

# BLOCKADE RUNNER CAUGHT WITH CARGO OF RAW RUBBER

## Ship From Brazil, With 120 Tons on Board, Seized Off the Orkney Islands.

A despatch from London says: The Brazilian steamer Saldanha Gama, which sailed from Para on Feb. 6, for New York with a cargo of raw rubber, was seized off the Orkney Islands by a patrol boat. The ship and her cargo have been placed in the prize court.

This is believed to be a deliberate case of attempted blockade running, the officials here contending that a steamer from Para for New York could never have gotten so far off her course. This is the first seizure made by the Admiralty of a complete cargo of rubber.

# ONTARIO "DRY" UNTIL JUNE, 1919

## Prohibition to be Effective September, 1916.

A despatch from Toronto says: Prohibition will be put into force in Ontario on September 16 next. The prohibition will be taken on the first Monday in June, 1919. This means the Province will be "dry" until that date. The liquor license act now in force in the Province will be repealed when the Ontario temperance act (prohibition) goes into effect. If when the referendum is taken the people vote against prohibition, present licenseholders will probably get their licenses back, but districts where local option is now in force will remain "dry." In other words, the situation will be just as it is at present. The Government is considering the case of licenseholders who have long leases on their hands.

# \$10,000,000 SUBSCRIBED TO THE PATRIOTIC FUND.

## Sufficient to Last Till After 1916 it is Estimated.

A despatch from Ottawa says: More than \$10,000,000 has been subscribed by the people of Canada to the Patriotic Fund. This sum is estimated to last till the end of the first few months in 1917. The great number of enlistments during the past few months has added a greater burden to the fund and now each month is being dispensed a sum far in excess of that anticipated a year ago. In February, 1916, the total paid to dependents was in the neighborhood of \$525,000, which is the largest month's disbursement since the war began. For the first time it exceeded the half-million mark. The amount requisitioned for March is \$600,000.

# APPLY CARD SYSTEM TO MEAT IN GERMANY

## Third of a Pound Per Capita Daily is Allowed Outside Berlin.

A despatch from Berlin says: Meat cards will be introduced in Bavaria and Saxony on April 15, permitting consumption of 150 grammes (one-third pound), per capita daily, except on two meatless days each week. Bavaria has forbidden sale of canned meats, whole hams, whole sausage, etc., to individuals, to prevent the accumulation of stocks in advance. Individual meat cards probably will not be issued in Berlin. Regulation of distribution will be effected by limiting the supply for each retailer.

# WHAT CARES GERMANY HOW SHIPS WERE SUNK?

A despatch from Amsterdam says: Commenting on the American enquiries regarding the torpedoing of the steamers Sussex and Englishman, The Hamburg Nachrichten says: "Who in Germany cares whether these ships were torpedoed by German submarines or not? They belonged to and were used by the enemy and were destroyed. That is all we care about at the moment."

# INTERNAL TROUBLES RIFE IN BULGARIA

A despatch from Athens says: M. Ghendeff, former Foreign Minister of Bulgaria has been arrested at Sofia with seven others. It is believed that eight are charged with intriguing against the Government.

# CLOCKS IN GERMANY SET AHEAD ONE HOUR

A despatch from Berlin says: The German Federal Council has passed a measure providing that on May 1 all clocks shall be set ahead one hour. The measure was proposed for hygienic and economic reasons, as lengthening working time during daylight and decreasing the necessity for artificial light.

# ALLIED WARSHIPS SINK ENEMY SUB.

A despatch from Paris says: A German submarine was sunk on Thursday by a squadron of French and British warships, the Ministry of Marine announced Thursday night. The crew of the submarine was captured.

# The Remedy.

"I told your father I loved you more than any girl I've ever met."  
"And what did father say?"  
"He said, to try to meet some more girls."

# Markets of the World

## Breadstuffs.

Toronto, April 11.—Manitoba Wheat—No. 1 Northern, \$1.16; No. 2, do., \$1.14; No. 3, do., \$1.11, in store, Fort William.

Manitoba oats—No. 2 C.W., 43c; No. 3, do., 41c; extra No. 1 feed, 41c; No. 1 feed, 40c, in store, Fort William.

American corn—No. 3 yellow, 83 1/2c, track, Toronto.

Canadian corn—Feed, 68 to 70c, on track, Toronto.

Ontario oats—No. 3 white, 44 to 45c; commercial, 43 to 44c, according to freights outside.

Ontario wheat—No. 2 winter, per car lot, \$1.02 to \$1.04; No. 1 commercial, 99c to \$1.01; No. 2, do., 97 to 99c; No. 3, do., 94 to 95c; feed wheat, 86 to 88c, according to freights outside.

Peas—No. 2, \$1.50; according to sample, \$1 to \$1.30, according to freights outside.

Barley—Malt, 62 to 63c; feed, 59 to 62c, according to freights outside.

Buckwheat—69 to 70c, according to freights outside.

Rye—No. 1 commercial, 88 to 89c; rejected, according to sample, 84 to 86c, according to freights outside.

Manitoba flour—First patents, in jute bags, \$6.50; second patents, in jute bags, \$6; strong bakers' in jute bags, \$5.80, Toronto.

Ontario flour—Winter, according to sample, \$4.15 to \$4.25, track, Toronto; \$4.25 to \$4.35, bulk seaboard, prompt shipment.

Milled—Car lots, delivered Montreal freights—Bran, per ton, \$25; shorts, per ton, \$26; middlings, per ton, \$27; good feed flour, per bag, \$1.60 to \$1.70.

## Country Produce.

Butter—Fresh dairy, choice, 29 to 32c; inferior, 25 to 26c; creamery prints, 35 to 37c; solids, 33 to 34c.

Eggs—New-laid, 23 to 24c; do., in cartons, 24 to 25c.

Honey—Prices in 10 to 60-lb. tins, 13 to 14c. Combs—No. 1, \$2.75 to \$3; No. 2, \$2.25 to \$2.40.

Beans—\$4 to \$4.40, the latter for hand-picked.

Poultry—Chickens, 21 to 22c; fowls, 18 to 19c; ducks, 20 to 22c; geese, 18 to 20c; turkeys, 25c.

Cheese—Large, 19c; twins, 19 1/2c. Maple syrup—\$1.10 per 3/4-gallon tin.

Potatoes—Car lots of Ontario, \$1.80 to \$1.85, and New Brunswicks at \$1.90 to \$1.95 per bag, on track.

Bacon, long clear, 16 1/2 to 17c per lb., in case lots. Hams—Medium, 21 to 22c; do., heavy, 17 to 20c; rolls, 17 1/2 to 18c; breakfast bacon, 21 to 24c; backs, plain, 25 to 26c; boneless backs, 28 to 29c.

