During this year, also, instruction is given in Blowpipe Analysis, the object of which is to enable Students by means of the Blowpipe and a few simple re-agents to detect the nature of different Minerals or Ores. On account of the small quantity of apparatus required, and the rapidity with which accurate results may be arrived at, a knowledge of this subject will be found most useful to those engaged in geological or other field-work.

## EXTRACTS FROM THE UNIVERSITY REPORT FOR 1885.

Additions were made in the past summer to the buildings occupied by the Faculties of Arts and Applied Science. These include new Chemical Laboratories, in which the special practical work in Chemistry of the Faculties of Arts and Applied Science will be carried on, along with the assaying and mineralogy connected with the Mining School. These laboratories will, when completed, be capable of accommodating 48 students. The number at present working in them is 34. One of them is being fitted up with the most approved appliances by a member of the Board of Governors.

The University thus possesses in the Chemical Laboratory of the Medical Faculty, and that of the Faculties of Arts and Applied Science, working-room for 120 students, the whole of which is now, or very shortly will be, required.

The Faculty of Applied Science has a valuable collection of engineering instruments and mining and mechanical models.

We are desirous of directing the attention of the friends of the University to another requirement in the direction of building, viz., the provision of suitable rooms for the Faculty of Applied Science. This has hitherto been accommodated in the building of the Faculty of Arts, but not in a manner at all proportionate to its requirements and to its importance as the oldest and most extensive school of Applied Science in Canada. The building required should include not only class-rooms, but commodious and well-lighted drawing-rooms, a model-room and economic museum, and laboratories for exact measurements, testing, electrical work, botanical work, assaying, metallurgy, etc., as well as a workshop with appliances for constructing models, for repairs, &c. The University has the site reserved for such a building, but has not at present means for its erection.

With reference to these requirements, it is to be observed that the University proposes, as heretofore, in accordance with the practice of the best schools abroad, to give a complete scientific and theoretical course in Civil and Mechanical Engineering, Mining and Assaying, and Practical Chemistry. It expects students to engage in practical work in the summer vacations and to make reports thereon;

and it also provides, as far as possible, for practice in its own laboratories and class-rooms in Chemistry, Assaying, Drawing and Designing. It is now desirous to develop its means of training in the art of measurement, and in physical and electrical manipulation, and other practical matters, which may be profitably taken up in connection with the College courses. With a suitable building and one additional chair, it might fairly challenge comparison with any of the schools of Applied Science in America.

It is hoped that these requirements will soon be supplied by the friends of education or those interested in the Industrial progress of the Dominion, which its teaching directly tends to promote.

In addition to the regular lectures, special lectures have been delivered by eminent engineers, who have been invited by the Faculty to give the students the benefit of their experience in particular branches of the profession.

According to a statement furnished by the Dean of the Faculty five of its graduates are professors in colleges, fourteen are employed in geological surveys, twenty-eight are resident or assistant engineers on railways, six are employed as engineers in public works, two are managers of chemical and mining works, and two are editors of engineering journals. Others are engaged in private practice, as surveyors, architects, mining engineers, etc.

Attending the classes during Session 1885-86 :—

Undergraduates in the courses of Civil, Mechanical and Mining Engineering and practical Chemistry,\* 50.

Students in Arts taking Practical Chemistry, 8.

At the close of Session 1884-85 four Students graduated in Civil Engineering and three in Mining Engineering.

#### BURLAND PRIZE.

A prize of \$25.00 is offered by Mr. Jeffrey H. Burland to Students entering the Second Year, the subjects of examination being (a) Inorganic Chemistry. (b) Elements of Organic Chemistry. (c) Practical Chemistry. Further information may be obtained on application to the Registrar.

The Fifty-fourth Session of the Faculty will be opened on Friday, October 1st, 1886, by an introductory lecture at 3 p.m. The regular lectures will begin on October 4th, at the hours specified in the time table, and will be continued for six months.

