# BRITISH VIEW OF CANADA'S NEEDS

Country in a Most Satisfactory Condition—Greatest Want Is Population.

London, Jan. 27. - The St. James Gazette speaking of Canada's resources and wants, says evidence has lately been forthcoming of the extraordinary rapid advance in Canada's prosperity during the past two years, revealing by far the most satisfactory condition of things in any part of the British Empire at the present time. The agricultural resources of the Dominion are dealt with, and the great want, it is pointed out, is population. Minister Fisher is credited with the results of the efforts made in improving the agricultural products of Canada. The article says: "Canada presents an object lesson of progressive agricultural development, such as no other country can claim."
The Saturday Review, referring to

party of English emigrants who are going out to Canada in March next, says that this nucleus even of narrow and prejudiced patriots is invaluable in a cosmopolitan atmosphere for developing the country. W. T. R. Preston, Canadian emigration agent in London, writing to the Morning Post, says: "Out of the thousands of young Englishmen for whom positions were found on Canadian farms, there were found not more than four heard from who expressed dissatisfaction with their surroundings."

Saturday closed the annual fur sales of the world's furs in London. There was a big advance in all furs. Canadian coon and muskrat are 30 per cent over the figures at the last sales. An unprecedented price was obtained for sable, the season's fashionable fur. The Hudson Bay Company was still the largest seller. It is estimated that two millions sterling worth were sold altogether at the annual autumn sale at Nijini Novgorod, Russia, in October. The report of the Leroi Mining Company says the directors may fairly congratulate the shareholders on the condition of the company. The actual improvements since May, 1901, amount-

# FOOD FAMINE IN PITTSBURG, PA.

Railroads Congested With Coal Cars-Can't Get Regular Food Supply.

Pittsburg, Jan. 27. - Congestion of freight such as Pittsburg has never experienced has come as a result of the drastic remedy applied by the Pennsylvania Railroad and lines west last week to move coal and coke. The officials reckoned with the absent host and Peter has been robbed to pay Paul. The supply of grain and grain products is shamefully short, and the city is facing a bread famine. One of the largest bakeries has consumed its last flour and others are in the same plight. Produce is being unnecessarily delayed and raw material of every description is being sacrificed for the movement of coal and coke. The largest freight yards in the district are clogged beyond redemption, while most of the fuel is moving out of the city. A spell of cold weather at this

time would mean destitution and perhaps death to many. Following the lead of the Pennsylvania, the Erie placed an embargo on Pittsburg freight beyond a line drawn north and south through Levittsburg. Coal and coke only are excepted. The improvement in the soft coal mining regions ie decided, although the largest and heaviest shipments are going to the northwest. Pittsburg manufacturers have not benefited. heroic effort of the Pennsylvania lines to give preference to coal and coke over all other vight has resulted most disastrously to Pittsburg. Fully 50 per cent of the motive power of the lines west has become impaired. Yardmen and trainmen are discouraged from overwork and bad results, and officials themselves are

Is is lawful for a township council to make a law compelling storekeepers to close their stores at 6 o'clock without all merchants being agreeable? ANS .- The bylaw for early closing of shops must be passed by the council upon written application of not less than three-fourths in number of the shopkeepers to be affected. In the case of townships the council power to pass such bylaw for the district comprised in an unincorporated village to be given a name, and its boundaries to be defined in the said bylaw. In no case, however, can shops be closed before 7 p.m. A bylaw to close at 6 p.m. would be void.

New York, Jan. 27. - Finding it difficult to proceed with the examination of Richard Mansfield before trial to ascertain facts concerning the amount of royalties that he should pay for the productions of "Cyrano de Bergerac," A. H. Hummel, who represents Elizabeth Marbury, of No. 122
East Seventeenth street, who holds East Seventeenth street, all claims to the production, assigned to her by Edmond Rostand, on Saturday, obtained from Judge Gildersleeve, of the supreme court, an order direct-ing Mansfield to appear during the present week and continue the examination in open court.

Mansfield obtained a contract with M. Rostand for the production of "Cyrano de Bergerac" in this country under an agreement to pay a stipulated sum and a certain per cent of the receipts, and Miss Marbury is now seeking to gain some of the royalties to which she is entitled.

Mansfield while questioned by Steinhardt denied that he had produced "Cyrano de Bergerac," but admitted that his company had. He could not remember how long he had paid royalties under his contract with M. Rostand, and said he had not been able to find any of the books which gave the amount of royalties paid. As to his arrangements with the company, he said he got a share of the profits, paid his own hotel expenses, and Mrs. Mansfield, as the principal stockholder and shareholder, "gets the rest." She owns about 99 per cent of the stock of the company, he testified. Q. And what part did Mrs. Mans-field take in conducting the affairs of

WORLD'S WORK FOR FEBRUARY. What one loves best one can do best, says the first sentence of a well-written and handsomely illustrated article on Japanese art in the World's Work for February. What Doubleday & Page Company (New York) can do best must assuredly be the publication of their two superb monthly magazines, the World's Work and Country Life in America, which in each number contain some of the very finest picture printing of today. The literary menu in February World's Work, besides the editorial interpretation of the March of Events, contains many articles of interest and instruction. Navy at Work gives a fine description of the modern United States navy and o-to-date American sailor. The pictorial accompaniment has never been surpassed in beauty by any magazine. Good reading is also provided in The United States Steel Corporation's Profit-Sharing Plan, The Present Status of the Professions, Rapid Growth of Public Libraries, Herbert Spencer, Prevention of Physical Breakdown, Trolley Lines in a Railroad System, Among the World's Workers, etc.

WILSHIRE'S FOR FEBRUARY. The leading features of Wilshire's Magazine for February are a personal letter to the editor, from Ernest Crosby, author of "Captain Jinks, Hero." setting forth his economic views in a pleasing, conversational style; Bishop Huntington Defends Socialism, by Rev. A. L. Byron-Curtis; Recollections of Archibald Forbes, by William Lodtman, a fellow war correspondent: Trusts and Protection, by Yves Guyot, the famous French statesman and economist; Walt Whitman and John Burroughs, by Joel Benton, who was a personal friend of both; and Socialism not Materialists, by G. E. Ethertou. The editorials and comments display the editor's keen insight and broad comprehension of social and industrial conditions.

