Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

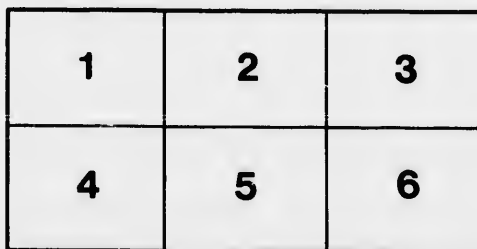

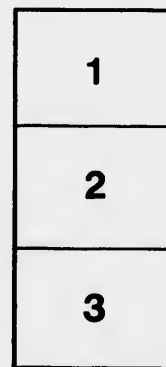

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

THE WESTERN DISTRICT
LAND AGENCY.

Essex, Kent and Lambton.

The undersigned has established a system of Land Agency which he finds is being thoroughly appreciated, both by intending purchasers and those who desire to dispose of Lands in the above section of the Country.

The following are some of the leading features of this system :—

No Charge is made unless the Sale is effected through this Agency.

Intending Purchasers are either accompanied to the Land, or directed to parties in the locality, who point out the Property for sale, thereby avoiding the inconveniences generally experienced by parties in search of Land.

MAPS of the several Counties, on a large scale, (which may be examined, and a general idea of the locality obtained,) are on exhibition at his Office, where all information can be had Free of Charge.

A LAND PAMPHLET

Containing a List of Improved Farms and Wild Lands for Sale, with prices attached, accompanied by a short general description of the above three Counties, including

Soil, Timber, Drainage, Settlements, Markets, Towns, Villages, General Products, Shipping Facilities, Etc.

Will be furnished, post-paid, on application to

J. W. SHACKLETON,
Chatham, Ontario.

MONEY TO LEND

AT 7 PER CENT.

MAP OF
The Western District of Ontario,
 COMPRISING THE COUNTIES OF
ESSEX, KENT AND LAMBTON.

For particulars in reference to Improved Farms and Wild Lands for sale in the above Counties, apply to, or address

J. W. SHACKLETON,

Chatham, Ontario.

SYNOPSIS

—OF THE—

COMMERCIAL AND AGRICULTURAL FEATURES

—OF THE—

“WESTERN DISTRICT.”

THAT portion of the Province of Ontario formerly known as the “Western District,” comprises the Counties of Essex, Kent and Lambton. It has for many years been noted as a district rich in the natural products of the forest, and possessing a soil of great fertility. Large shipments of Black Walnut and White Oak, besides other kinds of valuable timber, have annually been made, which, until within the last few years, found a market principally in Quebec.

Each winter has brought a most satisfactory and remunerative harvest for the settler, whose principal employment during the winter months has been the manufacture of various kinds of timber, and its removal to the several shipping points preparatory to the opening of navigation.

In this manner a great source of wealth outside of the agricultural resources of the country, has been developed, and employment furnished to hundreds of hands in the lumber woods of this district, the timber of which rated second to none contributing to the Quebec trade.

The foregoing state of things, as may easily be imagined, soon transformed what some years since was considered a comparative wilderness into a well settled and flourishing community, interspersed with towns of no inconsiderable size, many thriving villages, and large settlements of prosperous farmers; and although the great bulk of the superior quality of forest production, viz.: Walnut and Oak, is to a considerable extent a thing of the past, there is yet a large quantity of land containing vast amounts of the smallest kinds of Oak, and an abundance of Ash, Hickory, Beech, Maple, Elm and other timbers, which are each year becoming more and more valuable.

The peculiarities of the several counties will be enlarged upon under their respective heads.

COUNTY OF ESSEX.

This is the most westerly peninsula of the whole Province of Ontario. It is bounded—North, by Lake St. Clair; West, by the Detroit River; South, by Lake Erie, and adjoined on the Easterly side by the County of Kent. On its Westerly side and bordering on the Detroit River, the Townships of Sandwich, Anderdon and Malden extend from Lake St. Clair to Lake Erie.

above

ario.

The surface of these Townships is generally level in the interior, but high and rolling along the Detroit River and Lake Erie, except on the Southern extremity of Malden, where it is in places marshy. The River Canard waters this section, and has its source in the Eastern Townships of Colchester and Gosfield, which, with the Mersea, form the Southern portion of the County; Maidstone, Rochester, and West Tilbury are the Northerly and adjoining Townships. This comprises the County. It is traversed East and West by three leading thoroughfares, viz.:—the Tecumseh, Middle and Talbot roads, the latter confining itself throughout nearly its entire course in this County to a fine gravelly ridge; they are bordered on both sides by well cultivated farms, which in some cases are of great extent, having good orchards containing some of the finest specimens of apples, peaches and other fruits, with occasional vineyards. These latter, however, are principally situated along the Southern side of the county, on the North shore of Lake Erie. It is just off this shore that the well known "Put-in-Bay" Islands are situated, which are noted for their beautiful scenery, fruitful vines and handsome summer resorts. Pleasure boats ply between this point and Detroit during the summer months, and the climate throughout the year is exhilarating, healthful and enjoyable.

The outlets for the products of this county are numerous. Windsor, the largest town, is situated on the Detroit River, directly opposite the City of Detroit, and affords ample means for shipment by either water or rail.

The Canadian terminus of the Great Western Railway reaches this place, and lines of steamers ply between there and all points on the lakes, both East and West. The Montreal water communication tends greatly to reduce the rates for freight by rail.

The Canadian terminus of the Canada Southern Railway is situated near the Town of Amherstburg, on the Detroit River. A bridge connects "Grosse Isle" with the American mainland and the Canadian channel, which is the principal shipping thoroughfare, is traversed by large railroad steamers for the transport of trains, thus connecting the Canadian and American branches of the line and avoiding the necessity of reshipment, so that the through passengers may cross the river without leaving the carriages in which they have taken passage.

The Canada Southern Railway before mentioned is a comparatively new line, but has already done much for both Essex and Kent.

The Village of Essex Centre, which as its name denotes, is situated about the middle of the county from which it derives its name, is at the intersection of the Canada Southern with the Talbot Road. This is a thriving place and daily growing of more importance. Large consignments of grain, pork, and other products are readily bought up at this market and shipped per Canada Southern.

From this point a new road or spur of the Canada Southern is projected to give direct communication with the City of Detroit to the West, and the Village of Leamington to the East. This proposed line will be the means of materially increasing the capacity and popularity of the C. S. R. and be of great benefit to Essex Centre, which will in a few

years, without doubt, prove a formidable rival to many now much larger towns.