The new building of the Medical Faculty, which was completed during the past Session, is one of the most complete structures of its kind on this continent or elsewhere. It has been found admirably adapted for the fulfilment of the great aim of the Faculty—to make the teaching of the primary branches as practical and as thorough as possible. The facilities now possessed by the Faculty for the above purpose are equal to those of the most advanced European medical schools.

In addition to the laboratories and dissecting room, there are two large lecture rooms, each capable of comfortably seating 300 students, and one small demonstration room for classes of 50 and under. There are two large library rooms and also two rooms for museum purposes. There are provided for students, a cloak-room, waiting and reading-rooms.

---

The class tickets for the various courses are accepted as qualifying candidates for examination before the Colleges and Licensing

bodies of Great Britain and Ireland, and the College of Physicians and Surgeons of Ontario. The degree in Medicine of this University carries with it at the Licensing Boards of Great Britain the same exemptions in certain subjects as are granted to all colonial degrees.

To meet the circumstances of the General Practitioners in British North America, where there is no division of the profession into Physicians and Surgeons exclusively, the degree awarded upon graduation is that of "Doctor of Medicine and Master of Surgery." in accordance with the general nature and character of the curriculum, as fully specified hereafter. The degree is received by the College of Physicians and Surgeons of the Province of Quebec.

### § I. MATRICULATION.

It is very important that intending Students should bear in mind the following:—

(1.) That if natives of Ontario, and if they wish to obtain the license of that Province, they must conform to the regulations regarding the Preliminary Examinations, and register before beginning their Medical Studies.

(2.) If natives of the Province of Quebec, they must pass the Matriculation Examination of the Quebec Medical Board before beginning their medical studies.

(3.) Natives of the Maritime Provinces, and of Manitoba, may present themselves before the Local Medical Boards for the Preliminary Examination. Where the Examination and Standard are equivalent to those of the University, a certificate (bearing the standing of the candidate in the various subjects) will be accepted, and the student may register without further examination or fee.

Graduates in Arts are exempt from the Matriculation.

#### (A).—UNIVERSITY MATRICULATION EXAMINATION.

Students have the option of passing either the Arts or Medical Matriculation of this University. The latter is the same as that recommended by the Medical Council of Great Britain. Examinations in conformity therewith will be held the last Friday and Saturday in March, and the last Friday and Saturday in September of each year. Applications may be made to the Registrar of the Faculty till the

ASSISTANT, R. F. RUTTAN.

The course in Practical Chemistry includes two hours' laboratory work three times a week for three months. The Student is instructed individually in chemical manipulations, blow-pipe analysis, and qualitative determination of the salts, acids, &c., he will require to use in practice. He is required before finishing his course to be familiar with the principles of Practical Forensic, and Sanitary Chemistry. Special attention is directed to instructing the Student in making accurate notes of his experiments and his conclusions. These notes are examined daily and criticised.

## PHYSIOLOGY.

PROFESSOR T. W. MILLS.

The purpose of this Course will be to make Students thoroughly acquainted, as far as time permits, with modern Physiology ; its methods, its deductions, and the basis on which the latter rest. Accordingly a full course of lectures will be given, in which both the " Experimental " and Chemical departments of the subject will receive attention.

As during the past two years, in addition to the use of diagrams, plates, models, &c., every department of the subject will be experimentally illustrated. The experiments will be free from elaborate *technique*, and many of them will be of a kind susceptible of ready imitation by the Student.

*Laboratory work for Senior Students :—*

(1.) During the first part of the Session there will be an optional course on Physiological Chemistry, in which the Student will, under direction, investigate food stuffs, digestive action, blood, and the more important secretions and excretions, including urine. All the apparatus and material for this course will be provided. Fee \$6.

(2.) The remainder of the Session will be devoted to the performance of such experiments as are unsuitable for demonstration to a large class in the lecture room, and such as require the use of elaborate methods, apparatus, &c. In selecting those who shall join in this course, preference will be given to Students who take the laboratory work in physiological chemistry, and such as have been most devoted and successful in the pursuit of Physiology during their first year. (There will be no extra fee for this part of the course.)

As far as possible senior Students who do not share in the above courses will be given an opportunity to take some practical part in the physiological work.

