# SWIMMING POOLS, SPAS/HOT TUBS AND ACCESSORIES FOR WORLD MARKETS

## Purpose of this Publication:

This publication is designed to acquaint foreign buyers with Canadian exporters of swimming pools, spas, hot tubs, saunas, and all accessory products. The directory is not intended to be a definitive listing of all Canadian swimming pool, spa, hot tub, sauna, and accessories manufacturers, although every effort has been made to include most Canadian exporters. The product information contained in the directory was provided by respondents to queries sent to all known manufacturers of these products in Canada.

**Message from CANSPA  
for Canadian Export Trade Directory  
"Swimming Pools, Spas/Hot Tubs  
and Accessories  
for World Markets"**

Increased incomes and leisure time have stimulated consumer demand for health, fitness, and recreational products. The Canadian Swimming Pool and Spa industry has responded to these opportunities with creative and dynamic product design and marketing strategies based on product diversification and technological innovation.

This industry is recognized as a supplier of durable products of the highest calibre, with imaginative designs. Canadian companies have been pioneers of "knockdown assembly," to permit easy and inexpensive shipment. They welcome new ideas and are always ready to adapt their products to meet varying world standards and conditions. Whether they be complete swimming pool kits, acrylic spas, innovative heating products, deck equipment, sauna kits, or the many associated accessories and maintenance materials, all products are designed for safety and quality.

The Canadian companies profiled in this Directory have been qualified as export ready. The manufacturers listed understand the importance of meeting customer requirements promptly and professionally, and have a strong commitment to quality and service. The Directory will be a valuable reference tool for decision makers around the world who require value and design second to none.

Canadian pool and spa manufactures are ready to meet whatever international standards are set for them.

**Canadian Spa & Pool Association**

---

### **How to Use This Directory:**

The search for foreign suppliers that are able to help your company can sometimes be a time consuming and difficult task. However, this directory has been designed to allow the reader to easily identify and research Canadian suppliers of products that are of interest.

### **Alphabetical Company Listings:**

The directory lists each exporting Canadian company in alphabetical order by name. Each listing includes the address, telephone number, telex or Fax number, a marketing contact, and a brief company profile of strength and products.

### **Product Categories and Directory:**

Many companies manufacture a broad range of products in the swimming pool, spa/hot tub and accessories field. Listings of product groups indicating Canadian companies that manufacture that product are in the back of the directory. For information on the company, refer back to the alphabetical company listings and profile.

## Acorn Pools Saunas & Spas Ltd.

325 Bay Street North  
Hamilton, Ontario  
Canada L8L 1M5  
Telephone: (416) 522-6854  
Main Export Contact:  
Norman Brunton, Sales Manager

Acorn Pools Saunas & Spas Ltd. was incorporated in 1979 as a family business with its head office in Hamilton, Ontario and a warehouse and manufacturing facility in Waterdown, Ontario. Acorn presently exports to companies in the United States on a direct account basis.

The company manufactures a quality line of clear cedar hot tubs, prefabricated sauna room kits and skirts for spas. The prefabricated sauna room kits are made of 2 inch  $\times$  6 inch (50mm  $\times$  150mm) double tongue and groove clear cedar and come with an enamelled aluminum corner support for easy assembly. With no nail or screw fasteners required for this assembly, two men can assemble a room in two to three hours. Sizes vary from 4 ft.  $\times$  5 ft. (1000mm  $\times$  1200mm) to 8 ft.  $\times$

10 ft. (2400mm  $\times$  3000mm) and in-between sizes if necessary. Acorn also manufactures hot tubs with or without liners, 5 ft. (1.5m) and 6 ft. (1.8m) diameter and 4 ft. (1.2m) deep. Hot tubs solve access problems of physically getting the item into the house, and they are nice and deep.

Acorn management, with more than 30 years of experience in woodworking, incorporated quality and unique easy assembly into all its products.

## Acrylica Inc.

600 Route Cameron  
Ste-Marie-de-Beauce, Quebec  
Canada G6E 1B2  
Telephone: (418) 387-4155  
Fax: (418) 387-3507  
Main Export Contact:  
Marie-France Poulin, General Manager

A relatively new company in the spa product market, Acrylica was incorporated in 1986 as a manufacturer of acrylic whirlpools and portable spas. Operating from 40 000 square feet in Ste-Marie-de-Beauce, Quebec, the company employs approximately 40 people.

One of the leading products for Acrylica is its "Liberte" model; this is a portable spa with dimensions of 80 inches (205 cm) in length, 45 inches (117 cm) in width and a depth of 28 inches (70 cm) which allow it to go through a conventional doorway. It is constructed of a high gloss acrylic sheet with fibreglass reinforcements. The styling includes two bench seats for adults, and a moulded child's seat which is also used as an inside step or arm rest.

The "Liberte" comes with six whirlpool jets, skimmer, suction drain, air controls and plumbed. Optional trim kits are available in polished chrome or brass.

Acrylica Inc. presently exports to the Northeastern United States through sales agents.

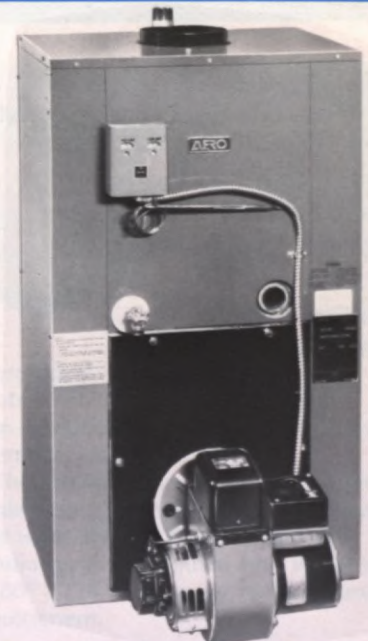

## Aero Environmental Limited

37 Hanna Avenue  
Toronto, Ontario  
Canada M6K 1X2  
Telephone: (416) 535-1600  
Telex: 06-217595  
Main Export Contact:  
Ian D. M. Brooker, Vice President

Aero Environmental Limited is a private Canadian manufacturer of flame retention oil burners, oil fired water heaters and oil fired swimming pool heaters.

The company produces two efficient oil fired swimming pool heaters. The model PH-600 which fires from 1.00 (4.51) to 1.50 (6.75)g(L)/hr. is capable of heating swimming pools up to 33 000 gallons (150 000 L) while the PH-1200 model, which fires from 1.75 gallons (7.88 L) to 2.50 gallons (11.25 L) per hour, can heat pools up to 60 000 gallons (270 000 L). By twinning or tripling the PH-1200, larger commercial pools can be heated.

All Aero pool heaters are equipped with F-AFC and HF-AFC high efficiency, flame retention oil burners.

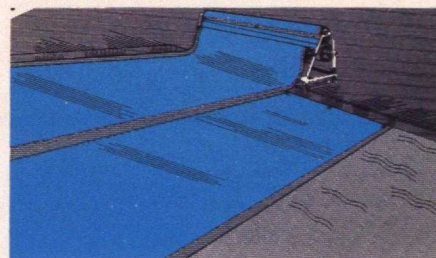

## American Fabricators Ltd.

1421 E. Pender Street  
Vancouver, British Columbia  
Canada V5L 1V7  
Telephone: (604) 253-8277  
Telex: 04-352848  
Main Export Contact:  
Joshua Kline, President

American Fabricators Ltd. was incorporated in 1977 primarily as a manufacturer of fabric products, including domestic pool covers, made from industrial textiles. In 1979, the company began to develop a woven fabric (polyethylene) closed cell foam material that it began using in pool cover production. Today, American Fabricators manufactures three sophisticated and unique foam cover materials for the swimming pool market.

Each material can meet a specific need in price and durability; from a single side lamination of woven material on the foam, to a double sided lamination, and the more expensive but durable heavy gauge woven material laminated to both sides of the foam. The American Fabricator

cover material has excellent insulative capabilities, is highly resistant to tears, and is not subject to ultra violet deterioration.

Through the incorporation of a wide sheet welding machine and an industrial sewing operation, American Fabricators supplies complete commercial pool covers to any size specifications. The material only is also available to cover fabricators.

## Aquaset Products

P.O. Box 960  
Elgin Street  
Colborne - Cramahe Industrial Park  
Colborne, Ontario  
Canada K0K 1S0  
Telephone: (416) 355-2364  
Fax: (416) 355-9931  
Main Export Contact:  
Graham Bishop,  
VP Marketing and Sales

Aquaset Products manufactures heat pumps for swimming pool applications at its Colborne, Ontario plant. Two low cost, energy efficient models are available that boast as much as 60 percent savings on gas and oil and 75 percent savings on electric resistance heaters.

The model A35 has a heating capacity of 35 000 BTU/hour working on a full load amperage of 12.0 Amps and is ideal for pools with a surface area of up to 512 square feet (155 square meters). The A50 model is a 50 000 BTU/hour unit that draws up to 16.5 Amps and is good for pools up to 800 square feet (245 square meters) in surface area.

All Aquaset models feature a durable fibreglass, weather resistant housing with dimensions of 25 inches (65 cm)

by 26 inches (65 cm) by 17 inches (42.5 cm).

The power source is an AC 208/230 Volt, 60 Hz-1 HP motor. Some unique Aquaset features, include a winterizing drain plug for easy winterizing, a re-set lamp button as a fail safe device designed to shut-down the compressor in the event of low water or power surges, and a Ful-Flo heat exchanger which eliminates back pressure problems and allows unimpeded use of automatic pool cleaning systems.

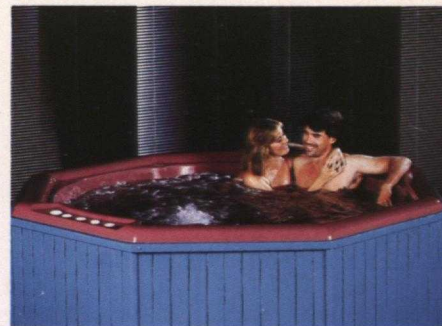

## Beachcomber Spas

A Division of the A J Group Incorporated  
13245 Comber Way  
Surrey, British Columbia  
Canada V3W 5V8  
Telephone: (604) 591-8611  
Fax: (604) 597-2853  
Main Export Contact:  
Keith Scott, President

Beachcomber Spas, established in 1984, have just opened their new 40 000 square foot facility with 40 employees, to produce their line of Beachcomber Acrylic Spas for world markets.

The product line, consisting of both portable and inground types, has over 17 models to choose from in varying shapes; the models come in a wide range of acrylic colours and patterns. Sizes range from a 2 seater up to and including commercial application units.

Beachcomber have invested in a computerized process that retains the maximum thickness of acrylic throughout the spa. All models are contoured for comfortable seating and channelled for air blowers. Optional features include spa lights, foam insulation, cedar skirts, whirlpool power

*One of the many spa designs complete with a painted cedar skirt from Beachcomber Spas.*

jet control and equipment packs. Completed models or shell programmes are available.

Beachcomber spas presently market direct to accounts in the United States.

## Bio-Lab Canada Ltd.

60 Howden Road  
Scarborough, Ontario  
Canada M1R 3E4  
Telephone: (416) 752-8008  
Fax: (416) 757-5604

Main Export Contact:  
R. Dean Christy, Ass't. Mktg. Manager

Bio-Lab Canada Ltd.'s facility covers over 30 000 square feet in Scarborough, Ontario. The company employs 35 persons at this facility, and 6 outside sales personnel. It presently exports to Australia and to Canadian facilities in China.

Bio-Lab Canada Ltd. manufactures a wide range of swimming pool and spa chemical maintenance products. The swimming pool products include a variety of compressed stabilized chlorine pucks and sticks. At present Bio-Lab has the only plant in Canada equipped for production of this wide range of chlorine products. Sizing of all chlorine products includes packaged retail containers and bulk. Bio-Lab Canada also manufactures a unique line of liquid algicides and specialty products. The company's three brand

lines of pool chemicals are: BioGuard, Omni and Swim Chem.

