COLOMBIA.

Very late accounts were yesterday received from various parts of South America, those from Catajo reaching to 1st of September. It appears that the republic of the Equador, had been the scene of very fierce conflicts between the conflicting parties .-We find that the forces opposed to President Flores had mastered at Yamzed, in the province of Imbabura under the command of Colonels Guerrera, Madrid, and Estas, and had marched on Quito. Several fierce but fruitless attacks were made by them on that city, but at length they succeeded in obtaining possession of the buildings round the college of San Luis (in which their opponents were entrenched and well supplied with provisions and ammunition | The Palace of the President was also taken possession of and was sacked by the populace, and also the houses of General Farfar and many of the leading citizens. The besieged were under the sole command of the Mound Garcio del Rio, and General Paleres. Phese attempted to open a negociation. but the b seigers would promise them nothing be their lives. Ultimately however, a capital lation was agreed upon and safety of persons and property gauranteed, Acts was then issued from the city of Quitn, declaring that the authority of the President Flores had

In the province of Chimboraza a similar popular re-action had taken place, and movements of the same kind had occurred at Latacungo, where a strong Guerilla force had been raised under Darco Morales. Indeed almost the whole of the State of the Equador was in a state of insurrection against the government. So great had been the enthusiasm of the people at Qvito, that the most delicate females were seen making balls and cartridges, having first disposed of their trinkets and ornaments to purchase arms. At Guyaquil during the first six months of the present year 6,000 persons had fallen victims either to the civil war or to sickness. At Guyaquil, Rocafuerte had seized upon the frigate and sloop of war which formed the whole naval force of the Government, and had blockaded the entrance of the river. His Majesty's ship Samarang, and a French ship of war had sailed from Calao to Guyaquil to protect the foreign interests. The President Flores was in possession of the city and the surround-

A division took place during last week amongst the Weslevan Methodists at Norwich. A great many of the leaders and preachers have attached themselves to the New Connection. The cause of the separation is said to be the leaning of the Old Con-

Absolutism, (I will not call it despotism) has been substituted alike for the mild chimerical republic of 1794, and for the limited constitutional Monarchy contemplated by the victorious people of July, 1830. As respects the destruction of the Jacobins, and of the principles professed by them, there is much to be rejoiced at : but it is a pity that the very moderate liberalism and constitutionalism of the men of 1830 should have been so ill repaid and so unproductive of benefit to the country as it has been.

CIVIL WAR IN SPAIN.

VAL CARLOS, Nov. 2.

The long expected crisis in the affairs of and State. It is also said that the ministers Spain, is fast approaching. Mina, the ununcompromising here of 1810, the valiant chief of the Catalonian liberals, of 1823, the hardy adventurer of 1830, the Commander-in-Chief of the armies of Isabella, of 1834, has at length planted his standard Cambridge, has been appointed. The local in Spain, after ten years of exile-ten years of sufferings. He has entered Pampeluna, though weak in body, firm in his resolution to accomplish the object of his mission, or conquered, retire from the field of action, with unstained honour, and unblemished reputatiou. His task is difficult, his success more than doubtful. I might with safety almost say, his defeat is certain. Yet ne blame can attach to him, even on his retreat. Called in at the eleventh hour to remedy the defects of the JUSTE MILIEU Sarsfield, the vacilating Valdez, the negociating Quesada, the tyrant Rodil, he may fall, but he will not lose his noble, his well-deserved reputation. Mina cannot, he dare not hesitate; as chief of the liberals, he must conquer or succumb. His enmity must be as great against the partisans of the JUTTE MILIEU system, as against those attached to despotic principles; or in plainer language, he must be the firm opposer of the pernicious doctrine of the present rulers of Madrid, In addition, let me tell you, that at the and the decided enemy of clerical domination. I mentioned in my last that the Republican party in France, had forwarded for the use of Mina, a considerable sum of money and much winter clothing. I have not been as yet, enabled to gather any further positive intelligence, excepting that the articles and money are consigned to a mercanwill come and they must-they will learn it tile house at Pau, by a Committee formed at Paris and Lyons. I shall be on the alert. Louis Philip I am inclined to believe, is acting a double part with England, and is playing false with the Northern Powers. am positively assured, that owing to strong remonstrances the barricade Monarch pledged his Royal parole to Russia and Austria that he would not interfere in the affairs of Spain, but leave the nation the liberty of deeiding by whom it should be governed,-Notwithstanding this engagement, I am inclined to think that at the present hour, Louis Philip actually meditates crossing the frontiers. BRUSSELS .-- A discovery has recently been made here which is likely to excite no ordinary degree of interest in the literary world. M. Gasebard, the keeper of the archieves of Belgium, while looking over some old MSS. in the course of last week, found an inedited work from the pen of the Emperor Charles V. It is an account of the taking of Algiers, and is addressed by the Emperor to his sister, Marv, Queen Dowager of Hungary, and Regent-General of the Low Countries. I am informed that several of the details it gives are extremely curious. The work is to be printed forthwith, and, pursuant to the expressed intention of Charles V., copies of it will be sent to all the principal towns in Belgium. It is dated July 23, 1535. The only wonder is, that it was not published either while the puissant Monarch was in the zenith of his imperial power, or shortly after

