in the following complaints. Ague, Asthma, Bilious Complaints, Blotches on the Skin, Bowel Complaints, Colic, Constipation of the Bowels, Consumption, Debility, Dropsy, Dysentery, Erysipelas, Febrile Affections, Excess of all kinds, Frost-bite, Head-ache, Indigestion, Inflammation, Jaundice, Liver Complaints, Lumbago, Piles, Rheumatism, Retention of Urine, Scarcity of King's Evil, Sore Throat, Stone and Gravel, Secondary Symptoms, Tic Douloureux, Tumours, Ulcers, Venereal Affections, Worms of all kinds, Weakness from whatever cause, &c. &c.

Sold by the Proprietor, 244, Strand, (near Temple Bar), London; and by S. L. TILLEY, Provincial Agent, No. 15, King Street, St. John, N. B.; A. Coy & Son, Fredericton; W. T.