CANADIAN MAGAZINE. Mr. E. W. Thomson, author of "Old Man Savarin," contributes a splendid story to the February Canadian Maga-Mr. Thomson has recently returned to Canada, and is now living in Montreal. His many admirers will be glad to know that some of his work is now appearing in Canadian publications. There is a remarkable and rare photograph in this issue which is worthy of mention. It is a picture of three young golden eagles in a nest. A picture of an eagle's nest is rare, but one which shows three young birds instead of two, which is the usual number, is much rarer still. This picture was taken in British Columbia. Among the other features are: British Guiana, illustrated, by William Perot Kaufman; the Passing of the Wild Pigeons, by C. W. Nash; a sketch of the Hon. L. J. Tweedie, Premier of New Brunswick; a poem by W. A. Fraser, author of "Thorougabreds"; Dr. Bell's Flying Machine, by Thomas Johnson; a Visit to the Toronto Zoo, illustrated, by W. T. Allison; Railway Taxation, by H. J. Petty piece, M. P. P.; and The Incorporation of Trades Unions, by Prof. Adam Shortt. The second installment of Dr. Hannay's "War of 1812" is well illustrated, and the departments are also

# The Better Way With a Cold.

When a slight cold fastens on you in early winter you are apt to regard it merely as an annoyance—not a thing worth serious consideration. You usually feel like taking something syrupy, with perhaps a touch of spirits in it, to warm you up and stop the cough. But there is a better

The cough, the red eyes and uncomfortable head are not the cold. They are only the symptoms. They are like the leaves of a weed sticking above ground. The surest way to get rid of them and prevent their sprouting again is to pull up the root.

You sometimes say, "This cold is all over me." Every cold you have is, to a certain degree, all over you. It is evidence of a slight general weakness. It usually steals in on you at a time when the body is a little below its normal tone and the surest way to get rid of it is to bring the whole system up to its right

You may need some medicine. Your doctor will know. But a mere expectorant will do nothing toward restoring the body to a healthy standard. At the best its action is merely local and gives only temporary relief. Scott's Emulsion does this and more.

A small quantity of the emulsion taken regularly for a few days will supply the lack of proper nourishment in ordinary food. It is rich in the substances of which healthy blood is composed, and makes itself quickly felt in the throat and bronchial tubes. It starts the flow of mucous and relieves an obstinate cough sooner than any expectorant will do.

The emulsion does more than rid you of a cough. It rids you of the cold which is the root of the cough. Still more, it helps to protect you against a return of the trouble and against its going deeper.

Scott's Emulsion is aptly termed a food-medicine. It contains the nourishing properties of the whole cod liver oil, emulsified and combined with the medicinal qualities of hypophosphites, of lime and soda. It is probably more widely recommended by physicians for use in coughs and colds than any other prepa-

So-called wines, cordials and extracts of cod liver oil do not contain the value of the whole oil and are worthless in cases where a pure reliable cod liver oil preparation is needed. Scott's Emulsion has been the standard for over twenty-five years.

We will send a sample free to anyone on request.

SCOTT & BOWNE, 55 Front St., W.,

Mr. Whyte stated that a number of additional engines and cars were put on last year, but he was not satisfied that more work had not been done. Bad water was an important cause. The C. P. R. had not at first realized the situation, which had developed rapidly, but now they were fully alive to the conditions. The company were receiving three locomotives weekly, and the supply would be continuous, while at Montreal it was building the largest locomotive and car works in America.

The Territorial Grain Growers' representatives pointed out that to enable the farmers to get their crops shipped before the roads broke up and seeding began, the 13,000,000 bushels must be moved. Three millions could be stored at Fort William, and three shipped to St. John, so 7,000,000 must be shipped to Duluth, by the Soo line or the Great Northern. Mr. Bulyea, who had just returned from St. Paul, said both roads were prepared to receive

Mr. Whyte pointed out the objections of the Canadian Pacific to such shipments, but promised to wire President Shaughnessy. If the reply is not satisfactory, Messrs. Bulyea and Motherwell will go to Montreal to discuss the situa-

It is reported today that the western division of the Canadian Pacific will be reduced by taking off part of the main line, from Medicine Hat to Laggan, and adding it to the Pacific division. This will also give the Calgary and Edmonton and McLeod branches and the Crow's Nest Pass lines to the Pacific division. This means that 300 miles of the main line and 800 miles of branches will go from one division to the other, a most far-reaching change. Superintendent Marpole, of the Pacific division, has left Winnipeg for Vancouver.

Victoria, B. C., Jan. 27 .- The steamers Athenian and Tremont arrived yesterday from the Orient, both having sailed from Yokohama and arrived within an hour of each other. The steamers bring further news of the revolution in Kansu. One correspondent telegraphs to the Shanghai papers from Lashekow to the effect that unless Tung Fuh Siang is suppressed the powers will soon find themselves face to face with a bigger revoit than that of two years ago. Missionaries already are beginning to leave the threatened district. A correspondent of the Shanghai Mercury in Kansu writes: "A crisis is imminent and the officials are powerless to act. The taotai is suppressing news. There is cause for grave apprehension, unless Tung

Fuh Siang is suppressed." Messrs. Rybig and Soderstray, missionaries, who have reached Shanghai from Sinang, having come from the interior because of the threatened revolt, in interviews given to a German daily paper at Shanghai, state that Tung Fun Siang is gaining ground, and intends to lead his army to Singan, where he will endeavor to make his capital and place Pu Shun, who has been proclaimed emperor, on the throne. Tung is himself enlisting troops, and everything else points to the fact that he has Government support. Kansu and Shensi are overrun by Tung's spies. Important Order Affecting the Coasting Trade of Canada.

Ottawa, Jan. 27. - The Government have passed an order-in-council which is of great importance to the coasting trade of Canada. Its object is to insure that Canadian products or manufactures shall be transported or towed by Canadian vessels, even when they pass from one Canadian port to another over water outside the limits of the Dominion. When this is done, products or manufactures so transported or towed are to be treated, in regard to liability or exemption from duty, as if the transportation or towing had taken place entirely within Canadian territory. Goods transported or towed in vessels not permitted to engage in the Canadian coasting trade

are to be seized and forfeited.

The new regulation reads as follows: "Goods imported in bond or duty paid, and products of manufactures of Canada, when transported or towed in or by vessels from one port or place in Canada to another port or place therein over any waters outside the limits of Canada, shall be transported or towed only in or by vessels permitted to engage in the Canadian coasting trade, and under special customs manifests in such form and subject to germany, which, with my previous discoveries, gives me a certain cure.

I don't mean that it can turn bony joints into flesh again; but it can cure the disease at any stage, completely and forever. I have done it fully 100,000 times. I know this so well that I will furnish my remedy on trial. Simply write me a postal for my book on Rheumatism, and I will mail you an order on your druggist for six bottle Dr. Shoop's Rheumatic Cure. Take it for a month at my risk. If it succeeds, the cost is only \$5.50. If it fails, I will pay the druggist myself—and your mere word shall decide it.

I mean that exactly. If you say the results are not what I claim, I don't expect a penny from you.

