"If the London leaders," says the Journal, "really counted most upon the putting of London on the lake feature, St. Thomas will still have but one-third the distance to negotiate in order to be on the lake also. From every point of view, it is the most significant and desirable advantage that has come to St. Thomas since the advent of the Canada Southern Railway."

It was the wise forefathers of present London who refused to consider the Canadian Southern Railway, and sent it packing to St. Thomas. Anyone who will examine newspaper files will discover that relatives of the men who barred the Canada Southern from the Canadian Northern out of London

Not All So Easy. "The idea that everything for St. Thomas' advantage will come as easily as has the electrification of the London and Port Stanley road, may prompt St. Thomas to sit back and wait for the next," continues the Railway City newspaper. "But this is likely to prove a snare, since there is little else London can do for us."

St. Thomas does not have to pay one cent toward electrification. It cannot lose anything. It may gain a number of London's industries. It has the main line of the Canadian Northern Railway surveyed through the heart of the city. There is an excuse for jubilation. St. Thomas unloaded its share of the road on London years ago.

The St. Thomas Comment. The editorial referred to in full is as

ST. THOMAS ON THE LAKE. London taxpayers were surely in a spending mood yesterday when they voted \$700,000 for the electri-

fication of their dilapidated steam road to Port Stanley as well as some \$65,000 for storm sewers and a breakwater. St. Thomas can easily afford to

congratulate Londoners on their gencrosity and determination to provide rapid, convenient and clean facilities for getting to and from the lakeside, for regardless of the arguments advanced by the leaders who favored the project on account of its importance in putting London on the lake in a commercial sense, the factor that counted most in its generous support was undoubtedly the desire of an improved passenger service from London to the lakeside in the summer months. This is the feature that St. Thomas citizens will welcome, and St. Thomas will get this desired improvements without being committed to the heavy financial obligation which London assumes.

"If the London leaders really counted most upon the 'putting London on the lake' feature, St. Thomas will still have but one-third the distance to negotiate in order to be 'on the lake' also. From every point of view it is

the most significant and desirable advantage that has come to St. Thomas since the advent of the Canada Southern Railway. With the present development of hydro radials throughout this section, St. Thomas becomes a logical radial centre. Her development in this direction with the new London-Port Stanley line assured, the hydro-radial right-ofay westward to Windsor determined upon, and the Traction line extension eastward to Aylmer, a pracical certainty of the near future, will undoubtedly be rapid, and it but remains for her businessmen and civic leaders to make the most of the advantages gained and plan for the fullest development of the traffic which these diverging lines are

bound to bring to the city. "The idea that everything for St. Thomas' advantage will come as easily as has the electrification of the London and Port Stanley road, may prompt St. Thomas to sit back and wait for the next. But this is likely to prove a snare since there is little else London can do for us."

Important Suggestion Made by Assistant Solicitor of Dept. of Agriculture.

[Canadian Press.] Mohonk Lake, N. Y., Oct. 23 .- Control of the Philippines by an international council was proposed today at the Lake Mohonk conference of Friends of the Indians and other Dependent Peoples. The suggestion came from A. S. Lanier, of Richmond, Va., assistant solicitor of the United States Department of Agriculture, who served in the Philippines for several years as assistant secretary for the bureau of justice.

Mr. Lanier let it be known that he had just submitted his plan to President Wilson and to the departments of state and war. He offered it as a solution of the problem he considered not only perplexing, but menacing, and the one of all others most likely to embroil this country with Japan.

The plan provides for a council composed of members selected by the United States, England, France, Germany, Russia and Japan, and possibly other nations. This body would select a chief executive. It would be the upper legislative house of the islands with a lower house composed entirely of natives. Its creation, Mr. Lanier thinks, would do away with the necessity of keeping troops in the Philippines outside of the native forces. The session of the conference today

was devoted to the Philippines.

Figures show that the amount of grain shipped out of the three western provinces during the months of return for secret information given September and October is more than double the amount shipped last year. Conditions which prevail in other provinces are also evident in Saskatchewan, where with a crop that comoses 50 per cent of the entire western shipment the situation is reported to e favorable in the extreme.

Telegraphic reports received from orrespondents of the department throughout the province show threshing is nearly completed. From only a very few points is there any report of shortage of cars, and the condition of the labor market is also of a most encouraging nature.

New Fashions Opening Up-Great Sales Going On Every Department Humming With Busy-ness

Almost every industry, art and fashion of the world is represented here. The much greater part of our merchandise is, of course, Canadian or British manufacture (of which we are proud), which is imported under favorable tariff preference. But where we find other foreign goods better, more artistic or revealing new ideas or novelty, it is our business, acting as your agents, to bring them here for you at the lowest possible cost.

This business steers clear of all will-o'-the-wisp allurements. Our early-established system, established in the 70's at the beginning of this business, is still adhered to, which is to gather the best merchandise produced, and sell it at a moderate profit, taking back whatever the purchaser prefers not to keep. And those who deal with us know that nothing would induce us to dishonor that motto: WE ARE YOUR AGENTS.

A MYSTERY STORY OF NEW YORK

Tommy North had been looking at her headquarters. She proceeded to business as one who sees visions and hears voices.
"Why, that's the way I used to think.
That's the way I used to talk." he said.
"I didn't realize until I heard it from you, how I'd got over it. I guess I don't think that way any more. It's this town, Miss Lane. New York's a queer place. It fills up every year with young men and young girls. It makes a few, but it that first place that I was workin' alone.

