### DISTRICT AND GENERAL

Watford citizens are rejoicing over their new cement pavement, just finished.

The era of high shoe prices is practically ended, New England manufacturers say.

Corn production in Southern Colorado fields has decreased 40 per cent. due to use of corn for fuel.

During 1920 in the United States 9,103 persons were killed by automobiles and other motor vehicles.

Thieves broke into Dickson's store at Timminsville a few nights ago and stole about \$25 worth of clothes.

The 5-cent loaf is coming back all over the United States, according to the Department of Labor, due to the tumble in wheat.

John Lather, a well-known farmer near Ekfrid, was almost instantly killed when the balance wheel of his tractor flew off and struck him.

It is stated that there will be no change in the fees for automobile licenses next year, but it is proposed to place a tax on gasoline purchased by motorists.

If coal proves too expensive, fill your furnace full of corn. It's cheaper. So declared U. S. Secretary of Agriculture, Wallace, after making a study of comparative prices.

The Michigan Central Railroad Company makes a free distribution of newspapers to passengers on two of their principal trains running between Chicago and New York.

L. J. Judson, formerly of Petrolia, was killed at Tampico, Mexico, when an automobile he was driving overturned into a ditch full of water, pinning him underneath. Deceased was an oil operator.

A new experimental farm is to be established at Ridgeway where the Government has purchased the 190-acre farm of J. B. Brien, a well-known livestock farmer. The price paid, it is understood, was \$40,000.

Major Harry Gage died at his home in Forest on November 7, his 74th year. He was born near Hamilton, but was a continuous resident of Forest for 50 years. He leaves six daughters and one son.

The largest shipment of cattle from Alisa, Craig this season was made on November 12th, when over 500 head, 27 cars in all, were booked for Liverpool. About 20 young men of the district went with the cattle to take care of them.

The majority of the local hunters who went north have returned and report deer as very plentiful. With few exceptions, the hunters received full quotas. Bears were observed and several shot. Weather conditions were excellent.

From injuries received when she fell down a flight of stairs leading to the basement in the home of her brother, Miss Selma Bateman, 66 years old, died last week. Besides her brother at whose home she was staying when the accident took place she was survived by her brother, Charles.

John Edie, bachelor, aged 30, applied for a license to marry Mrs. Alice Temple, aged 65, a widow of Toronto. Mr. Edie is a sheep rancher in rural Ontario. Forty years ago he came out from Scotland and has been living alone since then. He told the license issuer that he thought it time he married and settled down. He said he had not felt so well since his marriage came in, as he had been used to a wee wee as a constable. He looks about 65 and expects to live to be over a hundred years old.

Muckay brothers, living between Campbellton and Dutton, sustained a heavy loss Monday night of last week when their fine brick house and barn were totally destroyed by fire. The fire appears to have been of incendiary origin, as it started in both places at the same time and a can which had contained kerosene was found in the vicinity. The season's crop and most of the implements were destroyed in the barn, but the house, being unoccupied, contained no furniture. The loss will be about \$10,000, with some insurance.

The village of Streetsville is faced with a 62 mill rate the next two years. This is the outcome of a defeated by-law authorizing an issue of debentures to pay for the new cement roadway which was built first, then submitted to the people. The result is that the money will have to be raised in two years instead of twenty. The money to pay the bank will be raised one year and the money to pay the contractor the next. In 1922 the tax rate will be raised eight mills over the 1921 rate and seven mills extra imposed in 1923.

William Main of Trafalgar township was summoned before the justice magistrate of Haldimand county and fined \$50 and costs for shooting black and grey squirrels. When Mr. Main had explained that the squirrels had eaten holes into his granary and done a lot of damage to his grain, the magistrate reduced the fine to \$30 and costs. As the result of the game inspector of Chatham granting farmers permission to shoot the squirrels in the district on account of the wholesale destruction done to their grain by them, Mr. Main will likely ask the provincial game warden or the department to refund the fine imposed on him, at 12 cents, he killed the squirrels to save his crop, the same as the farmers of Kent are doing with the permission of the game inspector.

Renew your daily paper subscriptions at the Transcript office.

### FEDERAL NOMINATIONS

Nominations for the federal elections have lined up a remarkable variety of candidates from coast to coast. Unlike the 1917 elections, when there were many acclamations, there will be fights in nearly every riding, and in the great majority of constituencies three-cornered contests.

The total number of candidates far exceeds the number in any previous election. In the nine provinces 631 candidates are in the field for 235 seats. This may vary one or two in the final returns. Of these the Government have 211 candidates, Liberals 144 and Progressives 144 and Labor and Independent about 74. For the first time in history women candidates make their appearance in a Dominion election, and five have been nominated, representing different political opinions. Three of them are in Ontario—running as Liberal, Labor and Progressive—and one in Winnipeg. No woman is running as a Conservative candidate in any part of the Dominion.

In West Middlesex the candidates are Duncan C. Ross, Strathroy, Liberal and former representative; Geo. Elliot, Parkhill, Conservative, a former candidate; and J. D. Drummond, Alisa, Craig, Progressive (U.F.O.).

### LIBERAL MEETINGS

Meetings in the interest of D. C. Ross, the Liberal candidate in West Middlesex, will be held at the town hall, Newbury, on Tuesday evening, Nov. 29, and at the town hall, Glencoe, on Wednesday evening, Nov. 30. Meetings will commence at 7:30 o'clock. The speakers are J. C. Elliott, K. C. C. M. Macfie and Mr. Ross.

### DIED IN THE WEST

Robert J. Webster, formerly of Strathburn, died in the hospital at Lloydminster, Sask., on Monday, following an operation for appendicitis. He leaves besides his wife, who is a daughter of the late Alexander Cameron of Mosa, four brothers, Dr. D. S. W. J. George and Charlie, and one sister, Margaret. The funeral will be from the old homestead at Strathburn on arrival of the body from the West. Mr. Webster was in his 50th year.

### SUES PARENTS-IN-LAW

The Advertiser says:—Mrs. Muriel Jean Sheppard of Bothwell, through her solicitor, J. M. McEwen, K.C., has issued a county court writ against her parents-in-law, Clayton B. and Janet Sheppard, of Mesa Township, for \$250 to recover possession of a mahogany bed, a vase, two blue rugs and a vanity dresser which she alleges she brought to their home at the time of her marriage to their son, Wm. H. Sheppard, in December, 1920. Mrs. Sheppard further alleges that she was driven away from the home on July 16 by her husband, who then went to the United States, where he is obtaining a divorce.

### GLENCOE HIGH SCHOOL

The regular meeting of the literary society was held on Nov. 17. A few visitors and the pupils enjoyed a quiet but interesting program. The president, R. D. McDonald, was in the chair, and the following program was given: Instrumental, L. Garbutt; duet, Olive Black and Vesta Clark; debate, "Resolved that homework should be abolished," proved very interesting. The affirmative was upheld by Jessie Currie and Alex. Munroe, and the negative was taken by C. Lawrence and J. D. Gillies. The decision was given in favor of the affirmative. The Oracle was read by Jean McEachern, and Miss Steele gave the critic's report. Vesta Clark Show your interest in the school by attending their annual commencement on Nov. 29.

### J. N. CURRIE & CO.'S VOLUME OF BUSINESS AGAIN ON THE INCREASE

October sales went well ahead of October of last year, with November sales promising a still larger increase. It means about double the sales have to be made for same volume of business on account of prices averaging about half of last year's prices. Many great selling events, cleaned up the surplus stocks of higher priced goods. As a result of exceptional purchases effected recently for cash, the retail prices now in many cases are less than manufacturers' regular prices. Merchants who are trying now to unload their high-priced goods, which should have been disposed of at a loss a year ago, are not only going to meet heavier losses now but are handicapped in not having the new better-quality merchandise at the new lower prices. This store is among the few in Canada today that can show such gratifying results.

### METCALFE COUNCIL

A meeting of the Metcalfe council was held on Nov. 14, with the members all present. A large number of accounts were passed for payment. It was resolved on motion of J. E. Griffith re Waddell and Kellam-Waddell drains be not considered. On motion of McNaughton and Hawken the council expressed itself in favor of all women having the municipal franchise. Council adjourned to meet on December 15th, at 10 a.m.

### MEDICAL SCHOOL OPENED

The new medical school of the Western University at London, built at a cost of more than \$500,000, was officially opened Thursday afternoon, Nov. 17, by Hon. R. H. Grant, Minister of Education, and Hon. Dr. W. J. Roche of Ottawa, Chancellor of the Western University, were among the speakers for the occasion.

Arthur T. Little, chairman of the Board of Governors, drew attention to the fact that the erection of the new home for the medical college has been made possible by the generosity of C. R. Somerville, Philip Pocock, Lieut. Col. T. S. Hobbs, Major G. I. Ingram and George M. Reid, who had made large cash donations and given personal guarantees. He said that the university is to be aided by the ratepayers in December, and if it carries the Ontario Government will make a grant of \$1,000,000 in five annual instalments for maintenance, and in addition \$500,000 for the erection of new buildings. Middlesex county will grant \$100,000 on the same condition. When work begins on the new home for the arts department it is pointed out, about \$1,000,000 worth of other buildings, including many for Roman Catholic institutions, will follow.

### CHRISTMAS MAILS

Glencoe, Nov. 21, 1921.

To the Editor of The Transcript:—Dear Sir,—In view of the approaching Christmas season and to facilitate the handling of parcels and correspondence, I wish to bring before the public, through your paper, the necessity for early mailing of parcels and correspondence intended for delivery before Christmas in Great Britain and other places overseas. British parcels should be mailed in ample time to connect with steamers sailing from St. John or Halifax the first week in December.

Those wishing to purchase money orders for payment abroad are requested to do so by the first of December or as soon thereafter as possible. Unless the advance of these orders reach the different exchange offices in time to be certified for dispatch by the Christmas mails, the intentions of remitters to have payment effected before Christmas will be defeated.

Yours truly,  
W. A. Currie, Jr., Postmaster.

### TWENTY YEARS AGO

Li Hung Chang dies.  
Thanksgiving Day, November 28, Glencoe cheese factory advertised for sale.

Charlie Clarke has aim cut off in Grand Trunk yards.  
Local bagers secure 4,500 turkeys in Glencoe vicinity.

New Baptist church at Mayfair opened, November 10.  
Glencoe fall cattle fair. Butchers' cattle show of sale at 25c.

Rev. C. F. Purton preaches in Wardsville English church.  
Burglars take \$75 worth of goods from George Precious' store.

Wheat 69c, eggs 19c, butter 19c, potatoes 55c a bag, hay \$5.50.  
Daigley Bros. ship carload of horses for Glasgow at Glencoe.

Sutherland-Innes stove mill and McKenzie's saw mill are operating.  
W. F. M. S. of London Presbyterian holds 15th annual meeting in Glencoe.

Glencoe's new Grand Trunk and Wabash passenger station burned on November 1st.

Rev. Alex. Wilson resigns as pastor of Newbury and Wardsville Presbyterian churches.

Railway tool house at Pratt's Sid. ing burned. It was the last relic of what was once quite a busy place.

Some advertisements—E. A. Surbey, jeweler; J. H. Hicks, tailor; D. McLachlan, hardware; George Parrott, grocer; J. A. Young & Sons, dry goods; Woolen Mills, R. C. Vause; harness, R. Stevenson.

### SOUTH EKFRID

The third annual meeting of the South Ekfrid U.F.O. club was held in the school house on Friday evening, Nov. 11, when the officers for the ensuing year were elected as follows: President, R. D. Coad; vice-president, Roy Smith; secretary-treasurer, Alex. Coulthard; directors—W. H. Arnold, Tom Brown, James McRae, John Tait, Peter Duncanson, Tom McDonald. It was decided to have a literary society for the winter, to meet every two weeks, the first meeting to be held Friday evening, Dec. 9th. At the close of the meeting the ladies served a very appetizing lunch.

### EKFRID STATION

We are glad to hear that Melvin Murray is better after a severe attack of rheumatism.  
Willie Campbell, pupil of S. S. No. 3, Ekfrid, won the highest number of points at the Appin school fair, and has received an honorary certificate from the department of agriculture.

A U.F.O. meeting will be held in S. S. No. 3 next Friday evening, Nov. 25. A good attendance is being looked for as this is the annual meeting.

The Eureka Community Club will meet at the home of Mrs. W. P. Cornelle on Thursday next, Dec. 1st.

Fred Eaton is visiting his son Clarence in Toledo.  
Tanlaue will overcome that run-down debilitated condition and make you feel just like your old self again.—P. E. Lumley.

# Soils and Crops

Address communications to Agronomist, 72 Adelaide St. West, Toronto.

## I Keep My Hens Laying When Eggs Are Dear.

I have found that the secret of making the chicken business pay is to get hens to lay when prices are high. When I first started I found that the problem was to get hens to lay in November and December, and so, for two years I have been giving much thought and attention to our hens during these two months. This extra effort has been decidedly profitable. At first I was not very successful, but this year I have been getting eggs which bring a premium of five cents the dozen above market price.

My plan is to raise early pullets, culling the flock carefully during November. When I find a hen or pullet with close, tight pelvic bones, a small dry vent, long toe nails, and dull comb—all hallmarks of a poor layer—that hen is branded for market by putting a piece of red wax on her leg. During the holiday season is a good time to get rid of these loafers, as there is a demand for them then at a good price.

Selling hens in November and December helps also to keep your monthly income balanced, as you can never expect to secure as many eggs at that time as during the other months. Also, by reducing the size of the flock in November and December, the better hens have more room during the winter months when they must be confined indoors. The reduction in the feed bill helps too.

In culling our flock recently, I was surprised to find a lot of body lice on a few hens. This led to a second examination of each hen. The roosts and nests were carefully cleaned, and treated with kerosene; then every hen was powdered with sodium fluoride to kill the lice.

During November and December my chickens are fed most carefully. Early every morning they are given warm milk; their houses are cleaned out, and floors covered with rakes and alfalfa hay. The hens immediately begin to scratch, and soon get up a good appetite for a late breakfast.

I have large hives in my hen houses, so that the hens scratch and work in the sunshine. If the weather is at all favorable, I allow them to run out during the warmest part of the day. At about 11 o'clock grain is scattered through the rakes. At present I am feeding corn, oats, and barley. At one o'clock a warm mash is set before them. This varies, as hens, like people, enjoy variety. To-day I cooked large, coarse beet, to which is added warm milk and a little bran. To-morrow I may feed small cooked potatoes. I often scatter sunflower heads among the rakes. Liberal quantities of skim milk and cool, clean drinking-water are available at all times.

