Pay One-Third by the Railway Commission.

CITY MADE

A MISTAKE

When It Failed to Accept the Proposition Put Forth by Mr. F. H. McGuigan.

The track elevation case of the city of Toronto has been settled by the Dominion railway commission, that fact has drawn attention to the same problem in the city of London. It will be remembered that the local improvements have been waiting on the Toronto negotiations, and it is now expected that the city council and the Grand Trunk will get together and settle the local difficulty.

It has been pointed out that the city would never obtain as good terms as

talked the problem over with the city fathers some years ago.
At that time the Grand Trunk wanted a fixed assessment of \$275,000 or \$300,000 as a bonus, and also objected to paying land damages of any sort. There were some minor matters such as the width of certain street subways, but the main matters of cost are mentioned above.

Negotiations Broken Off. The city objected to these terms, and negotiations were broken off The company were to spend \$1,250,000 in improvements in the city. Mayor Stevely has been endeavoring to bring the company and the city to gether and negotiations may be opened in a short time.

If a satisfactory agreement cannot made, the company will appeal to the Dominion railway commission, it is now said, and that body will dispose

Land Damages.

Then there will be the question of land damages. When negotiations were considered on the former occasion the company refused to pay land damages, and so did the city.

In the Toronto cases these damages were divided between the company and the city, the Grand Trunk to pay twothirds and the city one-third, and it is more than probable the same division will be made in London's case Of course there are several matters of importance in connection with the negotiations that might affect the

money settlement. Rectory Street.

The closing of Rectory street, the erection of a bridge at Egerton street, viaducts at certain other streets, and other things, might have some bearing on the final agrement, but the opinion is general that the city will not get out of the negotiations at a less cost than half a million dollars. No definite information has been received from Grand Trunk headquarters as to when Engineer Kelly will have the plans ready, but it is expeced that within the next few weeks something definite will be done. If the city balks on the proposition the company, the Grand Trunk will take the matter to the commission

and it will be settled there. NATIONAL BALLOON RACE

LONDON CONFERENCE

Heard Eloquent Speakers Tell of the Needs in Many Fields.

The need of the mission field and the way the Methodist Church was meeting this need, was the underlying subject of the four addresses delivered at the missionary conference in connection with the London Conference meeting in the Askin Street Church

Mr. C. E. German was the first speaker of the evening. "The ideal of everyday life," sail

Mr. German, "is service." "There are people who say, 'We have spent much money in the foreign fields, now let us spend it at home.' Is this right? Does it not savor of self-seeking? The Copernican system used to teach that the earth was the centre of the universe, and all the planets revolved around it, and is there not sometimes a Copernican system in our lives, that we are the centre, and all the world's interests hinge around our little sphere of interest? Is it the best sportsman who plays the game only when it is for his own glory? No! Even in the baseball field the Ideal is an ideal of service. Some people think that money-making is the great thing. But one man in a hundred knows the name of the man who a short time ago cornered the wheat market and turned over several millions of dollars. While everyone knows the name of the young man operator of the Republic.

The Artesian Wells. "There is a gentleman of this city who is giving of his time and money to supply the city with pure water; and everyone respects him for the sacrifice he is making for this project. The ideal of all life is service. Why do we adore the Lord Jesus Christ? Not because he is the Lord, but because he forgot that fact, and came to suffer and die and serve that we might live.

"This is the ideal, and the motive power behind this ideal is love. Christ died to save the world, and the love of Christ in our hearts prompts us to service. And these are the two forces that are at the back of the Layman's Missionary Movement. And if less time were spent on the problems of criticism and more to the holding up TO SWIM ACROSS RIVER of Christ, then the personal love of Christ would lead us by a stronger love and a more unselfish service to

AN AUSTRALIAN WHITE ELE-

The Australian Commonwealth has under consideration the offer of South Australia to hand over what is known as the northern territory, a huge, uninhabited tropical dependency which once belonged to New South Wales That colony some years ago cut the territory adrift, and there was a question of its becoming a crown colony, when South Australia stepped in and offered to assume the responsibility. All that the latter then received was a right to administer the territory and a promise that it would be definitely ceded when the Transcontinental line frem Port Darwin to Port Augusta was built. That condition has proven more than South Australia has been able to fulfill, a part only of the task having been completed. The territory is now offered to the Commonwealth at the price of its debt, together with the unfinished transcontinental line at cost price and Port Augusta thrown in, so that the Commonwealth may own the whole railway and both termini. In addition the Commonwealth is promised the right to build another transcontinental railway, connecting Western Australia with the rest of Australia, through South Australian territory and the necessary land to build it or The one condition insisted on is the completion of all the line that has been started, connecting the northern territory with Port Augusta.

