BRITISH AND FRENCH MAKE GAINS KOVEL'S CAPTURE BY RUSSIANS IN FEW DAYS INEVITABLE CZAR'S TROOPS ALSO MAKE SWEEPING ADVANCES IN SOUTH GERMAN SUB. WITH CARGO AND KAISER'S NOTE AT BALTIMORE

GREAT RUSSIAN SUCCESSES GAINED IN NORTH AND SOUTH

Remarkable Progress of Gen. Letchitzky and Gen. Brusiloff Causing Enemy Acute Anxiety—Russian Capture of Kovel in Few Days Expected.

LONDON, July 9, 10.25 p.m.—The eastern front continues to overshadow the western from the spectacular view point, the Russian forces going from success to success. Not only is this true of Gen. Letchitzky, in the south, where his army has now occupied the railroad junction at Delatyn, west of Kolomoia, thus cutting off Gen. Von Bothmer from his supply base, but Gen. Brusiloff in the north is making surprising advances on both sides of the Kovel railway towards the Stokhod River.

Tonight's Russian communication reports the enemy forces in this region retiring in great disorder, and adds that the Russians have occupied Huleviche, which is about twenty-four miles to the east of Kovel, while apparently the Russians are already across the Stokhod River somewhere in the region of Janovka.

Kovel's Capture. Near Kovel, the Russian army has captured the German military position, which is absolutely essential if she is to retain her hold over the invaded parts of Poland and Lithuania, which is considered likely that it is only a matter of a few days before the Russians will be in possession of Kovel, which would compel Von Linsingen's retirement from the Lutsk salient.

German official and unofficial despatches reflect anxiety over the Russian advance as being greater than over the Anglo-French offensive, which the German military critics contend will not interfere with the operations against Verdun. Major Morant and other German critics express surprise at the extent and persistence of the Russian offensive and the endless resources of ammunition.

It is reported from Rome that at a recent council of German and Austrian marshals, Von Hindenburg declared that it would be impossible to attempt a new offensive on a large scale without reinforcements of at least a quarter of a million men.

Masters of Triangle. A Reuter despatch from Petrograd says: "The Russians are masters of the whole triangle comprising Rafalovka, Manevitch and Kolkoi. The capture of enemy positions northwards and southwards of the Sarny-Kovel railway permitted the cavalry to rush the center."

Russ Army Across Stokhod Serious Menace to Enemy

Austro-German Forces Defending Kovel Are Placed in a Most Dangerous Predicament.

LONDON, July 9, 10.55 p.m.—A Reuter despatch from Petrograd says that the Russians have crossed the Stokhod River at Uglit, which is approximately half way between the railways running to Kovel from Sarny and Rovno. The despatch adds that inasmuch as the Austro-German forces defending Kovel are chiefly concentrated along these lines, the Russian move in the centre threatens both groups.

FRENCH CARRY POSITION EAST OF FLAUCOURT

Ally Advances on Front of Two and a Half Miles.

PARIS, July 9.—The French have carried German positions east of Flaucourt on a front of four kilometres and to a depth of from one to two kilometres. They have also captured the Village of Biaches, according to the official statement issued by the war office tonight. The text of the statement follows:

"North of the Somme, nothing of importance occurred.

"South of the Somme we took the offensive during the day east of Flaucourt, on a front of about four kilometres (2 1/2 miles), from the river to the north of Belle-en-Santerre. On the whole line attacked our troops carried enemy positions to a depth of from one to two kilometres. We carried by assault the Village of Biaches and have established our position on a line

Muscovites' Great Recuperative Power No Small Surprise to Enemy.

RUSH TO AUSTRIA'S AID

German Troops Said to Be Inter-Walling Austro-Hungarian Forces.

BERLIN, via London, 9.30 p.m. July 9.—The eyes of Germans were turned today toward the east, rather than the western front. The weight of the first onslaught on the west is believed to have been fully estimated, and in spite of whatever surprise British strategy may still have in store, public and expert opinion here is confident of the outcome. It is believed that the sixth army and reserves have the situation well in hand on the Somme front and that nothing can interfere with the completing of the Verdun campaign. In the east, however, a great general offensive has burst all along the front from Riga to Roumania. Wave after wave of Russian flesh and steel is rolling against the Teuton dyke which stretches across the Russian provinces. Thrust follows thrust in constant succession, and no sooner do the Germans succeed in walling the advance at one threatened point, than another menace.

