Fodder Corn and Turnips. J.
A. Duncan.

Business is Good

Vern Willis sells a load of wheat,
And all the world grows fair and
sweet;

He hums a couple of cheerful tunes,
And pays S. Weaver for his prunes.

S. Weaver, who has had the blues,
Now buys his wife a pair of shoes.

That ten the Shoeman thinks God-
sent,
And runs and pays it on the rent.

Next day the Rent Man hands the
bill
To Doctor Gillrie for a pill.

And Doctor Gillrie tells his Frau
That business is improving now.

And cheers her up and says: "My
dear,
You've been quite feeble for a year.

I think you need some country air,
You better spend a week out there.

And in a couple of days the dame
Is boarding at the Willis "home".

She pays her board to farmer Vern,
Who takes the bill and says, "be darn"

Here's something that can't be beat,
This bill's the one I got for wheat.

He hums a couple of cheerful tunes,
And goes and buys a lot more
prunes.

A Canadian School of Missions

The Canadian School of Missions
is a new enterprise that is conducted
in Toronto as a co-operative effort of
the Anglican, Congregational, Meth-
odist and Presbyterian Churches.
The Foreign Mission Boards of these
denominations have organized the
school as an agency for the special-
ized training of missionaries and
missionary candidates, working in
co-operation with theological semin-
aries or universities having theologi-
cal departments. Instruction is given
at a minimum of cost, under a director
Rev. J. Lovell Murry, D. D.

Appreciating Grandfather and Grandmother

Paper given by Mrs. Walker Drum-
mond at October Meeting of the
Women's Institute.

This subject is a very vital one in
these times. Then to, it is appropri-
ate for this meeting in that it pre-
cedes "Grandmother's Day", and I
trust we shall all show our apprecia-
tion that day by coming out in full
force to their meeting. Since the
Women's Institute seeks always to
uphold and promote the welfare of
the community, from the youngest
to the eldest, it is fitting that we
should take time to consider my sub-
ject in this too fast an age.

Appreciate means to value or know
the worth of. Think then of the
value or worth of grandparents. Are
we not and have we not just what
they have made us, or made for us?
We go on where they left off, and
the next generation will go from
where we leave off. Did you ever
think it would be that much easier
or harder for your child to do, or not
to do, just because you tried and
won, or failed. Our grandparents
have sown in many ways, and we
reap of their labors. They chopped
the trees to make homes and clear
the fields, built roads and formed
governments, etc. Surely then we
owe them a debt not easily paid.

Yet there is a lack of appreciation
especially among our young people,
and what is the reason? Ours is a
young country. We are continually
looking forward; we live more for
today and tomorrow—very little in
the past. Young men and women
have the opportunities and hold the
positions of trust in our land. So
noticeable was this that an eminent
statesman from England while visit-
ing here commented upon it through
the newspaper. In the old land it
is the very opposite, the white hairs
are honored.

However we do like to hear of re-
spect, and we should show respect,
for where would we be if some one
had not shown care and kindness to-
ward us. The very least we can do
is to try and return what was done
for us. It is a very foolish person
who says we do not owe a debt to
the past, for we are only one link in
the great chain of life. There is
real splendid genius in the older
person. Even Marconi says he
would rather have been able to do
some of the things of the past, as
discovering the letters, than to do
what he is doing today.

As blades of grass, color of hair,
sounds of voices, etc., are different,
so are ones likes and dislikes. With
fleeting years and the scope of activi-
ties becoming less we notice these
little trays of character more—flesh
falls heir to these. The young per-
son must remember this and hold
the laugh we often hear, for the day
is coming when we shall reveal the
very same.

Now in conversation young people
will often exclude older ones. How
ignorant! What pleasure it gives
somebody you know to tell of by-
gone times. Listen, it will do you
both good. Perhaps it will let you
know of hardships, victories, joy, or
sorrow or true love. There is a dis-
cipline of mind in elders not found
in the younger.

There seems to be a feeling of
superiority with boys and girls today
over their elders. Is because of
education or money? We all know

of some faithful families saving and
working to get this one or that one
through college, and then the bitter
sting of ingratitude.