At four o'clock a liberal amount of grain is fed. This is placed where they can easily get it, as hens must be well fed before retiring if you expect them to lay. Oyster shell, gravel, and a dry mash in hoppers are always on hand.

I never keep a sick hen or a persistent loafer. It doesn't pay. I kill them at once, and make a post-mortem. This prevents disease from spreading, and my little flock is thus kept healthy at all times. I visit my chickens at least four times a day, and observe them carefully. Chickens, like cows, respond to a kindness and attention. They flock around me and "caw-caw" in the most friendly manner. I believe that a happy and contented hen lays better.

From a flock of about 50 hens and about 25 pullets, I have gathered in early December from 8 to 15 eggs a day, and our pullets are just beginning to lay nicely. I plan to keep 40 Rhode Island Reds and 20 White Leghorns in my cull flock. I find in our cold climate, where we have many nights below zero, that our Reds lay better. Last November, however, one

of our purchased White Leghorn pullets laid 21 eggs in 30 days and several other White Leghorn pullets did almost as well.

I gather the eggs several times a day during cold weather, and any that are frozen or questionable are kept for our own use. By delivering our eggs, and by guaranteeing every one, I get the top price. I plan to enlarge my plant until I can market at least a case of eggs a week the year round. The care of chickens is my special hobby and recreation; I hope to make it a large, well-paying business.

In the twelve months of 1920 my little flock of 60 early pullets and young hens laid 10,806 eggs. This is how my account sheet looks:

Sales—738½ doz. eggs at 48 1-3c	\$356.94
Used—162 doz. eggs at 48 1-3c	78.30
Sold—10 fries at \$1.00	10.48
Used—10 fries at \$1.00	10.00
Total	\$455.72

In addition to the above total of \$455.72, I had left a well-culled flock of 60 hens, ready to begin another year's work.

## Kootenay Hive Case for Wintering Bees.

Possibly no phase of agriculture has advanced so rapidly as that of beekeeping. In many lines of farming our methods are much the same as they were a hundred years ago. With beekeeping there has been a great evolution, and to-day utensils and methods are standardized throughout the whole country. Beekeepers, however, are constantly on the lookout for new and still better methods of carrying on, and in the Kootenay Hive Case there is a form of winter and summer protection that possesses more virtues and less faults than many of the systems now in vogue.

The Kootenay Hive Case is an improvement on the double-walled hive. It has been introduced in the form of a permanent hive case, and is made to take the ten-frame hive. There is a three-inch space all around the brood chamber and supers. Up to the top of the brood chamber it is kept permanently packed with moss or planer shavings the year round. This is covered with small pieces of wood to prevent the moss from falling into the hive when open. Beneath the floor of the brood chamber there is also a three-inch space packed with moss.

The stores, or "lifts," are all alike, and, as supers are added, extra lifts are put on. The cover is similar to the ordinary cover, but is made of eighths of an inch larger all around than the top of the case, while small triangular blocks nailed in each inside corner, raise it and insure ventilation. This opening also affords a means of escape for bees that may have become entrapped while working over the hive.

To pack for winter all that is necessary is to have one "lift" above the brood chamber packed with moss or planer shavings. To facilitate the packing we have pillows made from moss and gunny sacks just the size of the story or lift. The cover is then added and the bees are packed for the winter. The only attention required is to keep the entrance cleared of dead bees.

The bees have more winter protection in this case than in the double-walled hive, while the temperature in the hive is cooler and more uniform in summer. There is no trouble of packing in the fall and unpacking in the spring as in the case of the ordinary double-walled hive or the Ontario wintering case. It is less expensive than the double-walled hive, as it is constructed largely from ship-lap. The bees come through the winter in good shape and commence work early in the spring. Beekeepers would be well advised to give it a trial as it has many excellent features.

## Christmas Suggestions.

Old Santa is coming! Ho! Ho! He will soon be harnessing his reindeer to his sled to call by your gifts, so you cannot have them ready too soon.

A few gift suggestions may be welcomed by our readers.

A pair of embroidered pillow cases or a cunning little lamp shade covered with bright colored organdie and decorated with a tiny bunch of yarn, ribbon or chenille flowers will be just the thing for Mother's spare room. She will love one of the new appliqued or embroidered luncheon sets of unbleached muslin to save her table linen and a new crocheted hug-me-tight or a lovely lavender knitted shawl all for her own self.

For Father there are comfy slippers and some of the pretty linen handkerchiefs trimmed with the colored drawn-in threads.

Grandmother will welcome a new embroidered sewing basket decorated with a bunch of chenille flowers, or a string of the sealing wax beads to wear with her "best" dress. Tiny crocheted-covered boxes filled with home-grown flower seeds or little ribbon gatchets of lavender will also come in handy.

Aunt Martha may find time to shake out the moth balls from her

# Hogs

Rations for growing pigs, fattening hogs, young sows, old sows, growing hogs, and mature hogs are given in the following paragraphs. These rations are used by leading swine raisers:

Growing pigs: Corn one, skim-milk two to four parts by weight.

Corn five to seven, middlings one, tankage one.

Corn four to six, ground oats two, middlings or ground rye two, tankage one.

Corn full fed, four pound tankage a pig daily.

Corn, tankage, and middlings or oats in self-feeder.

Good forage should be used with the above rations, two or three pounds of corn per 100 pounds of pigs should give gains of from one-third to three-quarters pounds a pig daily. If more than three pounds are fed, each pig should receive daily in addition from one-quarter to one-half pound of tankage or from three to eight pounds of skim-milk, and gains of from three quarters to one and one-half pounds can be expected.

Fattening hogs: Corn one to two, skim-milk one.

Corn fifteen to twenty, tankage one. Corn and tankage in self-feeder.

Corn, tankage, and middlings or oats in self-feeder.

Old sows: Corn two, skim-milk three.

Corn eleven, tankage one.

Corn nine, middlings two, bran one, tankage one.

Corn two, oats one, alfalfa or clover hay.

Corn five, oats five, tankage one, alfalfa or clover hay.

Corn 100, tankage seven, oil meal three.

Corn one, oats one, middlings one.

From one to two pounds of grain for each 100 pounds live weight are sufficient for the sows during the gestation period, and from two to three pounds while suckling litters.

More laxative rations may be needed than some of the foregoing.

Young sows: Corn two, skim-milk three.

Corn nine, tankage one.

Corn nine, tankage one, alfalfa or clover hay.

Corn six, oats three, tankage one.

Growing hogs: Corn one, skim-milk two.

Corn five to seven, middlings two, tankage one.

Corn four to six, oats two, middlings one, tankage one.

Mature hogs: Corn nine, middlings two, tankage one.

Corn eight, middlings two, bran one, tankage one.

The breeding herd should have access to forage. The cost of feed and labor can be reduced and the health and vigor of the herd maintained by its use.

Surplus apples, potatoes, vegetables, and other secondary commodities about the farm can this year be converted into money. Thrift tells in times like these.

November is a hungry month. The nip of the frosty air reminds the body that it will soon need extra defenses for the winter. The children must have plenty of the kinds of food that they should eat, so that they will not fill up on things that they must not eat.

Suppose, we said, that Jane sleeps from seven o'clock until seven, then in a year she has 4,380 waking hours—and only 1,000 of those hours are spent in school during the year. What of the 3,380 hours remaining? Who is teaching Jane, then? She is certainly learning. Sometimes her playmates are her teachers, with lessons sometimes helpful, sometimes harmful. The father's teaching hours are limited to Sundays and holidays with an occasional evening hour; the Sunday School teacher may get twenty-five hours a year; but of course, the real teacher is the mother. Every day of the year, she teaches her little daughter; even during the child's sickness lessons continue, lessons of patience, gentleness and self-control.

If anyone were to ask of the school teacher that she teach music, art, literature, domestic science and manual training, she would know it was impossible. And yet, that is just what is demanded of the mother as an educator.

Music! Yes, she is teaching music when she sings at her work or helps Jane select good music for the Victrola instead of jazz. And as she arranges her home tastefully, with appropriate pictures, she is often unconsciously forming the child's taste in art.

"What stories shall I read to the children?" the kindergarten teachers are asked again and again by eager mothers who feel that ordinary "trashy" stories are not good enough for the

children who are so greatly influenced by the stories they hear and read. The mother knows—this wise mother-educator who is asked to teach domestic science, how necessary it is for her little daughter to learn helpfulness in household duties. "I can't iron big things yet but I can iron the handkerchiefs, daddy's and mother's and John's and mine," said little Jane with pride.

Actions are judged right or wrong according to mother's approval or disapproval. She is, indeed, the great teacher of morals. "Slip in behind those people so the conductor won't see you," I heard a woman say to a little boy one day as I was boarding a crowded street car. He succeeded in "fooling the conductor" and in getting a definite lesson in cheating and in dishonesty.

Religious training, as well as moral, is part of the great task and the joyous task of the teacher-mother, and is it not a glad sign for future Canada that so many mothers of our great country are, in their hearts, uniting in the prayer of "Motherhood," so beautifully written by Eleanor Robbins Wilton?

"So short a time at my command These children that I hold to-night, God give me grace to understand, Wisdom to guide their steps aright That I may be throughout the land, A lamp unto their feet for light."

"So short a time do small hands cling, With confidence of babyhood, Let me not idly dream the thing, But live the noble part I should, That henceforth from such mothering They shall instinctively seek good."

"So short a time for my embrace, For love, cheer, comfort, lullabies, God help me hallow the brief space That turns to gold each sacrifice— So surely does a mother's grace Build her soul's mansion in the skies."

What a time for my embrace, For love, cheer, comfort, lullabies, God help me hallow the brief space That turns to gold each sacrifice— So surely does a mother's grace Build her soul's mansion in the skies."

What a time for my embrace, For love, cheer, comfort, lullabies, God help me hallow the brief space That turns to gold each sacrifice— So surely does a mother's grace Build her soul's mansion in the skies."

What a time for my embrace, For love, cheer, comfort, lullabies, God help me hallow the brief space That turns to gold each sacrifice— So surely does a mother's grace Build her soul's mansion in the skies."

What a time for my embrace, For love, cheer, comfort, lullabies, God help me hallow the brief space That turns to gold each sacrifice— So surely does a mother's grace Build her soul's mansion in the skies."

# Sheep Notes

Grain feeding of sheep during the early winter months is not absolutely essential where a leguminous roughage and good corn silage or roots are available; but the best results are obtained when a small amount of grain is fed regularly throughout the winter and increased just previous to lambing. Two parts whole oats and one part wheat bran, by measure, make a good mixture. If some grain is fed during the winter, less will be required near lambing time. Old ewes especially, need plenty of good feed to bring about maximum results.

Corn full fed, four pound tankage a pig daily.

Corn, tankage, and middlings or oats in self-feeder.

Good forage should be used with the above rations, two or three pounds of corn per 100 pounds of pigs should give gains of from one-third to three-quarters pounds a pig daily. If more than three pounds are fed, each pig should receive daily in addition from one-quarter to one-half pound of tankage or from three to eight pounds of skim-milk, and gains of from three quarters to one and one-half pounds can be expected.

Fattening hogs: Corn one to two, skim-milk one.

Corn fifteen to twenty, tankage one. Corn and tankage in self-feeder.

Corn, tankage, and middlings or oats in self-feeder.

Old sows: Corn two, skim-milk three.

Corn eleven, tankage one.

Corn nine, middlings two, bran one, tankage one.

Corn two, oats one, alfalfa or clover hay.

Corn five, oats five, tankage one, alfalfa or clover hay.

Corn 100, tankage seven, oil meal three.

Corn one, oats one, middlings one.

From one to two pounds of grain for each 100 pounds live weight are sufficient for the sows during the gestation period, and from two to three pounds while suckling litters.

More laxative rations may be needed than some of the foregoing.

Young sows: Corn two, skim-milk three.

Corn nine, tankage one.

Corn nine, tankage one, alfalfa or clover hay.

Corn six, oats three, tankage one.

Growing hogs: Corn one, skim-milk two.

Corn five to seven, middlings two, tankage one.

Corn four to six, oats two, middlings one, tankage one.

Mature hogs: Corn nine, middlings two, tankage one.

Corn eight, middlings two, bran one, tankage one.

The breeding herd should have access to forage. The cost of feed and labor can be reduced and the health and vigor of the herd maintained by its use.

Surplus apples, potatoes, vegetables, and other secondary commodities about the farm can this year be converted into money. Thrift tells in times like these.

## What Not to Do When Trapping

BY GEORGE J. THIESSEN

Most guides to trapping tell chiefly what to do on the line. Little attention is given handicaps that must be avoided. Since they are important—probably as much so as anything else—it would be well to consider the various things which the pelt hunter should not do.

First of all, a great many young trappers—and some old ones too—take dogs with them over the ground. This is probably natural when the animal is a companion. However, the scent often remains for days; something easily detected and dreaded by minks especially. The dog is almost sure to dig into dens, or nose about spots where raccoons or opossums may be in the habit of coming frequently. This means that such places are useless for sets. In the case of minks, the fur-bearers often leave the vicinity altogether.

Tobacco—ashes and juice—ought not to be scattered over the line. Even when after foxes, wolves, minks and similar animals travel, frequently causes the best sets to fail. These small things, seemingly of no importance, should be remembered by every pelt hunter if he wants to make the most money from his work.

Never use crows, hawks, buzzards nor similar bait when after smaller animals. These birds are enemies; instead of attracting, they repel.

Avoid steel for fastenings, so far as possible. This is especially true when after foxes, wolves, minks and similar animals. If stakes are made, do away with shavings. Newly chopped wood gives a hint of man. Keener animals are wary of the sign.

When traps are placed have them as nearly perfect as possible. Do not visit them every day and rearrange the sets. It is a good rule not to disturb methods for days, so long as they remain as placed. Keep as far away from the sets as possible unless it is absolutely necessary to handle them again.

Many hunters skin their game on the line. Often the carcasses are left along the trail. Not only does this have a tendency to frighten some kinds of fur-bearers, but provides all with food. When we stop to consider that hunger is the best aid of all attractants, we see the necessity of disposing of carcasses. It is well to sink them in deep water whenever possible.