"I've jest been settin' on this Hanska case, Inspector," she said. "Knew if I waited long enough, somethin' would hatch. It has, but I can't say yet whether it's a rooster or a duck."

"What have you got?" inquired Mc-Gee.

"Don't know, I tell you. Didn't I say young girls. It makes a few, but it the first place that I was workin' alone." as one who sees visions and hears voices, at once. young girls. It makes a few, but it "Don't know, breaks more. "All right," commanded Tommy North,
"fire away! I'll do anything you tell me
to and go anywhere you say." He did

The invalid on the top floor took a great deal inspector, half playfully. "I know your of her time, and her quiet motherly watch over Constance almost as much. Toward ver Constance almost as much. Constance she maintained an attitude of distant affection. With Betsy-Barbara, on the other hand, she grew familiar and big-sisterly. In spite of surface differ-ences in breeding and grammar, there was some natural bond between these two-perhaps their common taste for controlling destinies. Rosalie never let her affection film the main chance, how-ever. In their chats over the muslin and

the tea cups, she drew Betsy-Barbara, through subtle attack and retreat, to full discussion of the Hanska case. Yet so careful was her method, that Betsy-Barbara never dreamed she had broken any confidences. As they pulled bastings, Betsy-Barbara slipped in a remark which she tried art-fully to conceal in general chatter. "Mr. North tells me," said she, "that ne is going to start in business for him-

Betsy-Barbara stared and flushed.

"Oh! Did you see it?"
"Now, my dear. I think it was brave an' wouldn't have the decency to do. No woman's a real lady when she's too much of a lady. Yes-I heard him stumble, an' came out an' looked."
"I-I just opened his dooor and pushed him in," said Betsy-Barbara, blushing

"An' quite enough-I saw that, too." Rosalie pulled bastings for a quarter of a minute more. Then she added: "I sup-pose you called him down all he needed when you took that walk this morning? "Oh, that wasn't the reason!" cried Betsy-Barbara, driven back on her mai-den defences. "It wasn't that. I really didn't want to see him. But he had nething new to tell me about-the case or thought he had."
"Um-hum!" responded Rosalie. "Well,

I've always wondered if that young man didn't know a great deal more than he "Oh, indeed, I think he told all he remembered!" replied Betsy-Barbara with some warmth. "This was just something m. The strikers were parading when the attacks were made, the appearance of the deputies escorting men to work apparently arousing their wrath Several officers fired revolvers in the air, and a general fight ensued. Several of the strikers had knives, and the deputies weilded billies.

Cures Diseases Of the Kidneys

And is Depended On to Right Stomach and Liver Disorders.

Once Dr. Chase's Kidney-Liver Pills are introduced into the family and their efficiency becomes known they are usually found too valuable to do without. For everyday ills arising from liver and bowel disorders they bring relief promptly, and when comolicated diseases of the kidneys and liver develop they often prove a successful cure after doctors have failed. As an illustration, you may read the following, which was received a few days ago: Mrs. John Wright, 53 McGee street.

EAST MIDDLESEX.

Our Conservative contemporaries are industriously trying to minimize the significance of the East Middlesex

The Toronto News and the London Free Press ascribe the fall in the Conservative majority to dissatisfaction with Mr. Glass in his own party. It is rather hard on Mr. Glass to burden his budding public career with complaints of this kind. However, they are not likely to cause him to efface himself at the general election.

The explanation is that many Conservative farmers were not impressed by the sentimental appeals on the navy question. The visiting cabinet ministers and their satellites dwelt almost exclusively on this topic. The Conservative vote fell in all four townships, heavily in three of them. This could not have occurred if a strong feeling had been aroused by the frustration of the policy of con-

It is idle to blame Mr. Glass for the falling off in the Conservative majority. No other candidate of the party would have polled so large a vote in the suburban divisions. The fact is that the Government cannot sweep Ontario on the naval question as on reciprocity. And it could not sweep Ontario again on reciprocity, as the advantage of the American market to the farmers is now being demonstrated, and Conservatives themselves are now urging, a free exchange in wheat, flour and other products.

A SHAKESPEARE FESTIVAL.

The visit of Mr. F. R. Benson and his company of Stratford Players is an event of importance in this city. An actor and manager so much in demand in his own country must have found it difficult to get away for once to see these distant parts.

Mr. Benson has had a distinguished career in more ways than one. At Ox ford University he was the inter-university champion three-miler as well as a college actor. One thing, he says, he loves Shakespeare for is his Greek trait of physical and spiritual balance the passion for "the fair mind in the fair body." He takes a lively interest also in craftsmanship, the doing side of life, poetry in its original sense of making, which has an affinity closer than appears at first sight to the ac tive, concrete drama of Shakespeare. An older brother of the actor, Mr. W. A. S. Benson, has won high distinction in the world of art as one of the pioneers in the revival of English in-

