THE COURIER.

That we are approaching a crisis in the political affairs of this Province, must be manifert to any one who bestows but ordinary attention upon the language of our journals. The public mind is not occupied with discussions about a change in the Ministry, or canvassing the merits of aspirants - the universal clamor is for a change in the system. In the race some are in advance, some are laggards, some are scarce ready for the start; but all feel that Responsible Government is not merely a delusion, but a positive curse to the Colony. The French Canadian population are now ably instructed by several journals which dare to speak boldly the truth, despite the Priestly dictation with which they are assailed even from the pulpit. We translate the following extract from La Sentinelle du Peuple, a recently established paper at Quebec, as an evidence of the nts which animate the industrial classes in that city. The "Clear Grits" of Upper Canada may well afford to ridicule the empty vapouring of the Lafontaine junto, when they see adversaries in the Ministerial stronghold, who were once the blindest followers of Responsible Go-

How comes the delay to apply it 1—after nine years of bluster and fuss, what has it done ! It has created it public debt of several millions; it has placed in office, its blind portions, or

for them; it has pillaged the public treasure.

But liberal institutions with them? Index things are yet to be done. Can we, at the present day, be prevented from perceiving that the system of Responsible Government is like a wheel, which always brings the same results, no matter who turns it? England, ceding to the demand of its people, has withdrawn the protection to our products in her market, and close the same of the protection of the products of the present of the products of the present of the prese protection to our products in her market, and given us nothing in return. At the present day, our farmers work like slaves upon the land where their fathers, with ulty furnish food for their families. It is probable that the repeal of the Navigation Laws will bring to our shores a considerable number of German emigrants, who will be wending their way towards the Western States, there to join their fellow-countrymen, who are con-sidered the best farmers in that section of the country.