## Blue Shield Poly Laminating Inc.

187 Steelcase Rd. West  
Unit #8  
Markham, Ontario  
Canada L3R 2M4  
Telephone: (416) 474-0610  
Fax: (416) 475-7539  
Main Export Contact:  
Larry Dauncey, President

Blue Shield Poly Laminating Inc. employs six people in a plant of 6 000 square feet on over two acres of land in Gormley, Ontario. The company exports commercial thermal pool covers to the United States and to off-shore markets.

Blue Shield thermal covers have been manufactured in Canada since 1978. Ten years of research and development in the commercial field has resulted in the design of the Series 2000 cover, constructed of polyethylene foam sandwiched between a layer of thick polyethylene film and woven polyethylene fabric. The company's residential thermal covers are also of high quality and last in excess of 10 years.

For the removal of residential covers Blue Shield produce a manual,

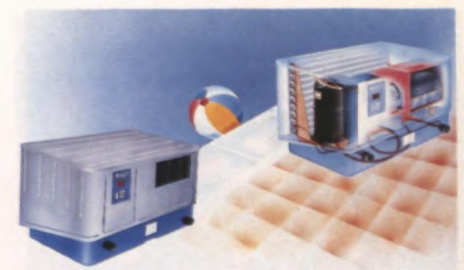

portable, anodized aluminum reel system; for commercial cover removal the company produces stainless steel portable manual reels, and wall or post mounted remote controlled, powered reel systems.

## CBR Technologies

3118 Bernard Pilon  
Beloil, Quebec  
Canada J3G 4S5  
Telephone: (514) 467-9339  
Telex: 055-61274  
Main Export Contact:  
Michel Forget, President

Founded 35 years ago as a manufacturer of heat exchangers and pressure vessels, CBR Technologies is now a leading North American producer of commercial and residential air conditioning equipment. The company presently employs 35 people at its Beloil, Quebec plant.

In 1985, it developed and manufactured a quality swimming pool heat pump in response to growing demands for a low energy cost pool heater. CBR Technologies currently produces three models of heat pumps in the sizes of 36 000, 55 000 BTU/Hr and a 55 000 BTU/Hr unit with a full digital readout and programming with solid state circuitry. All units incorporate a single evaporator (heat collector), a low speed blower fan, hi-heat resistant plastic hose with

cupronickel heat exchanger, a U.V. treated ABS thermoformed cabinet, and four independent pilot lights for easy operation and mode reading.

The 36 000 BTU unit is suitable for pools with a surface up to 550 square feet while the 55 000 BTU unit will handle up to 800 square feet based on an 80° F (26.7° C) water temperature requirement.

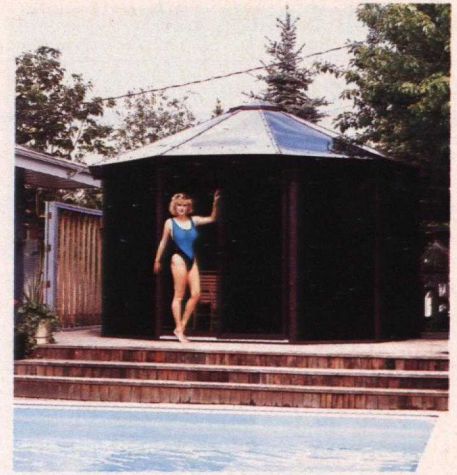

## Canadian Consumer Products Ltd.

#1 - 1804 - 4th Street  
Nisku, Alberta  
Canada T0C 2G0  
Telephone: (403) 955-7104  
Main Export Contact:  
Chris M. Lindop, Comptroller

Canadian Consumer Products Ltd. was incorporated in 1985, and operates from a 12 000 square foot facility located in Nisku, Alberta. It presently employs about 20 people, with plans for expansion in 1988.

The company manufactures the "SUN-SHELL" a freestanding gazebo. The "SUN-SHELL" is constructed from an aluminum extrusion framework which is designed to accommodate a variety of glazings: screen only, single pane glass/acrylic, and sealed glass units. It is available in two standard shapes and sizes, a 12½ ft. octagon and 15½ ft. decagon. The units are manufactured and distributed for retail as a do-it-yourself assembly package for spa enclosures and gazebos.

The company is interested in

exporting to the United States, Puerto Rico and Jamaica.

## Canadian General-Tower Limited

P.O. Box 160  
Cambridge, Ontario  
Canada N1R 5T6  
Telephone: (519) 623-1630  
Fax: (519) 740-2977  
Telex: 069-59336  
Main Export Contact:  
Wayne Lawrence, Sales Manager

Canadian General-Tower Ltd. (C.G.T.) was incorporated in August 1946, and currently operates three vinyl calendaring plants; one each in Cambridge, Oakville and Toronto, Ontario. The head office is in Cambridge, Ontario where all of the film and sheeting for swimming pool liners is produced. The company employs approximately 900 persons.

C.G.T. manufactures Polyvinyl Chloride film in widths up to 85 inches (216 cm) and thicknesses ranging from .004 inches to .05 inches (0.1 mm to 1.25 mm). The film can be embossed and/or printed and sold in rolled goods form for use in above-ground or inground pools. C.G.T. offers a large variety of patterns for the borders, sidewalls and bottoms. The vinyl can also be laminated to a variety of

fabrics for use in spa covers.

Canadian General-Tower currently exports to original equipment manufacturer accounts in the United States.

## Canswim Steel Limited

Baker Street  
P.O. Box 100  
Hastings, Ontario  
Canada K0L 1Y0  
Telephone: (705) 696-2385  
Main Export Contact:  
M. David Mahoney, President

Canswim Steel Limited was incorporated in 1970 and operates from an 8 000 square foot plant in Hastings, Ontario. The present employment level stands at 10 full time employees and 20 part time seasonal workers in the main plant. There are distribution centres east and west of Toronto International Airport for small parts service and pool kits.

The company specializes in the

production of 14 gauge Z600 galvanized steel swimming pool walls for inground and on-ground pools. It also produces 30 mil vinyl swimming pool liners.

Canswim Steel Limited currently exports directly to the United States and Belgium. Truckload distribution is available to major distributors and wholesalers in Canada and U.S.A. via a company owned truck fleet.

## Cantar Corporation

195 Rexdale Blvd.  
Rexdale, Ontario  
Canada M9W 1P7  
Telephone: (416) 740-2687  
Main Export Contact:  
Joe Dubrofsky, President

A world class manufacturer, Cantar Corporation operates from a 100 000 square foot facility in Rexdale, Ontario, a suburb of Toronto, and employs up to 100 people during the pool season. Besides the Rexdale plant, Cantar has an operation located in Lodi, New Jersey covering the U.S. markets.

The company's product line consists of solar blankets and winter covers for both above and inground pools, on deck and above ground reel systems, vinyl liners, water bags and insulated covers plus spa covers.

The solar blanket line is the bubble type made from Dow resins, and features eight foot panels between the seams. The hold-tite® seams themselves are reinforced sewn with the patented "silver lining". Each blanket comes with a white cover sheet for storage.

The winter covers are made of Dupont's TFBU material. Solid black carbonized strands with U.V. stabilizers, a woven mesh core, and a solid coating of U.V. stabilized polyolefin on both sides make the product extremely durable.

All covers come in standard sizes for both above ground and in-ground pools. Custom sizes are available.

The inground reel systems feature anodized aluminum T.bases for strength and stability, full sized winding wheels, optional casters, and quick release blanket clamps. The

*Cantar Corporation offers a variety of inground and above-ground covers and reel systems for the pool and spa industry.*

above ground model fits all pools, is easy to install and pivots off the pool when not in use.

Besides the pool and spa products Cantar Corporation also offers a wide range of commercial and industrial grade covers for other industries.

## Capo Industries Ltd.

2279 Fairview Street  
Burlington, Ontario  
Canada L7R 2E3  
Telephone: (416) 639-1213  
Fax: (416) 639-0292  
Main Export Contact:  
Don Ridpath, Mktg. Manager

Capo Industries was founded in 1893. In 1957 the company began blending and packaging swimming pool chemicals. It is currently constructing an 80 000 square foot facility in Burlington, Ontario and employs 35 people.

Capo Industries blends and packages a complete line of swimming pool chemicals which includes liquid, granular and tablet chlorine, water balancing chemicals, algacides and unique specialty trouble-shooting products. This product line is sold under the Poolboss brand name.

For hot water treatment, Capo manufactures a complete line of spa chemicals that includes a bromine and chlorine disinfectant system. This

product line is sold under the brand name Spa/Hot Tub.

Private label packaging for greater company identification with pool and spa chemicals is available.

Capo currently exports to the U.S.A.

## Chromalox Inc.

210 Rexdale Blvd.  
Rexdale, Ontario  
Canada M9W 1R4  
Telephone: (416) 743-8000  
Telex: 06-989333  
Main Export Contact:  
J. McQueston, Export Manager

Established in 1927, Chromalox Inc. employs 1 000 people to manufacture a diversified line of electrical heating products which includes swimming pool and spa heaters and sauna stoves.

The residential electric heater line, series PHD-B, ranges in size from a 5 KW unit to a 30 KW unit in 240 Volt, and features 100 percent heating efficiency, stainless steel wall tanks, built-in overheat protection and a compact space saving design.

The commercial heater line, Series CWP-B ranges in size from 6 KW to 60 KW with voltages of 208, 240, 277, 480 and 600. All heaters are available in either one or three phase. Features include 100 percent heating efficiency heavy steel wall galvanized tanks, built in overheat protection and heavy duty elements.

Chromalox sauna stoves come in four models ranging from 4.5 KW to 9 KW in size, operating in 208 or 250 Volt, single or three phase. The exterior finish is either red enamel or stainless steel. These are compact designed units to use the least possible space in a sauna corner.

All products are CSA certified and able to meet world standards.

## Cornelius Industries Inc.

15 Cushman Road  
St. Catharines, Ontario  
Canada L2M 6S7  
Telephone: (416) 688-2612  
Fax: (416) 688-4288  
Main Export Contact:  
Jim Wallace, Vice Pres./Gen. Man.

Cornelius Industries Inc. a family owned light manufacturing company, is based in St. Catharines, Ontario. The company manufactures inground and on-ground swimming pools, above ground swimming pools, and vinyl pool liners.

Cornelius' primary markets are Canada and the United States. The United States business is handled through Cornelius offices in North Tonawanda, New York.

The company manufactures 12 models of above ground pools in 10 sizes and shapes in both galvanized steel and aluminum. An aluminum deck/fence package is available to complete these pools. Inground pools are manufactured in kits from

galvanized steel and heavy gauge liners that make some 70 sizes and shapes of pools. Vinyl liners in plain and patterned styles and in both 20 and 30 gauge are made for the pool. Primarily kits, they can also be supplied on a custom basis.

Cornelius emphasizes good design, ease of assembly, and competitive prices.

## Dauphin Pools Ltd.

2430 Laurentien Blvd.  
St. Laurent, Quebec  
Canada H4R 1J9  
Telephone: (514) 332-6060  
Fax: (514) 332-9560  
Main Export Contact:  
Bob Liberatore, Sales Manager

For 25 years Dauphin Pools Ltd. has provided swimming pool product to the North American market. Today, it is a strong manufacturer of both all-steel and all-aluminum above ground pools.

The "Martinique" series is the steel model that is manufactured from a corrugated zinc plated steel and laminated with a vinyl finish. The coping and vertical posts are made with multiple linked slots and the zinc plated steel is plastic coated for an attractive finish. Print liners are provided to enhance the pool. Martinique above-ground pools are available in 15 foot (4.6 meter) to 27 foot (8.2 meter) diameter sizes.