On leaving Oxford, Mr. Benson took to the professional stage. One would municipal problems. He was placed begin to gather, like to have seen him as Romeo when he was but 24, though indeed at 53 years he still looks the athlete, trained to the minute, and equal to any action of youth. He did a great deal to revive interest in the older English drama generally as well as to sustain the parts of Shakespeare. Perhaps no actor has achieved such success as he in training young actors and actresses, and since Irving he has had the most considerable influence on the contemporary stage. His own acting has been most brilliant, according to the critics, in Hamlet and Petruchio. He should be also an extremely interest. ing Jaques or Malvolio

Since 1888, Mr. Benson has had the management of the Shakespearean Festival in Stratford-upon-Avon. Many London citizens must have seen the Memorial Building, which was erected in 1877, and some may have seen the Stratford Players in the annual performances of April or August. In August particularly the crowds of American pilgrims have been too large for Stratford to accommodate. It is only a little town, half the size of Stratford, Ontario. Mr. Benson simply had to bring his players to America to give the English-speaking race a chance of seeing imperial Shakespeare at the best

THE NAVAL HOLIDAY.

Mr. Churchill's suggestion to Germany to take a year's holiday in the matter of building warships does not so far appear to meet with any great favor in that country. Even the German Liberal papers are inclined to be doubtful. We are not surprised at the apparent sentiment of these people. Mr. Churchill's statement has a string attached to it. His proposition is that the two countries should stop shipbuilding for a year, "apart from the Canadian ships or their equivalent, apart from anything that may be re-

quired by new developments." If Germany accepted this offer, it would mean that she would cease her naval preparations entirely, while parts of the British Empire outside of the

there is the clause as to "new develmany, this looks too much like trickin good faith. But if Germany had tumbers, colonies and overseas dominions with the right and the ability to construct a fleet of Dreadnoughts, no similar proposition from her would be entertained for a moment by Britain.

One of the greatest obstacles in the way of attaining more amicable relations between two countries like Britain and Germany is the underlying current of suspicion entertained by each against the other. That suspicion s constantly being stimulated by blatant jingoes, irresponsible journals and interested armament makers. International antagonisms are more or less strongly entrenched in the minds of the ignorant and uneducated, and are not absent from the minds of many who ought to know better. The states men of the great powers, in their laudable desire to maintain peace and goodwill towards each other, have to bear this in mind, and avoid statements and propositions which are liable to

be misconstrued. A cessation of warship building by Britain and Germany would be a good thing, not only for a year, but for a much longer period. But the situation s complicated to some extent by the Canadian Government's course. New Zealand and Australia have incurred great expense in their naval activities, and no doubt they would have been willing to take a year's rest. But the holiday would completely discredit the emergency plea upon which the Borden Government has based its makeshift policy.

RUSHING THE GROWLER

Have you noticed any million-dollar industries clamoring to get into the city as a result of electrification? Neither have we.

We may suffer a bad play now and then, but the modern "novelty" song is getting unbearable. With the passing of the "ulcerated" variety has come worse. Have ready a sufficient number of clean pots of the five and six-inch These are large enough for any of the plants mentioned, except that a seven or eight inch pot may be necessary for the sweet-scented geraniums and abutilons. It is a mistake to use larger pots; because as soil becomes impoverished in the pots in midwinter or toward spring liquid manure may be applied. Experience proves that more blooms are obtained from plants in small and medium sized pots than from those in larger receptacles.

Soda Biscuit .- Mix together three pints of flour and one-half of a teaspoonful of salt, then rub in one ablespoonful of butter. Into one pint of thick sour milk stir one teaspoonful of baking soda which has been dissolved in two teaspoonfuls of boiling water. Add this gradually but quickly to the dry mixture, stirring and cutting it to a soft dough. Turn out on a floured board, knead just enough to form into a smooth mass, roll out an inch thick, cut into small biscuit and bake in a quick oven.

Mashed Squash.—Cut a small squash n pieces, peel and remove all the spongy part, place in saucepan with enough water to cover, add a teaspoonful of salt, then boil for 45 minutes, or until soft. Drain on a sieve, press them through potato masher into a saucepan, add two tablespoons butter, season with scant teaspoon salt and half-teaspoon pepper, stir on fire for wo minutes, remove and serve.

Stuffed Onions Creamed .- Boil eight arge onions gently until quite tender, but not broken. Drain, and when cold, carefully remove the hearts or centres. Chop three of these hearts fine As the cat's head flew off, there rose and mix with them a cupful of minced up the loveliest Princess you ever set ham and season to taste. Chicago, Oct. 23 .- At the club office here today it was said that no trade inolving Bresnahan, or anyone else in fact, was being considered. Rumors of the deal did not hint at what players or other considerations the Chicago club was to receive for the catcher.

Bresnahan was signed as second atcher last winter, but took part in comparatively few games. His salary, reported to be \$10,000 annually, is conreported to be \$10,000 annually, is considered by the club, it is said, too high for the services he rendered the team. Reports last summer of discord on the team when it was suffering from a "losing streak" included Bresnahan as leader of a small faction opposing Manager Evers, but as the season drew to a close relations between the two seemed friendly.

OAK HALL W. J. CURRAN.

