The lifeboat men triumphed after more than thirty hours of hard and Head in the English Channel. dangerous work. Buffeted and driven back time after time, they refused to relax their attempts to save the handful of shipwrecked persons, and finally this afternoon, aided by the receding tide and some improvement in the weather, their arduous fight was crowned with victory.

Altho several of the persons rescued were in the last stages of exhaustion, they now are on the road to recovery. Some of them have been even able to tell the story of their

awful experiences.

Two women and a child are still on board the wreck, but it is feared that they are dying. Nothing daunted, however, the gallant Dutchmen are preparing to make further desperate efforts to rescue these unfortuncted.

At Daybreak. When daylight broke this morning a handful of survivors of the Great Eastern Railway Company's steamer Berlin, from Harwich, England, to Rotterdam, which was wrecked off the Hook of Holland, yesterday morning, could still be seen clinging to the af-ter part of the steamer. The efforts made to rescue the survivors yester-day were continued thruout the night and to-day, but until this afternoon they proved futile, owing to the furcus seas and heavy snowstorm which raged all night long, rendering it im-possible for the tugs or lifeboats to terrific fury. So intense was the cold last night that it was thought that those who were still live on the remnant of the steamer last night must have been frozen to death.

The stern of the Berlin is so firmly embedded in the sandbank on which she went ashore that it does not appear to have moved during the night. At highwater this morning the poop deck houses were the only portions of the steamer visible, and there the few survivors were huddled.

While the case against the accused is wholly circumstantial the authorities claim to be justified in placing Mrs. Perkins in custody.

At the inquest into Perkins' death Dr. Kerr. the family physician, stated that he knew of no strychnine being about the house. The poison book at the local drug store, however, shows that Rolph Carrig, brother of Mrs. Perkins, purchased a quantity in October. It is said, too, that strychnine the local drug store, however, shows that Rolph Carrig, brother of Mrs. Perkins, purchased a quantity in October. DEAR, BRAVE LITTLE WIFE THAW'S GREETING TO EVELYN

Allowed to Visit Husband Tombs -- Two More Days on Witness Stand.

New York, Feb. 22.-The principals

in the Thaw trial spent the day rest-

ing, every one of them apparently appreclating the respite from the somewhat harrowing scenes which have marked this week's proceedings. By the time the trial is resumed next Monday morning Mrs. Evelyn Nesbit Thaw will probably have entirely recovered her composure and will probably be prepared again to take her place in the witness chair. Yesterday it was said that she was on the verge of illness and that a cup of broth had been her only sustenance for two days. She was so weak as the result of her day's experience that she retired immediately upon reaching her apartments and did not again arise until late to-day. The only reason why she left her bed then was to call, as she had promised, upon her husband in the Tombs prison. Ordinarily visitors are not allowed in the big grey building on holidays, but an exception was made to-day with regard to her and to Thaw's counsel.

It was well after poon when Mrs. regard to her and to Thaw's counsel.

It was well after noon when Mrs.
Thaw arrived at the prison. She was accompanied by Daniel O'Reilly, one of her husband's lawyers, and was shown at once into the consultation-room. There had been reports in some of the early editions of the papers this morning that Thaw was himself in bad physical condition, but when he appeared to greet his wife he declared that he was feeling exceptionally well and was enjoying his usual vigorous health. Thaw rushed into the conference-room and clasped his wife in his

ence-room and clasped his wife in his arms, saying: "My dear, brave little wife." The two talked together for a long while and then Mr. O'Rellly was called into the conference.

Mrs. Thaw on direct examination from Major Henderson of the handwriting of Stanford White. The letters were not written to her, but to another young woman. Mr. Delmas is evidently holding these letters for introduction as evidence during the redirect examination and seemingly hopes to have them admitted to offset something Mr. Jerome was expected to bring out on cross-examination.

No intimation has ben given out as to what the letters contain or to whom they were written. They may constitute a new surprise yet to be in-

ected into a case which has already been prolific of astounding incidents. Altho it was evident that the slender, frail, childish wife of Harry K. Thaw was under a great strain yesterday only once did she give way to tears. That was when after fencing with the district attorney for an hour she was finally driven into a corne by his almost brutal questioning and took refuge in tears. But even then the tears did not seem to be caused so much by the details she was obliged to tell as by the fact that with all her fencing she had not been able to keep to herself the secrets which she knew must injured her husband's

What Jerome is After. The details of the European trip of 1904 are still to be gone into. The return to America and the false an-nouncement of Thaw's marriage to Evelyn Nesbit when the first scandal arose is still ito be told of. The facts of the pursuit of the young woman

by Stanford White after her marriage, which the defence told of in the opening address, must be brought out. The relations of the two before the marriage must be detailed. Evelyn Nesbit Thaw's ordeal is by no means over.

Of course the actual truth of the story which Mrs. Thaw told her husband and which is said to have unbalanced his mind cannot be questioned. If she told him the story and as ed. If she told him the story and as a result his mind became deranged, the truth of the story is immaterial. All that the cross-examination can develop is a doubt as to the veracity of the witness, a doubt as to whether she really did tell him or not. That is all the cross-examination can show—all but one thing. It is for the jury to decide whether constant brooding on the story which Evelyn Nesbit told Harry Thaw about her treatment at the hands of Stanford White actually caused derangement of

White actually caused derangement of his mind sufficient to make him inhis mind sufficient to make him incapable of knowing he was doing wrong when he killed White. Dit Thaw's actions after he heard the story, did his relations with Evelyn Nesbit, covering a period of two years after this revelation, did his treatment of her and White, and a thousand other things indicate that he was brooding over the story of that he was brooding over the story or that he was brooding over the story or that he was taking advintage of it?

This is for the jury to decide, and this is the doubt that District Attorney Jerome is attempting to instill in the minds of the jurors.

Confidence in Durnan's Camp. Clarile Commeford, the Toronto man at Staney in a letter to Lawrence Solman, says that Edward Durnan is in great fettle for his race with George Towns next Saturdaw. He says, among other things:
"I had not seen Durnan for a week until yesterday, and I never saw such a clauge in a man in such a short time. He is storping with a Caradian family and they hold themselves responsible for his wirning the race. It looks all in Eddle's favor. He is confident. If the weather is fine, 20,000 people will see the race, and fine 20,000 people will see the race, and the men divide 60 cents on each railroad dare. Goderich Tried to Be Sharp.

Berlin, Feb. 22.—Berlin still has a team in the running for intermediate honors in the O. H. A., and if they put up the pace of to-night, when Goderich was defeated by the score of 14 to 8, for a total of 24 to 16 on the round, the team will make a strong bid for the championship. Goderich tried a scheme ffat, falled to work. Belycher was unable to play owing to injury received in the first game, and the Sailors brought McIvor, an expelled O. H. A. player to take the former's place, McIvor was spotted, however, and Mascot McDonald donned a uniform. He only lasted two minutes, as he fell down when the referee's back was turned and was carried off the ice, altho nothing was the matter. Roschman had to go off, the balance of the game being played six a side.

The score was tied three times, and then the locals took advantage of Goderich's lack of condition by bombarding. McIvor in a merciless manner, scoring seven goals, while Goderich only tailled one. Referee Whitehead kept the game clean, only four players being fenced. He gave good satisfaction. The teams were:

Berlin (14)—Goal, Karger; point Rose-kat; cover-point, V. Cochrane; rover, Brinkert; centre, Watson; left wing, Rossman; right wing, A. Cochrane.

Goderich (8)—Goal McIvor; point, J. McLean; cover-point, Harris; rover, A. McLean; cover-point, Harris; rover, A. McLean; centre, Wiggins; left wing, McDonald; right wing, D. McDonald. All Saints (33): Forwards, Kusler; centre Saher; defence Hughes and Alward.
Wellesieys (21): Forwards, Hodden and Boynton; centre, Latchford; defence, Hunter and Whiteman.
Referee—Roben. W. Morrison was referee. These teams with Norway, are left for the final, that will be played Monday night.