A few miles West of this place is springing up a settlement in the centre of Colchester woods. There are two large sawmills and a large quantity of charcoal kilns, and the combined operations of these two industries will in a short time clear the wooded land and prepare it for the incoming settler, besides giving those in the locality a good market for all kinds of timber. This charcoal is principally shipped West to the Wyandotte Iron Works, which are also supplied to a considerable extent with Canadian iron, taken from the Madoc Mines, in the County of Hastings, and shipped by rail from Belleville.

There are some deposits of iron in this county, in the Township of Gosfield, which at one time were yielding in paying quantities and shipped by water to Cleveland. These beds have not, however, been worked for some time, but under the present protection of industries will doubtless again revive.

Leamington, Kingsville and Wheatly are villages situated in the Southern part of the county, and although they have no railway connection, are in close proximity to Lake Erie, and have docks where timber cordwood, apples, grain, &c. are easily disposed of, and, during the seasons of navigation, steamers, passing between Detroit and Eastern ports, are continually touching at these points and contribute to the general traffic and business of the County,

COUNTY OF KENT.

Chatham is the principal town of this County, contains a population of nearly 10,000 inhabitants; is situated on the River Thames, and about the middle of the county. The Great Western Railway passes through it on the Southerly side, and leading roads here converge, bringing together on the market days, of which there are two in each week, a great number of farmers from all sections of this county, and even the inhabitants of those adjoining have often constrained to wend their way thither, where they know can be found purchasers ready to pay the highest cash prices for produce and all articles of trade.

The River Thames is of great importance to Chatham from a mercantile point of view, lines of boats running regularly during the summer months to and from Montreal, touching at all important intermediate ports. Daily trips are made to Detroit, where considerable cordwood is disposed of. Great quantities of pine shingles, lumber, salt, &c. are brought in by water from the Collingwood district and the upper lakes. It might be well here to mention that since the first edition of this synopsis there have been erected two large and convenient grain elevators on the banks of the Thames. The gas mains are being extended to the extreme limits of the town. A large, new station house has been erected at the G. W. R. Depot. The proposed Erie and Huron Railway has been graded and prepared for the ties and iron. Two large banks have been built and many new stores erected. The telephone is in communication with all the principal business places. A Company have formed for the purpose of heating the town by steam under the holly

system. The town have secured a new park and intend beautifying it during the coming season, and connect it with King street by a suspension bridge across McGregor's Creek, and thus give the town a pleasant place of resort during the hot summer days; and while I write a deputation are calling upon the Government with a view to the erection of a new Post Office and other public buildings. A company have formed and applied for a Charter for the construction of a street railway and connect the Great Western, Erie and Huron Depots and the main business localities. The Great Western Railway propose to run a branch road to the river and thence along the wharfs, giving even more shipping facilities to the merchants and grain and pork dealers as well as the farmer, who must be benefitted by the convenience thus afforded to forming immediate connection with the Eastern markets. The old projected scheme of connecting Lake St. Clair and Erie by a canal has been revived, a company formed and a charter applied for; the location of this great work will be a direct line from about the mouth of the Thames on Lake St. Clair, to Two Creeks Harbor on Lake Erie, the entire distance being only about 14 miles.

Dresden is a very thriving Village on the River Sydenham, situated about 15 miles in a Northerly direction from Chatham. Here the soil South of the river is slightly mixed with sand, and that North is principally clay, and is one of the finest producers of Fall wheat and timothy. Immense quantities of cordwood are annually shipped from all points along the river, principally to the American market, besides staves, hoops, square timber, spokes, and many other species of manufactured timber, saw logs, etc.

COUNTY OF LAMBTON.

This is the most Northerly county of this district, and borders on Lake Huron.

The land on the Southern portion is generally level, and heavily timbered with all kinds of both hard and soft wood. The North branch of the Sydenham is of great value as an outlet to this section. Rafts are sent down this stream, which is navigable for flat-bottomed boats as far as Wilkesport. The townships of Sombra, Dawn and Euphemia have a clay soil, and are being rapidly well drained and brought under cultivation. There are large tracts of wild lands here for sale at reasonable rates, within short distances of Dresden and Wallaceburg, in Kent, and other Villages in this County.

The townships of Moore, Enniskillen and Brooke are more unsettled, but contain good clay land also heavily timbered, and in many districts undergoing a thorough system of drainage.

The Air Line Branch of the Canada Southern runs through these townships, and is opening up a large tract for settlement. Great quantities of black ash are made into hoops, elm into staves, bolts, etc., and other timber affords a ready sale.

Enniskillen is the great oil district of Lambton, and contains the villages of Petrolia, Oil Springs, Oil City, etc.; a branch of the G. W. R.

connects Petrolia with the main line of the Sarnia Branch of the G.W.R. at Wyoming. The northern townships of this County are more settled than those previously described, and contain some very fine farms, the soil being sandy, clay loam, and gravelly.

THE SCOTCH FARMERS IN CANADA.

(From the "Chatham Banner.")

We are indebted to C. G. Charteris, Esq., for a copy of a Dumfries paper, containing a full report of the speech of Mr. Robert W. Gordon, one of the Scotch Tenant Farmers who visited our County in October, 1880. Mr. Gordon's report to his friends in Dumfries is very full, and contains much information—in this respect being the best we have seen. We make a few extracts:—

"From London we passed through Bothwell to Chatham, then along Lake Erie shore to Blenheim and Thamesville, and thence to Ingersoll. Soil of almost any quality can be got on this route, from forest lands at £2, to magnificent deep clay and sand loams worth from £15 to £25 per acre. The Indian corn grows here luxuriantly, yielding from 50 to 60 bushels per acre. Fall (or autumn) wheat, clover for seed, and roots are the principal crops. The farmers are making experiments in growing sugar beet, which if successful will return them £40 per acre. They are promised by a company £1 per ton for the roots delivered at drying kilns erected from five to ten miles apart. The pulp when dried is forwarded to the sugar factory; and as they estimate they can grow on this land from 40 to 50 tons per acre, the success of the experiment is looked for anxiously. Orchards are also a feature of this district, particularly along Lake Erie shore. Making Ingersoll and Woodstock our headquarters, we drove to Paris, Brantford, East Zorra, Norwich, Durham and Simcoe. *This is a great dairy district*, the cows being almost entirely of the native breed, although some have a dash of shorthorn in them. Well-managed cheese factories stud the district, which collect the milk night and morning with their own carts. They are owned generally by a company of the farmers themselves, who put in a manager and remunerate him either in cheese or a percentage on the year's sales in money. The expenses are deducted at balancing time, and each farmer gets an equivalent of money in proportion to the quantity of milk he supplied to the factory. In this way a much more uniform make for the whole district is secured, and consequently a higher price. One factory was making one ton per day, and another 15 cwt. Unfortunately some of the managers had sold their season's make of cheese at 3½d. per pound, a very unremunerative price, but before we left it had risen to 5½d. This will encourage dealers to give a good price for next season's make. *Fruit is grown here also in abundance*; the soil is very variable and suited to all kinds of crops. We came across an Osage orange fence when near Lake Erie, which grows so close so quickly, and is of such a prickly nature, that all further difficulty in the matter of permanent

