THE SCHOOL QUESTION AGAIN.

The Pope's encyclical places the Manitoba school question on a new footing.

When this question was submitted to the people, as it was in the general election of 1896, it had not been adjudicated upon by the highest authority in the Roman Catholic church, and Roman Catholic voters felt themselves at liberty to vote on the question according to their own dictates. Now, however, the court from which Catholics are so apt to claim that the school question must be reopened and another effort made to secure separate schools for Manitoba. That the church will embrace the first opportunity to regain its prestige and to retrieve the ground it has lost there is little doubt. This is probably the first time since Confederation that the Roman Catholic hierarchy of Quebec has suffered defeat in any important political project which the church undertakes to put through. At any rate, the defeat of the project for the reintegration of separate schools in Manitoba was the greatest political shock the hierarchy ever received. In the upheaval of 1896 the church perceives that the prestige and authority of centuries has all but ended its grasp. The church will not brook this. It will endeavor to make a new effort to regain its position. That effort will be made at the first favorable opportunity. The country need not be surprised to see the school question reopened at any moment. Sir Wilfrid Laurier has all along anticipated this possibility. It was to head it off that he sent the Pope and it was with the same object in view that he himself, while in Europe last summer, had an audience with His Holiness. As between the Cabinet and the bishops the Pope has decided in favor of the latter. His ultimatum is that Catholics must persist in claiming all their rights. During the past few weeks we have heard the rumblings of disruption among the Quebec Liberals. What does it all mean? Wait a little and we will see that it is the bishops who are pulling the strings. The agitation in Quebec has for its object the overthrow of Tarte. As Sir Wilfrid swears that he will stand by Tarte to the end, the agitation is really the retirement of the Premier. Sir Wilfrid Laurier and J. Israel Tarte are directly responsible for the revolt of the habitants against the authority of the church, and if the present breach in the Liberal ranks was not actually brought about by the hierarchy, it is not unreasonable to suppose that the latter will take advantage of it. Sir Wilfrid Laurier has more to fear from the bishops than from the politicians who are nursing the Langellier grievance. Together these two elements will command the situation in Quebec, and it is the knowledge of this fact that makes the present juncture so uncomfortable for the Premier.

While the Quebec hierarchy will make a supreme effort to consolidate the French vote and use it as the balance of power between the two political parties, it may be truly said, on the other hand, that the church will never be successful in securing any radical changes in the Manitoba school law. The settlement will not be disturbed. It is not improbable that the Catholic vote may be consolidated on this question, now that the bishops have the authority of the Pope behind them, but the consolidation of the Catholic vote means, in this instance, the consolidation of the Protestant vote, and it would be well for our Catholic fellow-citizens to understand this at the beginning. Protestant Canada will vigorously oppose any legislation that inflicts upon a new province the religious distinctions which create so much acrimony and contention in the older provinces. Ontario will vote as a unit if any effort is made to interfere with the autonomy of Manitoba in the matter of education.

Sir Wilfrid Laurier can best save himself by holding fifteen of his followers from Quebec and refusing to answer the question. He can better afford to go out of political life than succumb to the pressure that seems to be operating against him.

THE YUKON RELIEF EXPEDITION.

The United States Government has voted a large sum of money for the relief of the miners who are supposed to be destitute in Alaska. It is also proposed that a military force should be organized and sent to the Yukon to distribute the provisions that are to be purchased. If there is any destitution in the Alaska country it will be

found on the Canadian side of the boundary. There are probably in the United States to one Canadian in the Klondike to-day. The people whom the United States Government desire to relieve are not situated in Alaska but in Canada. The Canadian Government must consider very carefully any application which the United States proposed relief expedition through or into Canadian territory. Such an application has, we understand, already been made or will be made shortly. If our neighbors desire to assist their fellow-citizens in the Klondike their best plan would be to have the work done through the Canadian officials in the district. The United States cities on the Pacific coast are not exhibiting any too much good-will towards this country as it is. Some of their leading journals have even gone so far as to refer to the absurdity of the United States citizens being subjected to the indignities of paying duties to Canadian custom house officers. Newspaper license of this kind is apt to lead to serious trouble. It would be very bad policy on our part to allow a United States military expedition to enter the Klondike. The United States press has disseminated doctrines which the United States citizens now domiciled in the Klondike, acting in conjunction with Canadian soldiers, might proceed to carry into execution. The United States press has made it impossible for the United States to accede to the proposition that the United States relief expedition should be permitted to enter Canadian territory. If the United States Government is apprehensive of destitution among the American miners in the Yukon let it send whatever relief it proposes to the officials of the Territory, and it may rest assured that a proper distribution will be made.

A LONG STRIKE ENDED.

The Window Glass Factories of Indiana to be Reopened After a Month's Idleness.

Anderson, Ind., Dec. 25.—Christmas Eve was observed in this city and throughout the gas belt by fires being lighted in almost all of the window glass factories and by the cessation of work in the glass industry. Since last July to report for duty on the night of Christmas Eve, the history of the window glass manufacturers in this country has been one of a long and bitter struggle. The strike, which began last July, has, however, it is estimated, cost \$500,000 by not accepting the offer of the manufacturers last August, which was 1 per cent. lower than that they had suffered four months' strike.

GOLD FOUND IN A COVE.

A Gold-mine on an Indian Reserve near a Store at Weath.

Mishawaka, Ind., Dec. 25.—Elmer Woodford, who, with his family, lives on a farm three miles north of this city, has for years owned a cove in a body of water in the village for many years.

During the mother's four weeks' absence last spring the children decided to replace the gold mine with a deposit of gold.

The mine was located in a cove in the village for many years.

Several weeks ago the mine was discovered by a single member of the family, and the mine was located in a cove in the village for many years.

Britain has filed an objection and our proclamation has been recalled, and on after Jan. 1 next the old rates of postage will prevail. It is perhaps just as well that Great Britain did not interfere, because if she hadn't it is probable that all the members of the International Postal Union would have refused to handle Canadian letters, just as Great Britain has notified Canada that she will not do so until the question is discussed. The final outcome of the second experiment under the new Laurier theory will be watched with interest. The success of the new theory will have far-reaching consequences. If legislation is to precede discussion of the constitution of every civilized country in the world, including even Russia, will have to be revised and amended.

SIR J. A. CHAPLEAU

The Present Lieutenant-Governor of Quebec to be Canadian High Commissioner at Paris.

Ottawa, Dec. 25.—It is reported that on Sir Adolphe Chapleau retiring from the position of Lieutenant-Governor of Quebec he will be appointed to France as High Commissioner for the Dominion, filling a similar office to that now held by Lord Strathcona in London.

D. B. McDevine, Q. C. of Ottawa, has been appointed Judge of the Court of Carleton, in place of Judge Ross, who has retired.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf from an old book. The paper has a slightly textured appearance with some minor discoloration and faint, dark spots, characteristic of old paper. The page is framed by dark borders on the left and right sides, which appear to be the edges of the book's binding or the scanner's frame. There is no text or other markings on the page.
