Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

Coloured covers/  
Couverture de couleur

Covers damaged/  
Couverture endommagée

Covers restored and/or laminated/  
Couverture restaurée et/ou pelliculée

Cover title missing/  
Le titre de couverture manque

Coloured maps/  
Cartes géographiques en couleur

Coloured ink (i.e. other than blue or black)/  
Encre de couleur (i.e. autre que bleue ou noire)

Coloured plates and/or illustrations/  
Planches et/ou illustrations en couleur

Bound with other material/  
Relié avec d'autres documents

Tight binding may cause shadows or distortion  
along interior margin/  
La reliure serrée peut causer de l'ombre ou de la  
distortion le long de la marge intérieure

Blank leaves added during restoration may appear  
within the text. Whenever possible, these have  
been omitted from filming/  
Il se peut que certaines pages blanches ajoutées  
lors d'une restauration apparaissent dans le texte,  
mais, lorsque cela était possible, ces pages n'ont  
pas été filmées.

Additional comments:/  
Commentaires supplémentaires:

This item is filmed at the reduction ratio checked below/  
Ce document est filmé au taux de réduction indiqué ci-dessous.

10X	14X	18X	22X	26X	30X
12X	16X	20X	/	24X	28X

The copy filmed here has been reproduced thanks to the generosity of:

Library  
Agriculture Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

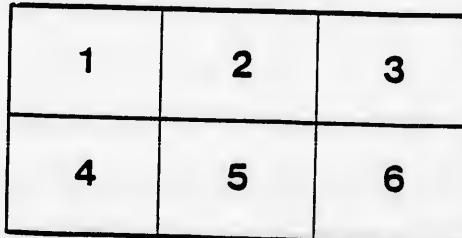

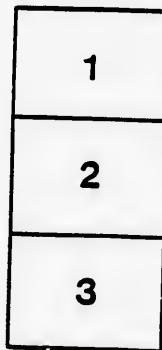

Bibliothèque  
Agriculture Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "À SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

**EXPERIMENTAL FARM NOTES.**

---

**THE GERMINATING POWER**

**OF**

**GRAIN GROWN IN CANADA**

**DURING THE SEASON OF 1893.**

---

By Wm. SAUNDERS, *Director, Experimental Farms.*

---

The question as to the vitality and germinating power of seed grain is a most important one for farmers, and associated with this is that of the relative vigour of the young plants after the seeds have started. These qualities in the seed will necessarily have a large influence on the crop of the coming year.

The testing of the germinating power and vigour of samples of grain grown in the several provinces of the Dominion during 1893 began on the 9th of December, 1893, and since that date 1,153 samples have been placed under test. The testing is conducted in duplicate ; in one case the grain is planted in the soil, in the other in a suitable apparatus between folds of linen kept constantly moist. With 686 samples the tests are now completed, and while thus far the average vitality stands higher than in the crop of 1892, which is very gratifying, there is, nevertheless, a serious drawback in connection with the samples of barley which have been received from Manitoba, the North-west Territories, New Brunswick and Quebec in the unusually large proportion of plants of weak growth. The percentage is small in the samples from Prince Edward Island, Nova Scotia, Ontario and British Columbia.

The following table shows the number of tests thus far completed in each of the provinces of the Dominion with wheat,

1893  
8819

barley and oats, giving the highest, lowest and average percentages of vitality, also the proportion of plants of strong and weak growth :

## ONTARIO.

Kind of Grain.	Number of Tests.	Highest Percentage.	Lowest Percentage.	Percentage of Strong Growth.	Percentage of Weak Growth.	Average Vitality.
Wheat .....	41	100·0	69·0	96·5	3·5	94·0
Barley.....	54	100·0	50·0	79·0	13·5	92·5
Oats.....	50	100·0	84·0	92·9	4·0	96·9

## QUEBEC.

Wheat .....	68	100·0	60·0	85·3	5·0	90·3
Barley.....	107	100·0	47·0	54·6	33·5	88·1
Oats.....	50	100·0	63·0	89·9	3·5	93·4

## MANITOBA.

Wheat .....	14	100·0	28·0	89·2	2·2	91·4
Barley.....	5	99·0	75·0	31·2	61·2	92·4
Oats.....	16	100·0	50·0	87·6	6·7	94·3

## NORTH-WEST TERRITORIES.

Wheat.....	3	98·0	96·0	85·5	11·5	97·0
Barley.....	3	99·0	98·0	44·6	54·0	98·6
Oats.....	12	100·0	60·0	86·2	7·0	93·2

## NOVA SCOTIA.

Wheat.....	12	100·0	59·0	82·4	5·0	87·4
Barley.....	30	100·0	63·0	76·8	11·7	88·5
Oats.....	49	100·0	52·0	85·6	5·9	91·5

## THE GERMINATING POWER OF GRAIN.

5

## NEW BRUNSWICK.

Kind of Grain.	Number of Tests.	Highest Percentage.	Lowest Percentage.	Percentage of Strong Growth.	Percentage of Weak Growth.	Average Vitality.
Wheat . . . . .	22	100·0	54·0	83·3	4·6	87·9
Barley. . . . .	18	99·0	76·0	38·1	53·7	91·8
Oats. . . . .	75	100·0	78·0	90·9	5·3	96·2

## PRINCE EDWARD ISLAND.

Wheat. . . . .	13	97·0	59·0	82·6	5·7	88·3
Barley. . . . .	5	96·0	84·0	87·2	4·2	91·4
Oats. . . . .	19	100·0	76·0	86·6	6·1	92·7

## BRITISH COLUMBIA.

Wheat. . . . .	6	100·0	96·0	91·4	6·0	97·4
Barley. . . . .	7	100·0	96·0	97·1	0·9	98·0
Oats. . . . .	8	100·0	94·0	95·6	1·2	96·8

## RECAPITULATION.

Kind of Grain.	Number of Tests.	Highest Percentage.	Lowest Percentage.	Average Strong Growth.	Average Weak Growth.	Average Vitality.
Wheat. . . . .	178	100·0	28·0	86·4	4·5	90·9
Barley. . . . .	229	100·0	47·0	63·4	26·7	90·1
Oats. . . . .	279	100·0	50·0	89·6	5·0	94·6
Total. . . . .	686	Average vitality of the whole. . . . .				
						91·9

It is doubtful if any other country in the world could show so high an average as 91·9 per cent in 686 tests of samples received

indiscriminately from all parts of its territory, especially since many of these were sent because they were suspected of being deficient in germinating power.

The provinces and territories at present stand thus in order of merit :

	No. of Samples Tested.	Average Vitality.
British Columbia.. . . . .	21	97·4
North-west Territories.. . . . .	18	96·3
Ontario.. . . . .	145	94·5
Manitoba.. . . . .	35	92·7
New Brunswick.. . . . .	115	92·
Prince Edward Island.. . . . .	37	90·8
Quebec.. . . . .	225	90·6
Nova Scotia.. . . . .	91	89·1

The fact that in this series of tests samples of wheat have gone as low as 28 per cent, barley 47 per cent, and oats 50 per cent, should be sufficient to induce those farmers who are holding seed of doubtful vitality for spring sowing to send samples at once to the Central Experimental Farm so that they may be tested and reported on before the time for seeding arrives. These samples are tested free of charge, and the reports of the results can usually be sent within two weeks from the date of receipt of the samples. About one ounce of the grain is sufficient for the test, and the samples can be sent from any part of the Dominion to the Central Experimental Farm through the mail free.

WM. SAUNDERS,  
Director, Experimental Farms.