fencing seems to be at an end. The fencing question would have been a difficult one to solve in a few years, as wood is getting in some places scarce and dear. There are no stones, at least you can travel miles without seeing one; and our white thorn will not grow. * * *

"The school system of Canada is founded on this basis:—All public schools are free and are managed by school trustees elected by rate-payers in each school district and the funds are raised by rating the inhabitants of these districts. In Manitoba a school rate will be long in being required, as the Government have set aside a large quantity of land to be sold solely for the purposes of education, so that education in the public schools there will, for many years, be absolutely free. In the other Provinces, in country districts, the rate is very light, and as the election of trustees is periodical, and entirely in the hands of the people themselves, there is little likelihood of it becoming burdensome. In Ontario the number of public schools is very noticeable, and the teaching very efficient; in Quebec they are more widely scattered; while in Manitoba there are few as yet, although there is, as in the other Provinces, a perfect system of education in operation. All the principal cities in the Dominion have also numerous high class schools, in which a capital education may be had, and at a less cost than at home. It may not be out of place to remark here that Canada, and especially the smaller cities in the Province of Ontario, is a good country to which people with families and limited incomes might emigrate. They would have the advantage of good and cheap schools, their cost of living would be much less, and they could invest their money to greater advantage than in this country. Seven to nine per cent., according to the ability of the lender, can be made with perfect security, and it is estimated that a family spending £300 a year at home can live well there for £200. There is also a wider field in which to start young people in the world. Canada is a country in which no one says he cannot work, but where everyone says "To beg I am ashamed." Perhaps this is the reason there is not a poor house in the Dominion.

"Thanks to the Canadians, our visit to Canada was rendered more enjoyable on account of the kindness and courtesy we received from all ranks of society there. The Canadians are frank, enlightened, high-spirited, and specially hospitable people, and vied with each other in their solicitude to do us a service. Our thanks are due in a very high degree to one and all with whom we came in contact. At the same time I would dispossess them of the idea that was expressed by one gentleman at a public meeting, at which I was present, that we on this side of the Atlantic are the cold, inhospitable people he then pictured, but would remind them that although perhaps of a more reserved and less impulsive nature, our hearts are none the less warm, nor our hands the less ready to welcome the stranger who visits our shores.

THE PROVINCES COMPARED.

"I now come to the important questions—Is Canada the place to emigrate to? and if so, which of her Provinces is the most desirable? The first question I will answer in the affirmative, (1) because of its

boundless extent of cheap and at the same time fertile lands; (2) because of its proximity to our own country, and therefore to the best market in the world; (3) because of the similarity of the people to ourselves, and (4) because of its loyal allegiance to the British flag. The second I will leave you to decide for yourselves after pointing out shortly the advantages and disadvantages of each Province as I was able to discover them. The capital required varies of course according to the system adopted and the district chosen, and may be roughly estimated at from £3 to £30 an acre. This includes the first cost of the land. After that, of course, there is no rent to pay. Land, however, can be bought to be paid for in a certain number of years, with interest on the unpaid portion. In this case less capital is required, but this leaves a yearly burden in the shape of interest, which virtually forms a rent for a limited time. * * *

From all I could learn a farm can be worked cheaper than in this country, for although wages are higher, fewer hands are required. Labor may be estimated when all paid for at 10s. to 15s. per acre. For every £100 invested in land the total taxes payable do not exceed 15s.—It will be understood that as nearly all farms are owned and occupied by the same parties, this tax is equivalent to both landlord's and tenant's taxes in this country. * *

In Quebec (when I speak of this Province I mean the Eastern Townships) you have the advantage of being near the seaboard, consequently the freights to the European market is low. You require less capital than in Ontario, as land of the same quality is cheaper; the wages are lower; water is in better supply naturally; and permanent pasturage is found to answer. On the other hand, Ontario can furnish a greater choice of more valuable land; roads are better; schools more numerous; *winter is shorter*, and the people generally are more like ourselves. This arises from the absence in a great measure of a foreign element as compared with Quebec. * * *

"Then gentlemen, if any of you can make up your minds to leave the shores of your native land to find a home on Canadian soil—if you can make up your minds to face the inconveniences and hardships I have endeavored to portray—and if you come to the conclusion from these remarks of mine, and from information you have gathered or can gather, that you can better your position by going there, I may tell you that you will go to reside among a people in whose veins runs the blood of your own ancestors—a people strong in the hope that a great destiny awaits their country—a people peaceable and law abiding—a people of like aspirations with yourselves in social and intellectual life, who will extend to you the right hand of fellowship with a vigor and an earnestness which will almost cause you to blush."

THE AGRICULTURAL COMMISSION.

**They Enquire what Essex and Kent can do in Cereals, Stock
Fruit and Tobacco.—Extract of the Evidence.
A Drive into the Country Thursday.**

(From the "Chatham Weekly Planet" of July 22nd.)

The Ontario Agricultural Commission opened its enquiry at the Town Hall, Chatham, on Thursday, July 22d, 1880, at 10 a. m. The members of the Commission present at the beginning of the examination were A. H. Dymond and W. E. Saunders, Esqs, accompanied by Mr. McCraney, M. P., for Bothwell.