Do not attempt too much. A few sets well placed and cared for bring better returns than many which are poorly arranged.

Deadfalls and snares may occasionally be of value. However, in most cases they are simply a waste of time, for the beginner at least. Depend upon steel traps. They are more efficient than the makeshifts one sometimes sees employed.

Do not use too large a bait for minks. To illustrate, if the carcass of a rabbit or muskrat is used, make it serve eight or nine traps.

The best baits in the world never overcome a handicap of crude method. However, proper sets often succeed with inferior decoys.

Remove hides just as soon after the game is caught as possible. Do not let several carcasses accumulate and do the work all at once. If skinning is neglected, some of the furs which otherwise should be prime, turn blue on the leather and must be classed as seconds or lower. The reason is that after death oxidation of the tissues takes place rapidly and causes discoloration. Should the pelts be left on the carcasses too long, they will hair-split and taint. When this is the case, they are worth little or nothing, depending upon the condition.

Never interfere with another's trap or his line. It is generally understood among pelt hunters that when one has run his "path," another will not make sets too near. Should one discover a captured animal alive, kill it as you would your own, leaving it to the owner when he shows up. To follow

low this plan will mean general satisfaction for all concerned.

Do not use meat baits too close to dwellings. Cats and dogs are often drawn instead of wild fur-bearers.

When making sets be sure the traps work properly. Nothing is more provoking than to discover later that the biggest mink in the region would have been caught had the jaws closed when they should. It might also be said that when traps are placed, the pans should not be much higher than the jaw levels.

Too frequent use of food for bait is not wise. It has a tendency to warn the more cunning game.

Never overlook an opportunity to study the habits of fur-bearers. Time spent doing this always pays big returns.

Be wary of the small traveling buyers, purchasing lots wherever they may be found. As a rule, these buyers can not pay so much as the larger houses which eventually get the furs. Select your dealer with care. Those who advertise from year to year are generally old reliable concerns, anxious to get your furs. They will pay top prices for your lots.

Take pains in skinning and drying. Much money is lost by pelt hunters every year because this is not given sufficient attention. Be sure to have a sharp knife; make long cuts rather than short ones, to avoid ragged edges.

With the exception of muskrats and opossums, tails of all small game should be slit to the very tip. The bones are then easy to remove and no pocket is formed to catch grease, which might cause tainting.

Never trap too early in fall nor too late in spring. When pelts are of poor quality, sets ought not to be made. It does not pay to get trashy skins that do not command much of anything.

Dealers, in fact, do not want them and many are doing all they can to have trappers catch only the better grade of hides.

With the exception of skunks and civets, do not shoot small trapped animals. Bullet holes often mean low values for skins so damaged. For minks and weasels, skin with a smooth, round club. Drowning is often resorted to, also. The methods just explained do away, in most cases, with blood clots on the leather.

When board stretchers are made, use quarter-inch pine, if obtainable. Round the edges so as not to damage the nap of the pelts. Have the forms for cased hides (this includes all the commoner pelts, except raccoons, and even these are handled the same as muskrats and minks at times, with no great damage) so that they fit. Pull the pelts tightly and tuck in place. Do not overstretch; this gives the appearance of a poorly furred pelt. Never understretch, as this makes the hides undesirable for manufacturing purposes.

Do not hasten curing by putting the skins in the sun or near a fire. Select a cool, dry, shady place protected from the weather, where the air circulates freely. It takes from six to fourteen days before catches are ready for market, depending upon the kind of pelts and climatic conditions.

Never ship green skins. Often they "spoil in transit." Even when such is not the case, they must be given immediate attention by the dealer as received. He charges for this—much more, in fact, than one can afford to pay for the work. In other words, it takes place rapidly and causes discoloration. Should the pelts be left on the carcasses too long, they will hair-split and taint. When this is the case, they are worth little or nothing, depending upon the condition.

Never interfere with another's trap or his line. It is generally understood among pelt hunters that when one has run his "path," another will not make sets too near. Should one discover a captured animal alive, kill it as you would your own, leaving it to the owner when he shows up. To follow

low this plan will mean general satisfaction for all concerned.

### Past and Present.

It is human to exaggerate the charm of the past. We all do it in our individual lives. More and more, as we get older, memory turns to our childhood and youth, fixes on the bright points, the delicate, delicious hours, omits the rest and then says, "Ah, to think what life was then." Why can I not bring back the friends and the sports and the dainty mad diversions that really made existence seem worth while?

In this, as in everything, humanity in general is but the individual writ large. When troubles thicken, and storms clatter and clash, and the old world seems to be hobbling to ruin, we look back and say, "Oh, how different! Those past people did not have our problems and our content with. For them life was simple and easy and serene. Women had all the household virtues. Men did not burn, and did not worry, but gained the simple necessities in honest and industrious content. Day by day mankind grows more corrupt and dissatisfied, and times worse and worse."

Must still succeed the former.

It is one of the first duties of a man to fight that tendency to overestimate the past, whether in his own personal life or in general. Study the past abstractly, impersonally, instead of sentimentalizing about it, and you will see that it met the same difficulties and made the same mistakes that we are meeting and making. Do not judge it by high lights and pleasant memories. Plunge into the shadows and you will find them just as dark and deep as they are to-day. Such study of the past is of immense value to us, but its value does not come from blighting the present, but from enabling us to understand it. Only by appreciating how men have suffered and struggled can we get light on the wisest way to meet the suffering and struggle of our own time. Only by sufficient consideration of the huge travail of the past can we gauge the toilsome steps of humanity in the slow, tortuous, uncertain march of progress, or become convinced that there is progress, however confused and desperate the upward movement may appear.

It is our business as honest men and women not only to show that the present is as good as the past, or better, but to help to make it so by believing in it.

### Merry Misprints.

The misprint is an unconscious humorist of the first order.

The following paragraph appeared in an English newspaper not long ago: "We wish to apologize for the manner in which we disgraced the beautiful wedding last week. Through an error we were made to say, 'the roses were pink.' What we meant to say was, 'the roses were pink.'"

Dr. Jowett, the famous preacher, had been engaged to speak at a mission hall in Birmingham, and some handbills advertising the meeting were circulated. The last line on the bill read: "Mr. Jowett and other friends will address the meeting."

Some years ago a blue-book contained an amazing misprint. It was an account of a conversation between the British Ambassador at Berlin, and the German Chancellor. It said: "His Excellency concluded his reply with the words, 'I am not a Jew.'"

A certain paper referred to two learned gentlemen as "bibulous old fellows" instead of bibliophiles. Needless to say the editor got into hot water and in preparing his apology he wrote: "The learned gentlemen are too fastidious." To the editor's horror the printer distinguished himself again by printing: "The learned gentlemen are two fast idiots."

A Lancashire man, who had just returned from a tour round the world, was annoyed by a report in a local paper, in which it was said that "his friends were surprised to find him unchanged." Of course, the last word lacked a "c," but it would explain before the world wondered could "c" it.

### British Mints Busy on Pudding Pennies.

His Majesty's mint is getting ready for Christmas by joining 10,000 three-penny pieces, says a London despatch. The small silver coins are as popular as ever for the Yuletide diversion of placing them in Christmas puddings, with merry jests about what will happen to the person who gets them. Requests for the three-penny pieces have been made especially by Edinburgh and Glasgow banks, who say that they have been besieged by patrons for coins.

Apparently the rich English pudding has lost none of its popularity.

### What Sort of a Man Is He?

When a shrewd business man is making an investment in any enterprise, the first question he asks is, "What sort of a man is back of the enterprise or the institution?" Everything depends on the sort of a man who is at the head of anything. The quality of the head will trickle clear down through from the top of an organization to the very bottom.

### Elevated City.

Madrid is the most elevated city in Europe. It is built on a mountain plain or plateau 2,200 feet above the level of the sea. Being much exposed to extremes of heat and cold, it is very unhealthy.

## WOULD NOT BE WITHOUT BABY'S OWN TABLETS

Mrs. W. Beesley, Millie Roche, Ont., writes: "I have used Baby's Own Tablets for the past eight months and would not be without them. I used them for indigestion and teething and my baby is cutting his teeth without any trouble whatever. I can highly recommend the Tablets to other mothers." What Mrs. Beesley says thousands of other mothers say. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion and making teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Black Rain.

While showers of tiny frogs and even fishes are not unknown, how many people are aware that at various times the old country has experienced such peculiarities as "black rain," "blood rain," and "milk rain?" These are caused by such impurities as soot, plant pollen, finely-divided sulphur, and sand. In 1903 there was a downfall of "blood rain" in England, and this, on examination, was shown to have been impregnated with mineral substances carried by air-drafts from the Sahara.

The fine dust discharged in volcanic eruptions has been known to remain in suspension in the air for several years. Such phenomena as "fog showers" and "fish showers" are due to strong ascending air currents, such as local whirlwinds, which carry these local objects away from the ground and transport them through the atmosphere until the force of gravity brings them to earth.

### Smallest Increase.

While Scotland now has more residents than ever before, the increase in the last ten years was the smallest ever recorded in a similar period.

The best cure for the body is to quiet the mind.

Minard's Liniment for Distemper.

## Surnames and Their Origin

**O'DOWD**  
Variations—Dowd, Dowde, O'Dowds, Doody.  
Racial Origin—Irish.  
Source—A given name.

The family name of O'Dowd and its variations are but Anglicized developments of the Irish clan name of "Dubhdia," and such names as Hethcristington, De'caharals or Van Kous-solier "have nothing on it" from the viewpoint either of antiquity or importance in the dim ages of the past.

At best the use of these others as hereditary family names can go back to but about the eleventh century. Five hundred years before this the chieftain of the Clan O'Dowd stood high in the councils of the Irish kings and high-kings.

It was about the year 650 A.D. that the organization of the clan took place under the leadership of the chieftain "Dubhdia," whose given name had a meaning not dissimilar to "Donald." That is, it meant "dark complexioned." The O'Dowds were one of the numerous clans which were in the first place septs or divisions of the still more ancient clan of the O'Connors, which together with the O'Neills furnished a very large number of the succession of "High-Kings" who ruled the ancient Irish civilization from about 1700 B.C. until it finally went to pieces under the terrific and persistent onslaughts of the Anglo-Normans.

### Those Cheery Chairmen.

The other evening Mr. Stephen Leacock, the world-famous humorist, of Montreal, told some of his experiences with certain chairmen he had met at his lectures.

One of them, in introducing him, said those present knew the first series of lectures was a complete failure, so they were trying a new experiment—they were seeing what they could do with cheaper talent!

"Here's one that happened in Toronto," continued Mr. Leacock: "I was to speak in Toronto for the second time. I was invited to come back. That practically never happens to me—sometimes they dare me to come back. I felt awfully elated. But I was afraid I should say some things the second time I had said the first time. I mentioned it to the chairman, but the latter replied: 'I don't think you need be afraid of that, because the people who heard you before won't be here to-night.'"

Mr. Leacock also mentioned a chairman with a very bad memory, who, in introducing him to the audience, said: "I can assure Mr.—er—I can assure Mr.—er—the lecturer—er—of the evening, that his name has been a household word for years."

### You're Constipated! Take "Cascarets" for Liver, Bowels

Sick headache, biliousness, coated tongue, or sour, gassy stomach—always trace this to torpid liver and delayed fermenting food in the bowels. Cascarets work while you sleep. They immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels. Get a 10-cent box now and let "Cascarets" straighten you out by morning.

The best education in the world is that got by struggling to get a living. What is defeat? Nothing but the first step to something better.—Wendell Phillips.

The weight of the human brain is said to double in the first nine months of life and treble before the end of the third year.

## Don't Run Auto Engine in Closed Garage.

During the approaching winter quite a good many people will be poisoned to death by exhaust from their own automobiles. They will run the engines in the garage, with door and windows closed, and before they know it will be overcome by the deadly carbon monoxide.

If accidents of this kind are to be avoided motorists should see that the garage is well ventilated before permitting an engine to run for any length of time.

This advice is urgently offered by the United States Public Health Service, which has been making a special study of the subject, with experiments on human beings, dogs and other animals. To make the tests as practical as possible, a building about the size of an average private garage was erected—10 by 10 by 20 feet—and the engine of a small car was set going inside of it. It was found that the engine discharged approximately twenty-five cubic feet of exhaust gas per minute, and that 6 per cent. of it was carbon monoxide.

The "hemoglobin," or red coloring matter of the blood, contains iron, and owes to that metal its power to take up oxygen from the air breathed into the lungs. There is enough hemoglobin in the body of an average man to hold thirteen pints of oxygen. But every molecule of carbon monoxide taken into the lungs and absorbed by the blood replaces a molecule of oxygen.

Hemoglobin attracts carbon monoxide 300 times as strongly as it does oxygen. Thus the poison gas, when breathed, rapidly crowds the oxygen out of the blood, and in a remarkably short time the victim is overcome.

Experiments made by the U.S. Public Health Service showed that three parts of the gas in 10,000 of air produced no perceptible effect. Six parts caused discomfort. Nine parts induced headache and nausea. Fifteen parts or more meant danger of death. If a car, while "warming up," should give off only one cubic foot of carbon monoxide in a closed room of the size above mentioned, the atmosphere would become dangerous to life in three minutes.

When a person is overcome by carbon monoxide, don't send for a palanquin. Get him into the open air. Fresh air and lots of it is what he needs. If he is not too far gone the oxygen he takes into his lungs will drive out the poison gas in an hour or two.

## Mother! Move Child's Bowels With California Fig Syrup

Every mother! Even a sick child loves the "fruit" taste of California Fig Syrup and it never fails to open the bowels. A teaspoonful to-day may prevent a sick child to-morrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

### Carnegie's First Million.

Here is a story that has never been told in print. It tells how Andrew Carnegie made his first million dollars. He was the first ironmaster to hire a chemist. We all know how much chemistry has had to do with the development of steel, but at that period, when the shrewd Scotchman was young, possibilities in that direction had not begun to be realized.

In Europe there was introduced the so-called "Thomas basic process," which made possible the use of high-phosphorus iron. Previously iron that contained much phosphorus was not available for making steel because the product was brittle.

The process in question overcame the difficulty. Carnegie, through his chemist, got news of it, and he lost no time in securing exclusive rights to its use in the United States.

At that time deposits of the Lake Superior region had not been discovered and the States was getting most of its iron ores from Pennsylvania and New Jersey. Carnegie saw that the new process would make available the iron beds of the Appalachians, where the ores are high in phosphorus, and he secured options on all the best of them. Soon afterwards he sold these options at a clear profit of \$1,000,000.

