### BACCALAUREATE SERMON TO M'MASTER STUDENTS

Rev. John McNeill of Winnipeg Adresses Large Audience—Results of Examinations.

In Castle Memorial Hall last night, the baccalaureate sermon of McMast University was delivered by Rev. John McNeill, B. D., of Winnipeg. The sacred service, which was also attended by Wallace, outlined the work of the college and briefly announced the several meetings for to-day.

Seated on the platform were many prominent in college and educational circles, among others: Rev Dr Thomas, Rev. E. Morris Harris, James Ryrie, A. L. McCrimmon, Rev J. B. Kennedy, Rev J. C. Sycamore, Rev Mr. Cline, Dr. A. C. McKay, Dr Cross, Prof Clark, Prof Campbell, Rev. John Dredge, Rev Mr. Berry, Mr. Wilcox, Mr. P. C. Cobbe, and Rev. W. A. Norton.

"McMaster University," said Chancellor, "is young, but it is also well equipped with a good work. By a life of purity, of unselfishness, of devotion to duty, McMaster graduates have been enabled to attain a high standard. He who would speak to them was a graduate of McMaster, who, in his words, had done a good work for God and humanity. Not by sensationalism or oddities of opinion, but by the simple, whole-souled preaching.

Rev. Mr. McNeill based his address upon John II, 10-19. Christ had been sent by the friends of Lazarus, but he had returned to the latter to exemplify His power. The words of the text furnished, first, the Christian interpretation of life, and secondly, the Christian interpretation of death. Life was a calm and intelligent service to God. God's urgent work must be done by God's own servants. In this case, Many a man had lived to the age of three or four years and never started on the work of life. Life was not measured by years, but by days.

The annual meeting of the McMaster Alumni Association was opened yesterday afternoon, when a paper was read on "Biblical Theology." Dr. Rev. L. G. Gilmore, of Princeton, N. J., said there will be a discussion, "Federation," Dr. E. Thomson, K. C., opposing, and Dr. Frederick Tracy favoring it. The discussion was adjourned to take place in the afternoon.

**Chancellor Wallace Resigns.**

Chancellor Wallace tendered to the university and board of governors of McMaster University his resignation, which was accepted. Chancellor Wallace has been connected with the university for the past six years, and on his retirement from his present position will return to his first charge at Lowell, Mass., which has a membership of some 1500. The time given for his retirement is a desire to resume upon the active duties of the ministry. The board of governors yesterday appointed Edmund H. Oliver, B.A., rector in history.

**Scholarships and Prizes.**

For the year 1905-06, a scholarship in classics—D. W. Campbell; Frank Sanderson scholarship in mathematics—E. C. Fox; one-year Campbell scholarship in classics—James Robertson; Harry L. Stark scholarship in mathematics—Stuart J. Bates. First year theological scholarships—Dr. Currie Elmore Harris, Latin—Dr. Currie M. R. Vansickle; Elmore Harris prize in Greek—Miss H. R. Vansickle; John Firstbrook prize in French—Miss Bosie Pugsey; James Ryrie prize in German—Mr. McKechnie.

**Examination Results.**

Following is the list of those who have completed their respective courses: Arts B. A.—Walter J. Clark, Mr. Clarke, James H. Cranston, Cyrus S. Eaton, Ernest R. Foster, Fitch, Charles H. Foster, George W. Gage, Oliver O'Gorman, William J. Gage, Ernest J. Jordan, Joseph L. Kellie, John L. MacArthur, Daniel A. McGregor, Donald L. MacLaurin, John B. MacLaurin, William B. Mathews, Duncan G. Munro, Harry B. Pease, Ernest R. Foster, Fred C. Mabie, Senior, George E. Tomkinson, E. Vlens, Albert G. Vining, James A. Weir, Annie Windsor, Huson W. Wright, George W. Young.

Arts, M.A.—Clarence L. Brown, Fred C. Mabie, Theology—Archibald Campbell, Donald C. Welsh.

Four years' course—Walter J. George, Robertson.

Arts, Fourth Year.

Evidences of Christianity—Class I—E. R. F. Fitch, W. E. Mathews, J. B. MacLaurin, H. B. Parker, Miss A. Windsor, Class II—W. G. Gage, C. F. Eaton, Frankland, G. W. Gage, J. J. Jones, J. B. MacArthur, Miss Hartley, R. G. TORONTO.

JAPS CELEBRATE THE YALU.

Kuroki's Army Makes Gala Holiday  
of Notable Anniversary.