Backing Up Austrians. The most striking results thus far manifested have been seen in the leadership and distribution of the forces of the central powers rather than in the actual movement of the contending armies. With the exception of Gen. Pflanzer, commanding a small group at the extreme southern

FIRE WIPES OUT BIG PLANT IN DESERONTO

Dominion Hardwood Factory Destroyed at Loss of Hundred Thousand.

DESERONTO, Ont., July 9.—The large plant of the Dominion Hardwood Limited, manufacturers of woodenware, was totally destroyed by fire at four o'clock this morning. It was a new industry, and had just commenced running in full operation to fill a number of large orders. An east wind was blowing at the time, but the firemen succeeded in preventing the fire spreading to adjoining buildings. The loss is placed at \$100,000, partially covered by insurance. The company expects to rebuild immediately.

HUN SUBMARINE MAKES TRIP TO AMERICAN PORT

Deutschland Anchors Below Baltimore With Cargo and Message to Wilson.

TO TAKE NICKEL BACK

Sub. Was Fifteen Days on Trip From Bremer Haven.

BALTIMORE, Md., July 9.—The world's first submarine merchantman, the German underwater liner Deutschland, anchored below Baltimore tonight, after voyaging safely across the Atlantic, passing the allied blockading squadrons and eluding enemy cruisers watching for her off the American coast. She carries mail, a cargo of 750 tons of costly chemicals and dyes, and a message from Emperor William to President Wilson and to carry back home a cargo of nickel and crude rubber sorely needed by the German army.

The Deutschland carries, mounted in her conning tower, two small guns, of about three-inch calibre. No torpedo tubes are visible. She is capable of submerging in less than 2 minutes. On the surface of the water the submarine has a speed of from 2 to 3 knots an hour more than the average merchant steamer.

Trip in Fifteen Days. Fifteen days out from Bremerhaven to Baltimore, the submarine reached safety between Virginia Capes at 1.45 o'clock this morning.

Three hours later the big submarine started up the bay under her own power with the German merchant ship flying, conveyed by the Timmons. She was making more than twelve knots and could have docked in

These ships have been lying idle in Petrograd, Kronstadt and other Baltic harbors since the outbreak of the war. They have passed thru the Cattagat without interference from German warships and arrived safely in British ports.

Germans Forced to Admit That Situation is Critical

Frankfurter Zeitung Says Responsibility Devolving Upon Staff in the West is Terrible.

LONDON, July 9.—The Frankfurter Zeitung in an editorial review of the situation, according to an Amsterdam despatch, says: "We all know now that our position is critical, and we depend more than ever on the superiority of our leadership. What is important now is the proper utilization of our forces, which calls for weighty consideration. The immense responsibility devolving upon our staff in the west is terrible, but our fortress is firm."

MONTAGU TO DEAL WITH MUNITIONS

Official Announcement Made of Appointment as Lloyd George's Successor.

OTHER CHANGES MADE

Wood Resumes Former Duties—Tennant Secretary of State for Scotland.

LONDON, July 9.—Following the appointment last week of David Lloyd George as secretary for war, official announcement was made today of several other changes in the government. Edwin Samuel Montagu, financial secretary to the treasury, takes Mr. Lloyd George's place as minister of munitions. Thomas McKinnon Wood, secretary of state for Scotland, becomes chancellor of the Duchy of Lancaster and financial secretary to the treasury. Harold J. Tennant, parliamentary under secretary for war, is made secretary of state for Scotland.

"In view of the very heavy responsibilities of the treasury during the war," the announcement continues, "Premier Asquith has invited McKinnon Wood to return to his former post of financial secretary."

"Mr. Asquith has invited Lord Curzon to become a permanent member of the war committee."

"The foregoing announcement is not in the nature of a surprise as London papers had forecast the appointments. Reconstruction Completed. The ministerial appointments complete the reconstruction of the cabinet necessitated by the recent Irish crisis, the death of Lord Kitchener and the resignation of Earl Selborne from the presidency of the board of agriculture over the Irish difficulty, with the exception of the Irish appointments, which are not expected to be announced until after the introduction of the parliamentary bill insuring the home rule compromise."

