WHAT NEW ZEALAND DOES

Has Advanced Over \$60,000,000 to Her Farmers on Easy Terms to Be Repaid in Installments—The Method Productive of Enormous Benefit to the Farming Class and to the Country.

Other governments might take a leaf from New Zealand's policy. A despatch states "Premier Ward declares that New Zealand will be a 'non-borrowing' country twelve years from now. The borrowing during the next fifteen years will not exceed twenty millions. New Zealand has for years been borrowing money from abroad to loan to farmers at home. The result of this policy, combined with a wise system of land taxation, has been such that necessary funds can hereafter be obtained at home."

It is affirmed that the government of New Zealand has advanced to the farmers of that wide-awake and progressive country between \$40,000,000 and \$70,000,000 in sums varying from £25 to £2,000. It has been lent on easy terms. The rate is four per cent. It may be repaid in instalments spread over a period of thirty years. If a bad crop comes and the farmer cannot pay, the payment is passed for that year. If five such years should come in the thirty then the farmer if he desired could have five years longer to complete his payments. Or he may pay principal and interest together by paying five per cent. for thirty-two years. Sums are loaned for improvements or to raise mortgages given at a higher rate of interest.

The payment of five per cent. interest together with the principal and interest together. That is, if a farmer borrowed \$1,000 and paid \$50 each year for thirty-two years he is square with the government. If he pays only four per cent. he must pay the principal back in due course.

Such easy terms and the way they have been looked after have been productive of enormous benefit to the individual, and the state has lost no money either in principal or interest. It is simply wonderful how well interest and principal have been met, and it is marvellous how this policy

has stimulated the farming industry of New Zealand, and thus placed the country in a most prosperous condition.

The Dartmouth Patriot rises to inquire:—

"What would happen the farming industry of Nova Scotia, if 'from fifty to one hundred millions of dollars were turned loose among our farmers on the same terms as are given the farmers of New Zealand? Why, in twenty years no one would recognize this province."

"The farmers of Nova Scotia have it in their own hands to get 'this money and do as their brothers in New Zealand have done. They can demand it of their representatives and get it."

"It is time for Nova Scotia to wake up. There is a great future for the province provided men of 'ability, integrity and honesty' with a wide range of knowledge would get to work with a will and 'utilize the great reserves of energy' this province is so rich in. 'Then indeed our young men would stay here, and there would be 'things done'."

While not all might agree as to the Patriot's scheme or theory as to how this should be done, all will agree, and the farming class especially, that were such a boon to be granted the farmers of this country it could not but give the agricultural interests of the province a tremendous impetus. The farmer would have something then to rely upon and the "lean year" would not be the hideous nightmare that now disturbs the dreams of many an ambitious and industrious husbandman. The incumbrance of a mortgage would have no terrors for him if in the hands of a paternal government that would give him his own time and terms in which to possess his property unencumbered.

Obituary.

MRS. JOSEPH B. FELLOWS.

Mrs. Joseph B. Fellows, long and favorably known to a wide circle of friends and acquaintances, passed peacefully away on the 6th inst. at the residence of her son, Mr. Edgar Fellows, Upper Granville. Mrs. Fellows was the daughter of the late Mr. John B. Parker, of Belleisle, and was born on Jan. 24th, 1832. She was a woman of the "meek and quiet spirit" which in the sight of the Lord is of great price. At the same time her convictions of duty were intelligent and strong and conscientiously obeyed. From early life she was a consistent and valued member of the Methodist church, interested and active in all affairs until the weight of advancing years prevented.

MAINE LOST SIXTY LIVES BY DROWNING THIS SUMMER.

Portland, Me., Sept. 22.—Sixty-two persons, all but seven belonging to Maine, lost their lives by drowning in the waters of this State during the summer just closed.

The warmest friends of Red Rose Tea are those who have tried some other brand said to be "as good as Red Rose" and for which they paid the same price. Very easy to say a thing is "as good" but not so easy to "make good."

Prices: 30c., 35c., 40c., 50c. and 60c.

GUYSBORO, N. S., Sept. 27th.—His Honor, The Honorable D. C. Fraser, Lieut. Governor of Nova Scotia, passed away at his summer home here at eight o'clock this morning.

All classes are deeply moved by the sad news contained in the telegram above. Early in the summer Governor Fraser was attacked by an illness of a serious nature and retired from Government House to his former home at Guysboro in the hope of benefit from a period of rest. His condition has shown little or no improvement, however; although his immediate death was

not anticipated grave anxiety has been felt regarding him. His illness took a decided turn for the worse on Monday and the end came early yesterday morning. He has been one of the most popular Governors Nova Scotia has ever had. His nature was genial and kindly, his public life without a flaw, and he was honored and beloved by all, irrespective of class or party.

Launching of New Bay Schooner

The launching of the new S. S. "Margaretville" proved to be a very interesting event, says a correspondent of the Monitor-Sentinel.

Although the day was dull and windy a large number were present to witness what proved to be the most successful launch that ever took place here. At about 11.30 all was ready. The roaring of the sea and pounding of the launch ways furnished suitable music for the occasion.

The steamer looked very gay with her flags waving in the breeze and a beautiful wreath on her bow, also her name flag. This was the gift of Miss Georgie, daughter of J. A. Balcom, President of the S. S. Company, who recently governed in a creditable manner. The moment the steamer started she broke the bottle on her bow and pronounced her name "Margaretville."

As the vessel struck the water the blowing of the whistle on the S. S. Ruby L. seemed to give the vessel a welcome to the Bay of Fundy. She was taken to the pier, where she had many visitors. She reflects great credit on her builder, Mr. Boudreau, of Bellevue Cove, Digby Co. The "Margaretville" will be commanded by Capt. S. O. Baker, and will run from ports along the shore to St. John.

Hymeneal.

CUNNINGHAM-CLARKE.

On Tuesday evening, September 20th, the Baptist church at Bear River was the scene of a social event of great interest and beauty, where the marriage was solemnized of Miss Edith Muriel Clarke, daughter of W. G. Clarke, senior member of the firm of Clarke Bros., and Mr. Howard J. Cunningham, of Extension, Vancouver Island, B.C., one of Nova Scotia's prosperous young men in the far West. The church was beautifully decorated for the occasion by the young friends of the bride. The ceremony was performed by Rev. I. A. Corbett, pastor, assisted by Rev. A. Daniel, of the Methodist church, and Rev. G. A. Lawson, of Halifax. At 7.30 o'clock, to the strains of the Wedding March, rendered by Miss Nellie Dunn, the bride entered the church, the bride looking exquisitely beautiful in her wedding gown of white satin, in mesaline, with crystal trimmings and rose point lace. She wore a pendant of diamonds and pearls, the gift of the groom, and the conventional veil and carriage blossoms. She carried a magnificent shower bouquet of roses and lilies of the valley. The bridesmaids, Misses Josephine and Neo Clarke, wore pretty dresses of white silk voile over yellow satin. Their ornaments were pearl monogram pins, gifts of the bride. They carried sheaves of yellow chrysanthemums. The little flower girl was Miss Edith Lovitt, daughter of Dr. and Mrs. L. J. Lovitt, who wore white embroidered lace over pale blue satin, and carried a basket of white chrysanthemums and maiden hair fern. She wore a pretty necklace of Roman jewelry, the gift of the bride. The groom was supported by Mr. William Wright, formerly a

class-mate. The ushers were Messrs Ralph Purdy and L. V. Harris. Many beautiful gowns were worn, that of the bride's mother being of black satin mesaline with yoke and sleeves of gold cloth.

After the ceremony the bridal party drove to the residence of the bride's parents, where a reception was held and a wedding supper served. The rooms were beautifully decorated throughout with cut flowers and pot-plant. After supper Mr. and Mrs. Cunningham left, and showers of confetti, for Digby, thence to Guysboro for a two weeks' visit with the bride's friends, after which they will leave for their future home in the West. The groom's gifts to the ushers were handsome scarf pins, and to the best man a sterling silver cigar case.

The bride was the recipient of many beautiful and costly presents, that of her father being a handsome cheque. Numerous other cheques and gold pieces were received. The bride's mother presented her with a chest of sterling silver. There were other beautiful gifts too numerous to mention. The bride is a general favorite among her hosts of friends, and we hope to see her in wedding dress and Mrs. Cunningham many years of happy and prosperous wedded life.

TAYLOR-STARRATT.

A very interesting event took place on Wednesday evening, Sept. 22nd, at eight o'clock at the residence of Mr. and Mrs. Alvin Starratt, "Sunshine Paradise," when their second daughter, Ethel, was united in marriage to Mr. Roland Taylor, of Aylesford.

The ceremony was performed by Rev. L. F. Wallace, assisted by Rev. J. F. Eaton, in the presence of a number of friends. The parlor was tastefully decorated with potted flowers.

Miss Minnetta Longley played the sweet strains of Mendelssohn's Wedding March, the bride was escorted to the altar by her father, who took her place beneath an arch of evergreen and flowers. The bride looked charming in a gown of white silk mull, with veil and orange blossoms, and carrying a handsome shower bouquet of white asters. The groom was supported by his brother, Roy, of Springfield, Mass., while the bride was ably assisted by her sister, Myrtle, of Dorchester, Mass., who was becomingly attired in white net over pink, and carrying a bouquet of pink sweet peas. Little Miss Helen Pearson was ring bearer, little Miss Helen Starratt, niece of the bride and Margaret Freeman carried baskets of flowers. All looked very dainty in white. After congratulations to the newly wedded couple a bounteous collation was served. The bride received a large number of valuable presents, showing the esteem in which she is held by her friends.

The bride's going-away suit was of London smoke broad-cloth, with hat to match. Mr. and Mrs. Taylor left by carriage for their new home in Aylesford, followed by the good wishes of all for their future happiness.

"Can be depended upon" is an expression we all like to hear, when it is used in connection with Chamberlain's Colic, Cholera and Diarrhoea Remedy it means that it never fails to cure diarrhoea, dysentery or bowel complaints. It is pleasant to take and equally valuable for children and adults. Sold by all dealers.

CROSSING THE SELKIRKS

Magnificent Peaks, Deep Gorges and Canyons and Heavily Wooded Mountain Sides Form a Fascinating Panorama.—Through Two Hundred Miles of Mountains British Columbia is Reached.

(Continued from last week.)

The C. P. R. Hotel at Lake Louise charges good stiff rates but if there is one place on the continent where anybody can work up a good appetite it is here. The staff of Chinese waiters were kept at their oriental little trot for a long time carrying in the fried salmon, chicken and many other good things for the many hungry mountain climbers, at dinner, after our climb to the Lakes of the Clouds and we all voted it was about the best meal we had tasted, since we left Nova Scotia, anyway.

We watched the sunset on the lake and enjoyed the illumination of both lake and hotel by the glacier, far into the evening.

At the hotel the C. P. R. keep a large book where visitors are permitted to write their impressions of the scenery here and we find many autographic testimonies of noted travellers, authors, statesmen and scientists from both the old world and the new.

As we are a long way from the daily papers the C. P. R. supply the important daily news to their mountain hotels twice a day in the shape of typewritten telegraphic bulletins. The first-class cars on their through trains are also supplied with these bulletins, all free, and news of interest to the world is given where papers are not obtainable. It was in this way on the Pacific Express we learned of the shooting of the Mayor of New York, a few hours after it occurred.