Headquarters Gen. Kuroki's army, via Pusan, May 1.—The anniversary of the battle of the Yalu was celebrated by Gen. Kuroki's army today with spectacular fetes. Soldiers representing all military organizations marched in decorated ranks, with parades, effect. The valley in which the headquarters is encamped was transformed into a park by utilizing streams, grass plots, trees and shrubs for the reproduction of Japanese scenery.

An armistice tablet, in memory of the army's dead, was erected on the summit of a hill, and marched to it a small army. A grand avenue of trees studed with artificial cherry blossoms and blossoming plum blossoms arches. Other features of the decoration were an equestrian statue, representing Gen. Kuroki, and a reproduction of the Yalu battlefield.

Shinto and Buddhist services, in memory of the dead soldiers, were held at the altar, with troops massed at the foot of the hill. Drums, trumpets and bugles and drummers of odd companies were laid out on the plain. Several hundred officers lunched at tables under the trees, and the amazons, which followed the cavalcade, were in full array for the reproduction of the Samurai warriors and followers of feudal times.

**DROWNED BY FRIENDS DIES WHILE INTOXICATED**

Quebec, May 2.—About 11:30 last evening a carter named Trudeau failed to arrive at a hotel to take a young man to his residence. The latter, who was much under the influence of alcohol, told Trudeau that his name was Pouzras and he wanted to be driven to his home on Laurier street. The carter started off, but in his haste forgot to get his fare, so he got his fare to tell him the number of his residence. The carter drove to No. 7 police station, where he found the police directory. He found that three families named Pouzras resided on that street, but on proceeding there could get nobody to admit any acquaintance with the young man who was then driven to No. 1 station, where it was discovered that he was dead.

The deceased proved to be well-known in this city, and was a son of ex-Al. Ford Poitras. For a number of years he was a member of the New Connor, 4th Royal Rifles, and joined the Canadian regiment which was quartered at Haifa.

**BEHIND CLOSED DOORS.**

Galt, May 2.—(Special)—To-night the seven committees met with closed doors to discuss the terms for the several sections of sewers and storm drains involved in the plan of supplying this town with adequate sanitary facilities and improved water system. Among those present were McLaughlin of Ottawa, Connelly of Toronto, Neetham of Windsor, McKnight of Toronto, and Symes of Niagara Falls. The year will be allowed to finish up. The cost approximately will be \$100,000.

**British miners Threaten Trouble.**

Montgomery, N.Y., May 2.—The 1,000 striking brickyard employees who quit work yesterday made another demonstration today, marching from Duchesne street to Clinton, with clubs and presents all won free, who assembled at 13 yards in the district. To-morrow an attempt will be made to resume work. The strikers are in an ugly mood and trouble is feared.

**Frightful Dreams.**

**Dull Headaches.**

**TERIBLE PAINS AND A FREQUENT DESIRE TO URINATE.** Such were the troubles of Mr. Joseph Linda, Alms N.W.T. He happily found relief in DOAN'S KIDNEY PILLS.

Here is what he says: "I was troubled with dull headaches, had frightful dreams, terrible pains in my legs, and a frequent desire to urinate. Noticing Doan's Kidney Pills recommended for kidney trouble, I decided to give them a trial. I received a box, and was very much surprised at the effectual cure they made. I take a great deal of pleasure in recommending them to all kidney trouble sufferers."

Doan's Kidney Pills help the kidneys to drain off the poisonous impurities which have collected, thus cleansing out the kidneys, bladder, and all the urinary passages. They correct inability to hold the urine, and thus obviate the necessity of getting up many times at night to urinate. Their good results will be immediately felt in all cases of kidney trouble.

Price 50 cents per box, or \$1.25. At all dealers, or will be mailed direct, on receipt of price, by THE DOAN KIDNEY PILLS CO., TORONTO, ONT.

## GOING TO HAVE A GARDEN INSTEAD OF A BACK YARD

Operations Are Now in Full Swing in Hundreds of Homes in Toronto.

There is going to be more scenery. When May the first has been marked off the calendar the grocer sent around last Christmas, it is time for the maid of the house to talk of converting the back yard into a flower garden.

Build up your system—clean out the pores—rejuvenate your spirits—by spending a night at

## Because You Came to Attend the Horse Show

There is no reason why you should not accomplish other things at the same time while you're at the horse show.

For instance, a new Turkish Bath at Cook's is something you cannot get at home—in fact, there are few places on the continent where you will find anything so fine in the way of Turkish Bath appointments as we offer our patrons.