"The appointments tend to strengthen the ministry on the business side. Mr. Montagu, the new minister of munitions, belongs to a great Jewish commercial family. The most interesting appointment, however, is that of Mr. McKinnon Wood to the dual position of chancellor of the Duchy of Lancaster and his former post, financial secretary to the treasury. The latter is his real position, the post of chancellor being a virtual sinecure. It is understood that Mr. Wood's appointment is intended to make him responsible for all matters affecting the issue of treasury bonds and war loans, with a view to relieving the chancellor of the exchequer of this side of the nation's finance, in order that he may devote himself more exclusively to budget finance."

Some Bombs Were Dropped, But No Damage Has Been Reported.

OTHER CHANGES MADE

Wood Resumes Former Duties—Tennant Secretary of State for Scotland.

LONDON, Monday, July 10.—Hostile aeroplanes have dropped bombs on the English coast, but so far as is known did no damage. An official statement issued this morning says: "Shortly before midnight Sunday, enemy aeroplanes visited the southeast coast of England. From the information available about five bombs were dropped. No damage is reported so far. Anti-aircraft guns engaged the raiding machines. No further details have been received."

A previous despatch told of the diving off of a German aeroplane from the Kentish coast without dropping bombs.

SIX HUNDRED OFFICERS ON CASUALTY LISTS

Ninety-Four Killed and Over Five Hundred Wounded in Fighting.

LONDON, July 9, 9.07 p.m.—The lists of casualties among British officers issued in the past four days, apparently composed altogether of losses suffered in the past week's advance, give a total of 94 killed, 504 wounded, 30 missing.

A small proportion of these probably refer to other operations, while some of the casualties were possibly included in the lists earlier than Thursday's. It is impossible from the lists thus far issued to judge of the casualties in the ranks.

This service is to be celebrated in all the churches and chapels in Europe, and by the Pope's instructions, is to take the most solemn possible form.

Sir Douglas Haig's Infantry Makes Satisfactory Progress in Neighborhood of Ovillers in Fierce Hand-to-Hand Fighting.

Special Cable to The Toronto World. LONDON, July 9.—British infantry after a fierce preliminary bombardment stormed a line of trenches east of Barmafay Wood between the Somme and the Ancre, and gained a lodgement in a strongly defended wood known as the Bois de Trones, on Saturday afternoon. Fighting was continued thru the night and the British made progress near Ovillers in the preceding 24 hours and captured in another sector a group of defended buildings. Steady progress was made in the neighborhood of Ovillers by the British today, in the face of stubborn opposition.

Two violent counter-attacks launched by the Germans against British positions in and near Trones Wood, following two previous ones, showed some signs of being broken down completely under the effective fire of the British guns.

Sunday night's official communication says: "The hostile artillery was more active today; artillery duels took place in several sectors. In the neighborhood of Ovillers, which the incessant fighting has converted into a mass of ruined trenches, unrecognizable debris and shell holes full of mud, we again made steady progress in the face of stubborn opposition."

"In an attempt to retrieve to some extent the losses of the past week, the enemy this afternoon launched two violent counter-attacks against our new positions in and near Trones wood (Bois de Trones). As in the case of his fruitless efforts yesterday, both attacks completely broke down under the effective fire of our guns. On the rest of the front there was nothing of importance."

The Sunday Morning statement follows: "Last night between the Ancre and the Somme the fighting was considerably less violent than during the last two days. We made further progress in the neighborhood of Ovillers and in another sector captured a group of defended buildings. The Germans made no further attempts to recapture their lost positions held by us."

"Near Givanchy we successfully sprang three mines. Further north after heavy bombardment of a portion of the sector held by New Zealanders a strong local attack succeeded in entering our trenches at one point. After half an hour's fighting the enemy was ejected by the New Zealanders, leaving many German dead in our trenches. There was nothing of importance on the rest of the front."

The text of Saturday night's British communication reads: "The fighting today has been principally on our extreme right flank, where further important successes were gained by our troops. Took 150 Prisoners. To the east of Barmafay Wood. (Continued on Page 4, Column 4).