Then too, I think we should show
our appreciation to grandfather or
mother by remembering all red letter
days—birthdays, wedding anniver-
saries and Christmas. Write a letter
or send a little gift at least, and if it
is possible all meet together for a
grand Christmas celebration with
turkey and a Christmas tree. For
after all the world works on the
basis of love.

In conclusion let me give this
clipping.

"God so loved the world that the
gave,—runs the glorious gospel story.
Men so love that they give,—runs
all human history.

The story of civilization and pro-
gress of all that has counted for
good the earth over. Men have so
loved liberty, that they have given
up ease, fortune and safety to secure
it for themselves and others. They
have so loved the truth that have
sacrificed home and loved ones for
its sake. They have so loved their
fellows that they have given hos-
pitals, missionary effort, benevol-
ences of every sort for their healing
and uplifting. To love is to give
always, and love in some form lies
at the root of all endeavor. It is the
moving power that is speeding the
ships of commerce and whirling the
wheels of industry in all this busy
world today. For somebody's dear
sake the drudgery is bravely borne,
the picture painted, the invention
and the difficult task completed.

Love sings over the washboard,
toils in the shop, the kitchen the
schoolroom and everywhere every
day of the year, gives lavishly of
time, strength, labor and thought.
No other force equals it in heaven or
on earth.

When you hear some would-be
person of wisdom remark that love
has very little to do with affairs in
this practical age, just think for a
minute what would stop if all the
love in the world suddenly died out
of it.

Women's Institute

The regular monthly meeting of
the Women's Institute will be held
in Grace Church Parish Hall Wed-
nesday, November 1st, at 2.30 sharp.
Mrs. Joseph Tuck will give a paper
on "True Hospitality", and Mrs. J.
C. Medlar one on "Grandmother's
Day." The Question Drawer will
be in charge of Mrs. Wm. A. Drum-
mond. Music Committee: Mrs. A.
E. Alton and Mrs. S. Chaffe.

Greenville

Mr. and Mrs. W. Baker of Hamil-
ton have moved into part of Mr. M.
Grightmire's house.

Mr. and Mrs. Stewart Surerus and
children spent Sunday at R. Surerus.

Mr. Roland has gone north on a
hunting trip.

The Greenville A. A. A. held the
first of a series of dances last Friday
night.

Mr. Lee Greene, Mrs. G. H. Greene
and the Misses Dorothea and Zelda
Greene, of Waterdown, were calling
on friends here last Sunday.

Mr. Maxwell Walker had the mis-
fortune to lose his car last Saturday
by fire.

Locals

Miss Fox of Bartonville, has been
visiting Mrs. W. Langton this week.

Miss Forester of the High School
staff is suffering with a very sore
hand.

Mrs. W. Slater, Sr., who has been
very ill for the past week, is improv-
ing slowly.

A meeting of the Poultry Associa-
tion will be held Monday evening
at 8 o'clock.

Mr. Geo. Willis returned last
Monday after several weeks visit in
the Northwest.

Miss E. Dale Sinclair has return-
ed from a two week's visit with her
aunt in St. Marys.

Rev. C. L. Poole will conduct the
services in the Methodist church at
Welland on Sunday.

Wedding bells will ring in the
village next week for two of our
popular young people.

Mr. and Mrs. J. H. Prudham and
little daughter, of Galt, spent Sun-
day with Mrs. J. Prudham.

The ladies of Knox Church pack-
ed and shipped a bale this week to
the fire sufferers of Northern Ontario.

Last Sunday Rev. Mr. Bennetts
preached morning and evening at
Acton, and in the afternoon at Rock-
wood.

Mr. and Mrs. Albert Slater, and
Mrs. E. H. Slater and son of St.
Catharines, have been visiting Mrs.
Slater, Sr.

Mr. and Mrs. Wm. Pearson, who
have been touring in the British
Isles the past few months, returned
home this week.

Morning and evening services in
the Methodist church on Sunday
will be conducted by Rev. J. H.
Wells, a former pastor.

Mr. and Mrs. C. P. Roney and
Mrs. D. M. Ribson spent the week
end in Toronto with Mrs. Roney's
brother, Mr. H. Cameron.