The following morning we were taken back to Laggan Station to continue our journey over the mountains. The railroad continues along the valley of the Bow River for seven miles beyond Laggan, where we reach the summit of the Rockies. This is marked by a large rustic sign, "The Great Divide." A small stream of water here flows toward the track and reaching the trench by the rails a part turns east to mingle with the waters of Hudson Bay, the balance goes west to be lost in the Pacific Ocean.

Mrs. Hector and Stephen, two prominent peaks, are located here at the summit, and Stephen Station the most elevated on the whole line. We now leave the Bow River and pass into the Kicking Horse river gorge as we descend the Rockies. Our descent is quite noticeable from the first but we cannot follow the river in all of its deep plunges, often our track clings to the mountain sides while the river is seen at the bottom of the ravine many hundred feet below us. We continue to pass a succession of great mountain peaks quite as pretty as any we have seen, and with our increased speed it is quite impossible to give each the amount of inspection it deserves but we are to have a whole day of them so we do not complain.

All mountain trains carry an observation car. These have large windows and a large rear platform that holds two or three rows of canvas stools and affords a much better chance to see the scenery than the ordinary car window.

Two tunnels with a total length of one and a quarter miles have recently been completed in this vicinity to lower the grade of the road, two engines now doing what it required four for previously. These tunnels are bored through the solid rock of the mountain bases, were made at a cost of one and a half millions and required seventy-five carloads of dynamite among other things, so the C. P. R. tell us.

In these tunnels we make some cork-screw turns and twists that bewilder us and are a wonderment to all passengers. We enter heading west and emerge five or six minutes later heading west, some distance below where we entered, entering once more we at last find ourselves on a level with the river that we had seen several hundred feet below us but a short distance back.

When we reach Field Station, twenty miles below Laggan, we have descended about one thousand feet. Field is the first station in British Columbia. There is very little here to suggest the name, as we understand it unless they speak of fields of glaciers and mountains.

The C. P. R. have another of their hotels here. It is located at the base of Mt. Stephen, which towers ten thousand feet above the sea level, its heavy coating of snow makes the atmosphere—decidedly cool for the middle of August and its snow seems almost within reach from our car. A half hour's stop is made here to change engines and train crews, but not time enough to allow us to climb a mountain or visit the glacier not far distant. This we shall leave for our next visit.

Continuing our descent of the western side of the Rockies we follow the Kicking Horse river, which for miles flows through a deep canyon the mountains rising quite perpendicular thousands of feet on either side, their bases so near together that the river and railroad have barely room in the bottom of the chasm and in many places the solid rock has been chiselled off to make room for the rails. The track crosses and recrosses this turbulent stream, its waters foaming and white, as they tumble down the rocky gorge. The noise of the river and train being greatly intensified by the towering cliffs becomes almost deafening and it is quite impossible to converse with those about you, with ease. It is a great harvest for "Kodaks" and on the rear rail of our observation platform they are quite as thick as the guns on the broadside of a Government Cruiser.

A Beautiful Poem and a Touching Story

The appended touching and suggestive paragraphs are adapted from the gifted pen of Kit, the clever editor of "Women's Kingdom" in the Toronto Saturday Mail and Empire.

THE PLEDGE (By Cardinal Manning.) I promise Thee, sweet Lord, That I will never cloud the light which shines from Thee within my soul

Oh, let me drink as Adam drank Before from Thee he fell; When faint by Sycar's well; That from my childhood, pure from sin

Oh, let me drink as Adam drank Before from Thee he fell; When faint by Sycar's well; That from my childhood, pure from sin

Oh, let me drink as Adam drank Before from Thee he fell; When faint by Sycar's well; That from my childhood, pure from sin

Oh, let me drink as Adam drank Before from Thee he fell; When faint by Sycar's well; That from my childhood, pure from sin

Oh, let me drink as Adam drank Before from Thee he fell; When faint by Sycar's well; That from my childhood, pure from sin

Oh, let me drink as Adam drank Before from Thee he fell; When faint by Sycar's well; That from my childhood, pure from sin

Oh, let me drink as Adam drank Before from Thee he fell; When faint by Sycar's well; That from my childhood, pure from sin

Oh, let me drink as Adam drank Before from Thee he fell; When faint by Sycar's well; That from my childhood, pure from sin

A Husband's Terrible Deed

SHOT HIS WIFE TO END HER SUFFERINGS WHEN MANGLED BY FALL OVER PRESBURG PILE

New York, Sept. 19.—Hunted by the memory of his wife whose sufferings he mercifully ended by sending a bullet through her head in the fields of the Canadian Northwest, miles from help, James McDowell, a prospector and miner, is at the home of friends, at No. 2774 Bainbridge avenue, the Bronx, a nervous and physical wreck. He has been under treatment, but he is growing worse. He says of himself:

"How long I can stand I don't know." McDowell granted the plea of his mortally injured wife to end her agony. He was exonerated by a jury, of his fellow men. The remembrance of that awful experience has shattered his nerves until he is now hardly more than the wreck of a man.

McDowell is fifty-eight years old, six feet tall a gaunt reminder of what was once a physically perfect man. The thought that he killed his wife, despite the fact that, with the only course open to him, is that with him constantly, and his sunken eyes tell of wearisome days and sleepless nights. He is averse to talking of the experience, but last night he consented to tell his story.

"My wife was Fanny Crawford, a native of Alberta Province," he said. "Her father was John Crawford, who had been a miner, a prospector, in California and Canada for years. He and I had been close friends, and are yet. Fanny was only twenty-two when we were married, I had a rich claim near Castle Mountain, which is in the British Columbia extension of the Cascade range, and soon after we were married I decided to visit it. I had been there some time before and had cut a rough trail to the claim."

"Fanny begged me to take her with me. I demurred, as it was no place for a woman; but she persisted, and I finally consented. We visited friends in Calgary for a few days, while I was purchasing supplies and then started for the mine. Five days journey by mules. We had three mules—one for my wife, one for myself, and the third for a pack animal, carrying provisions and tools for building a cabin, as I intended to do some work on the claim."

"The trails on Castle Mountain are very narrow and steep, so much so that it is difficult for even a mule to pass over them. One day we were going along one of these trails. My wife was some yards ahead of me, and I was lounging in the saddle, half asleep. It was about ten o'clock in the forenoon, and we had been riding, three hours."

"Suddenly my wife's mule brayed as if in pain, and I looked up to see him rearing on the very edge of the precipice. I always thought he was stung by a hornet. I tried to reach my wife's side, but before I could do so the mule plunged over the precipice, carrying Fanny with him."

"I threw myself to the ground and peered over the edge. I could hear the mule's body crashing through the trees and among the rocks to the bottom, fully 2,000 feet. I nearly pitched over myself."

"It was almost twenty-four hours later before I found the carcass of the mule. I had eaten nothing for about thirty hours, and was nearly insane from grief, hunger and thirst. My clothing and flesh were torn by the rocks over which I had crawled, my skin was almost blistered by the heat and my eyes smarted so that I could hardly see."

"I left the dead mule and crawled on. Fifty yards away I found a shapeless mass lying among the rocks. It was my wife, alive, but mercifully unconscious. I think every bone in her body must have been broken. There was a great gash in her forehead, but she was breathing faintly."

"I mixed some brandy with water from my canteen and forced it down her throat. When she revived a few minutes later her suffering was intense. She begged me to shoot her and end the agony."

"There was not a human being within a hundred miles, so far as I know. The nearest medical help was at Calgary, 120 miles away. It would have taken me ten days at least to go and return, and I would have had devoured her before I had been gone one day."

"There was nothing else to do. I placed the muzzle of my revolver against her head and fired. Then I faintly remembered the words of the Bible: 'When I recovered consciousness, and hours later, I covered her body with rocks, glass and boughs to keep away the wolves. Then I started for Calgary.'"

"I was in such a condition that I was ten days making the trip. When I arrived I hunted up Sheriff Hamilton and told him my story. He sent two deputies to the spot and they found me with things just as I had said. We buried my wife and returned to Calgary. An inquest was held and I was exonerated. Shortly after that I had a sunstroke, and after my senses returned, my nerves gave away and I am here now for treatment."

HERE'S GOOD ADVICE (Chatlam World)

Why not make the best of things as they come to you? There are eras in this town which have been complaining of hard times ever since we knew them. They could not enjoy the last few weeks of a warm winter for fear the fruit buds would start and then be killed. They know the smelts will be a failure this year. There is always something disastrous going to happen. It is just as cheap and you are worth more to your family and the town if you will look on the sunny side of life.

FOR RECIPROcity? United States Government Sends Representatives to Newfoundland.

St. John's, N. F., Sept. 17th.—Bound on a mission which is generally looked upon as a re-opening of the reciprocity issue between the United States and Newfoundland following the promulgation of the Hague Fisheries decision, Professor Chas. M. Pepper, a United States tariff expert, has arrived here from Washington. He is to have a conference shortly with Premier Morris.

A "HAUNTED" FARM. Mystery Solved After Many Strange Happenings.

London, Sept. 9.—The Staffordshire police have succeeded in clearing up a mystery which for several days has caused great perplexity to people living in the neighborhood of Uttoxeter.

A series of remarkable incidents began at Losley Hall farm, near Uttoxeter, occupied by Mr. Wilson, bailiff to Mr. Richardson, a well-known farmer. About 10 o'clock at night Mr. and Mrs. Wilson were having supper, when they were startled by hearing strange noises, and presently boots and bottles came falling down the stairs, thrown by some invisible hand.

Mr. and Mrs. Wilson at once rushed upstairs and found everything in a state of wild confusion. Their bedroom had been completely ransacked, mattresses had been carried from one room to another, ornaments had disappeared, and the place was in a condition of chaos. Convinced that some intruder was on the premises, Mr. Wilson called several farm hands, and the house was systematically searched, but without result.

Much perplexed, Mr. and Mrs. Wilson went to bed, but scarcely had they extinguished the light when all sorts of pranks were commenced by what seemed to be a supernatural visitor. A table was spirited out of the room, all sorts of articles were thrown in through the door, and when Mr. Wilson got up to investigate he was assailed with bottles and other missiles. Uncanny noises were heard in different parts of the house, but a thorough search again proved unavailing.

This was only the beginning of a series of remarkable incidents which occurred during the following days. Mrs. Wilson, while at work, was made a target for all sorts of missiles, knives, forks and bottles being hurled at her with great force. On several occasions knives just missed her head, and were deeply embedded in the door. Twenty-seven window panes were smashed by flying stones, and neighbors who were summoned to the house by the terrified occupants were greeted with such scant courtesy that they had to retire. A constable who watched the house one night saw a light extinguished in a room which, it is said, he knew to be absolutely empty.

Rigorous police investigations were set on foot, and as a result it was announced that a girl, aged fourteen, employed at the farm, has confessed that she is the mysterious "spook" which has been playing these dangerous tricks. How she managed to deceive the householders is a mystery. It has been ascertained that several years ago she had a sunstroke, and since then she has been peculiar in her manner.

