# Federal aid for student housing here

The federal government has approved two loans totalling more than \$2,600,000 towards construction of student housing facilities at Dalhousie University.

Labor Minister John R. Nicholson, also minister responsible to Parliament for Central Mortgage and Housing Corporation, made the announcement in Halifax last Friday.

Mr. Nicholson announced approval of a \$1,309,000 loan for the five-storey extension now being built at Shirreff Hall, the women's residence. A total of 187 students will be accommodated in the new wing. Existing kitchen and dining facilities will also be expanded.

Mr. Nicholson also announced approval of a \$1,352,610 loan towards construction of 113-unit, 15-storey housing

tower for married students. It is the first federal loan in Canada for such a project.

50-YEAR LOANS The married couples, tower will provide 57 one-bedroom and 56 two-bedroom units, plus a children's nursery common and lounge area. The complex will be built on Wellington Street

at Lundy's Lane, half a mile from the campus. Both loans equal approximately 90 per cent of the total project cost. The loan for the married quarters was granted to Halifax Student Housing Society, a charitable corporation

undertaking the project. Both loans are for a 50-year period.

Mr. Nicholson, a native of Miramichi, N.B., graduated in 1923 from Dalhousie Law School. His wife, the former Jean Annand of Halifax, graduated with an arts degree.

Meanwhile, Mr. Nicholson told The Chronicle-Herald that approval was pending on a \$900,000 federal loan towards construction of a \$1,263,000, 138-unit extension to the men's residence at the university.

He said yesterday was the first time that he and his wife had visited the campus together. The Nicholsons were taken on a tour of Dalhousie's new school nearing completion.

Mr. Nicholson told Dean of Law, W.A. MacKay it was "a great thrill" to see the new construction at the university. He said it was 48 years this month since he took his first

#### **Nova Scotia Project Director:**

# Students can assist people in local Negro slum areas

Special to The Gazette Halifax may not have the industrial advantages of the United States but it certainly compares with our southern neighbour when it comes to police brutality, according to Rocky Jones, project director of the Nova Scotia Project for Negroes.

Mr. Jones, speaking to the student body of King's College Wednesday, told students their help was greatly needed to foster 'projects' which will show people of the negro slum areas that there is another way of life. He urged them to do their part to stop the "mental brutality on the kids" which he alleges is flourishing in our fair city.

"The southern states have nothing on us", he said. "I get reports all the time from kids who have been picked uptime and again by the morality squad and threatened because they were walking with a white girl or just because a guy and girl were walking down the street together. I've even been picked up by the cops myself", he added.

To explain methods of helping these "persecuted negroes", he described projects set up by the Nova Scotia Project. These include arts and crafts, sports, typing, sewing, and films dealing with negro origins in Africa, delinquency, and social problems, and each is headed by one of the kids in the area.

"With the exception of tutoring, the other programs are not going well", said Jones. The kids do the best they can but they are in need of much help. He cited the coffee house as a good exam-

What good is a coffee house without entertainment and people to listen to it? He suggested students might start utilizing some of their talents and do some entertaining on Sunday nights.

He said one prominent Dalhousie student provided some light folk singing last week but still there was not the audience to really spark off an evening of true "coffee house atmosphere". This, he thought, could be an area where university stupropagation of such an establish-

"If this goes feel that they are useless," said

Participants in this week's WUSC debate included Jonathan Wilde, Dalhousie's delegate to a summer WUSC seminar in Turkey, the campus WUSC Chairman Brendon Yazer and Student Council's member-at-large and executive assistant to the President, George Munroe.

# World University Service is dead at Dalhousie

The World University Service of Canada (WUSC) is dead on the Dalhousie campus. Dalhousie withdrew its support

of the organization at the Monday student council meeting.

The withdrawal will be for a one-year trial period. Council president John Young

who made the motion to puli out, said the action was made necessary by the "irresponsifinancial dealings of the dents could do much for the national WUSC office in Toronto. of WUSC funds. Young says the organization

has become "ingrown" and He said Dalhousie has attempt-

registered at university this ed to introduce reforms at recent year. Mr. Jones spoke of having national WUSC conferences, but students do research into the all efforts have been frustrated.

The motion passed 8-3, with 6 abstentions.

Dalhousie WUSC chairman tive move" to withdraw. He asked lion worth of aid for a salary of council to send a delegate to this \$29,000. week's national assembly in Windsor in "one last attempt" to bring about reform.