Mr. and Mrs. Robson, and Mr.
and Mrs. Woodall and daughter, of
Toronto, visited at the home of Mrs.
Lily Robson on Sunday last.

All our local fanciers, who are
exhibiting at the Dundas Poultry
Show this week, have been most
successful in carrying off the choice
prizes.

Rev. S. and Mrs. Bennetts spent
last week visiting friends in his old
Parish at Marshville. On Sunday
October 15th Mr. Bennetts conduct-
ed the Sunday School Rally Day
services in the Marshville church.

The Ladies' Aid of Knox Church
held a very successful bazaar and
concert Wednesday afternoon and
evening. Many useful articles, home
made baking and candies were on
sale and readily disposed of. In the
evening a splendid concert was given.

The Ladies' Adult Bible Class of
the Methodist Church held their
regular quarterly meeting and har-
vest ingathering Wednesday evening
at the home of Mrs. Broadbent.
Over \$100 has been raised by per-
sonal effort during the summer.
Some members made and sold bread,
some sold flowers or fancy work, and
others made children's clothes. The
money is to help swell a building
fund for a new Sunday School.

Suppose This Were YOUR Home!

Carefully consider fire protection when you build or remodel
your home.

Every waking and sleeping moment you and your family
spend in an inflammable house you risk your lives.

Build for safety by using Gypsum Board and
Gypsum Plaster.

Then all your partitions and ceilings will be made of material
that can't burn—Gypsum.

Tight joints, no cracks or crevices, air-space insulation be-
tween walls (all features of this type of construction), positively
prevent the spread of heat and flames.

Added advantages of Gypsum Board and Plaster
are their sanitary and sound-proof qualities.

Ask for the Gypsum Board booklet—it's free.

THE DRESS MODEL.

The tendency to still adhere to soft, clinging fabrics is still very noticeable among the models for the newest wedding gowns.

Piping, milliners' folds, tucks both wide and narrow and rows of soutache or velvet ribbon trim many of the light wool gowns for general wear.

The very latest French gowns of elegance, when of expensive cloth, zibeline, or heavy repped costume silk, have little or no trimming on the skirt.

The fashion of elaborating lace with fur medallions, embroidery and jewel work prevails more generally than ever among costly French ball and opera toilets.

Aside from the elegant evening shapes, coats, jackets and full length wraps appear to have almost entirely taken the place of capes and mantles, except for elderly women.

Some of the newest jackets for youthful wearers are made in etageres—i.e., stitched bands of cloth lapping each other, and giving the effect of three boleros put on one above the other.

Shoulder length ermine pelerines finished with a narrow roll of otter or sealskin fur on the edges of the stole fronts and director's collar will be worn with opera and theater toilets and day receptions.

The silky, rough surfaced zibelines and elegant French camel's hair fabrics share honors with venetian cloth, satin cloth and covert suiting in the making of handsome tailor costumes for demidress uses.

Fur trimmings from one to three inches wide are more than ever in use for the winter, and besides bordering elegant redingotes, wraps, skirts, etc., they are used in combination with lace, net crepe de chine and brocades.

Craped satin remains in great favor among dressmakers, both here and abroad. It is one of the most beautiful fabrics that ever came from Lyons looms. It is used for entire evening toilets, bridal and bridesmaids' gowns and for various elegant dress occasions.—New York Post.

PEN, CHISEL AND BRUSH.

Anthony Hope Hawkins' recent attempt and failure to get into parliament was the second made by that novelist and lawyer. He is now 37 years old.

Daniel C. French has nearly finished his model for the heroic statue of General James Anderson which Andrew Carnegie is to give to the city of Allegheny.

Frederic MacMonnies, the Chicago sculptor, who has announced his intention of becoming a painter, was in New York recently and selected a studio for the scene of his new labors.

Robert Barrett Browning, the son of the poet, who is now visiting in England, rarely occupies the great Rezzonico palace in Venice, where his father died and which is full of Browning memories and relics. His home is in Asolo, where he has built Pippa's tower, has established a school of lacemaking for 20 girls to revive that industry and has made a fine studio for his own painting and modeling.