"Flipper" and "Royale" pools are the all-aluminum models. All aluminum parts to the pool wall, vertical posts and cross sections are coated with a

baked enamel finish to further protect them from corrosion. This baked finish also allows the attractive colour to resist fading.

All liners are made from a sanitized, 100 percent virgin vinyl that will not fade or discolour. Other features include grooved extrusions, non-skid grooved surfaces, a 6 inch top rail on the "Flipper" that will support 500 lbs. (225 kgs) or an 8 inch top rail on the "Royale" that will support 800 lbs. (360 kgs), and a PVC decorative edge band.

The "Flipper" models come in 15 foot (4.6 m) to 27 foot (8.2 m) diameter round models and 12 foot (3.7 m) by 24 foot (7.4 m) to 15 foot (4.6 m) to 33 foot (10.0 m) oval models. The "Royale" line has round models that range from 18 feet (5.5 m) to 27 feet (8.2 m) in size.

## **Dectron Inc.**

4300 Poirier Boul.  
Montreal, Quebec  
Canada H4R 2C5  
Telephone: (514) 334-9609  
Fax: (514) 334-9184  
Main Export Contact:  
Paul Mardinian, Vice President

Dectron Inc. was founded in 1977 in Montreal, Quebec, where its head office and manufacturing facility now occupies 33 000 square feet of space. Employing a total of 60 people in the plant and head office, Dectron markets its products extensively through the United States, Canada, and to several other major world markets.

Dectron conceived and developed the concept of the "dehumidifier and water heater, closed-loop energy recycler" for indoor pools and spas. Dectron manufactures a wide range of dehumidifiers/pool water heaters which are well-known in the industry as DRY-O-TRON. The DRY-O-TRON product line covers indoor pool applications ranging from the smallest residential indoor pool to the largest of the commercial indoor wave pools.

The product line permits a variety of equipment configurations which can provide humidity control and pool water heating from the simplest of indoor pools to the most sophisticated natatorium complex.

The application of a DRY-O-TRON for an indoor pool can reduce energy costs up to 80 percent, improve user comfort and prevent the damage

*The DRY-O-TRON DS 24 Dehumidifier Pool Water Heater with pool heater, whirlpool heater and air conditioning options.*

caused by high humidity and condensation.

Dectron products are marketed exclusively through representative companies who have the engineering capabilities and the factory training required to install the equipment and assist the architect or engineer with the overall system design.

With a total of 79 offices in the United States and 13 offices in Canada, Dectron representative companies cover all of the market regions and all of the major population centres in both countries.

## **Di-Chem Inc.**

61 Lewis Road  
Guelph, Ontario  
Canada N1H 1E9  
Telephone: (519) 821-7780  
Fax: (519) 821-7784  
Telex: 069-56582  
Main Export Contact:  
A. Venerus, Vice President

Specializing in consumer chemical goods since 1979, Di-Chem works directly with major retailers in the marketing of its products.

They offer a strong and diverse line of swimming pool chemicals under the "Pool Care" brand which includes granular and formed puck chlorines, algacides, oxidizers and water balance products in a variety of sizes. The product line also includes specialty items such as filter aids and water softeners.

Packaging of the line is distinct and attractive.

Besides the swimming pool chemical line, Di-Chem manufactures related chemical products for waterbeds, humidifiers, plumbing and home care.

## E-Man Products Ltd.

8306 - 113 Street  
Fort Saskatchewan, Alberta  
Canada T8L 3T8  
Telephone: (403) 998-1405  
Main Export Contact:  
Emmanuel Weber, President

A fully portable spa that assembles on site is available from E-Man Products. The basic construction of the product is a wall system consisting of four preconstructed walls. Each wall has an extruded aluminum frame that is anodized. Within the wall's framework, all plumbing and jets are pre-plumbed and the wall is completed with urethane insulation to reduce heat loss. The exterior of each wall is finished with a wood panel.

The walls fasten together through a series of unique slider connectors. Plumbing connections line-up automatically and connect with "O" ring seating, internally. Electrical bonding is connected on all four corners.

Inner sheeting make-up the inside walls and two inch styrofoam SM is used as an inside floor base. The spa interior is finished with a 30 mil vinyl liner fastened into a liner retainer at the top of the spa wall.

The spa pack is connected outside the wall with "O" ring unions.

E-Man Spas come in two sizes. The large portable is 5 feet by 6 feet 6 inches (1.52 m by 1.98 m) inside measurement with a capacity of six to eight adults, and the small portable is 4 feet by 5 feet (1.219 m by 1.52 m) inside measurement with a capacity of four to six people. Both models are 32 inches (81.3 cm) in depth.

This product is ideal for use in apartments.

## Enersol Products Inc.

#14 - 1080 Tristar Drive  
Mississauga, Ontario  
Canada L5T 1P1  
Telephone: (416) 673-3337  
Main Export Contact:  
Keith Simmons, Manager

Enersol Products is a manufacturer of solar collector panels for swimming pool applications and operates its plant in Mississauga, Ontario.

The S-1200 solar panel that the company manufactures is designed for durability and efficiency. The panel absorbers are made of specially formulated EPDM synthetic rubber that has no scaling, rust or cracking, and unlike the extruded plastic solar collectors, is resistant to prolonged exposure to sun, weather, heat, ozone, steam and physical abuse.

The S-1200 unit will fit any roof and the 13 inch (32.5 cm) modular headers and EPDM flexible rubber means greater coverage on small roofs that have annoying roof pipes or other projections. A simple clip and "O" ring configuration makes installation and service an easy proposition. The 13 inch modular header and easily spliced collector tubes eliminate expensive service.

Enersol Products presently services Canada and dealers in the Florida markets.

## Equator Pool Products Inc.

25 Addington Square  
Unionville, Ontario  
Canada L3R 7N3  
Telephone: (416) 479-2329  
Main Export Contact:  
Gunter Stefan, President

Equator Pool Products was incorporated in 1985 to manufacture recirculation systems for swimming pools. The company produces a high quality, low cost product line for inground liner pools. Its skimmer package consists of one skimmer, one main drain and two return fittings. The products are also available as individual items.

The skimmer includes a patented Vacuum/Control Plate, with optional extras of a Grout Ring Spacer Extension and a Skimmer Support Channel. The panel cut-out, for the Skimmer, is the same as a major suppliers' product. The Main Drain comes with a 1/2 inch plug, and can be fitted with a patented Hydro Relief Valve and Collection Tube. The two Return Fittings feature

spring loaded Directional Balls with interchangeable orifices. The entire package was designed by an engineer with 20 years of experience in swimming pool products. The line is manufactured out of high impact strength injection moulded plastic.

Equator has offices and warehousing in Toronto, Ontario and presently exports to U.S. markets.

## Faber Glass Enclosures & Awnings Ltd.

25 Van Kirk Drive  
Unit #2  
Brampton, Ontario  
Canada L7A 1A6  
Telephone: (416) 454-4960  
Main Export Contact:  
Robert Faber, Vice President

With over 30 years of experience in residential, commercial and architectural glazing, Faber Glass Enclosures & Awnings Ltd. will custom build rigid enclosures for solariums, greenhouses and swimming pool enclosures.

The pool enclosure product line ranges from air domes to double glazed glass enclosures and sliding doors all round. The double glazed glass units feature 12 foot steel bay spacing, sliding doors in each bay and one manual and one thermostatically controlled continuous roof vent. The roof area features the use of double skinned polycarbonate sheet for strength. The aluminum framework is available in a range of colours with bronze and white Duracron enamel finish as standard colours with other

colours being available at an additional cost.

For added beauty, Faber can also utilize their wood laminated beam for pool enclosures. The glue is waterproof and resists the humidity present in pool enclosures.

Single glazed pool enclosures are also available.

## Feherguard Products Ltd.

821 Main St. East  
Milton, Ontario  
Canada L9T 3Z3  
Telephone: (416) 876-4766  
Fax: (416) 876-2805  
Main Export Contact:  
Wayne Guard, President

Feherguard Products Ltd. is one of North America's leading manufacturers of Solar Cover Reel Systems for swimming pools.

The company was incorporated in 1980 and employs five people in its newly constructed 19 000 square foot facility in Milton, Ontario. The company presently exports extensively to the U.S.A. and also to some European accounts.

Feherguard offers an extensive line of unique patented telescopic reel systems. The product line ranges from small low cost models for above-ground pools to large commercial units. It also offers a new reel, to store swimming pool and central vacuum hose.

All products have a unique, patented telescopic tube design, heavy gauge

Feherguard's complete line includes commercial, inground and above ground models of cover reel systems.

ribbed aluminum tubing, roller bearings (except in the FGA-15, 18 models), anodized finishes to reduce pitting and discoloration, compact packaging, easy instructions and a three year warranty programme.

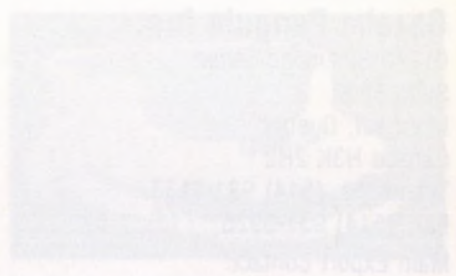

Various configurations include mobile, stationary, low profile and wall/bench models.

## Finnstyle Sauna Builders Inc.

5669 Tyne St.  
Vancouver, B.C.  
Canada V5R 4L5  
Telephone: (604) 439-0711  
Main Export Contact:  
Jim J. Noso, President

Based on generations of experience in Europe, Finnstyle saunas are constructed of Western Cedar, the ideal sauna wood because of its stability, heat radiation, and resistance to splintering. The benches and racks are built using counter-sunk screws, walls are blind-nailed, and screw holes are drilled for a smooth hand crafted finish.

Finnstyle Saunas manufactures a quality line of custom built saunas, pre-fabricated sauna kits and sauna doors and is interested in world export.

Finland's most popular sauna wood is Western Cedar. It is a soft wood, but it is very strong and durable. It has a natural resistance to rot and decay, and it is very resistant to insect damage. Cedar is also a very aromatic wood, and it has a beautiful grain. It is a very popular choice for saunas because of its many benefits. Cedar is a very healthy wood, and it is very easy to work with. It is a very good choice for saunas because of its many benefits. Cedar is a very healthy wood, and it is very easy to work with. It is a very good choice for saunas because of its many benefits.

## Flamingo Woven Fabrics Ltd.

3401 Industrial Blvd.  
Laval, Quebec  
Canada H7L 4S3  
Telephone: (514) 667-4510  
Main Export Contact:  
Joe Patone, President

Established in 1978, Flamingo Woven Fabrics Ltd. manufactures covers and cover accessories for all swimming pool needs — winter or summer.

Flamingo solar covers are of the bubble type construction with reinforced seams. They feature a coated woven seam fabric and double stitching, an easy trim method to insure a proper fit and a taping system that will insure maximum strength. Solar covers are available for both inground and above ground models.

Flamingo winter covers are made of a triple laminated woven fabric with UV inhibitors to protect them from sun damage. The product is super strong, durable and comes in four different weights and a variety of colours. Above ground winter covers have nylon webbing loops, cable and galvanized

tie down rings, double stitched and reinforced hemming, and durable brass grommets and steel cable with a PVC coating. The inground covers have loops every four feet for water bags, double brass grommets on the corners and centres, and brass grommets; pegs and rope on request.

## Franklin Electric of Canada Ltd.

Highway 81 North  
Strathroy, Ontario  
Canada N7G 3J3  
Telephone: (519) 245-3220  
Fax: (519) 245-3224  
Telex: 06-47148  
Main Export Contact:  
Glen D. Sharpe, General Sales Manager

Franklin Electric of Canada is a large Canadian manufacturer of electric motors for pool, spa and domestic water systems products.