Build up your system—clean out the pores—rejuvenate your spirits—by spending a night at

## Cook's Turkish Baths

2-204 King St. West, Toronto.

or some other family paper around the premises there are hints on Gardening and the old gent is going to tell you how to grow roses, tulips, etc. If he is not available, send him a letter and he will get someone else to do the job. We have a fortune-telling book containing the names of stars which is altogether different from the one used by the amateur astrologer in preparing to plant them. It is required quite a lot of time to go over the book and the gardeners should keep it in the coal-bin and flicked over the coals at night and plants seed in flower beds, and how is it that a week can grow business?

The garden is of course to consist of a lot of ordinary cheerful-looking flowers. None of the kind they put on cof-

fee. Beauty in the Back Yard.

As a rule the back yard question has been left entirely to any extent.

As a beauty spot it was never played as a favorite, but will be if the old chap's plans materialize. The old man's idea is to make a map work hard at night for nothing after he has done an easy day's work downtown, for which somebody else has paid his wages.

When the ladies of the household begin to associate pretty flowers with the map of May and the yard is up to date, then the old gardener has been in the cause of the Yalu.

The old man's idea is to make a map work hard at night for nothing after he has done an easy day's work downtown, for which somebody else has paid his wages.

It is generally conceded that the best time for him to come to town is right away, as on the threshold of summer there is nothing like a little exercise after tea. If the man next door has not been to the garden, operations start without delay. That shovel has been used in the coal-bin a well-meaning rest, but when gardeners come around the back-door flies out of the attic window.

**Carling's Ale**

The Ale that's Always Pure.

**FEARS WAR WITH THE U.S.**

East of Mouth Thinks It Proper to Consider Eventualities.

(Canadian Associated Press Cable)

London, May 2.—The Earl of Meath, in an article on the defence of the Empire in The Nineteenth Century, referring to the Canadian frontier, says: "It is earnestly to be hoped we may never be at war with our friends in the United States, but still it is only right for a nation to consider all eventualities. Because we have to be ready to defend ourselves ought not to neglect to be prepared for war, even against those whom we think there is little chance of our having to meet in battle. Here we have a frontier of 6000 miles to defend."

It is absolutely necessary for the empire that we should have predominance at sea, for we should be starved out if we failed to maintain the predominance; moreover, we would be unable to defend our empire by conveying our troops across the ocean. On the other hand, we must remember that predomiance at sea does not in any way prevent certain nations from being able to make land attacks upon us, of which United States might be one."

**LINWICH KISSED HIS SOLDIERS.**

Pathetic Incident Marked Easter Day in Russian Camp.

(Canadian Associated Press Cable)

Gunsburg Pass, May 2.—During the Easter celebration here, after the morning service, all the troops in the region around headquarters were drawn up in line before Gen. Linwichev, who came out, greeted the troops, and passed down the line, saluting each and every soldier with a kiss. Many of the wives and many of them wept. The incident served to incite their boundless worship of the old, grey-bearded.

Gen. Linwichev continues energetically the reorganization of the various departments of the armies.

**Subscribed at a Premium.**

Tokio, May 2.—The tabulations of the subscribers to the fifth loan of \$50,000,000 have not yet been completed, but there are indications that the entire loan has been placed at a premium. It is evident that some of the largest international bankers, temporarily withholding their subscriptions in order to obtain part of the loan at the best possible rate.

**The little Doctor, in your Vest Pocket**

SEE the thin, round-cornered Little Emetic Box below. When carried in your vest pocket it means Health-insurance.

It contains Six Candy Tablets that taste like Licorice, and are almost as pleasant as Chocolate.

Each tablet is a working dose of Cascarets, which acts like Exercise on the Bowels and Liver.

It will not purge, sicken, nor upset the stomach.

Because, it is not a "Bitter," like Salmi, Sodium, Calomel, Jalap, Senna, nor Aperient Waters.

These waste Digestive Juices of the system need tomorrow, in merely flushing-out the Bowels today.

Neither is it like Cascarets, or other Oily Laxatives.

They simply lubricate the intestines for transit of the food stopped up in them at that particular time.

These emer-gency drugs relieve the immediate trouble, but do not relieve its Cause.

The same trouble will therefore recur again till that cause is removed permanently.

The chief cause of Constipation and Indigestion is a weakness of the Muscles that contract the Intestines and Bowels.

This contraction is what propels Food onward, and squeezes it into the Digestive Juices formed by the body of that metal.

