The copy filmed here has been reproduced thanks to the generosity of:

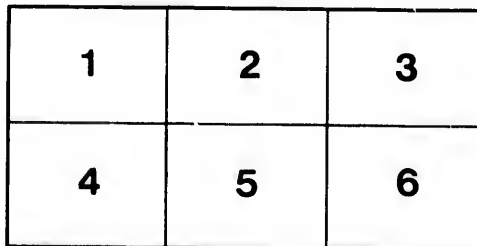

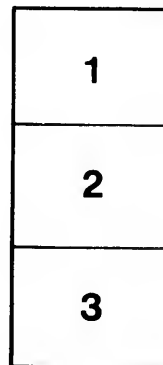

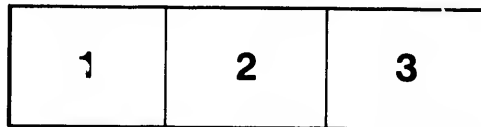

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Swampscot anchorage and to Broad Sound. Leave it $1\frac{1}{2}$ miles on the starboard hand on entering Broad Sound.

Davis' Ledge Buoy bears E by S; Boston light bears N W $\frac{1}{2}$ W, 7 miles. This course must be kept good, northerly, to pass Bell Boat, off the north side of the Harding's Ledge (about $\frac{1}{4}$ miles from Minot's Ledge Light). A good mark to clear the Harding's Bell Boat, after passing Minot's light, is to keep Long Island Head light (fixed white) just open to the north of the Narrows light, which is a red light.

Boston Light; latitude $24^{\circ} 19' 38''$ N; longitude $70^{\circ} 53' 25''$ W; on Little Brewster Island, north side of entrance to main ship channel to Boston; white tower; white flash light, flashing once every half minute, visible 17 miles. Also, an air trumpet, giving blasts of 7 seconds, followed by interval of 43 seconds. From Cape Cod highlands the course for Boston Light is N W by W $\frac{1}{2}$ W, which well clears Minot's Ledge and the Hardings; then, when well past Minot's, bring Boston light to bear W by N $\frac{1}{2}$ N and run for it until within $\frac{1}{4}$ of a mile of it or until the Beacon light bears about W by N, then run W $\frac{1}{2}$ S until the Beacon light bears W N W, then run W by N leaving the Beacon light 100 yards on your starboard hand, then steer N W $\frac{1}{4}$ W (keeping the middle of the channel) for the Narrows between Galloups and Lovell's Islands, then about N W $\frac{3}{4}$ N for the bell buoy off Nix's Mate, which leave on port hand, then run W by N $\frac{1}{2}$ N for Fort Independence, leaving the lower middle buoy, red can, No. 6, a good berth on your starboard, and State Ledge buoy, red Num No. 8 close aboard on your starboard; then run about N W $\frac{1}{2}$ N for the upper middle buoy, black Num No. 9, which leave on your port, then the course to Long Wharf or to good anchorage is about N W $\frac{1}{2}$ W. If making Boston ship channel from Cape Ann, get Thatcher's Island light to bear N N W from 2 to 3 miles, then steer S W $\frac{1}{4}$ W until Boston light bears W by N $\frac{1}{2}$ N. Then proceed as before given.

Narrows Light; brown house; fixed red light, on the right hand side of Narrows, in ship channel entrance to Boston harbor.

Long Island Light; on the N E end of Long Island and southern side of entrance to Boston inner harbor; white tower; fixed white light, visible 16 miles. In coming up ship channel, and after leaving Nix's Mate buoy on the port hand, and Long Island Light bears W by S $\frac{1}{2}$ S, run W by N $\frac{1}{2}$ N for the south end of the Castle until the Castle North Wharf bears N W by W $\frac{3}{4}$ W, or abreast of the State Ledge Buoy (red, No. 8), then N W $\frac{1}{2}$ N to the Upper Middle Buoy (black, No. 9), which leave on port hand, then the course to Long Wharf is N W $\frac{1}{2}$ W. But if approaching Boston from Cape Ann, via Broad Sound, bring Long Island Light to bear S W by W, and run for it until Deer Island Point Beacon bears N W by N $\frac{1}{2}$ N, three-eighths of a mile distant, then W by N $\frac{1}{2}$ N up the harbor. Strangers should bear in mind that in the middle of Broad Sound there is but 8 feet of water at low tide; but by keeping on the southern side of the Sound, leaving the Graves Automatic Buoy half a mile on the port hand and the Devil's Limb Buoy (black can No. 1) $\frac{1}{2}$ mile on port hand, and running straight to Ram's Head buoy (black can buoy No. 5) about W S W, passing Aldrich's Ledge buoy (black can No. 3) $\frac{1}{4}$ mile on port, then leaving Ram's head 50 yards distant on port, and run about W $\frac{1}{2}$ S to clear Deer Island Point Beacon, you can carry 12 feet safely. From the Beacon you will steer W $\frac{3}{4}$ N for lower middle buoy, then W by N $\frac{3}{4}$ N for State Ledge buoy, when proceed as before given.