Peterboro 7, Crescents 4. Peterboro, Feb. 22.—(Special.)—Peterboro defeated the New York Crescents here tonight by 7 goals to 4, in a game that savored somewhat of Copper Country hockey. ored somewhat of Copper Country hockey. The play was strenuous enough to satisfy the most enthusiastic Pittshurg fan, and several of the players carried nasty scars when the contest was over. The New Yorkers showed a tendency to hix things up, and the locals commenced to play a similar brand of hockey.

Miller starred for the home team, scoring six of the seven goals. Moore got the other. Liffiton was the best of the Crescents, scoring three goals, Kennedy netted the other one. The first half was played under O. H. A. rules and the second under American rules, which do not allow skating a man on side. The teams were:

Peterboro (7)—Goal, Lang; point, Glover; cover-point, Crowley; rover, Miller; centre, Parnell; right wing, Moore; left wing, Grabam.

by the attendance at Massey Hall last night for the lecture by Bicknell Young of Chicago, has attained considerable numerical strength in Toronto. The body of the ground floor was comfortably filled, while the lower gallery also held a number of interested listeners.

Mr. Young, who is a member of the lectureship board of First Church of Christ, Scientist, Boston, showed himself the possessor of a polished style, and of a smooth delivery. His exposition of the principles of Christian Science was celar and forceful. Christian Science, he said, might be defined as the science of all that re-

Menford, Feb. 22.—In a very fast game f bockey here last night, the local team efeated the Thornbury junior team by lated to God, and was science not only in relation to healing, but as corrective in relation to all problems of existence. Accepted theories of religion and science had scoffed at the association of the words, but reason and logic showed conclusively that science must relate to truth, and therefore to God, since God was the cause and basis of all that was true. Of all people, Christian Scientists believed most absolutely in Christ. They declared that His command to heal the sick was as binding as that to preach the gospel, and that there was no evidence that it was intended for no evidence that it was intended for His time only. It was scientific re-ligion that healed the sick in the C. McIredale.

Stratford Juniors in Final. Stratford Juniors in Final.

Stratford Midgets again outclassed St. Michaels, whining at Autual-street Blak last night in the second game of the G. II.A. semi-finals, 9—1. The score at least time was 7—1. The Midgets now go light time finals with a lead of 17 goals.

Stratford started right at St. Michaels as if the championship depended on the game and had tallied six goals before Mc-Cool notched the lonely one for St. Michaels.

sels.

St. Michaels seemed to be afraid to go in oi, the Stratford defence and contented themselves by shooting from a long range. It was one of these shots that tailied.

The second half was the best hockey, St. Michaels holding Stratford down to two goals. On form shown last night the Parkdale team would have given the Midgots a better game.

better game.

Stratford has a well-balanced feam, their star being Ramsay Backin at cover. His zigong rushes were the inture of the right. The crowd greatly enjoyed reasting him and when he was ruled off twice for minor offences, it was as good as a goal for him and when he was ruled off twice for minor offences, it was as good as a goal for St. Michaels. Rankin would have no trouble catching a place out any senior O.H.A. team, and only for the juniors would be playing with Stratford seniors to-day.

Frank Rankin and Sampson at centre, are real midgets. They are a fast pair and will give the much celebrated Stoddard and McDougall of Liadsay a stiff argument when they meet in the finals. Dunbar and Raiston are good wing men, the latter having speed to burn. He was laid out in the last haif by a crack over the ankle and had to retire for a short period. Reg. Rankin and Richards played a double goal-keeping system.

kin and Richards played a double goal-keeping system.

For St. Michaels Doheny did good work in the second half, but was a little off his usual game in the early part of the natch. Timn one, Dissette and Bulger were the best of the others. St. Michaels' defence played too close in and hardly gave Doheny a chance. The teams:

Stratford 10, St. Georges 2.

Stratford, Feb. 22.—(Special.)—Stratford Indians romped away from the St. Georges to-night, defeating the Saints by 10 to 2. The half-time score was 6 to 0. The Indians played an entirely different game than when they met the Saints here last week and won purely on their merits. They back-checked better and bored right in on the flags, while the Saints, with the exception of a few spasmodic periods, were entirely at sea.

They kest the game in the first half because they were on the boards the greater.

With Roosevelt—Remedie cause they were on the boards the greater part of the time, Housser alone being penalized four times. The Indians started

before him, and a glib salesman beside him, more than four or five men have bought cars that give them barely half of the enjoyment and service the right automobile can give. They never find out, perhaps, that another car, of another make, is twice better suited to their likes or needs. They never realize, it may be, the full possibilities of the automobile. They bought without certainty. They dealt with a concern whose interests lay in the sale of some one make, or two makes. Fair business, of course, honestly done, but did the buyer get quite all he might have had? His choice is made from the nine makes of motor-cars which represent the pick of what is best worth buying—the nine makes which in this year, 1907, embody, each in its specific way, the staunchest construction, the best mechanical design, the utmost ease and economy of operation. Unless a maker's product can pass that rigid standard, as it is administered by our staff of experts, it can find no place on our list. Every car which can so pass is on our list. Let it be for the Public Ownership League to bring a healthier spirit to bear in the political field and, by emancipating the public utilities = and services from corporation control, to remove the main incentive to corrupt influence.

Now that the people are becoming alive to the burden which franchiseholding corporations have imposed upon the public utilities and services and the revolt it has occasioned has compelled legislative action in several of the provinces, the monopolist interests are straining every nerve in order to confirm their hold. The concessions they operate are too valuable to be resigned without a struggle, and if they are to be defeated and the way opened for recovery of the public franchises already parted with and for protection of those that remain, public ownership supporters must act and work together. Much hard spade work must be done before the links between the legislatures and the corporations are finally broken, and it is brought home to them that public rights must prevail over private interests. THE RAILWAYS AND THE BOARD OF RAILWAY COMMISSION-ERS FOR CANADA. Sixty-sixth Article.

The following extract from a report of the proceedings of the legislative assembly, held on Wednesday, June 4th, 1862, and taken from The Globe of June 19th, 1862, makes interesting reading at this

"Mr. Wallbridge said there was a fixed determination in the minds of the people of Canada that no more money should be advanced by the province to the Grand Trunk Company. The exminister of finance stated that, by the act of 1856, the province did forego all the right we would have to reinstate ourselves in the road, if the company ceased to work it to the extent of the two million of preferential bonds authorized to be issued by that act. If that were true, he thought he could show that that act, by which we parted with two million, was so far remedied, when we came, in 1857, to part with the balance of the £3,111,000, which formed the original debt due to the province. In both acts the dealings of the province were with the Grand Trunk Company, and not with the bondholders. He believed that the house was anxious that the read might be put in a position in which it might go on, but in carrying out this desire, it was necessary that they should fully understand how the rights of the province were affected in the act of 1857.

"The act of 1856 was recited, and we declared that unless the company kept the road open and in working order, our claim revived. The fourth clause stated that we parted with the balance of £3,111,000 on condition and provided that the company, by means of the preferential bonds mentioned in the act of 1856and, therefore, in his opinion, whatever rights we parted with in 1856, we took back in 1857—or by means of any loans effected or to be effected, for such purpose, did complete their railroad thru from Riviere du Loup to Stratford, and supply the said railway with a sufficient plant and appliances to work the same sufficiently, and so long as they maintain and work the same regularly. That was tht point. The act of 1856 was recapitulated in the act of 1857 and was made part of it; the dealings of the province were with the Grand Trunk, not with the bondholders, and, as to the sums specified in both acts, our right to priority of claim was foregone, only provided the road was maintained and worked regularly. If that was the case, we had lost no part of the money. He was satisfied that the people of Canada, while determined to make no further advances to the Grand Trunk, did not desire to receive back from them one farthing of the money already given them. Their only desire was to keep the lien on the road, in order to have a security for its working. While we maintained that lien we could always compel the working of the road, but if we put it out of our hands and allowed any other person to step in and stop the road, we should not only lose the twenty million we have already advanced, but another large sum in order to get it back in our possession.