I have no samples. Any mere sample that can affect chronic Rheumatism must be drugged to the verge of danger. I use no such drugs, and it is folly to take them. You must get the disease out of the blood.

# LYNCH'S BRIGADE WAS A RABBLE

Band He Led in Boer War Composed of Ex-Jail Birds.

# LEADER WAS NOT GREAT SUCCESS

One "Battle" His Men Plastered the "Colonel" With Stolen Mince Pie.

New York, Jan. 27. - The World Col. Arthur Lynch, convicted adon of treason for having in London fought with the Boers against Britain, will get very little sympathy either Irlsh or South Africans. The reason is that Lynch foisted on the burghers a company of outlaws such as have never been seen since the

days of Robin Hood. As a soldier of fortune Lynch was not a conspicuous success. When he reached Pretoria the war had already been going on six month. The first Irish brigade, under Blake and Mchad been conspicuous in every fight. The Irish could have anything

they wanted from Kruger. Lynch took up his headquarters in the Grand Hotel, Pretoria, had some hand-bills printed and eventually gathered together a bizarre company, known as the Second Irish Brigade. VICTIMIZED BY HIS MEN.

Col. Lynch at that time wore a smart costume of khaki, a Rough Rider hat and carried an ivory-handled riding whip. The latter was stolen the first night by an ex-Presbyterian clergyman from Ohio, who had the position of second lieutenant.

This man wore blue glasses, a frock coat and had for some time been in jail at Johannesburg charged with holding up a stage coach. He showed credentials as a bona fide clergyman, but he was better known on the Rand

as a gambler.

Lynch's enemies say he was afraid to ask the man to return the riding-whip, and that's when he made a mistake. For in a short time he lost his Mauser pistol, and then a highwayman named Joe Turpin commandeered the colonel's gray pony. PERSONAL RECOLLECTIONS.

The writer met Lynch in Pretoria after the Second Brigade had been in the field two weeks. During that time the 70 alleged Irishmen had pretty well cleaned their leader out of all

his personal belongings. Lynch had the misfortune to organize his company, just when Kruger had ordered all the jails to be thrown open, freedom being given to all felons on the promise that they would fight for the Boers. The Second Brigade thus acquired the services of some of South Africa's most eminent

The Maloney brothers, who boasted of having done away with Dr. Cronin, were ringleaders, besides Joe Turpin, who killed three men on the Murchison range, and Alec Love, who held up and looted the Northwestern Hotel in Johannesburg single-handed and in broad daylight. A red-haired man known as Dan-

ger, acted as Lynch's aide-de-camp. He killed the manager of the Queen of Sheba mines, and at the same time stole a fortune in gold bullion.

There were also in the brigade cowboys from Texas, strong-arm and sec-

ond-story men from 'Frisco and Whitechapel; Cossacks from the Don, French-Algerian soldiers of fortune, some Germans, Italians, Scandinavians and about twenty Irish. Their first exploit was at a farmhouse near Rui Kop, in Natal, where an English ranchman named Pepworth, had a great estate. Lynch's

brigade, after having traveled all day, arrived at the plantation about 6 p.m. Farmers in the neighborhood said one could hear them coming two miles away by the squealing of pigs and squawking of fowls.

Peculiar Ideas Regarding a Common Disease.

Mark Twain's cure for a cold in the head was simple, but he claims very effective in his own case; his plan was to eat nothing whatever for 24 hours MUST USE CANADIAN VESSELS or presumably until the trouble had disappeared.

Mr. H. Sneyd, late accountant of the Merchants' Bank at Windsor, has been appointed manager of the branch at Lancaster, Glengarry County. Although not able to speak from personal experience as to the effectiveness of this treatment, it certainly has the merit of extreme economy, but it occurs to us that the application of it to a case of nasal catarrh might be at-

Catarrh, as everyone knows, a fad, would make of us a nation of fasters; an army, emulating the example of the immortal Tanner, who achieved world-wide fame by fasting 40 days.

Catarrh is certainly becoming a national disease and there is little doubt but that errors in diet, particularly over-eating, is a very common cause.

tional disease and there is little doubt but that errors in diet, particularly over-eating, is a very common cause. Most people, however, are more interested in the cure of the trouble than in the cause, and modern medical science has produced more effective and less heroic remedies than Mr. Twain's. Hydrastin is a new remedy, very effective in some forms of Catarrh. Red Gum is another which on account of its antiseptic properties is very valuable, while many severe cases of Chronic Catarrh have been entirely cured by the sanguinaria or extract of Blood Root alone.

#### The Machine Slips a Cog.

Under the provisions of the statute, the board of health should have met yesterday to organize; but there was no meeting. The authorities who run the municipal bodies in London ordered otherwise. The retiring chairman, Mr. Taylor, with Dr. Campbell and Mr. McBride, put in an appearance at the prescribed hour. They evidently had not received any orders to the contrary. Perhaps they would not its merits. have obeyed orders if they had received them. His worship looked into the room and declared that he could not possibly stay, as he had a meeting to attend. He could not even stay for five minutes to organize the board. Mr. Carruthers put in an appearance for a minute, and then disappeared. Mr. Skinner reached the city hall, and received his orders there so he did not come upstairs. Mr. Mattinson was not present. As It requires four to form a quorum, the three members in attendance, after waiting about fifteen minutes, put on their coats and left. Now, why was this thus?

Report says that it was all on account of the chairmanship. The chairman, Mr. Taylor, was willing to stand for re-election, and three other members were supposed to be willing to vote for him. But Mr. Taylor does not seem to be persona grata to his worship and the "Club," and orders had gone forth that Mr. Taylor must not be elected. Among those who had expressed themselves in favor of Mr. members, Mr. Mattinson. And here is where Mr. Mattinson must have made a mistake. He had no business to express an opinion before he received As a loyal subject he must obey orders; as a gentleman he must keep his word. and he could not do both. There could be only one safe way out-to resign. We understand that Mr. Mattinson's resignation is in the hands of the city officials, and will be presented at the next meeting of the council.

It may be assumed that the authorities will not be caught a second time. Whoever is appointed in Mr. Mattinson's place will have his instructions before his appointment. Of course, a man with any self-respect would not take an appointment on those conditions. But there will no difficulty in great Province of Ontario is now being finding a suitable straw man. In the interests of the city, we would suggest to the authorities to select a good and offer him the chairmanship.