## HISTOLOGY.

PROFESSOR GEO. WILKINS.

This will consist of a course of ten lectures and twenty-five weekly demonstration with the Microscope. As the demonstrations will be chiefly relied upon for teaching the Microscopic Anatomy of the various structures, the specimens under observation will then be minutely described. Plates and diagrams specially prepared for these lectures will be freely made use of.

*Practical Histology.*—This is an optional course given by Prof. Wilkins for the purpose, more especially, of teaching Microscopy. It will consist of twenty-five lessons of two hours each. Each Student will be provided with a Microscope and shewn how to use it, and also how to cut, stain and mount specimens for microscopical investigation.

For the purpose of enabling students to observe the different effects of staining, &c., on diseased and healthy structures, a few diseased specimens will be given them to prepare, at the latter part of the course. Students are at liberty to keep all the specimens they prepare. One of the great advantages of this course is that Students will be able to collect a cabinet of 100 or more specimens for reference at any time; these, besides being of great help to them during their College course, they will find especially useful when in active practice for the purpose of comparison with diseased growths. Reagents, and everything except cover-glasses and cabinet cases, provided. Fee \$12.

## THE MICROSCOPE IN MEDICINE.

DRS. WILKINS AND W. G. JOHNSTON.

This is an optional class for third and fourth year Students, and has been divided into two courses. (1) Pathological Histology, 30 lessons given during the winter, in which special attention will be paid to the microscopical study of pathological anatomy, and methods of preparing specimens. Each student will prepare and mount for himself a cabinet of specimens illustrating all the principal lesions of disease. (2) Clinical Microscopy, 20 lessons in the summer session, affording a

systematic training upon the use of the microscope in the diagnosis of disease, the examination of urine, sputum, blood, pus, tumors and parasites of all kinds. Fee for either course alone \$12; for both courses \$18.

#### MATERIA MEDICA.

PROFESSOR JAMES STEWART.

The course on this subject deals for the most part with the pharmacology and therapeutics of the different medicinal agents. A good deal of attention will be given to the "untoward effects" of drugs, and when possible these effects will be illustrated by the exhibition of living specimens.

The leading officinal agents of the British Pharmacopœia will be fully considered, as will also those drugs of recent introduction into practice which have been found useful, but have not, as yet, found their way into the Pharmacopœia. The following groups of medicinal agents will, on account of their great importance, receive special attention:—1, Cardiac Tonics; 2, Cardiac Depressants; 3, Motor Stimulants; 4, Motor Depressants; 5, Anæsthetics; 6, Analgesics; 7, Mydriatics; 8, Alteratives; 9, Hæmatinics; 10, Astringents; 11, Purgatives; 12, Digestants; 13, Nutritives; 14, Antiseptics; 15, Antipyretics; 16, Diuretics.

Electro-therapeutics will also be dealt with.

#### MEDICINE.

PROFESSOR R. PALMER HOWARD.

While the lectures on this subject are mainly devoted to Special Pathology and Therapeutics, no opportunity is lost of illustrating and explaining the *general* laws of disease. With the exception of certain affections seldom or never observed in this country, all the important internal diseases of the body, except those peculiar to women and children, are discussed, and their Pathological Anatomy illustrated by the large collection of morbid preparations in the University Museum, and by fresh specimens contributed by the Demonstrator of Morbid Anatomy.

The College possesses an extensive series of Anatomical plates illustrative of the Histological and Anatomical appearances of disease, and the wards of the General Hospital afford the lecturer ample opportunities to refer to living examples of very many of the maladies he describes, and to give the results of treatment.

#### CLINICAL MEDICINE.

PROFESSOR GEORGE ROSS.