Lard—Pure lard, tierces, 15 1/2 to 15 3/4c, and pails, 15 1/2 to 16c; compound, 13 to 14 1/2c.

Winnipeg Grain. Winnipeg, April 11.—Cash quotations:—Wheat—No. 1 Northern, \$1.16; No. 2 Northern, \$1.14; No. 3 Northern, \$1.10; No. 4, \$1.08; No. 5, 99c; No. 6, 91c; feed 86 1/2c. Oats—No. 2 C.W., 42 1/2c; No. 3 C.W., 40 1/2c; extra No. 1 feed, 40 1/2c; No. 1 feed, 38 1/2c; No. 2 feed, 37 1/2c. Barley—No. 3, 62 1/2c; No. 4, 57 1/2c; rejected, 52 1/2c; feed, 52 1/2c. Flax—No. 1 N.W.C., \$1.87 1/2c; No. 2 C.W., \$1.84 1/2c.

Montreal Markets. Montreal, April 11.—Corn—American No. 2 yellow, 85 to 86c. Oats—Canadian Western, No. 2, 52 1/2 to 53c; No. 3, 50 1/2 to 51c; extra No. 1 feed, 50 1/2 to 51c; No. 2 local white, 50c; No. 3 local white, 49c; No. 4 local white, 48c. Barley—Manitoba feed, 68 to 71c; malt, 75 to 77c. Flour—Manitoba Spring wheat patents, firsts, \$6.60; seconds, \$6.10; strong bakers', \$5.90; winter patents, choice, \$6.00; straight rollers, \$5.30 to \$5.40; do., bags, \$2.45 to \$2.50. Roll-oats—Bills, \$5.00 to \$5.10; do., bags, 90 lbs, \$2.35 to \$2.40. Bran, \$24. Shorts, \$26. Middlings, \$28 to \$30. Moullie, \$30 to \$35. Hay—No. 1, per ton, car lots, \$20.00 to \$20.50. Cheese—Finest westerns, 18 1/2 to 18 3/4c; finest easterns, 18 to 18 1/2c. Butter—Choice creamery, 33 to 34c; seconds, 30 to 31 1/2c. Eggs—Fresh, 26 to 27c. Potatoes—Per bag, car lots, \$1.75 to \$1.80.

United States Markets. Minneapolis, April 11.—Wheat—May, \$1.19 1/2 to \$1.19 3/4; July, \$1.02 1/2; No. 1 hard, \$1.24 1/2; No. 1 Northern, \$1.20 1/2 to \$1.23 1/2; No. 2 Northern, \$1.16 1/2 to \$1.20 1/2. Corn—No. 3 yellow, 75 to 76c. Oats—No. 3 white, 42 to 42 1/2c. Flour unchanged. Bran—\$18.25 to \$19.00.

Duluth, April 11.—Wheat—No. 1 hard, \$1.22 1/2; No. 1 Northern, \$1.19 1/2 to \$1.20 1/2; No. 2 Northern, \$1.15 1/2 to \$1.18 1/2. Linseed—Cash, \$2.13 to \$2.13 1/2; May, \$2.13; July, \$2.14.

Live Stock Markets. Toronto, April 11.—Choice heavy steers, \$8.35 to \$8.75; butchers' cattle, choice, \$8.00 to \$8.25; do., good, \$7.75 to \$7.85; do., medium, \$7.25 to \$7.60; do., common, \$6.60 to \$6.75; butchers' bulls, choice, \$7.25 to \$7.50; do., good bulls, \$6.85 to \$7.00; do., rough bulls, \$4.65 to \$5.15; butchers' cows, choice, \$6.75 to \$7.25; do., good, \$6.25 to \$6.50; do., medium, \$5.85 to \$6.10; do., common, \$5.25 to \$5.75; Stockers, 700 to 850 lbs., \$6.60 to \$7.25; Choice feeders, dehorned, 950 to 1,000 lbs., \$7.15 to \$7.50; Canners and cutters, \$3.75 to \$4.50; milkers, choice, each, \$75.00 to \$100.00; do., com. and

PRINCE GEORGE, Duke of Kent, in military uniform.

# ANOTHER BRITISH VICTORY IN THE TIGRIS CAMPAIGN

## One Div's on Operates on Each Bank of River, and During Day Five Lines of Trenches Were Taken.

A despatch from London says: The following official statement was issued on Thursday:— "General Lake reports that the Tigris corps under the command of Lieut.-General Sir George F. Gorringe, who succeeded General Aylmer, attacked the enemy's entrenched position at Umm-el-Henna on Wednesday. Our trenches had been pushed forward by means of saps to within 100 yards of the enemy's position, and the leading battalions of the 13th Division then rushed the enemy's first and second lines in quick succession. "The third line was captured by 6 o'clock in the morning under the support of artillery and machine gun fire. The 13th Division continued their victorious advance, and by 7 a.m. had driven the enemy out of his fourth and fifth lines. "Aeroplane reconnaissances then reported that the enemy was strongly reinforcing his entrenchments at Felahie and Sannayyat, positions 6,000 and 12,000 yards, respectively, from the front trenches at Umm-el-Henna. As those positions could only be approached over very open ground, General Gorringe ordered a further attack deferred until evening. "In the meantime, on the right bank, the 3rd Division, under General Keary, captured the enemy's trenches opposite the Felahie position. During the afternoon the enemy on this bank made a strong counter-attack with infantry and cavalry, supported by guns. This counter-attack was successfully repulsed, and the position won was consolidated."

# From the Middle West 6 PEOPLE MURDERED NEAR SASKATOON

## BETWEEN ONTARIO AND BRITISH COLUMBIA.

### Items From Provinces Where Many Ontario Boys and Girls Are Living.

Winnipeg secured 1,575 recruits during eight days recently. Nearly 12,000 men have been recruited in Calgary for the various regiments, and recruiting is still going on. It is unlikely that Winnipeg's new barracks will be built this summer, probably \$2,000,000, being required. The tremendous shell and gas shells sent through the air are not only missiles sent forth by the great guns that have no parallels in history. The gas shell, the weeping shell, the depression shell, the sneezing shell and the musical shell are all new with this war and so freaky in their actions that civilization would never have dreamed of them in former years. The gas shell explodes and scatters poisonous gases about among the soldiers, and a breath of it is enough to kill a man. The weeping shells, or lachrymatory shells, as the Germans call them, are fired with the object of blurring the eyesight of the opponents. When the shell bursts it makes the tears of those about flow in great quantities and prevents them from seeing the sights of their rifles. It contains ammonia in high degree and causes intense pain to the sufferers. The sneezing shell is much similar to it and gives off a bluish vapor on bursting, which causes the soldiers near by to go into paroxysms of sneezing, and of course prevents them from using their weapons. The air depression shell produces many deaths. Troops exposed to the violent change in the atmospheric pressure brought about by this explosion suffer exactly as do aeronauts who descend too rapidly or workmen who suddenly come into the open air after long inclosure in compressed air chambers, the effect being to release the air and carbonic acid suspended in the blood and transforming them into bubbles of gas. These bubbles are driven by the action of the heart into the capillary vessels, stopping the circulation and causing instant death. The musical shell was used by the Turks in the Dardanelles and consisted of an ordinary shell with a small iron ball attached to it by a chain, this appendage causing a curious singing noise to be made as it flew through the air.