When these Contractile Muscles become weakened from lack of Exercise, or from overeating, Constipation sets in, and will grow more rapidly the more Cathartics and Laxatives are given to relieve such emergency.

The best cure for Constipation, or Indigestion, is simply lots of Out-door Exercise, to stimulate the Muscles of the Bowels as well as the Muscles of the Legs and Arms.

Few people have the time, or inclination, to take sufficient of the Athletic Exercise.

All Druggists sell them.

You can buy Cascarets FREE for May.

Buy a copy of The Four-Track News for May; for sale at all news-stalls, ed

**ENOUGH EVIDENCE IN NOW TO SPUR HOUSE TO ACTION**

But Railway Companies and Bell Will First Be Heard—Phone Service in Nova Scotia.

Ottawa, May 2.—(Special)—At the telephone committee, 10-day, W. F. Matheson said that the evidence already in might be referred to the house in order that no time might be lost in getting some much desired legislation thru this session. He pointed out that there was sufficient evidence brought out to call for law to compel interchange of business over all lines, and to provide for access to railway stations by all companies, independent or otherwise, who desired to put an instrument the elin. Mr. Monk also favored this course, adding that the committee, while agreeing more or less to the same ground with the witness, now being called, Mr. Bergeson said: "Mr. Gouin from Quebec, in view of the fact that the Company's side of the question, also that of the big transportation companies, had decided to ask the committee, Mr. Monk and myself, to come before the committee on Tuesday next. Mr. Sise of the Bell will be called shortly, no date being fixed. Cost \$122 per mile.

Col. Matheson moved that the house go into committees to

expediting institutions for the deaf and dumb and the blind.

Mr. Clark (Bruce): To amend the

Municipal Act.

Mr. Downey proposes to have electric cars equipped with tenders and power supplied by the government, and to improve the chief engineer of the public works department to see that the regulations are enforced. He has two amendments before the legislature, one to the telephone bill, the other to the bill to amend the Street Railway Act. A clause in the electric railway bill provides that when running on their own right of way, railroads shall have the right to raise any highway upon providing and maintaining at their own expense such protection as may be ordered by the railway company.

Col. Matheson moved that the

House of Commons recommit the

following resolution: That the lieutenant-governor-in-council is au-

thorized to raise by way of loan a sum

of money not exceeding \$7,000,000 for

the all of the following purposes:

For the payment of works carried on

by commissioners on behalf of the pri-

vate sector, for carrying over a sum

not exceeding \$1,000,000, for carrying over

any floating indebtedness of the

provincial, and for carrying on of the

works authorized by the legisla-

ture.

Mr. Hartcourt proposed to the vagu-

eness of the resolution. He said that the

amount of money would be re-

quired for the purposes named.

Mr. Matheson said the Temiskaming Rail-

way would cost more than \$7,000,000.

For the Hillside line the North Bay to

to N.W. Linskard, the cost was

\$4,500,000, and for the 150 miles from

Linskard to meet the Grand Trunk Pacific the cost would be four and a

half million more.

That did not satisfy Mr. Graham,

and he gave more information for the

formation of these small companies that had tak-n stock in them, and now had \$122,500 invested in that man-

agement. The new companies were in

towns and villages in rural districts.

The agreement between the Nova

Scotia Company and other companies

was to certain territorial order that

they should invade each other's ter-

ritory, and specify that standard instruc-

tions.

Mr. Winfield said his policy since tak-

ing over the management had been to

work in with local companies.

He entered into a formal agreement with

the Nova Scotia Government to

keep the telephone rates down.

Both sides made concessions.

The agreement is important because it insures

an uninterrupted supply to the mines

and smelters of the Kootenay.

Mr. Winfield has been able to approach and to grant no permit without a public hearing.

Bell on the Board.

In April, Mr. Matheson, the witness

said that the Bell Company had 14 per

cent of the stock of the Nova Scoti-

a Telephone Company, and had two

directors on its board.

It was decided to summon Major

Crow of Sydney to explain the telephone

connection in that regard.

Major Crow of St. Joseph's Island,

Lake Huron, was also examined. Until

last year the local company on the

island had been in control of the

telephone connection.

The Bell bought the mainland company and had shut off the

island company from its connection.

NO CAMPERS AT WOODBINE BEACH.

Aldermen So Decide and Early Birds Will Be Told to Move.

Campers will still be refused

permits to locate on the beach to the

west of Woodbine Avenue.

The permit was turned down to the committee on

parks and exhibits, and yesterday

the property committee was informed

that the beach in question, not being

park land, did not fall within the jurisdiction of the parks committee. It was

then decided to give instructions to the

property commissioner to have those

campers who are already on the ground

removed and to grant no permit what-

ever.