Mr. Scatcherd said: "There were three parties interested in this bill—the company, its creditors and the province, There was no doubt the company was well represented in this house. but it was doubtful whether the creditors, the share and bondholders were properly represente

The railways are very fond of pointing out the wonderful things they have done for Canada, and they entirely overlook the fact that Canada, and more particularly the Province of Ontario, have done a great many things for the railways for which they have never received a fair return. The Canadian railways were built with the money and credit of the people of Canada, and we naturally expect that they will at least furnish adequate facilities for the conduct of the business of the country. It is a great pity that the lien held by the Province of Ontario in 1856 was not continued to the present time, as it would have enabled us to secure proper service from the carrying companies.

Mr. Scatcherd's statement that the railways were well represented in the house could be repeated to-day with added vigor, as it is evident that the government at Ottawa is subservient to the railways, and willnot do anything to secure for the public the facilities to which they are entitled.

The people will get exactly what they deserve in dealing with the carrying companies, and it is our duty to protest vigorously against the inaction of our representatives in parliament. If the transportation question is kept prominently before the government, they will be compelled to take action in the interests of the people.

Health and Strength Regained Through Dr. Williams' Pink Pills. The after effects of la grippe are

more rerious than the disease itself. Its victims are left low-spirited and depressed; they are tortured with headaches and backaches; fever and chills. It leaves the sufferer an easy prey to bronchitis, pneumonia, rheumatism and often that most dreaded of all diseases, consumption. For the after effects of la grippe there is absolutely no medicine can equal Dr. Williams' Pink Pills. Every dose helps to make new, rich, red blood that drives disease from the system, and makes weak, despondent men and women bright, cheerful and strong. Miss Eugenie Donaldson of St. Jerome, Que., found a cure through these pills after other remedies had failed to help her. She says: "I took la grippe an did not seem able to shake it off. It developed into bronchitis: I coughed day and night and grew so weak that I could hardly move about. I tried of the sea is terrible. remedy after remedy, but as nothing seemed to help me I began to dread that consumption was developing and that my case was incurable. A friend urged me to try Dr. Williams' Pink Pills, and following that advice I got a supply. For two months I took the pills faithfully, following the directions given for their use. I am thankful I strength and I have since enjoyed perand ailing people to give Dr. Williams' Pink Pills a trial, for I firmly believe that they will find great benefit from the north pier end, and we at once set their use."

Rich, red blood is the one thing needed to maintain health and strength. Dr. Williams' Pink Pills actually make rich, red blood. That is the reason of their great popularity in every country in the world. That is why they cure anaemia, general week. why they cure anaemia, general weak. ness, rheumatism, neuralgia, indigestion, St. Vitus' dance, partial paralysis and the ills of girthood and womanhood by the sight of the survivors that they burst into tears. Matter of Vital Importance to the Public, and They Should Know the Truth-One Thousand Dollars Forfeit if Case is Not Proven.

At a meeting of the Toronto Board of Health a truly eminent doctor treated the board to a gaseous eruption of bile for which the Medical Health Office should have promptly prescribed. This renowned politico-physico poured into the unwilling ears of the board such a remarkable array of his pet platform or caucus epithets that it became a self-evident fact that he was extremely desirous of annihilating some real or imaginary foe by one fell stroke real or imaginary foe by one fell stroke of his wind sharpened hatchet. He seemed an expert and perfectly at home in the use of such terms as "vipers," "bloodsuckers," etc. He would revel in the extermination of such foes of humanity

humanity.

Now, who are these whom this 'model physician' would exterminate with the breath of his nostrils?' It is the people who have tens and hundreds of thou-

who have tens and hundreds of thousands of dollars invested in this city and elsewhere in the manufacture of proprietary medicines. See?

What are the facts? At least 90 per cent, of these medicines are absolutely pure and free from injurious ingredients, and possess genuine and inherent merit. The other fen per cent, can be fairly classed with many of the noxious and injurious prescriptions of those physicians whose knowledge of and experience in medicine is so limited that they have only an occasional patient, and whose practice is therefore secondary to other considerations and interests. These men have been hedged about and coddled by legislation as no other class of men have, giving them powers that should never be vested in powers that should never be vested in any body outside the Legislature. They can administer their crude concoctions and experimental prescriptions with inmunity, and if the patient "passes away" under the treatment or becomes an invalid or imbecile for life, it is "a visitation of Divine providence." Oh, not it is many the treatment of the providence. no! It is not the treatment nor the

But the tested, tried and absolutely reliable medicines, containing the purest and best drugs known to materia medica, generally the prescription of some eminent medical scientist who has sacrificed his life to the study and cure of some particular forms of disease and sacrificed his life to the study and cure of some particular form of disease, and put on the market because of its inherent value and proven ability to relieve suffering and effect a cure, must be consigned to limbo, and not allowed to go forth on its mission of healing, lest it "cut into" the sum total of the doctor's bill, who has been "tasting" on his name. bill, who has been "testing" on his pa-tients a thousand and one new drugs, whose curative properties are an un-known quantity, and which some pet firm has an interest in getting the medical profession to test.

It is to be distinctly understood that no indiscriminate reflection is intended on the medical profession as a whole. In it are to be found some of the most earnest and sympathetic men, whose supreme desire is to bene-fit and alleviate the sufferings of the human race. But the physician who has such a narrow horizon, and is selfish and pharisaical enough that he seinsh and pharisaical enough that he will practically say: "We forbade them because they were not of us"—"Let humanity suffer and perish, because these medicines are not prescribed by us." must learn, and must accept the fact that there are tons of theurends. fact that there are tens of thousands of cures of the most wonderful character being effected by Psychine, that triumph of medical science, where the best medical skill has pronounced the cases beyond hope or the possibility of recovery. The manufacturers of Psychine are prepared to submit the most indubitable proof that every claim made for it is being daily verified. Any physician who is interested enough in the weifare of humanity, or who is honest enough to investigate the facts, will be afforded every facility. Or the manufacturers of Psychine will join the profession in the appointment of an independent committee of unprejudiced prominent business men to report on the great acter being effected by Psychine, that

business men to report on the great work that is being accomplished by Psychine. The manufacturers will undertake to provide the state of the state Psychine. The manufacturers will undertake to prove to that committee that this marvelous remedy is to-day actually curing more people of the most serious throat, lung and stomach troubles than any living physician, whether in ordinary or special practice, or than any reasonable given number of physicians combined. Further, they will undertake to prove conclusively, that in thousands of cases ther, they will undertake to prove conclusively, that in thousands of cases where the skill of the best physicians has failed Psychine has stepped in and effected the most remarkable and permanent cures. If these facts cannot be established by the most indubitable evidence and to the satisfaction of any unprejudiced judge, the manufacturers are prepared to donate the sum of \$1000 to any charitable institution the committee may name.

# WOMAN'S WORLD.

THE KING'S GARDEN.

By Constance Johnson.
There is a garden far away.
All full of trees and flowers fair,
Where happy little children play
Beneath the King's protecting care;
They are so glad, so safe, we know,
But it is hard to let them go.

Yet when the King himself draws near, . And pleads, with hands stretched lovingly,
"Forbid them not, these children dear,
But suffer them to come to Me."
We needs must yield them up, altho
It is so hard to let them go.

### SHE PATIENTLY BORE DISGRACE

Husband was Dissipated.

How She Cured Him with Secret Remedy.