Attendance is given in the Medical Wards of the Montreal General Hospital on three days of every week with the 3rd year students, and three days with those of the 4th year. Accurate reports of all cases are kept by duly appointed clinical clerks, and are systematically read before the class. Instruction is given at the bedside,

and special examination of microscope, diagnosis, a rotation to their general bearing up observation candidates

and special inducements are offered to every pupil to take part in the physical examination of patients. The mode of conducting investigations, the use of the microscope, the value of the thermometer and ophthalmoscope, &c., in medical diagnosis, are all explained and illustrated. Senior Students are called upon in rotation to examine new cases before the class, and to be examined thereon as to their general knowledge. In addition, one weekly Clinical Lecture is delivered, bearing upon some case or cases of importance which may happen to be under observation at the time. Special attention is directed to Medical Anatomy, and candidates for the degree will be examined thereon.

### SURGERY.

PROFESSOR GEO. E. FENWICK.

The first part of this course consists of Surgical Pathology, illustrated by a large collection of preparations from the College Museum, also specimens as they are obtained from cases under observation at the Hospital, and contributed to that collection by the Hospital pathologist and from private sources. The second part of the course is devoted to the practice of Surgery, in which attention is drawn to cases which have been observed by the class during the previous summer session. The various surgical appliances are exhibited, and their uses and application explained. Surgical Anatomy and Operative Surgery form a special department of this course, and Quain's and Maclise's plates are used in illustration.

### CLINICAL SURGERY.

PROFESSOR THOMAS G. RODDICK.

This course is eminently practical, consisting of bedside instruction and lectures delivered weekly, illustrative of surgical cases actually present in the wards of the General Hospital. The class is separated into junior and senior divisions which are taken charge of by the Professor on alternate days, when the reports of the Clinical clerks are read and criticised, and fresh cases are examined by the senior students. The surgical dressings are, as much as possible, reserved for these occasions, so as to give all present an opportunity of participating in the application of splints to fractures, dressing of wounds, minor operations, &c. Major operations are performed in the theatre attached to the Hospital, which is so constructed that the most distant can obtain a fair view of the operations. All the recently invented appliances for the treatment of surgical disease have been introduced into the Hospital.

### MIDWIFERY.

PROFESSOR A. A. BROWNE.

This course will embrace : 1. Lectures on the principles and practice of the obstetric art, illustrated by diagrams, fresh and preserved specimens, the artificial pelvis, &c. 2. Bedside instruction in the University Maternity, including the

management and after-treatment of cases. 3. A complete course on obstetric operations with the phantom and preserved foetuses, in which each final student will perform the various manipulations and operations. 4. The diseases of Infancy.

#### GYNÆCOLOGY.

PROFESSOR WM. GARDNER.

The course on this subject will comprise two lectures a week throughout the session. The anatomy and physiology of the parts concerned will be first discussed. Then the various methods of examination will be fully described, the necessary instruments exhibited, and their uses explained. After this the diseases peculiar to the sex will be considered as fully as time will permit, in the following order:—Disorders of Menstruation; Leucorrhœa, its causes and treatment; Pelvic Cellulitis and Peritonitis; Lacerations of the Cervix Uteri and Perineum; Urinary and Fæcal Fistulæ; Inflammations of the Uterus; Displacements of the Uterus; Tumors of the Uterus; Diseases of the Ovaries.

The lectures will be illustrated as fully as possible by drawings and morbid specimens. The Gynæcological Clinic of the General Hospital furnishes the Professor with ample material to illustrate the subjects considered in the didactic lectures.

#### MEDICAL JURISPRUDENCE.

PROFESSOR GEORGE WILKINS.

This course is delivered only during the summer session. It includes Insanity, the subject being treated of in its Medical as well as Medico-legal aspects. Special attention is devoted to the subject of Blood-stains, the Clinical, Microscopic and Spectroscopical tests for which are fully described and shown to the class. The various spectra of blood in its different conditions are shown by Zeiss's Microspectroscope, so well adapted for showing the reactions with exceedingly minute quantities of suspected material. Recent researches in the diagnosis of human from animal blood are alluded to. In addition to the other subjects usually included in a course of this kind, Toxicology is taken up. The modes of action of poisons, general evidence of poisoning and classification of poisons are first treated of, after which the more common poisons are described, with reference to symptoms, post-mortem appearances, and chemical tests. The post-mortem appearances are illustrated by plates, and the tests are shown to the class.