Located in Strathroy, Ontario, the company employs around 260 people for motor production.

The Franklin product line consists of a range of fractional horsepower and full horsepower motors in various voltages and cycles. Specific motor configurations with stainless steel shafts, totally enclosed covers and two speed operation are available for pool and spa applications.

The company presently exports to the U.S.A. through its American operation. It also exports direct to European, Middle East and Asian countries.

## Gazebo Penguin Inc.

01260 Richmond Street  
Suite 5500  
Montreal, Quebec  
Canada H3K 2H2  
Telephone: (514) 931-4133  
Fax: (514) 931-6926  
Main Export Contact:  
Earl Adler, Export Manager

A broad range of screened, aluminum framed gazebos is offered by Gazebo Penguin Inc. of Montreal, Quebec.

The Gazebo Penguin line features a heavy duty, baked enamel aluminum framework with rust proof, fibreglass mesh screens. The roof is pliable being made from UV and mildew-resistant three ply vinyl in a scalloped-edge design with easy manual adjustment for controlling roof slackness.

Models range from free standing squares, rectangles and octagonal structures to the "add-a-room" or "lean-to" type that attaches to a building structure. Gazebo Penguin enclosures also offer optional clear or coloured privacy panels to match the awning or added privacy and protection from the wind. Simple step-by-step instructions

Gazebo Penguin octagonal style enclosure.

with diagrams are included with each kit.

Gazebo Penguin enclosures are ideal as cabanas, patio games rooms, or as a spa enclosure.

## Guy-Malone Limited

1415 California Ave.

John J. Malone, President

GML presents Flow Pro, The Water Professional, an innovative, labour saving water conditioner that is within the price range of most pool owners. Daily tedious jobs such as the addition of chlorine and maintaining the pH levels are now done automatically. The savings in labour and chemical costs are substantial. The Flow Pro, with unique state-of-the-art microprocessor controls is simple to operate.

Several outstanding features are integrated into the Flow Pro. A personalized access code eliminates tampering with key control functions. Chlorine is continually fed hourly to keep pools safely sanitized. The pH is constantly monitored and maintained to set points of 7.2 to 7.8. Other unique features of the Flow Pro are digital pH readings on demand; pre-set on and off

pump settings; both pre-set and on demand shocking of the pool; L.E.D. flashing light and audible sensor to signal unit fault or chemical depletion.

## H.S.T. Synthetics Ltd.

6350 Netherhart Rd.  
Unit #5  
Mississauga, Ontario  
Canada L5T 1K3  
Telephone: (416) 677-3432  
Main Export Contact:  
Thomas E. Tiler, President

Incorporated in 1974, H.S.T. Synthetics Ltd. has a 12 500 square foot plant and head office in Mississauga, Ontario, employing 17 people. The company presently exports to the U.S.A. and England.

H.S.T. Synthetics manufactures a broad range of covers for the swimming pool and spa markets. The swimming pool covers are "solar" for the summer months and "winterizing" for the winter months. The solar covers heat the pool and reduce evaporation in the summer time. The winter covers protect and keep the pool clean during the winter months. All sizes of both types of covers are available for both above and inground pools.

The H.S.T. Synthetics soft spa cover is manufactured from a 5/32 in. (.80 cm) thick to a maximum of 62 in. (158 cm) wide closed cell polyethylene foam in any length and is designed to float on the spa water surface, retaining heat and reducing evaporation. The rigid covers are available in any size. They are manufactured from a 2 inch (5 cm) thick rigid EPS insulation type R 7.40 foam. The foam is encased in a "marine upholstery delta spa hyde" reinforced vinyl and the covers feature a safety lock and ABS plastic centre reinforcing channels. Spa covers are available for above ground and inground spas and hot tubs.

## Haugh's Products

10 Atlas Court  
Brampton, Ontario  
Canada L6T 5C1  
Telephone: (416) 792-8000  
Fax: (416) 792-8053  
Main Export Contact:  
Douglas Steen

Serving the above ground and inground swimming pool market for 50 years, Haugh's Products is a wholly owned Canadian company located in Brampton, Ontario just north of Toronto. Moving in mid-summer of 1988, a new 88 000 square foot facility will house the head office and warehouse as well as the vinyl liner fabrication plant. Additional manufacturing is performed in Orillia, Ontario in a 30 000 square foot facility.

Haugh's Products manufactures a wide range of sizes and styles of above ground and inground pools priced for all budgets. Top of the line above grounds feature 7 inch "Plastisol" finish top rails and double laminated deep ribbed walls. Unique to Haugh's is a self-supporting stabilizer bar which allows for easy assembly of the pool.

In addition to round and oval pools in many sizes, they also feature an exclusive "Keyline" shape in two sizes and two depths. Inground pools come in nine shapes and various sizes. All kits feature 42 inch 14 gauge galvanized steel panels (performed on kidneys and ovals), 30 gauge virgin vinyl liners with double track seams and a choice of PVC bullnose coping or two piece PVC and aluminum coping.

## Hinsperger Poly Industries Ltd.

645 Needham Lane  
Mississauga, Ontario  
Canada L5A 1T9  
Telephone: (416) 272-0144  
Fax: (416) 272-3769  
Main Export Contact:  
Peter Hinsperger, Vice President

A wide variety of protective covers for the pool and spa industry, all made of extrusion coated woven polyethylene materials, are the mainstay of Hinsperger Poly Industries Ltd. These products include solar pool covers, winter pool covers, vinyl water bags and rigid spa covers.

Incorporated in 1976, Hinsperger Poly Industries has a 42 000 square foot plant in Mississauga, Ontario. The

Hinsperger family has operated the company for the past 100 years and the principals were instrumental in the development and acceptance of woven polyethylene as a suitable material for protective winter covers in the pool industry.

Approximately 50 percent of HPI's production is for export to the U.S.A. and Western Europe in a wide range of qualities, colours and price levels.

## K & G Pool Products Ltd.

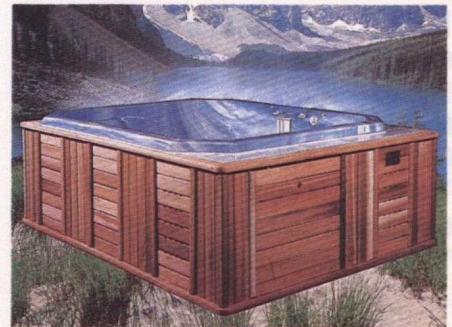

960 Railway Ave.  
P.O. Box 910  
Penticton, B.C.  
Canada V2A 7G1  
Telephone: (604) 492-2727  
Fax: (604) 493-1138  
Main Export Contact:  
Robert Kennedy, President

K & G Pool Products Ltd. was established in 1978 and manufactured spas and bathtubs for the western Canadian market. Today, working from a modern 80 000 square foot plant and office facility, K & G Pool Products is among the largest producers of acrylic spas in Canada.

The company has over 25 design models of acrylic spas ranging from 2 person models up to units that will hold 10 to 12 persons comfortably. These include both inground and portable types with a wide range of configurations and colours.

Pre-manufactured spa skirts are made of western red cedar and finished in a natural finish, or with a selection of stains, to enhance the setting.

The product line can be ordered on a shells only basis or as a totally

*Totally insulated plumbed and skirted units are shipped complete from K & G Pool Products.*

plumbed package, with equipment and skirts, ready for installation. All preplumbed systems are completely tested prior to shipping and utilize Canadian made spa systems.

## K.S.H. Canada Inc.

7521 Tranmere Drive  
Mississauga, Ontario  
Canada L5S 1L4  
Telephone: (416) 673-3345  
Fax: (416) 673-1459  
Telex: 069-68752  
Main Export Contact:  
Ron McCurdy, Sales Manager

K.S.H. Canada, Incorporated, was founded in 1968. It manufactures and distributes plastics and plastic products as well as a line of aluminum ventilators and solar heaters. In 1986, the company expanded into its present 87 000 square foot facility.

The Suncap solar heating panel has introduced into the market place a cost-effective patented system for heating process water, swimming pools, and domestic hot water. The collector uniquely captures energy in its clear acrylic domes which track the sun and also utilizes reflected energy. Since the domes are themselves fluid carriers, the integrity of the panel is assured and cost-effective. Other panel advantages include durability, simplicity, beauty and efficiency.

The mounting of the Suncap

*Suncap panels feature the "Dome" glazed uninsulated type with large passages and automatic draining.*

collector is 1 in. (2.5 cm) off the roof to allow air circulation and the mounting possibilities are varied to accommodate roof configurations or alternative places such as racks or fences.

## **Kafko Manufacturing (1980) Limited**

1231 Kamato Road  
Mississauga, Ontario  
Canada L4W 2M2  
Telephone: (416) 624-3000  
Fax: (416) 624-5234  
Main Export Contact:  
David Ross, V.P. Marketing

Kafko is a well established international manufacturer of a complete line of steel walled, vinyl lined inground swimming pools, offering over 100 sizes and shapes.

Kafko pools feature 14 gauge, Z600 galvanized steel panels for long-life protection. The panels are precision-made for accurate alignment and utilize adjustable Notched A-Frames for strength and perfect alignment of steel walls. They are built of the same corrosion-resistant steel as the walls.

Curved panels for shaped pools are preformed giving you a true radius pool. Kafko also provides preformed 2 foot and 4 foot radius panels in two models.

All panels are rivetted for extra strength. The rivetted panel is a Kafko first in Canada.

The pool package includes a wide mouth skimmer with patented flow control vacuum plate and 218 cubic inch collection basket. For added strength each skimmer comes complete with a skimmer support and vinyl panel protector. The return fitting is spring loaded, easily adjustable and has a minimum of two on each pool. The main drain provides water circulation from the deep end of the pool and can be used to lower the water level for winterizing.

Kafko steel walls are fitted for the Kafko deck support system which will support the concrete deck poured around the pool perimeter.

Kafko heavy gauge vinyl liners, are made of pure virgin vinyl, overlapped weld, and are algae resistant. The liners are custom made in our plants to ensure a proper fit to Kafko's pool specifications.

The liners come in beautiful printed, plain or border patterns. All liners are computer designed.

A patented "Snap-Lock" coping comes in P.V.C. or aluminum and assures the liner is locked into place. The Snap-Lock coping allows the installer to bring concrete right to the edge of your pool.

Kafko also offers vinyl winter covers, vinyl water bags and the Boston Picket Fence. This fence is of a distinctive wrought iron work that has sturdy maintenance free design. It comes in three, four and five feet heights with self-closing and latching gates, all of which meet swimming pool safety standards.

## **Kamkor Corporation**

6915 Davand Drive  
Mississauga, Ontario  
Canada L5T 1L5  
Telephone: (416) 673-5545  
Fax: (416) 673-5597  
Main Export Contact:  
Dan Wickham, Sales Manager

More than 100 configurations of pool styles and sizes are offered by Kamkor Corporation to meet the needs of dealers and consumers in the inground and on-ground steel walled, vinyl lined swimming pool market. With distribution from its Mississauga and London, Ontario locations, the company is well positioned to service a dealer network throughout North America and other world markets.

Kamkor's manufacturing focuses on heavy-duty steel panels, 30 mil vinyl liners, and its unique coping system. By concentrating on what it does best, the company has been able to continually improve on the quality and the consistency of that quality in its products.

The Kamkor pool features a massive

5 inch (12.5 cm) top rail, a 3 inch (7.5 cm) bottom rail, and a 3 inch (7.5 cm) side flange on all panels. Each panel is constructed of heavy 14 gauge steel with Z600 (6185) zinc coating and has true box-folded corners. Precurved panels are notched, formed and welded while all cut-outs and welds are coated with zinc primer.