WILL BE ABOLISHED

New York, Oct. 23 .- The "Cincinnati base hit' is doomed. The scoring rule framed last winter to legalize this play will be wiped out in December. A new rules committee, to be made up of two club owners, two active team managers, and two baseball writers, will revise the entire playing code. The absurdity of the "Cincinnati base hit" never was more clearly illustrated than in the final game of the world's series. With Eddie Murphy, of the Athletics, on third, Frank Baker rolled a grounder along the first base line. Merkle, the Giants' first baseman, picked up the ball and prepared to tag Baker before throwing to the plate to get Murphy. But Baker and Murphy both stopped running, so that Merkle, bewildered, didn't know what play to make. He finally threw to the plate, but the ball arrived in McLean's hands too late to head off a run. Baker mean while dashed to first base in safety Under the obnoxious scoring rule Baker received credit for a base hit-a Cincinnati base hit, when, as a mat ter of common sense, it should have been scored a "fielder's choice." attempt to give a Datsman hits unde such ridiculous conditions is decided! unfair to pitchers, and the rule has been condemned by practically all the managers and scorers.

This pleasant-tasting food-tonic gives tone and vigor to the whole system, and so strengthens lungs and bronchial tubes that they readily throw off the colds which would otherwise take hold of you.

Restores Health

By virtue of its remarkable combination of curative and nutritive properties, Na-Dru-Co Tasteless Cod Liver Oil is one of the very best remedies known for chronio coughs and colds, bronchitis, asthma and catarrh. It is also an excellent reconstructive tonic after fevers, and in diseases such as scrofula and rickets, which are due to constitutional weakness.

EVIDENCE SHOWS SERIOUS CHARGES BASED ON GOSSIP

No Foundation For Many Stories About Kingston Penitentiary Irregularities.

NO CRUELTY PRACTICED

Lash Is Only Used When Judge Has Ordered It in Sen-

tencing.

[Canadian Press.] Kingston Oct 24 - The royal commission appointed to investigate conditions prevailing at Kingston Penitentlary and to probe serious charges made against the administration of Deputy Warden O'Leary, Surgeon Dr. Phelan and Hospital Overseer Wilson, finished the seventh day for taking evidence yesterday afternoon.

So far the bulk of the evidence has been of a trivial character, or idle gossip, which fails to withstand the most perfunctory cross-examination. From the mass of evidence produced and carefully sifted, the most serious charge against Deputy Warden O'Leary that would seem to require better explanation is the apparent discrimina-tion exercised in favor of Roman Catholic guards, who seemingly are given 90 per cent. of the preferred positions, although numerically they are Is Away Sometimes.

Against Dr. Phelan-little of portance has been established, save that he does not spend a great deal o time in the institution, and has collected, fees from guards undergoing examination at his hands when applicants for positions. He is paid \$2,500 per year, and is supposed to give all his time to his prison duties.

The charges against Hospital Overseer Wilson was taken up yesterday and consisted largely of accusations by two of the guards that the overseer did not respond to "emergency calls' in the night when the patients in the hospital were suffering great pain. Rather convincing evidence was put in by Dr. Phelan to offset this charge. In one case the patient was admittedly dying from diabetes, and nothing could be done for him. In the other case the complaint was a malinger, who was feigning illness to get into the hospital and avoid punishment for a breach of prison discipline.

Cruelty Charges. In response to an editorial demand in a local paper that the commission "turn on the light" to clear up a charge given publicity in a Toronto paper that the triangle, the ice-cold tub and high-pressure hose" were used in punishing prisoners, the commission went after evidence along this line yester-

It was impossible to get the authority for the story, and the evidence Dr. Platt, the former warden, was to the effect that the hose was resorted to only once about eight years ago on the suggestion of the inspector, but had never been used since, that "the lash and triangle" were only used to carry out sentences specifically imposed by judges and owing to the lenient way in which the cat was ad-ministered was a farcical punishment. As to the tubbing, convicts who would not voluntarily take a bath had to be

forcibly lathed for sanitary reasons. The fact that the commission while taking up the charges are also looking closely into prison system and getting practical suggestions for radical reform paves the way for a great deal of irrelevant evidence. The wide latitude allowed in cross-examination is also responsible for consuming of much valuable time.

Baseball Players' Fraternity Lays Down Some Stiff Rules

Major League Players Will Not Sign Agreements or Contracts With Their Clubs Until After Reforms Are Put Into Effect.

Chicago, Ill., Oct. 24.—Statements were made here yesterday that major league baseball players who are members of the Players' Fraternity have signed an

agreement not to close contracts for the season of 1914 until after the annual meetings of the club owners, at which

meetings of the club owners, at which certain reforms drawn by the players will be submitted.

What purports to be a list of twenty demands to be presented by the players to the American owners in Chicago on to the American League owners in Chicago on No. 6, and the National League owners in New York in December, was received in Chicago today.

The more important demands in the list are:

When a player receives ten days' notice of unconditional releage he shall be

ceive ten days' notice before they can Players shall be transferred subject to all the terms of their contracts.

No player shall be discriminated against because of his connection with the fraternity.

Before a player shall be released outright, or under an optional agreement, to
a team of lower classification, walvers

shall be secured from all teams in hi classification, and then from all teams of any, between that classification and the one to which he goes, according to their priority in grade. That when a player signs a contract for a certain salary he shall receive that salary until the end of his contract. whether or not he be relegated to the

Annual Festival of

Large Audience Attends Despite the Inclemency of the Weather.