It was simply a matter of being one jump ahead of everybody else, and Carnegie was able to accomplish this through his wisdom in hiring a chemist.

### Oyster Is Strong.

The oyster ranks as one of the ten strongest things to be found on earth. When this dainty shell-fish is in its prime a force of nine hundred times its own weight is necessary to force open its shell.

### Electric Tannery.

Using electric tanning machines, what is claimed to be the largest and most up-to-date tannery in South America, has been put in operation in Brazil.

### Agas of Birds.

While a goose may live thirty years, a sparrow twenty-five, and a crow as many as one hundred, ducks, poultry and turkeys die of old age at twelve years.

## KEEP HEALTHY DURING WINTER

Colds and Diseases May be Avoided if the Blood is Kept Pure.

Do not let your blood get thin this winter. For people who have a tendency towards anemia, or bloodlessness, winter is a trying season. Lack of exercise and fresh air, and the more restricted diet, are among the many things that combine to lower the tone of the body and deplete the blood.

As soon as you notice the tired feeling, lack of appetite and shortness of breath that are warning symptoms of thin blood, take a short course of treatment with Dr. Williams' Pink Pills. Do not wait until the color has entirely left your cheeks, until your lips are white and your eyes dull. It is so much easier to correct thinning of the blood in the earlier stages than later. This is well illustrated in the case of Mrs. E. Williams, Elk Lake, Ont., who says: "I take great pleasure in telling you the benefit I have found in the use of Dr. Williams' Pink Pills. I was in an anemic condition, and was very weak and run down. The least exertion would leave me breathless and it was with difficulty that I did household work. I was advised to try Dr. Williams' Pink Pills, and after the use of four boxes I felt like a new person. In fact my system seemed filled with new energy and new life. I strongly recommend this medicine to all who feel weak or run down."

The purpose of Dr. Williams' Pink Pills is to build up the blood. They do this one thing and they do it well. They are for this reason an invaluable remedy in diseases arising from bad or deficient blood, as rheumatism, neuralgia, after-effects of the grip or fevers. The pills are guaranteed to be free from opium or any harmful drug and cannot injure the most delicate system.

You can procure Dr. Williams' Pink Pills through any dealer in medicine, or they will be sent you by mail at 50 cents a box or six boxes for \$2.50 by writing direct to The Dr. Williams' Medicine Co., Brockville, Ont.

### Silver Burnishing.

Silverware can be burnished by a machine invented by a Swiss in much less than the time required for hand work by expert workers.

If a man empties his purse into his head no man can take it from him. An investment in knowledge always pays the best interest.—Franklin.

### Halifax, N.S.

Minard's Liniment Co., Ltd., Gentlemen—I have used Minard's Liniment and have found it a good remedy. After the explosion I was pretty well shaken up, but I used quite a number of bruises and cuts, but thanks to Minard's Liniment I am now all right again. It healed the sores and bruises and gave me much relief. It is true to its name as the King of Pains, for it stopped the pain almost at once. I first noticed the ad in the Montreal Standard and decided to invest in a bottle, for which I am not sorry, but can say with truth that I am thankful for it having done all it claimed to do, and in my case much more, and a satisfied customer is the best ad one can possibly find. That is my view of it and I think you will agree with me too. Yours very truly, (Signed) ALFRED BLAIN, 184 Agricola St., Halifax, N.S.

### Poor Daddy!

A tiny maid, held up to hear her father's voice on the telephone, burst into tears.

"Why are you crying?" asked her mother.

"Oh, mamma," sobbed the child, "how ever can we get daddy out of that little hole?"

### His Punishment.

"Doctor," said Johnny, half out of breath from running, "come up to our house, quick."

"Who's sick there?" asked the doctor.

"Everybody but me. I was naughty, so they wouldn't give me any of the nice mushrooms pa picked in the woods."

### For Personal Use Only.

A small boy who was sitting next to a very haughty woman in a crowded car, kept sniffling in a most annoying way until the woman could stand it no longer.

"Boy, have you got a handkerchief?" she demanded.

The small boy looked at her for a few seconds and then, in a dignified tone, came the answer: "Yes, I have, but I don't lend it to strangers."

### A Bolated Insult.

Manuel, a colored fellow with a record previously clean, was arraigned before the justice of the peace for assault and battery.

"Why did you beat that man up?" questioned the squire.

"He called me a rhinoceros, sah."

"A rhinoceros? When did this occur?"

"Bout three years ago, judge."

"Three years ago! Then why did you wait so long to resent it?"

"Judge, I ain't never seen no rhinoceros till dis mawnin'."

### MONEY ORDERS.

## WONDERFUL GAIN IN WEIGHT REPORTED

YOUNG WOMAN WEIGHED ONLY 75 POUNDS.

She Now Weighs Over One Hundred and Is Improving Every Day.

"Before I began taking Tanlac I only weighed 76 pounds. I now weigh over one hundred and am gaining every day," said Miss LaRue Davis, of Chattanooga, Tenn.

"I bought my first bottle of Tanlac at Gas City, Ind., and it helped me so much that I continued using it. I have always been very delicate and suffered a great deal from stomach trouble and rheumatism. I rarely ever had any appetite and simply could not relish anything. I fell off until I only weighed 76 pounds and was so thin I looked perfectly awful. This is the condition I was in when I began taking Tanlac."

"Oh, I feel so different now. Even my complexion is improved. My appetite is good and I can hardly get enough to eat. Tanlac is simply grand, and I can truthfully say it is the only medicine that has ever done me any good."

Tanlac is sold by leading druggists everywhere. Adv.

## WOMEN OF MIDDLE AGE

May Pass the Critical Period Safely and Comfortably by Taking Lydia E. Pinkham's Vegetable Compound.

Regina, Sask.—"I was going through Change of Life and suffered for two years with headache, nervousness, sleepless nights and general weakness. Some days I felt tired and unfit to do my work. I gave Lydia E. Pinkham's Vegetable Compound a trial and found good results, and I also find it a very helpful Spring tonic and useful for constipation from which I suffer much. I have recommended Vegetable Compound to several friends, and am willing you should publish this."—Mrs. MARTHA W. LINDSAY, 810 Robinson St., Regina, Sask.

If you have warning symptoms such as a sense of suffocation, hot flashes, headaches, backache, dizziness, impending evil, fainting, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness, inquietude, and dizziness, get a bottle of Lydia E. Pinkham's Vegetable Compound and begin taking the medicine at once. We know it will help you as it did Mrs. Lindsay.

H. I. JOHNSTON, Phm. B. PHONE 35 GLENCOE

### STRATHBURN

An enjoyable and enthusiastic evening was spent in the school house of No. 1, Moss, on Friday evening, Nov. 11, when the Battle Hill U.F.O. and U.F.W.O. held their annual chicken supper. The tables were prettily decorated in red, white and blue and laden with an abundance of good things to eat. After all had done justice to the tables, Frank McGregor was called to the chair and very ably acted as chairman. Mr. McGregor's remarks on community life and school affairs left many good thoughts in the minds of his hearers. In his address he congratulated the clubs on their success and community spirit which was manifested. A male quartette, consisting of J. Lethbridge, W. Gould, J. Trestrain and F. Simpson, rendered two very fine numbers. Mrs. Alfred Gould, J. Lethbridge and W. Walker gave splendid solos, while a duet by Miss Squire and R. Walker and trio by the Squire family were greatly appreciated. W. Atkinson, Charles Cameron, Bruce Dobson and John Reycraft gave excellent speeches. An orchestra gave several selections during the evening. Will Siddall, Will Simpson and John Lawson, who went out West on the harvesters' excursion, returned home last week.

Duncan Stewart is on his rounds again dehorning cattle.

Major Grover is busy threshing with his new clover machine and reports a good yield and a good sample.

Representatives of an oil company were here some time ago leasing land in Moss, near Strathburn, and expect to start shortly to drill for oil.

Mr. Brown and wife, formerly Mabel Siddall, of Inwood spent a few days here last week with her father, Ren. Siddall.

### AN ORANGE RESOLUTION

Appin, Nov. 21.—The subjoined is a copy of a resolution recently passed by the Appin Orange Lodge, copies of which are to be forwarded to the Premier of Ontario, the minister of education for Ontario, the honorable member for West Middlesex at Toronto and the press:

"Whereas having noticed with alarm the attempts being made by certain interested parties to obtain possession of large portions of public tax moneys for the purpose of building up a separate school system in Ontario on, presumably, a denominational basis;

And whereas we consider our present public school system is very efficient and quite unobjectional; And whereas any public school es-

tablished on a denominational basis is a potential factor for disruption and would serve only to disunite the many diverse parts of our nationality;

And further, whereas if each and every religious denomination demands its logically equal right of secession from the present public school system of Ontario, then chaos would prevail.

Therefore be it resolved by this Local Orange Lodge, No. 981, Ekfrid Centre, Appin, Ontario, now in due session assembled, to petition the honorable parliament at Toronto to remain firm and steadfastly oppose any such change in our present public school system of Ontario by direct or indirect action.

### PERSONAL AND SOCIAL

Mrs. L. Suiter spent the weekend with her sister, Mrs. Ackert, in Ingersoll.

Mrs. (Dr.) Taylor of Forest spent a day with her aunt, Mrs. Neil McKellar, last week.

Mrs. Thomas Tait and little son sail on the S. S. Minnedosa from Montreal on Friday to visit her former home in England. Her husband accompanied her to Montreal.

The death is recorded of Mrs. Margaret Mitchell in Detroit, one of the oldest pioneers of Elgin county. Mrs. Mitchell was born in Argyllshire, Scotland, in 1830, and came to this country with her parents when one year old, landing at Port Glasgow where the family spent a year. They then moved to Moss township a few miles from Glencoe. Mrs. Mitchell was married in 1852 to Robert Mitchell of Fingal, who died 33 years ago. Their family consisted of twelve children, eight of whom survive. In 1890 Mrs. Mitchell moved with her family to Detroit where she resided up to the time of her death with her youngest daughter, Sarah. Mrs. Mitchell was the last of a family of ten.

## TOWN AND VICINITY

Elections a week from next Tuesday.

Great War Veterans' concert on Friday evening.

Have you noticed that Christmas Day falls on Sunday this year?

Mr. McLean of Alvinston has secured a position in the Merchants Bank here.

Christmas presents should be selected now. Write alone advertisements in the Transcript.

Edward Meredith, K.C., prominent London lawyer, died on Sunday morning in his 77th year.

Kenneth Cameron of Huron county has a tree on his farm 65 years old, which this year produced 19 barrels of apples.

What is believed to be an extensive deposit of hard coal has recently been discovered at Latchwood, Northern Ontario.

J. D. Drummond, U.F.O. candidate, will address the electors in Glencoe on Thursday evening and in Newbury on Friday evening.

J. F. Maine of London will preach in the Methodist church on Sunday morning and Rev. Mr. Robertson of Burns' church, Moose, in the evening.

Owing to the length of the program, the G.W.V.A. request that patrons of their concert on Friday evening be in their seats promptly at 8.15.

At Strathroy on Thursday night Herbert Jay's grocery and the shoe store of Froese & Son were broken into and robbed of considerable merchandise.

Rev. Dr. Sparling, pastor of First Methodist church, London, died suddenly on Sunday evening shortly after conducting the evening service at his church.

At a meeting of the senior hockey club held Thursday evening, Nov. 7, C. E. Davidson was appointed president in place of George Parrott, who was appointed manager.

J. E. Orange, proprietor of the Pioneer Grocery and Bakery at Radisson, Sask., has the thanks of the Transcript for a very handsome calendar for the coming year.

The Bothwell Times observes that since women were granted the right to vote there is a mark of activity on the line fence, and the meals are chiefly bean soup, hash and cold tea.

Next Easter Sunday will be on March 26. The earliest date it can fall on is March 19, and the latest April 23. There are already forecasts being made of an early spring.

Before Police Magistrate McKenney on Friday afternoon Russell Childs acknowledged having taken a watch from the store of D. H. McKenney at Strathburn and was let go on suspended sentence.

The elector who obtains his views on affairs political from party election sheets, no matter which party, is unwise. The sensible way is to hear both sides and do some thinking.

The annual commencement exercises of Glencoe High School will be held in the opera house on Tuesday evening, Nov. 29. There will be no admission fee, and the public are cordially invited.

By an amendment to the Motor Vehicles Act, no motor vehicle can carry a lamp on a pivot or other device which can be revolved to cast a beam of light in any direction at the will of an occupant of the vehicle.

Miss Florence Hills, daughter of Wm. Hills, Glencoe, has received a certificate of honor from the Minister of Agriculture having won the greatest number of points at the Glencoe rural school fair held on Sept. 28 last. Congratulations are extended.

At a meeting held in the town hall on Thursday evening the Glencoe hockey club was organized and the following officers elected: President, John McCracken; vice-president, W. A. Hagerly; manager, Ed. Hamilton; secretary, Clifford Ziegler; treasurer, Frank Brown; executive committee, John Best and John McCracken.

An enjoyable time was spent in St. John's church last Thursday evening at a social under the auspices of the A.Y.P.A. Musical numbers consisted of vocal solos by Miss Margaret Dickson and Walter Walker, and saxophone solos by Mr. McLean of Alvinston. Several interesting games were indulged in, after which lunch was served.

The play "Lighthouse Nan," given by the Lambeth Cheerio Community Club on Friday evening, under the auspices of the senior hockey club, was well attended and the performance was greatly enjoyed. Violin and piano music was given between the acts by Elizabeth and George Grant. At the close of the performance lunch was served to the members of the company and those assisting.

Mrs. Margaret Hurst, widow of the late George Hurst, died on Saturday at the home of her son, Benjamin, in Alvinston. She was one of the oldest residents of the community, being 85 years of age. She is survived by four sons, Benjamin and Walter of Brooke, Joseph of Edmonton and Thomas of Marine City, and two daughters, Mrs. D. C. Munroe of Belle River and Mrs. A. Alchison of Alvinston.

The regular weekly gathering of the Y.P.O. of the Presbyterian church on Monday evening was in charge of the missionary committee. Papers on "His Dominion" were given by Miss Mayne Grant, Miss Reta Christner, Joe Grant and Murray Standing. A vocal solo by Campbell McKee and a piano solo by Miss Irene Reith were much appreciated. A social time will be spent next Monday night.