These bubbles are driven by the action of the heart into the capillary vessels, stopping the circulation and causing instant death. The musical shell was used by the Turks in the Dardanelles and consisted of an ordinary shell with a small iron ball attached to it by a chain, this appendage causing a curious singing noise to be made as it flew through the air.

The gas shell explodes and scatters poisonous gases about among the soldiers, and a breath of it is enough to kill a man. The weeping shells, or lachrymatory shells, as the Germans call them, are fired with the object of blurring the eyesight of the opponents. When the shell bursts it makes the tears of those about flow in great quantities and prevents them from seeing the sights of their rifles. It contains ammonia in high degree and causes intense pain to the sufferers. The sneezing shell is much similar to it and gives off a bluish vapor on bursting, which causes the soldiers near by to go into paroxysms of sneezing, and of course prevents them from using their weapons. The air depression shell produces many deaths. Troops exposed to the violent change in the atmospheric pressure brought about by this explosion suffer exactly as do aeronauts who descend too rapidly or workmen who suddenly come into the open air after long inclosure in compressed air chambers, the effect being to release the air and carbonic acid suspended in the blood and transforming them into bubbles of gas. These bubbles are driven by the action of the heart into the capillary vessels, stopping the circulation and causing instant death. The musical shell was used by the Turks in the Dardanelles and consisted of an ordinary shell with a small iron ball attached to it by a chain, this appendage causing a curious singing noise to be made as it flew through the air.

## In The Spring

Now is the time to bring to your aid Dr. Pierce's Golden Medical Discovery (in tablet or liquid form). This wonderful remedy helps to restore stomach to its natural health and strength and to secure proper flow of the digestive juices, a good appetite and full digestion of the food you eat. It invigorates the liver, regulates the bowels and purifies and enriches the blood.

Dr. Pierce's Golden Medical Discovery is absolutely free from alcohol and injurious drugs. Its ingredients printed on wrapper. You can be certain it is a true blood-maker, tissue-builder, and a restorative nerve tonic and that it will produce no evil after-effect. Thousands—probably many of your neighbors—are willing to recommend the "Discovery" because it has made them stronger in body, brain, and nerve. Buy it in liquid form, tablets, or send Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., ten cents for trial package.

### A MOTHER'S ADVICE.

Prince Rupert, B. C.—"I take great pleasure in announcing to you my heartfelt thanks for the benefit our boy Arthur, aged seven, has derived from your medicine 'Golden Medical Discovery.' He is a different boy altogether after taking five bottles. His tongue used to be coated and his stomach and bowels always out of order, but Dr. Pierce's Golden Medical Discovery has cured him. We will recommend your medicine to whomsoever we can as we think there is none better."—Mrs. Orro Nelson, 330 2d Ave.

The C. P. R. Company has decided upon a comprehensive plan of colonization for soldiers after the war, involving the preparation of a thousand farms in Western Canada for occupation next spring. Returned veterans' colonies will be established by the Company, so that the ex-soldiers can obtain farms on which in time will enable them to support their families.

The Govt. furnished the children raised and sold the potatoes. Of this amount Bruce county children sent through the Agricultural Dept. at Walkerton \$165 towards the ambulance, or nearly one tenth of the total sum contributed by the forty counties in Ontario. Bruce children headed the Province in this respect, we believe, as did also their elders in the matter of County recruiting.

From a racial standpoint, New York presents a striking peculiarity says the World's Work. It contains more Irishmen than any city in Ireland; it is the largest German city except Berlin, and the largest Italian city except Naples. More remarkable than all this, however is the fact that the city now shelters more Jews than were ever assembled before in one place perhaps since the beginning of time. At its period of its greatest prosperity Jerusalem contained about 600,000 Jews; New York has about 1,000,000. In the greater city one man in every five is a Jew; in Manhattan one man in every four.

The Provincial Government is understood to be giving consideration to legislation which will help solve the problem of future hotel accommodation in towns and villages of the province, where the possibility exists that some hotels now operating under license may close with the enforcement of prohibition. This legislation, it is stated, will be in the direction of widening the powers of municipalities so as to give them authority to invest municipal funds in a hotel proposition, or to grant exemption from taxation or other special privileges to an individual or company of individuals operating a hotel within a municipality. With such encouragement given by municipalities to private enterprise, it is believed hotels can be operated profitably without the revenue of the bar, and provide accommodation which will be satisfactory to local and transient trade.

### Dr. McNally on Measles.

"The great difficulty we have had in combating the measles all over the district is that many people do not report the cases to the health authorities," said Dr. McNally, district health officer. "It is not necessary to await until a case has broken out before reporting. Measles become contagious four days before the rash comes. If there is even a suspicion of measles, a report should be made. There is a penalty of from \$25 to \$50 for not so doing."

The type of measles, he added, is very severe and there have been a large number of deaths not particularly from the measles, but the broncho-pneumonia which develops.

"Many people regard measles as a child's ailment; something a child must have sooner or later. This is a false idea and the sooner it is dispelled the better."

## Merchants Bank of Canada

MILDMAY BRANCH H. G. WRIGHT, MANAGER.

### Making It Easier To Get Married.

A Bill to amend the Marriage Act was introduced in the Legislature by Hon. W. J. Hanna, by which it will no longer be necessary for both contracting parties to have lived in the Province three weeks to obtain an ordinary license, as in the past. Here-after this will be possible if either one is a three weeks' resident of the Province. If neither has lived here that long, however, the law will apply as at present, a special license being necessary.

The fee is also raised from \$2 to \$5 for marriage licenses. Heretofore Ontario's charge has been lower than that of any other Province, and \$1.80 of the \$2 went to the issuer, leaving barely enough to the Government to pay printing costs. Under the new charge the fee to the issuer will remain the same, while the Government will receive enough to cover its expenses and leave a neat revenue in addition.