#### OPHTHALMOLOGY AND OTOTOLOGY.

PROFESSOR FRANK BULLER.

Will include a course of lectures on diseases of the Eye and the Ear, both Didactic and Clinical. In the former the general principles of diagnosis and treatment will be dealt with; in the latter, cases illustrative of the typical forms of ordinary dis-

eases of these placed under to take charge such students:

#### HYGIENE.

PROFESSOR R. L. MACDONNELL.

This course of Lectures will be delivered during the summer session only. It comprises lectures on Drinking-water and Public Water Supplies; conditions of Soil and Water as affecting health, including Drainage and the various methods for the removal of Excreta; the Atmosphere, including Heating and Ventilation; Individual Hygiene, comprising the subjects of Food and Drink; Physical Exercise and Bathing; discussion of the respective merits of the various forms of each, precautions, contra-indications, &c. Village Sanitary Associations: Mutual Protective Sanitary Associations for cities.

#### BOTANY.

PROFESSOR D. P. PENHALLOW.

The course in Botany includes Histology, General Morphology, Nutrition and Reproduction, and Classification; and is illustrated by specimens, diagrams, models and the microscope.

Students of the first year have access without any additional fee to the lecture in Zoology, in the Faculty of Arts, and to the Natural History Museum of the University, and the Museum of the Natural History Society of Montreal.

#### ZOOLOGY.

PROFESSOR SIR WILLIAM DAWSON.

This course includes a systematic study of the classification of animals, illustrated by Canadian examples and by the collections in the Peter Redpath Museum. It forms a suitable preparation for collecting in any department of Canadian Zoology and Palæontology, and an introduction to Comparative Physiology. It may be taken instead of Botany, or along with it, without any additional fee.

Students in Botany or Zoology will receive tickets to the Peter Redpath Museum and to the Museum of the Natural History Society of Montreal.

#### PATHOLOGY.

W. G. JOHNSTON, *Demonstrator.*

*This Course comprises:—*

1. Twenty lectures on General Pathology to students of the 3rd year.
2. Pathological Demonstrations weekly—Saturday at 10 a.m. Specimens of all kinds collected during the week, and their gross and microscopic appearances

are demonstrated to the final classes. In addition, special demonstrations in Pathological Histology will be given throughout the session.

3. Instruction in Post-Mortems. The Autopsy Room of the General Hospital is in charge of the Demonstrator. The post-mortems are performed by the students in rotation under his direction, and systematic demonstrations of post-mortem methods, including those to be followed in Medico-legal cases, will also be given.

### § IX. MUSEUM.

Most of the usual Pathological Specimens are collected here, obtained from Hospital and private practice. They are largely used in illustrating the lectures on Medicine and Surgery. There are also wax and papier-maché models.

During the past few years numerous and extremely important additions have been made to the Medical Museum.

It is particularly rich in specimens of Aneurisms. In addition to containing a large number of the more common varieties of these formations, there are specimens of such rare conditions as Aneurism of the Hepatic and Superior Mesenteric Arteries, Traumatic Aneu-

Specimens representing morbid alterations of the liver, including Cirrhosis (a beautiful specimen of the Hypertrophic form, weighing  $9\frac{1}{2}$  lbs.), Hydatids, Cancer, Abscess, Suppurative Hepatitis following Aneurism of the Hepatic Artery. This section also contains a large number of Biliary Calculi.

*Intestines and Peritoneum.*—Specimens illustrating the Morbid Anatomy of Typhoid Fever, Tropical Dysentery, Ulceration, and Malignant Diseases.

*Urinary Organs.*—Besides the various forms of Bright's Disease there are a number of specimens of Surgical and Cystic Kidneys, together with two specimens of Myelo-sarcoma. A fine cabinet of Urinary Calculi, collected by Dr. Fenwick, is also the property of the Museum.

*Bones and Joints.*—During the past year the Faculty have made very extensive additions to the specimens illustrating diseases of the bones and joints.