## Kenloch Company

85 Midwest Road  
Scarborough, Ontario  
Canada M1P 3A6  
Telephone: (416) 752-8985  
Fax: (416) 759-3150  
Main Export Contact:  
John D. Chadwick, President

Incorporated in 1977, Kenloch Company has a 6 000 square foot plant and office located in Scarborough (Toronto), Ontario, and employs 11 people. Since its inception, it has specialized in providing filtration equipment and purification equipment for major public and competition swimming pools, ranging in size from 380 cubic meters to 3 800 cubic meters water volume. It is affiliated with a specialty mechanical contracting firm (Canadian owned) specializing in the installation and service of these systems or Kenloch will work directly with project mechanical contractors.

The company has been involved with several hundred swimming pool projects, including major competitive swimming pools.

Kenloch Company manufactures a

broad range of filtration plants for large swimming pools including; vacuum diatomaceous earth filters, vertical tank high rate sand filters, horizontal tank high rate sand filters and rapid sand filters with capacities ranging from 30 cubic meters/hour to in excess of 700 cubic meters/hour. Filtration units are available fully fabricated or knocked down for site fabrication. The company also manufactures a vacuum diatomaceous earth filter system utilizing an on-site fabricated concrete tank. A filter of this type with a capacity of 300 cubic meters/hour occupies approximately 125 cu. ft. shipping volume and requires less than 10 square meters of floor space. A wide range of associated support equipment is manufactured and/or distributed.

## Les Agences Claude Marchand Agencies Inc.

240 Industrial Blvd.  
Boucherville, Quebec

Telephone: (514) 743-0007  
Fax: (514) 743-2222  
Main Export Contact:  
Alan Wendover, Sales Manager

Incorporated in 1981, Maxtemp Thermo Comfort Inc., has an 11 000 square foot plant and head office in Tracy, Quebec, employing 40 people. The company also maintains a second office and warehousing facility of 5 000 square feet in Manchester, Connecticut, U.S.A.

Maxtemp Thermo Comfort Inc. manufactures a broad range of pool heaters for above ground and inground pools, as well as for spas. The Maxtemp pool heaters operate on the principle of a heat pump and are self-contained units which are easily installed onto any pool's filtering system. Maxtemp also features fully automatic operation, temperature regulation by thermostat, maintenance free engineering, a non corrosive thermo plastic casing, and quiet air

discharge. The Maxtemp pool heaters are designed to heat a pool economically and effectively because electricity is used by the heat pump only to run the fan and compressor. The unit continually replaces the heat that a pool loses through evaporation and convective loss throughout the normal swimming season.

## Methot Sales Ltd.

1373 Ogilvie Road

Incorporated in 1975, this Quebec company manufactures the rugged PVC Cushion Mat for around swimming pools, sauna rooms, locker rooms and shower rooms.

Cushion Mat is made of a specially formulated PVC that provides comfort to walk on and is resistant to fungus, mold, mildew, most chemicals, oil and grease. It is designed as a modular tile format with each tile being 12 inches by 12 inches (30.5 cm by 30.5 cm) and may be assembled to exact user specifications. The tiles interlock with an easy snap-in system that provides a continuous surface.

Drainage is efficient with a grid of 529 holes per square tile and a floor with a two way drainage system. A wrap around edge provides smooth access to the mat for both pedestrians

and rolling equipment. Cushion Mat has no metal parts to rust or corrode.

Cushion Mat is available in tan, red, yellow, green, blue, grey, black and white colours.

Nature Pool (Canada) Inc. has the manufacturing and marketing rights in Canada, the United States and Mexico for the Hypocell Water Purification System, a product currently used in more than 14 countries throughout the world.

The Hypocell System is an alternative to chlorine and bromine in the disinfection of commercial and residential swimming pools and spas. The product operates on the principal of electrolytically converting a mild salt solution (4 000 ppm sodium chloride) into hypochlorous acid (HOCl) and forming nacent oxygen; these are products that are effective in the destruction and oxidizing of bacteria, virus or algae. The HOCl reverts back into a salt solution ready to be regenerated by the Hypocell System. This regeneration process reduces costs in maintenance.

Both commercial and residential models continuously monitor the pool or spa water and a readable control panel provides immediate information on the status of the system. The commercial units also monitor for chlorine residual levels and the pH level of the water. They are designed to automatically keep the water pH between 7.2 and 7.6 by controlling an acid vat and dosing pump, adjusting the pH as required.

Independent test data on the

A commercial Hypocell System showing the control panel and monitoring support systems.

effectiveness of Hypocell Systems in commercial installations is available.

The main plant and office for Nature Pool is in Mississauga, Ontario. The product is marketed in the United States through Nature Pool U.S.A. Inc. of Torrence, California.

## No Chem Aqua Industries Ltd.

4723 - 91 Avenue  
Edmonton, Alberta  
Canada T6B 2M7  
Telephone: (403) 465-9252  
Main Export Contact:  
Dennis L. Tindall, President

A new innovation in pool and spa water treatment has been introduced by No Chem Aqua Industries Ltd. of Edmonton, Alberta.

Described as a fluid stabilizer that utilizes precious and semi-precious metals in its alloycore, the No Chem Liquid Stabilizer provides pool and spa water clarity, stabilizes pH ranges with a reduction in chemicals, oxidizes organic and inorganic elements in the water which reduces the need for chemical and "shock" treatments, and reduces algae and bacterial growth which again allows a reduction in chemical usage.

The unit is installed within the circulation lines and also reduces scale, skin and eye irritation and maintenance.

## Northern Lite Woodworks Inc.

2364 Haines Road  
Mississauga, Ontario  
Canada L4Y 1Y6  
Telephone: (416) 275-7501  
Main Export Contact:  
Jan C. Tettero, President

Northern Lite Woodworks Ltd. manufactures a broad range of cedar products including prefabricated saunas, cabanas and gazebos. Their sauna line is available in sizes from 4 feet x 5 feet (120 cm x 150 cm) to 8 feet x 10 feet (240 cm x 300 cm). Each sauna is made of solid cedar walls with a nominal thickness of 2 inches (5 cm). The logs are of a double tongue and groove construction and are secured in place by means of specially designed aluminum corners. There is no need for nails, screws or other fasteners.

The cabanas, with their basic design the same as the above described saunas, are suitable for outdoors. Each cabana can have built-in sauna and/or change room, pool equipment room etc. The gazebos, completely

The "Spica", an octagonal gazebo consists of eight sections which are bolted together and can be assembled in four hours.

prefabricated, can be erected in less than a day.

## Pacific Pool Water Products Ltd.

6513 - 200th Street  
Langley, British Columbia  
Canada V2Y 1A4  
Telephone: (604) 533-4771  
Fax: (604) 534-1776  
Main Export Contact:  
Vic Gorcak, President

Established in 1965 as a manufacturer of inground swimming pools, Pacific Pool Water Products of Langley, British Columbia, is now a broad range manufacturer of related products.

Besides providing professional swimming pool and spa dealers with a complete and varied line of aluminum and steel walled, vinyl lined pool kits, Pacific Pool Water Products offers custom replacement liners, Pacific high rate sand filters in 16, 20, 24 and 30 inch (40.64, 50.8, 60.96 and 76.2 cm) diameter tanks; Pacific Super Star pumps in 1/2 to 2 Hp. sizes with single or dual speed motors; spa support systems that feature two speed pumps, 1.5 KW to 5 KW electric heaters or 50 000 BTU heat exchangers and 25 or 50 square foot filters; electric spa and

pool heaters in 1.5 KW to 11 KW models; and heat exchangers in the 50 000 to 180 000 BTU range.

The company presently exports directly to the West Coast United States and is interested in European, Australian and Middle East markets.

## Plastoflex Industries Inc.

P.O. Box 280  
Highway 7 and 5th Line  
Rockwood, Ontario  
Canada N0B 2K0  
Telephone: (416) 450-0525  
Main Export Contact:  
Brian Dixon, Mktg. Manager

Plastoflex Industries manufactures two types of hose applicable to the swimming pool industry and currently sells its product throughout Canada and the United States.

"Plastoflex" blue PVC discharge hose is made from quality resins. Its smooth bore design allows for maximum liquid flow decreasing the risk of clogging. This product can be used reliably as a discharge hose and is ideally suited as a backwash hose for pool filters or on drain pumps in pool service applications. The product has a 1 1/2 inch (3.81 cm) inside diameter and a working pressure of 50 psi. Standard

lengths are from 25 to 100 feet (7.62 meters to 30.48 meters) in 25 foot increments and a 200 foot (60.96 meters) length.

"Plastoflex" swimming pool filter hose has a special blend of PVC compound used in the black core and smooth black cover of the product. The filter hose is reinforced with high tensile strength synthetic yarns and has a good chemical resistance. The filter hose has a 1 1/2 inch (3.81 cm) inside diameter, a working pressure of 200 psi and comes in standard length coils of 100 feet (30.48 meters).

## Pleasure-Way Pools (1978) Limited

18 Easton Road  
Brantford, Ontario  
Canada N3P 1J5  
Telephone: (519) 756-5071  
Main Export Contact:  
Bill Anderson, Export Manager

Pleasure-Way Pools (1978) Limited is located in Brantford, Ontario and employs 22 people.

The company has 20 years of manufacturing and construction technology built into its line of steel walled, vinyl liner swimming pools.

A specially designed rigid preformed wall panel of superior strength reinforces and locks into the concrete footing, and supports the whole pool as one structure. Wall panels and braces are manufactured of 14 gauge, 2 oz. galvanized steel and protected by a zinc based coating. Welds are of iron corrosive silicone bronze. The design of Pleasure-Way's EX-TRA-BRACE provides cross support every 4 to 6 feet for greater strength and stability.

Unique PVC capped aluminum copings are available in either Bullnose

or 6 inch seat styles.

The product line consists of a standard series of eight models in Rectangular, Lazy-L, Lake, Roman End, L-Shaped, Oval, Tear-Drop and Kidney shapes, and the Admiral Series that incorporates 4 inch radial corners.

Pleasure-Way Pools also produces the Pleasure Reel; a solar roller.

## Polysol Pool Covers (1986) Inc.

104 Philip Avenue  
North Vancouver, B.C.  
Canada V7P 2V6  
Telephone: (604) 986-7301  
Main Export Contact:  
Ron Batt, President

Polysol was first incorporated in 1975 in North Vancouver, British Columbia and has since moved to a new manufacturing and assembling facility. The new owners, Ron Batt and James Finlay, acquired the company in 1986 and have begun exporting products to the United States with sights also set on other export markets. The company currently employs eleven persons at its 7 000 square foot facility.

Polysol Pool Covers (1986) Inc. manufactures two styles of pool cover reel systems to suit a wide range of pools and covers. Both the portable and fixed units are constructed of diecast aluminum with a white, baked epoxy finish to appear stylish yet unobtrusive. Fittings include stainless steel and nylon parts for maximum strength and longevity. The tube onto

which the cover is rolled is standard four inch irrigation tubing. Both units allow the cover to be rolled from either end of the reel by just one person and the portable unit can be easily moved away from poolside on its four casters. Complete systems, less tube, are conveniently packaged in boxes measuring 16 x 16 x 15 inches (40 x 40 x 13 cm) weighing just 14.5 lbs. (6.5 kgs) each.

## Pondex Limited

1211 Kamato Road  
Mississauga, Ontario  
Canada L4W 2M2  
Telephone: (416) 624-3171  
Main Export Contact:  
Ernie Termorshuizen, Sales Manager

Pondex Limited was established in the inground steel walled, vinyl lined swimming pool business in 1974 and operates a 90 000 square foot warehouse out of Mississauga, Ontario.

The Pondex product line is one of the industry's most varied in shapes and sizes. Its 30 mil vinyl liner comes in a variety of patterns and is of a fitted design drawn by a computer.

