### The Shining Shore.

My days are gliding swiftly by, And I, a pilgrim stranger, Would not detain them as they fly-Those hours of toil and danger. For O! we stand on Jordan's strand Our friends are passing over; And just before, the shining shore We may almost discover.

We'll gird our loins, my brethren dear, Our distant home discerning; Our absent Lord has left us word, "Let every lamp be burning." For O! we stand on Jordan's strand, etc.

Should coming days be cold and dark, We need not cease our singing; That perfect rest, nought can molest, Where golden harps are ringing. For O! we stand on Jordan's strand, etc.

Let sorrow's rudest tempest blow, Each cord on earth to sever; Our King says, " Come !" and there's our hor Forever, O! torever.

#### Pulpit of English Methodism.

The most popular preacher in the Wesleyan Connexion to-day is MORLEY PUN-SHON. We are able, through the favor of our English correspondent, to lay the following clever description of the man and his preaching before our readers ;

One of the religious newspapers m mistake in stating that Mr. Punshon first became known to the world through the de livery of a lecture upon John Bunyan. This celebrated orator made his debut before London audience, in connection with the Young Men's Christian Association, four or five years ago, in a lecture upon the " Prophet of Horeb." A correspondent of a newspaper at that time wrote in a very interesting manner of the appearance of Mr. Punshon-before that most thrilling assemblage of the young men of London, at one of their Tuesday evening meetings. The writer spoke of the evening as being cold and wet, and altogether of a character which would induce most men to remain at home. But man was a Methodist, and reflected that at warmed and filled. This vigorous, inventive and impassionate orator moved Exeter Hall to repeated bursts of applause by the magnificent lecture of that evening. Men held their breath in wonderment-ladies waved their handkerchiefs-and reporters started from their duty with unwonted amazement, and lorgot to take notes. All went away that night charmed with the man whom Ben bodism had chosen to become her repre-Men's Christian Association: by Xoung time Mr. Punshon was eagerly followed in many parts of the kingdom, and his fame almost established in the metropolis. The lecture had surprised and pleased everybody. It has been said that the conference authorities are detaining him in the provinces that he may grow to the full stature of the perfect preacher and orator, and then come o London and take it by storm. Already the north has been apparently filled with his enthusiasm. So much is he courted and applauded, that Spurgeon must be content to share the honors of the manufacturing

districts with this beautiful speaker We judge Mr. Punshon to be about thirty six years of age. He is not tall of statrue but has a broad breast, and a deterimined manuer. Our modern orators have to rest satisfied with a lower standard of height, and what they desiderate in corporal consequence must be made up by extent of cultivation or vigour of speech. Very few of our public speakers can boast of an imposing form of six feet four inches in longitude, which people can behold without the aid o speciacles or opera glasses, and tremble at. as if the gods were come down in the likeness of giants. Altogether, this Methodist orator seems rough and ready in his outer man; able to wield the sledge-hammer of Divine truth as well as cater with much and happy success to the refined fancies and polished taste of the first audiences in the land. He can gather roses and lilies, and hang them gracefully around the fair brow of virtue and religion, while he can pluck the myrtles and weave it firmly about the forehead of truth. He can whisper fondly into the ear of childhood, speak softly to the gentle heart of the maiden, and bind up the lacerated wounds of the strong man. He can sing a lullaby over the cradle of infancy and weep devoutly over the couch of old age. He worships reverently at the shrine of beauty and gazes profoundly in the halo of classic grandeur-he treads softly in the groves of Arcadia, and stands proudly upon the brow of Olympus. To him flowers and thunderbolts are alike familiar; songs of happiness and sentences of earnest appeal are similarly suited. The chaplet of beauty and the wreath of majesty appear equally

adapted to his ability.

AWFT' CALAMITY AT SEA.—BURNING OF STEAMER AUSTRIA IMMENSE LOSS OF THE - One of the most heart rending instances human suffering we have ever been called on to record, occurred at sea on the 13th September, in 45 la itude, 41 30 longitude, when the steamer Austria, from Hamburg and Southampton to New York, was destroyed by fire, with nearly al her passengers. The news of this appalling disaster was brought by the bark Lotus, from Liverpool, which arrived here on Sunday afternoon, with 12 out of 67 passengers, taken from barque Maurice on the 14th inst. There was supposed to have been six hundred souls on pard the Austria when the fire occured, men. women and children, all but sixty-seven of which perished either in the flames or in the sea. Mr. Brews, a gentleman in the British Civil Service, on his way to Vancouver's Island, furnished an account of this tearful calamity to Jesse Hoyt Esq., Superintendent of the Nova Scotia Tele graph Company. Mr. Brews is the only British subject saved. The passengers transferred from the Maurice to the Lotus are-Chaires Brews, Jean Poliruska, Phillip Barry, H. Nander, S. Petersen, C. Hogguist, C. V. T. When Captain Waters of the steamship Prince Albert heard that twelve of the surviving passengers of the Austria had arrived here, he kindly offered them a free passage to New York, and detained his vestel for the purpose of allowing them time to embark. Ten of them availed themselves of this generous offer .- Chron.