The annual meeting of the Glencoe Book Club was held at the home of Mrs. James Poole on Monday afternoon, when the following officers were elected: President, Mrs. L. Suttler; vice-president, Mrs. A. J. Wright; secretary-treasurer, Mrs. J. N. Currie; librarian, Mrs. H. I. Johnston; literary committee—Mrs. R. Stuart, Miss Blackburn, Mrs. J. Grant, Mrs. R. M. McPherson.

The League meeting on Nov. 21st was of a social nature. Miss Carrie Smith gave a delightful violin solo, which promises one musician anyway for the coming years. Russell and Walter Walker rendered a vocal duet and Miss Ethel George a solo, both numbers causing prolonged clapping. Miss Ella Samson gave an extremely interesting reading entitled "Elder Lamb's Donation." The program was followed by games and lunch, both heartily enjoyed. Stanley McCutcheon has the next meeting to prepare, and rest assured it will be splendid. Everyone is welcome. Come alone.

Missionary services were duly observed in the Methodist church on Sunday. The meetings were in charge of the local auxiliary of the W. M. S., who were very fortunate in securing the services of Mrs. Gordon Wright, president of the London branch of the W. M. S. Mrs. Wright is a woman with many years of this work to her credit, which, coupled with her ability as a speaker, made those who listened to her go away feeling that truly it was good to be there. At the morning service she dealt with the call from China and Japan and emphasized the necessity of more extensive work. At the afternoon service held for the young people, a Circle for the young ladies and girls of the teen age was organized, with Mrs. York as president, and a Band composed of boys and girls, with Mrs. Reeves as superintendent. At the evening service a large audience was thrilled as they listened to Mrs. Wright, who told of the wonderful work done in our own Canadian missions. The singing at both services was led by a ladies' choir, and a solo by Mrs. Alex. Pole and a selection by the ladies' quartette added greatly to the services.

Get your Tanlac where they've got it.—P. E. Lumley's.

## SPECIAL NOTICES

Come to Lamont's clearing sale for bargains. See ad.

I still have some fertilizer on hand.—J. D. McKellar, Glencoe.

Come and get some of these Bargains.

We do as we advertise.

**D. Lamont**

# Which?

**Crerar**

The head of a great trading organization which unites its trading with its politics—a political theorist—has lost control of the political movement he started and is being driven into impossible positions by class rule extremists. He is under the domination of Wood, the political boss of Alberta. He would give effect to Free Trade, thus destroying Canada's industrial and economic structure.

A Vote for Crerar is a Vote for Chaos

**King**

So evasive that nobody knows where he actually stands on the great issues of the day. Fits his policy to suit his audiences. Talks Free Trade to the West and Protection to the East. Specializes in high-sounding phraseology. His party is pledged to a large measure of Free Trade, but fails to suggest new methods of obtaining necessary National Revenues.

A Vote for King is a Plunge in the Dark

**Meighen**

Easily the outstanding figure in Canadian public life to-day, and the only real leader in sight. Able, forceful, courageous, and upright in character. A statesman of demonstrated ability with broad National and Imperial vision and an unassailable record. Stands firm for the maintenance of a reasonable Protective Tariff, and aims to provide the maximum amount of profitable labour for all.

A VOTE FOR MEIGHEN IS A VOTE FOR A SPEEDY RETURN TO MORE PROSPEROUS TIMES

## THE MYSTERY OF THE GREEN RAY

By William Le Queux

### CHAPTER II.—(Cont'd.)

"Ah!" said I. "It has come, then. And I was surprised that I had forgotten all about the war, which was actually the cause of my presence there. I noticed with some curiosity that Hilderman looked out of the window with a strangely tense air, his lips firmly pressed together, his eyes wide open and staring. He was certainly awake now. But in a moment he turned to me with a charming smile.

"You know, I'm an American," he said. "But this hits me—hits me hard. There's a calm and peaceful, friendly hospitality about this island of yours that I like—like a lot. My own country reminds me too much of my own struggles for existence. For nearly forty years I fought for breath in America, and but that I like now and again to run over and have a look round, you can keep the place as far as I'm concerned. I've been about here now for a good many years—not just this part, for this is nearly new to me, but about the country—and I feel that this is my quarrel, and I should like to have a hand in it."

"Perhaps America may join in yet," I suggested.

"Not she," he cried, with a laugh. "America! Not on your life. Why, she's afraid of civil war. She doesn't know which of her own citizens are her friends and which aren't. She's tied hand and foot. She can't even turn round long enough to whip Mexico. Don't you ever expect America to join in anything except family prayer, my boy. That's safe. You know where you are, and it doesn't matter if you don't agree about the wedding of a psalm. If an American was told off to shoot a German, he'd turn to one turn round and say: 'Here, hold on a minute that's my uncle!'"

"You think all the Germans in the States prefer their fatherland to their adopted country—or are they most of them spies?"

"Spies!" said Hilderman. "I don't believe in spies. I stand up to reason there can't be much spying done in any country. Over here, for instance, for every German policeman in this country—for that's all an spy can be—there are about a thousand British policemen. What chance has the spy? You don't seriously believe in them, do you?" he added, smiling, as he offered me a Corona cigar.

"I don't know," I said doubtfully. "I didn't want to argue with my good Samaritan. There is no doubt a certain amount of spying is done; but, of course, our policemen are hardly trained to cope with it. I daresay the whole business is very greatly exaggerated."

"You bet it is, my boy," he replied emphatically. "Going far?" he asked, suddenly changing the subject.

"North of Loch Hourm," I answered.

"Oh!" said Hilderman, with renewed interest. "Glenelg?"

"I take the boat to Glenelg and then drive back," I explained. "I was in a mood to tell him just where I was going, and why, and all about myself; but I recollected, with an effort, that I was talking to a total stranger."

"Drive back?" he repeated after me, with a sudden return to his dreamy manner. Then, just as suddenly, he woke up again. "Where are we now?" he asked.

"Passing over Morar bridge," I explained.

"Dear me—yes, of course!" he exclaimed with a glance out of the window. "Well, I must pack up my wraps. Good-bye, Mr. Ewart; I'm so glad to have met you. Your country at war, and you look to me a very likely young man to do your best. Well, good-bye and good luck. I only wish I could join you."

"I wish you could," I replied heartily. "I shall certainly do my best. And many thanks for your kind assistance."

And so we parted, and returned to our respective compartments to put our things together; for our journey—the rail part of it, at any rate—was nearly over. And it was not until long afterwards that I realized that he had called me by my name, and I had never told him what it was.

ISSUE No. 48-21.

### CHAPTER III.

#### Mainly About Myra.

The train slowed down into Mallaig station. I thrilled with anticipation, for now I had only the journey to the boat, and Myra would be waiting for me at Glenelg. The train had hardly stopped when I seized my bag and jumped out on to the platform. The next instant I was nearly knocked back into the carriage again. A Great Dane had jumped at me with a deep bark of fluttering welcome, and planted his paws on my shoulders.

"Sholto, my dear old man!" I cried in excitement, dropping my bag and looking round expectantly. It was Myra's dog, and there, sure enough, was a beautiful vision of brown eyes and brown-gold hair, in a heather-colored Burberry costume, running down the platform to meet me.

"Well—darling?" I said, as I met her halfway.

"Well?" she whispered, as she took my hand, and I looked into the depths of those wonderful eyes. Truly I was a lucky dog. The world was a most excellent place, full of delightful people; and even if I were an impetuous young barrister I was richer than Croesus in the possession of those beautiful brown eyes, which looked on all the world with the gentle affection of a tender and indulgent sister, but which looked on me with—Oh! hang it all!—a fellow can't write about these sort of things when they affect him personally. Besides, they belong to me—thank God!

"I got your telegram, dear," said Myra, as we strolled out of the station. He had too great an opinion of the rear. He had too great an opinion of his own position to be jealous of me—or at any rate he was too dignified to show it—and he had always admitted me into the inner circle of his friendship in a manner that was very charming, if not a little condescending.

"Did you, darling?" I said, in reply to Myra's remark.

"Yes," it was delivered first thing this morning, and father was very pleased about it.

"(Reck!) I exclaimed. "I am glad. I was afraid he might be rather annoyed."

"I was a little bit surprised myself," she confessed, "though I'm sure I don't know why I should be. But a perfect dear—he always was and he always will be. But he has been very determined about our engagement. When I told him you'd wired you were coming he was tremendously pleased. He kept saying, 'I'm glad that's good news, little woman, very good news. 'Pon my soul, I'm dooed glad!'"

"I can't think what made him imagine that—but he said it several times, so I suppose he had some reason for it. I was frightfully pleased. I like you to be a splendid fellow, Ron!"

I was very glad to hear that the old General was really pleased to hear of my visit. I had intended to stay at the Glenelg Hotel, as I could hardly invite myself to the Inverloch Lodge, even though I had known the old man all my life. Accordingly I took it as a definite sign that his opinion was wearing down when Myra told me I was expected at the house.

"And he said," she continued, "that he never heard such ridiculous nonsense as your saying you were coming to the hotel, and that if you preferred a common inn to the house that had been good enough for him and his fathers before him, you could stop away altogether. So there!"

"Good—that's great!" I said enthusiastically. "But did you come over by the boat from Glenelg, or what?"

"No, dear; I came in the motorboat, so we don't need to hang about the pier here. We can either go straight home or wait a bit, whichever you like. I wanted to meet you, and I thought you'd rather come back with me in the motorboat than jolt about in the stuffy old Sheila."

"Rather, dear; I should say I would," said I—and a lot more besides, which has nothing to do with the story. Suddenly Myra's motherly instinct awoke.

"Have you had breakfast?" she asked.

"Yes, dear—at Cranlarich. The only decent meal to be got on a railway in this country is a Cranlarich breakfast."

"Well, in that case you're ready for lunch. It's gone twelve. I could do with something myself, incidentally, and I want to talk to you before we start for home. Let's have lunch here."

I readily agreed, and after calling Sholto, who was being conducted on a tour of inspection by the parson's dog, we strolled up to hill to the hotel. As we entered the long dining-room we came upon Hilderman, seated at one of the tables with his back to us.

"Yes," he was saying to the waiter. "I have been spending the week-end on the Clyde in a yacht. I joined the train at Ardri this morning, and I can tell you—"

I didn't wait to hear any more. Rather by instinct than as a result

of any definite train of thought, I led Myra quickly behind a Japanese screen to a small table by a side window. After all, it was no business of mine if Hilderman wished to say he had joined the train at Ardri. He probably had his own reasons. Possibly Dennis was right, and the man was a detective. But I had seen him at King's Cross and again at Edinburgh before we reached Ardri, so I thought it might embarrass him if I walked in on the top of his assertion that he had just come from the Clyde. However, Myra was with me, which was much more important, and I dismissed Hilderman and his little fib from my mind.

"Ronnie," said Myra, in the middle of lunch, "you haven't said anything about the war."

"No, dear," I answered clumsily. "It was an astonishingly difficult thing to say when it came to saying it."

"And yet that was what you came to see me about?"

"Yes, darling. You see, I—"

"I know, dear. You've come to tell me that you're going to enlist. I'm glad, Ronnie, very glad—and very, very proud."

Myra turned away and looked out of the window.

"I hate people who talk a lot about their duty," I said, "but it obviously is my duty, and I know that's what you want me to do."

"Of course, dear, I wouldn't have you do anything else." And she turned and smiled at me, though there were tears in her dear eyes. "And I shall try to be brave, Ronnie. I'm getting a big girl now," she added pluckily, attempting a little laugh. And though, of course, we afterwards discussed the regiment I was to join, and how the uniform would suit me, and how you kept your buttons clean, and a thousand other things, that was the last that was said about it from that point of view. There are some people who never need to say certain things—or at any rate there are some things that never need be said between certain people.

After lunch we strolled round the "fish-table," a sort of subsidiary pier on which the fish are auctioned, and listened to the excited conversations of the fish-curers, gutters, and fishermen. It was a veritable babel—the mournful intonation of the East Coast, the broad guttural of the Broomie, mingled with the shrill Gaelic scree of the Highlanders, and the occasional twang of the cockney tourist. Having retrieved Sholto, who was inspecting some fish which had been laid out to dry in the middle of the village street, and packed him safely in the bows, we set out to sea, Myra at the engine, while I took the tiller. As we glided out of the harbor I turned round, impelled by some unknown instinct. The parson's dog was standing at the head of the main pier, seeing us safely off the premises, and he was waving his tail figure of my friend J. G. Hilderman. As I looked up at him I wondered if he recognized me; but it was evident he did, for he raised his cap and waved to me. I returned the compliment as well as I could, for Myra turned and informed me not to run into the lighthouse.

(To be continued.)

## Letters That Have Changed a Nation.

On one occasion Lord Wolsey prophesied that eventually the Chinese would rule the world. It looks as if this prediction may be nearer the truth.

In the past, ninety per cent of the Chinese people were quite illiterate. There has, however, come an awakening, and a desire for education has developed.

One of the reasons for this sudden change is that the Chinese have adopted a new phonetic alphabet. By means of thirty-nine signs, or letters, it is possible for them to write and express anything which can be spoken in their own language.

For thousands of years there had been a way of writing Chinese, but it was such a difficult task that only scholars attempted it. The old Chinese alphabet had 42,000 signs, and it is scarcely surprising that most Chinese men gave up all idea of learning to read and write.

Eventually China's ruling men set themselves the task of inventing a simple phonetic alphabet, such as most languages possess.

The Chinese Board of Education, with the help of various foreign authorities on languages, succeeded in inventing an alphabet of thirty-nine letters, which are not unlike shorthand. Missionaries and teachers have undertaken the teaching of reading and writing by means of this simplified method. The modern Chinaman is hungry for knowledge and education, and even old people are found to be anxious to learn to read and write.

The oldest known English picture is one of Chaucer, painted on panel in the year 1380.

## Woman's Interests

Odds and Ends in Time Savers.

Almost every day one learns little helps in the daily routine of work. One Sunday not long ago, my family made an unexpected visit to my sister on the farm. My brother went out and dressed two chickens so quickly as to excite my wonder. At home we never have hot water ready for immediate use. I asked my sister about it and she said, "I keep the tea kettle full of water in a place where it will always be hot." Since that Sunday I have always had my tea kettle full of water, and hot, too.