### Jog The Editor.

The \$1.00 weekly newspaper in Canada will soon be a thing of the past. Alberta, Saskatchewan and Manitoba have put the price up to \$1.50, and British Columbia has for some time past, been selling the weekly at \$2.00. This gives the publisher a better margin and will help him to finance more easily. The result should be a better newspaper. A poorly paid editor is like a poorly paid preacher. Living from hand to mouth does not get the best out of a man. When your newspaper goes up to \$1.50, if it does not suit you tell the editor so and give him pointers as to what he is missing that is of vital interest to you and your neighbors. It will do him good to jog him along and it will keep him up on the bit. Often a poor newspaper could be made a good newspaper if its patrons were candid with the editor and told him he had fallen into a rut. Show him you have the right to receive value for your money. If you do this you will be helping the community as well as yourself and editor.

## CREAM.. WANTED

BYRON PINK TOMATO

## FREE

A post card addressed to us as below, with your name and address ONLY on the other side, will cost but one cent. Drop it in the nearest mail box, and it will bring promptly a copy of our illustrated 50-page catalogue for 1916. With it will come also—free—a 15c. packet of

### Byron Pink Tomato

A perfectly formed tomato, the Byron Pink is uniform, large, and attractive. The flesh is firm, and the flavor delicious and full-bodied. It is a robust grower and a heavy cropper. It is an ideal tomato for forcing. You are going to buy seeds anyway; then you might just as well send for our catalogue and get this free premium for yourself.

The Catalogue tells about the other valuable premiums which we give with every order.

DARCH & HUNTER SEED CO., LIMITED, LONDON, ONTARIO, CANADA

# Production and Thrift

"CANADA from her abundance can help supply the Empire's needs, heavy thought for those upon whom the directing the Empire's affairs has been laid. Gain or no gain, the farmers of Canada is as clear as it was to produce abundantly in order to meet the demands that may be placed upon them. I believe this to be especially true in regard to live stock, the world's supply of which must be particularly affected in this vast struggle. Stress and strain may yet be in store for us all before this tragic conflict is over, but not one of us doubts the issue, and Canadians will do their duty in the highest sense of that great word."—HON. MARTIN BURRELL, Minister of Agriculture.

"MODERN war is made by resources, by money, by foodstuffs, as well as by men and by munitions. While war is our first business, it is the imperative duty of every man in Canada to produce all that he can, to work doubly hard while our soldiers are in the trenches, in order that the resources of the country may not only be conserved, but increased, for the great struggle that lies before us. 'Work and Save' is a good motto for War-time."—SIR THOMAS WHITE, Minister of Finance.

## THE CALL OF EMPIRE COMES AGAIN IN 1916 TO CANADIAN FARMERS, DAIRYMEN, FRUIT GROWERS, GARDENERS

WHAT IS NEEDED? THESE IN PARTICULAR—

WHEAT, OATS, HAY,  
BEEF, PORK, BACON,  
CHEESE, EGGS, BUTTER, POULTRY,

CANNED FRUITS, FRUIT JAMS,  
SUGAR, HONEY, WOOL, FLAX FIBRE,  
BEANS, PEAS, DRIED VEGETABLES

We must feed ourselves, feed our soldiers, and help feed the Allies. The need is greater in 1916 than it was in 1915. The difficulties are greater, the task is heavier, the need is more urgent, the call to patriotism is louder—therefore be thrifty and produce to the limit.

"THE AGRICULTURAL WAR BOOK FOR 1916" is now in the press. To be had from The Publications Branch, Department of Agriculture, Ottawa.

E. G. KUNTZ  
Toronto, Ontario.

Dated at Formosa this 9th day of Mar., A. D. 1916.

### CULROSS COUNCIL

Town Hall, Teeswater, Apr. 3, 1916.  
Council met to-day as per adjournment of last meeting. Members all present. The minutes of last meeting were read and adopted.

The engineer's report with regard to a drainage scheme known as the Pennell Drain affecting lands both in the Township of Culross and Kinloss had been received and laid on the table. The parties interested in the drain being present the report was read. When some objections were made with regard to the report by the parties interested.

Case—McPherson—That the report of the Engineer re the Pennell drain be referred back to him for reconsideration with regard to bridges, maintenance of

drain and completion of same.—Carried.  
Plans and specifications were received from the Engineer re bridge on the sixth concession known as the McKague bridge, which was laid on the table and duly considered by the Council.

Armstrong—Donaldson—That we drop the plans and specifications made by the Engineer on the McKague bridge as we consider it too costly, and that we have four cement abutments built and have two wooden structures built and placed over the two streams now in course, filling between the two structures with earth.

Case—McPherson—In amendment, That we do not adopt the plan made by the Engineer, but arrange to repair the old bridge for the present until such times as our expenses are reduced. The amendment was carried.

## The Wagon Shop That Became the Largest Automobile Factory in the British Empire

Back in 1903, the town of Walkerville, Ontario, was possessed of a concern called the Walkerville Wagon Company.

If, on some day when business was not rushing, the general manager, Gordon M. McGregor, wished to take a little stroll, he could walk around his shop in about 2 minutes by the factory clock.

Nobody would have believed at that time that this shop would, in a few years, develop into the largest plant of its kind in the Empire having a floor acreage of over 435,000 square feet and making 3 times as many cars as any other automobile factory in the British Empire. But so it has come to pass.

Through the efforts of Mr. McGregor and his Canadian associates, this wagon shop has been turned into the great Ford plant at Ford City, Ont.

The factory today is one of the industrial show places of Canada.

Here are the highest paid automobile mechanics in the Empire who put their best into the building of a car that has won its way into the confidence of the Canadian public.

Here are hundreds of machines designed by Ford engineers, which are marvels of the industrial world.

Many of them would do the work of an ordinary sized automobile company in a week or so, but because of the demand for Ford cars they are kept busy the year round.

Here a new Canadian Ford car is born every three and one-half minutes.

Here workmen are busily engaged in making additions so that the production of cars may keep pace with the demand. There never has been a time since war began when gangs of men were not at work expanding the plant, literally building for the future.

Look in at the power plant and you will see two monster 650 horsepower gas engines. What a contrast to the early days when the factory power was derived from the hind wheel of a Model "C" car!

In the immense heat treatment plant, Vanadium steel, the most expensive and best of steels, is heat-treated the Ford way. Here each steel part is especially prepared for the stress and strain it will have to withstand in the completed car.

The machine shop contains many wonderful sights for the visitor. There are long rows of very expensive gear cutting machines. And there is the great machine that mills 48 cylinders at one time! And another that drills 45 holes at once in a cylinder casting from sides, top and bottom. Marvelous speed and equally marvelous accuracy!

Then there is the handsome office building in which close to 200 workers are employed. In all there are over 30,000 people dependent on the Canadian Ford Plant for their support.

In this plant the Ford car is constructed practically in its entirety—even the steel, as mentioned above, is refined here.

Furthermore, and here is a record rarely found in other large Canadian factories, all but \$16.88 worth of the material used in the making of the Canadian Ford is bought right here in Canada. Few products can lay claim to being so strictly "Made in Canada" as the Ford car.