The annual festival entertainment of St. Luke's Church, Broughdale, last evening, notwithstanding the violent storm and downpour of rain, was held before a full house and was a pronounced success. The chair was occupied by Ven. Archdeacon Richardson, who called attention to the fact that St. Luke's was commemorating now the life and work of its patron saint, also marking the fulfillment of the first seven years of its interesting his-tory, and the final completion of the basement interior. He introduced the Milligan family, consisting of Mr. and Mrs. Grant Milligan and their two sons, who rendered a fine selection upon the bass viol, guitar and violin, and received an enthusiastic encore. Their two sons, Grant and Harry later in the evening gave each an exercise upon the violin, and delighted everyone by their clever execution. They are both lads of high promise and received words of praise from every quarter. Miss Lily Woolley sang beau-tifully two bright songs. Miss Edna Smith, an elocutionist of much ability.

No. 26

brilliant young friend. Thomas Dreier, editor of "Associated Advertising," the official organ of the Associated Advertising Clubs of America, wrote this once upon a time under the caption, "THE WINE

"Get drunk, man, get drunk. Fire your veins with the wine of work. Become drunken with the desire to accompish, to do, to achieve. All divine messages have come from men drunk with divinity. All great work is accomplished by men drunk with the wine of the desire to labor. Desire is the grape from which the wine of work is pressed. You get what you desire-and in just the measure of your desire. Produce great desires-the rest follows."

Some of us have desires all out of proportion to our willingness to work for their fulfillment. But no man with a sound mind in a sound body and a real desire to work need go without food and shelter and raiment in these days of big opportunities for the willing worker.

Judge Walter Malone, in his able reply to Ingalls' famous poem on "Opportunity," wrote:

"They do me wrong who say I come no When once I knock and fail to find you

For every day I stand outside your door And bld you wake and rise to fight and

Every day, in the Classified columns, opportunities are presented for the consideration of those who are willing to heed the call. All sorts of employers are constantly advertising for all sorts of employees. Capital is seeking labor just as assiduously as labor is seeking fruitful fields

I see hundreds of able-bodied men idly sunning themselves every day, while at home, perhaps, wives and children crave the bare necessities of life. These men say they can't get work. The truth is that they haven't taken enough of intoxicated. The man whose veins are fired with the wine of work doesn't make excuses. He gets

There are opportunities for every man, every day, in the Classifled columns of this newspaper.

DEMAND INTEREST ON

Manufacturers Want Railway Commission To Make Roads Pay.

Ottawa, Oct. 23.-Representatives of the Canadian Manufacturers Association and boards of trade asked the railway commission today for an order to compel railway companies in Canada to pay interest on the amount of claims not settled within thirty

Assistant Chief Commissioner Darcy Scott said the board had no jurisdiction to issue such an order, and that the dispute was one to be settled in the court.

Mr. T. Marshall, of Toronto Board Trade, told the commission that some claims registered as far back as 1905 and 1906 have not yet been settled. He said that if freight agents would use more common sense and less red tape, many claims would be more quickly settled, and there would be less friction between shippers and railway companies.

LIVE STOCK. TORONTO, Oct. 24.-Union Stockyards The run here yesterday totalled 197 cars, containing 4,385 cattle, 328 calves, 1,751 sheep and lambs, and 1,204 hogs.

As is generally the case on the closing day the quality of cattle offering was inferior to that of the former days, and as a result the prices were slightly below those which have been quoted durow those which have been quoted dur-ng the week. The better grades of cattle, however, remained firm and were a very good sale at firm prices. A there was a fair amount of good cattl offering, the draggy tendency which is always felt, when the leftovers are sell always felt, when the lettove's are sell-ing, was counteracted, and the market presented a fairly brisk tone during the morning. The receipts during the week, however, have been large, and coupled with the small holiday trade on Mon-day, this left a large number of cattle to be disposed of. Another impetus was given to the trade for stockers for the United States market today and all offerings were easily and quickly sold at good prices. Sheep and lambs remained firm at yesterday's increased prices. Hogs also closed firm, Wednesday's quotations

Owing to the large shipments and the noliday on Monday the market this week holiday on Monday the market this week has not been as active as it might other-wise have been. With the exception of Tuesday, when the smallest run of the week was recorded, trade has not been unusually brisk, though on the whole, there was a fair demand for all classes of better cattle. The scarcity of the better grades of cattle on the local market has become more and more evident as the weeks pass by, and the producers that can send a shipment of good cattle. that can send a shipment of good cattle are assured of receiving high prices for their stock. The hog market is again reviving and it is expected that within two weeks, the high prices of a month ago will be in vogue on this market.

Nearly three hundred thousand "Happy Thoughts" are in use in Canada.

The "Happy Thought" weighs more than any other range and is more durable No "Happy Thought" has ever failed to please the user.

The "Happy Thought" is so well built it uses less coal than any other.

The patented features of the "Happy Thought" can be found nowhere else. They include the pyramid oven, illuminated oven, oven damper, reservoir damper, deflector shelf, etc.

The "Happy Thought" has the deepest and most economical fire box, the most scientifically-arranged flues, properly-proportioned ovens, and largest top cooking surface.

The "Happy Thought" waterfront is the most powerful known. The reservoir will BOIL water. The oven cooks equally in every part, whether on shelf or oven bottom, or any corner or centre.

The "Happy Thought" has the convenience of register cover, nested cover, simmering cover, oven thermometer, extra large closet and shelf.