Mr. Brews statement is indeed heartrending. He describes with vividness the scene among the passengers. From this portion of the narra tive we extract these centences :-

"The flames pressed so closely upon them that many jumped into the sea. Relatives, clasped in each other's arms, jumped overboard. Two girls, supposed to be sisters, jumped over, and sank kissing each other. A missionary and his wife leaped over together. The stewardess assistant steward followed, arm in arm.

"The conduct of a Hungarian gentleman was affecting and impressive in the extreme. His family consisted of a wife and seven children, four of whom were girls. After blessing them all solemnly, he made his wife jump into the water, and then six of his children, one after the other, following them with the infant of the family in his arms. DISCOMFITURE OF THE PRIESTS AT THE MONTREAL ELECTION.—The principle recently proclaimed by the R. C. Bishop of Montreal that State and Church must be united, and that the Priests are bound to interfere with political elections, has been carried out by the hierarchy at the late, election in our city, and has resulted in a signal discomfiture of the Romish clergy. On the last Sunday previous to the election, astoral circular was read by order, in all the Roman Catholic churches of Montreal to guide the electors in their choice; and although neither of the rival candidates were called by name, yet the man of the priests was indicated to the people in the most unmistakable manner: they were ordered to vote for him alone, and the penalties, of the church and of the last judgment threatened upon those who would give their voice to any one else. Yet wonderful to witness, the good sense of the people has rebelled against this priestly dictation, they quietly escaped a political tutelage of which they felt asbamed, nd most of them either stayed at home or voted for Dotion, who, in spite of the priests, was rean overwhelming majority. This must leach the hierarchy that servile and ignorant as are generally their people, they are not so quite to the extent they had reckoned upon, and that even here there are some bounds beyond which it is not safe for priestly dictation to

#### LIBERALITY OF PHYSICIANS. It has always been said that physicians would disparage any remedy, however valuable, which they did no originate themselves. This has been disproved by their liberal course towards Dr. J. C. Ayer's preparations.

They have adopted them into general use in their practice, which shows a will-ingness to countenance articles that have intrinsic merits which deserve their attention. This does the learned profession great credit, and el-fectually contradicts the prevalent erroneous notion that their opposition to proprietary reme-dies is based in their interest to discard them -We have always had confidence in the honorable motives of our medical men, and are glad to find sustained by the liberal welcome they accord to such remedies as Ayer's Cherry Pectoral and Cathartic Pills, even though they are not ordered in the books, but are made known to the people through the newspapers. HOLLOWAY'S PILLS - Woman, whose delicate structure is peculiarly susceptible of derange ment, has cause to rejoice over the introduction this wonderful renovator. There is no phase of sickness to which she is liable that it will no rapidly subdue. If hysteria, lassitude, emacia. tion, and a suspension of functions indespensable to her health render life a builden to her, it will regulate and re brace every portion of the system involved in her ailments, infuse vigor into her physique, and relieve her mental depression .- Such has been the experience of thousands of the sex in Canada, and it is corroborated by the same results in every quarter of the globe.

#### A Vision at Evening. BY CLARENCE MELVIN.

I WATCHED through the deepening shadows The shifting scenery furled, Till the wings of night came onward To circle the dreaming world.

I saw a host with their banners Stand guard at the gates of the west, And watch as the daylight faded, And died on the twilight's breast,

Their spears are held in silence. And their ensigns drooping low As the waves of mist rolled onward In an ever-ceaseless flow;

And their forms were bent in sadness As they grieved for the bright day fled; And they gazed through the half closed portal, Where the shadows enshrouded the dead.

I watched till the vision faded In the misty arms of night, And the last faint ray of twilight Had fled from the sense of sight;

And I thought of the host of memory That guards in the evening gray, And looks through the half closed portals Of life that has passed away. -Greensboro' Times.