The railway situation is daily growng in interest. Sir Thomas Shaughout against a subsidy to the Grand Frunk Pacific, and says if the Government aids that project, the C. P. He says he is opposed to Govrnment subsidies on principle as beng "demoralizing and unbusinesslike," humorous confession from the head a railway system which was built rith public money. His explanation is hat the C. P. R. was a pioneer road. d could never have been built as a rivate enterprise; but conditions have hanged and subsidies are no longer cessary. He contends that the wist policy is the development of existg railway lines and points out that C. P. The conditions are an improvement apon those laid down by the United States in 1899. The Americans proposed that all towns and settlements on tidewater in the disputed territory should remain under United States jurisdiction, no matter what the verdict of the tribunal might be. This would leave Dyea and Skagway, the seaports of the Yukon, in the possession of the United States forever. Sir Wilfrid Laurier has given the gratifying assurance that no such reservations have been made in the present treaty. The whole boundary question goes to the tribunal without conditions. This puts a decidedly better face on the treaty, as the dispatches sent out from Washington yesterday gave the impression that it was identical with the United States proposition of four years ago. The Washington Government has conceded something, but the refusal to add neutral arbitrators and so avoid the possibility of a deadlock cannot be reconciled with an honest desire to settle the dispute on

The Chatham News says the Standard Oil Company is "knocking" the Raleigh oil field through the newspapers. If the charge is true it is pretty good proof that the field is all stuff in. Savvy? right. It would be Standard Oil tactics to "knock" a territory and gobble up leases at bargain-counter rates.

If the city of Toronto wishes to spend millions in developing and transmitting Taylor was one of the newly-appointed Niagara electrical power, the Legislature should not stand in the way. Of course, Toronto does not propose to embark in any such undertaking, but its possession of a charter might have orders. This put him in a dilemma. a salutary effect on the Niagara power corporations.

> The Toronto Globe is making a gallant fight for the abolition of the coal duties. The mine owners of Nova Scotia claim that the American duty may be reimposed a year hence and that the removal of the Canadian duty will deprive Nova Scotia coal of its Canadian market in the meantime. It is almost certain, however, that if the Canadian tax is removed, Congress will never restore the duty and Nova Scotia coal will find an unlimited outlet in the New England States. The held up by the duty.

The census returns show that the population and the area of Canadian siderable attention during the coming cities bear very little relation to each other. The acreage of the leading cities are: Winnipeg, 12,750 acres; Toronto, 10,797; Fredericton, 10,790; St. John, 9,169; Montreal, 5,772; Vancouver, 5,091; London, 4,378; Hamilton, 3,990; Ottawa, 3,365; Charlottetown, 2,400; Kingston, 2,177; Quebec, 1,921; Victoria, 1,874; Moncton, 1,650. London is tolerably well spread out. This has its disadvantage in the increased cost of keeping up the streets, in police and fire protection, and in the waterworks service.

Striking testimony of the recent growth of the Northwest is furnished by the annual report of the department of the interior, which shows that in the twelve months ending June 30 last, the free homestead entries in the Canadian Northwest numbered 14,633, covering an area of 2.341,280 acres, an increase of 6,466 entries over 1901. During 23 years preceding 1896, 67.516 entries were made, covering an area of 2,935 entries per year, covering an area of 469,600 acres. During the six years since 1896, 44 147 entries were made, covering a total ntion seems to be contradicted by area of 7,063,520, or a yearly average of 7.358 entries, covering an area of 1.177.280 acres.

Mr. Chamberlain is making a triumphal progress through South Africa and will probably emerge from his great task with increased prestige. His speeches, of which full reports come to hand in the London Times, are conciliatory, but firm. He showed the iron hand under the velvet glove when he told the Boers at Pretoria that the terms of the peace agreement would not be expanded, and that he would be better pleased if they had acknowledged what the British had done for them instead of demanding more. In his speech before the Johannesburg Board of Trade, he said he had heard that the silly story of his assassination had depressed the markets in Paris and Berlin. "I should have supposed that those were the last places where such news would cause depression," he added with a flash of the old Chamberlain spirit.

The Start In married life is generally made on an equal footing of health in man and wife. But how soon, in many cases, the wife loses the start and fades in face and fails in flesh, while her husband grows even more

rugged and robust. There is one chief cause for this wifely failure and that is, the failure of the womanly health. When there is irregularity or an unhealthy drain, inflammation, ulceration or female weakness, the general health is soon impaired.

Dr. Pierce's Favorite Prescription cures womanly diseases. It establishes regularity, dries unhealthy drains, heals inflammation and ulceration and cures female weakness. It makes weak women strong and sick women well.

strong and sick women well.

"A little over a year ago I wrote to you for advice," says Mrs Elizabeth J. Fisher, of Diana, W. Va. "You advised me to use Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery,' which I did and with the most happy result. I was troubled with female weakness and bearing down pains. Had a very bad pain nearly all the time in my left side, nervousness and headache. Was so weak I could hardly walk across my room. Could not sit up only just a little while at a time. My husband got me some of Dr. Pierce's medicine and I began its use. Before I had taken two bottles I was able to help do my work. I used three bottles in all and it cured me. Now I do all my housework. It is the best medicine I ever used."

## The Niagara Power Problem.

[Brantford Expositor.] The question of the proper utilization of the great water power at Niagara Falls, so that the Canadian people may derive the 'utmost benefit therefrom, is certain to attract session of the Legislative Assembly. Considerable fault has been found with the Assembly because last session it did not pass an act, promoted by the city of Toronto, which would enable that city to go into the electric power business on a wholesale scale, and to make agreements with other cities. The objection to that proposal, however, was that it left the provinrepresentatives of outside municipaliies could not be expected to agree to. What is wanted is some scheme for placing all Ontario cities, with due allowance for geographical position, on an equality, and to pro ect them from the rapacity of private corporations. Any proposal which will accomplish this end is certain to be warmly welcomed.

[Hamilton Times.]

In one of the factory editorials, which appeared in several of the Tory papers the other day, it was stated that "instead of making fortunes, many of the leading manufacturers are losing money." Who are they, and where? You cannot find them in Hamilton and we do not believe they are to be found in Galt or St. Catharines. When the N. P. was in force, many of our manufacturers had long spells of idleness, and were glad if they could keep their capital unimpaired, but now they are all busy, and their greatest difficulty is to fill the orders which crowd in upon them.

Miss Morris has received many condoling messages from friends. Her husband said that she bears up splendidly, and takes her condition philosophically. She partakes freely of nourishment, and gives every indication of a recovery in due time.

The registrar for London has now issued figures which tend markedly to confirm this condition in regard to the capital. The birth rate per 1,000 of population was 29, which is the lowest rate since the registration began. On the other hand, the death rate was 17 1-10 per 1,000, which is the lowest since 1840. It is expected that the marriage rate will continue to decline. It was 17 1-10 per 1,000 last year. This is ascribed to the fact that young people who live in comfortable apartments delay marrying until they are able to obtain better accommodations. While London is making an effort to stamp out alcoholism by special legislation, Paris is discussing the value of alcohol as food. Dr. Ducleaux, director of the Pas eur Institute, deprecates excess in alco ol as in everything, but thinks an average of a quart of wine daily good for every active person. Dr. Ducleaux states that not only is alcohol food like bread, meat and sugar, but, for equal weight, contains more vital energy than any of these.