The application of the John Macdonald

Co. for renewal of their lease of

the Esplanade property in the rear

of the Esplanade property was not

granted without some discussion of

the firm's opposition to the establish-

ment of a siding along the Esplanade.

Ald. Geary thought the firm should be

induced to withdraw its opposition.

NEW ENGINE IS HERE.

One of the big fire engines made by

the Waterous Co. of Worcester, Mass.,

arrived in the city last night and is now

stationed on Lombard-street.

It is a massive and handsome piece of ap-

paratus weighs 6½ tons and is fitted

with rubber tires. It is fitted for a

four-horse hitch.

Theatre Closes: So Does Season.

Brooklyn, May 2.—(Special)—The

town council has decided to close up

the Brooklyn Opera House a month

earlier than the usual time upon the

ground of unsanitary and unsuitable

conditions.

At least two citizens are anxious to

get the lease of the place for the

rebuilding of the building.

They do make Exercise for the Bowels and Liver perform their work in such a way that they lean upon similar assistance for the

intestines and bowels.

Cascarets act like Exercise.

If carried in your Vest Pocket,

it makes the Bowels and Liver

perform their work in Nature's way.

Through Cascarets Exercise

the Muscles grow stronger, and

more capable, after each dose of Cas-

carets.

Cascarets are practically to the

Bowel Muscles what a Massage is to

the Athletic Muscles.

They stimulate the Bowel Muscles to contract, expand, and squeeze the Digestive Juices out of food eaten. This contraction is what propels Food on to its destination, after all the nutrients have been absorbed from it into the Blood.

Cascarets do this naturally, without purg- ing or discomfor-t.

They don't have to be taken to do their work in the intestines and bowels.

They are easily digested and

absorbed into the Blood.

Cascarets are practically to the

Bowel Muscles what a Massage is to

the Athletic Muscles.

They are easily digested and

absorbed into the Blood.

They are easily digested and

absorbed into the Blood.

They are easily digested and

absorbed into the Blood.

# SPECIAL FARMING AND LIVE STOCK EDITION

## SYSTEMATIC FARM WORK.

Order is the great controlling force of the universe. The signs appear to be no fatality in the arrangement of planets or the recurrence of the seasons. All the manipulations of the solar system are conducted according to immutable laws that were put in operation to perform the functions of their Creator. To understand these laws is to have confidence in the stability of the seasons and the endless recurrence of seed time and harvest. There is an unfathomable presence in nature's laws that points to a supreme mind that ordained them. Man is largely an imitator of example and an observation of the ceaseless workings of nature, from according to an unvarying system should stimulate one to work according to a methodical system in prosecuting his profession.

On the farm there is a natural season for special work, and the husbandman should improve these periods to systematize his undertakings. Operations should be arranged ahead, that when the interval arrives for special work, the farmer will know what to do and can apply his time to the best advantage. The general who expects to conquer the enemy carefully plans his campaign, and leaves nothing to blind chance. Planning work on the farm will bring success. The man who has his planning's work laid out will accomplish greater achievement than the farmer who has no order or system in managing his farm operations. The farmer who plans his work ahead is never confused as to how to employ his time to the best advantage. The agricultural campaign is arranged so that one operation follows another in methodical order and the land is made to produce the best results possible.

In arranging for the season's work the farmer should plan to use good seed, for the great law of nature is inexorable, that "whatever a man soweth, that shall he also reap." The success of the whole season's operations is contingent on the quality of the seed which is to be sown. The agriculturist should select the best of seed of every kind of grain sown, and then, with thorough cultivation, every law of success has been honored.

## THE HOG SITUATION.

The month that is just closed has been an eventful one to those engaged in the pork-packing industry in Canada. It is noteworthy for the higher prices paid in Ontario by the farmers for their hogs, than the fees of live hogs received in the United States.

The Ontario farmers are now interested and feeding the best type of bacon hog, and are justly entitled to receive the highest price for the hog that is the most profitable to the pork-packing establishments for the British markets.

The British market for bacon, through March, was quiet and irregular. Danish second quality was at \$3 per lower. The demand favored Canadian brands at higher, for most selections. Since the beginning of April the Canadian hams have further advanced in price. The most gratifying item in the Dominion government statistics of last year's exports was the increase in provisions of \$5,500,000, the total reaching \$16,750,152. This was the more welcome when other items of Canadian exports made deficits.