# Ayer's Pills Are particularly adapted to derangements the digestive apparatus, and diseases arising from impurity of the blood. A large part of all the complaints that afflict mankind originate in one of these, and consequently these PILIS are found to cure many varieties of disease. Subjoined are the statements from some eminent physicans, of their effects in their practice. As a Famury Physic.

As a Family Physic. As a Family Firstic.

From Dr. E. W. Carteright, of New Orleans.

"Your Pills are the prince of purges. Their excellent qualities surpass any cathartic we possess. They are mild, but very certain and effectual in thoir action on the bowels, which makes them invaluable to us in the daily treatment of disease." FOR JAUNDICE AND ALL LIVER COMPLAINTS.

FOR JAUNDICE AND ALL LIVER COMPLEX.

From Dr. Theodore Bell, of New Fork City.

"Not only are your Prils admirably adapted to their purpose as an aperient, but I find their beneficial effects upon the liver very marked indeed. They have in my practice proved more effectual for the cure of bilious complaints than any one remedy I can mention. I sincerely rejoice that we have at length a purgative which is worthy the confidence of the profession and the people."

Decompession. — Interpretable.

the confidence of the profession and the people.

DYSPETSIA — INDIGESTION.

From Dr. Henry J. Knox. of St. Louis.

"The PILLS you were kind enough to send me have been all used in my practice, and here satisfied me that they are truly an extraordinary medicine. So peculiarly are they adapted to the diseases of the human system, that they seem to work upon them alone. I have cured some cases of dyspepsia and indepaction with them, which had resisted the other remedies we commonly use. Indeed I have experimentally found them to be effectual in almost all the complaints for which you recommend them."

DYSENTERY — DIARRHEA — RELAX.

From Dr. J. G. Green, of Chicago.

DISENTERY — DIARRHŒA — RELAX.

From Dr. J. G. Green, of Chicago.

"Your PILS have had a long trial in my practice, and I hold them in este-un as one of the best aperients I have ever found. Their atterative effect upon the liver makes them an excellent remedy, when given in small doses, for bilious dynamicry and distribute. Their sugar-coating makes them very acceptable and convenient for the use of women and children." Internal Obstruction-Worms-Suppression. From Mrs. E. Stuart, who practises as a Physician and Midwife in Boston. "I find one or two large doses of your Pills, taken at the proper time, are excellent promotives of the natural secretion when wholly or partially suppressed, and also very effectual to cleanse the stomach and expel worms. They are so much the best physic we have that I recommend no other to my patients."

Constipation - Costiveness. CONSTIPATION — COSTIVENESS.

From Dr. J. P. Faughn, Montreal, Canada,

"Too much cannot be said of your Pills for the cure of
conferences. If, others of our fraternity have found them
as efficacious as I have, they should join me in proclaiming
it for the benefit of the multitudes who suffer from that
complaint, which, although bad enough in itself, is the progenitor of others that are worse. I believe contineness to
originate in the liver, but your Pills affect that organ and
cure the disease."

the blood. They do that, I have used them of late years in
my practice, and agree with your statements of their efficacy.
They stimulate the excretories, and carry off the impurities
that stagnate in the blood, engendering disease. They
stimulate the organs of digestion, and infuse vitality and
vigor into the system.

These contain no mercu-

ry or mineral substance whatever. Aver's Cherry Pectoral Has long been manufactured by a practical chemist, and svory ounce of it under also own eye, with invariable accuracy and care. It is resided and protected by law from counterfeits, and consequently can be relied on as genuine, without adulteration. It supplies the surest remedy the world has ever known for the cure of all pulmonary couplaints; for COUGES, COLORS, HOARREMESS, ASTRIA, CROUP, WROOFING COUGH, BROXCHITHS, INCPIENT CONSEMPTION, and for the relief of consumptive patients in advanced stages of the disease. As time makes these facts wider and better known, this morticine has gradually become the best reliance of the afflitted, from the log cabin of the American peasant to the palaces of European kings. Throughout this entire country, in every state and city, and indeed almost overy hamlet it contains, Chenny Protoral is known as the best of all remedies for diseases of the throat and lungs. In many foweign countries it is extensively used by their most intelligent physicians. If there is any dependence on what men of every station certify it has done for thom; if we can trust our own senses when we see the dangerous affections of the lungs yield to it; if we can depend on the assurance of intelligent physicians, whose business is to know: in short, if there is any reliance upon any thing, then is it irretutably proven that this medicine does cure the class of diseases it is designed for, beyond any and all other remedies known to mankind. Nothing but its intringed virtues, and the unmistakable benefit conferred on the manuacing of sufference confirmate and maintain the
