### A NEW PAPER IS ANNOUNCED

#### Dissatisfied with The Press Tories Propose a New Organ

During the past few weeks there has been a good deal of talk concerning a new paper, to be established, or, at least, started in Hartland. The chief promoter is said to be A. D. Colwell, who while drawing regular pay as an employe of The Observer, has at various times during the past year sought to secure support for a paper to not only compete with but to put The Observer out of business. Things did not, however, develop far until Sept. 14, when, in the course of his usual duties in the back office of The Observer, Mr. Colwell took pitifully ill. With his hands pressing the pit of his stomach and a doleful look on his countenance he stated his condition at the business office and received prompt permission to go home until the spasm passed. He went instead to a local livery stable and declared he had "put one over on 'the boss,'" and asked for a rig to drive to Woodstock to partake of the Nomination Day festivities. He thereupon "put over another one" on "the boss," for he told the livery-man to charge the rig up to The Observer. Arrived at Woodstock Mr. Colwell threw off all restraint and proceeded to engage the attention of the street throng whom he called to witness the ignominious failure of The Observer to press home the claims of the Opposition candidates—a failure for that he, the Chief Factotum and Mainstay of the business, had left the office on a busy day to go to the shiretown to confess his fealty to the Conservative party. Mr. Colwell also outlined his own newspaper project and spent much of the remaining portion of the week in Woodstock soliciting support for his enterprise. But he returned to the office on the following Monday morning as confident and as amiable as ever.

So much of the details of the early formative period of the new paper are here given because certain Conservative newspapers stated that Mr. Colwell was dismissed from The Observer for his political activities. We here endeavor to show, in part, and in only one instance, just how far his activities went, and how deep was his loyalty to his employer.

The Standard last week contained an announcement of "the new paper" and the announcement should be considered authoritative since it was penned by Mr. Colwell. He says: Ever since the by-election there has been an insistent demand for a newspaper in Carleton and Victoria counties that would handle the news without personal bias, and at the same time deal with political questions in a clean, manly manner. The people want less mud-slinging and to this end a movement is on foot to establish a good clean weekly paper which will support the present administrations at Fredericton and Ottawa.

This is a hard slap at the old

### WEST SIDE NOTES

Victoria school held its Children's Day entertainment on the evening of the 15th and a well packed hall greeted their efforts at entertainment. Door receipts and the sale of quantities of excellent fudge produced a fairly satisfactory amount for the Belgian cause and this augmented by the sale of some thirty-five or forty baskets ran the receipts up to \$82. Miss Page and her scholars spared no pains in their efforts to make the affair a success that it was and much deserved praise was freely accorded for their work.

Mr. and Mrs. Claude Seeley, who have been here for several weeks packing their worldly possessions preparatory to removing to St. John, where they will reside in future, left for that city on Friday last. During the year or more of residence in this community both Mr. and Mrs. Seeley became very popular, Claude being an off hand good fellow while Mrs. Seeley was active in social and church circle being connected with the local Womens Aid and Red Cross organizations. Quite recently the United Baptist parsonage was opened for a social evening where Mr. and Mrs. Seeley were the honor guests and during the evening Mrs. Seeley was presented with a very beautiful memento of her short sojourn at Victoria in the form of a gold mounted cameo brooch for which mark of esteem the recipient is very grateful to those who were interested in procuring and making the presentation which latter act was gracefully performed by genial host of the evening Rev. J. D. Wetmore.

NICODEMUS.

### SIR SAM NO WORSE THAN GOVERNMENT

#### F. B. Carvell, M. P., Says Whole Scheme Was to make Political Capital Out of War

That the resignation of Sir Sam Hughes, minister of militia, was the result of a combination of difficulties in which the present government found itself, was the analysis placed on the present political situation at Ottawa by F. B. Carvell, M. P., who was interviewed by The Telegraph.

"I don't think that Sir Sam Hughes is any worse than his government," he said. "There is no way for the government to get rid of the unpleasant fact that the scheme of the Conservative party from the beginning of the war was to make political capital out of it, so far as possible. Every person who sold goods had to sell through the middleman and so be run through the political machine."

"Sir Sam only happened to be the man in the lime-light," he continued. "When we started after the militia department they voted everything down by brute force, but it reached a point in the end when public sentiment became so strong that something had to be done and the government picked out this militia council scheme in London as a sort of way out of it."

"White Sir Sam played his own game in the war every toy politician in Canada was playing the game too, for all he was worth except on a smaller scale, and in no place in Canada has it been played so viciously as in the province of New Brunswick."

Asked whom he thought would likely fill Sir Sam's shoes, Mr. Carvell said that he believed A. E. Kemp was the man who would probably be given the position. He expressed the opinion that Mr. Kemp would make a bid for the appointment, and in all probability land it.

"This is a government of the big interests," he added by the way of explanation, "and the man who has lots of money and belongs to the monied aristocracy is the man who Borden wants with him. It is the high tariff wing of the government that sways it, and that is the reason I believe that Kemp will get the appointment as minister of militia."

Asked if he thought the government would take any action in the matter of the high cost of living, Mr. Carvell replied: "The appointment of a commission to investigate would from the experience of the past few months with commissions, show us plainly that the government does not mean business."

"Supposing the government did take action in the matter, where would it land them?" he continued. "For instance, the price of canned goods is today one of the things which is an important factor in the high cost of living."

## CARVELL AND HUGHES

Those Conservative Journals which a few months ago, were vilifying F. W. Carvell, M. P., and frantically defending the Minister of Militia whom Sir Robert Borden tardily asked for his resignation last Wednesday, will now observe how far astray were their predictions that the fuse charge would ruin Mr. Carvell and assist in immortalizing Sir Sam Hughes.

Mr. Carvell was in St. John yesterday, well and cheerful, says the Times. Those writers who prophesied his political downfall were busy yesterday trying to estimate the result of Sir Sam's enforced departure from the troubled cabinet circle. Excitable and pliable gentlemen of the government press ought to keep the record clearly in mind. By doing so they may avoid making exhibitions of themselves hereafter.

Mr. Carvell has not been driven from public life, but, for that matter, while Sir Sam Hughes is out of office, he has not yet been driven from public life, and if his former defenders seek to drive him out he is the sort of man who is likely to take some conspicuous Conservatives along with him.

## Produce Prices.

The potato market is more uncertain than ever and those who bought or contracted at \$3 or more stand to lose heavily. Potatoes were never worth the fabulous prices paid in a period of excitement. Their food value is not such that the working man can pay more for spuds than for California oranges or Oregon apples. Within the past week nearly 400 cars of potatoes were on track in Montreal and Toronto with no demand. Someone is going to lose money. The price being offered at Hartland today is \$2. Pork 12 1/2 to 13; eggs and butter 35; hay \$10; oats 55; chickens 14 to 16; fowls 12 to 14; B. W. meal \$3; dry hard wood \$6.

## Upper Kent to Have Real Station

"All things come to those who wait," and so, after all these years, of often impatient waiting, the people of Upper Kent are to have a real up-to-date regulation station. All are rejoicing over the prospect and already see greater possibilities for the village. The station agent is already at work. A station is to be improvised for the winter months. In the early spring the new station will be started and will be ready for occupancy by July.—Sentinel.

H. D. Street is the new agent.

## WISE MAN WEAR RUBBERS

Low Rubber Prices Make Possible Saving of Expensive Shoes—Many Will Wear Rubber Footgear Whenever Occasion Permits

The thrifty man or woman—those who are getting the most out of every dollar in these days of high prices—will find gratification in the fact that this year rubber footwear solves the question of how to remain well shod, in spite of high shoe prices. The wise buyer will purchase rubbers and overshoes this year to save the expensive shoes that he or she paid a dollar or so more for this season than last. While everything else has advanced in price, rubber footwear has remained the same. In fact, rubber footwear would be cheaper this year than ever before were it not for the cost of all chemicals and the fabrics that are used in the manufacture. Even with these advances, rubber is the footwear for this winter and the wise ones will wear rubbers for economy.

## Methodist District Meeting

The quarterly meeting of the Woodstock District of the Methodist church was held yesterday at Hartland, Rev. S. Howard, B. D. presiding.

The members present were Revs. G. A. Ross, East Florenceville, J. B. Gough, Jacksonville, C. Fleming, Andover, H. T. Smith, Debec, R. Smart, Canterbury, and G. S. Helps, Hartland, and Laymen J. A. Lindsay, Woodstock and W. Murchie Benton.

A careful review was made of the work of the Andover and Canterbury circuits and the District Meeting then gave a cordial welcome to W. D. Keith, president of the committee for securing the repeal of the Scott Act in Carleton county. A resolution was passed expressing a strong approval of the new prohibitory law for New Brunswick, and pledging the ministers of the district to the most vigorous support of the prohibition campaign in Carleton county. Mr. Keith gave a brief address emphasizing the supreme importance of such a campaign, and expressing appreciation of the complete sympathy of the meeting with the movement.

The public meeting in the evening was well attended, and an address was given on the recent Boys' Work Conference in St. John, with special reference to Canadian Standard Efficiency Tests for boys of the teen age in organized Sunday School classes. Revs. George Kincaid, pastor of the United Baptist church, G. A. Ross and J. B. Gough, and J. T. G. Carr took part in the discussion which followed the address. Considerable interest was manifested in the new program, and it is expected that an effort will soon be made to bring it into operation in the Hartland churches.

## Sudden Death of Miss Winifred Kierstead

The village was shocked to learn of the death on Sunday of Miss Winifred Kierstead who for about two years has been stenographer and accountant for Estey & Curtis Co.

Miss Kierstead left here on Monday of last week to go as a county delegate to the S. S. convention at Chatham. She had no sooner arrived at her destination when she was taken with typhoid pneumonia and was admitted to the Miramichi hospital. Death came before her friends could reach her.

Miss Kierstead was a daughter of Mr. and Mrs. Justus Kierstead of Scotch Ridge near St. Stephen and was 26 years of age. She had a wide circle of friends who are grieved at her sudden death under such circumstances. She was an unusually capable and energetic young business woman, and as a member of the Baptist church and Sunday school she was a zealous worker. She also was one of the most active spirits in the local Women's Institute.

The funeral was held at her home on Tuesday. S. S. Miller (her employer) and Mrs. Miller, and Mrs. L. E. McFarland (with whom she boarded) went to St. Stephen to pay their last respects.

## GRAND FALLS LOCALS

Among those who went to Limestone Monday evening to attend the dance and enjoy the music of Tinkers Orchestra were F. W. and Harold Pirie, Miss Monique Martin and Misses Alice and Marie Pirie and Ernestine Bradley.

W. B. Burpee and Mr. Hovey visited Rev. J. P. Crabtree in Van Buren last week.

Over \$100 was taken in at the play on Friday evening given for the benefit of the Belgian children. After expenses were paid about \$90 went to the fund for the poor Belgians.

The Presbyterian sewing circle intend holding a sale sometime soon.