Jonathan Wilde, a Dal student that attended an international WUSC seminar in Turkey this summer, said he was sent to the regional WUSC conference in Sackville last week to present an ultimatum that he did not agree with in principle.

We were to say that Dalhousie was going to drop out. . . However I was sent up there sort of in between two big screws -We state this case that far too much money was spent in the Toronto office - ie. about \$54,-000 - on administrative costs

students." Wilde said that after his presentation WUSC representatives showed him how the money is being "well spent in Canada."

where as only \$45,000 was ac-

As examples of money well spent he listed: for publicity, in the international seminars, study tours, scholarship and aid The bronze sign from the Denprograms. Wilde said the most tistry building and the 4 inch important advantage that WUSC bolts have been stolen. Council offered Canadian students was the urges that anyone who knows the opportunity to meet and carry on a dialogue with foreign students. Council treasurer Randy Smith

"Negative

says Yazer

speaking in favor of the motion to withdraw, pinpointed what he considers is the mismanagement

'The head of WUSC is a guy named Mayer, who I wrote a Canada will meet in Windsor letter to for financial statements. Ontario October 7, after a week He is paid. I understand \$15,000. There is one associate secretary and two regional assistants. The total administrative salary is 000 in student aid."

who distributed about \$590-mil- WUSC secretary general.

said, "to be a slight discrepancy in this proportion between Mr. Mayer's salary and what goes to Geneva (WUS international headquarters) and what the former head of the American foreign aid program got and what went

Smith said Canadian students would be further ahead to send \$52,000 directly to Geneva rather than send the present \$74,000 to

Wilde countered by insisting that "charity" work forms a very small part of WUSC's acti-

Last year the Dalhousie student administration cut its grant to WUSC from \$1,400 to \$300. The measure was designed to be an interm action until the question of mismanagement of funds by the national office in Toronto could be looked into in detail.

WUSC delegates from across preparation in regional work-

About 120 delegates from 40 \$25,000 . . . to administer \$52,- campuses are attending regional workshops this week to "seek Smith then drew a comparison ways to get every Canadian stuwith the former director of dent involved in the work of Brendon Yazer opposed the mo- foreign aid in the United States WUSC", says Douglas Mayer,

> We will try to get away from the situation in which students There seems to me, Smith give their annual dollar and then forget WUS.

> > One faculty member and one student from each of 60 campuses will be delegates to the national Assembly. The Assembly is "almost certain" to consider charges indirectly made last month by the Canadian Union of Students when delegates to the CUS Congress nearly withdrew support from WUSC, say WUS committee spokesmen.

# King's students demand rights at Art's meet

With hearty shouts of "We want our rights!", spirited King's students once again tried to take over the Dalhousie Arts Society.

About 60 King's students forced their way past Hershey Gavsie and Brendon Yazer who were guarding the doors of Room 201 A & A where the election meeting was in progress. They brandished the pink part-time student cards which were issued to them at registration. The guards were stationed to check for yellow Dalhousie Student cards.

The action by King's is a follow-up to the take over of last year's Arts Society election meeting when all the officers elected were King's students. This was possible because the majority present at the meeting were from King's

Dalhousie Student Council President John Young declared the meeting invalid because by the terms of the recently signed Dal-King's agreement, King's students were not recognized as members of the Arts Society. However, President Hicks sent a letter to King's stating that the elections were legal and that King's students could retain their membership. This is ostensibly the reason for King's claim of "We wan

The contentious issue at Tuesday's meeting concerned the payment of 50¢ at registration by all students for the Arts Society. King's offered two alternatives: refund the 50° or allow them to continue as members. Peter Crawford, Vice-President of Dalhousie Student Union, said that none of the money will be rebated to the Arts society until Christmas or possibly later. Bruce Howe, Treasurer of King's Student Union, countered with the claim that until King's are refunded their money they are members of the Arts Society. If we do not receive our refund by January, we will have our 170 Arts students take over the meeting. . . and we can do it.'

Linda Magnusson, recently elected president of the Arts society (by acclamation), said that the society operates all year and there is no sense in electing King's officers if they pull out in January. "King's can have their own Arts society, she said, and added that the competition would promote enthusiasm in the lagging Dalhousie Arts society. "It's too bad that there is so much tension between King's and Dalhousie," Miss Magnusson said, "but it has already been established that King's will not be allowed to participate in Dalhousie activities." However, she conceded that the "tension might help to promote Dal spirit."