CANADIANS ALL. Montreal Witness.—Sir Wilfrid Laurier is back from his interesting tour of the West, and although wherever he went in that eye-opening country his thoughts doubtless turned to home, as he himself said, "to get back," still, as he also said, his western tour has increased his pride in Canada, and he has learned ultimate things about the West and its people which cannot fail to be of the utmost value to him in the coming years. One among the many things which have pleased Sir Wilfrid mightily is the evidence he found of the abounding loyalty of the new-comer for Canada, whether he came from the United States or from furthest Russia, and in this pleasure all can join heartily, as Canada is half made up of recent citizens, and it is in the intimate amalgamation of the new and the old that her future largely depends.

Make Them Sound. A lame horse is a dead loss. Spavin, Curb, Splint, Ringbone, Swollen Joints and Bony Growths won't cure themselves. Yet you can cure these troubles and make your lame horse sound with Kendall's Spavin Cure.

Kendall's Spavin Cure. Just as thousands have done, and are doing today. In the 40 years that this world's famous remedy has been on the market, Kendall's Spavin Cure has saved millions of dollars to horse owners.

Montreal, Sept. 11.—The great Roman Catholic Eucharistic Congress which has been in progress here for the past week, and has attracted Catholics from all parts of the world was brought to a close today by the procession of the Blessed Sacrament.

Never has such a spectacle been witnessed in Montreal. It is estimated that over fifty thousand people took part in the procession, and that fully half a million witnessed it. People poured into the city from all parts of the Dominion and the United States, and Montreal today had within its gates more people than it ever had before.

A MONSTER PROCESSION. Some idea of the size of the procession may be gotten from the fact that it took nearly four hours to pass a given point. In the procession walked Cardinals, Archbishops, Bishops, thousands of priests and sisters, besides members of the religious institutes, Judges, members of Parliament, Mayor and Aldermen and thousands of others.

The route of procession, which was over the principal streets of the east end of the city, was three miles long. The principal figure in the procession was the Papal Legate, Cardinal Vanutelli, who carried the Host, the 6th Regiment of Montreal forming the escort. As the Host passed through the crowded street thousands of people were kneeling in adoration. The procession passed off without an accident or a hitch, the weather being ideal.

YOUNG LAD SHOTS HIS FATHER. Cleaning Gun, and Didn't Know it Was Loaded.

Montreal, Sept. 8.—James Dearden Melburne, Quebec, died in the hospital as a result of gun-shot wounds in the abdomen. His thirteen-year-old son was cleaning a rusty gun and was not aware that it was loaded. The gun was accidentally discharged. Dearden received the full effect of the contents. He was rushed to the hospital and everything was done to save his life but in vain.

THE AFRICAN BAPTISTS. The African Baptist Association was in session in Halifax this week. Rev. W. A. White, the energetic pastor of Zion Church, Truro, was the retiring moderator. Rev. Mr. White also has a place in the new list of officers, that of compiler. Rev. A. Clements, of Newport, Hants Co., is the new moderator. He is a former pastor of Zion Church, Truro.

The sessions were very interesting and instructive. The various churches are in a flourishing condition. The temperance question was dealt with in a marked manner. Two years ago a strong resolution was passed in regard to intemperance on the part of church members. It has been more or less disregarded. It was decided to enforce it in the future, and it will be reprinted and read from the pulpit. It provides that no person, either licentiate, Sunday school teacher, deacon or ordained minister, known to be under undue influence of liquor, shall have any authority in the church till he has given satisfactory assurance of repentance.—Truro News

Shiloh's Cure. Shiloh's Cure cures colds, coughs, croup, whooping cough, and all throat and lung troubles.

Regulate the Bowels

"I have been troubled with constipation for several years, and have tried a great many kinds of pills, as well as medicine from the doctor. Nothing seemed to help me until I began taking Dr. Miles' Nerve and Liver Pills. I found the little pills very effective, and I am thankful that at last I have a reliable remedy."

MRS. F. M. DUNKIN, LeRoy, Ills.

Dr. Miles' Nerve and Liver Pills

simply cause the bowels to move in a normal manner, and without the griping effects of cathartics and purgatives. That's why they are so universally used by women and children. The longer they are taken the less are needed. Natural conditions gradually being restored.

Price 25c at your druggist. He should supply you. If he does not, send price to us, we forward prepaid.

DR. MILES MEDICAL CO., Toronto

RAILWAYS FOLLOW PLOW AND THE PLOW MOVES STEADILY NORTHWARD.

Plans for New Roads Which are Connected With Growth of Crops in Canada's Northland.

"The railway follows the plow," says Elliott Flower, in September Canada Monthly (formerly Canada West), "and the plow is moving steadily northward. Railway building in Canada has been almost exclusively east and west, but the three great roads, even while building only westward, have been pushing development to the north."

"Now there are plans that contemplate a more direct invasion of the north. During 1909, the Canadian Northern has swung north its main line from Edmonton towards the Yellowhead, construction now proceeding from Saint Albert on the Morinville branch to Lake Ste Anne, and intending to reach the Peace River country as soon as rails run to Fort Churchill on Hudson Bay, and still another will ultimately reach Dawson. The former will open a new and shorter route to Europe for the exports and imports of Western Canada (although the water end of this route will be open not more than five months of the year), and the other will give a new and more direct line of communication with the Yukon country."

"Before taking up these railway plans in detail let us see how far into that northern country, which we associate with snow and ice and desolation, the plow has gone; and what promise the country gives the plow. We will consider this without regard to any particular route or routes, merely seeking to learn what the country generally can offer as an inducement to railway building."

"As already mentioned, vegetables are grown at Fort Good Hope, a point about eight hundred and fifty miles north of Edmonton, and some eleven hundred miles north of Medicine Hat; but vegetables alone will never carry a railway into the north. The most northerly points at which grain is reported are Forts Simpson and Providence, both in about the same latitude and approximately eight hundred miles north of Medicine Hat. According to Fort Simpson reports, barley is a sure crop, wheat four times out of five, and melons, if started under glass, ripen well. The Fort Providence report I have already given, although I may add that oats and barley are raised in addition to wheat."

NA-DRU-CO LAXATIVES

are new and entirely different from ordinary preparations. They accomplish their purpose without disturbing the rest of the system, and are therefore the ideal laxative for the nursing mother, as they do not affect the child.

Compounded, like all NA-DRU-CO preparations, by expert chemists. If unsatisfactory we'll gladly return your money.

25c. a box. If your druggist has not yet stocked them, send 25c. and we will mail them.

National Drug and Chemical Company of Canada, Limited, Montreal.

Typhoid in Old Wells

There are several typhoid cases in Annapolis hospital. In conversation with one of the managers, he said we have been unable to get an opinion whether there is a suspicion that the majority came from Trenton among the doctors of the town water; but it is not likely that there is, for, as far as we have heard, there was not a case of typhoid traceable to it since it was pumped to the town. During the summer months many people are on the move and then drink out of old wells. A cool drink out of a well is palatable and generally dangerous. There is some talk about the sewers not being flushed out often enough. Of course they should be kept as clean as possible, but the danger of contracting typhoid from a sewer is as one in a thousand. At the close of the Boer war a great convention of doctors was held in London, at which the opinion was given out that typhoid was generally contracted from germs in the water. It is safe to stand by that opinion until an equally authoritative announcement is made to the world. Old wells are always open to suspicion in the autumn months when water becomes scarce.—Eastern Chronicle, New Glasgow.

COMMISSION FOR VICTORIA GENERAL HOSPITAL.

Mr. Justice Drysdale, Judge Wallace and Mr. O. E. Smith to be Appointed.

A proclamation putting the Victoria General Hospital management in the hands of a Commission appears in this week's Royal Gazette. Under an Act passed at the last session of the Legislature, it was provided that the commission management should be brought into effect by proclamation in the Gazette, and the date named is October 1st. The Commission has not yet been formally announced, but it is understood that its personnel will be Mr. Justice Drysdale, Judge Wallace and Mr. O. E. Smith. Mr. Justice Drysdale, who as the Minister in charge of the hospital service of the Province during a portion of his term in office, became familiar with the details of the management of the Victoria General, will be Chairman of the Commission.

THIS COUNTRY OF OURS

Dartmouth Patriot.—Never in the history of this province have farmers got such prices for produce as they are getting now. Any man with a few acres of land can live comfortably and with fewer trials than in any other country. There are troubles and drawbacks everywhere. Old Nova Scotia has its share, but they are small compared to most. The trouble is with the people themselves.

Coun. Robt Morton raised twenty-five bushels of wheat from one bushel of seed, the crop occupying slightly over half an acre of ground. Yet some of our people talk of leaving the Valley for the West cannot show a place that can produce such apples, such hay, such grain, such vegetables as such a climate as this Annapolis Valley.— Outlook.

THAT BOY.

Somewhere in the United States there is a mother's son who in twenty or thirty years will be the most famous man in America. He is a tiny little fellow whose laughing eyes grow bigger and serious with wonderment as each day human life unrolls its historic scroll, and the things and the people of this world print indelibly upon the plastic mind of youth the fascinating and marvellous story of man's achievement. His small heart warms with enthusiastic interest until in full blaze with admiration and ambition. Life is so uncertain and death so sure that no magic can take us with the veil and unfold for us the tapestries which the weaver of time is working. We cannot divine who is the child of today that will be the man of tomorrow. But snugled to the loving mother's breast or taking his first uncertain steps with the aid of a proud father's hand—is that boy. It may be yours. You cannot tell.

Does Not Like the Term "Tin Pot Navy."

Commander Rooker, of the Canadian Navy says Battleships, With-out Cruisers are Like Blind Men Without Guides.

Ottawa, September 12.—Commander Rooker, of the Canadian navy, made a speech at the exhibition directors luncheon today which is certainly calculated to earn him some notoriety. While disclaiming any desire to meddle in politics, this naval officer, who has been four months in Canada, denounced, in indignant terms, all those who ventured to disparage the government's naval policy. He particularly deprecated the term "tin pot" navy.

Battleships without cruisers, he said, were like blind men without guides. He had no hesitation in saying that at the present moment Britain had plenty of battleships but not enough cruisers. He added: "The present Canadian naval program, namely, four cruisers and two destroyers, is framed to meet the existing situation, keeping in view the amount of money available to the government. These cruisers and destroyers will also be a useful addition to the imperial navy in case of necessity. Dreadnaughts cost a lot of money. They also take a large number of men to man them, and docks of the largest capacity to hold them. If, therefore, a policy including Dreadnaughts was embarked on, a very large sum of money would be involved, and probably considerably more than Canada can at present afford."

Criticize the program by all means but do not let that criticism take the form of placing obstacles in the way and also dragging the navy into party politics. Apart from anything else, the navy should be separated from and above party politics. The Canadian navy is a branch of the service of the empire and as such it is the duty of all Canadians and the whole of Canada to assist by their utmost endeavor in making it a great success and an efficient service."

BEGINNING OF THE PHONOGRAPH.

Edison, in describing his work in developing the phonograph, said he told one of his workmen what was wanted and when this man had completed what was required, Edison said: "Bill, get me a little tinfol now, and we'll make this thing talk."

Edison then wrapped the foil around the cylinder, placed the needle of the diaphragm against it, and shouted into the funnel which were to be the first words ever spoken by a machine: "Mary had a little lamb, Its fleece was white as snow, And everywhere that Mary went The lamb was sure to go."

This done, Edison set the needle back where it started, turned the cylinder with a crank, and the machine repeated what he had said so plainly that everybody could hear it.