WAR SUMMARY: THE DAY'S EVENTS REVIEWED

IT is on the Russian front that the war has taken on a lively gait, the great offensive having had a month's start in that theatre over the west, and the Russians are now hard pressing both flanks of the Teutonic group of armies south of the Pripiet marshes. The problem that held them up in their advance on Kovel appears to be in a good way of solution, for the German front has been put to rout opposite Kolkoi and Czartorysk and the Russians have pursued the enemy across the lower Stokhod River at Uglit and are making a new thrust at Kovel. This point of Uglit is half way between the Sarny-Kovel and the Rovno-Kovel railways and as the Austro-German forces defending Kovel are chiefly posted along those lines their armies are both threatened by the new advance. In two days' fighting before Kolkoi the Russians made 12,000 prisoners.

Not only is the left flank of the Teutonic armies thus menaced, but the right flank is strongly menaced as well by the forces of Gen. Letchitzky. These have just captured the important railway junction of Delatyn after very violent fighting. Delatyn is about 25 miles south of Stanislaw and it is only a few miles from the valuable Kirli-

Official War Statements

French.

The official communication issued by the French war office Saturday reads:

"To the north of the Somme, notwithstanding the persistent rain and fog, our troops delivered an assault this morning on the Village of Hardecourt and on Mamelon, to the north in co-operation with the British army, which attacked from its side the Bois de Tones and a farm situated south-east of that wood. In thirty-five minutes our infantry, by reason of the vigor of the attack, was in possession of the objects aimed at."

"Two German counter-attacks, one from the north, the other from the east, were launched in the afternoon on Mamelon conquered by us, but were broken by our fire. The Germans, who suffered heavy losses in the course of these actions, left 200 prisoners in our hands."

"To the south of the Somme there was no event of importance to report in the course of the day. On the Verdun front, our first and second lines were subjected to an intermittent bombardment. On the left bank the activity of the artillery continued very violent in the sectors north of Souville, Fumin Wood and the Daneloup battery."

"The usual cannonading occurred on the rest of the front."

Belgian communication: "In the sectors of Boesinghe and Steenstrate we continued successfully today our destructive fires on the German depots. The enemy responded by a very violent artillery action here and there."

Italian

The Italian war office made public

the following communication yesterday:

"On the Upper Adigio, our infantry advanced in the Molino Basin and toward Fornal. We captured arms, ammunition and other material left by the enemy."

"Dense mist prevented all activity of artillery on Sette Comuni plateau. In the northern sector we stormed some trenches north of Monte Chiesa and occupied Angella pass, taking about forty prisoners."

"In the upper Campelle Valley, we regained possession of the Digiovanna pass."

"Along the Isonzo front the enemy's artillery was particularly active in the Tolmino and Pivato sectors and on the heights northeast of Gorizia. Our artillery replied effectively. On the night of July 7 we repulsed two further attacks on positions which we captured recently in the Montefalcone area."

Russian

Saturday's Russian official statement says: "The troops of Gen. Brusiloff are approaching the Stokhod River and everywhere overthrowing the enemy, who are resisting desperately. We dislodged the enemy from numerous points south of Nobel, on the Pripiet River. The enemy is falling back on the lower Stokhod."

"Last night our cavalry charged enemy infantry and Hungarian Hussars in the region of the Village of Noraya Rouda, situated southwest of Leszneva, seven versts (about five miles) from the Stokhod, and south of Tryanovka. They sabred numerous Hussars and scattered the remainder thru the woods. This morning our valiant troops captured a fortified position east of the Villages of Ugly and Navoz, between the Stry and the Stokhod, north of Sokul. They made num-

erous prisoners and captured three troops. Afterwards some of our troops, pressing on the enemy's heels, crossed the Stokhod in the region of the Village of Ugly."

"According to an approximate estimate during the fighting from July 5 to July 7 between the Stry and the Stokhod we took prisoner at least 300 officers, including two regimental commanders, and about 12,000 unwounded men. We also took not less than 45 guns of large and small calibres, about 45 machine guns, a large quantity of projectiles, cartridges and arms and stores of food and forage."

