TORONTO:

PUBLISHED AT THE W. M. BOOK ROOM,
 No. 9, Wellington Buildings, King Street.

N^o. 5.} J. H. LAWRENCE, PRINTER. { Continued
 annually.

PRICE—Three Pence Halfpenny.

ECLIPSES IN 1847.

There will be two Solar and two Lunar Eclipses in 1847.

1. A partial Eclipse of the Moon, March 31st. Opposition in right ascension, 35 minutes past 4, afternoon. Invisible throughout Canada.

2. A total Eclipse of the Sun, April 15th. Conjunction in right ascension, 42 minutes past midnight. Invisible in America; total to parts of Australia and the Indian Ocean.

3. A partial Eclipse of the Moon, September 24th. Opposition in right ascension, 49 minutes past 9, forenoon. Invisible throughout Canada.

4. An annular Eclipse of the Sun, October 9th. Conjunction in right ascension, 33 minutes past 3 forenoon. Invisible throughout America. Central and annular to the Southern parts of Ireland and England, parts of France, Spain, Austria, Turkey, Italy, Syria, Persia, Hindoostan, Birmah.

THE TWELVE SIGNS OF THE ZODIAC.

Or the 12 equal divisions of the Ecliptic, through which the Sun passes in his apparent annual revolution, and the days on which he enters each.

♈ Aries, the Head and Face. March 21.

| | | |
|---|--|--|
| <p>♊ Gemini, the Arms. May 21.</p> <p>♌ Leo, the Heart. July 23.</p> <p>♎ Libra, the Reins. Sept'r 23.</p> <p>♏ Sagittarius, the Thighs. Nov'r 22.</p> <p>♐ Aquarius, the Legs. Jan'y 20.</p> | | <p>♉ Taurus, the Neck. April 20.</p> <p>♋ Cancer, the Breast. June 21.</p> <p>♍ Virgo, the Bowels. August 23.</p> <p>♏ Scorpio, the Secrets. Oct'r 23.</p> <p>♑ Capricornus the Knees. Dec'r 22.</p> |
|---|--|--|

♒ Pisces, the Feet.—February 19.

The Moon passes through the Twelve Signs in about 27 $\frac{1}{8}$ days.

CHRONOLOGICAL CYCLES, &c.

| | | | |
|---------------------|----|------------------------|------|
| Golden Number | 5 | Dominical Letter | C |
| Egypt | 14 | Roman Indiction | 5 |
| Solar Cycle | 8 | Julian Period | 6560 |

The year 5608 of the Jewish Era commences 11th September.

Venus is the Evening Star until 1st Oct'r, then Morning Star remainder of the year.

THE JEWS.

PRESENT NUMBER OF JEWS.

Some erroneous statements concerning the existing number of the seed of Abraham in the world, have drawn out from Mr. Noah, of New-York, the following statistics. Mr. N. is said to be well informed respecting the condition of this people, and we presume the estimate is to be relied on as accurate. The total number of Jews he places at full six millions, which are divided and located as follows:—

| | |
|---|-----------|
| In all parts of ancient Poland, before the partition of 1772 .. | 1,000,000 |
| In Russia, comprehending Moldavia and Wallachia | 200,000 |
| In the different States of Germany | 750,000 |
| In Holland and Belgium | 80,000 |
| In Sweden and Denmark | 6,000 |
| In France | 75,000 |
| In England | 60,000 |
| In the Italian States | 200,000 |
| In all North and South America, and the West Indies..... | 100,000 |
| In the Mohammedan States of Europe, Asia, and Africa | 3,000,000 |
| In Persia, China, and Hindostan | 1,000,000 |
| Total | 6,471,000 |

The United States government, though carrying on extensive armories of its own, has recently contracted with a private company in Connecticut for the supply of 30,000 pistols, at six dollars and fifty cents each; or 195,000 dollars' worth of these weapons so much in vogue with duellists and assassins. The American Bible Society congratulates itself on receiving, the past year, one hundred and sixty-six thousand, six hundred and fifty-two dollars, the aggregate of all that has been given through the Union for the dissemination of the Word of Life at home and abroad. So it goes; Christendom expends more in one year on the means and instruments of human slaughter, than has been given to the promulgation of the Gospel since Jesus Christ died on the cross!

| 28 | Sun | Napoleon left Elba 1815. | 6 29 | 5 32 | 13 | 5 25 | ♁ | 11 |

In 1842, there were produced, in the United States, 100,000,000 bushels of wheat, and 140,000,000 bushels of Indian corn; which, at the rate of one dollar per bushel for the former, and twenty five cents for the latter, were worth one hundred and thirty-five million, five hundred thousand dollars. Fifteen per cent, clear of the interest of the capital invested in lands, implements, hired and personal labour, is a liberal estimate of the profit accruing to the wheat and corn grower. Then the profit of this amount of grain would be twenty million, three hundred and twenty-five thousand dollars. The appropriation to the army and navy, during the same year, was twenty million, one hundred and fifty thousand, five hundred and one dollars. In other words, the army and navy ate up the whole harvest of wheat and corn throughout the Union! Will not the hard-working farmers think on this fact?