The "Happy Thought" dampers give you absolute control over the fire, which may with ease be retained for 36 hours.

Do you want guarantees? Nearly three hundred thousand users praise the 'Happy Thought." We guarantee it. The makers guarantee it, and give you their word that nothing better can be made.

FINANCIAL AND COMMERCIAL

THE LOCAL MARKET

Incessant rains, causing bad roads, ave made the local market very small this week. Trading has remained slow in consequence, with all prices steady. The demand in all lines is small, with no indication of a change.

Hay, usually the best selling commodity on Friday, brought no vendors to the market this morning. Prices will consequently remain steady until Saturday. As is usual on Friday, no vegetables were offered from the wagons. Potatoes are selling slowly at 60c per bushel retail, 80c wholesale, and 90c retail per bag. Apples are the only fruit offered, at 50c to 80c.

Butter is somewhat higher in price.

WOMAN ADMITS SHE TIRED OF HUSBAND

Hamilton Man Is Suing for Alienation of Wife's Affections,

Hamilton, Oct. 24. - When the action taken by J. T. Thompson, an elder in the Latter Day Saints' Church, against Elder Wilson Bannister, whom he accused of alienating his wife's affections, counsel for Banuister immediately moved for a non-suit. The judge, however, ordered the trial

to proceed. The first witness called by the defence was Mrs. Thompson, who testified as to her husband's jealous character and the way he neglected her while he was travelling for the International Harvester Company. She said he threatened many times to suicide, and she became so tired of the way he treated her that she offered to help him. She said she had only kissed Elder Bannister once, and that other ever had improper relations. The case was still in progress when court adjourned.

BUSY WINTER FOR

Many Months' Work On Preparing of Plans and Speeifi-

cations Ahead. BIGGER STAFF IS NEEDED

Expected That Spring Will See Good Roads Program In Full Swing.

From now on the "busy day" sign is going to be tacked over the office of the city engineering department. The passage of the storm sewer bylaw on Wednesday means a whole winter's engineering work on the part of the engineering staff pre. paring the contract forms, the specifications ,and the details

for the construction of the new drainage system that is to possible Lonmake don's good road development. In addition to the storm sewer proposition, the preparation for the West London

breakwater and for the miles of pavements that are to be laid next year vill occupy the attention of the engineering staff. Besides these extra. ordinary undertakings, the routine work is now heavier than it has been for years. During the past season between 80 and 90 local improvements have been put through-sewers, sidewalks, curbs and gutters, pavements and macadamizing. Every one of these has to be gone over by the department, the exact proportion of cost to city and individual ratepayers figured out, and the reports sent to the city treasurer and to the assessment department for entry on the city books and the tax rolls. This one feature entails an immense amount of work. the addition of the extraorwithout

dinary works.

Drainage Assistant Needed. A drainage expert will have to be eral draughtsmen as assistants. The amount of work to be done means a considerably augmented staff in the department. It is planned to have the details and contracts ready so that work can be started immediately spring opens, as the idea will be to prevent any delay in the good roads system at all.

City Engineer W. N. Ashplant conemplates having \$150,000 worth of the storm sewers completed by next fall, as well as a considerable section of paving accomplished. The three main arteries of South London-Wortley road, Wharncliffe road and Ridout street will be the first of the payements to go in. These will be completed by fall, he expects.

Some Double-Ttracking. When the pavements go down con. siderable double-tracking of the street railway will also go with them. Dundas street east-from the fair grounds to the new factory at the interswitching-is to be paved and doubletracked. Richmond street, from the G. T. R. tracks to Bathurst street, will crossing for street cars. York street louble-tracking will also go down, as well as other sections in the where it is needed. Bathurst street, in front of the present M. C. R. ter. minal, will be paved, as well as other cross streets in the down-town sec-

A Year of Digging. "Once we get started we will hav the city in the air," said City Engineer W. N Ashplant, with a smile morning. "We expect to get right t work in the spring, and if we do the ratepaytrs will just have to sit tight for twelve months while we are put ting our trenches in. Once that is done, however, we can get ahead with pavements. Eighteen months from now we can start in on the bigges paving proposition London ever had. Ashplant declared that the work would be let in large contracts only. "If we attempt to let the work in small sections, we will be ten years getting the sewers down," he declared. "We will have to let them in \$4,000 and \$50,000 lots I expect that we can get about \$150,000 worth in by the end

of next year. "Besides our storm sewers we will have to get our sanitary sewer system in hand this winth. The construction of the big trunk line down Egerton street and the disposal plant at the end of that street will have to go down. This will be done on the orders of the provincial board of health and I will have to have the material ready for the board to pass on this

Saving of \$35,000. "There will be a saving of \$35,000 according to Engineer Chipman's figares, in the proposed line down Egerton street. I think that we can save about \$40,000 on this proposition. By putting the two sewers down together we will have only the material to pay for, the same excavation doing for

booth lines.' The amendment of the original Chipman plans to allow of the construction of this sewer down Egerton street was made on the recommendation of Engineer Ashplant and was especially designed to relieve the sewer congestion in the east end of the city, as well as provide for a better outlet for storm water,

ART AND LIFE Saturday Will Be a Great \$15 Day

The best and largest makers naturally come here first with their showings, for "real" orders, and not newspaper bombast, count with them. And from the showing of a dozen of the leaders we've chosen this great range of popular-priced garments. Better than we've ever done in the past, and better than any similarly-priced garments shown in Western Ontario-that we know and can prove. If you belong to ever-increasing "show me" class of buyers, we'll welcome you on Saturday.