The concert given by the school children in MacLaren's Theatre Friday night was a splendid success in every way. The children all did fine and, by the way, one could travel many miles and not see a better looking and healthier lot of children than we have right

here in Grand Falls; and they are a clever lot, too, and it certainly looks as though they had some very efficient teachers in this little burgh of ours. The program for Friday evening was as follows:

Opening Chorus, Belgium.  
Recitation, Finger Play, grade I.  
Flag Drill, Grade II.  
Recitation by 10 girls.  
Song by Marjorie Wiley.  
Dialogue, "Frances" by Powers and Courier, Grade II.  
Song, Grade II.  
Drill, Goodnight, Grade I.  
Intermission

Chorus by boys of Grades 3 and 4.  
Pantomime, Britannia, 17 girls.  
Song by Grace Kirkpatrick.  
Boy's Drill, British Empire.  
French Song and Chorus.  
Dialogue, East and West, 11 girls.

Girls Drill, Belgium, 16 girls.  
Recitation, Belgium, by Max White.  
Song, "L'Entente" 3 girls and Chorus.

Empire Builders and closing by singing "God Save Our Splendid Men" and "God Save the King."

We have enough snow for good sledding now if it will only stay with us.

Mr. and Mrs. Errold Wilson entertained a number of their friends on Monday evening. All enjoyed themselves and voted Mr. and Mrs. Wilson very pleasant entertainers.

There were two alarms of fire last week—one in a potato house and one in G. A. Ryan's wood-working shop. Little damage done in either case.

Miss Hazel Price was a guest of Miss Helen Hallett over Sunday.

Word has been received by Mr. and Mrs. J. P. Kelly that their son Herbert is in a hospital in England from the effects of gas while fighting in the trenches.

L. Sirois has sold his horses and rented his livery stable to Fred Parent.

Mr. and Mrs. Raymond McCluskey are home from Bath where Mr. McCluskey has been clerking in a store. He is now laid up with a sore hand.

## ANDOVER LOCALS

The Round Table Literary Club met with Miss Bessie Kilburn at Kilburn on Thursday afternoon. A most pleasant afternoon and evening was spent by all present.

James Magill spent part of last week with relatives at Fort Fairfield.

Mrs. Amos Gaunce of Riley Brook was a guest recently of Mrs. Harry W. McLary.

Mrs. William Curry went to Upper Kent last Friday to see her friend, Mrs. William Gaunte, who is ill.

Miss Atwater of Fort Fairfield who has been the guest of her aunt, Mrs. Marshall Wright, returned to her home last Monday.

Miss Cecil Sisson, chief operator in the Andover Telephone office was in St. John for a few days to attend the annual conference of the chief operators of the N. B. Telephone Co.

Miss Sarah Watson spent the week-end with relatives at Fort Fairfield.

F. M. Howard was at Bristol on business the early part of the week.

E. S. Hopkins of Fort Fairfield was in town Sunday afternoon.

Saturday evening quite a few of the young folk enjoyed a social evening in Beveridges hall, the guests of honor being Randolph Jamer, who has enlisted for service in the 9th Siege Battery now at Partridge Island, and Vernon Erwin, who has enlisted in the 65th Battery now at Woodstock.

After refreshments Rev. Mr. McCadden presented a pair of military brushes to Randolph Jamer who thanked the donor in a pleasant manner. The best wishes of all go with these young men for their future safety in the life they have chosen.

Mr. and Mrs. J. F. Breckon and son left Monday for St. John

where Mr. Breckon has employment.

Mr. and Mrs. James Wright who have been visiting Mrs. Wright and Miss Bessie Wright returned to their home at Grand Falls Monday afternoon.

Howard Campbell of Birch Ridge was a business visitor in the two villages on Tuesday.

Mrs. Theo Marsten and little daughter of Plaster Rock are guests of Mrs. Julia Sutton.

Miss Violet Gillett who has charge of the Linville school realized the sum of \$50.59 Tuesday evening to go to the Belgian Relief Fund.

Dr. McQuaig of McAdam Jct. was a guest at Hotel Andover this week.

D. B. and John Hopkins of Aroostook Jct. were in town Thursday afternoon.

Miss Alice Manzer of Aroostook Jct. left Wednesday for Cuba where she will spend the winter with Mr. and Mrs. Judson C. Manzer.

LeBaron Anderson of Four Falls was in town Wednesday evening.

James Gallagher of Woodstock is in town for a few days.

The school concert given in the Specialty theatre Wednesday evening in aid of the Belgian Relief Fund was well attended and was a decided success in every way.

The sum of \$117.50 was realized. Dr. G. B. Peat acted as chairman in a very creditable manner. The program was a lengthy one, well carried out, and much credit is due the teachers and children in their painstaking efforts to make the evening a success.

Home made candy was sold by the girls of the high school, and after the concert a ten cent lunch was given by one or two of the ladies the funds to be given to the Belgian Relief Fund. Special mention should be made of the "famous McNamara band" was accorded several times and which responded in a cheerful manner. Following is the program.

Chorus—The King will be proud of Canada.

Flag Salute—School.

Recitation—Muriel Baird.

Girls Flag Drill.

Tableau—Colonies.

Chorus—By order of the King.

Solo—Mrs. Bertina Waite.

Pantomime.

Band Selections—Mc Namaras.

Band.

Intermission

Recitation—Myrtle Crawford.

Tableau—England and her Allies.

Duet—Mrs. Mary Stobbins and Garnet Birmingham.

Russian Dance.

Chorus—Boys of the King of England.

Violin and Mandolin Duet—Charles Howard and Donald Wiley.

Moon Song—Norinne Masters and Marjorie Armstrong.

Boys' Jack o'Lantern Drill.

Honor Roll.

Chorus—Do Your Bit.

National Anthem.

The Agricultural Society meets Sat., Dec. 2. Be there to hear about Fertilizer and the pure breed of sheep, some of which have already arrived. These will be sold at auction.

## Take Notice! Farmers

The Blacksmithing Firm recently known as Clark & Shaw has been dissolved by mutual consent and the undersigned will hereafter conduct a business in

in the building just east of D. E. Morgan & Sons' general store. I can do your work in a thoroughly satisfactory manner, and I ask a fair share of your patronage.

Perley D. Clark  
Hartland, N. B.

**Croup**  
"I don't think there is a more anxious time for parents than when their children have croup. Without they are prepared with Chamberlain's Cough Remedy they must wait for the doctor and listen to the choking, metallic cough and watch their little one gasping for breath."

You know the great danger of croup is the formation of a false membrane in the larynx, and until this is expelled relief cannot be obtained, and the spasmodic choking continues. Give Chamberlain's Cough Remedy in frequent doses. It will loosen this membrane and cause the child to expel it by vomiting.

## Chamberlain's Cough Remedy

is an absolutely safe and certain remedy for croup, and if given as soon as the child becomes hoarse, or even after the croupy cough appears, it will prevent the attack.

Young for Health—Garnet Chamberlain

## WHEN THE SUB. GOES INTO ACTION

DESCRIPTION OF A TRIP ON BRITISH "TIN FISH."

Crew of the Submarine Know Nothing of What Is Going on Overhead.

A graphic description of the "life" in a British submarine about to attack a German ship is given in the following account.

Look carefully and see how the grim shadow, almost flush with the sea, blends with the grey waters and the grey sky. Her narrow deck is washed from end to end, her bow hidden in a pillow of boiling sea, her counter lathered in the foaming eddies of her wake. Behind the canvas "doggers" of her tiny bridge her commander and helmsman ply their trade, the only members of her crew visible, the others are at their stations in her well-lighted interior. Suddenly there is a sharp word of command, more men appear on her deck, all her movable gear—the compass, the ventilation cowls, the life-rafts, and other objects—is detached and taken inside her hull. The rails are turned down in one moment flush with the deck. Then everyone disappears; the hatch is screwed tight, the main ballast tanks are filled, the periscope is pushed up to its full height, and thus she prepares to dive to the wet shadowy realms of the eod and the conger eel.

**Silence After Noise.**  
The roar of her oil engines has suddenly ceased. The silence seems strange after their thunderous note, and to take their place comes the gentle hum of the electric motors which drive her below the waves. The commander is in the conning tower, his eyes glued to the vibrating lens of the periscope. The stolid coxswain has the wheel controlling the horizontal rudders that work the boat in her trips below. The second coxswain has the wheel that steers her to port and starboard. The leading torpedo-man at the switch-board controls all the electrical devices that man has chained to his will to work this strange ship. The torpedo-men are at the fully-charged tubes. The engine staff have seen that the water and oil are shut off and are now at the Kingston valves and "Blows" (blow-off valves) on the main ballast tanks. Everyone stands by his station, blind to the world without, waiting for the commands of the one man who can see.

Order to Dive.  
"Dive fifteen feet!" comes the

## Adds to the Joy of Living—

It isn't alone the deliciously sweet nut-like taste of **Grape-Nuts** that has made the food famous, though taste makes first appeal, and goes a long way.

But with the zestful flavor there is in **Grape-Nuts** the entire nutriment of finest wheat and barley. And this includes the rich mineral elements of the grain, necessary for vigorous health—the greatest joy of life.

Every table should have its daily ration of

## Grape-Nuts

"There's a Reason"

Canadian Foodstuffs Co., Ltd., Windsor, Ont.

order, quick and concise. The next moment the bow has canted down ever so little and the boat like a shadow has slid below, guided by the steady hand of the first coxswain.

In the far distance a ship, grey from truck to waterline, is speeding along the horizon tossing a trailing haze of smoke from her belching funnels.

**Torpedo Stations Ready.**  
"Torpedo stations, make ready!" comes from above. The firing reservoirs of the tube are instantly charged with compressed air, the caps covering the outside ends of the tubes are raised by "No. 2" of each tube, and water floods each chamber until a warning spurt from a tiny vent inside the boat tells the torpedo-man that all is clear for firing.

The silence which now reigns is alone broken by the hum of the motors. Everything depends on the judgment of one man; the others see nothing, know nothing, and have blindly to obey his will. The cruiser is now standing up a dark silhouette on the skyline. Not one of her people have seen the "plume" of the submarine's periscope heading straight and true to cut them off.

Single Word, "Fire!"  
Already a string of concise orders is coming down from the commander; finally, "Starboard tube—stand by." The tube is ready, "No. 2" (the chief torpedo man has jumped round to bang down the firing ball in case the electric circuit fails).

The commander's finger crooks round one of the pistol triggers before him—very carefully he is aiming with his whole ship (for the tubes are fixed in the hull). Then comes the single word, "Fire!" There is a heavy thud, a momentary alteration in the boat's trim (at once corrected by the alert coxswain), and at the same instant over 200 pounds of explosive in the war nose of the torpedo goes hurrying away at forty miles to the hour.

**"Good Shot."**  
The enemy notes the wake of the "tin fish"; there is a burst of flame from his secondary battery, and as the shells start on their screaming courses there is a fresh series of commands inside the submarine, and like a shadow her periscope has vanished, and she is plunging down to sixty feet below the surface, and turns and twists away, steered by clock and compass.