"I never saw such an amazed crowd of men as those who stood around," says Edison.

The inventor's first idea was to make phonographs supplant stenographers, but he couldn't do it. The stenographers themselves beat him. They would get the machine out of order and declare that it wouldn't work. Business men believed them, and for more than fifteen years the phonograph lay, practically dormant. "Ten or twelve years ago," Edison says, "we made a record of a song. I don't know how we came to do it—I have forgotten. But the song was reproduced so well that I got an idea I said to myself: 'If I can't make people use the phonograph in their business, I will see if I cannot make them use it for their pleasure.' So I hired a few singers, and made some song records. I was not long left at suspense. The songs caught on at once. The phonograph, after fifteen long years of waiting had arrived."

Now phonographs are sold by the thousands all over the world. The patents have expired, and anybody can make them. Of course, every manufacturer has a few patented features of his own, but the principle of the machine is the world's property. And now that the phonograph has made good in a field for which it was not intended, it is working its way into the field for which it was originally designed. Thousands of business men are dictating their letters to talking machines.

A RAINY DAY

NEED NOT INTERFERE WITH THE ENJOYMENT OF YOUR OUT-DOOR WORK OR SPORT

WEAR A TOWER'S SLICKER

It is guaranteed to keep you dry in the hardest storm.

TOWER CANADIAN CO., LTD. TORONTO, CANADA.

THE RECIPROCALITY OF SMILES.

Sometimes I wonder why they smile so pleasantly at me, And put my hand when they pass by as friendly as can be, Sometimes I wonder why they stop to tell me How-d'-do, And ask me their how old I am and where I'm going to, And ask me can I spare a curl and say they used to know A little girl that looked like me, oh, years and years ago, And I told mamma how they smiled and asked her why she talks to me, So she said if you smile at folks they always smile at you.

But when misfortune turns your way And everything goes wrong, If, at the closing of the day Your baby sings a song, And laughs and cuddles up to you, You'll laugh at fortune's shove, I tell you, when you're feeling blue, There's nothing helps like love.

I fancy the rather narrow life that homekeeping women lead predisposes them to pettiness, and for that reason I think they should be always on their guard against it.

The wisest way to try to cure a bad thing is to put a good one in its place.

The wisest way to keep from being petty is not to have time to be petty. Be too much absorbed by big things healthy activities and plentiful interests, and you won't have time for littleness.

Have enough more interesting things to think about, and you won't have time to think about slights.

After a great grief comes to you, somehow you never think to whisper to yourself or to your friends, "Well, it isn't going to last." But let a big worth-while piece of good fortune come, and you meet it with the encouraging thought: "Well, it's too good to last." Plan something intended to give infinite pleasure to somebody—and then remind yourself that it's too good to come true. These little things serve to keep you from getting too hilarious over living—and you know what a hilarious thing life can become if it isn't kept in its place.

A TIMELY HINT.

Children who suffer from swelling of the glands should have an abundance of fresh air, both by day and night, and a complete change of air as often as possible. Plenty of good nourishing food should be given them, and cod liver oil or emulsion is also helpful in putting things right.

MARKETING IN CRIMSON GULCH

"What makes the butcher put both hands in the air? Is he afraid you are going to shoot?" "No," answered Brocho Bob, "He has gotten over being afraid. He knows I ain't going to shoot as long as he keeps his hands out of reach of the scales while the meat's being weighed."— Washington Star.

MOTHER AND DAUGHTER SAVED BY GIN PILLS

The Famous Kidney Remedy. 44 Woolfey Ave., Toronto, March 21st, 1909. "While engaged as assistant at Sterling Mines, Gray's Siding, Ont., I became familiar with the merits of Gin Pills. On leaving Toronto, I left my wife (aged 51) and my daughter (aged 21) in poor health. The former had tried all sorts of remedies for her ailments, and the latter was badly swollen and she suffered much pain. It occurred to me that Gin Pills would help her and so advised her. This was a happy thought, for my wife wrote back to say she was trying Gin Pills. Her next letter said that the pills were doing her good, and the second, that the swollen joints were fast disappearing. Also, her general health and color was vastly improved. Now she cannot say too much in favor of Gin Pills. My daughter has also derived much benefit from their use." Wm. B. CRAIG, Chemical Co., Dept. NS Toronto, and a free sample will be sent you. When Gin Pills have proved their great value, get them at your dealer—50c a box, 6 for \$2.50.

EXIT THE REDMAN

The Indians of West Selkirk Must Go Farther Into the Wilds.

There was a day when the town of West Selkirk, pitched out in the fertile valley of the Red River, was the pioneer West in epitome—abacks, traders, saloons, and Indians. Its picturesqueness has gone out with the abacks. There are still a few shabby more stores and banks; traders there are, calling themselves business men, not bartering, but selling for cash; the whisky is still there in tall gleaming bottles sold at long bars by white-aproned dravers. The last vestige of raw Selkirk went out recently when the redmen, Cree and Sisseton, moved their camp.

The passing of these Indians of Selkirk is the same story as that of the Songhees in Victoria, who have got orders to leave their happy hunting grounds because the simple life they exemplify in the middle of the rumpling British Columbia town does not agree with the tastes of the city fathers. The benevolent white gentlemen of Selkirk have come to the same conclusion. These are the days when the whisky and other vicious traits are bad for primitive natures; so 1,500 remnants of warriors have been told to close up their whitewashed cabins, pack up their tepees at St. Peter's, from which reserve, for many moons they have seen Fair Whistling close by on the shrieking railway, and beat their way to Fisher River, a stream far off on Lake Winnipeg. The young chieftains have set their faces toward Canaan, but the wrinkled, royal bloods of the Cree live with the memories of the tomahawk—the freebooting days. The mighty grandson of Apeashoon, friend of Ponikse and Tecumseh, sows in his wigwam and thrones: "The Indian know no reserve, no cunning, their only treasure, the bullets singing in the Black Hills, the massacres in Minnesota, and Senator Sutherland's son shot by smoking marksmen on the Rielian trail sent out by the half-breed Riel."

SIR JAMES GRANT'S ELIXIR.

Ottawa Physician Says He Owns His Own Health to His Remedy. According to The New York Times, Sir James Grant, of Ottawa, the well-known Canadian physician, believes that he has discovered, not exactly the elixir of life, but at any rate a means of greatly prolonging youth and apparently of bringing youth back to some extent. Sir James is himself the best advertisement of his method, for he possesses amazing vitality for his age, now nearly 77 years. He is visiting London, and he looks like a man in his fifties. His secretary, a young man, says it is difficult to keep up with the work his employer does.

Two years ago Sir James created a sensation at a meeting of the British Association by a paper on the extraordinary rejuvenating powers of electricity. He has since then treated himself by his own method, with results that he describes as wonderful, and he has also had much success with a means of curing patients on the other side of the Atlantic. His treatment consists of electrical applications by means of a special battery and systematized massage. A writer in The Pall Mall Gazette says he walked with Sir James a distance of half a mile, and could not help commenting on his vigor and energy. He asked Sir James if he were a specialist, and Sir James replied: "Yes, I do wear spectacles. I have worn them for forty years—until each time as I began to treat myself with electricity and massage; to-day I do almost the whole of my reading and writing without using any spectacles at all. My hearing is as good as ever, and I feel that I have the energy of a man of 40."

"I notice that your city is full of taxicabs, but so far as I am concerned I can hardly believe that I will be 77 in August next, certainly, I feel not more than 46, and for this happy state of affairs I thank my electrical treatment."

A Queer Mail Delivery. One of the most remarkable mail routes in the world is that which a letter journeys in getting from Beebe Plain, W. to Beebe Plain, Quebec, Canada. While the two offices are within ten feet of each other—are located in the same room, in fact—a letter mailed from one office to the other must make a trip of 294 miles—67 miles in Canada and the rest in the United States.

The plain, old-fashioned store building, which is situated on the international boundary line, contains both the United States and Canadian offices. There are separate entrances to each, but both are in the same room, have the same lobby, and there are no partitions to mark the division between the domain of Uncle Sam and the possession of King George. "If you mail a letter from the Quebec side, says the postmaster, 'it goes from here to the junction, then to Newport, then to White River Junction and back to Lennoxville, Quebec, over the Boston & Maine. There it is transferred to the Grand Trunk and goes to a southbound mail pouch, and comes to Stanstead Junction, and then back to this same building, a distance of 294 miles."

"If we wish to mail a letter from the American side, to Derby Line, it must go to White River Junction, and then come back over the official route."

A Terrible Oelme. A chief petty officer, was of Portsmouth taken into custody and marched to barracks for wearing a white oelme shirt instead of a white starched linen one.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Breakwater at Little River, N. S.," will be received at this office until 4 p.m. on Monday, October 3, 1910, for the construction of a Breakwater at Little River, Digby County N. S.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department, at the offices of C. E. W. Doolittle, Esq., District Engineer, Antigonish, N. S.; and on application to the Postmaster at Little River, N. S.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupation, and place of residence. In case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given. Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for seventeen hundred dollars (\$1,700.00), which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender is not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender. By Order, R. C. DESROCHES, Secretary Department of Public Works, Ottawa, August 30, 1910. Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

WEDNESDAY, September 28, 1910

—What wonders are now prophecied! The powers of the sun, the atmosphere and the ocean are now to be harnessed to generate heat and energy for the purposes of mankind. Wild as the proposition may sound, how can we who have seen so many miracles come to pass,—the telegraph, the telephone, the wireless, the flying machine and other impossibilities become realities,—how can we cavil at any project of man to turn natural phenomena to his own uses?
At a recent meeting of the British Association of Scientists, President R.A. Fessenden of Columbia University struck the climax by developing on paper a plan for the running of machinery from power to be obtained from the sun, the wind and the waters of the sea, basing his statements on practical experiments.

—Mr. F. H. Johnson is putting up six boxes of gravenstein apples for exhibition purposes. Mr. Vroom has made a thorough survey of the orchards of the Valley and assured Mr. Johnson that his was the only orchard from which he could select a sufficient number of specimens of the required variety. The apples are very fine and Mr. Johnson attributes his success in growing them to the use of lime-sulphur. He is convinced of the efficacy of this spray from the fact that at the tops of tall trees which he omitted to spray thoroughly the apples are spotted and inferior. He will use the lime-sulphur with increased confidence next year.

—It has been a matter of serious disappointment to many of the readers of the Monitor-Sentinel that no report has appeared of the Centennial Celebration of the Paradise and Clarence churches, which took place two weeks ago. The program was handed in for the issue previous to the celebration at a late hour and was given publication at some inconvenience, owing to pressing demands on time and space. It was expected that the interested participants would have furnished a full account of the proceedings either for last issue or this, but up to the present no communication has come to hand.

North Williamston

The Sunday School addresses given here by Miss A. E. Young and Mrs. McPherson, of Lawrencetown, quite recently were greatly appreciated by those present.

Mr. and Mrs. Charles Rankin and two children of St. John, Mr. and Mrs. A. Anderson and four children, of Bridgetown, were guests of Mr. and Mrs. O. De'Lancey on the 22nd and 23rd. On Thursday evening Mr. and Mrs. De'Lancey entertained a number of friends in honor of their guests.

Mr. and Mrs. H. P. Whitman left last Saturday for their home in Providence, R. I.

Mrs. James Haynes and daughter, of Granville spent the week end with friends here.