Consider what this means to Canadian industry when it includes such immense purchases as 25,000 tons of steel, 1,500 tons of brass, etc., 120,000 wheels, 200,000 lamps, and other materials

## Ford Motor Company of Canada, Limited, Ford, Ontario

Ford Runabout	\$480
Ford Touring	530
Ford Coupelet	730
Ford Sedan	890
Ford Town Car	780

f. g. b. Ford, Ontario

All cars completely equipped, including electric headlights. Equipment does not include speedometer.

Case—Donaldson—Whereas the auditors in their statement to this Council in February, 1916, stated that the Treasurer did not enter the Legislative grant in cash book for the year 1916 as received Dec. 31st, 1915, and it now appears that said grant was mailed to County Treasurer on Dec. 31st, and could only have been received on Jan. 1st, 1916, therefore at the request of the auditors this Council wishes to correct this slight oversight.—Carried.

McPherson—Donaldson—That we appoint Wm. Case to have washout repaired on gravel road opposite Robt. Ireland's, also sideroad 20, con. 2.—Carried.

Armstrong—McPherson—That Jos. Donaldson be appointed to have hill at lots 4 and 5, con. 10, repaired as soon as possible and a tile culvert put in at lots 15 and 16, con. 10, on gravel road.

Armstrong—Donaldson—That we change road beat No. 49 and put it into No. 50, as a petition was presented to this board demanding same.

Case—McPherson—In amendment, That we do not consider that injustice has been done the parties interested in roadbeat 49, and that we serve the beat as arranged by council.—Carried.

Finace—Phil Keffer, winter work on gravel road \$6.75; John Clark, salary as treasurer \$85; John Clark, postage and war stamps \$2.85; Robt Ireland, winter work on gravel road, \$1.25; E. J. Jackson, winter work on gravel road, \$1.25; N. Melvin, winter work on gravel road, \$1.25; Howe, sheep killed and injured \$2.25; A. McDonald, salary as treasurer \$85; Cruder, error in taxes, \$1.00; Cruder, independent \$1; Wm. Cruder, rep road \$1.00.

That the finance committee be authorized to adopt and orders issued in respect of accounts, and that this Council be authorized to meet again on Monday, April 10th, 1916, at 7 o'clock in the evening and adjourn until further notice. Reeve to call the meeting if necessary.

Young Men who are holders of departmental certificates, and who have completed High School up to the 20th grade, are recommended by the principal of the school they attend. Most young men would rather face the Hun bullets than examination papers. Girls who do Red Cross work get no special privileges.

Believers in an early peace should read once more these sentences. They were uttered by the first citizen of the British Empire, Henry Herbert Asquith, and there is not a sign anywhere to indicate that they do not stand good to-day: 'We shall never sheath the sword until Belgium recovers in full measure all, and more than all that she has sacrificed, until France is adequately secured against the menace of aggression, until the rights of the smaller nationalities of Europe are placed upon an unassailable foundation and until the military domination of Prussia is wholly and finally destroyed.'

## The Compress and Vacuum Washer

HAVE YOU TRIED IT?

Guaranteed to wash a tub full of clothes CLEAN in from 3 to 6 minutes. No wear on the clothes with this washer. Last a life time. Easy to operate. A child can use it. All for two dollars. When you get to using this washer you will use no other, even supposing you had another machine at your home. Remember I am prepared to prove every word of this statement. For sale at my store.

A full line of the best flours in the country. Also best and meals of all kinds. Wheat taken in exchange for flour and meals. Highest cash prices paid for Butter and Eggs. Get your clover and timothy seeds now as prices are advancing.

## About the Household

### Dishes With Cheese.

**Toasted Cheese Sandwiches.**—Make plain bread and butter sandwiches cut thinly and with very thin shavings of cheese between, then melt a tablespoonful of butter (if not for fasting fare, bacon fat or bacon dripping is better) and toast the sandwiches until a nice even brown; drain well, sprinkle with pepper and salt and serve hot.

**Cuban Sandwiches.**—Cut the crusts from the bread, do not butter, then lay between the slices first some crisp fresh lettuce leaves spread with salad dressing, then a layer of soft mild cheese, and lastly, some very, very thin slices of dill pickle or cucumber.

**Savory Rice Pudding.**—Simmer two tablespoonfuls of rice in one pint of milk until nearly cooked, then add one ounce of butter and a pinch of salt. Mix together and put into a buttered pie dish, sprinkle half an ounce of finely grated cheese on top and bake in a moderate oven for half an hour.

**Cheese Fritters.**—One egg well beaten with pepper and salt and a little milk. Grate three ounces of cheese, add to it the mixture with a piece of butter and a little more milk. Well butter some patty pans, fill them nearly full and bake in the oven for about 10 minutes. Serve very hot. This makes five fritters.

**Scalloped Cabbage.**—Butter a baking dish and chop finely four cupfuls of cold cooked cabbage or cauliflower. Grate one-half cup of bread-crumbs very finely and one and one-half of cheese. Make a custard of one-half pint of white sauce and arrange the cabbage in layers in the baking dish with the sauce spread between each layer. Cover the top with the grated cheese and, lastly, put a crust of the bread-crumbs, dotting it over with little dabs of butter. Bake in a moderate oven until the top is a good brown.

**Cheese Straws.**—Beat

they are removed, and then a few drops of oil should be rubbed into them. This will keep the leather soft, and prevent it from cracking.

Bait your mouse trap with fresh bacon. The mice are not so surfeited with this as with the commonplace cheese usually offered them as a diet. The bacon works wonderfully, and does not crumble and dry up like cheese does.

When you are ironing round doilies or luncheon clothes, place a piece of heavy flannel or a bath towel on the board; then lay the linen so that the threads are parallel and at right angles to the board. If placed in this way the iron will naturally move in the way the threads of the linen are woven, thus saving a considerable amount of wear and tear on your linens. Embroidered pieces should always be ironed on the wrong side of the goods.

### Miscellaneous Dishes.

**Beef Loaf.**—Take one pound of round steak and one-fourth pound of salt pork and grind together until fine. To this add one egg, one pound of cracker crumbs, a dash of cinnamon, salt and pepper to taste and one onion. Mold and bake in the oven for twenty minutes.

**Beef's Heart, Potato Dressing.**—Wash heart well and salt and pepper inside to taste. Chop three medium sized boiled potatoes and three onions together and add salt, pepper and butter. Fill heart with mixture and lay rest on top. Put in roaster with a little water and beef drippings and roast one and one-half hours. Bread dressing may be substituted, if preferred.

**Boiled Rice Custard.**—To about two cups boiling salted water add three tablespoonfuls of well washed rice, boil about twenty-five minutes, then add a little milk and a dash of sugar.