*Nervous System.*—In this section are included a most beautiful collection of Brains prepared by Dr. Osler after the method of Giacomini. Besides those illustrating pathological defect, there are specimens of the brains of horse, cow, dog, cat, pigeon, goose, lion, bear, seal, &c. The Museum also contains a small collection of human abnormalities prepared by Dr. Shepherd during the time he was Demonstrator of Anatomy.

#### § X. LIBRARY.

The Library of the Medical Faculty now comprises upwards of ten thousand volumes, the largest special library connected with any medical school on this continent.

The standard text-books and works of reference, together with complete files of the leading periodicals, are on the shelves. Students may obtain books on making a deposit of \$5, which is refunded on returning the volumes.

### § XI. MCGILL MEDICAL SOCIETY.

This Society, composed of enregistered Students of the Faculty, meets once a week during the Summer Session, and fortnightly during the Winter, for the reading of papers and the discussion of medical subjects. It is presided over by a physician chosen by the members.

A Reading Room has been established in connection with the Society, in which the leading English and American Medical Journals are on file.

### § XII. HOSPITALS.

#### *Montreal General Hospital.*

The Montreal General Hospital is the most extensive clinical field in the Dominion. A much larger number of in-door and out-door patients receive treatment there than in any other Canadian Hospital. Last year's report shows that 2,347 Medical and Surgical cases were treated in the wards, and the great proportion of these were acute cases, as may be gathered from the fact that the average duration of residence was only 23.6 days.

The large number of out-door patients that are treated in the Hospital—averaging from sixty to seventy daily—supply illustrations of most of the diseases of infants and children, of very many of the eye and skin, and of those chronic and ill-defined ailments which, as they do not require admission to the wards of a hospital, would not otherwise come under the observation of the Student.

The large number of patients affected with diseases of the eye and ear now attending the out-door department will afford Students ample opportunity to become familiar with all the ordinary affections of those organs, and to make themselves proficient in the use of the ophthalmoscope, and it is hoped that every student will thus seek to gain a practical knowledge of this important branch of Medicine and Surgery. Operations are performed on the eye by Dr. Buller, after the out-door patients have been seen, and Students are invited to attend the same, and, as far as practicable, to keep such cases under observation so long as they remain in the Hospital.

There are now special departments in the Hospital for Gynæcology and Laryngology, presided over by Specialists in these branches. Students are thus enabled to acquire special technical knowledge

under skilled direction. The difficulty of affording to Senior Students practical instruction in gynæcology is felt in most schools. The plan followed for the past five years, with marked success, has been the limitation of the number of Students to two or three, who, in rotation, assist at the examinations, and receive instruction in the diagnosis and treatment of uterine diseases and the use of gynæcological instruments.

CLINICAL CLERKS in both medical and surgical wards are appointed every three months, and each one during his term of service conducts under the immediate direction of the Clinical Professors, the reporting of all cases in the ward allotted him. The holding of one of these offices is found to be of the greatest possible advantage to Students, as affording a true *practical* training for future professional life. They will be awarded on application at the end of each Session to final Students of that year, in order of their standing in the primary examination.

DRESSERS are also appointed to the Surgical wards and to the Out-door Department. For these appointments application is to be made to the Professor of Clinical Surgery, and to the Out-door attending Physicians and Surgeons.

The Operating Room (used also for a lecture room) is so constructed as to enable the Students to obtain a good view of the operations.

*Montreal Dispensary.*

*St. Antoine Street.*

Over 10,000 patients yearly are treated at this institution. The cases are of great variety, comprising a large number of pulmonary affections and children's diseases. Minor operations are of daily occurrence, and excellent practice is afforded in the application of splints and bandages. The attending Physicians furnish Students with all possible facilities. The hours of attendance are from 12 to 2 daily.