"I had for years patiently borne the disgrace, suffering, misery and privations due to my husband's drinking habits. Hearing of your marvellous remedy for the cure of drunkenness, which I could give my husband secretly, I decided to try it. I procured a package and mixed it in his food and coffee, and, as the remedy was odorless and tasteless, he did not know what it was that so quickly relieved his traving for liquor. He soon began to pick up flesh, his appetite for solid food returned, he stuck to his work regularly, and we now have a happy home. After he was completely cured I told him what I had done, when he acknowledged that it had been his saving, as he had not the resolution to break off of his own accord. I heartily advise all women afflicted as was to give your remedy a trial."

# Dr. Agnew's Cure for the Heart

Cures the nerves through the heart. Experience of the highest medical authorities has conclusively proven that the quickest way to cure diseases of the nerves is to fortify the heart with "food" that is natural to it, and that enriches the blood; and it has been proven also, beyond the shadow of a doubt, by this same high medical authority, that Dr. Agnew's Cure for the Heart is the most potent nerve nourisher and heart strengthener that has been "gathered in" from nature's lap to assuage sufferings, stop pain and heal the heartsick; and when you know that with the heart, the main spring, the balance wheel of life, out of order, the future looks out on nothing bift darkness and suffering, why postpone applying the remedy? Why delay taking hold of the healing hand that will lift you back to health? Dr. Agnew's Cure for the Heart will relieve any and every form of heart disease in 30 minutes.

The Great Catarrh Specialist Expains

HIS METHOD of TREATMENT 200 h.p., Used 10 Hours a Day

THE GREAT ENGLISH SPECIALIST CURES ALL FORMS OF CATARRH

Nineteen years ago a young but highly honored Surgeon in the British Royal Navy astonished his friends by suddenly leaving the service and entering on private practice. That Surgeon was the now famous Catarrh Specialist, Dr. Sproule, B.A. His keen brain had early seen in the then new disease Catarrh a menace to the life and happiness of the civilized world. While other physicians were neglecting it as unimportant, Specialist Sproule studied its nature and the means of cure. He labored in office,

world. While other physicians were neglecting it as unimportant, Specialist Sproule studied its nature and the means of cure. He labored in office, hospital and laboratory. He mastered the subject.

As Dr. Sproule had foreseen, Catarrh spread with frightful rapidity. Twenty years ago Catarrh was almost unknown. Now no age, sex or condition is exempt from it. No climate or locality is a cure for it. Catarrh is the best more dreaded than yellow fever or smallpox. It is, in the large majority of cases, the forerunner of Consumption. Vital statistics show that deaths from Consumption in this country have increased more than 200 per cent. In the last five years, Nearly all of these cases have been traced back to Catarrh as their starting point.

Health Specialist Sproule makes the treatment of Catarrh a specialty. He cures Catarrh. Specialist Sproule, the first to make Catarrh a Specialty, has perfected the only scientific, constitutional and PERMANENT cure. The widely advertised so-called "Catarrh cures" do not and never can cure Catarrh. They often do harm by driving the Catarrh germs deeper into the system. CONSUMPTION, BRIGHT'S DISEASE, PAINFUL STOMACH DISORDERS are liable to result.

STOMACH DISORDERS are liable to result.

Catarrh is a disease of the mucous membrane and is curable only through the blood, and by medicines prepared for each case. Medicine that will cure one will often harm another. Dr. Sproule's method drives every germ out of the body. It clears the head, stops the hawking and spitting, sweetens the breath, strengthens the eyes, restores the hearing. It purifies and enriches the blood. It invigorates and tones up the entire system. It invigorates and tones up the entire system. It gives new life, energy and ambition. The hardships of life seem easier to bear. Work becomes a pleasure. The man feels as if made over.

Dr. Sproule's name is revered as that, of a benefactor in thousands of homes. If you have any symptoms of Catarrh, the doctor earnestly invites you to write to him and tell him all about it. It will cost you nothing. He will give you the most valuable

# What Vitæ-Ore Is

Vitæ-Ore is a mineral remedy, a combination of substances from which many world's noted curative springs derive medicinal power and healing vitue. These properties of the springs come from the natural deposits of mineral in the earth through which water forces its way, only a very small proportion of the medicinal substances in these mineral deposits being taken up by the liquid. Vita-Ore consists of compounds of Iron, Sulphur and Magnesium, elements which are among the chief curative agents in nearly every healing mineral spring, and are necessary for health. One package of this mineral substance, mixed with a quart of water, equals in medicinal strength and curative healing value, many gallons of powerful

ELDERLY PEOPLE SHOULD USE IT.

As old age approaches the necessity for such a tonic as Vitæ-Ore becomes each year more and more manifest and when taken regularly by middle-aged and elderly people it displays its usefulness in various ways. There is nothing so certain in life as the weakness of old age. The young may need a tonic, but the old myer use one. Old age, like youth, makes demands upon the blood for nourishment of the body, but loss of appetite and impaired digestion deprive the blood of the nutriment which should be its portion. Sound, unbroken sleep is as much needed in age as in youth, to repair waste tissues, but fortunate indeed is the elderly man and woman who can sleep soundly throughout the entire night. The enlarged volume of waste products, due to the increasing tissue-breakdown of old age, requires additional functional activity in the kidneys to eliminate them from the system

Makes Strong, Healthy Women.

Woman may be called the most perfect piece of mechanism in all God's creation, but from the nature of her organism, she is the most delicate. It is due to the ease with which irregularities may creep in that not half of the women of today are entirely free from some of the many and varied aliments peculiar to their sex. Many object too rare financially unable to "begin doctoring" and so struggle along and suffer in silence, bearing a crushing weight of distress, torture and disease. Vitæ-Ore is a true "Balm of Gilead" to such sufferers and is markedly successful in promptly alleviating and permanently remedying many diseased conditions which keep women from the full enjoyment of

### Builds Robust. Vigorous Men.

The proudest glory of man lies in his health and strength. To be entirely successful he must possess strong nerves, a clear brain, and a sound body full of energy, vitality and manly vigor. Without health of body man cannot be at his best mentally. Health builds up that strength and character of mind which goes so far to insure true and complete heapiness as well as success. If disc-se or debility take the place of the health, activity and energy of youth and early manhood, the mental forces become impaired along with the physical. When this time comes, Vitas-Ore proves a regenerator which fills the blood with renewed snergy, correcting irregularities, curing disease and restoring the force and vitality so necessary to success and happiness.

Winnipeg, Manitoba.—I suffered for nine years from Systemic Catarrh, a bad case of Piles and inciplent Rheumatism. I am employed in the mail service and my troubles finally made it almost impossible for me to continue with my duties. I had lost fiesh, could not sleep, had no appetite and was so incapacitated for work, that I had to get well or resign from the service. I took every kind of medicine having the least recommendation for it, and spent lots of money on high priced doctors, some of the best in Winnipeg, but all to no ayall. Sometimes I got a little bettef for a while, but it was only temporary and I was about to give up in despair, when I accidentally saw the Vita-Ore advertisement. I sent for it, and what was my joy to find that one package of Vita-Ore entirely cured my Piles, so that I could at once resume my carrier duties. After using two additional packages my Gatarrh and Rheumatism also were cured. Within a week's time after beginning its use I had rehealthy man. I have now regained my lost fiesh so that my old friends are filled with wonder at my improvement and returned health. Vita-Ore not only relieved me of pain and saved my health, but it saved my position in His Majesty's Service as well. It was all accomplished so easily, quickly and at so small a cost, that I cannot refrain from constantly recommending Vita-Ore to all my friends who are suffering ill-health as I was. It has also done wonders for my father, O. H. Cooke, who suffered untold agonies for years from protruding bleeding piles, unfitting him for business. Dr. Crawford assured him that his only bope was a surgical operation, after which he must lie about 3 weeks in bed in the hospital. I induced him to try Vita-Ore, which he rather rejuctantly did. In three days' time he could go about and began attending to business and in three weeks was completely cured. Ever since he has been as firm a believer in Vita-Ore as I am. We would not be without it.

his life. That was not all, as a Rhen-matic sickness came to add to his trial, and for many days he suffered all the tortures which the human frame is capable of enduring. At his ald, and drove out the humon stressed him. Read what he says: CARLISLE, PENN.—For many long years I had been suffering from Sciatica and Muscular Rheumatism; at times I thought that it must kill me. No one can imagine what I thought that it must kill me. No one can imagine what I thought that it must kill me. No one can imagine what I endured from this dread disease. I had spent a great deal of money for doctors and all sorts of remedies, but found nothing to cure me. I was also troubled with Piles, a palpitating and weak Heart, my Kidneys were disordered, my Liver in bud shape, and altogether I had a goodly share of the trials which fall to the lot of man.

