George Taylor, M.P., to-day introduced to the Minister of Finance Chillian Jones and William Byers, a deputation of manufacturers from Gananoque, who presented a petition that petroleum for fuel purposes be admitted free when imported by manufacturers. The petition sets forth many manufacturers have put in expensive machinery for using petroleum mixed with air as fuel. Petroleum them forces \$1 per barrel, now it costs \$1.36, owing to Canadian supply giving out, and unless they are allowed to import it free they will have to take out their machinery and revert to use of coal.

Of course nobody but a fool expects to be a public servant and escape abuse. It is four years now since I drew a coach for the Senator, and in that time what I have not learned is not worth learning, but if I have learned one thing above all others it is that a public character cannot escape public abuse.

To keep pace with the varying changes in the headwear of our fashionable belles would probably puzzle any one but those dealers who are directly interested. This season more new shapes have been introduced than usual; and now that the boating and according time.

During the past few months a new play has been extensively billed to appear on the parliamentary stage. Such Liberal organs have aroused a rare expect-

ancy.

It is said to contain the most signal triumph of virtue over vice that the brain of playwright or novelist has yet conceived. The great central episode, of course, is the complete overthrow of the wicked and wily Macdonald and the exaltation of the virtuous and good Laurier. Cartwright has been given the role of a blunt friend to the risk his life in unmasking the villain. And when his valiant work is done he will accept no praise, saying that any man would have done the same—or, to use the exact words of Playwright Edgar:

Operating lines there would be two set of wires, poles and operators, and the business man to get the same telephone accommodation as at present would require two instruments. This would create endless confusion, expense and vexation, which would end only when one company swallowed its rival.

Bulldozing tactics deserve to fail. It is certain that they do not strengthen a faltering cause. If ratepayers desire to communicate their wishes to the City Council, let the petitions go before that body in regular session, and not find their way into the hands of individual aldermen like a Mafia warning. Playwright Edgar:

No man who really is a man Could lesser feat perform.

Landerkin is the jovial doctor who darts in from the upper left hand corner of the stage and resuscitates the hero at various critical periods when the villain and his mercenaries have left him for dead with his head cut off and his body dismembered, but head cut off and his body dismembered, but with a timely application of microbe killer and Sellar's cement the doctor fits him up as

good as new.

The last act, where virtue prevails and his decrepit the aged villain and his decrepit band of sordid rascals shamble past in irons for the penal ship anothored in easy view, is said to be tearful in the extreme. in irons for the penal ship anentreu in the extreme. view, is said to be tearful in the extreme. With bowed heads and trembling hands, with averted eyes and subdued spirits they with a subdued spirits they will be a subdued spirits they are subdued spirits they will be a subdued spirits they will be a subdued spirits they are subdued spirits they will be a subdued spirits they are subdued spirits they will be a subdued spirits they are subdued sp odd and sundry ones indulging maudlin chatter that bespeaks minds unstrung—a weak driveling parade, the final totter of weak driveling parade, the final totter of many totters. As the motley crew files past the hero, reclining on a gorgeous dais with all his virtuous aides near by (and Speaker Edgar in the chair) there is a spasm of silence, in which one can hear the price of binding twine drop. So exhaustive are the villains that spectators realize that death must come ere the painted ship can weigh its painted anchor.

The United States Superintendent of Cen-THE IDEAL LOWN WERR OWN AND PRESENTING TOWN OF THE PARTY CONTROL OF THE sus has just issued a bulletin giving statistics upon insanity. In the asylums of the country in 1881 there were 56,205 patients under treatment, and in 1889 the patients numbered 97,535. This shows an increase of 78,55 per cent, in nine years. These figures

Should the next decade show such an increase as the past one, it is morally certain that some eccentric statistician will build up a plausible theory that mankind is growing insane and that in a given number of years an era of universal lunacy will be ushered in, when some will have the farming mania, others the mining, the sailing, the mechanical, the journalistic or the gentlemanly mania. But these are details for the eccentric statistician to dwell upon.

The Toronto Telephone Company can scarcely be congratulated upon the methods by which it seeks to gain business privileges from the City Council. To waylay different aldermen with intimidating petitions ostensibly signed by ratepayers calling upon them to give the new company the required privileges cannot be regarded as honest enterprise. Such bulldozing tactics are not likely to create a good impression of the new company in the popular mind. the was the practice. To freely bandy charges of bribery and acouse members of clvic committees of corrupt friendship with the Bell Telephone Company can in no way benefit the rival concern.