How many of us in doing our Monday's washing finish the washing before we hang out any clothes? I always thought this was the only way to do. But I have learned differently. Lately I have been scrubbing out the first two boilers and flannels and getting them all ready for the line; then the third boiler on the stove, and the machine going, I hang the clothes that are ready to go on the line. By the time I am through washing those clothes, unless the weather is rainy, are dry and I bring them in and sprinkle them. In the afternoon while my two little girls are taking their naps, I iron the white clothes. On Tuesday I have only the colored clothes to iron and I can do some mending in the afternoon. I find I do not get as tired this way as I do when I wash one day and do all the ironing the next.

My mother told me a fine thing in doing housework. Have certain things to do every day and your work will be twice as easy. I tried letting my work go one week in order to get some dressmaking done and when Saturday came the house was in general disorder. I found plainclothes, dust and dirt in the most unheard of places. It took all day to go through and get the house in order once more. Since then I have followed mother's advice and have done the housework, dishes, bed-making, picking up, sweeping and dusting, and then taken time to do the other little things that are sure to come up. One feels much better and more satisfied if the house is in order, ready for any emergencies that might arise.

Another time-saver which I find to be a great help is always to keep some kind of cold canned meat on hand for the unexpected visitor or workmen. Salmon is good, but I find that a two-pound can of roast beef goes farther and also provides gravy which may be thickened or not, just as one cares to do. I also have marshmallow cream and confectioners' sugar on my shelves ready to fix up a cake or disguise cookies and make them appear more appetizing. Sauce is ready in the cellar, and also vegetables. This

leaves no cause to worry in regard to the hurried meal and one has no reason to feel that the meal was a failure with these or similar things on hand. If there is an especially busy day ahead peel the potatoes the day before and cover with water. Cook the meal the day before and also get the dessert ready. By preparing things the day before one gets time for the little odd jobs that are sure to arise on a busy day when everything is hustle and bustle.

One more help. Baby is just beginning to creep and takes up all the dust and dirt. Take the tops of old stockings and cut them down a short way. Then sew these up and place a rubber cord at the top and at the bottom of the legs and let her wear them around. The stockings take up the dirt instead of baby's clothes and the cost is nothing.

It is not a good thing to make a rule of allowing peeled potatoes to stand long in water, as they lose part of their nutritive value.—Ed.)

Looking Your Best. Cookbooks and complexions! You've never thought of them as friends? Well, most of us don't, but they really are. For, after all, what is cooking a big dinner but giving your face the preliminaries of the steaming treatment that the beauty parlors charge so much for? Only you mustn't stop at the preliminaries if you're after a pretty skin. You must follow the same course as the beauty shops do.

After the dinner is cooked—that means after the steaming is over—take a clean towel and wipe your face thoroughly. Be especially careful of the corners where the blackhead is most prone to congregate. You see, the steam has opened all your pores and brought every bit of oil and foreign matter to the surface. When you wipe this away, you leave your skin very clean.

But, besides being clean, the skin is now relaxed and every pore is gaping open. To correct this, take the other end of the towel and dip it in the coldest water you can find. Slap it vigorously against the whole face, not neglecting the neck. What is the charm of a pretty face if it surmounts an ugly, dingy neck? Press your hardest against the muscles that are most likely to sag, and try to smooth out the little fine lines that fatigue brings so quickly under the eyes.

This treatment closes the pores and makes the skin firm and smooth. It will only take a minute or two before you sit down to dinner. But you will find that it is a minute or two well spent. For if you persist in turning your cookstove into a beauty parlor you'll find that your skin is becoming more attractive.

William since navigation opened on the Great Lakes on April fifteenth last. Canadian bond issues continue to find their way to the United States, another \$10,000,000 having been disposed of there within the last couple of weeks. These include \$4,750,000 province of Manitoba, \$1,800,000 province of Nova Scotia and \$2,000,000 province of British Columbia. The total Canadian bond sales for the ten months ending October is \$295,000,000, of which 50% found their way across the line. Between now and the end of the year the Dominion Government will pay out nearly \$50,000,000 in interest on Victory and other bonds.

An iron and steel plant will in all probability be erected at Nanaimo, B.C., by an English company. Messrs. Fraser and Lewis, Canadian representatives, are now negotiating with public bodies of the coal city. The company will advance \$50,000,000 as soon as a site has been approved by its representatives.

Extensive gold mining development work may be carried on in New Brunswick soon, according to newspaper reports. It is said that a syndicate is being formed, headed by Miles Walker, an English mining engineer, who has spent considerable time in India and Africa, where he was chief engineer of the largest mining operations of British capital. The prospects which the syndicate proposed to develop, and for which the necessary gold-mining rights have been taken out, are located in Charlotte, Sunbury, Queens and Victoria counties.

Electric Ice Machines. There are now in operation throughout the United States many central electric stations provided with ice-making apparatus. The unused power of the stations during the "light load" summer season is employed to operate compression motors for liquefying ammonia in the process of freezing artificial ice.

The plan has been especially successful with small plants supplying electric power and light for towns of less than five thousand inhabitants.

In some cases the earning of the auxiliary ice-making apparatus equal the annual return on the whole plant for other purposes.

Why such marked difference in the psychic people people send out, one person affecting us like a breath of Spring, another repelling us as a discord or bad odor, and still another—just nothing.—Frank Crane.

A total of 116,092,164 bushels of wheat have been shipped from Fort

SALESMEN We pay weekly and offer steady employment selling our complete and exclusive lines of whole-root fresh-dug-to-order trees and plants. Best stock and service. We teach and equip you free. A money-making opportunity. Luke Brothers' Nurseries Montreal

## DYEING

YOU will be astonished at the results we get by our modern system of dyeing and cleaning. Fabrics that are shabby, dirty or spotted are made like new. We can restore the most delicate articles.

Send one article or a parcel of goods by post or express. We will pay carriage one way, and our charges are most reasonable.

When you think of cleaning and dyeing, think of PARKER'S.

**Parker's Dye Works** Limited Cleaners and Dyers 791 Yonge St. Toronto

## Vaseline Trade Mark WHITE

**PETROLEUM JELLY**

An application of "Vaseline" White Jelly brings grateful relief when applied to cuts, burns, chafed skin, etc.

**CHESBROUGH MANUFACTURING COMPANY** (Incorporated) 1880 Chabot Ave., Montreal.

In tubes and jars at all druggists.

Round the world in 408 hours, at a cost of \$580, will soon be possible by connecting up different aerial routes. The usual time for the trip by land and water is reckoned at sixty days.

Minard's Liniment for Colds, etc.

A habit all should cultivate, is to read and ruminate.

## CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Minard's Liniment Used by Veterinarians

## PRINCE HUNTS GAME IN INDIA'S JUNGLES

WITH FOUR OF FINEST OF BRITISH GUNS.

Old Armorer in St. James Street "Measured" Heir to Britain's Throne for His Little Arsenal.

Although it is expected that the Prince of Wales will penetrate some of the deepest jungles of India on his regal visit to that empire, it is no formidable arsenal that will constitute his sporting equipment, says a London despatch. Instead, he will carry just four guns, but these are the finest that can be turned out in Great Britain.

The four pieces, completed just before the Prince's departure, were turned out by a little hard-working gunmaker who for years has used his skill in preparing royal sporting equipment. The old gunmaker "measured" the Prince with his own hands, for a gunmaker of royal appointment regards every patron as a tailor regards a customer. The Prince's weight, height, length of arms and even his eyesight was taken into consideration when the armorer planned the four weapons he took with him to India.

### An Elephant Gun.

The little shop of the gunmaker is in St. James Street, within a stone's throw of the grim old palace gates where red-coated sentinels of the Guards Corps in great bearskin shakos stand like statues on either side of the portal. There are a half-dozen other gunshops in the vicinity, but only upon the window of this gunmaker appears the royal coat-of-arms with the words, "Gunmaker by Appointment to His Royal Highness the Prince of Wales." The interior of the shop is the highest type of perfection and the shiny products would set the most timid pacifist itching to possess one of them.

The old gunmaker was just putting the final touches upon the Prince's elephant gun when the correspondent entered.

"There," he said proudly, "is the finest thing of its kind in the world. With that you need fear nothing on or under the earth. I can say frankly to you, sir, that if I should meet his Satanic Majesty and I were armed with it I should not flinch."

### The Prince's Motto

"But," said the correspondent, balancing the keen, smooth weapon. "I should think the Prince would demand gold and silver mountings." This is very plain."

"Not at all," retorted the gunmaker. "Clean as the claw of a partridge," that is the motto of the Prince. He's a thorough sportsman. There are some who want a different gun for every variety of game, but not His Royal Highness. He will use this alike for elephant or tiger, one shot-gun for deer or fowl, a light rifle for jackal and a high-power sporting rifle for bear and other medium-sized game. You see, he will be, in many districts where the game varies widely or he would not take all of those."

The elephant gun is the smith's particular pride. In the case, with cleaning equipment, it weighs 120 pounds. It is built on the principle of a double-barreled shotgun, but takes a steel-nosed cartridge loaded with fifty-five grams of cordite. Its front sight has a folding leaf which when raised presents a luminous bead known as a "moon sight." This is for night shooting.

Asked what are the Prince's plans for hunting in India, the old gunmaker replied: "Ah, it is not for us who enjoy appointments and patronage of His Highness to discuss his plans, but when he returns he will come in and tell me how my guns performed. With his skill and these pieces I am certain he will have no disappointments to relate."

### A Ready Answer.

An Irish waiter named Kenny was noted for his ready wit. A party of gentlemen who were staying at the hotel heard of Kenny's wit, and one of them made a bet that he would say something that Kenny couldn't answer at once.

A bottle of champagne was ordered. The one who made the bet took hold of the bottle and commenced to open it. The cork came out with a "bang" and flew in Kenny's mouth.

"Ah," he said, "that is not the way to Cork!"

Kenny took the cork out of his mouth and replied: "No; but it's the way to Kil-Kenny."

### Heavenly Language.

"Ma, where did the baby come from?"

"From Heaven, dear. Ess ums did didn't um? Um's mommer's ownest precious pet, um is."

"Ma, is that the way people talk in heaven?"

### Johnny's Dilemma.

Johnny—"I wish my folks would agree upon one thing, and not keep it all the time in a worry."

Tommy—"What have you been doing now?"

Johnny—"Mother won't let me stand on my head, and dad is all the time fussing because I wear my shoes out so fast."

## PRINCE OF WALES RECEIVED LOYAL WELCOME ON ARRIVAL AT BOMBAY

Tour of His Royal Highness Has Opened With Splendid Promise—Gandhi, Leader of Non-co-operationists, Not in Evidence During Reception Which Surpassed All Expectations in Goodwill.

A despatch from London says:—The Prince of Wales, in a long detailed despatch, describes the reception of the Prince by the people of Bombay when he landed and during the four-mile circuitous procession through the city. The splendid military cortege at various points along the route touched the fringe of the native bazaar, where there was tumultuous enthusiasm unprecedented in the history of Bombay.

The route of the procession was lined with British and Indian troops. A public holiday had been declared and all the inhabitants closed their shops and lined into the streets to greet the Prince, whose manner and bearing made a great impression. The correspondent adds that, although the political atmosphere in Bombay is rather tense, the tour of the Prince is considered to have opened with splendid promise.

The Bombay correspondent of The London Times says the non-co-operationists had made the utmost efforts to render the boycott of the Prince of Wales' visit effective, but the only result was an overwhelming and tumultuous reception, passing all possible expectations.

Experts say it will be a severe blow to Gandhi and his party of discontent, but the correspondent refrains from prediction. At the moment of the demonstration Gandhi himself was somewhere in Bombay, but is reported to have been assisting at a farcical bonfire of imported clothing.

His Royal Highness the Prince of Wales will have a strenuous time during his four months' stay in India, beginning with Bombay, where the battle-cruiser *Renown*, on which he sailed from England on October 27, arrived on Nov. 16. He was greeted by Lord Reading, the Viceroy, and the ruling Princes on the staff of his Royal Highness. The initial ceremony upon his landing at the Gateway of India, on the Bund, which was built to commemorate the durbar visit of the King and Queen, was the

presentation of an address by the Bombay municipality. A state drive through the city to Government House at Malabar Point was followed in the evening by a reception, preceded by a quiet dinner. On Thursday morning the Prince held a durbar of the ruling Princes. A dinner and ball at Government House at night concluded the Prince's initial visit in Bombay, and shortly after midnight he left for Poona.

After a public welcome to the Prince in Poona his Royal Highness will unveil the Mahatma War Memorial. He will attend the races in the afternoon, and will then return to Bombay. Among his engagements in Bombay will be his attendance at the quadrangular cricket match (so called from the competition of European, Parsee, Mohammedan and Hindu eleven), and the sports tournament of the great Bombay Maidan.

The Prince will leave Bombay on the night of Nov. 22 for Baroda, which last received a visit from the then Prince of Wales in 1875. After some formal engagements in Baroda the Prince will go into the country and have some black-buck shooting. He will then proceed to Udaipur, whose venerable Maharaja is considered the leading ruler in Rajputana, on account of both his legendary descent from the semi-divine Rama and the great traditions of chivalry associated with the ruling house. Through all the generations of Mogul domination it was the only ruling Rajput family which gave no daughter in marriage to any member of the Mohammedan Imperial dynasty.

The Prince will spend a couple of days in the valleys not far from the palace of the Maharaja, shooting leopards and possibly some other big game.

The Prince's visit to Patna, the youngest of the British Provinces, will be of historic interest, as it will be the first time that a member of the Royal house will be the guest of an Indian Governor, in the person of Lord Sinha. There will be a durbar at Patna.

## RATIO OF 5-5-3 MEETS APPROVAL OF BRITISH

Hughes Plan Accepted by Great Britain With Reservations.

Washington, Nov. 20.—Great Britain has endorsed with reservation the "5-5-3" ratio proposed in the United States naval limitation plan, it was learned to-night on highest authority. While accepting the plan as a whole only in principle because of their desire to put forward proposed modification of the submarine and replacement features, the British delegation is said to have approved the suggested relative capital ship strength for Great Britain, the United States and Japan, without equivocation.

Adherence of the British representatives to the capital ship ratio became known to-night as an aftermath of the conference yesterday between Secretary Hughes, Mr. Balfour and Admiral Kato, at which the naval question was canvassed thoroughly in the light of Japanese reservations.