"On the front of General Evert desperate fighting has again broken out at many places. On the wide front east of Baranovichi the actions were marked with unusual ferocity. The enemy made fierce counter-attacks. The situation generally is unchanged. In other sectors there is nothing to report."

Austrian

The official communication issued Saturday by the war office says:

"Russian theatre: In Bukovina our troops defeated the enemy in the valley of the upper Moldava. On the upper Pruth and south of the Dniester there was little activity yesterday. To the west and northwest of Buzsacz several attacks, delivered with great violence, failed."

"South of Lutsk the enemy lines were again pushed back. The fighting forces, which were withdrawn from the Stry salient north of Kolk, reaching the new positions allotted to them, the enemy pressed after them at a few points."

"Yesterday the enemy again delivered assaults against the Austro-German troops at the northeast of Baranovichi, employing great masses of men. All the attacks were shattered. Our Eberberg regiments fought in completely demolished trenches and drove back the Russians repeatedly in bitter hand-to-hand fighting. A thousand dead Russians covered the field in front of the trenches. "Italian theatre: On the Isonzo

front the artillery fighting was extended to Gorizia and the Tolmino bridgehead. After strong artillery preparation, the Italians delivered several attacks during the night against the Montefalcone Ridge. The attacks were repulsed with sanguinary losses for the Russians. In the fighting of the last few days we have captured two officers and 631 men. Army group of Gen. Von Linsingen—Russian attacks at several points were unsuccessful. tack against our positions on the Eliskogal failed. "Southeastern theatre: The situation is unchanged."

German

The German official communication of Sunday follows: "Western front—North of the Somme British and French attacks continued. Attacks on the front between Oivillers and Mametz Wood, and also on both sides of Hardecourt were all repulsed with very heavy losses for the assailants. The enemy made six advances on the Bois de Tones with no success. He succeeded in penetrating Hardecourt Village."

"South of the Somme the French increased their artillery fire until it reached the greatest violence. Local advances were attempted and failed. "On the remainder of the front were violent artillery encounters, discharges of gas by the enemy and patrol fighting. As a result of the patrol engagements we took some prisoners east of Armentieres, at Apremont Wood and west of Markinch. "Near Miramont, Lieut. Mulzer shot down a British super battleplane. The emperor has bestowed upon this flight officer the Order Four in Merite in recognition of his accomplishments. An enemy aeroplane was brought down southeast of Arras by the fire of our anti-aircraft guns. Another aeroplane after a aerial battle southwest of Arras, came down on the other side of the enemy's line. It was destroyed by artillery fire."

The attacks again broke down with heavy losses for the Russians. In the fighting of the last few days we have captured two officers and 631 men. Army group of Gen. end of the line, the Austro-Hungarian units are everywhere interwalled by Germans, who have furnished reserves to bolster up particularly threatened points.

At the very outset of the Russian offensive, General Planzer detached divisions to relieve the hard-pressed Archduke Joseph Ferdinand, and his operations are now mainly directed to the defence of the Carpathian forests and the passes into the Hungarian plain.

Russians' Recuperative Powers. It is betraying no secret to say that the German leaders have been astonished at the recuperative powers of the Russians and their freely flowing reservoirs of both men and munitions. Time after time it seemed as if the Russians must be nearing their last resources in shells and reserves; time and again correspondents at Austrian headquarters reported that the Russian troops were losing their vim and striking power, only to chronicle a day or two later a new onslaught with fresh troops, freely supported by artillery.

Despite the various Russian gains,

however, which, when marked on the map of the eastern front, make a comparatively small showing for such a colossal expenditure of blood and iron, no uneasiness is manifested here. The general offensive on all fronts simultaneously has compelled the Germans to discontinue their favorite railroad strategy, but the strategic defence, which the Germans have deliberately chosen for the eastern and general western fronts, has so far proved adequate to hold up the allies offensive and has not interfered with the continuance of the German assault against Verdun. To such an extent is this true that the Germans still retain the strategic initiative and show no indication of relaxing their grip on the great French fortress.

NEW ZEPPELIN INVENTED DANGEROUS TO VESSELS

THE HAGUE, July 8.—The Nieuwe Courant publishes from a correspondent in Zurich a detailed description of the newly-completed "super-zepppelin" which has recently been making trial trips over the heads of the inhabitants of the shores of Lake Constance.