Already not That this development will mean a little of the cost of war is being incurred. The race in building Dreadnoughts implies a waste of the existing one, after the experience of the past warships; and if aeronautics succeed, here will be a waste of Dreadnoughts in their turn. DOCTORS DISAGREE AS TO MILK PROBLEM

Provincial Analyst For Pasteurization, But Toronto Health Officer Opposes.

Toronto, June 4 .- To pasteurize milk, or not to pasteurize it, that is the question. If you believe in Dr. J Amyot, director of the provincial poard of health laboratory, you will pasteurize it, while if you pin your faith on the judgment of Dr. Charles Sheard, medical health officer and chairman of the provincial board of health, well, you won't think it worth while. These two authorities had a regular set-to on the question at yesterday afternoon's session of the Ontario Medical Association, and threshed it out in lively style.

Dr. Amyot read the paper, and frankly admitted that he came to advocate pasteurization. "This is a process," he explained, "by which the milk is heated to a temperature of 150 degrees Fahrenheit, and kept so for 20 minutes. It is then immediately cooled, and kept so till used." In this way disease-causing bacteria are destroyed, to a large extent, and the danger of the consumer contracting consumption and other diseases from which the cow may be suffering is greatly diminished.

Sheard Doesn't Want It.

Dr. Sheard led the discussion. mind, so far, is open on this subject." he began; "but it is just becoming closed. (Laughter.)

"Frankly, I do not favor pasteurization. It may be all right in the laboratory, but scientists will know more when they become acquainted with the practical side of the ques-Why, there are 3,000 cows, or 25,000 gallons of milk a day, coming into the city, and it would mean that the whole burden of pasteurizing i would fall on my shoulders, and I do not want the task of parboiling all the dirt and bacteria the doctor speaks of. Besides, all this milk goes out from between 4 and 8 a.m., and it is nonsense to think these men would stand around waiting their turn to have their milk treated. Pasteurization does not help improve the value of the milk as a food. Besides, it discourages cleanliness among the

AMERICAN ASSOCIATION-TOP ROW. CONAHAN, ECKMAN, HAYES. BOTTOM ROW: OWENS, SULLI-VAN AND KING.

Kansas City, Mo., June 4. - No one eyer heard an umpire boast that his life was a bed of roses, but the arbitrators in the American Association come nearer to leading an ideal life than men in the same walk in other

The reason is easy to ascertain. It is because President Joe O'Brien believes absolutely in arbitrary discipline on the field. The American League is no place for a rowdy player, as trouble-makers soon learn. In order to clear the

rocks from the road his umps has to travel, O'Brien has promulgated several rules. For instance, he holds that a runner cutting a base shall be suspended for three days, and intentional interference with a runner shall call for similar punishment. O'Brien has never allowed a protest. He credits his umpires with knowing what is coming and makes

them the court of last resort. The president likes husky arbitrators, and his staff this year with one exception, is made up of men who can hold their own in any sort of an argument the players may start. The star of the bunch is "Brick" Owens, said to draw \$525 a month, which accounts for his refusal to join Ban Johnson's staff this year.

English Capitalists Arrange for Co-Partnership With Their Workmen.

London June 3.-Co-partnership, or profit-sharing, as a solution of the 0 labor problem, is at present the subject of the hour in England, and arrangements are now being made for a national convention of great employers to devise a plan for its universal introduction.

Co-partnership is really in the business world here no new thing. There' are firms in England that for 50 years have shared their profits in one form or another with their employees, but the movement is now being taken up widely as a remedy for the great disturbance of industry caused by strikes and as a check to the growth of so-

ing of prefits, the payment to the workingmen of a bonus calculated on their earnings in profitable years. The other and truer form of co-partnership takes the form of assigning to the employees stock in the company, on which regular dividends are paid, when earned, just as on the stock of the regular shareholders.