# THE MARKETS.

THE LOCAL MARKET. London, Tuesday, Jan. 27. The market was not very well attended this morning, considering that the roads are in splendid condition, and also that was a tine day. The fact is, the farmines to sell at present. Hay and oats were the features of the market, as far as supplies were concerned. as supplies were concerned.

Grain—There were fully 25 loads of oats offered; the demand was good, at slightly higher prices; most of the loads sold at 52c to 53c per cental; a few loads at Hay and Straw—There were nearly 30 loads of hay offered, which brought \$7 to \$8 per ton for poor, and \$9 to \$10 for choice, only 5 loads selling at the latter figures. Straw is plentiful and sales slow, Butter and Eggs—The supply in this line was again light, and prices were unialtered, with the exception of fresh-laid eggs, which were easier at 22c to 25c per dozen.—Scarce, and prices are firmer, at \$1.20 to \$1.25 per bag; holders of car lots are asking \$1.15 and \$1.17 per bag, laid down here.

Apples—More plentiful, owing, no doubt, o the fine weather; sales were slow, at Poultry—The supply was light and prices remain unchanged, with the possible exception of turkeys, which went higher, to 15c per pound, dressed.

Dressed Hogs—There were 50 or 60 carcases on sale, and prices ranged from \$7.75 to \$8.15, \$8 being the ruling figure. GRAIN, PER CWT.

Well-Known Gentleman Makes a Remarkable Statement.

He Assures Rheumatic Sufferers

Banished His Pains and Agonies.

The startling and happy cures wrought by Paine's Celery Compound for rheumatic sufferers have deeply impressed medical men everywhere, and today, the best practitioners are recognizing the great value of the compound, and prescribe it with confidence

Paine's Celery Compound stands unequaled as a cure for all the varied forms of rheumatism. At this season its good work is apparent in thousands of Canadian homes. Men and women, lame and crippled and utterly helpless from the terrible disease are being restored to activity, health and strength. Paine's Celery Compound is the only medicine that rescues and saves the despairing victim who is told that he or she is incurable. Mr.

Morisette, Roxton Pond, Que., says: "Having been given up to die by some of the best doctors of the United States, I came to Canada last autumn terribly ill, and had lost all hope. Suffering agonies from inflammatory rheumatism, I was strongly urged to use Paine's Celery Compound. I gave it a trial, and the first bottle did me so much good I continued with the medicine until I had used seven bottles, when I found myself perfectly cured; indeed, I never felt better in all my life than at present. I use every possible means to tell others of Paine's Celery Compound, and will recommend it to those troubled with

Varying Views of the Treaty Expressed in England.

Some Canadians Consider It a Surrender-What the Times Says.

London, Jan. 27 .- The Alaska treaty is not favorably received by Canadians here. It is considered another surrender to the United States. the British Government being anxious to show its friendliness to the United States because of the Venezuelan question. Discussing the treaty, an ex-cabinet minister said that Great Britain's friendliness with the United States is of first consideration and Canadians' second.

The Times today, commenting on the treaty to settle the Alaskan boun-dary difficulty, says: "In 1899 the United States desired a commission to be composed of three members from each country. Canada strongly urged that it should consist of seven altogether. The present commission is an effort to settle the differences by friendly decision. The same commission, with an odd man, would, in point of fact, be an arbitration court, but should this commission not arrive at any decision no harm would be done to either party." The Times believes that the commission will arrive at a decision in the only manner that will leave no sense of soreness or disappointment on either side. The Daily News says the Alaska commission will meet in London.

# LINIR WRECKED OFF HOLYHEAD

During a Gale in St. George's Channel—Seventeen of Crew Reach Shore.

Holyhead, Wales, Jan. 26.-An American liner is reported to be ashore off Aberfraw Point, fifteen miles south of Holyhead. A heavy gale is raging in St. George's Channel.

London, Jan. 27 .- A dispatch from Holyhead says that a portion of the crew of the liner reported ashore off Aberfraw Point, numbering seventeen men, have come ashore in their own boats. They report that the vessel is a total wreck. The name of the vessel ashore off Aberfraw Point, Isle of Anglesey, is not yet known. Part of the crew gained the shore in the steamer's boats, but it is ed an operation in a case prepared stated that the remainder are unable to by Dr. Lorenz before he left. get ashore owing to the heavy seas running.

WHAT STEAMER IS IT? New York, Jan. 26.-It is improbable that any vessel of the American Line of steamers is ashore at Aberfraw Point. Fraserville, Que., Vessels of the American Line's Philadelphia-Liverpool service sail from Liverpool on Wednesday, and the only steamer The master-in-chambers at Toronto bound from Philadelphia to Liverpool which might be in that locality is the Noordland. It is not likely that the Noordland has reached St. George's Channel, as she has not been reported passing off the Irish coast, nor arriving at Queenstown, where she always stops, unless prevented by a severe gale. It is not improbable that the vessel is the Chesapeake and Ohio Steamship Company's steamer Shenandoah, which left Newport News Jan. 13 for Liverpool, and which passed Kinsale, on the Irish coast, early on Monday, bound to Liverpool.

STEAMERS COLLIDE. London, Jan. 26.-The British steamer British Prince (Capt. Smith), from Antwerp for New York, was in collision during a southwesterly gale early today, three miles from Dungenness, with the Company, Toronto, yesterday directed British ship Waterloo (Capt. Fellows), Langley, assignee, to wind up the from Iquique, Chili. In answer to distress signals, a lifeboat was launched and stood off near the vessels, but her services were not required. The engineroom and stoke-hold of the British Prince filled rapidly and she was run ashore. At high water the steamer was refloated and headed for this port. The head gear of the Waterloo was carried away. NO LIVES LOST.

Later.-The steamer reported ashore at Aberfraw Point, Isle of Anglesey, is the Bohtilde-Russ. She is a German vessel, of cigarettes on Sunday. The case and was bound from Liverpool for Cardiff. All her crew were landed in safety.

LORENZ CRITICISED

London Surgeons Do Not Approve His Operations.

The Orthopedic Hospital Is Profiting by His Visit.

