Brain-Workers and Rest.

Some brain-workers toil on year after year contenting themselves with the relaxation of a day or two now and then. They have no real vacations, and the brief intervals that they are away from their duties do them but little good, not being long enough for them to forgot their work and vexations and get out of the groove they have been running in. There comes at last to these men hard for them to fix their mind upon one subject; their work seems to grow more and more irksome, and in conversation there is

a slight tendency to incoherence. It is rather difficult for them at times to express themselves clearly, and suitable words do not come to them as readily as they ought. When conversing they start is no industry that goes on more assiduously in slowly, and after a short time their ideas year after year, which has so many workers are somewhat confused, and they are obliged to make considerable effort to keep their atto make considerable effort to keep their attention fixed upon the subject they are discussing. In writing there is a hesitancy, especially on long words or sentences. They are obliged to stop and think, seeming to dryp the thread they have been holding.

These are signs of mental failure which must not be disregarded. In this condition of brain exhaustion not only are the reasoning faculties sluggish, but unusual effort is required from the weakened will to keep the attention fixed. Good mental work is then accomplished only at the expense of the brain, which is still further weakened by every intense effort.

The time has now come when mental resis imperative, and it should be as complete as possible: a long vacation should be taken; short rests are not likely to do any good. A sea voyage promises the greatest good to the weakened brain-worker. One shipboard he seems to drop almost entirely out of his old life. His vacation should not be of less than a month's duration, and it should run for several months. Failing to take the necessary rest, insanity is very likely to be the

I Afflicted, Try It. It Will Cure You. Malcolm McLean, of Kensington, P. E. I. writes the following: F. E. 1. WITHES THE FORDERS.

For five years I suffered from severe Chronic Bronchitis, for which the doctors and numerous patent medicines failed to give relief. My physicians and friends advised a change of climate as my only hope. HAWKER'S BAISAN OF TOUR AND WILD CHERRY WAS recommended to me, and I am happy to say that I was entirely cured before I had used two large bottles. I consider it to be truly a wonderful medicine, and cheerfully recommend it to all so affleted.

Eat Before Sleeping. There has been quite a revolution of late ears in many countries in regard to the onnection between eating and sleeping, and it is said a radical change is likely to take place before long in the practice of a great many families in England. The popular idea is that eating at night is highly injurious to the constitution. It is now recognized that nature contradicts this notion. Provided a man is hungry and his stomach is in proper condition, the practice is not only un-harmful, but rather beneficial. To go to bed

on an empty stomach is apt to drive away sleep altogether. Three or four hours be-fore bedtime a substantial dinner or supper should be eaten, and on going to bed some simple food should be taken every night by year. hose who have an inclination for it and essecially by delicate persons or invalids. Persons invariably feel drowsy after a heavy meal, and, on the other hand, wakefulness s often merely an indication of hunger. The digestive organs having finished with it, the blood flows once more to the head, bringing with it consciousness. The prevalent notion seems to be that the digestive organs rest simultaneously with the brain. Physiology does not support this proposition. Innumerable cases can unfortunately always be found of men, women and children com-

diately be followed by a sleep. Where Earrings Go.

People often wonder where all the ea rings go or have gone to. A few years ago the fashion of wearing these relics of barbarism was quite general, but now it is the exception and not the rule to see a welldressed lady with a pair. Indeed the ornaments have been left off so long that scor of ladies who used to wear them could hardly do so now without inconvenience and pain. But the pretty toys or gems have not been thrown away or wasted; thousands have been worked up into other and more fashionable ornaments. Many very hand-some brooches have been made out of ear rings which have outlived the fashion, and there has been quite a large amount of ingenuity displayed in the work so as to do away with any suspicion of second-hand in the restructed adornments. More than one pair have been made up into sleeve-buttons and presented to a member of the sterner sex, and others have been fitted with pins and used by their fair owners as hat or hair pins. The best judges in these matters doubt whether earrings as such will ever become popular again, and it is very unusual for

With a screw-driver, remove carefully all he old tacks, and take off the old cover for a pattern. If the cover is to be put on smooth, it is a very simple matter. If it is put on with buttons, it is a little harder; but is still possible. Take some pieces of twine about ten inches long. Thread a piece The messenger went away, but was back into a long darning needle, and draw the twine through the eye of the button. Then draw one end of the twine through the back or seat, in the old place; draw the other end through a very short distance from the first and tie them tightly in a very hard knot (you will see how this is done by removing the cover off the back.) Some care is ne least it was intended to be amusing. cessary to keep the goods straight and in place. Gimp is needed to cover the tacks The policeman, who occasionally snoops along the edge, and there are now small around behind the scenes, was asked to prebrass headed tacks to put it on with. There tend to arrest the subject of the joke, "a is a great variety of goods useful for covering, from cretonne to plush. To Clean Marble. To clean marble, mix two parts of powlered whiting with one of powdered bluing and half a pound of soft soap, and allow it o come to a boil; while still hot apply with a soft cloth to the stained marble and allow it to remain there until quite dry, then wash off with hot water and soap in which a little salts of lemon has been dissolved. Dry well with a piece of soft flannel and your marble will be as clean and white as when new.

-"We out not to fear to speak of or love at home. We should get all the tenderness possible in the daily household life. We should make the morning good-byes as we part at the breakfast table, kindly enough for final farewells. Many go out in the morning who never come home at night; therefore, we should part, even for a few hours, with kind words, with a lingering pressure of the hand, lest we may never gain look into each other's eyes. Tenderness at home is not a childish weakness; it is one that should be indulged in and culti-

vated, for it will bring the sweetest returns." -A correspondent of the Washington Star who has been studying the subject of getting rid of fleas, gives this as the result of his investigations: If those who are troubled with this insect will place common adhesive fly-paper on the floors of the room infested, with a small piece of fresh meat in the centre of each sheet, they will find that the flies will jump toward the meat and adhere to the paper. I completely rid a badly infested house in two nights by this means.

FRENCH TOAST. - This is always a favorite dish with children, and is made of thin slice cut from a stale loaf, and moistened in milk and eggs-two eggs to a pint of sweet milk-and then fried on a griddle with a mixture of butter and lard. It can be eaten with syrup or honey like griddle cake.

—Ladies appreciate Anti-Dandruff from the fact that it not only thoroughly removes Dandruff with three applications, but stops falling of the hair, resteres fading hair to its original color, and makes it soft and pliable without leaving any indication of a dressing being used.