Mr. Stephen White, of Charing Cross, a gentlemen well known as one of large experience in general husbandry, was first called. A summary of his evidence is as follows:

Mr. White said he had for a number of years grown the Scott variety of fall wheat, but lately had given more attention to the Clawson and Fultze, a "blue stem." Thirty and forty bushels to the acre was no uncommon yield in this locality, he himself having got that average from a field sown seven successive seasons. The cost of raising wheat is about \$16 per acre. The average yield in Canada during the past few years would probably be twenty bushels per acre, while Kent's average would be at least thirty, with a few exceptions caused by careless cultivation. Barley cost \$14.50 per acre, but it was not grown so largely now as it was some years ago, when prices were better. Wheat culture has largely taken its place. The average yield of barley is 35 bushels per acre, for which 55c. was received. Oats are not grown in any quantity, being less profitable than barley. Rye and peas are not grown of late years, the latter on account of the presence in large numbers of bugs. Corn is grown for feeding purposes alone, the average being thirty-five bushels of shelled grain to the acre, and selling for 40c. As high as fifty bushels have been raised after careful preparation. Potatoes are largely grown, the Early Rose being perhaps the favorite for winter use.

Mr. J. C. Toll said: I have a vineyard of one acre, and cultivate the Concord, Delaware and Clinton varieties. Concord yield three tons per acre, and brings five and six cents per pound. Along the lake grapes do not suffer at all from frost. The Catawba will not ripen here. Winter apples are extensively grown, the Rhode Island Greening being the favorite on account of its bearing earlier than other varieties, such as the Northern Spy. Our apples bring \$1.25 per barrel on an average.

Mr. Westland said: He lived in the Township of Howard, five miles from Lake Erie, and had had a long experience in Horticulture; had been in this district about thirty years; was acquainted with the culture of all the fruits commonly grown in this district. Apples, peaches, and plums grew here in the proportion of 95 per cent., 5 per cent., and 4 per cent. respectively; the land occupied by small fruits is about 1-400 part; the apples grown are chiefly of the winter sort; sandy loam is the

poorest soil for fruit growing; the varieties of early apples most raised are the Pippin, Oldenburg and the Alexander; the early apples are nearly all locally consumed; the apples most profitable to raise here are the St. Lawrence, Fall Pippin and Rhode Island Greening. Pears are grown successfully here; clay loam is the best soil; about 50 per cent. of the trees grown are now in full bearing in this section; the varieties most extensively grown are the Bartlett, Clapp's Favorite (summer), Flemish Beauty and Sickle (winter); the summer varieties should be picked early; Clapp's Favorite shows decay if left on the tree to ripen; the standard varieties are preferred to the dwarf; the pears are all locally consumed; the average price is \$1.50 per bushel. Peaches are very generally grown here; there has not been much winter-killing of trees in this section; good crops have been gathered of late years; the varieties of early peaches chiefly grown are the Alexander, Hale's Early and the Early Kennedy; there are large shipments of this fruit, and the price usually got is from \$1 to \$2 per bushel. Cherries are grown profitably here; the chief variety grown being the common Kentish cherry. A few quinces are grown here; it is cultivated chiefly by amateurs; there is a local demand for all grown; think it could be more extensively cultivated with decided profit here. Grapes are extensively grown in this section; the Delaware and Concord are the chief varieties a good deal of wine is made; grape culture is profitable, and could be extended with profit. Strawberries are now largely cultivated; the varieties most esteemed are the Monarch of the West and the Wilson; the average growth per acre is 200 bushels; the price is from 8c. to 15c. per quart; the fruit does not suffer seriously from insects. Raspberries and Blackberries are not cultivated to any great extent; the wild berry is becoming scarce and the cultivation is therefore increasing somewhat. The white and red Currant is largely cultivated, and their growth is profitable; the bushes are attacked by insects, but these are successfully fought; the growth of small fruits is increasing in this section. Bees are very generally kept in this section, but nobody makes a specialty of bee culture; honey finds a good market here; do not consider myself competent to speak fully on bee culture.

Mr. J. P. McKinley, of Howard, was next examined on the question of tobacco culture. He had cultivated tobacco to some extent, but not lately; during the American war it was a very profitable crop, but the government restrictions of late years had stopped its cultivation; if it were not for these restrictions it would be cultivated very generally again; it is an exhausting crop, but could be changed about in a new country; its cultivation prepared the land well for wheat; the tobacco worm was a serious pest, but could be easily fought; it is not a fickle crop, more than other crops now cultivated; if raised here now it would have all the Canadian market.

Mr. Edwin Cady, of Kingsville, Essex County, said: I am a pruner and grafter; about ten per cent. of all our fruit trees are apples; apples bear in ten years after planting from the nursery, and about fourteen years after budding; we ship about 10,000 barrels from the South Riding; about three-fourths of our apples are of the winter varieties; ap-

ple trees should not be planted too close, as sun and air exercise a great influence on them; plant from thirty-five to forty feet apart; we have shipped to Chicago, and last year some to Omaha, realizing about \$1.20 per barrel. About ten years ago peach growing was gone into extensively, but since then it fell off, and it is now becoming prosperous again. Rhode Island Greening, Peck's Pleasant, Northern Spy, Russet, Spitzenburg and Bouraseau are the winter apples most in demand.

Mr. J. P. McKinlay, of Howard Township, in continuation of his evidence of previous day, said: Beans are grown largely in my district; it is the most favorable part of Canada for their growth; the bean succeeds best on a good sandy loam, with a clay sub-soil; We plow in the Fall, harrow in the Spring, and cultivate well until the 5th or 10th of June, when we plant; we have grown chiefly the medium white bean; they yield from twenty to forty-five bushels to the acre, and we get as an average \$1.25 per bushel; the cost of growing beans, per acre, is about \$14; our beans are exported chiefly to the United States; they thresh about the same as peas, and the straw after threshing is a most valuable food for sheep.

The next witness was Mr. J. C. Iler, of Essex, who said: Fall wheat is largely grown, the common preparation of the soil being to plow under the second crop of clover in July, work the ground well, and sow in September, from the 10th to the 20th; I estimate the average cost of raising wheat in our country at \$11 per acre; drills are used chiefly; on an average from 20 to 25 bushels are raised; good average farms can be purchased at \$40 per acre. Corn can be raised at about the same cost as wheat; we get about 50c. per bushel for corn. Pork raising, at 5c. per pound, pays very well; the best breed of hogs is a cross between the Essex and Berkshire breeds; farmers in Essex have on an average about 40 hogs, fattening 20 and keeping 20 over; we grow the Yellow Dent variety of corn chiefly; there is a small packing industry in Windsor; it might be carried on with profit more extensively in Essex. The average price of wild land is about \$16 per acre. Two imported Stallions from France are owned in Essex, and cost \$2,000 each.