The Overcoats at \$15.00

Every popular fabric, including chinchillas, brushed cloths, kerseys, cheviots, beavers and fancy-backed tweed coatings, in new and snappy shades of nut brown, true blue, tan and gray, besides staple blacks and Oxfords; plain colors and swagger new patterns in checks, plaids and stripes.

The styles include the snappy "Varsity," a shawl-collar coat in 46 and 50 inch lengths, with belted back, some with the new pleat in centre seams. The "Standard," a splendid Chesterfield model. The King George, a convertible collar model, in both single and double breasted; and many varieties of these styles.

The tailoring is worthy in every way, the fitting qualities are up to the "Young" standard, which means perfection.

The Suits at \$15.00

Smartness is the keynote of this range, for even in the more staple models we've got a cleverness that's altogether lacking in most of the garments you'll find at this price. You'll find that smartness not alone in the cut and hang of the garments, but in the fabrics, designs and shades, which include the new pencil stripes, pin checks and neat diagonal effects, snappy Scotch tweed effects, and handsome blue serges complete this most comprehensive showing.

We show new Soft Roll English Coats and Semi-English Coats, as well as the newest and best of the more conservative styles. Trousers are peg top, standard or English, and can be had with cuffs in all lines. High or medium cut Vests as you desire. Clever tailoring distinguishes the range throughout

Society Brand, the "Triple Alliance" Clothes American Styles, Canadian Make, British Fabrics

To C. W. Bell, witness said when they were living in Buffalo his frequenting poolrooms caused differences with his wife, but not sufficient to lead to a separation. His wife had gone berry-picking to help support the family, but against his wishes. He struck his wife once when she called him a "little mutt," "a darned fool," and "a darned liar."

Mr. Justice Middleton at this point adjourned the case until Friday.

R. E. TRUAX-AND W. D. CARGILL TO RUN IN S. BRUCE

A Large Audience at Walkerton Nomination Meeting Heard Rousing Political Discussion.

HUGH GUTHRIE SPOKE

Criticizes Government Roundly For Its Failure To Take Up Important Matters.

[Special to The Advertiser.] Walkerton, Oct. 23,-Reuben

Truax, of Walkerton, Liberal, and W. D. Cargill were formally nominated today as the candidates for election as the representative of South Bruce in the House of Commons, on Thursday, Oct. 30. No other names were presented to Mr. F. W. Tippert, the returning officer.

The nomination meeting was attended by a surprisingly large number of electors, when the bad weather is taken into consideration. The audience comfortably filled the town hall, and it heard a splendid debate upon the political issues of the day between Hon. Arthur Meighen, the solicitorof Canada, and Mr. Hugh Guthrie. Liberal member for South Wellington,

Charges Neglect. In the discussion by Mr. Guthrie and Mr. Meighen the former charged the Government with neglecting its duty in failing to take steps to prosecute the trusts, and combines. It was plainly time to do something to stop the ever-increasing cost of living. He made it clear that the position of the Liberal party in the House of Commons on the highways aid bill had been one of attempting to secure for each province its proper share of the grant on the basis of population, and putting a check to any effort on the part of the Government to disburse the money where the Conservative inter-

ests demanded it. people decide on the matter Mr. Borden was violating his own word given terminal elevators that would have at the time the Dreadnought policy relieved effectively the wheat congeswas announced, that if the bill was rejected he would appeal to the coun-

Mr. Meighen, who preceded Mr. Guthrie, said it was an undeniable fact that the tide which turned two years ago had been increasing in volume and intensity, and today the Government of Mr. Borden was stronger in public confidence than it was two years back. Immediately on taking office the Government had because Sir Wilfrid Laurier and the

pire and refuse to bear a part of the burden which is the common burden of all."

Control of Navy.

The common control of the navy was essential to the proper discharge of its duty. Was Canadian autonomy then threatened because it was proposed to send their ships to the imperial navy? Could not Canada do in that as in other matters as she chose without Canadian autonomy being taken away?

Discussing the resolution of 1909, Mr. Meighen explained that it was felt a serious condition existed with regard to the metherland at that time, and both parties sacrificed a little to come on common ground. Stated or periodic contributions were not desired, but if an emergency demanded it, it was the duty of Canada at any time to do what she thought right. The Laurier policy of 1910 contained in no particular the principles laid down by the 1907 conference, and unless common control of the navy was secured anything they did would not add to the strength of the fleet. Liberals Did Much.

Mr. Guthrie was not going to let Mr. Meighen claim credit on behalf On the navy question Mr. Guthrie of the Borden Government for all the convincingly stated the Liberal posi-tion, showing that the Liberal policy pointed out that Hon. Shakespeare Comedy Presented by Noted Players at Grand Thursday Night.