From March 4th, 1789, to June 30th, 1844, the United States government expended on the War Department six hundred and sixty-three million, four hundred and thirty-eight thousand, eight hundred and fifty-one dollars. The interest of this sum, at six per cent, would build Whitney's great railroad from the lakes to the Pacific, of 2500 miles in length, at fifteen thousand dollars per mile; and thus erect a highway for the commerce and communion of the family of nations, which should be reckoned in all coming time as one of the greatest enterprises that ever blessed the race.

Calicoes were first printed in London in 1676.
 The quantity of Lead shipped from Galena in 1844 was about 43,000,000 pounds. This year it is estimated that the amount will be 60,000,000 pounds.

Last Quarter, Thursday 8th, 6 min. past 10, forenoon.

The mercantile shipping of the civilized world amounts to about 8,000,000 tons, which is worth, new and old, thirty dollars per ton, and nets, clear of interest, insurance, &c., ten per cent, or twenty-four million dollars per annum. The appropriation to the British Navy for the current year, is thirty-three million, six hundred and twenty thousand, two hundred dollars ! Is not this a sober fact, that the annual expense of one nation's navy exceeds the net profit of all the mercantile shipping owned by the civilized world ?

The war debts of the European nations amount to ten thousand million dollars, (ten billions). It would require the labour of four millions of men, at one hundred and fifty dollars per annum for each man, to pay the interest of this sum at six per cent. To pay the principal, it would be necessary to levy a tax of at least ten dollars on every inhabitant of the globe !

The debt of the Netherlands, contracted, as all national debts are, to meet the expenses of war, past or prospective, amounts to \$665,000,000. To liquidate this debt would require a tax of three dollars and twelve and a-half cents on every inhabitant of Europe, and seventy-five cents on every individual on the globe. Divided among the population of Holland, the share of each inhabitant would be \$266. The wages of labouring men, throughout the world, probably do not average twenty cents a day. Then, at that rate, three thousand three hundred and forty millions of hard-toiling sons of labour would have to work one day in order to foot this war-bill of little Holland!

The annual loss to Great Britain by shipwreck, is 610 ships, 15,000 lives, £2,000,000 sterling!

Printed votes were first introduced into the British Parliament in 1681.

England granted \$4,000,000,000 to replace the Bourbons on the throne of France. The interest of this sum, at 5 per cent, would be \$200,000,000 annually; which would go so far to place the Saviour on the throne of this alienated world, as to support a standing army of 400,000 missionaries of the Gospel in Pagan lands and Christian lands paganized by systems of grinding oppression and moral degradation. The interest of the money would build 10,000 miles of rail-road every year, until the habitable globe were intersected by the iron highways for the nations. The amount or principal, if divided among the 314,000,000 inhabitants of Europe, would put \$18 69 cents into the hands of every individual!

In Italy there is one insane man to 4879, in France one to 1000, Wales one to 800, England one to 862, Scotland one to 574, Russia one to 666, United States one to 500. Amongst the Chinese, insanity is almost unknown.

In 1816 the British Government, in perfect peace, victorious, and tranquil, spent £86,000,000 sterling, no part of which was applied to the extinction of the National Debt. In 1824 its expenditure exceeded £67,000,000. In 1844, the latest period to which the accounts have been completed, its expenditure was reduced to £55,000,000.

In 1816 the interest of the National Debt amounted to £33,500,000; it is now reduced to £26,000,000, and £4,000,000 on temporary annuities, which are gradually disappearing year by year. Whilst Great Britain was achieving these splendid results, she was effecting a vast reform in the manner and extent of her public burdens.

Between 1815 and 1841, a balance being struck between taxes increased and taxes diminished, this power has abolished an amount of £24,000,000 of taxation, and in 1845 suppressed a further sum of £6,000,000.

The taxes abolished are those especially which paralyse industry, and oppose obstacles to the superiority of British commerce over other nations.

In effecting this, do not imagine that England has abstained from carrying out gigantic enterprizes, sustaining mighty struggles, and defending her wide spread dominions with an armed hand. She possessed, in 1816, 80,000,000 of subjects; she now numbers 100,000,000. Canada revolted; the revolt was suppressed by force. Her will was contested in the Syrian question; her ships decided the matter. China resisted the odious commerce in opium; an expedition after the manner of Cortes subdued the Celestial Empire. Two seas existed, the entrance of which was not under the command of England, the Chinese Ocean and the Red Sea. Aden and Singapore have completed the chain of forts which bind the commerce of the world.

In 1816 England was, without exception, the state most heavily burdened by the weight of taxation. She is now, in proportion to her wealth, less taxed than France. Thirty years ago England spent £86,000,000 sterling, while France spent but the half. In 1844 England spent £55,000,000, whilst France has expended £57,500,000.