The Commission adjourned till two o'clock. The first witness examined in the afternoon was Mr. Girardeau, Public School Inspector, of Essex. He said: My vineyard, near Sandwich, comprises about 1½ acres; Concord is the variety I prefer for wine; I have grown four and five tons per acre; an acre of grapes will produce five or six hundred gallons of wine, selling at \$1 per gallon. I came from France, and am well acquainted with grape growing there, and think we can surpass them; we can give a good wine quite as cheap as an equal quality of French wine; I put one pound of white sugar to a gallon of wine; in the wine I have here the percentage of alcohol is about 10 per cent: I believe that a man could make more money by making wine in a proper manner off two acres than he could off a hundred acre farm; I generally prune in the winter, long before the sap begins to flow; I next tie up the limbs; five or six buds may be left on the year's growth of a healthy limb, and less on poorer ones; when the fruit is formed I prune, leaving only two buds above the bunch of fruit. The witness clearly explained

his method of making native wine, which was interesting and instructive. The cost of starting a two-acre vineyard is about \$400.

Mr. James Dougall, a nurseryman of Windsor, exhibited before the Commission handsome specimens of ripe plums, a French variety, and Alexander and Amsden June peaches. Mr. D. B. Rorison, of Windsor, exhibited fine grapes, plums and pears. Some good peaches were shown by Mr. A. Elliott, of Colchester; and specimens of native wine by Mr. Girardeau.

Mr. McGregor, ex-M. P., of Essex, was next examined. He said: There is a large surplus exportation of wheat, amounting to about 500,000 bushels; we sell about 100,000 bushels of corn to distilleries; corn is fed largely to hogs, from which we realize \$400,000; the Goderich salt is used in packing pork; we have 25 saw mills cutting hard wood grown in this County; the lumber and wood sold amounts in value to \$500,000 per year; our mills employ a large number of men. Another industry starting up is charcoal burning; we have about 30 kilns, burning about 600 cords per week. We have a class of French people among us, called *habitans*, who carry on many valuable industries; their women make straw plait for hats, amounting in value to \$10,000 per year; they knit woollen socks to the value of \$5,000 per annum; vegetables are grown along the river and lake, and sold to the amount of \$4,000; we take about \$60,000 a year for fish caught in the Detroit river; we cultivate very largely of sorghum, making 300 gallons of syrup to the acre, which sells at 40c. per gallon, and costs about 12c. per gallon to manufacture; we grow broom corn and make all our own brooms. There are hundreds of Americans purchasing Canadian horses; he had shipped to Manitoba 300 or 400 horses this season, and he thought that 1,000 horses shipped to the North-west this year.

Mr. Alonzo Elliott, of Colchester, Essex, was examined concerning mixed husbandry. He said: The soil in our Township is chiefly high, and was formerly wooded; corn and wheat are our chief grain crops, the former having taken the place of peas; our rotation of crops is clover, corn and wheat.

Mr. W. McCain, of Gosfield, was the next witness, and said: Nearly the whole township has been reclaimed or greatly benefitted by drainage, done under the Municipal Drainage Act; land now worth \$50 per acre was sold for 50c. per acre before drainage. Corn and wheat grow well on reclaimed marshes; wheat has been grown as the first crop with good results. The system of plowing down clover is practised for manuring. Fifty bushels of corn to the acre is an average yield; stacks and grain are valued at \$30 an acre.

Mr. James McFarlane, Reeve of the Township of Dover, next testified.

Mr. James Smith, of Harwich Township, gave evidence relative to stock dealing, pasturing and fattening. For shipping we can purchase good cattle at from \$25 to \$30 in large numbers in the early Spring, then feed for a time about the barns and pasture through the summer; I rent 500 acres of pasture at about \$3 per acre for this purpose; at the beginning of winter the cattle are shut in and fed until February, or

sometimes later; the winter feeding costs about \$4.50 per month, hence our cattle, up to February, cost about \$48; they should then weigh about 1,350 pounds and sell for \$60, or over; we feed ten quarts of corn meal per day, to each animal, and ten pounds of hay; we have used oil cake, with good results. The fat cattle thus sold average about four years of age.

Mr. T. L. Pardo, of Buckhorn, Kent, President of the West Kent Agricultural Society, was next examined in relation to raising stock for fattening. We keep a thoroughbred Durham bull at all times, getting a fresh one every three years; the best way of raising calves is to keep them in a grassy enclosure, and let the cows to them twice a day to suck the milk during the summer. (Little butter and less cheese is made in this part of Kent.) During the first winter calves should receive the best of treatment; during the winter of the third year the cattle are fattened; at the beginning of winter such cattle should weigh 1,200 or 1,400 pounds, and when fat from 1,500 to 1,800 pounds; I do not feed more than seven quarts of meal per day. Witness then explained his method of growing fall wheat, of which his yield this year was thirty-five bushels per acre.

Mr. W. Mackenzie Ross, of Harwich, next gave evidence, based on ten years' experience in fruit. He has in his garden near Chatham 3,000 or 4,000 apple trees, 2,000 pears, 100 plums, also a number of peaches, plums, figs, etc.; he also grows as well pea-nuts, sweet potatoes, etc.; of potatoes he grows sixty varieties, a new one, the Alpha, being especially good—thirteen and a half bushels having been raised from 15 pounds.

The work of the Commission was then brought to a close. The prominent men of Chatham and the County furnished the Commission with every convenience, and exhibited deep interest in the proceedings throughout, as being of the utmost importance to the district.

Town and Village Property.

TOWN OF CHATHAM.

No. 76. 32 x 100 FEET.—Part Lot 74, South of King Street; frame dwelling, 17 x 22, $\frac{1}{2}$ storey, with kitchen in rear 12 x 20; also addition 10 x 21. Price, \$1,400.

No. 216. 8 ACRES.—Victoria Avenue; well fenced and in meadow. Price, \$2,500.

No. 61. Lot 5, on Richmond Street; 208 acres cleared; frame house, board fence, well planted with fruit and ornamental trees. \$900.

No. 290. Part Lot 17 (North half of North half) Victoria Avenue; frame house about 18 x 26, with additions, pump in house, with pipes, filter, &c.; good bearing orchard, with every kind of fruit suitable to this climate. Price, \$2,600.

No. 300. Lots 20, 21 and 22 on Thames Street; contains a 2-storey frame house. Price, \$3,500.