POWDER AND BALL.

Paris has an invisible defense—the submarine boats that patrol the Seine from Asnières and Ivry.

The regular army of the United States on Jan. 1, 1894, consisted of 3,287 men, on Jan. 1, 1894, of 8,573 men and on Jan. 1, 1891, of 16,422 men.

Russia pays her soldiers practically nothing, and they are worked as laborers. Were it not for this fact her military expenses would be twice what they now are.

Every French reservist, whether Parisian born or provincial immigrant, has a book containing his number, particulars of his service and a memorandum of the barracks to which he must repair upon the calling of the reserves.

LEATHER NOVELTIES.

Smart pigskin combination purses and cardcases bear a monogram in colored enamels on the corner.

Handsome carriage pocketbooks, comprising many conveniences, come in dark green and other fashionable leathers.

Hornback alligator leather furnishes very swell large traveling bags for men. This is the exceedingly rough back skin and expensive enough to make it one of the exclusive styles.

The long and narrow Vienna bags are not only attractive, but serve a useful and practical purpose. They are supplied with a short, stout hand chain and appear in all the usual leathers and colors.

POLITICAL QUIPS.

What could woman do in politics when she couldn't hit the speaker with one egg out of 500?

In view of the large crop of freak bets, it might be advisable to shift All Fools' day to a post election period.—Philadelphia Ledger.

It is only when a man is a candidate for office that he becomes really alarmed about the welfare of the country.—Detroit Free Press.

It is stated that women as a rule take very little interest in elections after they are accorded the privilege of voting. This result was suspected by most students of human nature.

OPENING DAY SATURDAY OCTOBER 28

Having just finished our new and up to date store, we propose to make it one of the days to be remembered. So we have decided to give

1 Bag of Redpath's Sugar Absolutely Free

In order to enter this contest the party buying \$1.00 worth of Groceries is entitled to one guess, and the more dollars worth you buy the more guesses you have. \$1 one guess, \$2 two guesses, and so on. All guesses to be in by 10 o'clock Saturday night, October 28th. Immediately after closing of contest the Beans will be counted by Reliable parties and the prize given to the one entitled thereto. In the event of a tie, or should there be more than one correct answer, the lucky parties will be required to draw for first place in a second contest which will be in the hands of the Judges at the time.

Contest Judges—J. F. Vance, H. A. Drummond, Dr. D. A. Hopper

We are opening our new store with a full line of Groceries and Meats second to none. Our Grocery stock is the best that is possible to buy. We do not buy cheap goods to cut prices. Our motto is the "Right Kind of Goods at the Right Price" As to our Meat Department, you will find our fresh and cured meats of the highest quality. We thank our many friends for their continued patronage in bearing with us during the inconvenience that we along with you have had to contend with, and your trade in the future with us will receive the best attention that it is possible to give.

Cauliflower is handled in the same way as cabbage. If cauliflower gets a severe setback in transplanting to the field, it will tend to cause it to go to seed instead of to form a good head. More especially is this so with the early crop in the warm summer weather. In many small gardens it is generally grown as a fall crop. The plants are slower growers than cabbage and will do better if started about two weeks earlier if we wish a maximum number of good heads. When the cauliflower shows a head about two inches in diameter the outer leaves should be drawn together and tied so as to exclude the light, thus giving a pure white head. Cauliflowers that have not fully developed may be dug up, roots and all, and hung in a cool cellar. There they will continue to grow, giving a delicious head after the ordinary season of cauliflower is over. Fully developed heads may be cut off, wrapped in oil paper and stored in a cold room at 32 deg. F. to 34 deg. F. Here they will keep well till Christmas time.—A. H. MacLennan, Vegetable Specialist, Toronto.

Mustard.

Fields that are heavily infested with mustard can frequently be turned to good account by using such areas for the production of silage foders. The sowing of peas and oats in the proportion of one bushel of oats to one bushel of peas per acre (the mustard will come volunteer), will make a very acceptable silage. Mustard has a high feeding value, and the seed in the soil can be exhausted in time by following the practice of using mustard infested lands for silage crops, cutting the entire mass, cereal, legume and weeds and putting all in the silo in a finely cut and packed condition.