All the while her crew are listening. Water is a good conductor of sound and will bring to their ears a message if the torpedo has gone "home." Suddenly they hear it—just a heavy thud—and on the instant they slip towards the world of fresh air once more. As the periscope projects the commander starts and ejaculates, "Good shot—right in her engine-room."

## THANKFUL MOTHERS

Thousands of thankful mothers throughout Canada—many of them your own neighbors—speak with the greatest praise of that splendid medicine, **Baby's Own Tablets**. Many mothers would have no other medicine for their little ones. Among these is Mrs. Albert Nie, St. Brieux, Sask., who says: "I have been using **Baby's Own Tablets** for the past seven years and they have done my four children a world of good. I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

## PROSPERS UNDER BRITISH.

Arabs of Besra Are Learning to Enjoy Modern Business.  
The frontier city and river port of Besra, in Asiatic Turkey, has since its occupation by the British in the present war enjoyed more prosperity than in twenty years under Turkish rule, says a British eye-witness account. Besra is a green spot. It is like an oasis in a great desert. The date palms are festooned with vines which make a canopy, and fig trees and pomegranates with scarlet flowers grow beneath. The very air seems to sweat, the weather is so warm. Strike a match and it will burn dull without a flicker as if the flame were choked.

Besra was never so rich; money is pouring in, trade is brisk, prices are high. Three banks have opened. The Arabs of the city are learning luxurious ways. The four new theatres which have sprung up during the war barely meet their demand for entertainment. And they are no longer content with their simple diet of dates and khobez (a coarse bread), but purchase English stores and eat pineapples and salmon and biscuits and butter out of a tin.

## AUSTRIANS TIRED OF WAR.

Whole Masses of Men Surrender to Russian Cavalry.  
All accounts seem to show that neither on the western nor the eastern fronts is there any general deterioration of the German morale, says the London Globe. Signs of such degeneration have been detected here and there, but it is certainly not universal. With the Austrians, on the other hand, a very different state of mind seems to prevail. Rus-

## NEURALGIA PAINS YIELD QUICKLY

Hundreds Find Sloan's Liniment Soothes Their Aches.

The shooting, tearing pains of neuralgia and sciatica are quickly relieved by the soothing external application of Sloan's Liniment.

Just put it on—it penetrates. Kills pain. You will find relief in it from rheumatism, neuralgia, sciatica, stiff neck, toothache, etc.

Sloan's Liniment is cleaner and easier to use than musky plasters and ointments and does not clog the pores. Just put it on—it penetrates. Kills pain. You will find relief in it from rheumatism, neuralgia, sciatica, stiff neck, toothache, etc.

## Sloan's Liniment

WINDS PAIN

For strains, sprains, bruises, black-and-blue spots, Sloan's Liniment quickly reduces the pain.

It's really a friend of the whole family. Your druggist sells it in 25c., 50c. and \$1.00 bottles.

Single Word, "Fire!"  
Already a string of concise orders is coming down from the commander; finally, "Starboard tube—stand by." The tube is ready, "No. 2" (the chief torpedo man has jumped round to bang down the firing ball in case the electric circuit fails).

The commander's finger crooks round one of the pistol triggers before him—very carefully he is aiming with his whole ship (for the tubes are fixed in the hull). Then comes the single word, "Fire!" There is a heavy thud, a momentary alteration in the boat's trim (at once corrected by the alert coxswain), and at the same instant over 200 pounds of explosive in the war nose of the torpedo goes hurrying away at forty miles to the hour.

The enemy notes the wake of the "tin fish"; there is a burst of flame from his secondary battery, and as the shells start on their screaming courses there is a fresh series of commands inside the submarine, and like a shadow her periscope has vanished, and she is plunging down to sixty feet below the surface, and turns and twists away, steered by clock and compass.

All the while her crew are listening. Water is a good conductor of sound and will bring to their ears a message if the torpedo has gone "home." Suddenly they hear it—just a heavy thud—and on the instant they slip towards the world of fresh air once more. As the periscope projects the commander starts and ejaculates, "Good shot—right in her engine-room."

## REAL HOMES FOR CHILDREN.

Should Not Be Kept Too Long in the Shelter or Orphanage.  
In his annual report on the Children's Aid Societies of the Province, Mr. J. J. Kelso says:  
It frequently occurs that Societies have to be reminded that they are making improper use of their children's shelter by permitting the inmates to remain therein too long. The thought of the shelter as a human "clearing house" should never be permitted to be pushed in the background by other considerations. One of the tendencies seems to be to aim at having a large number of inmates. This is a grave mistake. Get the children out into homes where good mothering is assured, and you will not only obtain satisfactory results the more quickly but at the same time multiply your society's capabilities for usefulness and efficiency. The natural shelter of a child is motherly arms—not bricks and mortar.

To carry the foregoing into effect requires homes in which to place the children, and as time passes the impression becomes a conviction that more thought and energy should be directed to the finding of high class homes, that is where there is a wealth of affection. Too much reliance is being placed upon the casual application fortuitously reaching the Society at the time it is needed. There are many good people who have desirable homes, who are considering the proposition of taking to their heart and cherish some needy child—but they get no further. An active campaign judiciously managed would result in many of these "prospects" becoming "actualities," to the blessing of the child and home and the honor of the Society. The best homes have to be sought for and it is a quest worth while.

## TRAPPERS! Send your RAWFURS to JOHN HALLAM

and receive highest cash prices. We send money the same day the furs are received. Charge no commission and pay all charges. We have paid out millions of dollars in the trade of trappers in Canada, who send their furs to us because they know they get a square deal, and receive more money for their furs. We will buy your furs for cash or on credit for cash that any other firm in Canada. Write to JOHN HALLAM, Limited, 202 Hallam Building, Toronto.

## Largest Elevator in Russia.

A new grain elevator of the Imperial Bank will be opened in Samara in the near future. It will be not only the largest elevator in Russia, but, in capacity, the largest in Europe. Its capacity will be over 2,000,000 bushels. Elevator building is being pushed with all energy possible under present difficult conditions for the purpose of developing the elevator system in grain regions of European Russia and Siberia.

## TORONTO FAT STOCK SHOW.

As evidenced by an advertisement which appeared in last week's issue, the Toronto Fat Stock Show are giving special attention to farmers and breeders, and are offering many handsome prizes for classes where stock must be bred, fed and owned by the exhibitors. This is work along the right lines and should bring out a good entry.

## CANT CURE PARALYSIS.

Swedish Investigators Confess Inability to Find a Remedy.  
Sweden, almost alone among European countries, has been repeatedly scourged by infantile paralysis, and, as a result, a number of physicians and bacteriologists have devoted themselves for years almost exclusively to the study of the disease. These authorities admit that they, as yet, do not know what can be done to prevent or cure the disease.

In the words of a report by Dr. Carl Kling, Professor Alfr. J. Petersen and Dr. Wernstedt, "virus carriers are very common and often in number greatly exceed the clinically positive cases." Disease carriers are almost inevitably found among healthy members of families where cases of poliomyelitis have occurred.

Investigations proved that the secretions of the mucous membranes of the mouth of a person who had recovered from the disease contained virulent microbes of infantile paralysis 204 days after the onset of the disease. Investigations with other patients have repeatedly shown the presence of virulent germs of the disease four months and more after the patient's recovery.

Animal experimentation appears to have demonstrated, however, that the microbe gets weaker soon after the termination of the acute stage of the disease, probably in eight to fourteen days after the onset. The Swedish authorities, however, advise isolation for some weeks after the disappearance of the acute symptoms.

Minard's Liniment Co., Limited.  
Dear Sirs,—I can recommend MINARD'S LINIMENT for Rheumatism and Sprains, as I have used it for both with excellent results.

Yours truly,

Mabel—Was your bazaar a success?  
Glady's—Yes, indeed; the minister will have cause to be grateful.

Mabel—How much were the profits?  
Glady's—Nothing. The expenses were more than the receipts. But ten of us got engaged, and the minister is in for a good thing in wedding fees.

Minard's Liniment Cures Dandruff.

Cares for Insects; Needn't Fight.  
Perhaps the most remarkable ground on which a man has been exempted from British army service by the tribunals is given in the case of the curator of a butterfly collection worth \$250,000, owned by a wealthy coal mine magnate and destined to be turned over to the public some day. Professor Poulton, of Oxford, said that to leave the collection without a competent head would be a national disaster, and his opinion prevailed.

As He Knew It.

Teacher—Tommy, can you spell "fur"?  
Thomas—Yes sir; f-u-r.  
Teacher—That's right. Now can you tell me what fur it is?  
Thomas—Yes, sir, Fur is an awful long way.

In rural England it was a custom to strew the path from the houses of the bridal couple to the church with herbs, flowers, and rushes.

## A NEW SERVICE.

Now Possible to Send a Day Letter by Telegraph.

Mr. J. McMillan, who has initiated many notable improvements since he became General Manager of the C.P.R. Telegraphs eighteen months ago, has just decided to inaugurate an important service entirely new to Canada over the hundred and ten thousand miles of wire under his immediate control, namely, the day letter which may now be sent between points in Canada on the Canadian Pacific system at a rate very much reduced as compared with the usual commercial rush telegram. Mr. McMillan is convinced that many of those who send telegrams would be quite satisfied if these arrived on the same day, whereas a proportion of the cost of the rush telegram is due to the cost of speedy delivery. The day letter of fifty words will be rated at one and a half times the cost of a regular rush message of ten words and can still bring an answer the same day, which is as quick as many people desire. There are sixteen hundred C.P.R. telegraph offices throughout Canada, at each of which the new service will be in force, so that this will be a Dominion-wide service stretching from Louisburg, Nova Scotia, to Victoria, B.C. Messages will be taken in either French or English, code words not being permissible. Mr. John McMillan owes his success to a genial and tactful disposition which made him one of the most popular C.P.R. officials in the West, where his work centred until he was called to the head office in Montreal last year. Although less than fifty years of age, he joined the C.P.R. at its inception, working on construction in 1883. After acting for a number of years as operator at Donald B.C., he became Inspector of Telegraphs at Winnipeg in 1902, Assistant Superintendent in 1906, Superintendent at Calgary in 1907, General Superintendent at Winnipeg in 1913, and finally Manager of the whole telegraph system in March, 1915.

## How To Get Rid of Catarrh, Catarrhal Deafness or Head Noises.

If you have catarrh, catarrhal deafness or head noises caused by catarrh, or if phlegm drops in your throat and has caused catarrh of the stomach or bowels you will be glad to know that these distressing symptoms can be entirely overcome in many instances by the following treatment which you can easily prepare in your own home at little cost. Secure from your druggist 1 ounce of Farmat (Double Strength). This will not cost you more than 25 cents. Take this home and add to it a pint of hot water and add to it a pint of sugar. Stir until dissolved. Take one tablespoonful four times a day. A decided improvement is sometimes noted after the first day's treatment. Breathing becomes easy, while the distressing head noises, headache, dullness, dizziness, etc., gradually disappear under the tonic action of the treatment. Loss of smell, defective hearing and mucus dripping in the back of the throat are often symptoms which suggest the presence of catarrh and which are often overcome by this efficacious treatment. Nearly ninety per cent. of all ear troubles are said to be directly caused by catarrh, therefore, there must be many people whose hearing can be restored by this simple home treatment.