During the election, Miss Magnusson refused to acknowledge any nominees who did not possess yellow student cards. However, a number of King's students had paid the \$34 fee which entitles them to participate in all Dalhousie activities and were therefore eligible to run for office. Only those students with yellow cards were counted as voters. King's students voted anyway, as did some Dal students who didn't

have their yellow cards with them. The following students were elected by official count: Vice-President - Brendon Yazer, Secretary - Barb Dexter, Treasurer - Liz Shannon, Publicity - Cathy Cox, D.A.A.C. Eric Kranz (acclamation), D.G.A.C. - Betty Ann Milligan and Evelyn Crane, and Program Director - Ruth Mercereau (acclamation). Of these, only Cathy Cox and Ruth Mercereau are King's students (with yellow cards).

According to the King's tally, which acknowledges all those who voted, the results are somewhat altered. Five out of the eight positions will be held by King's students if this count

becomes official. The meeting ended with an invitation to Dalhousie from King's students Kim Cameron and Bill Bryant to attend all King's activities. These would include the Quintilian Society, the Haliburton Society (where cider and cheese are served) and the February production of MURDER IN THE CATHEDRAL

#### Post grad Meds to meet

The postgraduate division of Dalhousie University's Faculty of Medicine will sponsor a two-day course on medical aspects or renal disease on Oct. 21 and 22 at the Victoria General Hospital. Special lecturer for the course will be Dr. Lionel McLeod associate professor of medicine at the University of Alberta, who will participate in discussions at all presentations during

On Oct. 21, in the Tumor Clinic Conference Room of the VG, Dr. D.T. Janigan will lecture on the functional anatomy of the nephron, Dr. McLeod will discuss renal tubular Function and Dr. S.E. York will speak on urinary calculi.

In the afternoon Dr. McLeod will lecture on renal failure, dialysis demonstration and problems of chronic dialysis-- medical and sociological. This will be followed by a one-hour discussion period, led by Dr. McLeod.

On Oct. 22, four talks will be given. Dr. S.J. Shane will discuss hypertension and the kidney, Dr. G. Pineo will speak on drugs and the kidney, Dr. W.P. Warren will lecture on pyelonephritis and Dr. A.J. MacLeod will speak on vascular nephritis.

#### Dr. Crosby appointed professor emeritus

The appointment of Dr. H. S. Crosby as professor emeritus has been announced by Dr. Henry D. Hicks, president of Dalhousie University.

Born in Hebron, Yarmouth County, he received his early education in Halifax and obtained his DDS from Dalhousie in 1923.

Dr. Crosby was appointed to the part-time staff of the Faculty of Dentistry in 1924 as a lecturer in juris-prudence and continued in this post until 1940. After war service, he returned in 1948, lecturing in dental ethics and two years later was appointed an associate profes-

infirmary, as well as a lecturer in dental ethics and economics.

Dr. Crosby reached retirement age in 1962 but agreed to remain on staff. He retired at the completion of the 1965-66

one vote. Last week he was unsure of his its validity. ability to push it through; "I can't tell whether I can or not,"

Four years of work hung in the balance. Doctor John Ripley started a drama workshop as an adjunct to the English 9 course in 1963. The only space provided was the Haliburton room at King's, the only instructor Doctor Ripley himself. Susan Vallance was added to the staff in '64 and the worshop people were given a house on South Street.

Last year Professor Lionel Lawrence joined the staff and more degree courses were given. This year four credit courses are

One cannot begin to describe the tremendous vitality that has and is being injected behind that is the university grants cominto the bloodstream of the college. In a few years Doctor Ripley has lain the foundation for the most exciting theatre venture east of Montreal. Ripley, Lawrence, and now Andrews are reactivating the theatrical world is staisfying a real need in the area. The

It has been accepted in principle to see a physics demonstration; the question by the faculty members. Aside from this seems irrelevant. To suggest that it is equal-

Added to this one must show that drama 4 has great significance for the university courses interest great numbers of students. This again was difficult. Apparently Professor Bennet's drama course was as well at-Doctor Bevan, head of the English de- tended twenty years ago with a smaller stupartment supported this programme. He dent population as the four courses given tohas a voice in faculty discussion but only day. In spite of this the faculty recognizes

The results of an experiment in physics are immediately obvious; the value of a new surgical technique is self evident results of dramatic experiments are much more subtle. Drama doesn't serve a strictly utilitarian function. New ideas often can't be tabelled, labelled, and documented. Science has been worshipped as a god far too long.