The 5-5-3 ratio of naval strength for the United States, Great Britain and Japan is coming under increasing pressure as the important cards of the big diplomatic game begin to fall.

In the main, proposed modifications seem to centre about the contention that the "5-5-3" formula, which is based on tonnage alone, does not properly present proportionate strength when such other elements as speed, cruising radius and armament are considered ship for ship. Thus far there has been every indication that the United States group would "stand pat" for its proposal of maintaining the existing ratio, but it is declared the national viewpoints of the other powers as to what constitutes a fair basis of comparison will have due recognition as the negotiations proceed.

The result may be a more thorough review of the exact status of the

present naval establishment of the three powers, which the Japanese held will show Japan's right to an increase over the "5-5-3" proportion, but which the United States experts declare will be more likely to establish that Great Britain and the United States each is entitled to almost a 2 to 1 advantage over Japan.

## Germany Can Meet Pending Payments

Berlin, Nov. 20.—The Reparations Commission leaves Berlin for Paris, assured that the Germans can pay the January and February payments. It is asserted here, however, that the payments now depend upon the result of the visit of Hugo Stinnes to London, where he was summoned yesterday by Premier Lloyd George. The Reparations Commission did not hold out any hope to Germany that a moratorium would be granted as to payments subsequent to February.

## Retrenchment Policy of British Admiralty

A despatch from London says:—In connection with its policy of retrenchment in administrative expenditures, the British admiralty has resolved to retire on pensions eighty naval captains and 200 commanders early next year, according to the Evening News. These retirements would not involve taking more ships out of commission, it was said, and if the Washington Conference agrees on the United States naval restriction program, further reduction in the admiralty's personnel are contemplated.

Living in Austria is now 98 times as costly as in 1914.

There are at least five women house-surgeons in English hospitals.

The 1911 census gives the Province of Alberta a population of 581,995, as compared with 374,603 in 1911, an increase of 207,392, or 55.34 per cent.

Three comparisons of the naval strength of the greatest powers in the world, as they are today and as they will be if the present naval building plans are completed. Note that Great Britain will stand out above the other powers. Sir Ian Hamilton warns us as to Japan's great efficiency regarding armament. Note her position on the diagram.

## U.S. WILL OPPOSE JAPANESE DEMAND British Delegates Have Not Made a Pronouncement in the Matter.

A despatch from Washington says:—Japan's request for an increase in the proportional strength of her navy may lead speedily to some of the plain talk across the council table of the arms conference.

The United States delegation stands ready to dispute stubbornly any material change from the ratio set forth in the Hughes plan. That ratio, it was emphasized by highest authorities on Friday, reflects existing proportional strength and so cannot be altered without upsetting a fundamental principle of the whole plan.

In effect the United States figures would give Japan six fighting ships to every ten owned by the United States and every ten owned by Great Britain. The Japanese have hinted, but never formally announced that they want 7 to 10. The naval experts of the United States really believe that five to ten is nearer the proper allotment. Great Britain has accepted the six to ten plan in principle, but her spokesmen have been silent about the new Japanese proposals.

If it turns out that the "slightly greater" naval force suggested for Japan by Admiral Baron Kato only amounts to the addition of one battle cruiser to the Japanese fleet, then the emphatic objections of the United States delegates may not be deemed necessary. But if the suggestion comprehends a real change in proportion, it is declared on authority that a determined diplomatic struggle will result.

## Twenty-Four Year Sentence for Setting a Fire

A despatch from New York says:—Raphael Bocagna, 41, a cobbler, of 3886 Third Ave., The Bronx, convicted of first degree arson last week for having set a fire in the kitchen of his home July 6 last which endangered the lives of twenty-five families in the house, was sentenced in Bronx County Court to twenty to forty years in Sing Sing.

"I regret," said Judge Louis D. Gibbs, "that the law does not permit me to send you to the electric chair or give you life."

The fire was discovered in time and no one was injured.

## LLOYD GEORGE EXPECTS AN IRISH PEACE BEFORE END OF THE YEAR

A despatch from London says:—Premier Lloyd George fully believes that peace with Ireland will be reached before Christmas. This information came on Friday from a person in close touch with Lloyd George. He refused, however, to disclose the newest phase of the situation which gives rise to the Premier's hope.

Sir James Craig, the Ulster Premier, and Sir Edward Carson were detained in London on Friday, both suffering from chills, which are said to be a form of "diplomatic illness."

No formal conferences were held by any of the delegations.

Lloyd George on Friday sent a communication to Arthur Griffith, in which he declared that the prospect of an immediate general election is totally removed, and that he is hopeful, without abandoning any of the principles laid down in his document bearing the terms for settlement, of securing agreement with Premier Craig.

## BRITISH DELEGATES APPROVE CANADA'S PROPOSAL FOR FURTHER PARLEYS

A despatch from Washington says:—It is learned that Canada's proposal for the holding of further conferences with the object of perpetuating the idea of armament limitation will likely meet with the approval of a number of the British Empire delegates, though no information is available as to when it will be placed before the General Conference. It is anticipated, however, that it will be brought forward at a later stage of the proceedings.

The proposal appears to have aroused a great deal of interest, and the general belief is that it would assist in a very large measure in maintaining the great purpose for which the conference has been called. It would provide a means for meeting changing conditions, and for dealing with any new means of carrying on warfare which may be invented from time to time.

Canada, it is considered certain, will support the Mother Country in opposing an excessive allowance of submarine tonnage. Canada's position on this question is understood to be that it would be advantageous to the world if some plan could be reached of disposing altogether of the U-boat method of warfare.

In the Far Eastern section of the conference Canada's voice will be heard, though no indication has been given as to details of policy. It is not considered that the Dominion has any interests in the Far East distinct from the rest of the Empire—apart, that is, from Canada's position on the Anglo-Japanese Alliance, which is not shared by some of the sister dominions. It is not considered likely at this stage that the question of immigration will be brought before the conference, but if it is, Canada of course will be one of the vitally interested nations.

## \$100,000 Worth of Eels Reach N. Y. from Quebec

A despatch from New York says:—Seven miles of eels, valued at \$100,000, reached this city on Thursday from Quebec in three specially constructed barges, so arranged that water will flow in and out of the vessels at all times, keeping the squirmers alive.

Possibly in the stress of other things the residents of this city have failed to note a dearth of eels in the local market. Dealers assert that for a long time there has been a startling absence of eels from the local fish stalls, and that to overcome the ed famine 200,000 of the finest kind of silver eels, from near the mouth of the St. Lawrence River, were ordered captured and forwarded here without regard to cost.

French and other leading Continental remittances also strengthened, and German marks, which recently reached their lowest stage of demoralization, were relatively firm.

## Marshall Foch to Spend Three Days in Canada

New York, Nov. 20.—Marshall Foch, commander of the Allied forces during the war, will be a visitor in Canada from December 11 to 13. At the conclusion of his three-day visit in New York to-day, the itinerary of a continent-wide tour was announced. Marshall Foch plans to visit Ottawa and Montreal, Sunday, December 11; Quebec, December 12, and will make a brief stop at Sherbrooke, December 13, on his way back to complete his tour of principal cities in the United States.

F. C. Wade, British Columbia's Agent-General in London, who drew the attention of the British Admiralty to the fact that they were specifying United States salmon in contracts for supplying the navy. One of the officials admitted that they thought the Seattle was the only true sock-eye salmon. Mr. Wade dispelled the illusion and assurance was given that Canadian salmon will have first consideration.

## University Spirit.

"There's no use betting on a university team. University boys always play to win," said a more or less professional "sportsman" apropos of the rugby games played at the University of Toronto stadium. This man has an insight into the spirit which is produced by university athletics. University boys play hard, are glad to win, are good losers, if they lose, and they do not resort to "shady" tricks. They are trained to be above that sort of thing. Not the winning of the game, primarily, but good, clean sport is their objective. And what a valuable asset that spirit is to an individual! The people of Ontario are proud of their provincial university, of its excellent teaching, of its success in research, of its widespread extension service, and they do not forget that, at that university, young men and women are being trained to be citizens of the highest order, unselfish and above suspicion honest and upright, and that the training in sports and general athletics is helping to produce that type of citizen.

## Large Sum Paid for Hail Losses

A despatch from Regina says:—Three-quarters of a million dollars in hail losses have been distributed by the Municipal Hail Insurance Association since payment of Saskatchewan farmers commenced five days ago.

## Weekly Market Report

**Toronto.**  
Manitoba wheat—No. 1 Northern, \$1.17 1/2; No. 2 Northern, \$1.14 1/2; No. 3, \$1.08 1/2.

Live poultry—Spring chickens, 20 to 35c; roasters, 20 to 25c; fowl, 25 to 30c; ducklings, 28 to 32c; turkeys, 45 to 50c; geese, 25 to 27c.  
28c; ducklings, 28 to 32c; turkeys, 45 to 50c; geese, 25 to 27c.  
Margarine—23 to 25c.  
Eggs—No. 1 storage, 45 to 46c; select storage, 51 to 52c; new laid, in cartons, 58 to 60c.  
Beans—Can. hand-picked, bushel, \$4 to \$4.25; primes, \$3.50 to \$3.75.  
Maple products—Syrup, per imp. gal., \$2.50; per 5 imp. gals., \$2.35; maple sugar, lb., 19 to 22c.  
Honey—60-80 lb. tins, 14 1/2 to 15c per lb.; 5-2 1/2 lb. tins, 16 to 17c per lb.; Ontario comb honey, per doz., \$3.75 to \$4.50.  
Choice hay steers, \$6 to \$7; butcher steers, choice \$6 to \$6.50; do, good, \$5 to \$6; do, med., \$4 to \$4.50; do, com., \$2.50 to \$3.50; butcher heifers, choice, \$5.50 to \$6; butcher cows, choice, \$4 to \$4.75; do, med., \$3 to \$4; canners and cutters, \$1.50 to \$2.50; butcher bulls, good, \$3.50 to \$4; do, com., \$2.50 to \$3.50; feeders, good, 900 lbs., \$5 to \$5.50; do, fair, \$4.50 to \$5; stockers, good, \$4 to \$4.50; do, fair, \$3 to \$4; milkers, \$60 to \$80; springers, \$70 to \$90; calves, choice, \$10 to \$11; do, med., \$8 to \$10; do, com., \$3 to \$7; lambs, good, \$8.50 to \$9; do, com., \$5 to \$5.50; sheep, choice, \$4 to \$4.50; do, good, \$3.50 to \$4; do, heavy and bums, \$2 to \$3; hogs, fed and watered, \$9; do, off cars, \$9.50; do, f.o.b., \$8.50; do, country points, \$8.25.  
**Montreal.**  
Oats, Can. West, No. 2, 56 1/2 to 57c; do, No. 3, 55 1/2 to 56c. Flour, Man. spring wheat, firsts, \$7.40. Rolled oats, bag 90 lbs., \$2.80 to \$2.95. Bran, \$22.25. Shorts, \$24.25. Hay, No. 2, per ton, car lots, \$27 to \$28. Cheese, finest Easterns, 17 1/2 to 18c. Butter, choice creamery, 40 to 41c. Eggs, selected, 50 to 52c.  
Med. steers, \$5; poor, \$2 to \$3.50; canners, \$1.25; good veal calves, \$10; paid-fed calves, \$7 to \$8; grassers, \$2.50. Hogs, selects, \$9.35.

## BRITISH OPPOSE USE OF SUBMARINES

Great Britain and the United States Take Different Views on Question.

A despatch from Washington says:—Great Britain's antipathy to submarines as a naval weapon still loomed on Thursday as the outstanding point of disagreement between the British and United States points of view in connection with future restricted naval programs.

The submarine question is being stressed beyond any other in unofficial discussion in conference circles, and views of the two powers are so far apart that it seems likely extended consideration must be given before a mutual agreement can be reached.

In the British view, submarines should be abolished entirely, as an improper naval weapon. A wide range of subjects have been covered to support that position.

In the United States view, submarines, properly used, are as legitimate a naval weapon as battleships. No British argument yet presented has shaken that conviction, so far as can be told.

The British delegation apparently does not expect an agreement to abandon submarines. There is nothing to indicate that it has presented or will present any such proposal in a formal way. Failing that, however, the British will advance a project to limit the United States and Great Britain to probably 45,000 tons in submarines, instead of the 90,000 tons each proposed by the United States. Coupled with the proposal will be a formal suggestion to limit the size of individual submarines, perhaps to 250 tons.

The United States viewpoint rejects immediately both of these suggestions.

The 90,000-ton aggregate limitation proposed by the United States delegation was derived from a study of United States needs of the more than 40,000 nautical miles of coastline to be protected and of the need of the fleet in underwater craft. That being the figure arrived at as necessary for defensive purposes, and to round out the fleet, it was entirely agreeable to the United States that Great Britain should keep the same tonnage.

United States naval officers wholly disagree with the suggestion of the British that there is any inherent characteristic in submarines that makes them unamenable to the rules of civilized warfare. It is pointed out that the United States thrashed out that question with Germany before German disregard of the view that submarines could be controlled brought the United States into the war. A battleship or cruiser could be guilty of just as grave violations of the requirements of humanity, even in war, it is argued, and the fact that submarines have a quality of limited visibility does not deny them a place in legitimate warfare.

## Ascended 18,000 Feet With the Aid of Oxygen

A despatch from Paris says:—Flight to rarified altitudes, and even to the moon, is now possible for human beings without being equipped with special breathing tanks, through a discovery by Dr. Bayeux, which has been communicated to the Pasteur Institute. An injection of oxygen replaces the artificial respiratory tanks hitherto in use. Dr. Bayeux has proved the feasibility of his discovery by its use in the Alps, where he ascended 18,000 feet without the slightest difficulty.

## Northern Ireland Stands Up For Her Rights

A despatch from London says:—Ulster's reply to the latest British Government communication on the question of an Irish settlement was delivered at Downing Street on Thursday afternoon. It indicates that Ulster stands firm in the attitude she has taken and will not submit to anything considered a violation of her rights.

## How Long Do You Sleep?

Many notable instances are on record of early rising among great men, although, strangely enough, this excellent habit seems to be going out of favor.

M. Clemenceau is at his desk every morning while most of his fellow-countrymen are still in the land of Nod, and the same may be said of Edison, who, when in the throes of a mechanical problem, finds two or three hours' sleep sufficient for his needs.