## Conversational Pitfalls.

First Girl—You remember Kitty Fowler, don't you?  
Second Girl—No.  
First Girl—Oh, you must remember Kitty. She was the plainest girl in Blankville. But I forgot—that was after you left.

## NOTED MUSICIAN OF MONTREAL

Advices The Use Of "FRUIT-A-TIVES", The Famous Fruit Medicine.

MR. ROSENBERG  
589 Casgrain St., Montreal.  
April 20th, 1915.

"In my opinion, no other medicine in the world is so curative for Constipation and Indigestion as 'Fruit-a-tives'. I was suffering from these complaints for five years, and my sedentary occupation, Music, brought about a kind of Intestinal Paralysis—with nasty Headaches, belching gas, drowsiness after eating, and Pain in the Back. I tried pills and medicines of physicians, but nothing helped me. Then I was induced to try 'Fruit-a-tives', and now, for six months I have been entirely well. I advise any one who suffers from that horrible trouble—Chronic Constipation with the resultant indigestion, to try 'Fruit-a-tives', and you will be agreeably surprised at the great benefit you will receive." A. ROSENBERG.  
50c. a box, 6 for \$2.50, trial size, 25c. A fall dealer or sent postpaid by Fruit-a-tives Limited, Ottawa.

### Braddon-Haines!

A pretty wedding took place on Wednesday evening, Nov. 8, at the home of Mr. and Mrs. O. H. Brewer of Plaster Rock, when their daughter Ella Greta Haines became the wife of Lee Braddon of the same place. The bride was prettily gowned in white mull with shadow lace trimmings and wore an embroidered bridal veil. The ceremony was solemnized by Rev. P. J. Quigg of Peel, in the presence of about 150 guests. The bride was the recipient of many beautiful and useful presents. After congratulations supper was served and a very pleasant evening was spent. The young couple will reside at Plaster Rock. Many friends join in wishing them a happy and prosperous journey through life.

## ENGLISH AND FRENCH ARE ONE IN CANADA

Official Eye-witness Hopeful Over Outcome of Present War in Cementing Union of Ancient Foes

Sir Max Aitkin, writing as official eye-witness with the Canadian Forces, argues from history that Britain and France, English and French Canada are forever united. He closes with eloquent reference to Crecy and Joan of Arc. Sir Max says, in part: Empire is not inconsistent with liberty; none the less the reconciliation of French Canada to the Empire was one of peculiar difficulty because of the secular antagonism between Great Britain and France. In Europe we have fought feudal France and monarchial France and the republican France and imperial France. Times out of number our ancestors, whose blood still flows red in our veins and whose thoughts dominate our thoughts struggled fiercely against each other at Crecy, Blenheim, Minden, Busaco and Waterloo; and, far beyond the European empire the conflict extended, from the plains of the Ganges to the mouth of the Mississippi.

But we always fought each other as plain men and brave men should. Even Napoleon, who is sometimes credited with the invention of many modern Prussian doctrines, was a strict observer of the rules of war. With the Anglo-French Alliance vanished the last great obstacle to a thorough union of the two races of the Dominion.

### Ancient Wars Unite Us

We come back to the poet for the reason why the two great Western races of Europe are reconciled. Kipling seizes at once on the battles of long ago as the very reason for our mutual liking. "When did you refrain from us or we refrain from you? Ask the wave that has not watched war between us two. Others held us for a while, but with weaker charms, these we quitted at the call for each other's arms."

The very differences of the races both in the new world and the old afford ground for an eternal attraction, and it would be difficult to say whether the French admire more that which was done at Ypres by the Guards Brigade and again by the Canadians than the British Empire respects the heroic defence of Verdun. We have known each other's faults so long that we are ready to accept each other's virtues. The French mind is logical and passionate; the English restrains its natural ardor under a show of indeterminism. We have admired French literature as much as France has admired our political system.

### On Historic Ground

"Eager towards the known delight equally we strove; each the other's mystery, terror, need and love," but the poet is not prepared to acquit the two nations of those crimes which they have shared together when we burned Joan of Arc. "Pardoning all necessity no pardoning will efface, that undying shame we shared in Rouen's market place." The links of history are, indeed, more intimate between the two races than between any other; but how many people realized it when the British army advanced, to overthrow the Germans on the Marne, from the wood with the significant name of Crecy, or when the recruit goes down from his base camp at Rouen and looks at the statue of Joan of Arc in the square.

### INVENTED LEE-ENFIELD

Canadian Made Greatest Discovery Which Germans Stole

It is not generally known that the Lee-Enfield rifle was invented by a Canadian, the late James P. Lee, of Galt. In an article in the Reporter of that city, the former editor, Mr. J. P. Jaffray, tells the story of Lee. As a boy he doted on firearms, and as a young man went over the border and started a gun factory in Milwaukee. During the Civil War he made the Lee carbine for the Northern cavalry, and after the war joined the staff of the Remingtons at Ilion, N.Y., where he designed a number of sporting rifles. He evolved the "magazine" system of loading and perfected it during a vacation in Galt and made other improvements still in use. He went over to London and had his weapon adopted by the War Office. Mr. Jaffray says: "In the Remington and Hartford shops, where Mr. Lee constructed his gun, there worked at the time one Mauser and one Krag. Both these men stole the Lee inventions, and other foreign Governments were quick to secure them. But the Lee-Enfield is still the best of the lot, according to all accounts. And it was an old Canadian boy—an old Galt boy—who placed it in the hands of the British soldier." The Lee-Enfield has been remodelled more than once since James P. Lee perfected it. The short rifle of to-day is probably a great deal lighter than the original design, but the working principles of it are substantially the same.

### SAVING AUTO TIRES

Most people, ignoring the simplest precautions in driving, more than double the wear on their tires, and so are out repeatedly the cost of a new set, writes a tire maker. Some of the driving faults and the troubles they cause he lists thus:

Jamming brakes hard down or starting suddenly puts unnecessary strains on the tire fabric.

Wheels out of line continually yank on the fabric.

Pulling hard instead of coasting; over crushed stone drags cuts into a tire.

Spinning or skidding burn rubber up and scrape it off.

Oil and grease left on tires will rot them.

Avoidance of these carelessness will save forty per cent. of the normal cost of tires, concludes the tire man.

### GOOD HORSE POINTERS

Sudden Changes in Feed—The In-foal Mare

A horse which has been idle during the winter months cannot be expected to suddenly start hard spring work without preparation.

Exercise the work horses in the barnyard and gradually change to light and then heavy work. The over-fat, soft horse requires the most attention and loses most weight when put on heavy work.

Sudden changes in feed cause stomach and other troubles, often the loss of the horse; in proportion to work done. You will find the following rations good: For light work—Equal parts oats and bran, 2/3 of a pound per hundred pounds live weight, with good clean hay, 1 pound per hundred pounds live weight.

For heavy work—Gradually change the above ration to one of oats, 5 parts, and bran, 1 part, fed in the proportion of 1 to 1 1/2 pounds per hundred pounds live weight and hay as above.

Be sure that in-foal mare is not too fat and is getting regular exercise or, better, light work. Overfeeding of brood mares just before and after foaling is the cause of much of the digestive disorders and mortalities in foals. Take special precautions against navel ill in foals, by thoroughly disinfecting the foaling box and also about the navel of the foal. After foaling, give the mare a warm drink only for the first few hours. Then start a light daily grain ration, gradually increasing until she is on full feed, in about a week. It is as important to feed for milk in the mare as in the dairy cow; a grain mixture of oats, 6 parts; bran, 3 parts; and oil cake meal, 1 part, will give good results.

### 10 CENT "CASCARETS"

IF BILIOUS OR COSTIVE

For Sick Headache, Sour Stomach, Sluggish Liver and Bowels—They work while you sleep.

Furred Tongue, Bad Taste, Indigestion, Sallow Skin and Miserable Headaches come from a torpid liver and clogged bowels, which cause your stomach to become filled with undigested food, which swells and ferments like garbage in a sour barrel. That's the first step to untold misery—indigestion, foul gases, bad breath, yellow skin, mental fears, everything that is horrible and nauseating. A Cascaret tonight will give your constipated bowels a thorough cleansing and straighten you out by morning. They work while you sleep—a 10-cent box from your druggist will keep you feeling good for months.

### Measuring the Wind

At all British ports are wind measuring instruments, or anemometers (anemos—wind), the reading of which is of great importance to the sailing vessels. The anemometer measures wind speed; it is like a weather vane, with cups instead of letters at the ends of its arms. The cups, catching the wind, whirl round, and thus turn the central shaft. This passes down into a box in which are several dials. The indicators of these dials are connected with the shaft, and move according to its revolutions. Thus the number of revolutions of the cup in a certain time gives the exact speed in miles per hour.

## Gin Pills

FOR THE KIDNEYS  
PAIN IN SMALL OF BACK

From time to time we learn of cases where the Gin Pills have relieved the distressing pains in the back. Here is such a case coming from the British West Indies.

BRITTON HILL ST. MICHAEL'S, B.W.I.  
May 24th, 1915.  
"I received your sample of Gin Pills and would say that I was suffering from a very intense pain in the small of my back for some days. After I had taken the sample, the pain was gone."  
All druggists sell Gin Pills at 50c. a box, or 6 boxes for \$2.50. Sample free if you write to NATIONAL DRUG & CHEMICAL CO. OF CANADA, LIMITED  
TORONTO, Ont. 79

# Insomnia

WE can live without food, but not without sleep. Many will recall Dr. Tanner's 40 days without food, but who could live a single week without sleep and retain their reason.

It is during sleep that the nervous system is restored, and the nerve force, consumed by the activities of the day, is replaced.

Sleeplessness is one of the first and one of the most torturing symptoms of nervous exhaustion.

With sleeplessness you find nervous headache, tired, wornout feelings, indigestion, lack of energy and strength. You are nervous and irritable, and cannot compose yourself to rest or sleep.

The nerve force in the body is at low ebb, and the feeble, wasted nerve cells must be nourished back to health and strength by such treatment as Dr. Chase's Nerve Food.

You must not confuse this food cure with drugs taken to produce sleep, for it works in an entirely different way. It is not a quick relief, but a restorative, uplifting treatment. As the nerves are revitalized sleep comes naturally with its soothing influence and hastens recovery.

### Sleeplessness

Mrs. Edson Brock, Trenholville, Que., writes:—"I want to state that I have never taken anything to do me so much good as Dr. Chase's Nerve Food, and I am never without it in the house. I was so nervous I could not sleep, but now I sleep soundly at nights and wake up feeling refreshed and ready for the day's work. I used the Nerve Food for months, and found that it just suits my needs, and has built up the system wonderfully. I know it is Dr. Chase's Nerve Food that has brought about the great change in my condition, and I am thankful for it."