The steel walls are manufactured from Z600 galvanized steel. A new double "L" shaped wall brace makes the support stronger and allows the brace to be riveted to the panel. A new rivet lock panel design is said to make Pondex the only kit manufacturer with a weld free panel. The steel wall panel features a 6 inch (15.2 cm) top rail and all pre-curved shaped panels feature a 3 inch (7.6 cm) top and bottom rail.

*Pondex Lazy-L pool is one of many shapes available.*

Besides a standard PVC coping, an aluminum Snap-Lock coping which is preformed for shaped pools, is available. A new method has been developed by Pondex in the bending of 2 foot and 4 foot radius aluminum coping corners for easier installation.

Each pool is fitted with a Super-Skim wide mouth skimmer, a minimum of two returns and a main drain.

## The Pool Connection Limited

907 Matheson Blvd. East  
Mississauga, Ontario  
Canada L4W 2R7  
Telephone: (416) 624-1667  
Fax: (416) 624-5060  
Main Export Contact:  
Wayne Gould, President

The Pool Connection Limited is a manufacturer of spas and spa equipment operating out of a 7 000 square foot plant in Mississauga, Ontario. Under the brand name Royal Spas, The Pool Connection currently supplies some Northern United States dealers.

The Royal Spa product line consists of four models. The Coachman model has a seating capacity of two and is designed for areas with limited space. The Coachman features four hydro air jets, air controls and suction and offers a water capacity of 100 gallons (378 L).

The Royal Coach model offers a full size lounger, recliner seat, five hydro air jets, two air controls, skimmer, suction and bucket seat. The Royal Coach has a water depth of 28 inches (71 cm) and a water capacity of 250 gallons (950 L). Outer measurements are 60 inches by 84 inches (152 x 213 cm).

The Octabel model has a choice of 28 inch (71 cm) or 36 inch (92 cm) water depths. This octagonal spa can seat up to seven persons and has a water capacity of 465 gallons (1 760 L).

Five hydro jets, two air controls, suction and skimmer are standard.

The Royal Beach model has contoured seating, five hydro air jets, two air controls, skimmer and suction. It has a capacity of six with optional depths of 28 inches (71 cm) or 36 inches (92 cm) and a water capacity of 400 gallons (1 530 L).

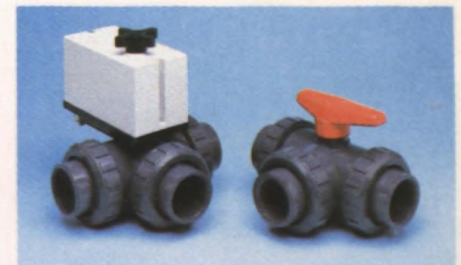

Royal Spas are available in brown and blue marble, bone and sequoia colours.

## Praher Canada Products Ltd.

116 Arrow Road  
Weston, Ontario  
Canada M9M 2M1  
Telephone (416) 749-7924  
Fax: (416) 749-7091  
Main Export Contact:  
John Dirneder, Manager

Praher Canada Products Ltd., incorporated in 1986, employs five people in a 10 000 square foot plant, warehouse and head office facility in Weston, Ontario.

The company manufactures a broad range of PVC-ball valves in either, 2 or 3-way designs; motorized ball valves; ABS or NYLON Multiport valves; automatic backwash systems; and PVC unions and pipe brackets. The 2-way PVC ball valves are available in 3/8 inch to 3 inch sizes and the 3-way PVC ball valves are available in 1 1/4 inch to 2 inch sizes. The 1 1/2 inch single union ball valves, with their unique features, are specially designed for economical use in the spa and hot tub industries. Praher is presently the only worldwide manufacturer of the 3 inch 5-way 6 position multiport valve, in both

manual and automatic models.

The pipe fitting line consists of PVC unions in many different size models and elbows for multiport plumbing; particularly on filter tanks. Pipe hangers are available in 4 different sizes and can be made of either polypropylene or fibreglass reinforced nylon.

The company presently exports to the U.S.A. and Mexico.

## Precisioncraft Limited

173 Glidden Road  
Brampton, Ontario  
Canada L6W 3L9  
Telephone: (416) 459-3377  
Fax: (416) 459-3384  
Main Export Contact:  
Rob Quinn, Sales Manager

Incorporated in 1963, Precisioncraft Limited has a 36 000 square foot plant located in Brampton, Ontario and employs approximately 100 people. The manufacturing operation is fully integrated as it makes its own tooling, injection molds, and all of the entire product. It also has a complete art department, screenmaking, screenprinting, packaging, and assembly operation.

Precisioncraft Limited manufactures a complete range of acrylic drinkware under the registered trade name, "Acryglas". The line consists of four sizes of tumblers ranging from 10 ounce (0.28 ml) to 20 ounce (0.56 ml) sizes, two sizes of wine goblets,

champagne flutes, pilsener, two designs of beer steins, two designs of serving trays and a 60 ounce (1.7 L) pitcher.

The company's drinkware designs are of the highest quality for the market. The designs are unique and the products are often mistaken for crystal glass. They are sold both plain and decorated in a variety of fashionable designs.

"Acryglas" drinkware is sold to the leisure market usually appealing to the high end of the market.

Precisioncraft currently exports directly to the U.S.A. and the Caribbean with approximately one-third of its production being for export markets.

## Premier Industries of Canada

5837 Production Way  
Langley, B.C.  
Canada V3A 4N5  
Telephone: (604) 530-5321  
Fax: (604) 530-9501  
Main Export Contact:  
Merv Turchak, President

Premier Industries of Canada was established in 1984 and operates from a 14 000 square foot injection moulding manufacturing plant in Langley, B.C.

The company manufactures a full line of pumps for the swimming pool, spa and whirlpool bathtub markets along with whirlpool jets, cartridge filters for both pools and spas, stainless steel heat exchangers, spa air blowers, and PVC unions. It is also introducing a new spa support pack in both electric and heat exchanger models.

Premier Industries of Canada is currently exporting to the United States and looks to increase this market and establish other foreign markets.

## Produits Montjoie Inc.

1300, Newton  
Boucherville, Quebec  
Canada J4B 5H2  
Telephone: (514) 641-4330  
Main Export Contact:  
J. Gaetan Helms, President

Incorporated in 1970, Produits Montjoie Inc. has a 16 000 square foot plant and head office in Boucherville, Quebec just outside of Montreal, and employs 75 people.

The company manufactures 15 models of one piece fibreglass inground swimming pools and three models of large spas. The one piece pool models range in size from 17 ft. x 40 ft. (5.19 m x 12.20 m) to a smaller 7 ft. x 15 ft. (2.14 m x 4.58 m) with depths ranging from 8½ ft. (2.44 m) down to a standard 4 ft. (1.22 m) depth. These one piece pools are easily installed and virtually maintenance free.

Produits Montjoie Inc. also has several exercise pools with swim jets plus a combination one piece swimming pool with a full size spa at

one end.

The large spas range from an 8 ft. 7 inch diameter round with contoured seating, to a 7 ft. x 14 ft. 10 inch kidney and a 8½ ft. swimming model.

## **Raypak Thermonics (Canada) Ltd.**

124 Skyway Avenue  
Rexdale, Ontario  
Canada M9W 4Y9  
Telephone: (416) 675-7262  
Fax: (416) 675-2948  
Main Export Contact:  
Richard Pope, Sales Manager

Raypak Thermonics (Canada) Ltd. is a major Canadian producer of gas water heating equipment for swimming pools and spas.

Their new "Versa" series gas heater has improved flow design offering water flow through the heat exchanger at 115 gallons per minute. It will accept either 1½ inch (38 cm) or 2 inch (50 cm) connections to accommodate today's larger pumps. The Versa Unitherm Plus flow regulator system controls both water temperature and flow rate within the heat exchanger.

The patented Econotherm heat exchanger is made of unique, all

copper finned tubes while the header castings are made of porcelainized cast iron. Designed for right hand plumbing, it can easily be reversed for leftside installation.

The Versa combustion chamber is constructed of thick 1½ inch (38 cm) ceramic fibreboard panels for durability and lighter weight. A new top design for the stackless model shields the heater from wind and debris. A choice of millivolt-powered with standard pilot ignition or the electronic model with an energy saving intermittent ignition device (I.I.D.) is available.

## **R & D Pool Control Systems Ltd.**

P.O. Box 8145  
Dundas, Ontario  
Canada L9H 5E7  
Telephone: (416) 627-3133  
Main Export Contact:  
J. Doug Paton, President

R & D Pool Control Systems Ltd. was incorporated federally by two faculty members of a community college in Ontario in 1973. This small, highly specialized firm designs water quality treatment and control systems for public and semi-public hydromassage and swimming pools.

The systems designed, sold, installed and monitored by the company, are on-line or side-stream sample electrodes sending signals to PC boards assembled in the U.S.A. to standards established by this firm. Motor contactors, flow switches, relays, valves, inserts and other remote readout meters are manufactured in Canada along with pipe and fittings (Sch. 80 PVC and CPVC). Each system is custom designed

and installed by this firm. Components, where applicable, are CSA, UL and Hydro approved of non-corroding FRP and stainless steel or plastic materials. Staff training and trouble shooting advisory services are also included. The systems meter and control acid-base levels in the sample stream as well as signal pumps, motors, relays to meter in disinfecting and oxidation chemicals and processes such as gas or liquid chlorine, bromine, iodine, complex of oxygen (ozone), or saline generated free available chlorine. The analog SPATROLLER is the only exclusive application system in North America for public whirlpools, spas, jetted tubs or hydromassage pools.

## **Rockcliffe Recreational Products Limited**

**Div. of Scarborough Canvas  
Fabricators Ltd.**

239 Station Street  
Ajax, Ontario  
Canada L1S 1S3  
Telephone: (416) 428-6990  
Fax: (416) 683-0708  
Main Export Contact:  
Tim Golden, Director of Sales

Rockcliffe Recreational Products was developed to consolidate the vinyl liner and steel wall pool kit manufacturing capabilities of Scarborough Canvas Fabricators, its parent company.

Since the early 1960's, Scarborough Canvas Fabricators has grown to become one of the largest manufacturers of vinyl pool products in North America and has consistently led the industry in product innovation. It pioneered the development of continuous bead welding, full ¼ inch lap-welded seams and computer assisted design of vinyl liners.

Under the Rockcliffe name, the company, supplies over 60 designs of complete pool kits consisting of Z-700 galvanized steel wall panels, A-frames and deck supports. The liners are

varied in pattern and available in 20, 30 and 40 mil thicknesses. Each liner is made of 100 per cent virgin vinyl with super strong ¼ inch lap welds. They are fully sanitized, winterized, U.V. stabilized and top coated to protect the prints.

## Rocky's of B.C. Leisure Ltd.

1372 Main Street  
North Vancouver, British Columbia  
Canada V7J 1C6

Telephone: (604) 985-0525

Fax: (604) 985-2347

Main Export Contact:

Danny Sovernigo, Secretary-Treasurer

A complete line of pool cover roller systems is offered by Rocky's of B.C. Leisure including permanent and portable models for commercial, inground residential and above ground pools.

The Rocky Permanent model number 4PM is the smallest in the line and will fit under diving boards. This unit simply anchors into the concrete deck or can be attached to a wall where space is limited. Ground clearance is 8½ inches (21.6 cm) and is recommended for use with rectangular pools.

The Rocky Portable number 3 is the line's most popular model for average sized residential pools. It is strong with special 2 inch (5 cm) castors that make it easy to move to and from poolside and is usually installed at the end of an irregular shaped pool. This portable has an 11½ inch (29 cm) ground clearance.