The World has taken open ground on this telephone matter. The Bell Company has been first in the field, and if it will pay a suitable figure for the privileges asked, and provide a service as good as possible, it would be a poor business speculation to throw it overboard. such is the plot of the play as restitutions and to which the writer does not be sure there is evidence of some hitch in the cast. It is even said that the villain, contrary to all stage rules, refuses to adhere the his lines in the last act, and persists in triumphing over the virtuous hero, and setting him afloat in the penal ship without provisions. SMART LISTENED TO . HE JUDGE

And Did Not Hear Compilments—A Number of Judgments Delivered.

The Court of Appeal sat yesterday and delivered judgment in the following cases: At the commencement of the court Æ Irving, Q.C., moved for leave to set down for argument the case prepared by the Attorney-General in regard to the Local Option Bylaw. The court thought that the several municipalities should be notified of the motion, and directed that notice should be given them.

The first case in which judgment was delivered was that of re Smart infants. This was an appeal from the judgment of Mr. Justice Ferguson at the trial in favor of the mother of the infants and directing that she should have the custody of the children. Chief Justice Hagarty, Mr. Justice Osler and Mr. Justice Meredith, who sat on the appeal in place of Mr. Justice Maclennan, gave judgment dismissing the appeal and upholding the judgment of Mr. Justice Ferguson. The Chief Justice spoke in anything but complimentary terms of Mr. Smart's conduct and said that the charges made by him against his wife could not be nelieved. Mr. Justice Burton dissented from the judgment of the court and thought the appeal should be allowed. Smart was present during delivery of the judgments and heard them through without funching.

Beaty v. Smart.—This was an appeal from the judgment in favor of the plaintiff of Mr. Justice Rose in an action for the recovery of possession of certain land in the town of Port Hope. The appeal was dismissed with costs.

Long Point Co. v. Duncan, Long Point Co. v. Anderson.—There was an appeal in each case from the judgment of the Queen's Bench Divisional Court reversing the judgment of Mr. Justice Maclennan refusing to prohibit the judge of the County Court of Norfolk and the plaintiffs from proceeding with certain actions in the Division Court. The Division Court actions are for damages for deer killed by the defendants on the plaintiffs' premises without license. The court allowed these appeals with costs.

The Division Court actions may now be proceeded with.

damages for delay in delivering a certain barge, The Victor, sold by the defendant to the plaintiffs. The court dismissed the appeal with costs.

Parlow V. Graham,—An appeal by the plaintiff from the judgment of Mr. Justice MacMahon at the trial in an action for the balance of an account for merchandise supplied to the defendant. The defendant set up a counter claim which was allowed, and from this the plaintiff appealed. The appeal was dismissed with costs.

Redmond v. Can. Mut. Aid Assn.—An appeal by the defendants from an order of the Queen's Bench Divisional Court setting aside the judgment of Mr. Justice MacMahon in favor of the plaintiff upon the findings of the jury in an action tried at Whitby, and directing a new 'trial. Action by the widow of a deceased person upon a benefit certificate in the nature of a life insurance policy. The court allowed this appeal with costs.

AS SCOTCH AS THE BAGPIPES.

Caledonians Elect New Members and Have a Fine Sotree. President Robert Swan occupied the chair at the meeting of the Caledonian Society last night in Association Hall. There was a goodly turnout. These new members were received: Arthur Mowat, Alexander Gibb, William Gregg, Sergeant Galloway, "C" Company, William McBean, James Mc-Adam, John Donaldson. To attend the N. A. U. C. A. in Pittston, Pa., on July 3 these delegates were appointed: W. D. McIntosh, Robert Swan, July 3 these delegates were appointed: W. D. McIntosh, Robert Swan, William Simpson, D. M. Robertson, William Adamson, Hugh Miller. A capital program of reading, recitations and songs as Scotch as the bagpipes was rendered. The performers were Dr. Clark, John Imrie, Colin Burgess, John Smeall, Henry Wright.

The annual excursion of the society will take place to Niagara Falls on July 23. A letter was received from Mr. John Donaldson, honorary secretary of a committee which has in hand the collection of subscriptions from Scotchmen the world over for the purpose of purchasing a corner in the field of Bannockburn whereon to erect a statue of Robert Bruce. Action will be taken in the matter at the next meeting.