The new airship, it is said, is specially designed for use against ships at sea. It differs materially in dimensions and construction from previous zeppelins. It is fish-shaped and of great length in proportion to its diameter. It has twenty-four balloons within the outer envelope, and four gondolas, and can carry a crew of thirty to forty men and an enormous quantity of bombs.

The motor can develop from 2000 to 4000 horse-power, giving a maximum speed of 86 miles an hour. The steering apparatus, which differs from that of the other zeppelins, is so perfected that the ship can turn on its own axis in half a minute, a material advantage in manoeuvring over vessels provided with anti-aircraft guns. At the sides of the envelope platforms are built, on which to place small guns. The airship will carry "air torpedoes" of a kind designed by a Swedish inventor. The new zeppelin is considered one of the most dangerous air vessels yet brought out during the present world war.

SHACKLETON WILL TRY TO RESCUE COMRADES

Will Leave Buenos Aires on Rescue Ship Bound for Elephant Island. LONDON, July 10, 12.20 a.m.—A Reuter despatch from Buenos Aires says that Sir Ernest Shackleton expects to start a whaling vessel for Elephant Island in another attempt to rescue the main body of his Antarctic expedition. He will sail on the schooner Emma.

Sir Ernest Shackleton has made two vain attempts to rescue his four comrades. The last effort was made in a steamer furnished by the Urugayan Government, but the ship was unable to make her way thru the ice and had to return. Twenty-two men have been in an ice cave on Elephant Island since April 15. At that time they had only five weeks' provisions. There are several schooners named Emma, but none are reported by available shipping records at Buenos Aires.

HAY GAINING LEAD IN RACE FOR SEAT

Conservatives Claim J. A. Makins is Running Even With Liberal. HAY MAKES MISTAKE? Candidate Gives a Partisan Speech Referring to Minister of Militia.

Special to The Toronto World. STRATFORD, July 8.—J. A. Makins, Conservative, and Wellington Hay, Liberal, have entered on the quarter stretch in their race for the seat in the legislative assembly. Mr. Hay, who for years represented the riding of North Perth. It looks from the grand stand as if Mr. Hay was in the lead, but the Conservatives say it is a neck and neck. Mr. Hay certainly broke away from his opponent on the stage. Mr. Makins has been gaining ground and the result today is far from certain. The Conservatives are more confident than the Liberals and talk of 500 or even a thousand majority. Mr. Hay, however, is normally a man of many cross currents and at work which make it difficult to predict the final outcome, but that the race is by no means over. The liberal meeting last night was a rather a dead affair. The air of the Opera House was sultry and oppressive and the orators were not especially entertaining. Many think Mr. Hay made a mistake in his reference to Sir Sam and in making a somewhat partisan speech. The Conservatives hope to have a livelier time at their demonstration tonight. Meetings, however, at this stage of the campaign have little effect. The voters have probably made up their minds and the Conservatives fear a defection in the liberal vote and also in the vote of the workmen of Stratford. The Liberals expect to hold their own vote and to profit by Conservative apathy. The contest will probably be decided by the City of Stratford, which is normally Conservative. The Liberals say they will sweep the city and put in Hay by a large majority. The Conservatives hope to carry Stratford and to almost break even in the riding outside of Stratford. The general consensus of opinion here, however, is favourable to the success of Mr. Hay and his election on Monday by a majority of from 300 to 500 would not be a very surprising event for Conservative workers.

"The infantry marched hard on the heels of the cavalry and is now in firm possession of the Manevich positions astride the Pinsk-Kolki high road. "Thus the enemy's attempt to turn the right flank of the Russian army which is thrust into the Lutsch completely failed. The continuance of the Russian advance in the region of the Styk and Stokhod rivers, and the Germans to fall farther back from the Styk to the Stokhod. "There is particular satisfaction of the capture of Gruziatyn, west of Kolki, which for days had been the scene of strenuous fighting. It is stated that Austrian-German units amounting to five corps (200,000 men), have been entrusted with the defence of the approaches to Kovel. The Austrians have been strengthened by German reinforcements between Kovel and Ratiwicz.