On the 24th day of November, 1903, I began to use Vitae-Ore. The results were astonishing. I had not finished the third package before my Piles had entirely disappeared and my Rheumatism, which had so long remained unvanquished, was much improved. I continued using it until I had taken in all eight packages. I can safely say that I am entirely cured of all my diseases, aches and pains, and feel like a new being.

I also know many others who have been cured of many different diseases through the use of Vitae-Ore. A prominent minister at this place was suffering from Vertigo and Stomach Trouble and began using it upon my recommendation. One package cured him, soundly and perfectly. I can only say to all, try it and see for yourself that its merit has not been exaggerated. I believe in it, because I know.

LABOR IN POLITICS. Independent Party to Be Organized

on Good Friday. A labor convention will be held in this city on Good Friday (March 29), which will be attended by delegates from unions affillated with the trades and labor congress, on the following basis: Trades councils, 25 delegates; local unions, 10 for every 100 members; federal unions, 10 for every 100 members. Delegates and ex-delegates to the Dominion Trades and Labor Congress will also be entitled

tend. The "call to arms" states that the time was "never so favorable to the advocacy of independence in political matters," as shown by the success of the labor party in Britain; in the by-election in Hamilton and in the municipal elections all over the country. It is felt that "the time has come when the laboring class should be represented in the legislatures and parliament by men from their own ranks. It depends upon us to make this movement a success."

GIVE THE ACT FAIR TRIAL

There was no vacillation about Premier Whitney's speech to the big deputation of the Ontario Alliance yesterday. They asked for the abolition of the three-fifths clause in the local option election law, and Mr. Whitney frankly told them the law was on trial and he was not going to change it in the light of the facts before the goverument. It was necessary to the permanence of public opinion. He did not claim that it was absolutely necessary to the enforcement of the law. It worked both ways, and when the vote was for the liquor interest the votes of two temperance people were as good as three others.
"We do not want such a provision," cried

ber and the galleries were filled by the delegates.

They presented the following resolution, adopted by the Alliance:

"That in the judgment of this convention the present requirement for the three-fifths vote to carry local option legislation is contrary to justice, fair play, and the spirit of our institutions, and deprives municipalities of a right iong enjoyed; and that this provision of the present liquor act should be at once repealed."

Mr. Marter gave the government officials ciedlt for good work, but he wanted the government to go a step further.

Joseph Gibson, Ingersoll, denied that the three-fifths principle was supported by the precedents the government had cited. He concluded by an emotional appeal as "a simple, unlettered Englishman with a family of boys."

of boys."
"For God's sake, for the home's sake, for the country's sake, give fair protection for the boys and give us a fighting chance."
Rev. R. J. McAlpine Owen Sound, expressed satisfaction at the enforcement of the law by the government, but thought the three-fifths chause an anomaly.

Mrs. McKee Barrie for the W.C.T.U., asked for its abolition.

Rev. Dr. Hughson, Windsor, doubted its value.

Dr. Chown argued from the success of the government that the clause was un-necessary. He would divide the bar-room from the hotel, as they did not wish to combat the latter. George A. Montgomery, Collingwood, supported the resolution.

Collingwood, supported the resolution.

Premier's Reply.

Premier Whitney welcomed the deputation and assured them the government did not rank itself second to any body in endeavoring to lessen the evils of the liquor traffic. When they went out of power, if there was one thing more than another they experted to be proud of it would be of what they had achieved in this direction.

"There is a misconception in the idea that we deemed the three-fifths clause necessary to a proper enforcement of the local option law. We want a strong body of public opinion to ensure the permanency. of public opinion to ensure the permanency of the bylaw, and to let the opinionents of it maderstand that it is no easy task for them to overturn it."

# A Valuable Agent.

The glycerine employed in Dr. Pirrce's medicines greatly enhances the medicinal properties which it extracts and holds in solution much better than alcohol would. It also possesses medicinal properties of its own, being a valuable demulcent, nutritive, antiseptic and antiferment. It adds greatly to the efficacy of the Black Cherrybark, Golden Seal root, Stone root and Queen's root, contained in "Golden Medical Discovery" in subduing chronic, or lingering coughs, tained in "Golden Medical Discovery" in subduing chronic, or lingering coughs, bronchial, throat and lung affections, for all of which these agents are recommended by standard medical authorities. In all cases where there is a wasting away of flesh, loss of appetite, with weak stomach, as in the early stages of consumption, there can be no doubt that giverine acts as a valuable nutritive and aids the Golden Seal root, Stone root, Queen's root and Black Cherrybark in promoting digestion and building up the flesh and strength, controlling the cough and bringing about a healthy condition of the whole system. Of course, it must not be expected to work miracles. It will not cure consumption except in its earlier stages. # **Public Ownership League** A Call for Organization 800N AS WEATHER PERMITS

Public Requested to Attend at Victoria Hall on Wednes- Over 2000 Prospectors Are Up day Evening, Feb. 27-Prominent Men Have Been Asked to Attend.

Time-Wednesday Evening, Feb. 27. Place-Victoria Hall, East Queen-street. Purpose-Organization Public Ownership League.

The meeting on Wednesday evening in Victoria Hall should well attended. Every advocate of public ownership who can should be present. They should come not so much prepared to discuss and advocate the principle, for, as to that, there will be little disagreement, but prepared, rather, to consider and decide upon methods of organization. A good cause, with good organization is irresistible; unorganized, disunited or with poor organization, it can scarcely win.

The great corporations, into whose hands have been allowed to fall the public utilities which the people should own and/control, are organized. They are themselves an organization, compact, well equipped and supplied with all the means of political warfare. They can command newspapers, aye, and public men who enjoy the confidence of the people they betray. They are trenched in a seemingly almost impregnable position, and disciplined organization is needed to contend with them. That they are prepared to spend their money; spend it freely and lavishly when they find their vested interests threatened, was made abun dantly plain in their campaign against the power bylaw last month

paign. It taught us, too, that once the people are aroused and informed, all the money and all the efforts of the corporations, and all the mercenary pens their money can buy, will not avail them. This thought ought surely to inspire the frends of public ownership with confidence. Organize the movement, arouse the people, in form them, rally them for their own protection, and the result will not be doubtful. This is the object, and this must be the work of

The work of organization well done, the cause of the people ust win. If the work is to be well done, it must be rightly begun. Let those, then, who attend the meeting on Wednesday evening come prepared to give their best thought and most earnest consideration to the work of starting the organization rightly.

\*

Address .....

On Wednesday, Feb. 27, at 8 p.m., in Victoria Hall, East Queenstreet, opposite Bond-street, the organization meeting of the Public Ownership League will be held. The World asks everyone favoring the movement, to whom this comes to keep that night free and to make it a personal obligation to be present and assist in the proceedings. The formal campaign for the protection of popular rights that will then be inaugurated deserves the heartiest support of all patriotic and publicspirited citizens, and it is particularly desired that the gathering be large and representative. There is nothing ulterior beaind the fo tion of the Public Ownership League, nor any restriction whatever with regard to the form and character of the organization, which will be left entirely to the free determination of the meeting. Public ownership knows nothing of party, and the league is intended not to further the interests of any political party but to accomplish an important and farreaching reform.