Mr. and Mrs. P. E. Sanford, of Berwick, Mr. and Mrs. A. Wheelock, of Clarence West, were guests of their brother, Dr. M. Charlton.

quickly cures all the ailments of the throat and lungs.

S. S. Workers in Convention

The annual Convention of the Annapolis County Sunday School Association met in the Baptist Church, Melvern Square, on Sept. 19th and 20th.

Owing to the unfavorable condition of the weather the meetings were not as largely attended as we had anticipated, but a good interest was manifested throughout the sessions and those present received help and enthusiasm in the work.

The addresses, Round Tables and Object Lessons were both interesting and instructive. Among the speakers were Dr. J. W. Brown, Rev. A. Lucas, Rev. G. P. Raymond, Rev. J. A. Hart, Dr. C. Goodspeed, Col. S. Spurr, Mrs. Mellick, Mrs. C. S. Balm and Miss A. E. Young.

A paper prepared by Mrs. O. E. Steeves was read by Miss Eva McLaughlin.

The music by the choir, the solos by Miss Smith and Miss Palmer and the choruses by the girls added much to the interest of the convention.

The Secretaries' reports showed eighty-five schools in the County, with a total enrollment of 4861. Officers and teachers 526, scholars 3836, scholar's average 8551.

Home Department membership 96, Teacher Training students 82, Cradle Roll membership 62. Organized Adult classes 13, I. B. R. A. membership 101, W. R. A. 23, scholars joining the churches 76.

The following is the Treasurer's report:

CASH RECEIVED.	
Bal. from last year	\$ 7.74
51 schools contributed	95.46
Pro cards and personal contributions	22.83
Dist. Conventions and Public meetings' collection	45.76
Total receipts	\$171.79
EXPENDITURES.	
Provincial Apportionment	\$146.50
Printing stationery Dept.	15.10
Supr., Exp., etc.	8.34
Postage and money orders	1.35
Balance	\$171.79

Four of the districts have met their apportionment, Nictaux, Clements, Granville and Springfield.

Officers for the ensuing year are as follows:

- President.—R. Messenger, Centre.
- Vice-Pres.—Rev. J. A. Hart, Lawrencetown.
- Sec.-Treas.—Miss A. E. Young, Lawrencetown.
- Asst. Sec.-Treas.—Miss Eva McLaughlin, Round Hill.
- Supr. of Education.—C. F. Armstrong, Middletown.
- Supr. of Home—O. A. Price, Bridgetown.
- Supr. of Adult.—Rev. B. Porter.
- Supr. of Temperance.—Mrs. C. S. Balm, Lawrencetown.
- Supr. of Elementary.—Mrs. S. A. Frail, Clementsvalle.

Representative on the Provincial Executive R. H. G. Mellick, Lawrencetown. Delegate to Provincial Convention, Miss A. E. Young. A hearty vote of thanks was rendered the people of Melvern Square for their kind hospitality, to the choir for the excellent service rendered, and to the County papers for many favors received during the year.

Before the close of the last session the Treasurer gave a statement of the money received since opening of Convention, and we are pleased to report that the Provincial Apportionment to the County has been met and as the other requirements have been met, Annapolis still retains the honor of being a Banner County.

Amount received since Sept. 6th:—	
Upper Granville, U.	\$ 1.25
Nictaux Falls (2nd col.) M.	2.00
Margaretville, Meth.	1.50
Torbroke (2nd col.) B.	2.70
Torbroke Mines (2nd col.) B.	2.00

2nd col. "	2.10
3rd col. "	3.61

Yours in the work,
A. E. YOUNG.
Lawrencetown, Sept. 26th, '10.

Carpenter-Morton Roofing will give you every protection that iron, tin or shingles will, but it will not rot like shingles or rust like tin and iron. It is a non-conductor of heat and cold and is more durable and less expensive than either of the Roof Coverings mentioned. It is guaranteed to last for years. Karl Freeman will show you this guarantee.

Crossing the Selkirks

(Continued from page 1)

At a small mining town called Goldan we emerge from the Kicking Horse Pass into the golden sunlight, grateful to the engineer, who first discovered this celebrated Pass and made possible this bold and rugged scenery. We are told that the difficulties became so great in building the road through this section that at one time it was about to be given up and it required all the faith, courage and credit of its great promoter, Sir Donald Smith, to carry it through. We can now say we are safely over the Rockies. We have traversed one hundred and thirty miles of this mountain grandeur, but this is only some one of the grand panoramas provided for us, for we are no sooner down from the Rockies than we begin to climb the Selkirks. These latter differ from the Rockies in that they are more heavily wooded. Entrance to the Selkirks is along the canyons or gorges through which the rivers descend in some places so narrow there is barely room for river and track. At other places we cross great gorges on trestle work bridges, a stream dashing its way amongst the rocks three to five hundred feet below us. For five hours we thread our course amongst the bases of the mountains and in and out of canyons and gorges to the summit of the Selkirks and down the western slopes. Near the top of this range we enter the Rogers Pass, called from its discoverer, who is credited with making this part of the line passable.

I take it that it is about as difficult to discover a pass in these great mountain wastes as it would be to find the proverbial needle in a haystack, and the engineer or prospector that discovers one deserves to have his name associated with it for all time.

We have been impressed throughout with the modern names of the mountain peaks. Scarcely any of them were named until the C. P. R. came here and discovered and christened them less than thirty years ago.

The Rogers Pass takes us through a row of magnificent peaks. By this time we are fairly good judges of mountains, for beside our own experience and study, for the past few days we have had the advantage of all the mountain lore and experience of a great lot of old travellers that lecture on mountains by day and night whether you want it or not. We have mountains for breakfast, dinner and supper. Mountains everywhere—but to return to the mountains—just now we are passing between Mt. MacDonald on our left a mile high, and almost vertical, and Mt. Tupper equally as grand, both with heavy snow caps. A continuation of Mt. Tupper is called the Hand of Napoleon, batted, and still another, not far away, is called the Hand of the Devil. These on another peak is a profile of Napoleon, batted, and still another, not far away, is called the Hand of the Devil. These on another peak is a profile of Napoleon, batted, and still another, not far away, is called the Hand of the Devil.

Beyond these interesting scenes we come to Mount Sir Donald, a quite abrupt mountain, rising one and one quarter miles above the railroad track, named for the great explorer of the C. P. R., Sir Donald Smith (Lord Strathcona). At the base of Sir Donald is Glacier Station, where we find another C. P. R. hotel. From here peaks and glaciers can be seen in all directions and near at hand are some of the greatest glaciers known. This is the heart of the Selkirks, and is much more wild and broken than at Banff in the heart of the Rockies.

In this vicinity the railroad has suffered a great deal from snow slides the gorges or valleys being so narrow and the mountain sides so steep and high, cause the fall of masses of rock and snow that bury the track for long distances at times. To overcome this, miles of sheds have been built of heavy cedar timber dovetailed and bolted together, backed by rock and sloping a little to allow the avalanches to pass down beyond the track. This work costs \$50 per foot to build. In the summer the cars go outside of the sheds in many places, that the view of the mountains may not be lost.

Our descent of the Selkirks lies along the valley of the Illecillewaet river, which is not unlike the Kicking Horse river of the Rockies, but instead of tunnelling the mountains to lower the grades the railroad descends by numerous loops on the mountain sides and crossing and recrossing the river many times we at last reach what appears to be a natural outlet and where railroading seems easy compared with what we have seen earlier in the day. At one place the train stops to allow passengers to get off to look down into a deep narrow gorge where the river is seen two hundred feet below us compressed into a boiling flume scarcely twenty feet wide. Throughout the whole mountain district the trains have been very accommodating and every consideration given that passengers may see and enjoy all there is in this great scenic route.

We have now passed through two hundred miles of mountains, and are ready to see British Columbia below the mountains.
(Continued next week.)
M. E. ARMSTRONG.

A Few Suggestions

A few points that everyone has perhaps heard, and quite forgotten to see at the critical moment, would prevent many disappointments if kept in mind. Don't cut your house into dabs of color—a blue room, a green room, a pink room, etc. Use tones of one color, rather soft neutral tones, that don't clash with one household belongings, but are complimentary to them and to your own personality. Don't choose wall hangings and carpets that glare at you when you enter the house. These should be only backgrounds to set off the other contents of the rooms becomingly, including the human contents. Don't have a wall that makes your complexion appear washed out and yellow. You are more important than your decorations every day in the year in your own home.

CYDER APPLES WANTED

In large or small quantities. Cash on delivery. Farmers are beginning to recognize the use of the pumice as food for stock. It is better feeding value than apples, so bring the fruit to our mill and get a load of pumice free. We have an elevator which will dump it on your wagon and a good clean road to haul it over.

Cider made for customers on usual terms and refined with our English filter if required.

LOCAL AND SPECIAL

The Halifax Exhibition opens today. Supreme Court meets in Annapolis on Tuesday next, Oct. 4th. The millinery openings take place on Friday and Saturday of next week. The "Owl" train will make its last run on Saturday night and Monday morning. The funeral of Lieut. Governor Fraser will take place at New Glasgow on Thursday afternoon. Private Morse, of the 69th of Lawrence, had his leg broken at Aldershot by falling from an officer's horse. Another C. P. R. special passed through here last week with officials of the C. P. R. and the D. A. R. on board. H. J. Crow's attractive property on Granville street, which is offered for sale, is being renovated within and without. After October first the "Bluehouse" will run only four days of the week, Monday, Wednesday, Friday and Saturday each way. The Municipal Elections will take place on the 15th day of November. Nominations on Tuesday, the first day of November. Waldo Hoffman, a young lad employed in Beeler and Peters' mill, got three of his fingers taken off by a machine one day last week. Commencing on Sunday next and continuing until further notice the evening service in all the churches will begin at 7 o'clock. The adv. for "Housekeeper" has received numerous responses, some of which are now in this office awaiting the call of the advertiser. S. S. Boston will make her last trip on the Boston-Digby Direct Route with the sailing from Digby to Boston on Saturday, October 1st. A girl named O'Grady from Crossburn was taken to Halifax last Wednesday to have a bullet extracted from her forehead. She was accidentally shot by her brother. The case of assault on which a young colored man was arrested, was tried before Stipendiary Magistrate Messenger on Monday and the trial resulted in the acquittal of the young man. The augmented choir of Providence church in preparing for the concert to be held in the church Friday evening will meet for their final rehearsal Thursday evening. All who are assisting are requested to be at the church at 7.30 o'clock. P. R. Saunders with his brother, R. Saunders, of Middleton, and a guide, returned from the woods on Wednesday last, having captured a fine moose with antlers having a spread of fifty-five inches. The District Division will hold its quarterly session with Olive Branch Division, Bridgetown, on Thursday afternoon and evening, the sixth of October. Public meeting in evening with specially prepared program. Rev. B. J. Porter gave an able address on the "Boy Problem" in Providence Methodist church on Sunday night, endorsing the methods of General Baden-Powell to save the boy and build him up to manhood. More prospecting for ore on the North Mountain has been lately engaged in and the prospectors are very sanguine as to results. Former prospectors have been of the opinion that the specimens found are surface ore and that there is no lode ore. The marriage of Mr. Alfred C. Charlton, of Port Lorne, to Miss Cynthia Allen, of Torbrook, took place at the home of the bride on Wednesday last. After a brief wedding trip Mr. and Mrs. Charlton will take up their residence at Torbrook. Mr. Charles A. Cooke, of Ottawa, bassist and elocutionist, who is to render a large part of the program at the Methodist church Friday evening, is now giving concerts in the principal towns in Nova Scotia. Press reports of his work are most satisfactory. THE MIDDLETON DRIVING PARK CO., Limited, will give three horse races at their Driving Park, Middleton, N. S., on Monday, October 10th, 1910, with the following classes: A. 2.32 class, purse \$100, a 9-minute class, purse \$100, both trot and pace, mile heats, best three in five. Also a green race, purse \$50, trot and pace, half mile heats, not to exceed five heats. Entries to close Monday, October 3rd, 1910, with the Secretary, Fred L. Shafter, Middleton, Sept. 23th, 2 ins.