ENEMY ADMITS DEFEAT

AUSTRIAN HEADQUARTERS, via Berlin to London, July 9.—The element of the northern and southern wings of the Austro-German army south of the Pripiet marshes was due to superiority of the Russian forces, attended by the throwing in of fresh forces and the massing of attack upon attack reinforcements of losses. Spurred on by the success of Gen. Von Bothmer's troops south of the Dniester on the Tlumach front, the Russians pushed up new troops to both sides of the Dniester steadily. Gen. Von Bothmer east of Tlumach, forcing him to abandon the lower course of the Stripa. The new line to which the Austro-German forces retired follows the course of two brooks flowing into the Dniester from the north and the south, about 12 miles west of the Stripa River. This distance represents the line of the present front. The heaviest fighting in this section, however, occurred west of Kolomea, where the Russians are evidently trying to drive a breach between the armies of Gen. von Bothmer and Gen. Pflanzner and to isolate the latter. Their onslaughts were all repulsed. On the northern flank just south of the Pripiet marshes, the Russians for days have been throwing in fresh troops in an attempt to cut off the Austrian forces holding the triangle formed by the big bend in the Styk River north of Kolki. The new line, to which the Austrians retired, was a coupe being surrounded, runs straight across the base of the triangle some miles in the rear of the former point of the triangle.

By a Staff Reporter. CAMP BORDEN, July 8.—In honor of the Canadian soldiers who fought or fell at the battle of Ypres an imposing station will be built as a memorial by the C.P.R. at Ypres, about three miles from here, the junction of the Camp Borden branch line and the Ypres line. Even the ticket selling wickets will be military. They will represent trench firing loopholes. At the side of the Ypres station will be a roof-top in platform 500 feet in length. This is a C.P.R. tribute to Canadian valor and is on property owned by the company. More Troops Arrive. Today's arrivals of additional soldiers bring the military strength of Camp Borden up to about the 28,000 mark. (Continued From Page One). after a fierce preliminary bombardment, we stormed a line of trenches and gained lodgment in a strongly defended wood known as the Bois de Trone. There we captured 150 prisoners and several machine guns. "The French on our right flank greatly assisted our advance by the fire of their artillery. The enemy losses from the combined Anglo-French bombardment were severe. "A strong German counter-attack in mass, subsequently launched against the open against these captured positions, completely broke down under the fire of 18-pounders and 75-millimeter guns. The enemy retired in disorder. "In the neighborhood of Oviliers hand-to-hand fighting continued among the ruins of the village. But there, too, we made an appreciable advance. "Despite the cloudy weather our aeroplanes and kite balloons did some work, taking photographs and directing the fire of the batteries. A large explosion was caused in one of the enemy's ammunition depots and bombs were dropped on his billets. One of our machines, after disabled, sustained a running fight of twenty minutes with three hostile aeroplanes and afterwards landed safely in our own aerodrome. "With this exception, few enemy machines were seen, and these were far behind his own trenches."

WOMEN OF BRITAIN CARRY ON INDUSTRIES

Six Hundred Thousand Engaged in Work of Men Gone to the Front. Since England's five million men have gone with the army or navy, their places have been taken to a considerable extent by women, and the increase in different departments of manufacture and commerce during the last few months is quite interesting as showing the wholesale way in which women have jumped into the gaps which opened before them.

Statistics which have been gathered show that in the space of a year and ten months, the increase of women employed in metals is 126,000, chemicals 33,600; textile 27,000; building 6400; coal 2200; quarrying 100; clothing 11,700; food 30,900; woodworking 13,200; miscellaneous 85,700. A total of 287,600.

Talks With Screen-Struck Girls

By Beatriz Michelena (Copyrighted 1916, by Beatriz Michelena)

ONE bit of advice would impress upon the girl who starts out to make her way in the motion picture world is to keep up her home ties. How much revive hope and buoyancy she shall find, during a few hours, in encouraging words from home, only we who have already experienced their helpfulness can know.

There is something more than sentimentality in the saying, "a mother is one's best friend." There is genuine practical truth in it that becomes most poignant in times of trouble or discouragement.

My automobile is at Los Angeles and I want to get it" is Miss Eytton's final summing up.