Dr. Chase's Nerve Food, 50 cents a box, 6 for \$2.50; all dealers, or Edmanson, Bates & Co., Limited, Toronto.

Do not be talked into accepting a substitute. Imitations disappoint.

# DR. A. W. CHASE'S NERVE FOOD

LUSCIOUS the pie that Elizabeth made.

Crisp was the crust and of delicate shade.

Never a flake of it soggy or sour.

Art, a good oven and Purity Flour.

## An Editor Talks

Few editors, it seems to us, are fully seized of the wide and strong influence they wield through their publications, not only in the editorial columns, but likewise by the general tone of the news and advertising columns. The pen is mightier than the sword. We shall not pursue this great thought further just now but give the answer we find in the Christian Herald to a reader who asked the question, "What must I do to become a journalist? A journalist has been humorously defined as 'a newspaper man out of a job. The best road to successful journalism is through the humdrum and drudgery of the ordinary jobs connected with newspaper making. Many men rise to prominent positions on big city newspapers who began by being in reports of occurrences in their own neighborhood. Begin first to write reports for your village or county paper. Get a reputation for securing news quickly and accurately and writing it up in attractive style. Winning a local reputation for faithful work in the small town papers will give you a good opening when you wish to try a larger city. If anything of extraordinary interest occurs, telegraph or telephone a report to some large city paper or news association. If your report is accurate, prompt and interesting they will not forget you when you come to ask for a position. Editors are always on the lookout for new ideas and special features. Cultivate an unaffected, bright, vigorous style of writing. Be on the lookout for what is new, surprising or humorous in the story you are telling. Above all, stick to the truth. People dislike to be misled by a paper story about anything."

We hear very much about Thrift in these stern war days. Webster's definition of this little word is harder to comprehend than the word itself: Thrift (a noun)—frugality; economical management; good husbandry; increase of wealth; profit; a plant. Thriftiness—the state or quality of being thrifty. Thrifty—characterized by economy and good management—frugal.

Hon. Thomas White, Federal Minister of Finance, has been emphasizing strongly this year in addresses and through the Press the importance and advisability of practicing thrift, individually, collectively—in our homes, in public capacities, and in every possible manner. It is a virtue that it would be well to practice always, we believe, while there are so many people in the world in need of the necessities of life. "The poor ye always have with you," Minister White's advice is therefore timely and excellent, but one fact he must be convinced of by this time, is that Canadians are nationally a thrifty or a saving people. The other day he asked for a War Loan of \$100,000,000 and inside of two weeks Canadians subscribed two hundred millions and the banks were ready and willing to subscribe, if necessary, as much as that. Surely this is not wanted at this time. Surely all this goes to prove that Canada is a wealthy country and if greater thrift be practiced it will become more wealthy.

Thrift is a capital subject on which to meditate just now. It is not confined to men only—women also may join in the "interesting and profitable" enterprise. Indeed, one of the best articles we have read on the subject appears in the October number of Every Woman's World of Toronto. We take the liberty of quoting a few paragraphs from this timely and splendidly written editorial page of this wide-awake magazine. "Thrift Means Just This" is the only heading. Generally speaking, there is a misunderstanding as to the scope and purposes of the thrift movement in this country. The lack of understanding lies primarily in the fact that to the popular mind thrift means simply saving money. In striving to differentiate between mere money saving and the practices of the greater thrift we are reminded that "Learning, whether speculative or practical, is the natural source of wealth and honor." The difference between mere money saving and the greater thrift is learning the natural source of wealth and honor.

We sincerely hope our younger readers, as well as the "grown-ups," will thoughtfully read and ponder over the statements made in the paragraph that follows for its thoughts are truly golden and worthy of being carefully stored in our "treasury of knowledge." Here is the nugget: Education, taken in the sense of mental discipline, is the foundation of all wealth and honor, national and individual, and it is only through its processes that we can bridge the chasm from money saving to the greater thrift. Saving money is one of the foundation stones in the building of a thrifty character—but it is no more the sum total of thrift than one stone is the sum total in the foundation of a great house. A man may be a money saver, and yet, if he dissipate, or is immoral, he is not thrifty. A man may save money—yet if he work eighteen hours a day, to the detriment of his health, he is not thrifty. True thrift consists in the judicious use of all our mental, material and physical resources, and when we merely save money we have only gone part way. A miser is an undesirable citizen.

What, pray, would be the fate of a nation of misers? The wheels of industry are turned by men and women who spend and employ their money wisely and live sanely.

The writer of this editorial offers a loophole for the wealthy to indulge in greater luxury than those of moderate means. To be perfectly fair we shall give one instance, although this feature does not so strongly appeal to us here for the very good reason that among our constituency of readers there are very few multi-millionaires. This writer says: The man who pays \$50,000 for a work of art, the product of the brain of a genius, and hangs it in his home, or donates it to an art gallery, is not thrifless or extravagant—although many would believe that the advocacy of thrift is against such practices. The man who pays \$50,000 for a work of art places a glorious premium on genius and brains, giving impetus to artistic progress, refinement, and civilization. The man who is dead weight to civilization. We who have the interests of the great thrift movement in Canada at heart must realize that one of our chief problems is to teach our fellow-men that merely putting money in a savings bank is not the sum total of thrift. The prudent use of money and the practice of liberality where it can be afforded have brought about the development of the arts and sciences and the manifold blessings of civilization. Nothing has ever been accomplished solely through selfishness and greed.

We like this part of this article, too, because it appeals to common sense people. We wonder if there is not something valuable and pertinent in it for everyone of us who read it. Read and think: There is a happy medium between extravagance and penuriousness. One of the evils of the day lies in the fact that many live far beyond their resources. On the other hand, many are cheap and tight-fisted in their habits and unwilling to reward their fellow-men for work well done. With them progress halts; they contribute little or nothing to the upbuilding of the things that are worth while. Midway between miserliness and extravagance lies the pathway of the greater thrift—and it is in the better understanding of this fact, and the application of it in our lives, that we have a problem and an opportunity.

The Greater Thrift is constructive, scientific, liberal, it builds character. It is the thrift that comes through education, and is the basis of all progress in art, science, business. It is the advancement of civilization accomplished through the reward of education, morality and industry. Summed up, the greater thrift is personal economics in its broadest sense. The greater thrift is the art of true living. "And this should be the spirit of the twentieth century. Money saving is but one link in the chain of a perfect character; economy is only a strand in the thread of thrift."

Now this writer gives us something along real practical lines—it is exceptionally good. It must concern every parent who has the future well-being of his and her children at heart. It will pay for twice reading or more:

The greater thrift is mental as well as material preparedness. And it is only through the process of education that it can be developed. It cannot be taught in a haphazard manner. Through our schools the practices of this great virtue must be introduced. We are teaching our boys and girls arithmetic, history and geography—our agricultural schools are teaching them to till the soil scientifically, and to develop the resources of the land through education. We are teaching household economics, morality and hygiene, and everything worth while but Practical Thrift—and we are neglecting one of the most important branches of education. If he who practices the greater thrift is a valuable citizen, a benefit to his fellow-men, an encouragement to genius, an aid in the progress of civilization, then is it not worth while that we look into this problem more carefully and discover how and by what means we may develop this virtue in our people?

### To Help Restore Louvain.

A committee of leading Russian scholars and professors has been established to assist the French commission to restore the world-renowned library of Louvain, in Belgium, which was burned by the Germans in the early days of the war. The Grand Duke Nicolas Michajlovich is chairman of the committee.

**Heartless Dad.**  
"You shall not marry the cub, and that settles it."  
"But he loves me father. Vows he would die for me."  
"I have no objection to that. Tell him to insure his life in your favor and go ahead."

**A Wish.**  
I wish I was a landlord gay,  
My life would be content,  
For no one knows an easier way  
To go and raise the rent.

Celery is a good cure for rheumatism and neuralgia.

### SOME FUNNY NOTICES.

"English Spoken Here; American Understood."

There is a notice to be seen in a shop window in Norway, "English spoken here; American understood"—which is a nasty one for the American language, says Tit-Bits. In foreign countries where English tourists foregather some very quaint notices have been seen at various times. On most of the large stations in Switzerland, for instance, one can see, "It is prohibited to traverse the rails unless one is invited to do so by the chief of the station."

In Milan cathedral there used to be a notice—it may be there now—which read: "Appele to Charitables, The Brothers, so-called, of Mercy, ask slender arms for the hospital. They harbor all kinds of diseases, and have no respect to religion."

Japan has the most numerous notices displayed. Nearly every shop in Japan exhibits a placard, printed in English, advertising goods, some of which are very comical.

"Horsehoe maker instruct by French horse leech," you read; "If you want to sell watch, I will buy; if you want buy watch, I will sell. Yes, sir, we will, all will. Some at my shop. Watchmaker."

A Japanese laundry company announced: "We most carefully and cleanly wash our customers with cheaper prices. Gentlemen, 7s. a hundred; ladies, 8s. a hundred."

### THE VICTORIA CROSS AWARD.

The Coveted Honor Is Never Conferred Conspicuously.

It is a pathetic circumstance that two of the three Victoria Crosses bestowed in the award to men of the fleet, as an outcome of the Jutland battle, pass to the families of men who did not live to receive the decoration in person. What gives the Victoria Cross its peculiar distinction among military honors is that nothing short of an absolute disregard of the risk of life establishes a title to it. It is never conferred promiscuously, and it runs no risk of being exhibited for sale with cheap jewelry in a shop window. The only price is sacrifice, and with most of the men who have won the coveted distinction it is scarcely thought that in the hour of glorious performance they gave a single thought to the reward. Nelson's heroism is hardly the less sublime if he exclaimed "Westminster Abbey or a victory!" on the eve of a battle. But there is a type of man with whom the thought of glory and the instant impulse to obey the voice of Duty are strangers to each other. The vast majority of the roster of heroes who have worn the emblem of Crimean cannon-metal, with its royal crest, crowned lion, and the words "For Valour!" have incontestably belonged to the order of "the noble living and the noble dead."

### BRITISH WAR INVENTIONS.

Some Astounding Ones, According to Harvard Professor.

The British are manufacturing new war inventions "which would turn the Krupp green with envy," according to Dr. Benjamin Rand of Harvard University, who returned recently to New York from a visit to England. Accorded privileges of inspection by the British foreign office, Dr. Rand said he visited munition and ordnance factories and saw "some astounding inventions," but that he was pledged not to disclose their nature. He found among every class, he said, an intense determination to do all possible to win the war. In one factory he saw 7,000 women at work, uniformed in khaki. "New factories were being built, he said, and existing ones constantly extended."