Canadian hog prices maintain last week's firmness, and are still quoted at \$7 per cwt., fed and watered, and \$7.25 off cars. Chicago and Buffalo prices are lower than a week ago, and have enabled suppliers from these centers to be brought into Canada. Already this week eleven cars of American hams have been received by one local packing house. Under these conditions, it does not appear possible to advance Canadian prices to a higher point, but yesterday's market showed weakness, even with the foreign competition.

## WHEAT SUPPLIES CUT LOOSE.

The big tumble in wheat prices across the line has had a corresponding influence on values among Canadian dealers. The high price at which our Northern wheat has held up, considered of the last year's crop in estimation.

The holder of limited supplies of wheat, at good round figures, and thought that nothing further was needed than to await the incoming of buyers at prices which they might dictate.

The exodus of Canadian wheat had dropped to almost the vanishing point, but this had no terror for the grain holders, who were governed solely in their ideas by the Chicago trust. With the Chicago bubble pricked, Canadian grain men have returned to their normal condition of good sound judgment, and have resolved to stand by the side which stands true to British gold. Some will be a loser by the disrupted deal, but then it is gratifying to think that it will fall on those well able to bear it. The Canadian public has been held up on the price of bread, but there is satisfaction in the knowledge that the farmer has received a fair proportion of what is now evident was an unreasonable levy.

## THE POOR MAN'S COW.

The goat is the poor man's cow, and she is a much better milk giver than the dog, considering the amount of food she consumes. A poor man can keep a goat and have plenty of milk, better than cow's milk, for about one-eighth of one-cent worth of the money it costs to keep a cow. At the same time goat's milk is coming more and more in favor with physicians as food for infants, and properly prepared goat's milk such as physicians would order for a well to do patient would fetch from \$2 to 25 cents a quart.

In regard to the number of goats and milk production abroad it may be said that in America they now keep 3,000,000, whose value is \$12,000,000, and their annual production in milk, hides and the meat of goats slaughtered annually amounts to \$1,000,000,000. Switzerland, which is only about half the size of Indiana, produces annually 12,575,000 quarts of goat's milk, valued at \$1,000,000,000. These figures will show that the goat is not to be overlooked as an economic factor.

Four quarts a day is the average of Swiss goats, and a woman not as high as five quarts. There is a record of a Langzaan goat, which is one of the largest breeds, which gave 1800 quarts a year, and at the height of its milk flow giving ten quarts a day with three milkings. But of all the varieties of the Nubian goat, the milk-milker, giving from five to twelve quarts daily. The goats that are bred for milk require private freedom eight to ten months, but that is twice or three times as long as that could be expected of the native breeds here.

## LOCAL HORSE MARKET LITTLE ON THE QUIET SIDE

Which is Always the Case Immediately Following Horse Show, Still Some Good Sales Are Reported.

Sales of horses were not as numerous as usual during last week's horse show. Still a few were made, and at farm prices. Dealers report business as brisk, but their sales have not been as great as those of animals wanted for immediate use, and these sales were made either in the two or three days preceding the show or at the same time since. Some inquiries were made regarding horses that were entered, and in the majority of instances the results of propositions were taken under consideration, so that the actual business done was slight. However, dealers have been doing well, and at the special sale held at the repository on Saturday, while one or two of the highest-class saddle and carriage horses were held for a long time, the majority of animals and saddle horses were disposed of at satisfactory prices. Buyers of carriage and saddle horses nowadays are very exacting. They will not pay dear, well for a carriage, and the same is true of the animals and saddle horses, well-mannered and of full quality they pass them up very quickly.

George Pepper reports the sale during the last week or ten days at which he considered generally good of a round dozen horses, mostly geldings, and street stallions a week before the show.

Among them was the prize-winner, His Highness, br. g., 15.3 years, to go to Boston. The Square, a 6-year-old gelding, was sold to Mr. W. H. Thompson, Washington, b. g., 15 years, to go to Guelph; Faultless, b. m., 15.2, by Mambrino King, to Mrs. Lawrence, Boston; Major, a 6-year-old gelding, 6.2, each 6 years, to go to Boston, and three pairs, one of brown cob to go to Pittsburgh, another of chestnut mares and a third of bay geldings, the last two returned to their old and only true friend the horse with greater respect. Horses have become accustomed to abnormal prices and the motor vehicles, they are willing to pay fair value for, and as such as are trained and conditioned for them obtained. Here are a few of the prices obtained at this somewhat memorable sale:

Bond and Lillard, cross matched

medium grey and coal bl. b.