London, Jan. 27 .- Prof. Lorenz's short stay in London was not very pleasant. A great number of London's surgeons do not approve of his "bloodless operations" for congenital displacement of

the hips. The reception accorded to Dr. Lorenz's methods of operating was illustrated at a meeting of the Clinical Society, when Prof. Openshaw read a paper severely criticising the methods of the Vienna surgeon. His attitude was supported by the chairman, Dr. Howard Marsh. In fact, Surgeon Howard Marsh. Noble Smith was the only member to advocate the professor's mode of treatment which he has practiced himself a long time at the City Orthopedic

But Dr. Lorenz expected opposition and criticism and came prepared for it. He was approached by an eminent surgeon with a view to giving a demonstration in a London hospital, but he replied that if the surgeons of London really were interested in his work they could quite as well come to the City Orthopedic Hospital, where his system was appreciated and followed and where there were special facilities for conducting the demonstrations.

As a result, a number of surgeons who had previously professed themselves eager to see the professor at work, absented themselves altogether

from the demonstrations. Dr. Lorenz had to suffer the treatment which the profession often deals out to specialists whose metrods are not considered orthodox. Not that this neglect disturbed him in the least, for he cares nothing for social func-tions. He contented himself while in London with visiting a few personal friends, going to the theater and see-

ing the metropolis. At the City Orthopedic Hospital they profiting already by his demonstrations, Dr. Noble Smith, on a direct personal observation of Dr. Lorenz's methods, having successfully conduct-

Rheumatism, Bright's Disease, Heart Disease, Dropsy and similar complaints, have yielded readily to this wonderful remedy, and now Israel Boyer, jun., of place, comes forward with the statement that Dodd's Kidney Pills have cured him of a seemingly incurable stomach complaint. He says: "For fifteen years I suffered from malady of the stomach, and had long given up hope of ever having it cured. Then I was induced to try Dodd's Kidney Pills. They relieved me almost at once, and by the time I had finished the first box my complaint had disappeared. I am well now and can work all the time."

A Fifty-Foot Calendar.

N. W. Ayer & Son, the Philadelphia dvertising agents, who have a national reputation for "keeping everlastingly at it," believe in sticking to a good thing when they have one. For instance, their calendar for 1903 follows the design used for several years past, but with new coloring. And in truth it would be hard to improve upon their design; the dates are plainly readable at 50 feet, yet the calendar is not unpleasantly conspicuous; it is artistic, simple and useful, and it is not surprising that it has become so popular an adjunct to business offices that the supply never equals the demand. While they last one will be mailed to any addres for 25 cents, which barely covers cost and postage.

Lieut.-Gov. Tillman May Escape Punishment.

Plea of Justifiable Homicide Will Be Made in His Behalf.

New York, Jan. 27 .- A Columbia, S. C .. special to the Herald says: The general defense of Lieut -Gov. Till-

man's friends is that during the last campaign for governor, in which Tillman was a candidate, Gonzales carried his opposition to Tillman too far, and that he "hounded" the man. The friends of Tillman say that Gonzales gave Tillman sufficient and ample provocation to kill

Tillman's counsel avoid anything so extremel radical. They take the position that Gonzaes and Tillman were sworn enemies, and that Tillman expected Gonzales to be armed, and expected to have a street fight on the first encounter. They held that Gonzales had his hands in his pockets, and that Tillman thought that Gonzales had his hand on his pistol and intended to fire from the coat pocket, and on such a supposition he drew his revolver and fired on Gonzales.

As a matter of fact, Gonzales was unarmed, and had no idea of an encounter with Tillman, and as a further fact Gonzales was not in the habit of carrying a weapon, and had not done so.

There are many people who believe that nothing will be done in the end toward punishing Tillman. They think that the first trial, which will take place at any time after April next, will result in a mistrial or possibly a conviction of manslaughter, and that the case will dreat Tillman's counsel avoid anything so ex-

trial or possibly a conviction of man-slaughter, and that the case will drag along on appeals until everybody gets sick of it, and that in the end Tillman will go unpunished.

Varying Prices of Gas.

Toronto, Jan. 27.—Mayor Urquhart has received a communication from Mayor Cochrane, of Montreal, confirming the report that there is a difference of 50 cents per 1,000 cubic feet in the price of gas for heating and lighting purposes supplied in that city. For heating only 60 cents is charged; for cooking, \$i; and for lighting, \$i 10. Mayor Urquhart argues that as the same quality of gas is supplied in each case, it is ridiculous to make such a discrimination. He does not think it likely the company in Montreal would sell gas for any purpose at less than the cost of production, so that it is evident that an excessive price is being charged in both cities for the control of the con cost of production, so that it is evident that an excessive price is being charged in both cities for gas used for lighting. In Toronto there is no difference between the rates for hating, lighting and cooking.

# CATTLE EXPORT FROM NEAR LONDON STEADILY GROWING

by One Dealer Alone.

Mr. Dan Coughlin Speaks of Fine Outlook for Future.

OU can safely say that the cattle export trade around about London has increased considerably," said Mr. Dan Coughlin, the well-known exporter, to an Advertiser man at the Grigg House yes-

terday. "Although for the past couple of weeks the price has been on the decline," he said, "the value of Canadian cattle on the English markets has increased materially. There are more may account in some measure for the shipments now and larger ones. All the cattle that we send to the old and are usually about 1,200 to 1,400 pounds in weight. There is a good demand for them on the British market, and you can get some idea of the number shipped from this district when I tell you that we ourselves ship about 10,000 annually, the majority of which are bred within a radius of 60 miles

"All of the men who make Canadian ourselves ship some cattle from the far Northwest. They are fed all year on the ranges and make coarser beef. The feeding of a beef has a great deal to do with its sale. From a statistical point of view, Mr. Coughlin's remarks are very interesting. It may seem to the average person, who once in a while sees seven or eight heavy-eyed cows lolling along the street, that Western Ontario's export trade is confined to boundary line slaughter houses. He may stand on months. There are fewer who think of what the enormous weight of these bovines must be. Saying that each one weighs 1,300 pounds, the total is 13,000,000 pounds, or 6,500 tons, which

# LOCAL CONCERN MAY BUY NEW BRICKMAKING PROCESS

Engineer-Montreal Plant's Machinery Made Here.

MEETING is beternoon at the Tecumseh House, which will decide a matter of considerable importance to the build-

ers of this county. A new process of brickmaking has been discovered by a 30,000 pounds. Swedish engineer. It is called the silicate process, and the patent rights are held in Canada by a company in each province. The people who control the Ontario rights are disposing of privileges by counties, and for several days past Mr. Hallward, representative of the owners, has been in the city negotiating with local men for the patent

It Is a Discovery of a Swedish ever, the component parts of the brick, sand and limestone, mixing and cementing by compression. The first plant in Canada to turn out the new bricks will be one in Montreal. There the big Sheppherd & Son concern, whose annual output runs up to twelve millions has discarded, its entire plant and is installing the new process. The firm will be known as the Montreal Silicate Brick Company. The first retort for the plant, two of which are being made here by E. Leonard & Sons, was shipped from London today. A special flat-car had to be procured owing to the size of this heavy piece of machinery. It is 78 inches in diameter and 37 feet long. It tested 200 pounds to the square inch, equal to a pressure of 473 tons on each head. This retort weighs

The brick, of course, not requiring fuel, can be manufactured in all kinds of weather and at all seasons. It is learned by The Advertiser that the company holding the patent rights have had several offers, among those wanting the process being the proposed cooperative concern of local contractors.