She grew better at once and was well in a week.

The torturing pains and distressing nervousness which accompany, at times, certain forms of "female weakness," yield like magic to Dr. Pierce's Favorite Prescription. It is purely vegetable, perfectly harmless, and adapted to the delicate organization of woman. It aliays and subdues the nervous symptoms and relieves the pain accompanying functional and organic troubles.

Dr. Pierce's Favorite Prescription contains no alcohol to inebriate, no syrup or sugar to ferment in the stomach and cause distress; is as peculiar in its curative effects, in the diseases that afflict womankind, as in its composition. It's a legitimate medicine—an invigorating, restorative tonic, a soothing and

sjek headache, bilious headache, dizziness, constipation, indigestion, bilious attacks and all derangements of the liver; stomach and bowels. It's a large contract, but the smallest things in the world do the business—Dr. Pierce's Pleasant Pellets. They're the smallest, but the most effective. They go to work in the right way.

They're the cheapest pill you can buy, because they're guaranteed to give satisfaction, or your money is returned.

You only pay for the good you get.

That's the peculiar plan all Dr. Pierce's medicines are sold on, through druggists.

The success of Bellamy as a suburb of Toronto does not depend upon the srection of factories or other industries, in fact we do not want them. Bellamy is to be a purely residential district and practically an integral part of Toronto.

All the business that will be encouraged at Bellamy will be such a retail trade as will be essential to supply local consumption and other absolute necessities. The land is so the bear of the lots are so large that any ordinary family can profitably raise all the fruit and vegetables necessary for their maintenance the year round, besides having playing grounds, lawns, flower gardens, etc.

If a member of the family should be ill it would not be necessary to travel to California, Florida or other remote parts of the earth and thus spend the accumulation of family

grounds, lawis, flower gardens, etc.

It a member of the family should be ill it would not be necessary to travel to California, Florida or other remote parts of the earth and thus spend the accumulation of family savings; all that would be necessary would be to abandon regular occupation and work in savings; all that would be necessary would be to abandon regular occupation and work in the garden for a few weeks—nature and Bellamy ozone would do the rest.

Scarboro township has been famed for half a century as a most fertile farming and famous for its immense gravel deposits, but Bellamy is a fine, rich clay loam, land famous for its immense gravel deposits, but Bellamy is a fine, rich clay loam, land famous for ming a magnificent amphitheatre. From the summit of the heights the undulating, forming a magnificent amphitheatre. From the summit of the beautiful lake and the surrounding country can be viewed for 50 miles, and while the beautiful grades give perfect natural drainage, they are not at all abrupt and do not in any wise interfere with travel either by vehicles or pedestrians.

The general situation or views we will not attempt to describe, as anything that our feeble pen could write would be little less than a libel upon the grandeur and beauty of the lake view and the wooded hills that are being converted into an immense park. The unilake view and the wooded hills that are being converted into an immense park. The unilake view and the wooded hills that are being converted into an immense park. It is said that this is an inoppertune time to noat a scheme of this nature, owing to the amount of unoccupied land within and adjacent to the city.

We state advisedly that there are people enough in and about Toronto to occupy every acre of land within ten miles of the corner of King and Yonge-streets in every direction except south, if it were only within their means. We do not claim that such a territory would be densely populated and solidly built up, nor is that desirable. The modern city should be a rural city, with cheap, comfortable and rapid means of transit to and from the business combras.

business centres.

Two great difficulties that enterprising people have to contend with in opening up a new place are price and accessibility. Some enterprising speculator sees that some district is coming into popularity and he buys from ten to one hundred acres and puts it on the market, but then the speculator has to pay a popular price for a popular place, and it keeps rising in popularity and passes through the hands of various other speculators, who keep rising in popularity and passes through the hands of various other speculators, who keep raising the price, and long before it reaches the actual occupant the price is so high that raising the price, and long before it reaches the actual occupant when he does secure it walks a long way to a street railway terminus for five or six years until the place is sufficiently populated to warrant the extension of the old, effete refrigerator horse car system.