PERSONAL

Mr. C. L. Denton, of Moncton, was in town last week. Dr. and Mrs. Armstrong went to Halifax on Monday. Millidge Salter and Owen Graves will enter Acadia College this year. Mrs. Oliver Ruflee is visiting her brothers and sisters in and near Boston. Mrs. J. E. Lloyd is visiting her daughter, Mrs. Alfred O. Morse in Boston. Rev. Roland Jost went to Halifax yesterday to consult a medical specialist. Mr. and Mrs. F. E. Bath and little son left for a visit to Boston on Saturday last. Mr. and Mrs. Charles Patten, of West Haverford, Mass., are guests of Mrs. Chas. Marsh. Mr. and Mrs. Avarad Beeler and daughter went to the States for a visit on Saturday last. C. S. Strickland, assistant manager of the Union Bank of Halifax, was in town the first of the week. Mr. and Mrs. T. D. Ruggles recently visited friends and relatives in St. John and attended the Exhibition. Mrs. F. B. Sizer, and daughter, of Westfield, Mass., are visiting at the home of Mrs. John Brooks, Centerville. Miss Alice Dunn, of Nictaux Falls, has been spending the past two weeks with Miss Mabel Marshall of Harwood. Miss Ruby Stronach went to New York on Saturday with her cousin, Mr. Frank Margeson, to remain indefinitely. Fred Y. Marshall, who has been spending the past three weeks with his parents, Mr. and Mrs. Stanley Marshall, returned to Boston on Friday. Homer Pearson, who went West on the Harvest Excursion, returned home on Monday, ill with fever. His father, Mr. George Pearson, met him at St. John. Miss Hettie Troop, who has been visiting friends in St. John, returned home last week, accompanied by Miss Rita Eason, who will be her guest for some weeks. Mr. Mark Curry arrived in Bridgetown last week on his return from an extended European trip. He made his headquarters at Berlin while enjoying jaunts into various countries. Mr. and Mrs. Henry B. Hicks returned on Saturday from an extended trip to the west, where they attended the Methodist Conference, visiting also California and returning by way of New York and Boston. Cecil Huffee, foreman of the Montserrat staff, and Otto Saunders have been out in the South woods on a hunting trip for the past fortnight. The members of the staff are expecting a treat of juicy moose-meat when the hunters return tomorrow. Mrs. Roberts left last week for Florida, where she will join the "Captain's" vessel and make a trip with him. She was accompanied by two of her children, her son, Andrew, also accompanied her as far as New York. Mr. Ernest Howe, of Boston, with his wife and little daughter is visiting his parents, Mr. and Mrs. Wm. Howe. Mr. Howe was a member of the Monitor mechanical staff until he returned to Boston, where he holds a responsible and remunerative position.

Foreclosure Sale

IN THE SUPREME COURT 1910. A. No. 1584. Between: Minette Longley Plaintiff, and Artemus Rhodexer Defendant. To be sold at Public Auction by Edwin Gates, Sheriff of the County of Annapolis, or his deputy, at the Court House at Bridgetown, in the County of Annapolis, on Saturday, the twenty-second day of October, 1910, at the hour of three o'clock, in the afternoon, pursuant to an order of foreclosure and sale made herein and dated the twenty-third day of August, A.D., 1910, unless before the time said the amount due to the plaintiff on the mortgage furnished herein and costs be paid to her or her Solicitor. All the right, title, interest and equity of redemption which George E. Beals and Lemuel E. Beals had at the time they made the said mortgage and of the above named defendant and all persons claiming under or from or under them or either of any of them, in and to all certain lots, tracts, pieces, or parcels of land and premises, situate, lying and being in the Township of Annapolis, in the County of Annapolis, bounded and described as follows: Beginning on the south side of the road leading from Beals' Mountain to New Albany, at a point where the rear base line of the Annapolis lots cross said road, thence running by the course of the compass in 1861, south seventy-seven degrees west along said base line sixty-six chains and thirty-seven links to a stake and stone, thence south four degrees east twenty-five chains and fifty links to the corner of land formerly of William Saunders, thence north eight degrees east along said line to a white maple tree, thence north twenty-three and one-half degrees east along said Saunders' line, twenty-two chains to a stake and stone on said road, thence north westerly on said road, twelve chains or to place of beginning, containing two hundred and twenty acres, more or less, being the same land conveyed by Edward W. Chipman and others to Mary Crisp by deed in date the seventh day of June A. D., 1861, and recorded in the Registry of Deeds for Annapolis County in Liber 54, folio 272. Also all that certain tract, piece or parcel of land, situate, lying and being in the Township of Annapolis, in the County of Annapolis, bounded and described as follows: Beginning at a stake and stone on the south side of the road leading from Annapolis to New Albany, to a north-west corner, being at the north end of the lot of William Saunders, thence north twenty-two and one-half degrees east along said line to a stake standing at the south-east angle of Michah Beals' lot, thence north eighty and one-quarter degrees west sixty-two chains or until it comes to a stake standing at the south-west corner of a lot of about fourteen chains and fifty links to the south line of the Township of Annapolis, thence north seventy-five and one-half degrees east along said line about sixty chains to a small brook, thence along the brook to a large brook, thence along the several courses of the large brook, northerly until it comes to the road in question, thence along said road to the place of beginning, containing one hundred and seventy acres, more or less. Also all that certain lot, tract, or parcel of land, situate, lying and being in the County of Annapolis, bounded and described as follows: Beginning at the north-west angle of one hundred acres granted to L. R. Morse, adjoining the southern line of the Township, thence running south thirteen degrees east twenty chains, thence north twenty-two degrees west one hundred and sixty-two acres, surveyed under the application of one, Montgomery, eighteen chains, thence south seventy-seven degrees west twelve chains and fifty links, thence north thirteen degrees west sixteen chains to the place of beginning. TERMS—Ten per cent deposit at time of sale, remainder on delivery of deed. EDWIN GATES, Sheriff of the County of Annapolis. O. T. Daniels, Plaintiff's Solicitor, Annapolis, N. S., Sept. 13th, 1910.

Tennis Tournament

A return match was played on the grounds of the Bridgetown Tennis Club, with the Wolfville tennis team, who defeated Bridgetown in a match on the Wolfville grounds a few weeks since. The playing was very spirited and much interest was taken in the event. The weather, too, was propitious and the court in excellent condition. Evidence was served at the court and darkness ended the play with the home team some dozen games in the lead. Friday morning the tournament ended with Bridgetown fourteen games ahead, the total score 130-115. The visitors with other guests were entertained Thursday evening at the home of Hon. O. T. Daniels. Both teams are looking forward to more tournaments next season. The events were as follows: Ladies Doubles—Mrs. Fay and Miss L. Ruggles defeated Mrs. Moore and Miss E. Tufts 6-4, 7-5. Ladies Singles—Mrs. Fay defeated Mrs. Moore, 6-2, 6-4. Miss Ruggles defeated Miss E. Tufts, 6-3, 6-2. Mens Doubles—Kinney and Beckwith defeated Eaton and Rosch, 9-7, 6-4. Rosch and E. Bell defeated Burns and J. Bell, 1-6, 7-5, 11-9. Mens Singles—Eaton defeated Beckwith 6-2, 6-4. Burns defeated Rosch 6-4, 6-2. R. Bell defeated J. Bell, 7-5, 6-4. Mixed Doubles—Kinney and Miss B. Ruggles defeated R. Bell and Miss B. Coombs, 6-3, 6-3. Rosch and Mrs. Moore defeated Burns and Mrs. Fay 2-6, 6-5, 8-6. Eaton and Mrs. Moore defeated Beckwith and Miss L. Ruggles 7-5, 6-4.

Residential Property For Sale

Orchard home for sale on South Queen St., Bridgetown. Four acres orchard, yields one hundred to one hundred and fifty barrels apples, besides pears, plums and small fruit. House fitted with all modern improvements and heated with hot water. Will sell in whole or in part, or exchange for suitable town property. For terms apply to DR. A. A. DECHMANN, Bridgetown.

New Millinery

A DELICATE REPRIMAND

An excellent story of Mrs. Patrick Campbell is told in a recent number of The Tatler. During a rehearsal of "Fleas and Melanite" Mrs. Campbell and Mr. Martin Harvey had just reached that supremely tragic moment when the young lovers have declared their passion, and are staring into each other's eyes in ecstasy. Here one of the bandmen took the opportunity to expectorate. A shudder ran through the great actress, and she stopped suddenly, frowning down at the man in the orchestra, who, however, was quite oblivious to the annoyance he had created. The scene was recommenced; the moment had again arrived, when the lovers stood silently transfixed, and again the man in the orchestra took the opportunity to expectorate violently. "Once more the actress staggered back as some one stepped to the front, and again the scene was stopped to be recommenced. As it happened however, the offending bandman, who pretended he could not read, saw something written on the score, and being irritated by the warmth of the theatre and the continued repetition of the same scene, got up suddenly and murmured in a loud whisper that his music was so badly written that he could not read it. "Look 'ere," he grumbled, holding up his score to the conductor, "I can't read this 'ere music." As he spoke, Mrs. Patrick Campbell, whose ears caught the offender's voice, stopped suddenly. "What is the foot-light, when demanded to know what the man wanted. "I can't read this 'ere music," he said, sullenly; "it's bin written badly. I don't know what these 'ere notes mean." The actress took the score and glanced at it hurriedly. Handing it back to him, she said, "It means, don't spit."

GOT EVEN.

An irascible merchant entered a certain English postoffice exactly at four o'clock, and, approaching the money-order desk, politely requested the presiding genius to issue him an order for forty-eight shillings. "Too late," said the damsel curtly, pointing with an ink-stained finger to the clock. The indignant merchant stormed, raved, and finally challenged the correctness of the timepiece. The imperturbable lady smiled.

The following afternoon two minutes before the closing hour, the merchant again presented himself, and calmly asked "Am I too late?" "Only just in time," replied the damsel, crossly.

"Thank you. Now miss, I must trouble you to issue me forty-eight orders for one shilling each."

"Forty-eight!" gasped the horror-stricken woman—her tea was standing on a table behind the screen—surely you are joking."

"Madam," said the merchant, raising his hat politely. "fourteen gets courtesy."

APPROPRIATE.

The kindergarten teacher in a certain Sunday school, who is also a public school teacher well on in years, announced to her class of little ones that as she was very tired and much in need of rest she would not teach them during the summer.

The children's sympathies were aroused and they collected in the class a sum of money to buy their teacher a gift.