### Heroes Poor Talkers.

Heroes are poor talkers, says the New York Sun. Lieutenant Robinson, who, from the seat of a frail aeroplane, attacked and brought down a huge Zeppelin during a recent raid on London, could command only six words when there was presented to him a purse made up by the shipping men: "Thanks. I merely did my duty." The boy had stage fright, no doubt, but it's the only kind of fright his breed ever knows.

Vultures have no feathers on the head or neck.

Na Pooh

TOMMY: "Shut up, Alf! Can't you see the blighter don't understand English? and it's a blinkin' shame to waste all that good bad language!"  
"Im."—London Bystander.

## PRACTICAL FARMING

Weeding-Time in the Dairy.

Feed being higher in price, and the cows demanding more of it, as well as more comfortable quarters, greater care and attention, the winter season should be the one in which the farmer detects and weeds out the undesirable members of the dairy herd.

The old cow that has rendered good service but now consumes more feed than she pays for, should be promptly weeded out by turning her over to the markets. To say nothing of her being unprofitable the old and infirm are liable to sudden death any day—a total loss!

With an accurate milk-test so easily obtained, many farmers still are milking cows that give one-third more milk than that produced by others, when the cream test is so low on these larger quantities that the animals barely pay for their care and feed the year round. Let the Babcock test assist you in this weeding out.

The cow that eats twice as much as the average cow, must, in order to prove a profit maker, produce twice as much dairy products, yet many farmers unknowingly retain just such animals in the herd from year to year, simply because they do not take the time to look the matter up. Besides, such a gormand is almost sure to bring on digestive derangements which will render her useless as a milker, long before her allotted time, and thus add still another loss to her credit.

The severity of wintry weather seems to have a more deteriorating effect on some cows than others. They appear unable to withstand the rigors of winter, and fall off in both flesh and milk production to such an extent as soon as the severe weather sets in, that they just about pay for their feed and keep. Don't allow the thoughts of a profuse flow of milk for a few weeks during the summer to influence you in retaining such unprofitable members in the dairy herd. Weed them out, at once!

Then, there are other types of dairy cows that we cannot afford to keep around us. The cow that has short teats, or the one that is so difficult to milk, had just as well be in the market-place, when you can secure other, equally as profitable, with good-sized, easily milked teats. And these easy milkers are no more costly than the ones you feed away so much time and strength with at milking-time. The kickers, and the brashy cow, who come under this same class, for while they may give a goodly quantity of milk, the various points of undesirability are none the less present—loss of time during the milking-hours; danger; damage to fences, crops, and the animals themselves.

But the greatest of all reasons for weeding out the undesirable members of the dairy herd, is the influence these would exert on the future of the entire herd, since they are at least a part of the foundation on which we shall build. No sane man can expect that the offspring of the above mentioned cows will show sufficient improvements to warrant an increase in a far greater possibility that there will be more of a retrograding in the strain, and that, within a few years' time, the herd will not only fail to prove a source of profit, but actually will return less dairy products to the farmer than the cost of their feed and the amount of time and labor expended in caring for them, while, with conservative weeding out of the undesirable members, and a judicious selection of the choicest offspring as breeding stock, the standard of the herd will be materially advanced—not only above the "average," but above those which rank as first class.

### Why We Built a Steel Barn.

Our barn had become so delapidated that it was necessary to fix it or it would soon fall down and the prices of building material were so high we did not know what kind to buy. Wooden siding sheathing and shingles had been steadily going up in price year after year, until they had reached the point that we almost feared we could not afford to buy them. The old barn had to be fixed, however, and we decided to make a complete job of it when we did do it, so got quotations

on new siding and shingles for the whole building.

One evening about the time we were considering the prices and merits of the different materials there passed over our section of country a heavy thunderstorm. Some friends and ourselves had been away to a picnic and we were just returning when the storm came up. The lightning was very sharp and close by. We thought, however, that we could reach the shelter of a church shed before the storm reached its height. We did not reach this shelter before an usually close flash of lightning nearly blinded us and almost instantaneously with it a barn about 40 rods away seemed to burst out in flames. The barn was full of hay and was soon burned to the ground.

This occurrence set us thinking and we decided to protect our new barn as far as possible from lightning. At first we thought of putting on lightning rods; then we thought of the danger from fire from other causes, as sparks from the threshing engine, or accidental firing of the straw stack. The outcome was that we priced the galvanized iron siding and shingles manufactured by the different firms and found them to be so little higher in price than the wood that we bought enough for the barn.

We now have a building, the whole exterior of which is made of galvanized steel. Conducting wires run into the ground from the roof, making it lightning proof and we have practically nothing to fear from fire coming from an outside source. It cost us a little more, but we believe we get better value for the money spent in that it will last longer, our insurance is less and we have greater peace of mind.—Hiram Wheeler in Farm and Dairy.

### Nudges in the Right Direction.

Have an understanding with the company that insures your buildings before you get a gasoline engine. It may save a lot of trouble.

If you have not basins for your cows to drink out of in the barn, you can get a small heater for the watering trough outside. This will take the chill off so that the cattle will come back feeling comfortable and good inside.

Have seen cows stand for a long time at the watering trough in cold weather, as if dreading to take in the ice-cold drink set before them. Have seen those cows, too, go away from the trough all humped up and shivering with the cold. It takes a lot of animal vitality to warm up a cow after she has been chilled to that way.

"Clean out your stables three or four times a day. Begin the first thing in the morning. Do the work before you let your cows out to drink. Follow this up still later before milking at night. Care in this particular may mean health and safety to your herd and to those who use your farm product. Worth while, isn't it?"

Moving away to some other part of the country never gave a man good neighbors. To have good neighbors, one must himself be a good neighbor.

Your wife measures your love for her by the little things you do. She can't help it. No use talking love and then letting her dig the wood out of the snowbank.

Kindlings in the oven will burn all right, and often they burn the house up with them before morning. Don't put them there.

Hogs are not fools. They know when they are warm, dry and comfortable. They will put on fat faster if

## Pears

For clear, white delicately flavored preserved pears use

## Lantic Sugar

The ideal sugar for all preserving. Pure cane. "FINE" granulation. 2 and 5-lb cartons. 10 and 20-lb bags.

"The All-Purpose Sugar"

PRESERVING LABELS FREE. 5¢ printed and printed labels for a real full trade-mark. Send to

Atlantic Sugar Refineries, Ltd. Power Bldg., Montreal 70

you see to it that they have all these things on their side.

If you have a farm so poor that it will not raise white beans, make it so it will. You can do it. The soil is not to blame, neither are the beans. It is your part to build the old farm up and make it blossom like the rose.

Two really good sheep will soon stock a whole farm. A thousand poor ones never will do it as it ought to be done.

If you want good lambs in the spring, keep the ewes well in the winter.

The best sheep in the world may be spoiled by a poor fence.

Holes in the fence around the sheep lot mean a tired man, for the sheep will find them as sure as you are born. Some roosters have a wicked way of tackling every rival that may lift up his head in the yard. Put a stop to it by taking the fighter out and giving the rest peace.

Spraying the houses is not all there is to keeping them clean. Scrape up the droppings before you do the spraying. That counts.

The boy that tickles the colt needs tickling with a good switch off the peach tree. He would get it too, if he were my boy.

Any maples on your farm? Make a lick of syrup to go along with the pancakes. Licking good!

### Solomonic Decision.

Two brothers inherited a farm and quarrelled violently as to its division. Now there lived in their village a certain sheep and wise old man, noted for the soundness of his advice. Him the brothers determined to appoint arbitrator. Whatever he said they would abide by. They laid the matter before him. For a long while he thought, then delivered judgment. "You," said he, pointing to the elder, "shall divide the farm as you think fair. And you," he continued, pointing to the younger "shall have the first choice."

The River Orinoco, in South America, is over three miles broad for nearly half its course, while during floods the width, even at places far from the sea, is often a hundred miles.

## Penmans

Sweater-coats  
THE STANDARD OF EXCELLENCE

THE man who puts clothing to the hardest test usually selects Penmans when it comes to sweaters. He knows, of course, from experience that they wear like so much iron, that they fit right and look right. After all there is nothing like accepting what an overwhelming majority take as a standard. Say Penmans.

Penmans Limited  
Paris

## Local News and Personal Items

Pay your taxes and save money!

Rev. H. S. Dow of Woodstock was in Hartland yesterday.

"K-K-K"—Kidding Kids, Kin! Does it possibly mean this?

H. H. Hatfield left last week for a business trip to Montreal and Toronto.

R. A. Hall attended the funeral of Lester Wallace at Woodstock on Monday.

Mrs. Robert Lee of Beaufort was a week-end guest of Mrs. T. Hammond.

Take your Poultry to Carr's and get top prices. Good stock well dressed is what he's after.

Mrs. M. E. Thornton and daughters, who have spent the summer at Bath return tomorrow to Calgary.

Misses Hazel and Beulah Hanning have gone to Augusta, Me., where they will visit relatives for a time.

Mrs. H. J. Aiton was called to Boston Saturday by the serious illness of her mother, Mrs. A. Hatfield.

Private Dugal, son of L. A. Dugal, M. L. A., of Edmundston has lost a leg fighting with the heroic 26th.

J. T. G. Carr is paying 35 cents for good Butter and Fresh Eggs. This is the highest price ever paid in Hartland.

Keith & Plummer Ltd., will sell the balance of their millinery at reduced prices. Come early and have first choice.

R. L. Simms, barrister, Woodstock, was a village visitor on Friday. Mrs. Simms and Master Graham are visiting at Windsor.

Kerosene of the kind Belyea & Estabrooks sells will not smoke your lamp chimneys or cause that crust to form on the wicks.

E. C. Morgan, F. A. Aiton, J. H. Belyea and Harry Barter have been out to Miramichi on a hunting trip. Each succeeded in getting a deer.

Bohan Bros., through their agent, Frank E. Kelley, are doing a big business in the purchase of pork, poultry, butter, etc., besides the heavier produce.

According to an Athens, Ga., paper Prof. W. F. Watson, who spends the summers with his parents here, has bought a beautiful residence in that city and will in future reside there.

Mrs. Paul Caldwell has returned to Upper Kent after a visit with her husband's parents, Mr. and Mrs. T. W. Caldwell, at Greenfield. Mr. Caldwell went overseas with the second contingent.

Service will be held at the Methodist church, Hartland, on Sunday, Nov. 26, at 7.30 p.m. when the Pastor, Rev. G. S. Helps, B. A., will preach on "Pontius Pilate: A Study in Testing and Nemesis."

Sugar and Molasses are high but J. T. G. Carr advises his customers to buy now they will need for the winter NOW they will be higher. Those who took our advice some months ago on certain articles saved money.

The Argyle and East Knowlsville Red Cross society has elected the following officers for the coming year: Mrs. William McEwan, president; Mrs. Osbert Whitehouse, vice president; Mrs. William W. Hemphill, secretary; Mrs. Charles Cook, treasurer.

On Monday, Oct. 30 the Johnville school gave an entertainment in Tara Hall, consisting of a concert, pie sale and dance. The sum of \$87.50 was taken in, the larger part of which is to be sent to the Belgian Relief Fund; a few articles are to be purchased out of the amount for the school.