The Rocky II Senior Commercial and Junior Commercial models are designed with heavy gauge aluminum tubing and 4 inch (10 cm) castors. The Junior Commercial has a clearance of 13½ inches (34 cm) and is ideal for large residential and smaller commercial pools. The Senior Commercial has a 16½ inch (42 cm) clearance and an extra long handle for rolling ease. This

*The number 3 portable model of Rocky's Eazy-Roller with 2 inch (5 cm) castors is the most popular for residential swimming pools.*

unit is excellent for large commercial and public pools. Several blankets can be rolled on top of the one using velcro fasteners.

The above ground model is a specially designed Eazy-Roller with two uprights to handle pool covers up to 4 feet (1.25 m) off the ground.

Rocky's of B.C. Leisure Ltd. ships directly to the United States market.

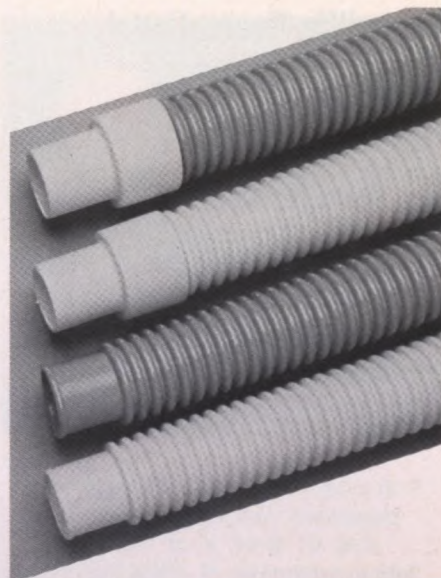

## S. D. M. Inc.

1288 Montee Leger  
Les Cedres, Quebec  
Canada J0P 1L0  
Telephone: (514) 455-7988  
Fax: (514) 452-2066

Main Export Contact:  
Edward Horniak,  
Director of Marketing

S. D. M., established 1974, with manufacturing facilities located near Montreal, Quebec, has developed into one of Canada's major processors of plastic. The custom fabrication division, with its extrusion, injection moulding and blow moulding machinery, offers a widely diversified service to its customers including vacuum hose and accessories for the swimming pool industry.

The company's vacuum hose comes in all popular lengths for 1¼ inch and 1½ inch diameters. Models include a swivel cuff, moulded cuff and standard or heavy duty blown cuff. The material is U.V. stabilized with three years of protection. Hoses are poly bagged, boxed or in bulk according to the customer's requirements.

## 7-11 Pools & Metalfab Ltd.

41 Shorncliffe Road  
Toronto, Ontario  
Canada M8Z 5K2  
Telephone: (416) 231-6508  
Fax: (416) 231-9923  
Main Export Contact:  
David Shaldoff, President

7-11 Pools & Metalfab Ltd. manufactures a broad range of above ground, onground and inground steel walled, vinyl-lined swimming pool kits. The above ground products feature walls fabricated of hot-dipped galvanized steel with baked-on brown metallic enamel paint. Walls are an attractive brown woodgrain finish. The vinyl liner is of 20 mil virgin vinyl. Sizes run from 15 feet to 27 feet (4.6 m to 8.3 m) in the round shape and 15 feet × 24 feet (4.6 m × 7.4 m) to 18 feet × 33 feet (5.5 m × 10.1 m) in the oval shape.

The onground and inground product lines feature Z700/G235 zinc protection on 14 ga. steel walls and adjustable A-frames for added wall strength. Liners are 30 mil virgin sanitized vinyl decorated with exclusive patterns. The

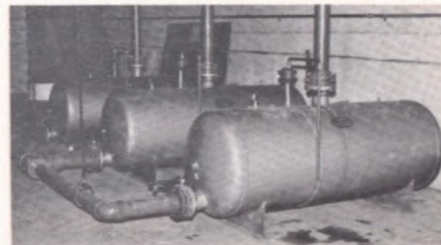

onground is designed for surface installation with sizes ranging from 13 feet × 24 feet (4 m × 7.4 m) to 19 feet × 41 feet (5.8 m × 12.6 m), along with 20 foot (6.1 m) and 26 foot (8 m) sizes. The inground product line consists of various shapes ranging in sizes from 12 feet × 24 feet (3.7 m × 7.4 m) to 20 feet × 40 feet (6.1 m × 12.3 m). The inground pool features a patented coping for installation ease.

## S.S. Filtration & Development Co. Ltd.

1429 Speers Road  
Oakville, Ontario  
Canada L6L 2X5  
Telephone: (416) 827-3171  
Main Export Contact:  
Austin Carroll

Incorporated in 1961, S.S. Filtration & Development Co. Ltd. has built quality commercial and semi-commercial water filtration systems for over 25 years. The company's Past President and Founder, J.W. Carroll, is said to be the inventor of the high rate sand filter. The innovative design of using one grade of sand and screens, instead of multiple layers of filter media, (ie; sand and gravel) allows for higher flow rates without sacrificing filtration performance. From the sand and screen method comes the company's name — S.S. Filtration.

The commercial filtration tanks from S.S. Filtration are constructed of ¼ inch steel and constructed in a horizontal configuration which requires less space (up to 25 per cent less) and allows the units to be stacked if

necessary. As a replacement system, these units can be moved through a standard doorway. The inside of the tank has two applications of epoxy coating to protect against corrosion and the outside has a primer and top coat. The heavy duty tank is also outfitted with a sacrificial anode.

The underdrain system is constructed of PVC plastic laterals as is the diverter assembly.

## Sauna Craft

115 Bowes Road  
Unit 3  
Concord, Ontario  
Canada L4K 1H7  
Telephone: (416) 736-1568  
Fax: (416) 738-7872  
Main Export Contact:  
Al Wynn, Manager

Sauna Craft manufactures pre-built sauna rooms, sauna liner kits and sauna heaters. The pre-build sauna is ideal for the do-it-yourselfer as the walls and ceilings are assembled using the 2 inch by 4 inch (50 × 100 cm) double tongue-and-groove, clear, kiln dried, western red cedar. The sauna room slides together in just three hours. The benches are pre-built and solid cedar door, with window, is pre-hung on channelled jambs. The sauna comes complete with a heater, control, light and floor.

The sauna liner kit is designed for the building contractor or handy man. The kit includes 1 inch by 4 inch (25 mm × 100 mm) tongue-and-groove western red cedar in 7 foot (2133 mm) or 8 foot (2438 mm) lengths for the walls and ceilings, and 2 inch by 4 inch

(.50 mm × 100 mm) clear cedar for the benches. The liner kit comes with a heater, control, light, sauna door and complete instructions.

Sauna Craft also manufactures the widest range of sauna heaters on the market.

## Sauna Magic Incorporated

5500 Tomken Road  
Unit #9  
Mississauga, Ontario  
Canada L4W 2Z4  
Telephone: (416) 625-4200  
Fax: (416) 625-4851  
Main Export Contact:  
J.P. Jacob,  
Executive Vice President

The Saunette, a portable steam bath manufactured by Sauna Magic, is a sturdy fibreglass unit, weighing only 37 kg (82 lbs.). It can be used inside or outside the home. The unit needs neither plumbing nor special wiring and is extremely energy-efficient (using less than 10¢ worth of electricity per hour). Saunette is moveable on two built-in polypropylene wheels. Because of its handy size 27½ inches wide by 36 inches deep by 48 inches high (79 cm by 97 cm by 116 cm) it passes through any standard door and can be stored even in a closet. An adjustable cedar seat gives off a pleasant fragrance while the unit is in operation. Steam is produced by pouring water into the steam generator.

Saunette is C.S.A. approved and is manufactured in 110 and 220 voltage.

Presently, the colours grey, ivory and red are offered. Any additional shades may be added to keep up to date with fashion changes.

## Savu Sauna Products Ltd.

210 Regina St. North  
Waterloo, Ontario  
Canada N2J 3B6  
Telephone: (519) 885-1840  
Fax: (519) 885-1707  
Main Export Contact:  
Catherine Jalasjaa

Savu Sauna Products Ltd. has a 40 000 square foot plant, showroom and head office in Waterloo, Ontario where it manufactures and distributes pre-built saunas, sauna heaters and sauna kits for the North American market.

The Savu pre-built sauna kit can be assembled easily in just a few hours. No plumbing, floor drain, nor special venting is required. The ceilings and walls are built entirely of solid 2 inch by 4 inch (50 × 100 cm) tongue-and-groove logs of western red cedar. It requires no further insulation and is completely finished inside and out. Solidly free-standing, it needs no supports. The four walls are joined in a unique interlocking system that automatically squares itself to create a strong and rigid unit. All logs interlock

together inside the corners with long metal rods. When all walls are in place, they are compressed using the four corner rods to eliminate any gaps and provide a "sauna pressure-seal". The wood mouldings on the outside corners complete the "all-cedar" look.

All sizes are available from 4 foot (1.23 m) by 5 foot (1.53 m) to 10 foot (3.0 m) by 12 foot (3.7 m).

## Spincraft Manufacturing Corporation

Main Export Contact:  
Geoffrey P. Brown, President

Operating under the brand name "Homecraft Saunas", Spincraft Manufacturing Corporation has been manufacturing saunas, sauna heaters and sauna accessories since 1981.

The sauna product line consists of pre-cut kits of kiln dried red cedar in all sizes and plans for 5 foot by 6 foot (152 cm by 183 cm) and 6 foot by 8 foot (183 cm by 244 cm) sauna rooms.

Sauna heaters are available in 4 and 5 KW sizes for corner or wall mounts, 5, 7.5 and 9 KW sizes for wall mount

only, and the larger 12 and 15 KW models for floor mounting. These sauna heaters will heat sauna rooms from 100 to 900 cubic feet in size. The product line also includes a range of sauna controls, timers and a 24 hour control for commercial installations, plus a full line of sauna accessories from buckets and ladles to eucalyptus oil.

The sauna heaters feature stainless steel construction and a unique continuous free flow design for air circulation.

## Stanchem

### A Business Unit of C-I-L Inc.

195 The West Mall  
Suite 500  
Etobicoke, Ontario  
Canada M9C 5K1  
Telephone: (416) 620-8269  
Fax: (416) 620-8267  
Main Export Contact:  
P.L. Sullivan, Product Co-ordinator

Stanchem is a large Canadian producer of bulk Calcium Hypochlorite 65% for the swimming pool industry. It is interested in building export markets around the world and is prepared to ship the product in generic packaging classified under UN 2880, Packaging Group II.

Packaging would be available in 45 kg (100 lb) fibre drums with a lever type lok rim complete with cadmium rivets. Packed 18 drums per pallet and stretch wrapped.

All export shipments would be from Montreal, Toronto or Vancouver.

## Sunglo Solar Ltd.

35 Citron Court  
Concord, Ontario  
Canada L4K 2S7  
Telephone: (416) 738-0300  
Main Export Contact:  
Joe Sherman, President

Since 1977, a leading Canadian manufacturer of solar collectors and equipment, for swimming pool applications, Sunglo Solar has developed a major market in North America.

The Sunglo collector is made from a durable co-polymer polypropylene with special additives and stabilizers formulated into the material. The system has been proven to be durable, highly resistant to pool chemicals and to hail, freezing and other extremes of climate. The collector has a very high efficiency and low back pressure. Structurally it is heavily constructed with reinforced end adaptor connections and designed with a hermetically sealed lap welded header. The reversed top and bottom headers reduce ice and debris build-up while

the unique double strap mounting system is designed to allow roof drainage behind the collector.

The collector panels measure 4 feet (1.23 m) by 8 feet (2.46 m) or 4 feet (1.23 m) by 10 feet (3.0 m) in size and have a recommended flow rate of 3 to 8 gpm (13.5 to 36 litres/pm) with a maximum operating pressure of 25 psi.

Besides the liquid flat plate collectors, Sunglo also manufactures the PC-200 Solar Pool Controller and automatic controller kits.