The university has taken a major step forward by accepting the new drama programme. Humanities need not replace science; it is enough that they be accepted as equals. Realization of this hope seems near.

There is still the Board of Governors that have to be met and convinced. Even mission. There are a lot of different bodies that have something to say about the programme. Theatre is an academically sound, very respectable and exciting discipline that problems that can be raised in a theatre Lectures were delivered, demonstrations production are those being raised in other departments of the university. There is a significant difference however. The major social political problems can reach far more of the sudent body in particular and the community at large that final approval be given to Not only must one point out that Arts the programme as quickly as possible.

# In Perspective

# The flabby body politic...

# **Origin of the Universe**

BY DENIS

de ROUGEMENT

Gazette

Political Reporter

# Universe solved: ∞÷√-2

The three theories which attempt to solve the problem of the origin of the universe are all eventually concerned with the nature of time.

The Bondi-Gold-Hoyle theory which holds that matter is constantly created at some point and the total density of matter stricted to an unlimited set of infinity. finite time intervals.

Richard Schlegel, a professor of physics at Michigan State University, in 1964 demonstrated that the steadystate cosmology, existing for an infinite time, would end up with infinite number of atoms.

And the trouble with that, Schlegel points out in his paper, is the order of the infinity.

The number of atoms you get is not a countable infinity, but an infinity equal to the number of points in the universe. Since it is clearly impossible

Schlegel uses a universe limited in past time to an unlimited, of decimal places. but not infinite, number of time units.

What he means is that the steady-state universe must have it did not exist.

Schlegel's proof, published in Philosophy of Science, January, 1965, shows first that an infinite past time produces a second is the second order of infinity. order infinity of atoms.

atom spaces is an increasing order of infinity.

exponential function of the time. If you like, we can say the number of atom spaces which now exist equals 2 raised to the power of the number of time intervals

which have elapsed since the

beginning of time. Now, for an infinitely old uniin unchanging, for example, verse, the number of atom spaces works only if we suppose the will be 2 raised to the power universe's existence is re- of at least the first order of

Earlier this century, George Cantor defined the first order of infinity as the number of natural numbers, 1, 2, 3, 4, . . .

This number is equal to the total of all rational numbers, but is less than the number of real numbers or the number of points on a line.

Real numbers included the natural and rational numbers along with those which cannot be ex- proof to prove his thesis. pressed as pi or e.

Pi is a non-repeating decimal to have one atom for each point, which begins 3.1417 . . . and carries on to an infinite number

It cannot be expressed as a rational number.

Cantor shows that if you pair 11 and 12. a limited past time span - once, each of the natural and rational numbers with a real number, you can always write another real number.

The number of real numbers

Cantor also shows that any If each atom in the steady- number, greater than 1, raised density universe occupies one to the first order of infinity atom space, then the number of is equal at least to the second

DESIGNATE EACH PRODUCT of a doubling atom space with a 1 or a 2 so each space is represented by an infinite series of 1 and 2. in the same way Cantor constructed his second order infinity: you can show the number of atoms after infinity time is a second order

2 - 0.8 9 1

GEORG CANTOR, THE INFINITY MAN, showed that however many real numbers you wrote down and match up to the natural numbers, you could always generate a new real number by drawing a diagonal through the matrix and choosing terms not on the diagonal. So we get 0. 5 (not 7) 7 (not 3) 5 (not 9) and so on. The number at the bottom is the new one.

When an atom space doubles, atoms.

he says, its doubling can be represented as a combination of two paths, designated 1 and 2. Thus the first atom space be-

comes two spaces, designated as space 1 and space 2. Space 1 doubles to become

Suppose this doubling continues an infinite number of times.

Each atom can be represented by an infinite series of 1 and 2. Writing these series in a

matrix, Schlegel proves you can always write a new series by drawing a diagonal through the matrix and using for each term in your new series the number which is not the number in the diagonal crosses.

This is isomorphic with Cantor's proof of the existence of the second order infinity.

The result is a second order infinity of atomspaces, and therefore a number of atoms equal to a number of points in the universe.

Schlegel, in attempting to resolve this contradiction, uses the model of the universe developed by Michigan State mathematics professor Paul Axt. The Axt model supposes that

there are a first order of infinity atoms in the universe. Counting back into time, and halving this number for each

Schlegel uses an isomorphic time interval, never leaves a less than infinite number of

> But a first order infinity of atoms, though inconceivable, is theoretically possible.