The first system has been in operation for a good many years in a number of large gas companies. It was introduced by the late Sir George Livesey, at the South Metropolitan Gas R. Works, London, with the object of for the game was already forfeited to 1 in 1 1-3, Vickers 3 in 2-3, Plank 2 in shareholders, but also to repeatedly There has never been a strike of the

The more modern method of taking great captains of industry, Sir Christopher Furness, the great shipbuilder and shipowner, and W, H. Lever, M. The ball was set rolling by Sir Christopher Furness early this year after a of disastrous strikes, which nearly ruined the shipbuilding indus-Seven times they attempted to steal Browns Are Trimmed at New York by try in the north of England. Sir Christopher made two propositions to his employees. One was to sell two shipyards to the trade unions at a figure to be placed by an arbitrator, and to allow them a long period

The latter scheme was agreed to, and is now in operation. Under it the men consented to have 5 per cent of because he had injured his arm in their wages set aside for the purchase of shares in the company. These shares are guaranteed to pay 5 per cent, and after that they share in the check that growth. They believe that "Growth and development cannot be common stock dividend. This council will also deal with all disputes about wages or anything else arising between the men and the company. A similar scheme, differing only in slight details, has been adopted by Lever Bros., and effects about 2,000 employees. This scheme involves the creation of \$2,500 000 in co-partnership certificates, and they will be allotted yearly to the employees in accordance with the length of service and the wages earned. Thus a man whose earnings are less than \$500 a year will be allowed to acquire a maximum of \$1,000 in co-partnership shares, while a man earning \$3,750 a year or more may acquire \$15,000 worth of shares This rule is based on the theory that position before accumulating \$1,000 in R. EXPRESS CO. PROBE

Railway Commission Refused To Hold It in Secret.

Toronto, June 3 .- Thanks to the railway commission, which refused to hold express inquiries in secret, the Ontario public learned yesterday the reason it costs so much to send a small parcel by express and that reason is that the companies must pay from 92 to 150 per cent profits on the capital stock.

F. F. Crysler, for the Dominion Express, moved that the figures submitted by the company be kept private. After a short conference with Comnissioner McLean, Chairman Mabee

"My fellow commissioner and I are of opinion that the capitalization of a public utility corporation is a question of as much public concern as are the express rates. This inquiry should not be shrouded in mystery. There is no reason, that I know of, why the inquiry should not be conducted in a bunal, and the people have a right to come here and hear all the proceedngs. We have no sympathy with proceedings in camera."

Mr. Buell, who is assisting Mr. Shepley in the investigation, gave the folowing figures:

The Canadian Express Company was organized as a private concern in 1865, with a nominal capital of \$500,000, of which \$275,000 was subscribed and \$27,520 paid up. In 1892 the Grand Trunk Railway Company bought out the Canadian Express Company, paying for it \$660,000, which was placed in the hands of trustees for pro rata distribution among the shareholders.

The Home of Hart Schaffner and Marx Clothes.

Here's An Attractive Saturday Programme for You

First of all, good clothes—the best we could buy from seven of Canada's leading makers, and Hart Schaffner & Marx, of Chicago. Differently better than you can find anywhere else in London. Higher-priced clothes, some of these, than any other store sells-higher values, all of them than anyone else can possibly offer. And for tomorrow there's a nice, bright lot of new things to show you—exclusive patterns and colors that can't be got even in the best tailor shops, and all in smart and distinctive new models and styles. We'd like to show them to you.

Suits at \$20 to \$25 We've sold hundreds of these to men clothes were the only good kind, and who forgot that notion when they saw these suits. You'll find here every desirable weave and color; designs exclusive and up to the mid-season demands; a color range that includes every new shade in green, olive, smoke and stone grays, brown, tan and taupe. We can show you one, two and three-button coats that have more mart style and fit better than any clothes you ever saw. Lots of them for the man who just wants the quieter styles-lots of them for the young fellows who are looking for novelty styles.

Suits at \$10 to \$18 Keeping these stocks up to the standard quantities has been our greatest trouble, for never have suits sold so fast. And to do it we've I een forced to use fabrics in practically every price range that should have gone into higherpriced lines. You'll find in these lines fine imported fabrics that custom tailors are using and getting half as much again for. You'll find patterns and colors that are right up to mid-season style, and you'll get coat styles clever and distinguished, many of them exclusive with ourselves. There are

conservative models, and plenty of the kind with fancy flaps and cuffs.

Ladies Will Be There From All Parts of the World-The International Council.

The Congress of Women which meets in Toronto, from June 24 to June 30, is one of the most widely known and most important gatherings of women that is held. It is an international gathering of the women who are at the head of all the leading social, educational and moral societies of the leading countries, and topics of vital interest are sure to be discussed. Mrs. R. M. Graham, when seen by The Advertiser today, gave the follow-

An Explanation.