One evening the mother of the boy who was the leading spirit in the movement, asked:

"What are you going to buy for your teacher?"

"I'm not quite sure," replied the small boy, "but we saw something in the Sorist's window today that we thought she'd like. It was a pillow, all made of white flowers, and right in the middle in purple flowers it said, 'At Rest.'"

A SLIGHT MISTAKE.

An old man who looked like a foreigner was walking along a London street playing a concertina that had seen better days. Noticing a brass plate with the words "Doctor of Music" written under the name on it, he went up to the house and rang the bell. The door was answered.

"Please," he said, "is the doctor of music in?"

"Yes, what is it you want?" the servant asked. "Why, just pop in and ax' him how much he'll charge to mend my concertina!" was the reply.

CONFIRMED.

Ethel (confidently)—"Do you know Clara, that I had two offers of marriage last week?"

Clara, (with enthusiasm)—"Oh, I am delighted, dear. Then the report is really true that your uncle left you his money?"

One of Canada's Nation Builders

(Toronto Globe.)

Anybody knowing Mr. M. J. O'Brien only by reputation as a railway contractor and engineering specialist, would imagine a big, rough, masterful man, with a heavy hand and the voice of a gang boss. At any rate, that is how I used to imagine him.

Any anybody judging him only by his photograph would picture a refined gentleman, sensitive individual of intellectual pursuits; gifted with special spiritual prophetic vision, and by preference a champion of the idealistic type. That, at all events, was the guess I made when his photograph was first shown to me. And then one day I met him, and found that he was neither the one nor the other, but a little of both and a good deal more. That "spiritual" expression which his photograph gives does not exist upon the original. It is, therefore, not the expression of the man's character, but merely the result of fine lines seen in repose. The result of an unusual purity of contour and delicacy of chiselling in his visage; these, reflected in the camera, make a fine picture, but a bad likeness.

PRE-DOMINATING VITALITY.

Your impression, when you have met the real article, is not of an intense, but unconscious strength. Here is a man who has forged to the front as a leader in enterprise not because he has found he has advantages over the average man in mental or physical attributes, and is "taking advantage" of these advantages; but simply as a natural expression of the vitality that is in him. Consequently his is not an assertive personality. Keen, daring and tenacious as he is, modest and retiring. This is why Canada knows so much of O'Brien, the contractor, and speculator, and a little of O'Brien, the man.

You can see, when you come to meet him, that it is no accident which has given him a place among the elect of Canada's successful men. A phenologist could discourse in an instructive way upon the meaning of the exceptional frontal development of the cranium as illustrated in his career; it is sufficient here to say that he certainly and literally has a great head on him—a head that impresses you, and that, once having seen, you do not easily forget.

With a name such as Mr. O'Brien wears, it is not necessary to say that he comes of Irish parentage. But there are Irish and Irish, and Mr. O'Brien is a distinctive type of the former, and not the latter. If Mr. O'Brien had been a girl, instead of a boy, he would have been a beauty. As it is, he has to put up with looking like a clergyman of stained glass design.

Imagine, now a man with big, clear, grey-blue eyes, dark brown hair, and a complexion of cream and peach-bloom. Well, it is agreeable, of course. It does you good to meet such a man. But what a girl he would have been! Of the dark-haired, blue-eyed Irish type.

He has, too, a curious little trick with the eyes that would be a priceless asset for a social debutante. When he is looking at you, instead of narrowing his eyes to a keener scrutiny, he opens them widely with all the ingenuousness of a child—Waterford, Ireland, was where his father, John O'Brien, came from, but he himself was born in Antigonish County, Nova Scotia, in 1851, so that he is now fifty-nine years of age, though he looks much younger. He had the usual common school education, and that was all. Out he had to go into the world as soon as he was physically able, to earn his livelihood, so that the best part of his education was gained in what Herbert Hubbard describes as "the University of Hard Knocks."

SELF-RELIANT FROM BOYHOOD.

Fourteen years of age found him working on the Intercolonial Railway. With that railway he remained for years, subsequently becoming timekeeper and foreman. From the position of walking boss, he became a contractor on his own account. He moved from Nova Scotia to Ontario, and from there until now, Renfrew, Ont., has always been his home, though Montreal has been his working headquarters.

His first big undertaking on his own account was the construction of a section of the Canadian Pacific Railway between Montreal and Ottawa. Since then he has had his finger in practically every railway pie that Canada has known. He assisted in building the Kingston & Pembroke Railway, and the Northern Pacific Junction Railway in the Nipissing

district; the Baileys Chaleurs Railway in the extreme east of the Dominion; the Central Counties Railway in eastern Ontario; the Crow's Nest Pass branch of the Canadian Pacific in British Columbia; the Midland, the Richmond & Inverness, and part of the Halifax & Southwestern Railways, in Nova Scotia; the La Loque branch of the Quebec & Lake St. John Railway, a big section of the Canadian Northern Railway in the Province of Quebec, and a large slice of the Quebec, Montreal & Southern Railway.

Mighty good service he has thus done Canada in opening up the wilderness to civilization. Men with his capabilities for organization and execution, his genius for gigantic tasks, and his sincerity in carrying them out, are men of whom the Dominion may well be proud. They presently in superlative degree the abounding vitality, the buoyant hope, and the largeness of vision which are this young nation's salient characteristics.

DEVELOPING CANADA.

But the carrying out of big contracts in the construction of the railways above named form but a small part of the development work in which he has engaged. He is taking a large share in building the National Transcontinental railway through the northern Quebec and Ontario. His contracts here total over six hundred miles of grading, and run into some fifteen million of dollars.

In these various enterprises he has had various partners. Mr. A. R. MacDonald was one, but the best known was Mr. Mullarkey. For a long time the firm of O'Brien & Mullarkey bulked largely in the railway world; a typical pair they were, of the best type of Irish sons.

While Mr. O'Brien was out in the wilderness grinding many an honest dollar out of the arduous task of railway building, he was keeping those sunny, grey-blue eyes of his ever on the lookout for a quicker way to the wealthier for greater things. For instance, a few years ago he bought 1,125 square miles of timber limits in Quebec, and has ever since had the pleasure of seeing them steadily rising in value. When Cobalt began to loom upon the horizon, he was discovered to have been one of the first to peg down a good big slice of it, and it was with that lucky stroke of business that he really sprang to the front as a man of great wealth. The O'Brien Mins. of which he is four-fifths owner, constitutes one of the greatest of the Cobalt properties. The fact that he refused an offer of \$4,000,000 for his share in it from one of the most powerful syndicates operating in the silver field, is an indication—but only a slight one, it is said—of the value of the mine.

Cobalt, however, by no means bounded the limit of his ambitions. He was one of the original discoverers of the mineral world of the mining properties in Gowganda, and owns large interests in that tremendously rich camp. Last winter he was in the Porcupine gold fields investigating before the news of the remarkably rich finds had reached the general public, and he was the first man to test the value of the discoveries there. His steam drilling outfit was the first piece of machinery to reach the Porcupine, and it was rushed in as soon as the snow roads over the ice would bear. Thus it was through him that the value of the gold-bearing ore at depth was proved. He now has many big and valuable holdings in the district.

Then, again, he has a quarter interest in the nickel property at Sudbury which is valued at \$50,000,000. He is interested in farms lands in Alberta and Saskatchewan, and in mining factories in Ontario. In the latter Province he owns about 8,000 acres of timber and farm lands. He has nice mines in Quebec, graphite mines in Hastings county, coal properties in Alberta, gold properties in Nova Scotia, and interests in gold and silver mines in Mexico.

Just at present he is greatly interested in a project for the develop-

ment of the Yellowhead Pass country while some 3,000 miles east of that field of activity he is pushing rapidly to completion the Matane & Gaspé Railway. He was elected President of this railway last year. The railway starts at St. Flavie, on the Intercolonial Railway, and opens up the south shore of the St. Lawrence as far as Matane, in the county of Rimouki.

All these business activities do not make Mr. O'Brien forgetful of his duties as a citizen. In a quiet way he has done much good work in the public interest. In Renfrew, which has for so long been his home town, he has taken a notable lead in municipal enterprise. For instance, as the place lacked a suitable hall for public attractions, he gave the town in May of last year, an opera house seating nine hundred people, and costing in the neighborhood of \$40,000. His modest way of referring to the part he took in providing this public boon is that it was "merely a business arrangement—but it's a nice little place," he adds with pride.

In Montreal Mr. O'Brien occupies luxurious offices in the Imperial Bank building. It is, however, touch and go with him all the time. He is no armchair director of enterprise, but exercises an active supervision over the various schemes in which he is interested. Thus he travels constantly and far, in this, as in every other particular, believing the photographic presentment by himself as a gentle visionary detached from the more material aspects of this strenuous age.

C. LINTERN SIBLEY.

No man succeeds in a big way unless he surrounds himself with men who can do many things that have to be done in his business better than he can do them himself.—Joseph Lyons.

SEALED TENDERS addressed to the Tender for Breakwater at New Edinburgh, E. S., will be received at this office until 4.00 p.m., on Wednesday, October 12th, 1910, for the construction of a Breakwater at New Edinburgh, Digby County, N. S. Plans, specification and form of contract can be seen and forms of tender obtained at this Department, at the office of C. E. W. Dowdell, Esq., District Engineer, Halifax, N. S. E. G. Mulholland, Esq., District Engineer, Antigonish, N. S., and on application to the Postmaster at New Edinburgh, N. S.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honorable the Minister of Public Works for the sum of fifteen hundred (\$1,500.00) dollars, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender is not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order
R. C. DESROCHES, Secretary.
Department of Public Works,
Ottawa, Sept. 13th, 1910.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

HOW MANY REALIZE THE MARVELLOUS VALUE OF FRUIT

IN CURING MANY DISEASES?

Wonderful Success of "Fruit-a-lives"
—The Famous Fruit Medicines—

Fruit juice consists of about 91% water, 8% of sweet matter, and only 1% of an intensely bitter substance. Careful experiments show that it is this bitter principle, which is the active or medicinal material of fruit-juice.

Under certain conditions, the bitter principle can be made to replace or transform some of the sweet atoms in the juice, thus making a new compound which is much more active medicinally than the ordinary juice.

Many fruits were analyzed and it was found that the juices of apples, oranges, figs and prunes gave the best results. These fruit juices, having been made more active by the secret process of changing the sweet principle into the bitter, are combined with tonics and antiseptics and made into tablets. These tablets are the famous fruit medicines—"Fruit-a-lives"—known in every part of Canada for their wonderful curative qualities in diseases of the Stomach, Liver, Bowels, Kidneys and Skin.

"Fruit-a-lives" is the only medicine in the world made of fruit juices. See a box, 6 for \$2.50 or trial size, 3c.

MUNICIPAL DAIRY THE LATEST.

Calgary News—Calgary leads Canada in the matter of public utilities and now that the suggestion that we invest in a municipal dairy has been made it would not be surprising if it were adopted. We own our water supply; why shouldn't we own our milk supply? The ownership of the water supply ensures pure water to Calgaryans, and the ownership of the milk supply would ensure pure milk, and this is a consideration too important to be overlooked.

Middle-aged people will agree with me that there is no one so clever as the young man or young woman between eighteen and twenty-four. They know absolutely everything.—Will Crooks.