One would almost forget that they are It is all so natural and untheatrical that one is transported with the Stratford-on-Avon players back to old Padua across the centuries, and only the falling of the curtain, the rounds of repeated applause, and the flutter of programs between scenes, recalls one from that noble and picturesque Italian town. It was a thoroughly enthusiastic and fairly large audience that greeted "The Taming of the Shrew" at the Grand on

Thursday night. Pre-eminently actors who have little more to learn are F. R. Benson and Miss Dorothy Green. It is difficult to criticize Mr. Benson, A Grecian painted a bunch of grapes, so it is said, that the birds pecked at it. A friendly rival then outdid him by painting a curtain so realistic tnat the first artist asked him to draw it aside and exhibit the picture underneath. If the purpose of dramatic art is to approximate as closely as possible to make the spectators feel that it is real life they are looking upon, then Mr. Benson is an artist of the first rank. The unaffected way in which he impersonates the mad Petruchio leads one to believe that he has really come all the way from Verona, a suitor for the hand the tempestuous Katharina. This good-humored, impetuous, yet tactful gentleman, carries everything before him, Katharina, the other characters, and the audience that so loudly applauds him. Miss Green, playing the difficult part of Katharina, is an actress of marvellous resource, power and versatility. Murray Carrington, as Lucentio, is another actor whose work leaves little room for im-

provement. The work of the entire company is remarkably even and excellent throughout. Miss Marion Foreman, who appears in the last scene as the buxom widow whom Hortensio has married, in addition to being a very fair actress, has a voice of wonderful beauty and musical quality. Henry Caine, as Grumio, Petruchio's chief servant, is delightfully original and animated. Miss Ethel McDowell, as Bianca, the younger daughter of old Baptista, is satisfactory, to say the least. In her roles in the other plays, one may reasonably expect very fine work from

Charles Warburton, as Tranio, and Frank Cochrane, as Biondello, deserve favorable mention, as do all the other members of the company with few if any exceptions. Edward Warburton, as Baptista; William Calvert, as Vincentio; James Stanners, as Hortensio; Alfred Harris, as Gremio; John Maclean, as the pedant set up to impersonate Vincentio; James Magleen, as the poor, befuddled tailor, and Miss Rosa Burgess, as Curtis, all are very good indeed. Even the cook, Walter, Nathaniel and Sugar Sop, characters played respectively by Manship, Leonard Parrish, Darby Foster and Frank Matthews, should not be overlooked, so capably do they play their

minor parts. Tonight Mr. Benson will be seen as 'King Henry the Fourth.'

Just Apply This Paste And the Hairs Vanish

[Beauty Notes.]

It is no longer necessary for a woman to go through life with a face disfigured by a fuzzy growth, for if she will apply a plain delatone paste to the objectionable hairs for two minutes, then rub it off, every trace of hair will vanish. To make the paste, mix some water with powdered delatone. After the paste is removed, the skin should be washed to free it from the remaining delatone. Better results are obtained if the delatone is purchased in an original package.

SHAKESPEARE'S GENIUS

Noted English Actor Lectures To Students of Western University.

philosophy of balance, Shakespeare as the great exponent and shining light of that philosophy, was set forth by Mr. F. R. Benson, of the Stratford-on-Avon Players, in an intensely interesting lecture an audience that crowded the convocation hall of the Western University far beyond its capacity on Thursday afternoon. Shakespeare was held to be an exponent of the primitive, and of simplicity, and yet his teachings were shown to harmonize with the advanced thought of the present day. The seer and the prophet of the English race, Mr. Benson called him. One of the saviors of the race, his

message was the love and wisdom of mother earth, the myriad secuties and voices of nature, the love of the trees Mr. Benson, and on the platform were and birds and flowers. With this he incorporated the romance of knightly past. He was a man with a trained body, with something of book-learning, which he did not condemn, out lamented his lack of a greater

share of it. Merriment Vanishes.

The loss of the song of labor, as a result of industrial development, was resulting today, said Mr. Benson, in the English becoming no longer a merry people. "We over in England," he said, "often mourn that the chant the song of the seafaring man, the song of the loom, the song of the hammer-man in the shipyard, is no longer heard. Labor has lost its song and instead we have the dolefulness of Hood's 'Song of the Shirt.' Herein lies a grave danger. If the English race has lost the use of its hand, how can it govern 350,000,000 native peoples, who have preserved the use of their hand, who are still artists and craftsmen? I want to lay stress on the im portance of the call of the artist." As a bright contrast to the depressing influence of modern industrialism on art, Mr. Benson pictured the imperialization of humanity, the realization of the poet's dream, chiefly to be brought about through the imperializing and fraternalizing influences and tendencies of the English language. "What is the story of evolution in man?" asked Mr. Benson. "Whether it is a myth or a fact, think of the heroism of the ape that first stood upright, then climbed and surveyed the rest of creation over which it is the destiny of man to rule. Think of the heroism of the pioneer. Despite sacrifice, Prometheus found the fire,

and Hope came from Pandora's box. Evolution has fought its way through the ages. The Artist's Plea. "Today the artist pleads for freedom of expression for the individual. Always the pendulum has swung between the commonweal and the freedom of the individual. Shakespeare held to a middle position. It is an ideal state in which the yoke of law is as nearly akin as possible to freedom, to the liberty of the individual. In the age of Pericles, the Grecian state approximated to this. Let us look forward to a greater empire than has been yet, an empire that you and I will help to found, built upon a sense of truth and justice and beauty, an empire of all who speak the English tongue, the language of Shakespeare.