Leslie Waters, fireman on the express, met an accident one day last week which resulted in his death after he had been taken to the Fisher hospital. The water-gauge bursted and to avoid the scalding rush of steam he leaped from the cab directly in the way of the Gibson train which was pulling into the siding.

There was quite an excitement in Perth and Andover Wednesday afternoon of last week when it became known that Tom Johnson of Perth, who runs the Chinese laundry was arrested charged with helping soldiers who were trying to desert get away. He was put in jail and let out on bail the following day, Patrick Hefernan going as his bondsman. It is rumored that there are others beside Johnson connected with the case.

Cash paid for Produce at Carr's.

J. F. Murdoch is home from the North.

A. D. McCain came from Florenceville by auto yesterday.

Miss Helen Estabrooks of Chester was in the village one day last week.

W. R. Gillin and Mrs. Gillin of Woodstock were in Hartland Sunday by auto.

Mrs. William Stevens is quite seriously ill at the home of Charles Stevens.

T. T. Hammond arrived from Estcourt on Friday to spend a few days with his family here.

"K-K-K"—Kids Kick. What in thunder are all these K's about, anyway? Why don't you try and guess?

Rev. Angus Dalbeck of Danforth, Me., has been at his former home at Upper Brighton for a few days.

Buy your Winter Underwear and Pants at Carr's. His orders were placed last Spring, which means a big saving.

Lost—A three-year-old cow; white with some red. Will the finder please notify Donald McLean, East Florenceville.

Mrs. Sawyer of York county has been visiting her son, Melburn, at Middle Simonds, and was also a week-end guest of Mrs. H. Bradley.

The John Palmer drawingstring shoe packs, in 6 and 10 inch leg, at a very close margin of profit to cash buyers at the store of Belyea & Estabrooks.

Eggs are higher than ever before in this village. Buy Pratt's Poultry Food at Carr's and have your hens laying NOW. Money refunded if preparations do not do what is claimed.

Rev. R. S. Orchard of Woodwill address a public meeting in the Reformed Baptist church, Hartland, on Friday evening, Dec. 1. The topic will be the British and Foreign Bible Society.

During the past week it has snowed nearly every day and both outdoor appearance and temperature has been not unlike mid-winter. One morning the mercury touched 18 degrees below zero.

The pastor of the Hartland United Baptist church will preach next Sabbath evening (D. V.) on the theme: "A Life That was a Seeming Failure Finding at Last its Recompense." Mr. Kincaid is anxious for every one to come and hear this. Good singing by a well trained choir.

A number of the ladies of the Baptist church met at the home of Mrs. L. E. McFarland Friday evening and packed boxes of Christmas gifts to be forwarded to the boys belonging to the Baptist church and Sunday school at the front. The W.C.T.U. have been doing similar work, their gifts being for boys from this vicinity.

On Wednesday, Nov. 29, Rev. W. J. Smith, B. A., of Montreal, secretary of the department of Social Service and Evangelism of the Methodist church, will address a meeting in the Hartland church at 7.30 p.m. Mr. Smith is a well informed and effective speaker on moral and social reform. A hearty invitation is given.

Upper Kent has a new distinction being made a regular station of the C.P.R. H. D. Street is the agent and a new depot is to be built next spring. Already a busy shipping point, Upper Kent is destined to rank among the important villages along the line. Especially will this be true when a new government shall have constructed a bridge across the river at this point.

In a personal letter to the editor Rev. P. A. Fitzpatrick, once pastor of Hartland Methodist church, now pastor of Wesley Memorial Church at Moncton, writes that his church recently held its Silver Jubilee anniversary. An appeal was made for money to pay off \$600 indebtedness and the collection counted up \$847.45. The Moncton Transcript says "The present pastor is a young man already recognized throughout the province as a potent force in Methodism. Mr. Fitzpatrick is popular among his people and his hard work has been rewarded by marked advances along many lines." Rev. and Mrs. Fitzpatrick are rejoicing over their first child, a girl, born Nov. 6.

Miss Edna Jensen spent Saturday to Monday with her sister, Mrs. Harry Hagerman, at Centreville.

Just received another lot of Children's Underwear, at Carr's. Don't let the kiddies get colds, and thus save doctor's bills.

By an unfortunate error a notice to tax payers issued by Collector C. J. Connolly was left out of the papers it was intended for. It was Mr. Connolly's intention to issue executions for all Poor and County taxes, Brighton Front, on Dec. 1. In view of the short notice he has decided to give ratepayers until Dec. 6 to pay up in, and urges them to pay before or on that date to avoid costs of executions.

### Church of England

service next Sunday in Burt's hall at 11 and 7.30. A very cordial invitation is extended to all.

### GIVE "SYRUP OF FIGS" TO CONSTIPATED CHILD

Delicious "Fruit Laxative" can't harm tender little Stomach, liver and bowels.

Look at the tongue, mother! If coated, your little one's stomach, liver and bowels need cleansing at once. When peevish, cross, listless, doesn't sleep, eat or act naturally, or is feverish, stomach sour, breath bad; has sore throat, diarrhoea, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of its little bowels without griping, and you have a well, playful child again. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which contains full directions for babies, children of all ages and for grown-ups.

### Tax-payers Attention!

This is to give notice that executions will be issued for all Poor and County Taxes due in Brighton Front and dispaied on Dec. 1.

C. J. CONNOLLY, Collector.

### Farmers Note!

We have opened an agency for Gould, Stanley & Muir's

Ideal Gasoline Engines 1 1/2 to 60 h. p.

Maple Leaf Grinders and Pump Supplies.

If you need anything in this line phone or write and we will call on you.

H. F. SMITH, Farmers' 13-15 GREENFIELD.

### Colt for Sale

A three-year-old colt, of trotting stock, partly broken, fine looking, well set up, dark bay. Will make a fine driver. Will sell at reasonable price. Apply to

MISS O. M. SMITH, Farmerston, Woodstock, R. F. D. 6.

### Horse for Sale

Weights about 1200, grey, nine years old. In good working condition. Will be sold at reasonable price. Apply

BENNIE DICKINSON, 21-3 Upper Brighton.

### Exchange Hotel

W. F. Thornton, Prop. HARTLAND, N. B.

### P. R. SEMPLE

East Florenceville, N. B. Dealer

Hardware, Plumbing, Tinware, Furnaces and Stoves

The New Empress Range

manufactured by the National Mfg. Co., of Ottawa and Brockville, is the best on the market today. Come and see it. Ask us to prove the assertion

### WANTED NOW

A reliable agent in your home district during Fall and Winter months to sell Fruit Trees, Ornamental Trees, Flowering Shrubs, Roses, etc. Good pay weekly. Outfit free. Exclusive territory.

We Have Over 600 Acres

of the finest varieties of fruit and ornamental trees, including new varieties of Apples which we control. Reliable trees only sold. Established 35 years. Write to PELHAM NURSERY CO., Toronto, Nov. 6.

## Farmers of Carleton County

will continue to use the normal amount of Artificial Fertilizers. Where do you buy yours? Buy Home-Mixed goods and save about \$10 a ton. Ask your neighbor. HE used it. Better still, see one of our officers and place your order sometime during the next two weeks. The price will range about as last year and you can secure any quantity of Potash at the regular price per unit now charged by the agents of the ready-mixed goods. See our treasurer immediately for full particulars.

## Peoples' Union Agricultural Society

B. N. Shaw, Pres.

A. G. Baker, Treas.

C. M. Shaw, Sec.

## SELLING OUT

We are pleased with the ready response to our advertisements and we can still give you some good bargains.

Our store will be open till Xmas when we will have a well-selected stock of goods suitable for the Christmas trade.

## Buy Rubber Footwear

The price has advanced very little on these goods and it pays you to protect your HIGH priced shoes with LOW priced rubbers. A good stock of Rubbers, Overshoes and Gum Rubbers on hand at very low prices.

## Special Prices

On Women's and Children's Hose, Corsets, Cotton Batting, Bleached and Unbleached Cotton, Cotton Blankets and Sweaters.

## Try Domestic Shortening

Better, Cheaper and more healthful than lard. Choice Fresh Ground Coffee 38c lb. Pure Cream of Tartar 49c lb. Mollasses 65c gallon. Corn Syrup 80c gallon.

## At Baird's

## Essex Fertilizers

Made in Windsor, N. S.

## A Jacksonville Farmer Adds His Testimony:

Essex Fertilizer Co., Windsor, N. S.

Dear Sirs: I planted seven acres of Potatoes last spring using Essex 4-10 at the rate of one ton per acre with a light application of manure and I am getting a yield of 108 barrels per acre of marketable potatoes.

Arthur F. Tabor, Jacksonville, N. B.

Sept. 26, 1916

NOTE: The problem of mixing fertilizers is not completed by using the very best materials available, but it must be completely mixed, ground and screened with the most up-to-date machinery for this purpose, then put in bins to season, which takes from three weeks to three months. When the shipping season comes, we have a great quantity of our different brands of fertilizer, made from the very best sources, completely mixed and seasoned so it will not harden again. We are not satisfied with the mixing yet, but again we send it through the same process, into the mixer, through the mills and through the screens. It is then bagged and barrelled, loaded directly into the cars, and is delivered to you in a day or two in perfect condition to run through your planter.

Farmers are advised to place orders early. Further information from T. W. Caldwell, Gen. Agent, Florenceville

## DISTRESSING RHEUMATISM

How many people, crippled and lame from rheumatism, owe their condition to neglected or incorrect treatment! It is the exact combination of the Purest Cod Liver Oil with glycerine and hypophosphites as contained in

# SCOTT'S EMULSION

that has made Scott's famous for relieving rheumatism when other treatments have utterly failed. If you are a rheumatism sufferer, or feel its first symptoms, start on Scott's Emulsion at once. IT MAY BE EXACTLY WHAT YOU NEED.

### Sir Sam No Worse Than Government

(Continued from first page)  
Let us see. One of the first men the government would have to get after would be A. E. Kemp, who furnishes the metal to make about two thirds of the tin cans used in Canada. So they would strike him first.

"Then there is Francis R. Lalor, member for Haldimand (Ont.), and David Marshall, who represents East Elgin (Ont.), two men who are leading spirits of the Canadian canners. So what would be the use, in the face of these facts, having an investigation into the high cost of living by this government?"

Mr. Carvell expressed the opinion that the high price of flour and bread in America today was the direct result of combinations on both sides of the boundary line. This was proven by the fact that bread is selling today in England cheaper than in either Canada or the United States. He held that there was certainly good ground for an investigation into the matter. Regarding the usefulness of commissions under the present government, he said: "The best value of all these commissions is found in the reply of Sir Sam Hughes to the premier, when he says they look fine on paper but never accomplish anything."