Advantages of Dairying.

Dairying maintains the fertility of the soil.

Dairying means a steady income. Dairying furnishes regular employment for labor.

The market for dairy products is steady.

Dairy utilizes unsaleable roughage. Dairy affords opportunity for increased income.

Dairying utilizes waste land.

The aim of the dairy farmer should be to keep more and better cows, thus reducing the cost of producing milk.

MANURE WASTE COSTLY

Losses Run Into Millions of Dollars Annually.

Waste Begins In the Stable—Manure Should Be Put on the Land Early—Chemical Value of Barnyard Manure—Wood for Fuel In Terms of Coal.

(Contributed by Ontario Department of Agriculture, Toronto.)

On many farms animal manures accumulate about the buildings and are permitted to waste. The average farmer appreciates the value of the farm manures, but he dislikes the task of giving these materials the attention that their value in keeping up soil fertility warrants. The handling of animal manures is not a pleasant task at any time, but the following of a proper system would reduce the disagreeableness of the work and at the same time prevent waste. The average farmer of Ontario wastes the fertility value of the manure by at least one-third just through neglect in management.

Loss Runs Into Millions of Dollars.
With the ordinary one hundred acre farm producing two hundred tons of manure each year, and valuing this at \$2.50 per load, then figuring on one-third waste through neglect, we have an annual loss in soil fertility through failure to return all value to the lands of Ontario that aggregates many millions of dollars. We owe to the soils of our farms all the fertility that it is possible to return to them. The manure waste of the past fifty years on the farms of Ontario would aggregate a colossal sum. This waste will be appreciated more by the future tillers of the soil than by those who have permitted the waste. When there is an abundance, wastes are not noticed, but when soils fail to produce abundantly some attention is given to those factors that will maintain or increase soil fertility.

The Waste Begins In the Stable.
Waste of manure usually begins in the stable, leaky gutters, or no absorbing material to hold the liquid portion of the manure. From the stable it is thrown out, sometimes piled but more frequently not, and left exposed to the weather to lie around for months. Manure incorporated with the soil as soon as made sustains the minimum loss. It is impossible of course to incorporate manure with the soil during the winter, but frequent opportunities occur when manure may be applied to the land. Accumulations during the periods when it is difficult to team the manure on to the land occur in the spring and autumn. These accumulations are best taken care of within the shelter of a manure shed, or if such is not available, then by piling in such a way as to reduce waste to a minimum.

Get Manure on the Land Early.
The most successful of our farmers aim to get the manure on the land as soon as possible. When conditions on the land are not favorable to the application of manure they take care of this by-product by first providing sufficient absorbent material to hold all the liquids, piling the manure in a manure shed, keeping it sufficiently moist and firm enough to prevent heating until it is desired to apply it to the land. Many of the Old Country farmers store the manure in water tight pits, pack it by tramping sufficiently tight to exclude all the air possible, and then turn on the hose as frequently as necessary to prevent heating. The same system would do as much for the Ontario farmer as it is doing for the Scotch farmer.

The Chemical Value of Manure.
If we had to buy manures at prices equal to the retail commercial fertilizer prices better care would be taken of this soil fertility material. Few farmers realize that the manure from a horse weighing 1,000 pounds is worth at chemical fertilizer prices \$42.15 per annum. A dairy cow weighing 1,000 pounds will produce manure to a value of \$39 per annum. A farm carrying four horses, ten cows and ten pigs of average weight produces, if valued at retail prices for commercial fertilizers, \$640 worth of manure in a year. The unfortunate part of it is that from \$100 to \$300 worth of soil fertility elements are permitted to waste on too many farms each year. The next time you travel by auto or railroad just take note while passing farm barns how much waste is going on through the careless handling or no attention being given to the animal manure.—L. Stevenson, Secretary, Department of Agriculture, Toronto.

Every farm and country home should feed itself, and to do this it is necessary for each family to grow garden vegetables and small fruits. All corn cribs and grain bins should be carefully inspected to see that they are rat and mouse proof. A concrete foundation for storage buildings is advisable whenever it is practicable.