"In case some of you do not quite understand what the international council is, I must tell you briefly that it is a federation of national councils, which in turn are federations of societies embracing all sorts of work -literary, philanthropic, social, educational.

"The name quinquennial is attached to this congress because it only meets once every five years. Ten years ago it was held in London, England; five years ago in Berlin. There are some, among others your president, Mrs. Dignam, who have had the privilege of attending these quinquennial gatherings, and who know how interesting they were. I hope Toronto will appreciate the coming one at its full value. To many, in fact, to most of our expected visitors, Canada has either been but a name or a country pictured as a land of snows, buffaloes and red Indians.

The Delegates.

"It rests with us to send these delegates back to their respective countries with a fuller knowledge of Canada and its resources, and with the happiest recollection of their stay among us.

"Each day a lunch will be given for them at the university, by the kindness of the following ladies, who each entertain for one day: Mrs. Nordheimer, Mrs. A. Gooderham, Miss M. Scott, Miss Carty, Mrs. Wm. Mackenzie, Lady Mortimer Clark, Mrs. Austin, Mrs. Willison, Mrs. D. D. "On Wednesday, June 23, the Historical Societies and Travel Clubs are having an excursion to Niagara, open to all members of the affiliated societies, at the cost of \$3, which includes transportation and lunch at the Cataract House. The visiting delegates will be given a lunch at the Cataract House by the Canadian National Council, and a tea at the Clifton by the hostess clubs, who will also provide for their transportation.

The Speakers.

"I cannot today give you the names discussions in the different sections. Those will be fully given in the printed agenda which in course of preparation and will probably be out early next week. I can give you some notes though on the programme and the people who will appear on it.

"First of all we will have the president of the international council, Lady Aberdeen, a very apostle of advancement for women, great in mind, noble in character, with the good of our sex, the good of our country, the good of the world at heart,

THE MOST RELIABLE and Successfui Authority—Greatest success in the treatment of Hernia (Rupture) Varicocele (Faise Rupture) of all known agencies in modern times. He who makes a specialty of one department must certainly be more experienced and capable than those having "many irons in the fire." Don't put off your case, believing it to be simple—Remember neglect often proves fatal. Have your case attended to now, and thus avoid danger. Stop wasting time and money elsewhere but come to one whose life-long study has saught him what to do. Do not despond or be deterred from seeking further advice, or because of repeated failures consider your case incurable. Because others failed in your case you have become discouraged. This is the very time you should consult me as my reputation has been made in curing hopeless (so-cailed) cases.

LADIES suffering from Navel or any form of Rupture should not hesitate in having their case attended to at once. Everything strictly private and professional.

MOTHERS—Look to your children—New is the time to have them cured, while young. Don't allow them to grow up handicapped in the race of life, with rupture.

MY CHARGES are within reach of all, the poor man as well as the rich. Terms can be attisfactorily arranged, no reason why you should not consult me at once, during this visit.

The universal tendency of these conditions is to grow worse and more complicated—leading to impotency, nervous debility, wasting, stricture, lumbago, sexual exhaustion, etc. Do you intend to allow this insidious affliction to sap away your vitality? It is doing so now and if not cheeked will result in the above conditions. No matter how serious your case may be, time afflicted, or the failure you may have experienced in trying to be cured by medicine—free trials, or Electric belts—my Biotone system will cure you; the wormy veins return to their normal condition and hence the sexual organs receive proper neurishment, the parts become vitalized and manly powers return. No temporary benefit, but a PERMANENT one. NO OPERATION necessary. No detention from business. If you have had the usual experience you have no doubt spent large sums of money and still larger quantities of time searching for the remody that I offer you here.

Bismarckian Advice.

Harden is strongly anti-Japanese. He frankly declares that the "United States has made the gravest mistake the United States has decreased from by allowing it to become so great 5.8 persons in 1790, the date of the and powerful." The idea underlying first census taken, to 4.6 in the same this opinion is evidently that a nation area in 1900, according to a volume should be quick to discern a potential historical and prophetic. No son of now being prepared by the census enemy, and to crush it before it is strong enough to do any harm. From a publicist who greatly helps to commercially, as made by the leaders mold German sentiment this is a significant remark: and though he of the various provinces, without gaindoes not say it. Herr Harden must ing new inspirations.

think Great Britain rather stupid not to suddenly declare war on Germany and annihilate the navy that may one day seek to wrest the supremacy of the seas from her. It is easy to re-cognize the influence of Bismarck's teaching upon Harden, for this is exactly the sort of unmoral politics that ticed as long as he lived. Nor, as we see did it die with him; but is today as strong a feature of imperial German statecraft as it was twenty years ago, when Bismarck wanted to make war on France because she was recovering too quickly from the results of the struggle in 1872.