Yesterday The World received the following letter: Editor World: I was very pleased indeed to read in to-day's World that you are calling a public meeting for Wednesday evening next. I certainly and advisedly urge every citizen of To-who has the interests of this grand city and grand city and great country at heart, and who does not wish to see his rights and liberties handed over body and soul to merciless corporations, to attend and support the formation of a Public Ownership League. This country at present is suffering agonies with growing pains, which must instantly be relieved if it is not to be crippled for life.

Corporation schemers are evidently determined to put Canada down on its back and go thru its pockets, so citizens of Toronto be with us on Wednesday evening and show that you have not yet lost confidence in Canadian manhood and Canadian possibilities.

John Wallace.

Hon. Mr. Emmerson Meets a Deputation of Board of Trade.

St. John, N.B., Feb. 22-(Special.)-Hon. Mr. Emmerson met the board of trade to-day and promised to do all he could towards the development of St. John harbor. He strongly urged that three men be appointed to study well the needs of the port and to make a report to the government to enable it to have public moneys consistently expended here, and that in the near future the difficulty of having ships lying at the entrance of the harbor waiting an opportunity to come up should be removed.

Mr. Emmerson promised to undertake on behalf of the railway departthe chief engineer and deputy minis-

# SURVEYS AT LARDER LAKE

There and Want a "Line to Tie to."

C. N. Smith (Sault) took occasion in the legislature yesterday afternoon to bring up the question of the corect location of claims in the Larder Lake district. The pressing importance of the subject warranted him, he thought, in introducing it to the house. After the Townships of Coleman, Bucke, Lorraine and others adjacent had been explored a number of prospectors had gone further north to new fields, and in the Larder Lake district very rich discoveries of both gold and silver had been made. Men had been trekking in in large numbers, and there were now 2200 or 2300 prospectors in that locality. The Larder Lake district is 80 miles from Cobalt, and 76 from Haileybury, and the nearest point to Cobalt on Larder Lake is 42 miles distant. At present the prospectors were looking for minerals under the snow, and one of their diffider the snow, and one of their diffi-culties was that they had no survey line to tie up to in staking their claims, and no recorder's office near-er than Halleybury. The men say it is easier to discover minerals than to get their claims recorded.

n the power of the government they should send surveyors in and have lines run to tie up to. He was sure this would be a good thing for all conerned, and to supplement it there should be another recorder's office opened at the lower end of Larder opened at the lower end of Larder Lake. George Smith, the recorder at Haileybury, was a most honest and capable man, but it was impossible for him, considering the distance, to do justice to the situation. do justice to the situation. Rush is Recent.

Hon. Frank Cochrane observed that the rush to Larder Lake did not take place till late last fall, and during the present winter. As Mr. Smith was aware under the old act prospecwere compelled to take in their noon. own surveyors, so as to register their correctly. The government, however, had taken action in this respect. An amount had been included in the estimates and it was intended to send in surveyors as soon as possible, but there was four feet of snow on the ground there at present. The nearest point on the rail-way to Larder Lake was 17 1-2 miles. The preper way to reach it if it was considered necessary, instead of a wa-gon road, was by a branch railway line. All these points had received consideration by the department. He felt that the men going in there now were not bona fide prospectors, but were simply attracted by the chance Mr. Smith renewed his appeal for

the necessity of having a line for prospectors to the up to. He thought surveyors could do this in a short time.

Premier Whitney (incredulously): 'Do you mean now?" Mr. Smith: "Yes, now."
Both Premier Whitney and Hon.

Mr. Cochrane referred to the depth of the snow as rendering it impossible. The minister of mines stated that the inter-provincial boundary line was sufficiently near to tie to, and was staked north to the junction with the

First and Second Readings. Second readings were accorded Mr. Hoyle's bill to amend the Ontario Insurance Act, Mr. Ellber's respecting the Town of Seaforth, and Mr. Calder's respecting the Village of Port Perry.
Mr. Hoyle's bill, which deals with certain fraternal insurance society matters, was referred to a special committee consisting of Messrs, Foy, Clark (Bruce), Downey, Ferguson (Gren-ville), Graham, Craig, Pense, Preston

The house in committee passed the resolutions dealing with the financial-side of Mr. Cochrane's mining and bonusing bills.

The following first readings were passed:

A Man of 70 Made to Feel Young.

know the benefit I feel, now I am a new man. For forty years I have had a bad back; now I can run a race or pick up a pin; I feel so smart, no pain. I wore my Belt only four times. I am in my seventieth year; never was so well in health as I am now. When I used to be bad I would be a month that I could not stoop to lace my boots; now I feel no pain in doing so. I am just as smart as any young fellow at present. Sir, no one would be without one of your Belts if they knew the good to be had from them. I have recommended them highly to all my friends, and you will soon have some orders. Yours sincerely, PHILIP McGAHEY, Riviere aux Pins, Que.

Cured After Five Years of Agony.

Dear Sir, - Since calling at your office on June 22, must tell you that I am sure it was the Electric Belt that has helped me. I know that I would not have lived if I had not got it when I did, and I cannot be too thankful to you. After five years of agony that I endured, it is like having a new lease of life now. I am gaining two pounds flesh a week, and am eating solid food. I have been taking liquid food a month nearly, and solid food for three weeks. The people think my cure very rapid and very am certain that you cannot advertise your Electric Belts enough. The only trouble is that there are those sold that are no good. We do not think anything of the money we spent on the Belt. I have to repeat my story over and over again every day to different people, as everyone wants to hear from myself about my cure. I have never felt better than I do now. Of course, my nerves began to quiet when I began to use the Belt, and, as you know, I wore it even when I was very weak. I have a host of grateful friends who wish me to thank you also for them, for they were all nearly sick about me, thinking and seeing me starving every day, with plenty of food about me. I cannot speak too highly of your Electric Belt, for it is a perfect fit, and is doing just what you said it would do, and in so short a time. I never expected the cure so quickly. It was a surprise to me, and I can hardly believe it. I now look very, well. You would hardly recognize me as the woman who called at your office on June 22. I think my doctor here is as delighted over my recovery as any one can be. With best wishes for your continued success, MRS. BERTHA HAMILTON. story over and over again every day to different people,

Dr. McLaughlin:

Dear Sir,—You ask me if I am fully satisfied with the results of your Belt. Well; you know when I got your Belt. Well; you know when I got your Belt, in April, 1901, and you know when I told you I was cured, and I have stayed cured. I got wet last fall in a cold rain, and I felt the rheumatism in my arms. I put the Belt on for a few nights and it all went away, and, thank God, I am in good health. If I live ten days longer, to the 20th, I will see my eighty-fourth birthday, and I can throw a hundred-pound barrel of butter into a waggon. Of course I could not keep it up as when I was younger. I do not feel any symptoms of rheumatism or any other soreness about me, and I am satisfied that the Belt is what cured me, and I think it will cure anyone if they will use it right. All the trouble is they get dissouraged because it don't cure them in a few days. I cam man heins the it right. All the trouble is they get discouraged because it don't cure them in a few days. I came near being the same when I used it a month and was not cured. I nearly gave it up, and then I made up my mind to keep it up until it was worn out, if necessary. Any one that was used up as I was would not mind the few minutes it takes to get the Belt ready. Yours truly, MARK HAIG.

Merveus Emergy Restered Six Years Age and still Strong.

Earl Grey, Sask., May 5, 1906.

Dr. McLaughlin:

Dear Sir, — It is some three years since I wrote you that your Belt had given me perfect satisfaction, and I am still as strong and hearty as any man could expect to be. It is certainly a Godsend that such an appliance should be invented for the cure of the aliments of poor, wretched humanity, I can now eat anything that is eatable, and digest it well; no trouble worries me, and my nerves are very strong. I have been singing the praises of your have been singing the praises of your Electric Belt for six years, and will continue to do so. I cannot say too much, for it has made my body a pleasure to own. Believe me, yours Very truly, W. L. FLEMMINGTON.