No. 295. Lot 55, on corner of Water and Adelaide streets; stone house, $1\frac{1}{2}$ storey, with tin roof; brick addition, two stories and basement, with cistern and well in cellar. Price, \$6,000.

No. 294. Lot 54, containing 1 acre, corner of Water and Adelaide Streets, fronting on the river; a good orchard with variety of fruit. Price, \$1,200.

\$6,000. Part of Park Lot, south of Park Avenue. Good house, stable and orchard.

CHEAP. Splendid Hotel property in Chatham North, at foot of Third Street Bridge, well situated.

CHEAP. Ashery on river bank, with wharf and brick building.

\$400. Lots 8, 9 and 12 on Kendall Street; near G. W. R. Station.

\$400. Lot 2, on Victoria Avenue,—ornamental trees planted

\$3,000. Part of Lot 115 on King Street, with a river frontage, containing good building and wharf.

\$5,000. Part of Lot 33, corner of King and Princess Streets, 82 feet frontage on King and 200 on Princess; contains 1 three-storey brick store and 2 frame dwellings.

\$500. Part of Lot 58 on King Street, 52 by 104 feet; no buildings.

\$500. Large frame house, situated on leased land with 13 years to run; within ten minutes' walk of the Post Office and in a quiet neighborhood; would make a first-rate boarding house; corner of Church and Gaol Streets.

\$800. Part of Lot 26, corner of Adelaide and Kirk Streets; contains storey-and-a-half frame dwelling.

\$175. Each for two Lots in the Orr survey; no buildings.

\$3,000. Lots 7 and 8 in Block R, corner of Victoria Avenue and Forest Street; contains a good frame dwelling and stable.

\$2,000. Large frame house and lot, well situated for a grocery or boarding house. Cheap.

\$180. S. W. half Lots 6 and 7, in sub-division Park Lot 14, Chatham North.

\$200. Each for Lots 47 and 48 in Block B, north side of Water Street.

\$500. Parts 1 and 2, north side Harvey Street, 50 by 102 feet; good frame storey-and-a-half house, containing 7 rooms.

VILLAGE OF DRESDEN.

- \$500. Lot 18 on Queen Street; contains two-storey frame house.
 \$400. Lot 22 on Queen Street; contains a frame stable.
 \$400. Lot 31 on Lindsley Street; vacant.
 \$3,500. Part of Lots 12 and 13, corner of Water and Main Streets; contains two-storey frame store; also, frame warehouse on River Sydenham.

OIL LOTS FOR SALE.

Lot 12 in Range C; a sub-division of the W $\frac{1}{2}$ Lot 18, in 2nd Concession, in the Village of Oil Springs.

E $\frac{1}{2}$ Lot 10; a sub-division of N $\frac{1}{2}$ of E $\frac{1}{2}$ 18, in the 2nd Concession of the Village of Enniskillen.

N $\frac{1}{2}$ 23, N $\frac{1}{2}$ 24; sub-divisions of N $\frac{1}{2}$ of E $\frac{1}{2}$ 18, in 2nd Concession in the Village of Oil Springs.

Lots 12 and 13 on South side Paget Street, in the Village of Cornwall, in the Township of Moore.

Lots 19 and 20, sub-divisions of the W half 20, 1st Concession, Enniskillen.

Lot 14, in Range 9; sub-division of lot 18, in 1st Concession, Enniskillen.

OIL SPRINGS.—W half of E half Lot 19, in 3rd Concession, Enniskillen; oil wells adjacent to this Lot.

PETROLIA OIL LANDS.

Lots 3, 5, 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, 33, 35, 37, 39, and Lots lettered A D and G H of sub-division of E half Lot 13, 12th Concession. Enniskillen contains twelve Oil Wells, five of which are now working. Price, \$30,000.

Part 14, in 9th Concession, Enniskillen; 70 acres; productive wells on all sides of this Lot. Price \$

Part N half 14, 12th Concession, Enniskillen, sub-section No. 7; 10 acres.

IMPROVED FARMS.

TOWNSHIP OF ALDBOROUGH.

No. 184. 75 ACRES.—North part broken front Lot 10 on the River Thames; 45 acres cleared and remainder in sugar bush; excellent frame barn, no house; soil, clay loam; two miles West of Wardsville. Price, \$2,600.

GORE OF CAMDEN.

No. 114. 50 ACRES.—North West $\frac{1}{2}$ Lot 2, in 3rd Concession; thirty-five acres are cleared; buildings on it are log house and stable; soil is sandy and clay loam, well drained; about one mile to school, 6 miles from Thamesville, 12 miles from Chatham, 6 miles from Dresden, 2 miles from Kent Bridge. Price, \$1,200.

No. 271. 40 ACRES.—Part of North $\frac{1}{2}$ Lot 10, in 8th Concession; East 40 acres of North $\frac{1}{2}$ nearly all cleared. Price, \$1,600.

TOWNSHIP OF CHATHAM.

No. 307. 50 ACRES.—Northerly part of Lot 3, in Front Concession; 12 acres cleared; 2 log houses; within half mile from town limits. Price, \$5,000.

No. 20. 71 $\frac{1}{2}$ ACRES.—Rear part of Lot 6, Front Concession; 18 acres cleared; no buildings; within 3 miles of Chatham. Price, \$50 per acre.

No. 79. 15 ACRES.—Lot 1 in Front Concession; all the land cleared; frame house, frame barn, root house; contains a good young bearing orchard, grapevines, strawberries, and other small fruits, and some fine ornamental trees; plank road in front of lot. Price, \$2,500.

No. 118. 50 ACRES.—South East $\frac{1}{2}$ of Lot 4, in 3rd Concession; thirty-five acres are under plough, five acres uncleared. The buildings are: log house and stable, frame granary; has an orchard of 100 apple trees; good water; 2 $\frac{1}{2}$ miles from Chatham, school $\frac{3}{4}$ mile; soil, clay loam and sandy; good road along the front, and a drain. Price, \$2,000.

No. 136. 120 ACRES.—West part Lot 5, in 3rd Concession; about 120 acres cultivated, 70 nearly ready for cultivation; log house, about 18 x 28, and frame stable; two orchards containing in all about 225 fruit trees; soil is sandy and clay loam; the remainder well timbered. Price, \$4,000.

No. 161. 110 ACRES.—North East $\frac{1}{2}$ Lot 6, in 4th Concession; 100 acres of this land is in wood, 75 to 80 acres cleared; frame 1 $\frac{1}{2}$ storey house, frame barn 30 x 32, frame shed, stable and granary 18 x 24; soil, clay loam; about 40 trees in orchard, all bearing; good water, never fails; all under fence. Price \$7,000.