The meeting this afternoon will decide the matter, and if the rights for Middlesex are obtained a company will likely be formed at once on a joint

pleted. The work has been in progress for a long period, and its completion will mean much in the handling of the immense traffic which daily goes over the main line from Sarnia tunnel to Suspension bridge. A portion of the distance east of Hamilton has been double-tracked for some years, and every day, Sundays excepted, since the additional track-laying was begun, large gangs of laborers have been at work. In places obstacles had to be overcome, but as a rule the work was shipments are Canadians, or at least the greater proportion of them. We heaviest and most costly parts of the extension are at Jordan and the Welland Canal. At the canal the railway company decided not to widen the tunnel, which

has been in use for so many years, preferring to grade the two tracks to the vessel-way and erect a doubletrack steel swing bridge over it. Like the Jordan bridge, this also meant a great outlay. The line through the tunnel will be used only in cases of emergency. The only part of the undertaking now to be finished is the stretch be

As I took up my book, I saw in the glass at the back of the to the reality, and found-you know what I found."

The coroner's officer nodded, and made some notes. He did not believe a word that Philip had said. The explanation seemed to him to come too glibly, almost as though it had been rehearsed over and over again. He man. forgot that the absolute, unembellished often nothing sounds more like lies than actual facts. Truth being stranger than fletion, it is not wonderful that truth often gets the cold shoulder. "And you do not know how she got into your rooms?"

Jasper looked up. "I don't know whether this sort of explanation is usual," he said, "but I think, were I you, Philip, I should decline to answer these questions."

"Decline?" Philip repeated, while the coroner's officer watched both men. Why, I am anxious the thing should be cleared up."

Jasper shrugged his shoulders. "I can only give my advice," he said. "I can only tell you what I should do under the same circumstances. Least soonest mended; and, of course, in the eyes of those who do not know you, things look queer." "Queer?"

Jasper laughed.
"My dear chap," he said, "are you really so simple as not to know that you will be accused of this That being so, silence is golden. will be accused of this crime?

Philip leant suddenly forward.
"What nonsense!" he said. "I tell
you it's three years since I saw her!" "I've not a doubt of it, but who'll believe you? You'll have to prove it, and even then she might have found you out. She might have heard of your engagement, or rather, that you were likely to be engaged, and have felt aggrieved at it: no woman interests a man less than a woman of whose love he has wearied. But with women it is different. Once a man has been her lover, she feels a prospective right in him, and bitterly resents it if he gives his love elsewhere. Men are only jealour when they love; women jealous when they have loved-one might almost say that women are jealous with regard to any man who has paid them anything beyond the

then laughed again. "Oh, so you want to bring me into it now, do you?" he asked. "I—no; I never saw her in my life. My cousin will bear me out in that, if you doubt my word."

The elastic band snapped over the notebook of the coroner's officer.
"I won't trouble your cousin," he answered; "but I think"—speaking, perhaps, a trifle spitefully-"we will send you also a summons for the inquest.'

CHAPTER XI The officer rose from his chair, bowed nd left the room as he spoke Jasper shrugged his shoulders once

"What a temper!" he said. "More like a woman's than a man's. What will you do about Leslie, Philip-give her up? Philip looked at him a little blankly. "Give her up? Of course not. Why

And you've only heard of this horrible affair. Such a pretty girl, Jasper! And she looked just as beautiful in death, I wonder who can have been such murderous brute as to kill her? Well, with all my heart and soul. I hope he'll swing for it. I think I'll go up to my rooms now. I think I heard

Philip shuddered a little; it seemed so ho rible to him to hear the bright, beautiful girl whom he had known and loved with his first boyish adoration, called a body.

He paused a moment,
"Have you made any discovery?" he asked. "Have you any clue to the murderer?" The man looked at him a little stead-

'Couldn't say," he answered: "twould be rather quick work if we had, wouldn't it? But you'll learn all about that at the inquest."

"Yes, of course," Philip returned, and went on upstairs.

The door of his lobby stood open. His heart beating a little quickly, he strode through to his sitting room. The whole of the furniture seemed to have been disarranged, probably when the police made their search; a dark patch on the hearthrug made him sudder.

He noticed that the photograph of Carline had been removed, and the curious old-fashioned dagger which had dealt the fatal blow; but, though every other place had been turned out, nothing else seemed to be missing. He sat down and thought for a moment, then he re-entered his bedroom, and made a careful toilet. He must go and see Leslie, break to

her this horrible thing which had happened in his rooms, before she read it in the papers.

When he left the house he knew that he was followed, and though it gave him for a minute a sort of shock, he did not really mind. A guilty man

looks round for a policeman with much the same fear of him that a field mouse has of an owl when he makes a night forage; an innocent man, having no cause for fear, feels nothing more than

## STIFF FIGHT BETWEEN ST. JOHN'S AND WATFORD

Former Team Won by a Score struggled to get free, but found that they were "caught in the web" with a vengeance. Their helpless condition of 4 Goals to 3.

No Senior City League Games This Week-The Big Races.

By Way of Comment.

London has a large representation among outside hockey teams, those in Toronto being especially numerous. As in other branches of sport they play the game well. In the Toronto teams, several of the local boys are among the best players on the teams. "Chuck" Garratt, who went to Toronto a couple of years ago, has been playing on the druggists' team in that city. He was hurt in a game on Thursday and compelled to retire for a few days. He is visiting at his home in this city at present. Fred Burns is a member the Dominion Express Company's team and is doing fine work. E. W. Dawson, Tom Johnson and Harry McElheran are playing in the Wholesale League, while Frank Webb, who is well known in this on one of the Bank League teams, tween the Ramblers and the Carltons, play on a team.

Struthers filled the position of president of the London Rugby football team, has won for him the admiration of all who were associated with him this year. The office of president s usually a rather inactive one, but this season Mr. Struthers worked with such vigor that the club easily supported itself. He devoted a great deal of his time to looking after the interests of the club, and his services were properly appreciated. Mr. Struthers has shown that he is a true lover of sport as it should be conducted, and is deserving of the thanks of every football enthusiast in the city.