*University Maternity Hospital.*

The Faculty has great pleasure in announcing that the Corporation of the University Maternity contemplates the erection of a large and comfortable maternity building. It will be constructed with all those modern improvements which science and experience have demon-

strated to be of value in this class of buildings. Students will in future therefore have much more abundant opportunities for becoming practically acquainted with Midwifery practice. The Maternity will, as in the past, be under the direction of the Professor of Midwifery, and Students who have already attended one course of his lectures will be furnished with cases in rotation. They are advised to attend this Institution as much as possible during the summer, when, since there are as many patients and not so many pupils as in winter, a larger proportion of cases falls to the share of each.

*University Dispensary.*

This Dispensary is a pure Polyclinic, being used only for the teaching of special departments of Practical Medicine and Surgery. Instituted a number of years ago, it has been found very successful, fulfilling the aims of the University in giving Students special training in certain branches not elsewhere so readily obtainable. At the present time there are three special Clinics connected with this Dispensary.

*Diseases of Children.*—The Clinic is on Tuesdays, Thursdays and Saturdays at 1 p.m., when the patients are seen and instruction given on the cases.

*Diseases of the Skin.*—The Surgeon in charge will attend every Friday at 2 p.m. Arrangements will be made whereby a limited number of students can be present on each occasion.

*Diseases of the Nervous System.*—The Physician in charge will attend every Monday and Friday at 11 a.m. Students will have an opportunity in this Clinic of seeing and examining many of those obscure and chronic diseases of the brain and spinal cord which are now attracting so much attention in the medical world.

The Dean, may, at his discretion, reprimand the Student, or refer the matter to the Faculty at its next meeting, and may in the interval suspend from classes.

2. Absence from any number of lectures can only be excused by necessity or duty, of which proof must be given, when called for, to the Faculty. The number of times of absence, from necessity or duty that shall disqualify for the keeping of a Session, shall in each case be determined by the Faculty.

3. While in the College, Students are expected to conduct themselves in the same orderly manner as in the Class-room.

A list of boarding-houses is prepared annually by the Secretary of the University, and may be procured from the Janitor at the Medical College.

The Examinations will be held in the William Molson Hall, McGill College Building, from 4 to 6 p.m., on the 15th, 17th, 20th and 22nd December, 1886, and on the 25th, 28th and 31st March, 1887.

The complete course of study in this Faculty extends over three years ; but it may be shortened to two years, when the Student matriculates in the third year of his indentures.

Students who avail themselves of the privilege of attending two years only will nevertheless be required to pass an examination in the subjects comprised in the three years' course.

Occasional Students will be received without matriculation for attendance on any particular series of Lectures.

Students who have completed their course of three years,—or of two years, if they have commenced in the third year of their indentures,—and have passed a satisfactory examination, will be entitled, upon the certificate and recommendation of the Faculty, to the Degree of Bachelor of Civil Law.

This institution is intended to give a thorough training to teachers, especially for the Protestant population of the Province of Quebec. This end is attained by instruction and training in the Normal School itself, and by practice in the Model Schools ; and the arrangements are of such a character as to afford the greatest possible facilities to Students from all parts of the Province.

The thirty-first Session of this school will commence on the first of September, 1886, and close on the thirty-first of May, 1887. The complete course of study extends over three years, and the students are graded as follows :—

1. *Elementary School Class*.—Studying for the Elementary School Diploma.
2. *Model School Class*.—Studying for the Model School Diploma.
3. *Academy Class*.—Studying for the Academy Diploma.

---

#### I. CONDITIONS OF ADMISSION AND OF OBTAINING DIPLOMAS.

Candidates for admission into the Elementary School Class will be required to pass an examination in Reading, Writing, the elements of Grammar, Arithmetic and Geography; and to produce the certificate and sign the application referred to in Articles 1 and 2 of the Regulations. Admission into each of the higher classes requires a knowledge of the subjects of the previous one.

Those admitted to the Elementary School Class at the beginning of the Session must be able to parse correctly a simple English sentence; must know the continents, greater islands, peninsulas, and mountains, the oceans, seas, larger gulfs, bays, straits, lakes and rivers, and the chief political divisions and most important cities of the world, must write neatly a dictation from any school reader, with no more than five per cent. of mistakes in spelling, in the use of capitals and in the division of words into syllables; and must be able to work correctly examples in the simple rules of Arithmetic and in fractions.