Explanatory.

Aphelion—The point of a Planet's orbit farthest from the Sun.

Apogee—That part of the Moon's orbit farthest from the Earth.

Astronomical Day is reckoned from noon to noon through the 24 hours. Thus, July 21, 9h, is 9h A. of July 21, and July 21, 15h, is 3h M. of July 22.

Conjunction—A Planet directly between the Earth and the Sun is said to be in Inferior Conjunction with the Sun. A Planet with the Sun directly between it and the Earth is said to be in Superior Conjunction with the Sun. Planets are said to be in conjunction with each other, or with the Moon, when they are in the same sign and degree.

Declination—The distance of a heavenly body from the Equinoctial, measured north or south, in degrees or minutes, on a Meridian.

Ecliptic—The plane of the Earth's orbit, so called because Eclipses can take place only when the Moon is on or near it.

Elongation—The distance of a Planet from the Sun as seen from the Earth.

Equinoctial—The circle in the heavens traced by the Earth's Equator.

Node—That part of the orbit of a heavenly body which intersects the Ecliptic. If the body is passing from south to north, it is called the Ascending Node; if from north to south, Descending.

Opposition—A Planet with the Earth directly between it and the Sun is said to be in Opposition to the Sun.

Penumbra—That portion of space around the shadow of the Earth, in passing through which the Moon diminishes in brightness, in consequence of a part only of the Sun's rays reaching her surface.

Perigee—That part of the Moon's Orbit nearest to the Earth.

Perihelion—That part of the Planet's Orbit nearest to the Sun.

Quadrature—Two heavenly bodies are said to be in Quadrature when they are distant from each other by one-fourth of the Zodiac, or three signs apart.

The Sun's Declination and fast or slow of clock are given for apparent noon, or time of passing the Meridian of St. John.

HATS, CAPS, AND FURS, 61 CHARLOTTE STREET.

It will pay you to see James T. Hurley's Samples of Boots and Shoes.

The Moon's Southing is given in Astronomical time for the Meridian passage at St. John; and her Declination, when on the Meridian.

The Rising of the Moon is given from Full Moon to New Moon; and the Setting from New Moon to Full Moon.

TIDES.

The Tides in the Calendar are the Morning and Afternoon Tides at St. John and Charlottetown. In the Tide Table (page 38) will be found Constants for finding the time of High Water at each of the places given in the Table.

In editions of this Almanac prior to 1885 the Tides were only given approximately, but ever since they have been corrected for the varying distance of the Moon from the Earth, and also her angular distance from the Sun. They can now be depended on as accurate to at least the same degree as the Admiralty Tide Tables.

It will sometimes be found that when a Constant is added to the time of High Water at the Port of reference the sum exceeds 12 hours; in this case subtract 12 hours from the sum and the remainder will be the time of High Water at the required Port or the succeeding afternoon or morning, according as the Tide at Port of reference was a Morning or Afternoon Tide.

EXAMPLE.

High Water at St. John, January 18th,	11h. 45m. A.

It will sometimes be found that a Constant to be subtracted is greater than the time of High Water at the Port of reference: in this case add 12 hours to the Time at the Port, subtract the Constant, and the remainder will be time of High Water at the required place for the previous Morning or Afternoon, according as the Tide at the Port of reference was an Afternoon or Morning Tide.

EXAMPLE.

High Water at Charlottetown, January 5th,	1h. 9m. M.

FORECASTING THE WEATHER.