The two difficulties last mentioned are not all; there is a third greater than all others combined, high price and absence of cheap and rapid means of conveyance are simply negacombined, high price and absence of cheap and rapid means of conveyance are simply negacombined, high price and absence of cheap and rapid means of conveyance are simply negacombined, high price and absence by competition and enterprise, but the third is an active, tives that it is possible to overcome by competition and enterprise, but the third is an active, more or less wealthy, ignorant, purse-proud and positive difficulty, that is the fool native. He could formerly be found almost anywhere. He once thrived in St. Matthew's Ward in great numbers, but he became converted and joined in the procession of progress, and not great numbers, but he became converted and joined in the procession of progress, and in "Chesters" ment. In many places the fool native is quite extinct, but he still flourishes in "Chesters" ment. In many places the fool native is quite extinct, but he still flourishes in "Chesters" ment. ment. In many places the fool native is quite extinct, but he still flourishes in "Chester" like a green bay tree, has a predominating influence there, controls the votes, liberties and even the form of worship of a majority of the residents, he owns the County Council and holds a predominating influence in the Provincial Legislature, he stands in the way of his own interest and that of the whole community.

ALL REVERSED AT BELLAMY

We purchased the land long before any one thought it would be popular. We bought it at a slight advance on regular farm prices.

We bought it at a slight advance on regular farm prices.

Our estate is so large (nearly 2000 acres) that a very reasonable profit per acre will prove to be a big thing to a company composed of few members.

We desire to realize quickly and let the occupant get the greater part of the increment, and while we will sell any resident person all the land he may require for the actual use of himself and family, we will not sell more than two lots to any non-resident person. This is himself and family, we will not sell more than two lots to any non-resident person. to debar those who toil not and spin not from taking advantage of

industry of the people.

We are accused of inconsistency. It is said that we are endeavoring to do all the speculating and thus make a monopoly of it. That may be so, but unlike others we are giving lating and thus make a monopoly of it. greater value than the public can get elsewhere, and not only that, but we by skill, enterprise and labor have actually created by far the greater part of the value that we are offer-

we have rapid and comfortable transit already established by the G.T.R., and it will constantly be augmented and improved. Bellamy, unlike certain places within a mile of Toronto, has no fool native population. The people of the front of Scarboro have some idea of the possibilities of the place, they knew that the opportunity would come to them some day and they had sense enough to welcome it and take advantage of it when it came. The people who live at Bellamy now are of the same stock of sturdy, honest, kindly, unsecuping records who have lived there for three-quarters of a century and more honorable ning people who have lived there for three-quarters of a century and more honorable

assuming people who have lived there for three-quarters of a century and more nonorable and respectable neighbors no community could wish for.

No, we have no fool natives. The people and their representatives ecoperate with the company in every possible way to advance the public interest.

We do not wish to experiment with impracticable, revolutionary or Utopian schemes nor change the current of human destiny faster than history and experience will warrant.

Several new and pleasing fastures have been incorporated in our scheme. nor change the current of human destiny faster than history and experience will warrant.

Several new and pleasing features have been incorporated in our scheme. They are not without precedent, and we are simply putting them into every day practical operation for the general benefit. The people can enlarge upon them to any extent that results may

W. JAMES COOPER, Estate Agent, 15 Imperial Bank Buildings, Leader Lane.

Everything tended towards depression. The especially unhappy feature of to-day had to do with the continuance of gold exports. About 256 millions was announced for shipment to-day and to-morrow. The air, was full of rumors concerning distresses abroad and there were surgestions that important interests here were affected. Few facts are needed to propagate rumors in such a market with conditions as now prevail, and it is very probable that we shall speedily discover that most of the grave reports lately current had precious little foundation. As we pointed out a week ago, however, every factor market wise has been tending towards the creation of a bearish sentiment and the knocking down of quotations, and resuits have justified this view of the situation. But indications, as they now appear, suggest that the bear campaign has been somewhat overdone. A big short interest has been put into the market. This is especially true as to the grangers. Burlington has dropped half a dozen points. St. Paul, Rock Island, Atchison, all have yielded materially, there has been an average decline of something like 5 points and this means a good deal. It represents the discounting of very many bad conditions. All the sentiment of the street is bearish, every little fellow is betting on the bear side. The smaller traders who were long of stocks have been forced to liquidate. The weakness at the moment is on the bear side, they have something to hurrah over, but anything like a smart rally would force a covering stampede. J. Gould told a frienu to-day that he thought too much capital had been made of the gold shipments; we are only lending this gold, he says, we can hardly predict any extended bull movement nor any restoration of outside confidence till gold shipments cease, but we believe a short interest has been created large enough to start a smart rally, with the least encouragement to renewed buying."