No. 269. 32 ACRES.—North East part Lot 22, in 4th Concession; ten acres cleared; new frame house. Price, \$1,000.

No. 14. 100 ACRES.—South West $\frac{1}{2}$ Lot 5, in 5th Concession; six acres cleared, no buildings; soil, clay loam; timber soft; would take town property in exchange. Price, \$1,750.

No. 162. 100 ACRES.—South East $\frac{1}{2}$ Lot 6, in 5th Concession; 60 acres cleared; frame barn, 30 x 45; orchard of 30 or 40 trees, pears, apples and cherries; soil, clay loam; 5 miles from Chatham; timber principally hard wood; good water. Price, \$5,500.

TOWNSHIP OF CHATHAM (CONTINUED.)

- No. 91. 108 ACRES.—South East $\frac{1}{2}$ Lot 19, in 5th Concession; about 60 or nearly 70 acres cleared; new log house and kitchen, log barn and frame granary; soil is clay loam and sandy; nearly 28 acres in fall wheat; a few fruit trees; situate on Lindsay Road, and about 8 miles from Chatham or 7 miles from Dreaden. Price, \$3,400.
- No. 94. 50 or 53 ACRES.—South West $\frac{1}{2}$ of Lot 22, in 5th Concession; 16 acres cleared, and about 12 fenced; soil, sandy and clay loam; timber, beech, maple, elm, black ash, &c.; about 3 miles from Louisville. Price, \$1,000.
- No. 113. 100 ACRES.—South West $\frac{1}{2}$ Lot 22, in 6th concession; 30 acres are cleared and 30 chopped, no buildings; a good orchard of 70 trees, young; soil is clay loam; good drain across centre of the lot, commencing on North end; about 4 miles from Louisville and 1 mile from School and Church. Price, \$2,500.
- No. 72. 100 ACRES.—North $\frac{1}{2}$ Lot 4, in 6th Concession; 60 acres cleared; Large frame house, two stories, stables, &c.; soil, clay loam, and well drained. Price, \$5,500.
- No. 156. 48 2-5 ACRES.—North West $\frac{1}{2}$ Lot 2, in 8th Concession; all cleared; 18 $\frac{1}{2}$ acres in wheat and looking well; remainder about ready for Spring crops; contains frame house 18 x 26 (pine), log stable, as well as a good orchard and two good wells. Price, \$2,300.
- No. 160. 60 ACRES.—South $\frac{1}{2}$ of North West $\frac{1}{2}$ Lot 2, in 9th Concession; 30 acres are under cultivation, 10 being partially cleared and the remaining 10 acres is bush; soil is clay loam; timber, hardwood; an orchard containing 30 trees. Price, \$2,250.
- No. 57. 52 ACRES.—North West $\frac{1}{2}$ of South West $\frac{1}{2}$ Lot 3, in 9th Concession; none cleared, no buildings; soil, clay loam and sandy; timber, Beech and Maple, (good for cordwood, &c.) Sycamore, Black Ash, Elm, Soft Maple, &c. Price, \$1,000.
- No. 17. 25 ACRES.—South East $\frac{1}{2}$ of South West $\frac{1}{2}$ of North East $\frac{1}{2}$ of Lot 3, in 9th Concession; nearly all cleared; log house and stable; clay soil; also a good orchard; timber, Beech, Maple, Oak and Bass. Price, \$1,000.
- No. 117. 100 ACRES.—South West $\frac{1}{2}$ Lot 3, in 9th Concession; 20 acres are cleared; it has a log house and stable, frame stable and drive shed; soil is clay loam and sandy; good Beech and Maple land, first-class cordwood timber and small orchard. Price, \$2,000.
- No. 164. 150 ACRES.—North $\frac{1}{2}$ and East $\frac{1}{2}$ of South $\frac{1}{2}$ Lot 5, in 9th Concession; no land cleared; well timbered with hard wood. Price, \$2,600.
- No. 111. 200 ACRES.—Lot 8, in 9th Concession; from 60 to 80 acres cleared; has a log house and frame barn; soil, clay loam and sandy. This lot can be divided as follows: the East $\frac{1}{2}$ without buildings, West $\frac{1}{2}$ with buildings. It has a good orchard of 50 trees on the West half. Price \$6,000
- No. 213. 100 ACRES.—North East $\frac{1}{2}$ Lot 9, in 9th concession; 30 acres cleared; buildings are of log. Price, \$2,200.
- No. 93. 50 ACRES.—South West 50 Lot 3, in 10th Concession; 11 acres slashed, no buildings, no improvements beyond the above slashing; the Sylvester Drain runs between Lots 3 and 4 Con. roads, both opened. Price, \$750.
- No. 277. Lot 4, in 11th Concession; 15 acres in timothy, 85 acres cleared and remainder timbered with Oak, White Ash, Elm, Black Ash, Maple, &c.; log stable; situated about 10 miles from Chatham; Little Bear Creek passes through, also a drain on South end and one on North end; soil, black loam, with clay loam sub-soil. Price, \$3,000, as follows: \$1000 down and balance on time at 6 per cent,

TOWNSHIP OF CHATHAM (CONTINUED.)

No. 78. 57 ACRES.—North East $\frac{1}{4}$ of Lot 16, in 12th Concession; 40 acres cleared; good frame house, log granary, and an orchard with 50 trees; soil, clay loam. Price, \$2,000.

No. 48. 100 ACRES.—East $\frac{1}{4}$ Lot 7, in 13th concession; 75 acres cleared; frame house 18 x 24, frame barn 30 x 54, 18 feet posts; soil, clay loam, very rich and easily cultivated; about 50 acres in the plain. Price, \$3,200.

No. 55. 100 ACRES.—South East $\frac{1}{4}$ Lot 13, in 13th Concession; 60 acres cleared; two log houses and stables; soil, clay loam and sandy; Elm, Black Ash, Beech and Maple; situated within 1 mile of School and about 4 miles from Dresden. Price, \$3,000.

No. 54. 100 ACRES.—South East $\frac{1}{4}$ Lot 2, in 15th Concession; 15 acres cleared; soil, good clay loam; Elm, Black Ash, Hickory, &c.; about 10 acres in crops, and well fenced. Price, \$2,000.