Men have, from a very early period, studied the weather, on account of its great influence on their pursuits, in order if possible to predict its nature, and prevent those losses to the Farmer and the Sailor which result from violent storms.

The earlier students based their predictions on the phases of the moon, but an examination of the Greenwich observations for more than half a century has shown that this theory is entirely unfounded. Weather prophets like Moore, Zadkiel and Vennor claim in their Almanacs to be able to forecast the weather day by day for a whole year; but meteorological science in the British Isles, and the Signal Service of the United States, with the Weather Bureau of the Dominion, does not claim to forecast, with any certainty, the weather for more than three or four days at the most.

If an observer could obtain, at regular and repeated intervals, readings of the Barometer at stations distributed over a large area, he would be enabled to trace the march of the storm, for it has been found that the wind always blows towards the place of the lowest barometer reading; and so, by means of the telegraph, he may warn those places the storm is approaching. Still, mistakes are often made, and the forecasts are not always infallible, so that much remains to be done before meteorology can be ranked among the exact sciences.

Street Letter Boxes.

The Street and Hotel Letter Boxes in the Cities of St John and Portland will be visited at 6.00 P.M., and 10.30 P.M., also in the business parts of the City at 1 P.M., daily.

Merchants' Boxes.

Rent of small box \$4, and of large box \$6 a year.

Though every effort will be made in sorting letters to place them in the boxes, when the party addressed is known to have a box, the Postmaster does not hold himself responsible for this always being done; the primary rule being that all letters bearing the number of the house and name of street go there by letter carrier.

An order to place in a box letters belonging to another person than the owner of the box cannot be recognized, unless such letters are addressed to the care of the box or its owner.

Letter Carriers' Delivery.

Change of Residence should be promptly notified to the Postmaster in writing.

Three deliveries daily in business sections of the city, commencing at 8.30 a.m, 1 p.m, and 3.30 p.m; two deliveries in other sections at 8.30 a.m and 3.30 p.m.

All letters mailed at the St. John Post Office within 15 minutes of the hour fixed for morning and evening deliveries will be dispatched by such deliveries.

Letters not bearing the name and number of street, addressed to parties whose address may be known to the Carriers, will be delivered by them.

Useful Hints.

Never send money or other articles of value through the Post Office except either by Money Order or Registered Letter.

Make complaints and inquiries in writing.

Post all letters and newspapers, etc., as early as practicable, especially when sent in large numbers.

Envelopes closed and simply clipped at the ends cannot be forwarded by Book Post.

Preserve, and request correspondents to preserve, envelopes of missent or delayed letters.

Business men should be careful to authorize but a limited number of persons to receive their letters, and only those in whom they have full confidence.

Have a letter box on your office door.

A letter once posted becomes the property of the person to whom it is addressed, and must be forwarded according to its direction. On no application, however urgent, can it be delivered back to the writer, or to any other person.

Letters addressed to mere initials or fictitious names will not be delivered unless addressed in care of a resident, or to some box in the Post Office.

Letters containing Gold or Silver Money, Jewels or precious articles, or anything liable to Customs duties, cannot be forwarded by Post to any of the Postal Union countries except the United States.

Time Ball on Northern Tower of Custom House.

The Ball will be hoisted half its elevation each day (Sunday excepted) at fifteen minutes before one o'clock. At one minute before one o'clock it will be hoisted its full height; and at one o'clock, mean time, the Ball will be dropped. A Chronometer keeping correct Greenwich time should then show 5h 24m 15s, and the difference between this and the time shown by a Chronometer, is its true error on Greenwich time at the moment. As the above hour of one o'clock when the Ball drops, represents 5h 24m 15s at Greenwich, the error of a Chronometer may be ascertained, no matter where the ship is lying. Masters of vessels arriving at Saint John should compare their Chronometers by the time Ball, as it will enable them to get the sea rate, which frequently varies from harbour rates. Latitude 45° 16' 42" North. Longitude in time 4h 24m 15s West of Greenwich.

GEORGE HUTCHINSON, *Director.*

P. S. Any Shipmasters entering this Port, keeping a Meteorological Register, who may be desirous of having the accuracy of their Barometers verified, can do so by comparison with the standard at the Observatory at the Custom House.