Associates in Arts of the University, of the requisite age, may be admitted into the Elementary School Class, and, provided that they have passed in Geometry Algebra and French, into the Model School Class, without examination.

In the examinations for entrance into the Academy Class, the Principal may allow exemptions to Associates in Arts for the subjects in which at the examinations for that certificate they have passed with credit.

Each Student must produce a certificate of good moral character from the clergyman or minister of religion under whose charge he has last been, and also testimony that he has attained the age of six.

teen years. He will also be required to sign a pledge to teach for three years in some public school in the Province of Quebec.

Candidates for admission will be furnished with forms of application on communicating with the Principal of the School.

There will be a Semi-sessional Examination at Christmas, which all Students are required to pass in order to continue in the Classes.

At the close of the first year of study Students may apply for examination for diplomas giving the right to teach in Elementary Schools; and after two years' study, or if found qualified at the close of the first year, they will, on examination, be entitled to diplomas as teachers of Model Schools.

Students having passed the examination for the Model School Diploma, with creditable marks in Classics and Mathematics, or having otherwise advanced to the requisite knowledge, may go on to the Academy Class, and, on examination, may obtain the Academy Diploma.

Students are expected to give their whole time and attention to the work of the School, and are not permitted to engage in any other course of study or business during the sessions of the School.

---

## 2. PRIVILEGES OF STUDENTS.

On complying with the above conditions, all Students will be recognized as *Teachers-in-training*, and as such will be entitled to free tuition, and to bursaries in aid of their board and of the cost of text books, not exceeding \$36.00 per annum in the two first Classes, nor \$80.00 in the Academy Class, should they be successful in obtaining the diploma at the final examination. A portion of this allowance will be advanced to such Students as are not resident in Montreal, on their passing the semi-sessional examination.

Under the regulations subjoined, and with the view of extending the benefits of the School to all parts of the country, those who reside at a distance of more than ninety miles from the city of Montreal will also be entitled to a small allowance for travelling expenses, proportionate to the distance.

Students resident in Montreal may share in the Bursary Fund, on producing certificates from their ministers or clergymen that such aid is absolutely necessary to their continuing in attendance at the School.

In addition to religious instruction of a general Protestant character by the Professors, arrangements will be made for special religious instruction by ministers representing the several denominations with which the Students may be connected.

No boarding-house is attached to the institution, but every care will be taken to ensure the comfort and good conduct of the Students in private boarding-houses approved by the Principal. Board can be obtained at from \$12 to \$16 per month.

*The J. C. Wilson Prize* of \$40 and a Book, contributed by him as a former Student of the School, will be offered for competition to the candidates for the Elementary Diploma, and will be given for the highest aggregate number of marks.

*The Prince of Wales Medal and Prize* will be given to the student taking the highest place in the Model School Class, provided that such student shall attain to the standard fixed by the Regulation of the Council of Public Instruction for this Medal.

*The Marquis of Lonsdowne Medal* will be given to the student taking the highest place in the Academy class.

It has been resolved by the McGill and Bishop's Universities and by St Francis College, Richmond, to accept the Academy course in the Normal School as the equivalent of the first year in their Faculties of Arts on certain equitable conditions, so that all who have passed satisfactorily through that course are entitled to enter the second year of the courses in Arts without further examination. The McGill University also offers free tuition in the Faculty of Arts in the second year to such students of the Academy Class, not exceeding three in number, as at the final examinations take 75 per cent. of the total marks, with not less than two-thirds of the marks in Latin and in Greek. By authority of the Protestant Committee of the Coun-

cil of Public Instruction, the McGill Normal School is authorized to pay a bursary of \$25 to such of its Academy pupils as enter any of the institutions above named under the provisions here cited, provided they do not take a bursary or exemption from fees, in the institution they enter.

All the preceding regulations and privileges apply to female as well as to male students.

Persons holding the degree of B.A. or M.A. of any British or Canadian University may receive the Academy diploma, in accordance with the Regulations of the Protestant Committee of the Council of Public Instruction.