No. 211. 90 ACRES.—South West $\frac{1}{4}$ Lot 6, in 15th Concession. Price, \$2,400.

No. 88. 100 ACRES.—South East $\frac{1}{4}$ Lot 2, in 17th Concession; 80 acres (of plains) cleared; all fenced in. Price, \$1,500.

No. 128. 145 ACRES.—Lot 3, in 18th Concession; 40 acres under cultivation, 60 acres not broken up and about 45 acres in bush; frame house 16 x 24 (2 stories), frame barn 30 x 40, cribs and out-buildings; soil is clay loam; about $\frac{1}{2}$ mile from Wallaceburg; 16 miles from Chatham. Price, \$2,500.

GORE OF CHATHAM.

No. 122. 50 ACRES.—South West $\frac{1}{4}$ Lot 19, in 1st Concession; 30 acres are cleared, good dwelling, stables, &c.; soil is clay; well timbered; about 2 miles from Wallaceburg. Price, \$1,600.

No. 86. 50 ACRES.—North part of West part of Lot 22, in 1st Concession; 40 acres cleared; frame house, frame barn, frame drive-house, stable and granary, root-house and milk-house; it has about 200 bearing fruit trees; is within 30 rods of River Sydenham; timber, Elm, Oak, &c.; distance from Wallaceburg 3 miles. Price, \$3,000.

No. 121. 30 ACRES.—South East part of Lot 19, in the 2nd Concession; all of this land is cleared; frame dwelling, stable and sheds, granary; good orchard of all kinds of fruit, 5 years bearing. Price, \$2,100.

No. 38. 70 ACRES.—South parts of Lots A and B, in 4th Concession; 50 acres cleared; frame house, frame barn and out-buildings; good black soil; soft timber for rails and wood; small orchard; fronts on Chenal Bearte, about $2\frac{1}{2}$ miles from Port Lambton. Price, \$2,500.

No. 138. 75 ACRES.—North East pt of West $\frac{1}{4}$ and South $\frac{1}{4}$ of West $\frac{1}{4}$ Lot 6, in 4th Concession; 15 acres are cleared and 20 in plains; 3 miles from Wallaceburg and $1\frac{1}{2}$ miles from School. Price, \$12 per acre.

TOWNSHIP OF DAWN—LAMBTON.

No. 172. 50 ACRES.—South East $\frac{1}{4}$ Lot 17, in 3rd Concession; 5 acres are cleared; log house 19 x 25, log stable and granary; soil, clay loam and gravelly; good water; well timbered with Hickory, White Ash and Oak. Price, \$900.

No. 18. 100 ACRES.—North $\frac{1}{4}$ of Lot 28, in 14th Concession; 12 acres are cleared; log house and frame stable; clay soil; orchard good, with 40 trees; 5 miles from Florence; good roads. Price, \$1,600.

TOWNSHIP OF DOVER EAST.

No. 293. 200 ACRES.—East half 18, in Front Concession; 140 acres cleared; two houses, and barns, large cattle barn for feeding cattle, with water pipes in drainage, stone foundation. Price, \$17,000.

No. 292. 100 ACRES.—North half lot 19, in 2nd Concession; 40 acres cleared; good frame barn and two hewed log houses. Price, \$5,000.

No. 291. 100 ACRES.—South half 19, in 2nd Concession; 90 acres cleared; frame barn, stable and log house; orchard; 2½ miles from Chatham. Price, \$6,500.

No. 288. 200 ACRES.—Lot 7, in 6th Concession; 80 acres cleared; log house, frame barn 36 x 72, frame stable, &c. Price, \$5,200.

No. 15. 50 ACRES.—West ¼ of South ½ Lot 24, in 5th Concession; 35 acres cleared log house with frame kitchen, log stable, good orchard of about 30 trees; about 4 miles from Chatham, on a plank road. Price, \$2,500.

No. 171. 52 ACRES.—South East ¼ lot 13, in 6th Concessions; 27 acres cultivated and 13 more chopped; hewn log house 18 x 28 and log stable; soil is clay loam; orchard of about 60 Peach, Apple and Cherry trees. Price, \$1,800.

No. 28. 75 ACRES.—North West ½ of South West ½ and North West ¼ 7, North East ½ of Lot 6, in 8th Concession; from 40 to 50 acres cultivated; log house, stable, granary and corn crib; the remainder of the land is sandy and clay loam, and in pasture; there is no bush land; board fence on front; also contains good orchard; school near at hand. Price, \$2,000.

No. 137. 100 ACRES.—North west ½ Lot 19, in 8th Concession; sixty acres cleared; two good new log houses and stable, with minor buildings; soil, clay loam; 2 miles from Oungah and 8½ miles from Chatham; 33 acres under lease for five years for clearing, fencing and building; \$15 rent to be paid the last two years; first-class tenant. Price, \$2,975.

No. 286. 100 ACRES.—South East ¼ Lot 13, in 11th Concession; 60 acres are cleared; buildings are log house and granary; soil is clay loam; timber, Oak, Elm, Black Ash, &c.; about 2 miles from Mitchell's Bay. Price, \$1,800.

No. 96. 53 ACRES. Part of Lot 24, in 7th Concession; 45 acres are cleared; hewed log house (weather boarded) 20 x 24, frame barn 20 x 30. soil, clay loam; good orchard with 35 trees. Price, \$4,000.

TOWNSHIP OF EUPHEMIA.

No. 185. 35 ACRES.—Gore 16, in 11th Concession; 5 acres cleared; log house; soil, sandy. Price, \$420.

No. 257. 100 ACRES.—East ½ Lot 16, in 6th Concession; 70 acres cleared or under cultivation, remainder timbered with hard wood; log house and log stable; a creek running across the lot on County Line; two miles from Bothwell. Price, \$2,500.

HARWICH.

No. 301. 101 ACRES.—Part lot 12, in 3rd Concession from Thames; nearly all cleared; frame house, stable, sheds, &c. Price, \$5,000.

No. 280. 10 ACRES.—Part lot 6, and part lots 4 and 5, in 3rd Concession; all cleared; frame house. Price, \$1,500.

No. 214. 170 ACRES.—North part lot 24, in 3rd and 4th Concession, W. C. R.; nearly all cleared; frame house, barns, cattle sheds, &c.; good orchard; artesian well never fails; situated on Gravel road 5 miles from Chatham. Price, \$9,500.

TOWNSHIP OF HARWICH (CONTINUED.)