**Cheese Straws.**—Beat

## AMERICAN VIEW OF POLAND

Sorting Poland. The people here without shelter or food as the German armies overrun the country. The Chicago Tribune.

the frock has a naturally pastel color. These require much less dye than the deep shades. It is most timely that this should happen in the Summer season when we are all of us inclined toward white, pale pinks, blues, mauves, and lavenders which are so particularly fascinating this season. By Fall, if the war is not at an end, perhaps we shall all take to white, but we will not anticipate anything so extravagant unless we may take the present vogue of white shoes and spats as forerunners.

### A Word About Shoes.

While speaking of shoes, it might be well to say a word or two about the new pumps for the dainty, airy frocks of the girl of Spring and Summer, 1916. She will wear the old-time Colonial pump again with its accompanying buckles. And these buckles will be real buckles not mere pretenses, some of them measure as much as two and one-half inches across. They range from the conservative leather covered buckles to the glittering novelty in rhinestones or colored semi-precious jewels.

### RECORDS ARE KEPT.

#### Volume Appears Containing Words of Dying Heroes.

The first published collections of heroic words and actions of the war on the Franco-Belgian front has appeared in France in a volume of 300 pages, edited by Paul Souchoin. There are remarks of soldiers leaving for the front, in battle and in the trenches, anecdotes of generals and other officers, the talk of the wounded, and the words of dying heroes.

Well toward the beginning is the reply of a soldier marching through Paris, to a news vendor who offered him the latest extra, saying: "Here, my brave boy, is the latest news." "News?" replied the soldier. "It is we who are going to make the news."

Four young artillery men of the contingent of 1913 passed along the Avenue Trudaine, in Paris, on the way to the station. A pretty woman on the arm of her husband stopped on the sidewalk and cried: "Poor boys. Good luck to you," while a tear rolled down her cheek. One of the artillerymen saluted, then took off his cap, twirled it in the air and cried: "Come now, my dear lady, just a little smile please."

Two sergeant-majors chosen from a number of volunteers left the French trenches near the Vesle for an abandoned farm, where, climbing to the garret, they were able to discover the situation of German batteries that were causing considerable losses to the French troops. The French three-inchers soon forced the Germans to change their position to the very spot where these two sergeant-majors were in observation. The French gunners ceased firing until this message came over the telephone: "The guns are in position. Go ahead—you may fire, aim at us, commandant, go on, fire." The commandant hesitated to give the order, but the German battery must be silenced, and finally the three-inchers struck up again, destroying the battery and annihilating the farm with the two sergeant-majors.

Souchoin tells a similar story of a lieutenant posted in a tower of five hundred meters from the German trenches, from where he telephoned to the French artillery the positions of the enemy. During a half-hour he continued sending indications and then finished with the words: "I hear the steps of Germans who are coming up the stairs. Believe nothing more that is said to you over the wire. I have my revolver, and shall never be taken alive." Nothing has ever been since heard from this officer.

## "His Conception of Life."

Jesus Says That Life Is More Than Meat and Drink and Raiment.

"The life is more than meat and the body than raiment."—Luke, xii, 23.

It is true, wonderfully true, that "the moon is rising again and the tide of dreams once more floods the naked shingles of the world." The old starlit mystery of things is coming back, and life is once more filled full of meaning and significance. The very science that has seemed to be taking all the glory out of the sky and the divineness out of life is to-day becoming more and more mystical, or, in other words, less and less hostile toward the things of the spirit. Every day this science is confirming more clearly man's intuitive faith that he is spirit; that he does not live by bread alone, and that the meaning of his life is something mysteriously sacred, radiant and exalted beyond all mortal telling.

### The New Day Dawning.

The greatest of all needs in the world to-day is that men and nations shall grasp the spiritual conception of life. It is the absence of this conception in man's practical thinking and living that breeds all the war and strife of modern civilization. When the materialistic values of money and force and selfishness are replaced by the spiritual values of character, of co-operation and love; when man realizes who he really is and the oneness that binds him to his fellows and to God, then man's true and spiritual life will begin here upon earth. The supreme challenge of this age, in which the old materialism is struggling with the newly awakened spiritual consciousness, is a challenge to all the forces of organized religion to life up the eyes and discern the new day dawning, and then, catching the inspiration from all the new truth as taught by science and philosophy and human experience, to so preach and teach and live the spiritual conception of life that all dead or dying or outgrown forms of religion shall be forgotten.—Rev. John Herman Randall.

### God is the Universal Spirit.

With new and almost mystical note in science and the new idealism in philosophy there is also coming a new appreciation for the great principles enunciated by Jesus. Apart from all theological considerations, we are coming to think of Him as holding the same place in the realm of the ethical and spiritual life that was held by Copernicus or Newton or Darwin in the realm of physical science. Like them, Jesus was a discoverer of eternal laws, a formulator of the inherent methods, a definer of fundamental principles—laws, methods and principles which are just as true, universal and inevitable in the moral and spiritual realm as are the laws of gravitation or of evolution in the physical. And when Jesus says that God is the Universal Spirit, the All Father, and that we are literally His children, that we came forth from Him and possess His life as the

## THE SUNDAY LESSON

INTERNATIONAL LESSON.  
APRIL 16.

Second Quarter. Lesson III.—The Gospel for the Gentiles—Acts 10.

Golden Text: Rom. 10: 12.

Verse 25. Worshipped—While the word does not in itself imply more than reverence paid to a superior by prostration, it is clear that no Roman noncommissioned officer would have behaved thus to a Galilean fisherman: Peter's interpretation of the act was perfectly correct.

26. Even an angel similarly repudiated such worship (Rev. 22: 9). The lowly Jesus accepted it (Matt. 8: 2, etc.).

28. Unlawful—According to the rabbin, who had added this and many other far-reaching novelties to the Law. Even to come unto a Gentile was forbidden, not to speak of close intimacy (join himself). And yet—the latter word has no right in the text; see the paraphrase above. Any man stands in a very emphatic place at the end. Peter has learnt the lesson Paul expounds in Co. 3: 11. Yellow, brown, or black men—to modernize his words—must be regarded by Christians as simply men, and therefore brothers. Common—Compare Mark 7: 2. It is the antithesis of consecrated.

There is a scavenger class in Benares, the Doms, for whom Hinduism has no temple that will admit them, though one shrine there will admit a dog. Christianity came and took them all in; and at least one Dom is to-day a Christian preacher. The holy of holies is open to every sharer in that humanity which Christ put on: "God cleansed" (verse 15) all mankind potentially by the incarnation.