Napoleon could stay up late and get up early, a gift possessed by Mr. Lloyd George, who is said to be able to go to sleep almost at once.

Lord Reading, when at the Bar, was never in bed after 4 a.m., while at one time Lord Haldane allowed himself only four hours' sleep.

**Maybe Mother Was.**  
Lucy heard her mother and some others discussing a neighbor's rug. She quietly slipped out of the room, sang the neighbor's door-bell, and asked to see the new rug.

After looking at it for some time, she solemnly said, "Well, it doesn't make me sick."

**She Had Good References.**  
"Nurse, did you kill all the germs in baby's milk?"  
"Yes, ma'am; I run it through the most chopper twice."

# Simply Amazing!

Are the Values in Good Merchandise We Now Offer

Our Men's Suits, dollar for dollar, the Best Value to be had.

## Stop! Think!

Only 4-12 weeks until Xmas. You remember the rush at the last minute last year; so shop early. This store is loaded with Xmas Gifts from all the best markets. E. MAYHEW.

Exclusive styles in Ladies' Coats, richly lined and trimmed, \$19.50 and \$25.00. These same coats were made to sell at \$45.00.

40-inch Wool Serge, 80c yd. A Splendid weight for winter wear. Comes in Navy, Copenhagen and Cardinal. Very special value at 89c yd.

Boys' Overcoats, in popular belted styles and in some form fitting models at \$8.95, \$10.00 and \$12.50. The coats are at exactly half price. The sizes will run from 8 to 18 years.

Gentlemen! We believe in shouting when we've got something to shout about! OVERCOATS, the finest fabrics loomed, at \$15.00, \$25.00 and \$35.00.

Select Xmas Wools now. It is none too soon to start knitting your Xmas Gifts, and our Wool Department is prepared to satisfy your every want in "Monarch Wools."

WHY PAY MORE for your Shoes and Rubbers when you can save from \$1.00 to \$3.00 by buying them at Mayhew's. This is the logical Shoe Store for every economical person in Glencoe and vicinity.

ECONOMIES IN OUR STAPLE DEPARTMENT. Compare and you'll find these goods exceptional in Value plus Quality:

## The Transcript.

THURSDAY, NOVEMBER 24, 1921

### WARDSVILLE

About 75 were present at the masquerade party given in the town hall Friday evening under the auspices of the W. C. T. U. A social time was enjoyed by all and lunch was served by the ladies. The prizes in the various contests were awarded as follows: First prize for girls for essay on liquor, Miss Helen Atchison; first prize for boys for essay on tobacco, Walter Whitfield; first prize for girls for poster, Frances Murphy, and for boys, Harry Wallace; first prizes for costumes, Miss Nellie Jackson and Earl Linden.

Mr. and Mrs. Will Telfer and son of Parkdale spent Sunday with Mr. and Mrs. Thomas Weer.

The evening service at the English church will be held at 7 o'clock from now on during the winter months, instead of 7:30 as formerly.

Miss Agnes O'Malley spent the week-end at her home.

Mrs. R. J. Murphy has returned home after spending two weeks with her daughter and sons in Toronto.

Wes. Johns spent a few days in the village.

Isabelle McCracken of London spent a few days with Miss Janet Elliott.

Miss Muriel Willis spent the week-end at her home.

Mr. and Mrs. Charles Mimna have returned home after a three weeks' visit with their daughter in Ypsilanti, Mich.

Miss Jean Randless spent a few days with relatives in Detroit.

J. Heath has returned to his home here.

### SHEPHERD

Mr. and Mrs. Thomas Playfoot spent Sunday with Shepherd friends.

Mrs. Thomas Fenby and daughter of Cairo spent the week-end at L. H. Badgley's.

Miss Mildred Bolton and friend, Miss Clements of Sunnyside, spent Sunday at W. Bolton's.

The box social in aid of the library was well attended and everybody reports a good time.

Mr. and Mrs. Charles Elliott spent Sunday at her home.

Don't forget the bazaar in the town hall, Shepherd, on Dec. 2nd.

The Mission Band held their monthly meeting at James Dobbyn's on Nov. 24. Everybody welcome.

Master Gordon Jeffery spent the week-end in Newbury.

### MELBOURNE

The members of Anna Rebekah Lodge held a banquet in the lodge room in honor of Mrs. Carrie Watson of St. Thomas, president of the Rebekah Assembly of Ontario. The following evening the president and a number of the Rebekahs motored to Mount Brydges to celebrate the 12th anniversary of Edna Lodge, and report having a grand time.

Gilbert McLean, who has been ill for a few weeks, although much improved, is not recovering as rapidly as his many friends would wish.

About a week ago Ed. Elmore had occasion to go to the home of a neighbor, Duncan McLean, a bachelor, who has lived alone for a number of years. Rapping at the door, he received no response. Looking around, he noticed that there were no traces in the snow. Not being able to recall seeing him around for a few days he repeated the rapping. Finally he heard a movement and discovered that a key was being put under the door to him. Mr. Elmore unlocked the door and entered to find that Mr. McLean had been ill for some time, although he could not recall what happened or when it happened. Hearing the rapping, he had managed to get to the door but was too weak to turn the key to unlock the door. Broken dishes were found on the floor, where he had dropped them while trying to prepare food, but was too weak to hold them in his hands. As near as can be learned he took a week spell and was without fire or care for at least four days, as it was Thursday noon when Mr. Elmore called and Monday's mail was still in the box. A doctor and neighbors were called and Mr. McLean was removed to the home of his nephew, Neil McLean. His condition is much improved but he has not yet fully recovered.

The Epworth League gave the people of the community a real treat at their last regular meeting by arranging with Prof. Gibson Hume of Toronto University to give a talk on life's problems and life's ideals. Although the gathering was not sufficiently large to meet expenses, the Leaguers did not regret the arrangement and another lecture may be arranged for in the near future. Prof. Hume emphasized the fact that an idea is not an ideal. Many people have an idea but do not have an ideal, which it is necessary to have if a person is going to be a success. The musical part of the program was given by Mrs. (Rev.) B. Snell of Alvington, W. Reid, S. Carruthers, Mrs. Theaker and Miss Snell. The pastor, Rev. Dr. Brown, occupied the chair.

It Bids Pain Begone.—When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

### WOODGREEN

Miss Connie Pearson spent the week-end with Mr. and Mrs. Harry Harvey.

Mrs. Fred Waterworth and daughter Madeline spent the week-end with Mr. and Mrs. Sinclair, Glencoe.

A number of the young folks spent a most enjoyable time at the home of Mr. and Mrs. Nelson Henderson on Friday. The evening was spent in dancing and cards.

Miss Amy Peters spent the week-end with Miss F. Simpson.

Pat O'Connor, who has been here for some time working on the Graham bridge, has left for his home in Sarnia.

The Graham bridge is completed and open for traffic once more.

J. D. Simpson and Misses K. and M. Simpson spent Sunday with Mr. and Mrs. T. Simpson.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

### NEWBURY

Wesley Johns of Coatsworth is visiting at Elmer Connelly's.

J. G. Byrne was in Ann Arbor on Tuesday on a business trip.

Miss Anna Fennell, nurse in training at Harper Hospital, Detroit, with her sister, Mrs. George Churchill, spent the week-end with their parents, Mr. and Mrs. Stephen Fennell.

Born—in London, on Nov. 12th, to Mr. and Mrs. Jack Bell, a son—William Jason.

Miss Jessie Gray was home from Detroit for the week-end.

B. S. Jeffery and wife have been visiting their daughter in Detroit.

Charlie Fennell was in Walkerville on Wednesday attending the funeral of his cousin's son, the late Jack Chittim, who was killed there in an auto accident early Sunday morning.

Mrs. Wm. J. Martin is an aunt of deceased.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

### CASHMERE

Miss Mildred Taylor has left for Chatham, where she will take a course at the business college.

Mrs. Alex. McIntyre is indisposed with a severe cold, which is in an auto accident early Sunday morning.

Mr. and Mrs. Allen Sitter of Bothwell spent Sunday with their son Calvin.

Miss M. Carrothers spent the week-end at her home in Melbourne.

Miss Eva Robinson and brother George spent Sunday with friends and relatives here.

Miss Florence Webster is visiting her brothers, Asa and Albert, at Dutton.

Mrs. Waterworth of near Glencoe is visiting her parents, Mr. and Mrs. Robert Webster.

Angus Taylor is laid up with serious illness.

The Ladies' Aid held a poverty social at the home of Mrs. S. J. Thompson on Tuesday evening. A comic feature of the evening was the costumes, for which prizes were given.

Percy Duckworth and Mrs. Calvin Sitter carried off the prizes for the best poverty-dressed persons. There was a good program of music, songs and games, after which a dainty lunch was served. Proceeds amounted to \$10.65.

Rev. Henry Godfrey took the services in this church on Sunday, our pastor, Rev. Dr. Huser, being at Florence.

The Many-purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chafes. Horses are liable very largely to similar ailments and mishaps as afflict mankind and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

### DAVISVILLE

Mr. and Mrs. Charles Duffey of Detroit returned to their home on Saturday.

Daniel King has not been feeling so well of late.

Neil McBrayne, after returning from the West, is spending a week or so at the home of Mr. and Mrs. Dan Hillman.

The latest at the dances is pay before you enter.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. Our experience with the relief-giving remedy shows how actual and positive is the success it gives. It is the result of long study and experiment and has not been submitted to the public until its makers knew it would do its work well.

## FREE AT LAST OF KIDNEY TROUBLE

"Fruit-a-tives" Brought Her Health and Strength

624 CHAMPLAIN ST., MONTREAL

"For 8 years, I suffered constantly from Kidney Disease and Liver Trouble. My health was miserable and nothing in the way of ordinary medicine did me any good."

Then I started to use "Fruit-a-tives" and the effect was remarkable. All the pains, headaches, indigestion and Constipation were relieved and once more I was well.

All who suffer from such troubles should take "Fruit-a-tives"

Madam HORMIDAS FOISTY.  
50c a box, 6 for \$2.50, trial size 25c. At dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

### KNAIPDALE

Auction sales are the order of the day now.

A number from here attended a party at Hugh McIntyre's last Friday night.

Mrs. Alexander Stewart is able to be out again.

Neil McBrayne is home from the West and is visiting friends around Knapdale.

Mr. and Mrs. Neil Mitchell attended the funeral in Detroit of the former's aunt, Mrs. Robert Mitchell.

Hugh McIntyre's fine new house is receiving the finishing touches. On Friday evening a number of friends and neighbors were invited in, and an enjoyable time was spent by all.

Miss Jessie Fletcher was the guest of her cousin, Mrs. Lachie McLean, for a few days last week.

### PARKDALE

Mr. and Mrs. John Robinson, Newbury, spent Sunday with their daughter, Mrs. Thos. Haggitt.

Mrs. White, Detroit, is spending some time with her sister, Mrs. Charlotte Petrie.

Mrs. Ed. Haggitt is visiting her daughter, Mrs. Tretheway, London.

Word was received of the instant death of Jack Chittim in an auto accident which occurred on Sunday morning in Walkerville. Deceased was the younger son of Wm. Chittim, formerly a resident of this place.

Miss Ida Haggitt has returned home after holidaying with friends in Windsor.

Mr. and Mrs. A. Campbell spent Sunday afternoon with Mr. and Mrs. C. Cox, Bothwell.

# Friendship—Yes! But—

"The Bill will not let in Canadian wheat, but will save to the American farmer the right to raise a bushel of wheat instead of transferring that right to Canada."

Mr. Fordney, in introducing the Fordney Emergency Tariff Bill which has shut millions of dollars worth of Canadian foodstuffs out of the United States market.

"If we are to build up a self-sustaining agriculture here at home, the farmer must be protected from unfair competition from those countries where agriculture is still being exploited."—President Harding. The very spot chosen to deliver this speech—Minnesota—shows that Harding had the Canadian North-West in mind.

WHILE ties of friendship unite Canada and the United States, the attitude of Uncle Sam is that of "Business First", and Canada cannot and should not hope for any consideration from the United States where the interests of the farmers and business people of that country are involved.

Uncle Sam has built the Fordney Tariff directly against Canadian agriculture, and new additional Tariff proposals are now under consideration to shut out from the United States Canadian goods of every kind.

These measures are due to the insistence of the American farmer that the United States market shall be retained exclusively for him and that the influx of Canadian farm products into that country must cease. They are also due to a like insistence of United States manufacturers and workers, who have seen their country develop tremendously and grow rich under a Protective Tariff, and who believe that a still further increase in Tariff is the only means of assuring continued prosperity.

CONTRAST THE ATTITUDE OF THE UNITED STATES LEADERS WITH THAT OF CANADA'S WOULD-BE LEADERS, CRERAR AND KING

Crerar proposes to allow American goods to enter the Canadian market free of duty.

King proposes that the present reasonable Tariff on the products of the American factory and farm shall be greatly reduced, and that the home market of the Canadian farmer and manufacturer alike shall be thrown open to our Southern neighbour, in the face of the United States Emergency tariff, which practically shuts out Canadian farm products from these markets, and also in the face of the permanent tariff now under consideration at Washington, which gives every promise of being even more drastic than the Emergency Tariff so far as our products are concerned.

In view of the attitude of the United States, what folly it is for Crerar and King to propose throwing open the Canadian market to a flood

of both agricultural and manufactured products of the United States when there is not the slightest possibility of any compensative advantage to Canada.

Does any sane Canadian believe that Crerar or King, hat in hand, could persuade the United States Government to completely reverse its Tariff policies and agree to reciprocal trade in face of American public demand for a high protective Tariff?

The people of the United States conduct their affairs and protect themselves by the principle that "Business is business." Why should Canada do otherwise?

Unlike Crerar or King, MEIGHEN stands firm for a reasonable Tariff to protect all our industries—those of the farm, the sea, the mine, the forest, the factory, and for the building up of a bigger and better Canada through the full development of the home market.

FRIENDSHIP WITH THE UNITED STATES? YES, BY ALL MEANS! BUT—

let us defend our home market, our industries, our farms, our workmen, our homes by the same methods as are used so effectively against us.

Let us work out our own destiny—that of a strong, self-contained nation within the British Empire group of Nations, courageous, self-reliant.

Canada Needs Meighen

The National Liberal and Conservative Party Publicity Committee

## Children Cry for Fletcher's

# CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

## What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

In Use For Over 30 Years

THE CENTAUR COMPANY, NEW YORK CITY