PORTLAND CEMENT

We have a quantity of **WHITE BROS. BEST ENGLISH CEMENT** in stock. It will cost you no more than inferior grades.

Karl Freeman

THE HOME

KILL EVERY ONE OF THEM.

Do not content yourself with brushing and beating out stray flies that invade the interior of your home. Kill every one you can reach, and make sure work of it. Don't touch the corpse with the naked hand. You may do this a thousand times without danger. The thousandth and first may convey harmful matter into your system. Be particularly careful that there are no flies overnight in the sleeping rooms. They will be asleep on the ceiling or walls. Thus they are an easy prey. And, above all other precautions, let those guarding the sickroom be strict in the extreme. You must have observed that flies haunt the chamber of the invalid of the family. Did you ever ask yourself why? Ask your doctor, if he has an up-to-date practitioner. Take the word of scientific speakers and writers for the assertion that every fly which is allowed to hover about the fever patient, or one smitten with cholera, or languishing with tuberculosis, endangers the health of the rest of the household and neighborhood if he finds his way out of the room.

Arm yourself with a sure fly-killer (of metal) and dispose effectively of him and his baleful burden. One good householder told me, years before we dreamed of the household's capabilities for wrong-doing, that she kept her premises free of the nuisance by making a rule early in the year to kill every fly in sight. She stayed all other occupations when one appeared until he had been his last. Then she fitted the screens in window and door and kept a sharp lookout for the rest of the season.

TO AVOID NUISANCE
Another, as she expresses it, "papers her kitchen with" the sticky sheets that both catch and hold the marauders. Fresh sheets are set daily and these are burned out of hand. "I don't trust them to stay dead," she says. "I have seen flies drowned in warm water-soup at that—come to life when dried and laid in the sun." In airing the house in the cool of early morning, sweep down the half-closed doors and windows—not removing the screens. We must, however, be satisfied, all summer long, with what a girl I know calls "reticulated air." It will find its way between the meshes, if there be enough of it. By eight o'clock, close outer doors and shutters to keep the imprisoned oxygen fresh. And, incidentally, to keep the musca domestica out. He hates shade and cleanliness as heartily as he glazes upon putrescence and glaring sunlight.

Our notable grandmothers set saucers of fly poison about the house. The flies devoured it eagerly and dropped in their dying agonies into cups and saucers—a most appetizing spectacle! Improved science offers as a substitute something that is deadly to insect life and innocuous to human creatures. Set, in kitchen area and in halls, never in kitchen or dining room, saucers filled with this mixture. Into a cupful of water stir half a teaspoonful of powdered sugar and a teaspoonful of formaldehyde. The thin syrup will attract the invaders and the formaldehyde will do the rest. Should one wander weakly over the edge of the saucer, see that he gets no further.

Garbage cans and swill pails are camping grounds greatly affected by our winged enemies. Discourage their visits to them by drenching the contents daily with kerosene (how did we ever live before the rock yielded this housewife's friend?) and seeing that they were emptied duly each morning. After scalding them, sit lime over the inside.

Dried lavender, burned after the manner of incense, is as objectionable to flies and mosquitoes as it is pleasant to our nostrils. Pyrethrum, powdered, may be burned in the same way for a like purpose.

If our country readers have stables, let them lessen the perils of these as breeding grounds and nurseries by a generous use of kerosene and lime. The invaluable kerosene answers a double purpose in killing the seeds of weeds that would interfere with the crops next year. By the time the manure is hauled out to the fields, the volatile properties that are destructive to plant and insect life will have evaporated and the fertilizer will be as good as if the oil had never been applied.

SHOWING OFF THE BABY

"The showing off of a baby for the enjoyment of a visitor is almost a crime. A very bad practice any time of the year, it is far worse in the summer, for it excites the little one beyond its capacity and tends to upset its entire nervous system."

"These are only two occasions for handling the little baby, and those are when it is to be fed and when its clothes are to be changed. Handling the little one for any other than necessary care is almost a crime."

"Don't take your baby out to visit the neighbors before it is six months old at least, and better a year. The excitement of all those new faces and voices is very bad for his nervous system."

"Don't wheel a delicate baby about in his carriage. He is much better off quiet in his crib."

"Don't even undress a baby at night if he is weak or sick. It tires him too much."

"Don't put your sick or weak baby in the tub to bathe him. Just sponge him off in your lap. The tubbing takes too much vitality," are some mere bits of advice along this same line that a prominent baby doctor gives all his mothers.

"To this doctor a young mother came once, quite indignant—"Why that nurse you sent me doesn't pay any more attention to my boy than if he were a piece of furniture," she protested aggrievedly.

"Madam," answered the doctor, "if all babies were treated more like pieces of furniture and less like toys, there'd be twenty per cent fewer sick babies and fifty per cent less fuss and fussiness."

Yes, perhaps it is easier and pleasanter to pick the baby up when he fusses and on all similar occasions—doubtless it is more sociable to take him around to visit the neighbors and show him off to all your visitors. But that's not the question. The question is, is it worth risking your baby's health and good disposition for?—Ruth Cameron.

A QUERY

Is it the consensus of the medical profession that common salt impairs the digestive powers? We have all heard the disastrous result of the practical working of a section of the penal code of New South Wales, which forbade the use of salt in rations served to exiled convicts. As a consequence, the colony was ravaged by intestinal disorders, the unfortunate being, like Herod of old, "eaten by worms." A similar instance fell

The Scout Law

All boys who are thinking of joining the Boy Scouts would do well to cut out and memorize the following items of the Scout Law which every Scout pledges himself to faithfully observe.

Before any boy can enlist in the Scouts he must be able to repeat the Scout Law without error to the Scout Masters.

The Scouts' motto is, "Be Prepared," which means he is always to be in a state of readiness in mind and body to do his duty. He has to be prepared in mind, so that, should any accident occur, he may know the right thing to do and how to do it. He must be prepared in body by making himself strong and active, and able to do the right thing at the right moment.

THE LAW.

1. A Scout's honor is to be trusted. If a Scout says, "On my honor it is so," it is so.

2. A Scout is loyal to the King, to his officers, his country and his employers.

3. A Scout's duty is to be useful, and to help others.

4. A Scout is a friend to all, no matter what social class he may belong.

5. A Scout is courteous.

6. A Scout is a friend to animals.

7. A Scout obeys orders.

8. A Scout is cheerful under all circumstances.

9. A Scout is thrifty.

There are already over 300,000 Scouts enrolled in the British Empire. The officers will be asking boys to enroll within a few days. Ages from twelve years to eighteen. Learn the law and be ready to enlist.

TRUE EDUCATION.

As a substitute for war and an immunity bath from the spirit of the mollycoddle the late Professor James of Harvard, has recently put forth a most noteworthy contribution.

Here is the idea of Professor James. Now there were, instead of military conscription, a conscription of the whole youthful population to form, for two or three years, a part of the whole army enlisted against adverse nature, the injustice would be evened out, and numerous other benefits to the commonwealth would follow.

"The military ideals of hardihood and discipline would be wrought into the growing fibre of the people; no one would remain blind, as the luxurious classes are now blind, to man's real relations to the globe he lives on and to the permanently solid and hard foundations of his higher life."

"To coal and iron mines, to freight trains, to fishing fleets in December, to dish washing, clothes washing and window washing, to road building and tunnel making, to foundries and stove holes, to frames for skyscrapers and to telegraph pole climbing would our golden youth be drafted off according to their choice, to get the childishness knocked out of them, and to come back into society with healthier sympathies and soberer ideas."

"They would have paid their blood-tax, done their part in the immortal human warfare against nature; they would tread the earth more proudly, the women would value them more highly; they would be better fathers and teachers of the following generation."

The fact that Professor James was a teacher in Harvard University gives his words an added worth and weight. For twenty-five years and more he dealt with growing youth, and he has seen the folly and shame of making young men exempt from the necessary work of the world in the sacred name of "education."

NIAGARA'S POWER FOR TORONTO.

Will be Sent Regularly Over Government Line Beginning Next Month.

Toronto, September 1.—That Niagara power will be sent regularly to Toronto over the government line, on and after October 1st, and that the entire system will be opened after the middle of November was announced by W. K. McNaught, M.P., Ontario power commissioner at the convention of Canadian municipalities here this morning. Mr. McNaught went on to describe in particular the equipment of the commission's plant and lines, declaring that American engineers admitted Ontario's power system to be the standard of excellence. This standard had been reached without exceeding the cost as originally estimated. The estimate had been \$3,749,000 and the cost would be only \$3,300,000 in spite of the fact that a protective system costing \$106,000 and the right of way had cost \$400,000 instead of the \$227,000 at first expected.

under my observation some years ago

A young father addicted to "isms," conceived the idea that salt was unwholesome, and from the births of his three sons prohibited the use of it in their food. By the time the eldest was seven the trio were so sorely afflicted by intestinal worms that the family physician revoked the paternal decree.

As to salt in cookery, my own views coincide with those of the boy who, when called upon to define the word he had just spelled, gave it thus: "Salt." What makes potatoes don't taste good when you don't put any on!

The question referred to our professional members has naught to do with salt as a flavoring agent, but—Does it assist or retard digestion?

LITTLE HINTS FOR HOME COOKS

If fish is lightly rolled in flour after having been well dried with a clean cloth it will be less likely to break up with cooking.

The meat balls, which must serve for one home dinner a week and which so often pall from their monotony, can be made to have a deliciously new taste. With a half pound of the meat mix the crumbs of two or three well toasted slices of bread. Soften the mass with cream or rich milk and add half a cup of stewed tomatoes. Roll the meat into balls, season and sprinkle with a little dry flour and brown them with butter in a pan not too hot.

Boiled mutton is made far more delicious if a large white onion and a tablespoonful of Worcestershire sauce are cooked with it. But put both in the pot at the time the meat is put on, for the sauce requires all the cooking to give the meat the taste sublime. The great chefs declare that to use Worcestershire raw is to spoil any dish.

TO WASH CORSETS.

First rip the front seam on both sides and take out the steels. Then dissolve some soap jelly, made by shredding half a pound of the best yellow soap in one quart of boiling water, and simmer until dissolves in warm water.

Two tablespoonfuls of jelly to half a gallon of water are usually sufficient, but very hard water may require more. Put the corsets into the suds and allow them to soak for five minutes. Then spread them on a board and brush thoroughly with a well soaped hairbrush, dipping the ends occasionally into the suds to remove the loosened dirt.

When quite clean rinse through two lots of warm water and hang up to drip dry. When almost dry iron on the inside with a warm flatiron and after thorough airing replace the front steels and sew them firmly in. If this is carefully done the corsets will emerge from the tub as good as new.

CAUTION FOR YOUR CHILDREN.

Mothers should caution their children attending school not to put pencils in their mouths, especially since alipheta has been communicated in that way in some of our large towns.

The leaves of palms should be sponged once a week with lukewarm water, to which a little milk has been added. After this the plant should stand for two hours in slightly warm water.

To remove match marks from a polished or varnished surface, rub with a piece of cut lemon, and afterwards with a piece of cloth dipped in water, and the stains will disappear.

PLUMBING TALK

People have become interested in our System of Sanitary Plumbing, and we are having enquiries from all over the Valley. This speaks well for our work. Don't be behind the times. Consult Crowe Bros. and have one of their up-to-date Systems installed.