The United States and Japan.

But Harden has confidence that the American people will settle the yellow race problem, because they have settled the negro problem. The danger from Japan will practically cease as soon as the Panama Canal is ready. Then America will be able to resist Japan. Until then, America must be careful." Herr Harden is another choice specimen of German policy. "Never kick a man when you're down," is wise advice, but if he is fool enough not to kick you, express your opinion of him when you get the chance. A man is not less dangerous because he is ignorant, and although Harden supposes that the negro problem has been settled in the United States, his lack of knowledge on the subject does not make him less an authority with his own admirers. Other Germans, who lack his hold. upon the people, can supply his deficiency when precise information is necessary, and Harden can be left to the task of firing the minds of those who are prepared to act on his ad-

Just One Opinion. Were the sentiments to which Harden gives expression those of a courtier who speaks to please the ruling powers, they would not be so significant as they are when emanating from a prophet of discontent whose star is in the ascendant. We suppose, rightly or wrongly, that the feelings of high German officials is none too friendly to Great Britain now; and we find them re-echoed by the man who has been regarded as the most persistent enemy of the ruling clique. Apparently, on the question of Great Britain, be brought from the settlement for rethere is only one real opinion among the leaders of the German people.

Are Married at Windsor.

Windsor, June 4 .- Unable to stand the pangs of separation any longer, Dr. Charles W. Dean, of Toledo, O., and his former wife, Florence Mary Avery, of Charleton, O., eloped to Windsor, Tuesday afternoon, and were remarried. The marriage ceremony was performed by Rev. Wm. H. Snelgrove, of the Church of the Ascension.

Upon applying for their marriage license, the couple stated that they had been married before, but owing to some small differences in opinion had secured a divorce. Single blessedness did not seem to appeal to either, so the doctor renewed his courtship and was successful. Both parties to the contract seemed overjoyed when the knot had been re-tied. They left at once for Toledo. Dr. Dean is 27 years of age, and his wife has just reached her 43rd milestone.

APPLIES FOR POSITION OF SCHOOL INSTRUCTOR

Hamilton, June 3.-Sergeant-Major Gilmour, formerly of Wolseley Barracks, London, tonight made application to be appointed assistant physical instructor in the schools.

His application was backed up by Col. Logie, brigade commander, and Col. Bruce, of the Kilties, both of whom said it was necessary to find something else for him to do in order to guarantee him a salary sufficient to keep him here.

A committee was appointed to look Into the matter. Sergeant-Major Gilmour is on the taff of the Ninety-first Highlanders.

Providing for the taxation of bachelors and spinsters at four times the rate of married men and women, a bill has been introduced to the Danish Parliament by the Government.

LIFE-SAVING BOAT FOR FIRE DEPARTMENT

One May Now Be Purchased-Matter Has Been Hanging Fire for Years.

A boat for the fire department to be used in case of drowning accidents will likely be purchased. When the late Fire Chief Clark was in charge of the brigade, he made recommendation to the council that a suitable boat be procured for the department for use in such cases. He also suggested that grappling hooks

also be provided. The board of works took the matter up, and sufficient money was laid aside last year for the purchase of the

It has not yet been bought, and Wednesday the department was put to considerable inconvenience in getting a boat, and taking it to the river. Chief Aitken and Ald. Garratt, chairman of No. 3 committee, had a confer-

ence Thursday, and it is likely the matter will be brought to the attention of the board of works. MAPLETON NEWS.

Dyspepsia is the prevailing malady of civilized life. It is largely due to gross errors in diet, over-eating, too free indulgence in stimulants and over-taxing the stomach with indigestible food, eating too rapidly without chewing the food sufficiently, indulging in hot biscuits, pastry, pickles, confectionery, etc.

Constipation, headache, heartburn, sour stomach, distress after eating, belching of wind, faintness, and fulfness and distention of the stomach are a few of the many distressing symptoms of the poor, weary dyspeptic.