30. Four days ago—We say three, for the ancients counted in the first and last days, and we do not. Suppose Cornelius speaking on a Friday afternoon: his vision was thus on Tuesday. The ninth hour—Except in the Fourth Gospel only the third, sixth, and ninth hours are mentioned in the New Testament, with the eleventh for a special purpose. They are absolutely vague, and are best rendered by forenoon, noon, and afternoon. Only the observant John speaks of hours that needed a sundial to fix them. The three prayer times are those implied in the psalmist's Evening and morning and at noon will I pray.

31. Thy prayer—The petition just offered. Thine alms—The practice of charity. The motive of which God could read; apply Matt. 6: 3, 4, and remember that the American Version openly there is spurious.

33. In the sight of God, as in verse 31, makes all human witness pass into forgetfulness. The Lord, on the lips of the still unevangelized Roman, means Jehovah.

44. It is of course implied that this company of earnest seekers—Jews in faith because they knew nothing better—accepted the Gospel of which Peter's presentation has just been summarized. Note Peter's statement in Acts 11: 15, that he had hardly more than begun.

45. Was poured out—So in Acts 2.

33. The gift—A recurrent term. See specially Heb. 6: 4, and Acts 8: 20. We find its source in the Master's own word, Luke 11: 13. How appropriate is that verb that speaks of the lavish profusion of Him who "giveth not the Spirit by measure"! Joel 2: 28 might have taught these Jewish Christians to be so surprised.

46. Speak with tongues—See Lesson Text Studies for January 9. Of course this was only the "outward and visible sign of an inward and spiritual grace"; the overflowing ecstasy of a Divine possession produced these snatches of praise.

47. The greater has been given—how could prejudice itself refuse the less? See Acts 1: 5, quoted when Peter defends himself in Acts 11: 16. Notice how there Peter emphasizes the overwhelming predominance of Divine agency: a few words from the messenger who had come so far were quite enough. This verse should be remembered when ecclesiastical pedants would tie the Holy Spirit to sacraments and orders and red tape generally. "The fruits of the Spirit" are the one sufficient proof of His Presence, and when that is manifest, "the water" is only the poor human recognition of a fact registered in heaven.

48. He commanded—So Peter left the recognition rite to be conducted by others. Just so Paul was "sent . . . not to baptize, but to preach the gospel" (1 Cor. 1: 17). And the Master "himself baptized not, but his disciples" (John 4: 2). In this way from the first was emphasized the secondary importance of the rite as against the preaching of Good News. It was a warning against that purely magical view of "baptismal regeneration" into which the church so soon fell, and largely holds to-day. In the name of Jesus Christ—the invariable formula of the apostolic age, except for Matt. 28: 19. The Trine Name is but the logical sequel of the primitive Creed, "Jesus Christ is Lord."

### Was Not Impressed.

A young housewife was showing a new and inexperienced servant about the house, explaining the various duties that would be hers. In an upper hall they came suddenly to the head of the stairs, and the lady said:—Nancy, you will go down this way always." And with that the lady slipped and stumbled, going down the stairs with many turns and bumps. The new maid was frightened and said:—"Lor, missus, I'm afraid I won't suit you at all. That way of going down stairs is a bit too dangerous for me."

### Why He Was Whipped.

Tommy came home school in tears. "What is the matter, darling?" asked his mother. "Teacher whipped me," he sobbed. "What for?" "Nothin', 'cept answering a question." "That is very singular. Did you answer it correctly?" "Yes, ma." "What was the question, dear?" "She asked me who put the mouse in her desk."

### The Pessimist's View.

"Father," said the small boy, "What's an optimist?" "An optimist, my son, is a man who tries so hard to be cheerful that you feel sorry to see over-working himself."

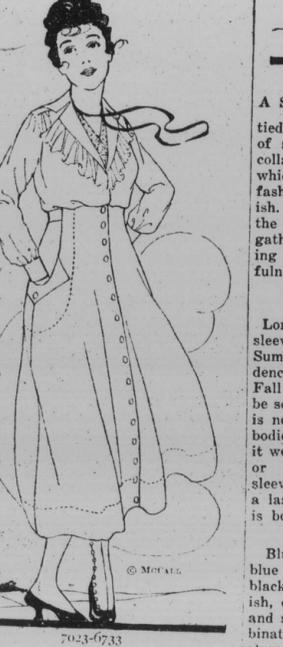

## The Fashions

### The Latest Smart Features.

For those of us who have, as it were, stacks and stacks of passe frocks to be remodeled, this should prove of banner season. Fashion has been very lenient with our little economies for several seasons past, but this Spring, whether it is the war, with its consequent deprivations to many, which has turned her in this direction, or just because she fancies evolving the odd little conceptions and combinations one sees on every side, certain it is that economy just now is being made very easy and very fascinating.

### Girdles, Bretelles and Jumpers.

Let us suppose for instance, that one has a dark blue serge dress of last season. It may not be worn to any great extent but nevertheless it needs something to make it look more

The Sport Skirt and Jäbot Blouse

up to date. We may add a deep skirt yoke and a high girdle with perhaps a bretelle over each shoulder, of black satin or moire.

Cuffs and collars, too, add greatly to the effect. When cleverly done,

A Smart Use of Blocked Broadcloth.

tied in a perky little bow. Deep cuffs of satin or taffeta with a matching collar may be attached to a blouse which has an unbecoming or old-fashioned sleeve, or an ugly neck finish. When these deep cuffs are used the sleeve, if sufficiently full, may be gathered into the cuff, thereby lending another modish touch, for much fullness is noticed in the new sleeves.

### Sleeves Offering Interesting Possibilities.

Long, short, and three-quarter-length sleeves will be worn this Spring and Summer. There is still a strong tendency to the transparent effect of the Fall and Winter. That this should be so for Summer is quite logical. Net is nearly as popular for sleeves and bodices as chiffon and Georgette, and it wears equally well. Many a pretty or satin frock is made with net sleeves and upper bodice, and many a last season's taffeta or satin dress is being remodeled in this way.

### Color Combinations.

Blue serge naturally takes to black blue faillie combines effectively with black, many shades of grey, the greenish, copy tones, orange, terra-cotta and similar shades. These dark combinations of course are correct for the street; for the indoor dress or afternoon gown, one may allow the color-fancy a little freer rein. There are some wonderfully vivid touches of color brought in now and then in a sombre frock, quite transforming it.

As a general rule, however, pale tones will predominate this season. This is, owing to the present condition of

### Household Hints.

Always use tools in cleaning which absorb rather than scatter the dust. Bureau scarfs of scrim do not soil easily and are quite pretty.

Ammonia water, instead of soap, for cleaning white paint, will clean it perfectly without dulling.

A bit of butter put into the top of the apples before they are baked will give them a richer flavor.

When making a boiled pudding be sure that the vessel is full to the top. If there is any space, water will get in and the pudding will get heavy.