# DR. McLAUGHLIN'S ELECTRIC WILL DO THE SAME FOR YOU.

It has been demonstrated that Electricity is the most natural of all remedies for the cure of the ailments which affect the human body. Every physician of modern ideas is an advocate of electrical treatment, and concedes that it stands far above all medical agents, especially when applied to diseases relating to the nervous system. This is a practical admission of the power of electricity over the nervous system. This is a practical admission of the power of electricity over the nervous system. thinking person that a means of intelligently applying this wonderful agent should be the greatest boon to supering humanity.

When we consider that our nervous system, which is the fountain of life to the kidneys, liver, stomach, brain and the various organic functions of the body, depends for its sustenance upon the vitalizing element of electricity, and that without this life it is impossible to keep up a normal condition of health in the body, it is easy to understand that a waste of this life principle will be followed by weakness and disease, and it is also easy to understand why the natural restoration of this electric force in the nervous system will saturate the various vital organs which have become weakened with a new energy which You may say, as many others have said, "Doctor, your arguments sound good, but show me evidence of curesto back up your statements." That is my strongest argument. Every man or woman who comes into my office gets a practical illustration of my method of treatment. After seeing original letters from prominent people (letters which I am permitted to exhibit), their doubts are dispelled; they are convinced that the claims I have made are true. will place every vital part of the body in a state of natural health.

Hundreds of my best testimonials can not be published, as the patients, though recommending my treatment privately, object to publicity. READ MY OFFER. I know how skeptical people are after paying hundreds of dollars to doctors without getting any benefit, and knowing that any man would willingly pay for a cure when he gets it. I now offer any man a complete restoration to manly vigor and health before he pays a cent. There is no deception about this offer, either in the making of it or carrying it out. All I ask is fair security that I will be paid when the work is done; this any honest man will be glad to give. I take all the chances; you take none. Isn't that fair? Do you want any better evidence of my confidence in my Belt? Now, if you suffer do not lay this aside, and say you will try it later. Act upon it to-day—NOW. Tell me what you are suffering from, and I will arrange a Belt with

# What Do You Know of **Building Construction?**

When a manufacturer buys a machine, a farmer an implement, a mechanic a toel or a student a beek, he prides himself on his knowledge of the merits or the demerits of the various articles, offered to fill the especial requirements he may have in mind.

But when a man centemplates building a house, a factory, a church, an office building, a school, er, in short, any kind of structure, how much does the average layman know of the comparative merits of the many different materials and appliances that enter into the construction of the building he intends to pay for?

The prespective builder finds he is spending much money for many things he knows practically nething

The purpose of the Building and Real Estate Department shortly to be begun in The Toronto Sunday World is primarily a campaign of education to familiarize the average layman with preper and safe as well as beautiful construction; that he may know what he wants and know when he is getting it when building his business establishment, his club, his church or

The Toronto Werld is read by the business man and after all it is he who is the most interested person in everything that concerns building.

Architects, engineers and contractors see and study the technical papers and are supposed to keep abreast of the times. They are called upon for service when a man proposes to build; true it is also wise to call in a doctor in a case of sickness. But it is well to know enough about hygienic matters to permit one to live properly and to comprehend and follow the doctor's directions when he is consulted. So with building.

The layman never can know too much about the subject for his own good. The terrible tho little heeded lessons of recent times, the appalling less of life and property by fire, the destruction in one year of over half as much building as was erected during the same period, fully justify our contention that the average man knows too little about this important branch of our industrial and social development.

THE ONTARIO, QUEBEC, COBALT MINING CO., Limited, incorporated under the laws of the Province of Ontario, has purchased from the Quebec & Ontario Cobalt Mining Co., Limited, their entire holdings as set down below, paying dollar for dollar in the shares of the new Company at par value for the stock of the old Company, which was held at \$5.00 per share.

> 4-The W. I-2 of the N. W. I-4 of the N. I-2, Lot 15, Con. 4. Coleman Tp., 20 Acres.

Titles of all these properties are absolutely unassailable, and there is no mortgage or lien of any kind en any of them. On two of the properties camps are established and development work is rapidly being pushed. These properties will become shippers in a very short time. The recent government lease of the water-power of Watson's Falls to F. Wallace White on condition that electric power be supplied to the neighboring mines within a year, is another asset to the Company. Such low-grade ore as may be encountered can be made to yield a handsome profit through concentration. In most of the mines such ore is thrown away.

The old Company, whose interests have been purchased, sold its shares in the beginning at 60c on the dollar. They had spent a long time investigating the conditions of the Cobalt camp, set on getting good properties or none. The properties were purchased after careful examination, and considering not so much their location as their actual showings, and the fact that they are located on contact between two formations. The properties were barely opened up before the stock was withdrawn at the price. The showing was beyond their wildest hopes. The demand for the stock was unprecedented, but knowing that they had a shipping proposition in sight, the stock was withdrawn and the proposition of THE ONTARIO, QUEBEC COBALT CO. taking over all their properties ac-

A BUSINESS PROPOSITION TO BUSINESS MEN AND OTHERS SEEKING LEGITIMATE INVEST. MENTS. We are only going to sell 500,000 shares of \$1.00 each in THE ONTARIO, QUEBEC, CO-BALT MINING CO. and these at par. These include also stock at par value given in exchange to the shareholders of the old Company.

The Directors of the Company are well-known and successful business and public men, who have promised and pledged themselves that the Company shall be conducted only in a conservative and economical manner. THE PROCEEDS FROM THE SALE OF STOCK ARE TO BE USED FOR DE-VELOPMENT PURPOSES ONLY. Not a dollar has been paid for promotion or reorganization expenses. The Treasury Reserve is a full half of the total authorized capital.

Price of stock is at par \$1.00 per share, payable with application, or as follows: 100 shares cost \$100.00—\$25.00 payable on application and \$25.00 a month. Larger or smaller amounts in the same way. Four payments within three months. REMEMBER: Capital Stock only \$1,000,000. Treasury Reserve \$500,000. We guarantee you that

the stock of THE ONTARIO, QUEBEC, COBALT MINING COMPANY will be listed on all the leading Stock Exchanges of the country, which will thereby enable you to dispose of your holdings at any time by wiring or writing us or any other broker. The amendment of the constitution of the New York Stock Exchange to include trading in mining securities, listing only companies that have been examined and enquired into, will be of tremendous advantage to investors of mining stocks in discriminating between good and bad propositions. To guard against over-issue and to guarantee to investors the genuineness of the certificate when

issued—also the prompt and safe delivery of same—arrangements have been made with the Trusts & Guarantee Company, Limited, 14 King street, Toronto, Canada, and Security Registrar & Trans-fer Agency, 66 Broadway, New York, to act as trus tees, transfer agents and registrars. Shares of Capital Stock of BROOKS HUDSON SILVER MINING Co., Limited. 

The Brooks Hudson Silver Mining Company, Limited, affords to conservative mining men and others an investment equalled by few-surpassed by none,

Authorized capital only \$500,000.00, divided into 500,000 shares, par value \$1.00 each, fully paid and non-assessable. The properties of the Brooks Hudson Silver Mining Company, Limited, consist of 22 claims of 40 acres each, located in the township of Hudson, on every one of which valuable discoveries have been made. Other properties have been added since incorporation, till at time of writing the Co. have an area of over 1000 acres of good mineral lands.

Some preliminary work has been done and a few assays obtained, showing very favorable returns in gold, silver, copper, cobalt and zinc. EXPERT'S REPORT-Mr. Jacob M. Eggert, M. E., who submitted a report af exam-ter nation, says: One thing is quite certain, that your Co. has a large number of veins rich in copper ores of various kinds, and so large that no dead work need be done and so rich that it will not come below 6%. Another thing seems to be certain also, that on several of your claims silver in paying quantities will be found. The claims are admirably situated as far as transportatien is concerned, and all are near to already existing good roads and all have plenty of timber for mining and building purposes. I feel certain that what you have will prove to be mining

claims of no mean rank, and claims worthy of confidence. Subscriptions for a small block of 50,000 shares only are being received at 75c. per share. Stock will be advanced to \$1.00 per share as soon as this let has been sold. DON'T DELAY -send in your orders NOW; steck is going rapidly; why wait for stock to advance to double

Contracts for building two camps have already been given, which will be completed in about two weeks. Work on No. 1 shaft, on lot 5, was commenced on Wednesday of this week. Five other shafts will be put down with all pessible despatch as soon as camps are completed.