## HOCKEY.

ST. JOHN'S WON. After one of the most interesting games of hockey of the season, St. John's O. H. A. team won over the Watford O. H. A. seven by a score of to 3, last night. It can be safely said that at no game yet played here have the opposing teams been so well matched, both in point of size and weight. Interest lagged at no time, and the playing was one continual series of hard and close checking and exciting rushes. All the players were model stick-handlers, and where the St.John's showed their superiority was in more combined work and in following up and keeping close to the rubber. There was much more combination than in previous games, each team scoring one from start to finish, and w their goals by the aid of clever team nessed by about 100 specta.ors.

The puck was faced off at 9:15, and it was but a matter of a few minutes before the locals had scored. The play was exceptionally close, each forward marking his man determinedly, and the defense men doing good checking. Hodgens, the point of the Watfords, was the fastest man on their team. played the position as it should be played, and if he had not played, the story of the game would be different. Their forward line is fast, though not as fast as the St. John's, who can skate better and do more effective checking. In this line McGuffin is especially bril-When he went after a man it was seldom that he did not secure the puck. McMahen's and the Woolley brothers' work was also of a high order. Both the Woolleys and McMahen acquitted themselves exceptionally well, while Little, at cover point, played a clumsy but became improved in the second half. Johns had unusually hard work, and did quite as good as when he helped London to win trophies. The other goal-keeper received much protection from Hodgens. Dunlop, the cover, might have done better than he did. Hodgens invariably did the de-fense checking, the St. John's appearing to be able to pass Dunlop without much difficulty. The Roche brothers, and, in fact, the whole Watford forward line, played a fine game. At half

several goals were scored with rapidity at the start of the second and things looked very interesting. The Watfords scored three goals to the Saints' two tying the score and it was Saints' two, tying the score, and it was not until near the close of the game, when Tom Woolley scored, that the anxiety of the local spectators was relieved. Rather 2 humorous episode oc-curred in this half. Woolley and the other St. John's forwards were making a combination rush on the Watford goal, when Woolley, unable to check his speed, ran with force into the goal, knocking the keeper down. The goals are backed with cord netting and the skates of both players became entan-gled in this. For a few moments they

caused the game to be stopped until they were extricated. Archie McMahen received a severe cut over the eye, but was not disabled. One of the Watford men was put off the ice for raising his stick above his shoulder, and several times players were set down for rough Mr. Jack McNee did the refereeing in an entirely satisfactory manner. The line-up was as follows: Watford—Goal, Ward; point, Rodg-ers; cover point, Dunlop; forwards, F. Roche, C. Roche, Clair, Reed. St. John's-Goal, Johns; point, Morti-

#### CURLING.

THE DETROIT BONSPIEL. Detroit, Jan. 26 .- The Detroit Curling Club is making great preparations for the international bonspiel which will be held at its Forest avenue rink on Tuesday and Wednesday, and already has entries from clubs representing many different towns and cities. This list probably will be increased. Entries to date are from Windsor, Sarnia, Petrolea, Chatham, Point Edward, Forest, Grand Rapids, Glencoe, Ridgetown and the home clubs. The prize list is one that will force the curlers to their best efforts. The ice has at no time this winter been in better shape than at present. PARKHILL AND ST. MARYS TIED. George F. Hall Is All There Is to "An American Hustler."

George F. Hall is smooth. So is his play, "An American Hustler." In fact, the playwright, to make it smooth, seems to have taken all manner of liberties with common sense. This melodramatic comedy, however, is but a pretext for Mr. Hall to exploit his peculiar style of acting. At its presentation last night at the Grand a large audience was present, who demonstrated fully their appreciation of its good qualities. It has good qualities, chiefly apparent when the said George F. Hall is on the stage. It is a classic in slang and is destined to become "the idol of the gods." The flow of language is such as might have been expected by those who have heard Mr. Hall in "The American Girl" and such comedies of the "made-to-order" variety.Mr. Hall is without doubt an adept in the art of stage eloquence, and his very funny sayings last night did not fail to please the audience, while his comic songs were received with repeated encores. As "An American Hustler" was made for Mr. Hall, with its fit and werkmanship guaranteed, proof of which was given by the starring comedian, it is unnecessary to mention any others in the cast. He's It.

AN ENGLISH MUSICAL COMEDY. Dan Daly, in "The New Clown," the great English musical comedy success, is the offering at the Grand on Thursday. The piece offers Mr. Daly exceptional opportunities for the display of his talents, but the others in the cast have not been slighted in the matter of parts. Show girls of the Gibson Christy and Stanislaus type are much in evidence. In the cast are Louis Harrison, Bert Thayer, Tom Browne, Sum-ner Gard, Francklyn Wallace, Edward Gore, Merri Osborne, Eugenie Hayden, Eva Westcott, Jane Lovell, and many others of equal cleverness, the large chorus being one of the leading features of the attraction.

Joseph Blaney, a milkman residing at Dreaney's Corners, was arrested bail in the sum of \$400, and was released until Saturday when he will appear before Squire Lacey for trial. The complainant is Bailiff L. W.

Stevens, who, accompanied by Constable McGraw, went out to Blaney's place yesterday afternoon to serve a writ of commitment in the ninth division court. Blaney, it is alleged, was in the yard when the two men drove in and on learning their mission is said to have flourished an axe. At the same time he is said to have told the bailiff to journey to that portion of the universe where the coal ring wouldn't bother him. The bailiff and the constable became alarmed at his actions and agreed to leave the yard. In their haste to turn around the visiting in the city, which is his native cutter upset, whereupon Blaney began to smash in the side of the cutter, according to the bailiff, who was slightby injured in one hand. #### IRRITATING TROUBLE QUICKLY OVERCOME

If You Only Find Out the Right Course to Pursue.

Many physicians who advertise to cure piles, without the aid of the knife, simply use Pyramid Pile Cure remedies. They do so because they know it is the best medicine for obtaining a proper combination of the most scientific ingredients for the cure of piles. Pyramid Pile Cure is not an experimental stage, but is an established remedy, and is recognized and used by the best physicians in the country. Being in suppository form, it reaches the trouble at once and the healing diate results are obtained, and before the patient realizes the fact he has recovered from the pain, suffering and irritation which this trouble causes. Children who suffer from this painful trouble, obtain relief at once. It is well with a very young child to reduce the size of the suppository before using. However, if children are afflicted with piles, they should be treated without delay, or the trouble may become chronic. Hundreds of little ones have been cured with Pyramid Pile

The prevention of piles is better than the cure, and they can be prevented if only people would look to the regularity of the bowels and not become constipated. Constipation and its attendant ills can be avoided by the use of Pyramid Pills. The proprietors of the Pyramid Pile Cure saw that it was necessary to use with the ma-jority of their patients a mild non-irritating laxative, and the Pyramid Pills for constipation were the result of much careful thought and patient investigation. Pyramid Pile Cure and Pyramid Pills are sold by druggists everywhere for fifty and twenty-five