To string beans perfectly, wash them, plunge them into boiling water, let them stand for three minutes and drain, then every particle of string will come off.

Automobile or other kinds of grease will come off washable materials if a small piece of butter is rubbed into the spot. Wash with soap and rinse.

Vegetables which grow below the ground should be put in cold water for cooking, those which grow above the ground should be plunged in hot water.

A slice of bread put into the cake or cookie jar will preserve the contents. You have probably noticed the glass of water which is used in the same way by the baker.

Hard cheese is more digestible if grated. Certain people can eat cheese prepared in this way, who cannot digest it in any other form.

When new shoes pinch immediately and lasting relief can be obtained from the application of a cloth wet with hot water, and laid across the shoe while it dries.

All a moderate oven from a quick one? Here is the cook's test: Place a teaspoonful of flour in the oven on a pan. If it burns while you count 12 the oven is quick; if it burns while you count 30 the heat is moderate.

The young should be not only encouraged to save out of their small allowances or earnings, but they should also be taught how and when to spend.

Patent leather shoes should be carefully wiped off with a soft cloth when

**It Is Quite Possible  
for persons to get mixed on the  
Breakfast Food Question**

Something new claims attention almost every week. Most of them seem to stay, so they must be good.

We have all the old favorites and all the new claimants that have merit and that are likely to prove popular.

And we try to buy them as soon as possible after being manufactured so that they will be perfectly fresh.

It's a feature of this store to have stocks so complete that you can ask for about anything in the shape of eatables and get it.

A few of the most popular breakfast foods and our prices—

Roman Meal,	25 cts per pkg.
Quaker Oats	25 "
Shredded Wheat Biscuit	15 "
Puffed Rice	15 "
Puffed Wheat	12 "

Grape Nuts	15 "
Etc., etc., etc.	

**Schefter Delivers Promptly**

We want to thoroughly impress this on your mind. If you want anything in a hurry, if you want it delivered, and delivered "right away", telephone or leave your order in person, and you'll get it "right away". Phone No. 21

Terms—Cash or Produce.

**LIVE STOCK MARKETS  
TORONTO.**

Receipts of live stock at the Union Stock Yards yesterday were 180 carloads comprising 2289 cattle, 8314 hogs, 68 sheep, 300 calves and 701 horses en route to France.

Out of the 2289 cattle reported on sale there would be fully 2000 offered for sale as fat. There was a good demand with the market fully 10c higher than a week ago for all classes of fat cattle.

Butchers Cattle—Choice heavy steers of Easter quality, \$8.75 to \$9; choice butchers cattle, \$8.50 to \$8.75; good butchers, \$8 to \$8.50; medium, \$7.60 to \$7.90; common butchers, \$6.75 to \$7; choice cows, \$7 to \$7.25; good cows, \$6.25 to \$6.50; medium cows, \$5.50 to \$5.85; common cows, \$5.50 to \$5.85; common cows, \$5 to \$5.50; choice bulls, \$6 to \$6.75; good bulls, \$6.50 to \$6.75; common bulls, \$5.25 to \$6.

Stockers and Feeders—Feeder, short-keep, 950 to 1000 lbs., \$7.50 to \$7.75; steers, 750 to 850 lbs., \$7 to \$7.35; common rough stockers of less weights, \$6.50 to \$6.75.

Milkers and Springers—Choice milkers, \$85 to \$95; good cows, \$65 to \$75; common cows, \$50 to \$60.

Veal Calves—Choice veal calves, \$9.50 to \$10.25; good calves, \$8.50 to \$9; medium, \$7.50 to \$8; common, \$4.50 to \$6; heavy fat calves, \$6 to \$7.

Sheep and Lambs—Light sheep, \$9 to \$9.80; heavy sheep, \$7 to \$8; culs, \$6 to \$6.50; choice lambs, \$11.50 to \$12.50; sulk lambs, \$8 to \$11; spring lambs, \$8 to \$10 each.

Hogs.—Selects, weighed off cars, \$11.50; \$11.75 fed and watered; \$10.80 f. o. b. cars. For heavy, fat, thin, light hogs, 50c per cent will be deducted; \$2.50 for stags from

of one per

of how the

new from a w e n

automobile works in

Liesemer and Kalbfleisch

agents for these famous cars.

There are two ways of spending a dol-

lar. You can spend it at home and

gain an easy conscience, make another

friend and perhaps get the dollar back

to-morrow; or you can send it away and

feel that you have sinned, offended the

home merchant, and forever lost the

dollar and the blessed influence for good

to yourself and neighbor.

Some people persists in walking on

the railway tracks at the risk of their

lives, not to say that the authorities are

on the lookout to have such people pro-

secuted. The attorney general is deter-

mined to put a stop to this dangerous

practice, and if there are prosecutions,

offenders have themselves to blame.

Deserter Got Six Months.

William Earl McFarlane of the Sauble,

who enlisted as a private with the 34th

Battalion, but who after training with

that force and drawing Government pay

for a considerable time, deserted the

colors prior to the departure of the Bat-

talion for overseas duty, and later enlisted

at Wiarion with the 160th Bruce force,

was arrested as a deserter on an infor-

mation laid by Capt. Ross Clark of Walk-

erton, and was sentenced on Tuesday to

six months in the Walkerton jail. The

new law against desertion is especially

strict, and will hit hard that class known

as "the professional enlisters," whose

specialty is jumping the job before their

Battalion crosses the sea and signing up

with newly recruiting forces, thus keep-

ing themselves in khaki but never get-

ting any nearer to the fight.

Ex-Greenock Boy Robbed.

Frank Kirscher, son of Mr. and Mrs.

John Kirscher of the Durham road near

Inniskillen, and who left Greenock about

thirteen years ago for the States, has

been the victim of several robberies near

Harlem, Montana, where his granary has

been entered and many loads of white

flax stolen. While in Harlem working

with the police on these robberies his

place was again visited and an additional

fifty bushels of flax swiped. As he was

the only one in that section who had this

particular kind of flax, the neighboring

elevators were watched and grain mer-

chants notified. As a result three men

who later tried to market the grain were

arrested, while the State was thrown in-

to a lively sensation by the implicating

of several prominent farmers in the thefts.

One neighboring farmer, who was found

with the white flax in his possession, is

in jail, and the Courts are busy making

the other agriculturalists explain where

they got their supply.

A mean beggar named Somers, who

lived in Alboro' Tp., Elgin County,

sparked Mary Schmellz for six years and

refused to marry her, after agreeing to

do so last fall. The fair maiden with the

Teutonic sounding name, was not going

to be put off that way and said Duncan

would have to pay for changing his mind

Twelve jurymen at St. Thomas after list-

ening to Mary's story decided that \$500

was necessary to heal the wound. Som-

ers was not even gentlemanly enough to

attend the court.