## Sunhut Pool Enclosures

### Division of Glen White Industries Ltd.

R.R. #5  
Aylmer, Ontario  
Canada N5H 2R4  
Telephone: (519) 765-2244  
Fax: (519) 773-7398  
Main Export Contact:  
Douglas A. Budden, General Manager

A division of Glen White Industries Ltd., Sunhut Pool Enclosures was founded in 1977 and was incorporated in 1981. Steelway Building Systems is the parent manufacturing arm of Glen White Industries Ltd., with Sunhut being one of four divisions. The company employs between 75 to 85 employees within two plants covering 90 000 square feet located in Aylmer, Ontario (Southwestern Ontario). The company is presently exporting to the Eastern United States.

Sunhut Pool Enclosures are manufactured in various sizes to accommodate residential and commercial swimming pools. The structural framing is steel, protected by two coats of baked polyester paint. All components are corrosive resistant to pool chemicals. Sunhut Enclosures are

a permanent structure and a passive solar collector allowing the user a minimum of eight months of continuous warm water swimming. Sunhut provides tempered glass sliding wall sections which can be opened for ventilation during the hot weather. The building can be closed to keep out dirt.

## Technican Industries Ltd.

383 Elgin Street  
Brantford, Ontario  
Canada N3T 5W4  
Telephone: (519) 756-3442  
Fax: (519) 756-3146  
Main Export Contact:  
Doug Laver, General Manager

Technican Industries Ltd. was incorporated in 1981 and is a leading Canadian manufacturer of swimming pool diving boards and slides, inwall steps and acrylic spas.

The board and slide products are manufactured with an acrylic surface and backed with fibreglass reinforcing. Several popular models are available in both product lines. The acrylic steps come in four foot (1.23 m), six foot (1.84 m) and eight foot (2.46 m) lengths in either straight or curved configurations.

Several models of acrylic and rovel spas are manufactured by Technican Industries in two lines. The Swan line is a popular trade brand of finished spas while a distributor's shell product is

also available. The company also markets a wide range of wooden skirts for spas.

## Teledyne Laars Canada

480 South Service Road West  
Oakville, Ontario  
Canada L6K 2H4  
Telephone: (416) 844-8233  
Fax: (416) 844-2635  
Main Export Contact:  
T.H. Sloan,  
Vice President, General Manager

Teledyne Laars Canada manufactures a complete line of gas, copper fin tube pool and spa heaters along with a line of commercial gas hydronic boilers and hot water machines along with a complete line of residential hydronic boilers.

The swimming pool gas heater line ranges in size from 125 000 BTU's to 400 000 BTU's in both natural gas and propane models. Included in the pool and spa line is an electric spa heater in 6.0 or 11.5 KW capacities.

Teledyne Laars Canada has complete manufacturing facilities located in Oakville, Ontario with a plant of approximately 50 000 square feet and sixty employees.

## Torlan Manufacturing, Inc.

4550 Rhodes Drive  
Windsor, Ontario  
Canada M8W 5C2  
Telephone: (519) 948-7665  
Main Export Contact:  
Italo Bertoni, President

Incorporated in 1980 Torlan Manufacturing, Inc., has a new 10 000 square foot plant and head office in Windsor, Ontario, with an additional warehousing facility of 4 000 square feet also located in Windsor. Torlan Manufacturing has a patented designed pool which enables them to produce a wide range of free form inground steel walled, vinyl lined swimming pool kits. The steel walls are made of best quality 14 gauge, 2 oz. galvanized steel.

The product line consists of approximately 15 shapes ranging in size from 14 feet x 28 feet (4.3 m x 8.7 m) to 24 feet x 40 feet (7.4 m x 12.4 m) with new shapes and sizes in the planning. Their patented inground pool kit features supporting "C" frames designed for maximum support of pool

walls and concrete decks. Another feature is their patented coping which was designed for ease in installation of liners and winter covers without the use of water bags. All liners are made of 30 mil exclusive blue on blue mosaic print patterned vinyl. Another important feature is special expansion joints which can be supplied with the products.

## Tubbs Manufacturing Inc.

4020 - 7th Street, S.E.  
Calgary, Alberta  
Canada T2G 2Y8  
Telephone: (403) 258-0222  
Main Export Contact:  
Bob Degelman, President

Tubbs Manufacturing Inc. is a manufacturer of a broad range of products including acrylic and rovel spas, wooden hot tubs and solarium covers for hot water products. Located in Calgary, Alberta the company works out of a 13 000 square foot plant where it operates one of the largest vacuum formers in North America.

The acrylic and rovel models of spa products by Tubbs are well designed utilizing various shapes and features including recliners and multi level seating.

The Tubbs wooden hot tub is a true coopeage tub meaning there are no tongue-and-groove joints and no external pipes. The walls are sloped for bather comfort. A unique design in a solarium cover allows the spa or tub to be partially exposed to the air. The

A unique solarium that allows exposure to the air is a popular item for Tubbs Manufacturing Inc.

standard size is an eight foot model but custom orders can be accommodated. The solarium design is also adaptable to house attachments whereby half the cover is used and the height is increased. The doors are still available for air exposure.

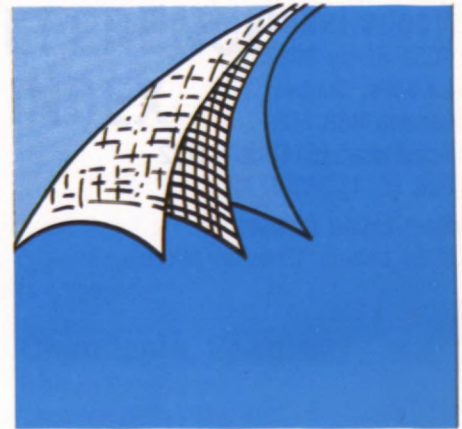

## Twinpak Inc.

369 Elgin St.  
Brantford, Ontario  
Canada N3T 5V6  
Telephone: (519) 759-2500  
Main Export Contact:  
John Mateer, Sales Manager

Twinpak, founded in 1954, is the plastic packaging entity of CB Pak Inc., which is 80% owned by Consolidated-Bathurst.

Twinpak manufactures a laminated foam material branded "Tri-Flex" which is ideal for insulated swimming pool and spa covers. The "Tri-Flex" foam product is a unique combination of polyethylene components comprising 1/8 inch (3 mm) thick polyethylene foam laminated to an attractive polyethylene coated woven fabric.

Tri-Flex foam products are supplied in roll form for easy handling and fabrication by conventional methods. A standard roll width is 72 inches (1.84 m).

## U.C.P. Paint Inc.

1785 Fortin Blvd.  
Laval, Quebec  
Canada H7S 1P1  
Telephone: (514) 381-9217  
Main Export Contact:  
Zoltan Jakabovits, Vice President

Incorporated in 1960, U.C.P. Paint Inc. has manufacturing facilities in Montreal and Toronto with a combined total area of 150 000 square feet. Its head office in Montreal employs 55 people and its second manufacturing and warehousing facility in Toronto employs 35 people.

U.C.P. Paint Inc. manufactures a broad range of chlorinated rubber swimming pool enamel in several attractive pool colours. The product is highly resistant to acids and alkali and the finish will be maintained for years.

## Ultra Heat Pump Inc.

2430 Laurentien Blvd.  
St. Laurent, Quebec  
Canada H4R 1J9  
Telephone: (514) 332-6060  
Fax: (514) 332-9560  
Main Export Contact:  
Bob Liberatore, Sales Manager

Ultra Heat Pump Inc. is a manufacturer of heat pumps for swimming pool applications.

Three models of the Ultra heat pump, including a unit for above ground pool applications, are now available. The model 3000, for above ground pools, has a two HP compressor and measures 26 inches (65 cm) by 26 inches (65 cm) by 21 inches (52.6 cm) with a weight of 145 lbs. (66 kgs). The 5000 and 6000 models for inground pools have 2.5 HP and 3.5 HP compressors respectively and weight of 165 lbs. (75 kgs) and 175 lbs. (80 kgs). Similar dimensions of 30 inches (75 cm) by 28 inches (70 cm) by 23 inches (57.5 cm) apply to the inground units.

The Ultra design has the fan fitted into the thermo-pump behind the evaporator which increases air velocity

through the evaporator and diminishes fan revolutions to result in a noise reduction.

Top quality materials and coatings provide extended life against rust resulting from the extended exposure to chlorine and other corrosive materials.

## Vogue Industries Ltd.

9031 Salley Street  
La Salle, Quebec  
Canada H8R 2C8  
Telephone: (514) 363-3232  
Fax: (514) 363-1772  
Main Export Contact:  
Gilles Lebuvis, Director, Mktg.

Vogue Industries manufactures a complete line of round and oval above ground pools, vinyl liners and solar rollers. The pools are made of hot-dipped galvanized steel and a sophisticated corrugation process developed by the company, guarantees strength and flexibility of the pool walls. Vogue also manufactures an aluminum pool featuring a magnesium alloy for optimum hardness and strength. Pools are available in round shapes from 12 feet (3.7 m) to 27 feet (8.2 m) and in oval shapes from 10 feet × 22 feet (3.0 m × 6.7 m) to 18 feet × 33 feet (5.5 m × 10.1 m). Their unique metal protections, Perma-Sol, Poly-Shield, Dura-Lam and Cooper Grip (registered trade marks) ensure longevity to the attractive finishes on walls and structures. All hardware such

as screws and bolts are stainless steel for extra hardness and corrosion resistance.

Vogue's vinyl liners are made of virgin vinyl with overlapping electronic seams. The 20 mil pool liners are available in a choice of attractive wall or floor prints and optional deep ends.

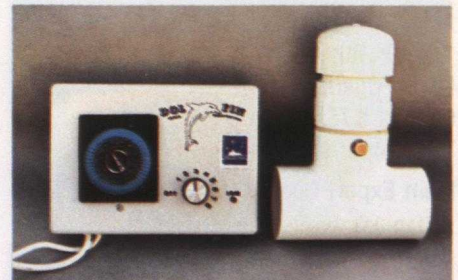

## Watertrol Ltd.

P.O. Box 17  
Meadowvale, Ontario  
Canada L0J 1K0  
Telephone: (416) 452-7150  
Main Export Contact:  
Ron Shawley, President

Watertrol Limited was founded in 1985 and has a head office located in Mississauga, Ontario. The company specializes in water purification primarily for swimming pools and spas but also for drinking water, water fountains, and photo finishing.

Watertrol Limited manufactures a family of water purification systems. Each system is based on a copper/silver ionization technology whereby copper ions kill algae and silver ions kill bacteria. The units run on 110 VAC 60 Hz and adapt to any size plumbing. A system can purify water in a 1 000 litre spa or up to a 250 000 litre swimming pool.

Each system has a variable output

which can be set based on the environment, condition of the water, and bather load. The unique feature of Watertrol's system is the ability to replace chlorine or bromine as the sanitizing agent for swimming pools and spas.

## Western Purity Biochemical Incorporated

13245 Comber Way  
Surrey, British Columbia  
Canada V3W 5V8  
Telephone: (604) 591-8611  
Fax: (604) 597-2853  
Main Export Contact:  
Keith Scott, President

A Canadian West Coast manufacturer of swimming pool and spa specialty chemicals, Western Purity Biochemical produces and packages product in a 5 000 square foot factory in the city of Surrey, just outside of Vancouver.

The Western Purity line includes a complete range of specialty chemicals in both chlorines and bromines. water balancers, defoamers, tile cleaners, algaecides and coagulants are all part of the line, along with stabilized chlorines and super-chlorination products.

Clear labelling and well designed, attractive packaging make Western Purity products easy to display; easy to retail; and easy for the consumer to use.

Products are supported with

marketing, literature such as pool and spa maintenance booklets, dealer literature and manufacturers chemical expertise. A popular spa tote kit, containing all of the products necessary to maintain spa water is just one of the marketing tools available.