# Story of Bible: three hour drama on church ruin

YORK, England - Shortly after 8 o'clock on a cold, damp evening last month God appeared in a window of the 700 -yearold ruins of St. Mary's Abbey Church in this Medieval city. Almost four hours later, the world came to an end.

More than 2,000 spectators viewed these startling events in drama that portrays the whole story of the world, beginning before the Creation and ending after the world has ceased to be.

The occasion was the opening performance here of the Mystery Plays Cycle" staged nightly for three weeks and forming part of York's Triennial Festival of the Arts, which concluded July 3.

Only one side and parts of the back and front of the oncestately abbey, erected about 1250 as a Benedictine Monastery are still standing. But this rough stone skeleton affords an ideal location for the mystery plays.

Wooden staging was erected within the ruins; the mouth of Hell at one end of the setting, and Calvary at the other. Over-looking the stage from the gaping windows of the abbey, is Heaven. Around the open side of the ruins three tiers of seating were erected for the theatre audiences. Most seats were reserved for the three weeks of performances before opening

As part of the festival, another mystery play was performed each day at 6 P. M. This was Noah's Ark and the story of the Flood. The wooden float representing the ark was wheeled to King's Square near York Minster, the Commonwealth's largest church, and the biblical pageant was presented.

Forty-eight different "York mysteries" relating a continuous story have survived from the 14th century. Since then, they have been carefully assembled and studied. Though based on Old Testament and New Testament themes, the plays were originally performed by the guilds of trade unions of the period. Their authorship has never been determined though York historians believe monks may have written them about 1350.

Originally, the entire cycle of plays was produced in one day, usually Corpus Christi Day, which this year fell on June 9. The performance would begin at dawn, the creation of light, and conclude at twilight, with the "End of the World".

York's Canon J. S. Purvis says the plays "are one of the greatest treasures of the English language . . . (and) one of the noblest works of the English spirit.

The style is simple and direct. The costumes and lighting amid the huge, abbey ruins produce a dramatic effect. Little wonder the plays have won international acclaim.

During the performance I attended, the weather contributed appropriate sound effects. At the start of the scene on Calvary the sky was pierced by thunder and lightning, followed by a rain

Even without the "mystery plays" York is a mecca for the

Almost 1,900 years ago, the Romans built a fort near here. Today, York is one of the few cities in the world with its city walls still standing. Almost three miles of stone abutments with walkways on top, enclose the original city of York. Most of the present walls were first constructed in 1250 thoughtwo towers had been preserved from 300 AD.

Inside the walls, narrow streets - The Shambles, the Parent, Goodragate -- are surfaced with cobblestones and flanked by centuries - old shops and public houses with overhanging gables (upper floors).

From one of these gables you may shake hands with a neighbour across the street. Buy the delightful Yorkshire cheesecakes and puddings in the bakery shops below. Visit Young's Hotel, the birthplace of Guy Fawkes, who later blew up the Parliament Buildings in London, some 280 miles to the south. Tour Rowntree's and Terry's the chocolate manufacturers with their principal plants here. On a recent Saturday evening, as usual, these medieval streets were crowded with motor cycles and shaggy haired youths while the Ruben Rats, an Amsterdam Trio, entertained in one of York's coffee houses.

For a city of 105,000 people, York is endowed to excess with churches - more than 80 of them. Some have fallen into disrepair, or have been converted to other uses. Yet, within the environs of this city are some of the outstanding churches of the English-speaking world.

The York Minster for example, is the largest church in the Commonwealth and certainly one of the most spacious in the world. Construction of the present Minster started in 1220. It was completed 252 years later. Additions and renovations have

Most outstanding feature of the Minster is the East window: 76 feet high, 32 feet broad with more than 2,000 square feet of wholly-coloured medieval glass. One of three stately towers contains a peal of 12 bells, while another tower houses an 11-

ton bell. "Big Peter". Three blocks away is St. Martin-le-Grand, an ancient church built about 1,000, though its tower was not completed until 1437. St. Martin's is one of the oldest churches in the Commonwealth.

Yorkshire society during the centuries required to construct this vast network of churches has been preserved in painstaking detail at the York Castle Museum - originally a women's prisonand one of several museums in the city.