he became a cloistered recluse. M. Dupin, the celebrated French Advocote, on opening the Session of the Court of Cassation, on Tuesday last, in Paris, concluded his address by alluding to the destruction of the two Houses of Parliament in England, and expressed his deep regret at the loss of that venerable edifice, which served as a double temple to Justice and the Laws. "There,' he said, "were collected, by an uninterrupted series of traditions, all the precedents of power and liberty. There may be said to have been breathed the history of Old England, containing sources of roof, by the side of the Parliamentary Forum, sometimes so full of storm, were seated, in all the dignity of the most profound calmness, the antique Courts of Chancerv, King's Bench, and Common Pleas; that immortal Jury, so severely rigid in protecting liberty; and, on the throne of Justice, those Magis-

SIR .- Having been informed that several persons, residing in Carbonear, have been disposed to censure me as to the manner of my giving evidence in a case between JAs. Fox of Harbour Grace, and JAMES DOYLE of Carbonear, and that I have been charged with notorious falsehood, as having given evidence to the delivery of certain goods, or refreshments, rendered by Mr Fox to the persons brought by Mr Doyle to Mr Foxe's house, at the time of the election. I affirm that I know nothing of the matter as I was at the same time at Northern Bay on the North Shore Any other particulars respecting my evidence before the Arbitrators in the above case. I am willing to give through your valuable paper, to those who censure me, if they will but lend me their namqs.

I remain, Sir Yours, &c.,

REMINISCENCES FROM THE PORTFOLIO OF A LOVER OF LITERATURE.

It may seem a matter of no extraordinary difficulty to give a plain question; and yet it is an art which it evidently requires some trouble to learn. In all half-civilized nations, the inquirer for the simple thing is met by an enigma for an answer; and, among the peasantry of Scotland and Ireland, civilized as the general communities may be, the system often seems to be studied evasive. This dialogue is the model of thousands in the sister Isle :---

" Is this the nearest road to Cork?" " Is it to Cork you are going ?"

"Yes, but my question is, as to the nearest road ?" "Why, this road is as near as that on the

other side of the hill; for neither of them is any road at all."

"Then which way ought I to go?" "Oh, that depends on your honour's own liking. Perhaps you wouldn't like to go back again ?"

"Certainly not. But, one word for all, my good fellow-do you know any thing about any kind of road here?"

"There now, if your honour had asked that before, I could have told you at once."

"Out with it then !" "Why the truth is, your honour, that I am a stranger in these parts; and the best

thing you can do is to stop till somebody | tion most." comes that knows all about the way."

come from far countries, to warn you of death. Eagan shall fall by the knee-edged and bone-cleaving sword of the ever-victorious ' Conn of the hundred battles.'

"' On your own heads may the warning alight, ye hags ! May your forebodings sink into the air, and find no answer in the mountains! May the trees bear the curse of your evil words, the poison of your tongues fall on the rocks of the valley, and your hatred ject?' be buried in the billows of the rolling sea! "'It is the will of Fate that we speak : we have spoken without haste or hire !'-Mut-

tering their spells, they vanished from before Eagan. " That night came the three to the tent of the King of Spain's son; and to him they

boded ill; and thence they came where the hosts of 'Conn of the hundred battles' lay on the field, and they roused the hero with their words:

"In thy arm be thy strength; in thy sword be thy safety; in thy face be thy foes; in thy step, thy prosperity! The pride of Ireland is against thee, in life and in motion. Be thou restless as the treacherous light, that shines in the eye of the benighted traveller !""

MAXIMS, &C. RELATING TO HEALTH.

the more a man follows nature, and is obedient to her laws, the longer he will live ; the farther he deviates from these, the shorter will be his existence."

Dr. Wainright says, "a man in perfect health ought always to rise from the table with some appetite," and that " if either the body, or the mind, be less fit for action after eating than before, that is, if the man be less fit either for labour or study, he hath exceeded in the quantity."

Dr. Arbuthnot asserts, that "all the intentions pursued by medicines may be obtained and enforced by diet." And Dr. Buchan says, that "there is no doubt but the whole constitution of body may be changed by diet."

"It may be laid down (says Dr Hufeland) as a fundamental principle, that the more compounded any kind of food is, the more difficult it will be of digestion ; and what is still worse, the more corrupt will be the

juices which are prepared from it." It is observed by an ingenious writer, that "they who least consult their appetite, who least give way to its wantonness, or voraciousness, attain generally, to years far exceeding theirs, who deny themselves nothing they can relish, and conveniently procure." And it has been remarked, in favour of temperance, that "misers, who eat and drink but little, always live long.'

Cheyne observes, that "water is the most natural and wholesome of all drink, quickens the appetite, and strengthens the diges-