### New Pastor for Windsor Church

Rev. W. B. Crowell has assumed the pastorate of Windsor group of Baptist churches and the following correspondence from The Telegraph will be read with interest:

Rev. W. B. Crowell, who has been pastor of the Baptist church at Harvey, Albert county, for the past two years, has tendered his resignation and expects to leave on Nov. 1 to take charge of the church at Windsor. Mr. Crowell's departure, after a most successful pastorate of two years' duration, is the cause of widespread regret to his congregation in Harvey, and a unanimous and hearty request was extended to him to reconsider his resignation.

This, although the kind invitation was deeply appreciated, he felt unable to do, the opportunities

as presented in the new field making him feel that his duty was there.

During his term there has been ninety additions to the church membership, sixty by baptism. Two church edifices have been dedicated during his stay. Of fine pulpit ability and of genial and friendly disposition, the reverend gentleman won the appreciation and esteem of not only his own people but the citizens generally, who will wish him every success in his new field. During his stay in the county, he enjoyed the confidence of his brother pastors in a gratifying degree, and for two years he was chairman of the district. Besides the regular duties of his pastorate here, Mr. Crowell took a deep interest in recruiting work, and he delivered eloquent addresses on different platforms in support of the great cause for which the empire is contending. Mrs. Crowell, also, will be much missed. A lady of more than ordinary talent, she took an active part in church and missionary work, and will leave a vacancy very hard to fill. Both the retiring pastor and his esteemed wife will be held in kindly remembrance by many friends in Albert county.

### THICK, GLOSSY HAIR FREE FROM DANDRUFF

Girls! Try It! Hair gets soft, fluffy and beautiful—Get a 25 cent bottle of Danderine.

If you care for heavy hair that glistens with beauty and is radiant with life, has an incomparable softness and is fluffy and lustrous, try Danderine. Just one application doubles the beauty of your hair, besides it immediately dissolves every particle of dandruff. You can not have nice heavy, healthy hair if you have dandruff. This destructive scurf robs the hair of its lustre, its strength and its very life, and if not overcome it produces a feverishness and itching of the scalp, the hair roots fashish, loosen and die; then the hair falls out fast. Surely get a 25-cent bottle of Knowlton's Danderine from any drug store and just try it.

### Bell-Towle.

A very pretty wedding took place at the residence of Mr. and Mrs. Scott Bell, East Florenceville, on Oct. 25 at 1 o'clock, when their daughter, Viota Cerene, became the bride of Earl Martin Towle of Easton, Maine. Rev. E. C. Jenkins performed the ceremony in the presence of the

relatives and friends of the contracting parties.

The bridal party entered the parlors to the strains of Mendelssohn's Wedding March beautifully rendered by Miss Grace Bell. The bride who was given in marriage by her father, was becomingly attired in white silk crepe with bridal veil and orange blossoms. Miss Zola Giberson, cousin of the bride, as ring bearer was very pretty in pink silk. Refreshments were served immediately after the ceremony, after which Mr. and Mrs. Towle left by C. P. R. for St. John en route to Boston and other American cities, on their wedding trip. On their return to their future home at Easton, Me., they were tendered a reception by the groom's mother, Mrs. Ella Towle.

### IND AND STOMACH TROUBLE, GASES OR DYSPEPSIA

"Pape's Diapepsin" makes Sick, Sour, Gassy Stomachs surely feel fine in five minutes.

If what you just ate is souring on your stomach or lies like a lump of lead, refusing to digest, or you belch gas and eructate sour, undigested food, or have a feeling of dizziness, heartburn, fullness, nausea, bad taste in mouth and stomach-headache, you can get blessed relief in five minutes. Put an end to stomach trouble forever by getting a large fifty-cent case of Pape's Diapepsin from any drug store. You realize in five minutes how needless it is to suffer from indigestion, dyspepsia, or any stomach trouble. It is the quickest, surest stomach cure in the world. It's wonderful!

### Death of Mrs. John Wright

The home of John Wright of Plaster Rock was made extremely sad on Nov. 10 by the sudden death of his beloved wife, Annie Laura, at the age of 38. Mrs. Wright had been ill but a few hours and to all appearance was beginning to recover when she was seized with heart failure and expired in a few minutes.

Quite early in life she embraced the Christian faith. Shortly after coming to this village Mrs. Wright became a member of the Primitive Baptist church, taking an active part in church work. Consequently the church loses one of its most active, humble, faithful and obedient members, yet what is lost for the church is gain for her.

The deceased leaves to mourn her loss, a husband and 7 children, the youngest an infant 5 days old; also a mother, step-father, four brothers, two sisters, with a large circle of near relatives and many friends.

Service for the deceased was held in the Methodist church, Kilburn Methodist choir rendering appropriate music for the occasion.

Rev. A. Hatfield of Plaster Rock was in charge of the devotional service. Interment took place in the family lot nearby.

### N. B. Telephone Operators Meet

St. John, Nov. 16.—The second annual conference of the chief operators of the New Brunswick Telephone Co. Ltd., which opened on Tuesday, was in session yesterday and the meetings will continue today, closing in the evening with a banquet at Bond's, tendered to the delegates by the company, of which they are the guests.

The meetings yesterday morning and afternoon were occupied in business discussion, dealing with some changes in the toll systems and explanation of policies of the company. The speakers in the afternoon were H. P. Robinson, A. W. McMackin, J. E. Marshall, L. D. Morris, H. G. Black and O. J. Fraser, all officials of the company.

On Tuesday evening the delegates, who are assembled from all portions of the province, enjoyed a theatre party at the Imperial. Eighteen of the outside delegates are staying at the Royal. Last night they were at the Opera House, Mrs. Fraser and Mrs. Gay acting as chaperones.

The following is a list of some of the delegates: Misses Cecile Sisson, Andover; M. Beaulieu, Edmundston; Mabel Gallupe, Florenceville; Gladys Estey, Grand Falls; Edna Jensen, Hartland; E. Kennedy, Woodstock.

## The Ideal Winter Beverage

### READY'S PORTERINE

Not only bubbling over with genuine wholesomeness and health promoting qualities but refreshing to a marked degree.

READY'S PORTERINE can be legally sold by any dealer as it is absolutely non-intoxicating and is a safe beverage for the home.

Buy it by the dozen or case. Write for prices.

## Ready's Breweries Ltd

P. O. Box 309 ST. JOHN, N. B.

## The Home Treatment

For Liquor and Drug Habits

When you have taken this treatment in the privacy of your own home for three days you are just as good a man mentally and physically as you were before you commenced to drink and you will have no desire, appetite or craving for liquor in any form. Each treatment is specially prepared for each case under supervision of a registered physician. Send for interesting literature etc.

The Home Treatment Co., - Grand Falls, N. B.

### THE FALL TERM

OF THE

FREDERICTON

BUSINESS COLLEGE

WILL OPEN ON

Monday, August 28, 1916

Booklet describing our course of study and rates of tuition will be sent on application

W. J. OSBORNE, Principal  
Fredericton, N. B.

Offers you a practical course of study which can be completed without loss of time. Individual instruction will enable you to enter any time. Every graduate placed in a good position, and your chances are excellent if you enter NOW. Write or phone  
O. A. HODGINS, Prin., Houlton, Me

### DR. J. E. JEWETT

Dentist

At Hartland every Monday. At Bath every Wednesday and Thursday. P. O. address Woodstock.

DR. WYMAN'S Life Balm is a valuable medicine for all ailments of the throat, chest, and lungs. It is a powerful expectorant and soothes the inflamed mucous membrane. It is also a valuable remedy for all ailments of the head, neck, and face. It is a powerful antiseptic and disinfectant. It is a valuable remedy for all ailments of the skin, and is especially valuable for the treatment of eczema, psoriasis, and other skin diseases. It is a powerful analgesic and is especially valuable for the treatment of neuralgia, rheumatism, and other painful conditions. It is a powerful tonic and is especially valuable for the treatment of weakness, debility, and other conditions of the system. It is a powerful stimulant and is especially valuable for the treatment of indigestion, constipation, and other conditions of the digestive system. It is a powerful diuretic and is especially valuable for the treatment of dropsy, edema, and other conditions of the urinary system. It is a powerful cathartic and is especially valuable for the treatment of constipation, hemorrhoids, and other conditions of the large intestine. It is a powerful emetic and is especially valuable for the treatment of poisoning, indigestion, and other conditions of the stomach. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the mouth, throat, and chest. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the skin, and is especially valuable for the treatment of eczema, psoriasis, and other skin diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the head, neck, and face. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the eyes, and is especially valuable for the treatment of conjunctivitis, cataracts, and other eye diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the ears, and is especially valuable for the treatment of otitis media, otitis externa, and other ear diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the nose, and is especially valuable for the treatment of rhinitis, sinusitis, and other nose diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the throat, and is especially valuable for the treatment of pharyngitis, tonsillitis, and other throat diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the chest, and is especially valuable for the treatment of bronchitis, pneumonia, and other chest diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the lungs, and is especially valuable for the treatment of tuberculosis, emphysema, and other lung diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the heart, and is especially valuable for the treatment of angina pectoris, myocardial infarction, and other heart diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the kidneys, and is especially valuable for the treatment of nephritis, pyelitis, and other kidney diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the bladder, and is especially valuable for the treatment of cystitis, urethritis, and other bladder diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the prostate gland, and is especially valuable for the treatment of prostatic hypertrophy, prostatic abscess, and other prostate diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the testicles, and is especially valuable for the treatment of orchitis, epididymitis, and other testicular diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the penis, and is especially valuable for the treatment of balanitis, urethritis, and other penile diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the vagina, and is especially valuable for the treatment of vaginitis, vulvitis, and other vaginal diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the uterus, and is especially valuable for the treatment of endometritis, myometritis, and other uterine diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the ovaries, and is especially valuable for the treatment of oophoritis, ovaritis, and other ovarian diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the fallopian tubes, and is especially valuable for the treatment of salpingitis, oophoritis, and other fallopian tube diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the peritoneum, and is especially valuable for the treatment of peritonitis, oophoritis, and other peritoneal diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the pleura, and is especially valuable for the treatment of pleuritis, oophoritis, and other pleural diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the lungs, and is especially valuable for the treatment of tuberculosis, emphysema, and other lung diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the heart, and is especially valuable for the treatment of angina pectoris, myocardial infarction, and other heart diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the kidneys, and is especially valuable for the treatment of nephritis, pyelitis, and other kidney diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the bladder, and is especially valuable for the treatment of cystitis, urethritis, and other bladder diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the prostate gland, and is especially valuable for the treatment of prostatic hypertrophy, prostatic abscess, and other prostate diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the testicles, and is especially valuable for the treatment of orchitis, epididymitis, and other testicular diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the penis, and is especially valuable for the treatment of balanitis, urethritis, and other penile diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the vagina, and is especially valuable for the treatment of vaginitis, vulvitis, and other vaginal diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the uterus, and is especially valuable for the treatment of endometritis, myometritis, and other uterine diseases. It is a powerful antiseptic and is especially valuable for the treatment of all ailments of the ovaries, and is especially valuable for the treatment of oophoritis, ovaritis, and other ovarian diseases.