Today, the building introduces the tourist to an awesome exhibition: the world's first reaper, a series of period rooms depicting household life from the 17th, 18th and 19th centuries with furniture, textiles and ornaments from these eras; collections of cameras and compasses, coin balances, 200 constables truncheons, spinning, sewing, church alm boxes, hearths, churns

In the same building, an "L" shaped cobblestone street epitomizing some of the present and much of the past of York and thousands of other, small English centers like it: house and shop fronts from 19th century York completely reconstructed along the thoroughfare, stately carriages drawn by horses from the taxidermists shop, gas street lamps and Ye Olde English

This dispatch was originally written for The Evening Telegram, St. John's, Nfld. Day, Law 111, spent several weeks in Europe last summer preparing travel stories for the Telegram.

# By Ray Jotcham

When leading from length standard American practise is to lead fourth-highest. Modern analysts, while respecting the contributions made to bridge theory by the old-time whist players, are now starting to promote the advantages of leading the third-highest card when holding an even number of cards in the suit, and leading the lowest when holding an odd number of cards in the suit. Once again, its foremost advantage is that it is a more informative lead than the good old fourth-best. Consider, for example, the following situation:

H. 975 D. A Q 10 8 C. J 97 P INT P

P 4S All Pass

H. 10 6 4 3 D. 7643 C. AK65

Against the final contract of 4S, West leads the club four, won by East with the club king, and declarer follows with the deuce. If the lead is from a four-card suit, East should cash a second club, and then switch to a heart. If the lead is from a five-card suit, it may cost East a valuable tempo to try and cash a second club. In the actual play, East led the club, and found declarer with the following

> S. AQJ 1084 H. K Q 2

D. KJ2 C. 2

Note that a heart switch would establish a second heart trick for the defense while West still had control of the trump suit. Declarer ruffed the club continuation, knocked out the king of trumps, and discarded the heart deuce on the diamonds, losing a club, a spade, and a heart, making his contract on the nose. If West had led the lowest from an odd number of cards in the suit, East could have diagnosed the situation immediately, and defeated the contract via a heart switch.

POWERS OF REASON

I'd prefer to think that man, of a bug. It hardly seems justification for war, or anything else.

A famous soldier, whose name escapes me at the moment, once said something like this:

"I study the arts of war so my sons can study philosophy. My sons will study philosophy so their sons can study poetry.'

Need anything more be said? Indeed. One war apparently We've had enough of devoting justifies a battle hymn which themselves to the so-called arts.

Master's thesis is best seller

#### Hurried search to to discover lone assassin

By ANTHONY HOWARD London Observer Service

WASHINGTON - SOMEWHERE IN Washington a collection of photographs and X-ray plates has been hidden for almost three years. They were taken at Bethesda Naval Hospital on the night of Nov. 22, 1963, the day on which President John F. Kennedy was killed in Dallas, and were immediately handed over to the Secret Service. No one has seen them from that day to this.

What the photographs are known to show is the dead President's mutilated body, together with detailed X-ray examinations of his heart, his brain and parts of his abdomen. For two years and more, out of understandable feelings of respect and deference toward the Kennedy family, the photographs and the X-ray pictures have been allowed to lie in peace. Now, suddenly insistent, and in some cases strident, demands are being made for them to be submitted to independent examination, if not actually to be shown in public.

Curiously, the clamor comes both from those who uphold the Warren Commission findings and from those who have relentlessly attacked them since the day they were published. Only direct, hard evidence, both sides say, can put doubts at rest.

How has it happened? Earlier this year, when it became known ing the report as "a very dirty cans seemed to feet merely a possible to do so."

sense of irritation. For the bulk of U.S. public opinion it was enough that a distinguished seven-man commission had deliberated on all the issues at stake for more than eight months and, at the end, had come up with a clear-cut answer rejecting any conspiracy theory and naming Lee Harvey

Oswald as the one assassin. Today, however, it is the maestic Warren Commission itself that is in the dock rather than the lonely Oswald. The change has come about largely as a result of one book.

AN INDICTMENT

The indictment for this is what it turns out to be, comes from young academic, Edward Jay Epstein, who two years ago started a Master's thesis at Cornell University. His project was the problem of how a government organization funtions in an extraordinary situation without rules or precedents to guide it. Mr. Epstein, who is now a doctoral student at Harvard, decided to take the Warren Commission as his case history, apparently without realizing what he would stumble on to. The tale that he unfolds is a terrifying

one of negligence and muddle. Naturally, Mr. Epstein's book has to give some attention to what actually happened in Dallas that Friday morning 33 months ago - and one incident in particular is central to his thesis. His main concern throughout, however, is the adequacy of the investigation which followed, one that he brands "extremely superficial"

That, however, is scarcely the most disturbing charge he makes. Time and again the reader is brought back to the commission's dual purpose. Was the aim to ascertain and publish the facts, or was it to protect the U.S. national interest by dispelling rumors?