A wife should have nine qualifications, which begin with the letter P. Piety, perseverance, patience, prudence, patriotism, politeness, persuasion, penetration, and portion. That which *should* be first of all, and *most* of all in consideration, which is *piety*, is now-a-days the *least* of all, the *last* of all, and with many *not* at all. That which *should* be the *last* of all, and *least* of all in consideration, which is *portion*, is now become *first* of all, *most* of all, and with some *all* in all.

Plumb Pudding for the Million.—Take half a pound of flour, half a pound of currants, half a pound of grated carrots, half a pound of grated potatoes, a quarter of a pound of suet, and a little seasoning, mix them together, and boil them in a basin an hour and a half. You will then have an excellent plumb pudding for a trifle more than a sixpence! Just try the experiment.

To take stains out of Silk.—Mix together, in a phial, two ounces of lemon, and one ounce of oil of turpentine. Grease and other spots in silk are to be rubbed gently with a linen rag dipped in the above composition.

The number of cows kept in London and environs, is estimated at 9000, which produce annually 23,300,000 quarts of milk, valued at £720,000.

The number of newspapers published in the United States and Territories in 1839, was 1555. Of this number there were published in New York 274; Pennsylvania 253; Ohio 164; and Massachusetts 124; together, more than half the whole number. In each of the cities of New York and Philadelphia there were 71—a larger number than in any of the States, except those above mentioned. In Boston there were 65; Cincinnati 27; New Orleans 10; the State of Louisiana 26; Baltimore 20; Washington 11; and Richmond 10.

It is stated that of all new-born infants, one out of four dies the first year; three-fifths only attain the sixth year; and, before the twenty-second year, nearly one-half the generation is consigned to the grave. Attained to the age of maturity, 1 out of every 30 or 40 individuals die annually.

| New Brunswick..... | 17,280,000 | | Prince Edward Island | 1,360,000 |
| <p>In order to make the comparative size of these territories the more apparent, it may be well to append the following :—</p> | | | | |
| | | | ACRES. | |
| England and Wales | | | 36,999,680 | |
| Ireland | | | 20,399,360 | |
| Scotland | | | 18,000,000 | |
| Total..... | | | 75,399,040 | |

The whole area of our North American Provinces alone is more than twice as great as that of all France, which is 130,370,840 acres ; but while France has a population of 35,000,000 of people, these provinces have only an united population of 2,000,000 by the largest computation that can be made. Of this vast area there are not more than 30,000,000 of acres granted, and of these not more than 5,000,000 cultivated.

LAKE SUPERIOR.

This immense inland ocean is four hundred and ninety miles in length, and is seventeen hundred in circumference—being the largest body of fresh water in the globe. It contains many islands—one of them, the Isle Royale, is one hundred miles in length, and forty in breadth. Upwards of thirty rivers empty themselves into it, and one curious fact in relation to it is well ascertained, that the quantity of water discharged through the Sault Ste. Marie, is not one-tenth what it receives from its tributary streams. Evaporation must, therefore, be the principal agent in keeping the lake down to its usual level.

POPULATION OF CANADA.

According to the latest census, the entire population of Lower Canada is 690,782. Natives, of French origin, are in number 524,307 ; of British origin, 83,860 ; of the Continent of Europe, 1,326. The number of natives of England is 11,859 ; of the United States, 11,946 ; of Ireland, 43,982 ; and of Scotland, 13,393.

The population of Upper Canada is estimated at 632,570.

MANY FACTS IN FEW WORDS.

A legal stone is 14 lbs., or $\frac{1}{8}$ of 100 in England, and 16 lbs. in Holland. A fathom, 6 feet, is derived from the height of a full grown man. A hand, in horse measure, is 4 inches. An acre is 4840 square yards, or 69 yards; 1 foot $8\frac{1}{2}$ inches each way. A square mile, 1760 yards each way, contains 640 acres. The human body consists of 240 bones, 9 kinds of articulations, or joinings, 100 cartilages or ligaments, 400 muscles or tendons, and 100 nerves, besides blood, arteries, veins, &c. Potatoes planted below three feet do not vegetate; at one foot they grow thickest; and at two feet they are retarded two or three months. There are no solid rocks in the Arctic regions, owing to the severe frosts. The surface of the sea is estimated at 150,000,000 square miles, taking the whole surface of the globe at 197,000,000 square miles. Its greatest depth is supposed to be equal to the height of the highest mountain, or four miles. Fresh water begins to freeze at 32 degrees, called the freezing point; but salt water does not freeze till $38\frac{1}{2}$ degrees. Of 100 parts into which the surface of the earth may be divided, Europe contains 7, Africa 21, Continental Asia 33, New Holland, &c. 8, South America 15, North America 16. A cylinder of water may be converted into ice by placing in it 5 lbs. of sulphate of soda, and 4 lbs. of sulphuric acid, at 36 degrees, well mixed. The ice is extracted for use by putting the cylinder into hot water. Extreme cold produces the same perception on the skin as great heat. When mercury is frozen at 40 degrees below zero, the sensation of the skin is the same as that of touching red hot iron.