Of course, if all the rumors were untrue, as most of the commission members seem to have assumed from the beginning, there was no contradiction. The incompatibility in the two purposes could arise only if a damaging story on investigation proved to be supported by evi-

Ironically, the commission was brought face to face with this conflict at the start of its inquiries. A report had been received that Oswald had been a paid informant of the Federal Bureau of Investigation. DescribEDITORS NOTE

Two years ago, Edward Jay Epstein a student at Cornell University began searching for a topic for his Master's thesis in the area of government organizations and how they function in extraordinary situations without rules or precedents to guide them. He chose as his case history, the preparation of the Warren Commission Report. The product was a 151-page best selling study (entitled 'Inquest') into the Commission's hurried search to discover a lone assassin in the November, 1963 death of President John F. Kennedy.

In this report from the London Observer, writer Anthony Howard discusses the significant issues raised in Eptein's recently published book.

Epstein is just one of several authors who have published critical book-length studies reviewing the performance and findings of the Warren Commission.

These books include 'Rush To Judgement' a bestseller by New York Attorney Mark Lane; 'The Second Oswald' by Richard Popkin, a University of California philosophy professor, and 'The Oswald Affair' by the French newspaperman Leo Sauvage.

that a new flood of books on the rumor", the commission's spe-Dallas assassination was due to cial counsel urged that "it must be wiped out in so far as it is

> The seven commission members clearly agreed. Neither then nor later did they make any effort to investigate it beyond asking the FBI itself to deny it. This, throughout, seems all too often to have been the approach to evidence, however fragile, that threatened to upset preconceived notions.

THE COMMISSION ITSELF WAS SPIT DOWN THE MIDDLE ON A CENTRAL AND VITAL IS-SUE; THAT IT HOVERED AND WAVERED BETWEEN THE TWO-SHOT AND SINGLE BUL-LET THEORY; that one of its own major conclusions drew a 26-page memorandum of protest from one of its staff members; and that the men whose names were more than any other factor responsible for the confidence of the outside world, had on an average attended only 45 per cent the hitting of Governor Connally).

full-scale inquiry may not be necessary.

It is at this point, of course,

that the discussion ceases to be legalistic, or even forensic, and becomes instead politically highexplosive. For if one thing is clear it is that the commission was every inch President Lyndon Johnson's own creation. He virtually hi-jacked a very reluctant U.S. Chief Justice Mr. Warren, into presiding over it. He worked day and night to persuade his old friend, Senator Richard Russell of Georgia to serve - who then heard only 6 per cent of the testimony. And all the time his was the pressure in the background to get the report out well before the 1964 election.

Probably the most alarming single revelation to have come out is the degree to which the commission - at least in its crucial writing period - was hounded and harried by the time factor. Originally, the deadline set for the various staff members to submit their chapters in the report to the commissioners was June 1, but after two appeals to the commission for more time. the final date eroded well into September.

One young staff member trying to open up a new line of inquiry was brusquely told by the chief counsel: "At this stage we are trying to close doors, not open

QUESTION OF WHEN

STRUCK BY THE SAME BUL-LET, DID GOVERNOR CONNAL-LY TAKE MORE THAN A SEC-OND TO REACT? COULD A SINGLE BULLET, ESPECIALLY ONE THAT WAS LATER RE-COVERED MORE OR LESS IN-TACT, HAVE DONE THAT AMOUNT OF DAMAGE TO TWO MEN?) But the commission lawyers decided that they had no alternative but to ride roughshod over them. The reason was obvious. "To say that they were hit by separate bullets," one of them blurted out at the time, is synonymous with saying that there were two assassins.'

Incredibly it was precisely this issue that the Warren Commission failed to confront. Instead, in what was called the battle of adjectives, it was smoothed over by a compromise in language. Some commission members, we now know, remained wedded to the simple but impossible FBI theory that there had been three shots - two of which hit the President and one Governor Connally.

and there. Nothing in the story

Many consider it will be the greatest program of entertainment ever presented in one city over a six-month period.

It will feature several of the world's leading opera, ballet and theatre companies, orchestras, popular singers, chamber music ensembles, comedians and athletes, and various added attractions such as film festivals and a series of mammoth spectaculars. It will begin on the night of April 29, 1967, with a gala concert

by two top drama companies, the Stratford Shakespearean Festival and the National Theatre Company of Britain, and an outstanding ballet company, the National Ballet of Canada. The World Festival will be staged as part of Expo 67, the 1967 World Exhibition to be held in Montreal, Canada, April 28-October

27. It will involve the presentation of close to 200 attractions,

around 100,000 participants and the printing and sale of more than

and end October 28 with performances in three different theatres

,000,000 tickets for admission to festival events. To house performances by opera, ballet and theatre troupes, orchestras, chamber music ensembles and various soloists, Expo has contracted to rent the Place des Arts in downtown Montreal for the six-month run of the Exhibition. By 1967, the Place des Arts will consist of three theatres -- the existing 3,000-seat Salle Wilfred Pelletier (known formerly as La Grande Salle and considered one of the most accoustically-perfect halls in North America), and two houses now under construction -- the 1,300-seat

Theatre Maisonneuve and the 800-seat Theatre Port Royal. Film festivals, light popular entertainment, several theatrical troupes and various special shows will be staged in Expo Theatre. The 2,000-seat theatre stands just outside the Exhibition's main entrance gate on Cite du Havre, a long strip of land jutting downstream into the St. Lawrence River alongside Montreal Harbor. The six spectaculars and some of the sports events being planned by Expo will be presented in a 25,000-seat stadium being

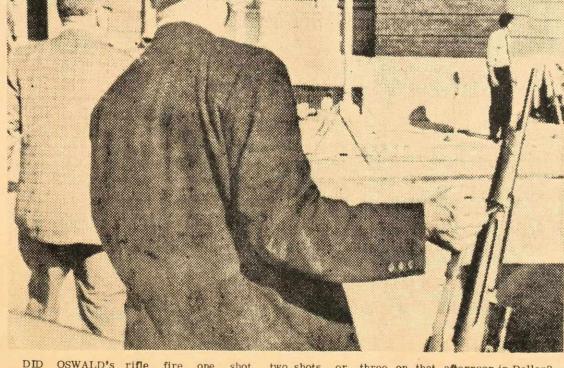

sponsored by six of Canada's automobile manufacturers at a cost In La Ronde, Expo's amusement park, construction is well advanced on the Garden of Stars, a triangular building designed to serve as a children's entertainment area in the late morning and early afternoon, a teen-age dance hall in the early evening, and at night, as a nightclub housing popular entertainers of international

An international soccer tournament, an all-Indian lacrosse tournament, and a two-day Europe vs. the Americas track and field meet to be held following the Pan American Games in Winnipeg make up the stadium sports program. Six spectacular shows will keep the stadium in full operation for the rest of the time.

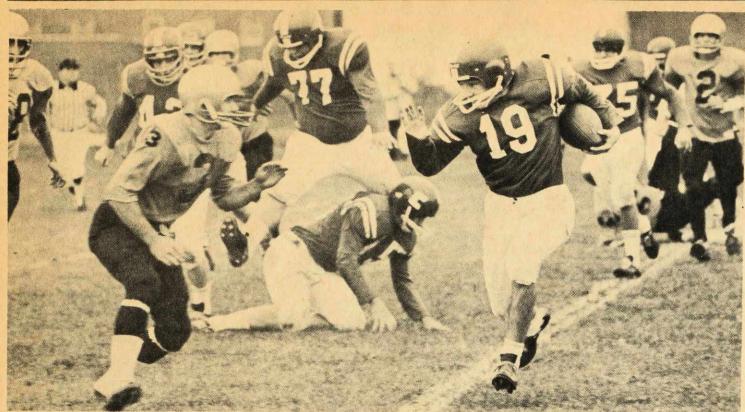

A highlight of the spectaculars program will be the first

appearance in North America by the Gendarmerie Française. The celebrated and historic French military police force which at one time served as Napoleon's Imperial Guard, will be sent to Montreal by the Government of France to stage a pageant involving 700 men, 110 horses, 40 motorcycles and 18 jeeps. Expo 67 and the Montreal International Film Festival organizers

will jointly present more than 30 feature films, many of them world premieres, to be attended by leading film personalities -stars, directors and producers, at Expo Theatre.