Only Traces of Gold Found at Cobalt, But Different Farther

Prof. W. G. Miller, the provincial eologist, returned yesterday from a hree weeks' stay on the Gillies govrnment mining reservation, and the diacent Cobalt district. He states hat the stories about very rich gold discoveries in the Cobalt field are fakes, generally founded on iron pyrites. Traces of gold are found in some of the ores and it is, of course, extracted at the smelter to the extent of \$2, \$3 or \$4 a ton. This only applies to the cobalt field as in the country

further north gold is found in paying quantities in some deposits.

Prof. Miller said that nothing had occurred to change the views so far deld as to the origin of the cobalt deposits, and that he saw nothing to change his origin on the gree of nge his opinion as to the area of mineral which covers about six square miles in Coleman. Next to sliver the cobalt deposits are the most valuable, 60c a bound being paid for this ore 1.0.b.

The operating mines number about forty, he said, altho every lot presented a "prespect.".

Precautions are being taken by the

government to see that the mining law is properly enforced and to ensure the safety of laborers in the mines. He thought these were well handled, and the superintendents good men.
Among them were graduates from
Toronto University, Queen's, Royal
Military College, McGill, California,
Minnesota, Wisconsin and Pennsylvan-

On the government reservation the On the government reservation the main shaft has been sunk 75 feet, and drifted over 300 feet, developing a rich vein in good shape. No shipping will be done until the Kerr Lake branch of the T. & N. O. Railway is built, which will pass 100 yards or so from the shaft head. The ore will probably equal anything ver shipped from Coequal anything yet shipped from Co-

or the Concentrator Plant at Cobalt Central Mines.

New York, Feb. 22-Cobalt Central s now one of the heaviest shippers from the Cobalt camp. The second ar of ore was forwarded Thursday o Ricketts & Banks at Waverly, N., and Manager Elmer telegraphs that he next car will go forward about Feb. 1. This ore runs very high, many of the samples showing between 7000 and 12,000 ounces of silver to the ton. W. Barry telegraphs that Cobaltavy buyers in the ig Pete mine, and the knowledge that the other properties of the company were equally promising. H. W. Hardinge, consulting engineer of the company, returned yesterday from the camp, where he has been arranging with Mr. Elmer the details of the installation of the concentrating plant now being erected by the Traylor Engineering Company. This plant will be in operation by May 1, and there-after the company will be able to ship a great portion of its product as bar silver and high-grade concen-trates, thus saying small concenrates, thus saving smelter and freight charges. Mr. Hardinge said yesterday the ore strikes in the property were confirming all the earlier expec

### MOVE THE TOWNSITE.

Cobalters Beginning to Realize That This Must Come.

Cobalt, Feb. 22.—Several circum tances and developments have transpired recently in the Cobalt district which have brought the idea of movbefore the people in the town, and as people get more strongly impressed with the great future of the camp

The fact that the Coniagas Company have begun the sinking of a shaft on one of the most valuable lots in the town, indicates that this company is, scon to assert its rights, which in summer will probably take the shape of trenching and digging all over their part of the townsite.

The owners of the town lots, which

now constitute the property of the City of Cobalt Mining Company, were at first very wrathy at the idea of noving the town, but now they see their property is worth more as a mining proposition than as real estate and many of these are now in favor of the movement. From the fact that sewerage system would be exceedingly costly, the people of Cobait realize that something has to be done.

It was the recognition of all these facts that led the Cobalt Development Company, Limited, to purchase 4000 lots from the Western and Northern Lands Corporation, Limited. Since this purchase strong information has been gained that the C.P.R. are going to locate in North Cobalt their Cobalt terminals.

It is estimated 15,000 workmen will be employed in the mines of Cobalt within three years. North Cobalt is the nearest place at which absolute title can be had to land. At present three different companies either hold charters, or are trying to secure charters, for an electric road between Cobalt, Haileybury and New Liskeard, or already have them. North Cobalt is the nearest level land to the Cobalt mines, and any railway running from Cobalt to New Liskeard and Halleybury must, owing to topo-graphical conditions, pass thru North

# COBALT --- Gold Stories From Cobalt Are Designated Fakes --- COBAL

# BUY SILVER BIRD!

The safest and best purchase in the whole Cobalt camp to-day, considering capitalization, location, work done, results obtained, and price of stock. There has never been a stock offered in the Cobalt district, from the opening up of the camp to the present day, that could compare with it when taking these points into consideration. Silver Bird is situated directly in the centre of the most active operations, and is surrounded by some of the most wonderful producing silver mines the world has ever known.

We are now offering for public subscription the first allotment of 200,000 shares at the low price of 15 cents per share. Now, just think of it! Compare this price with the price of the Colonial, only a stone's throw away, now selling at \$3.50 to \$4.00 per share, at a valuation of about four million dollars. Compare it also with the stock of the Right of Way, selling at from \$7.00 to \$8.00 per share. If the O'Brien mine was an incorporated Company to-day and offered for sale its stock would undoubtedly bring on the open market \$10 00 to \$12.00 per share on the capital of a million and a half. We have been informed from a trustworthy source that the ore blocked out and in sight in the Timmins mine is estimated at from \$10,000,000 to \$15,000,000. We venture to say that if this property were incorporated for \$10,000,000 and placed upon the market, it would sell for \$2.00 per share. It should be understood that we are in no way endeavoring to depreciate the values of the Colonial, Right of Way, O'Brien or Timmins stocks or properties, for, indeed, we believe they would be bargains at those prices and valuations. We are only endeavoring to show that Silver Bird, which is located in close proximity to these mines, is at

# 15 CENTS PER SHARE

In comparison with those valuable properties, positively the greatest and best purchase that has ever been offered in the Cobalt camp.

About eighteen months ago there were several Cobalt companies organized, and their shares offered for subscription in Cobalt and near-by towns. Many of the laborers, clerks and other wageearners, being on the ground, manifested their faith in the camp by placing their earnings in sums varying from \$100.00 to \$1,000.00 in these shares. There is not a single exception known where these shares have not advanced from 10 to 100 times the first price. This seems almost like a fairy tale, but it is the truth. There are many men who can be seen every day walking about the uneven streets of Cobalt who eighteen months ago were known as common day laborers, working for \$2.00 per day, who are now actually worth from \$50,000.00 to \$100,000.00, all gained from pinning their faith in Cobalt and placing their savings in Cobalt mining stocks.

One of the highest recommendations for the shares of Silver Bird is the fact that the investors at Cobalt and Haileybury are buying heavily of these shares. Within the last several days we have received orders from investors in that section for more than 40,000 shares. The employees of the Nipissing, the O'Brien and the Red Rock are buying these shares.

Silver Bird is situated between and close to these mines, and these miners should know what they are buying. Now, just consider for a moment! Here are men right on the ground, employed on the properties that surround and are in the immediate vicinity of Silver Bird, placing their money in these shares at the present market price—15 cents. THESE MEN ARE MINERS. They know the property. They can see Silver Bird every day. They are in a position to know whether these shares are a bargain or not. It is no trouble to see the property, as it is only about 15 to 20 minutes' walk from the railway station or postoffice at Cobalt to the Silver Bird mine.

Many people are visiting the property, and we do not know of one exception where they have not purchased these shares after once examining Silver Bird. Just recently a gentleman claiming to be a mining engineer and mineralogist came into our office, stating he was just from Cobalt and had made an examination of Silver Bird Property. He placed his order for 20,000 shares for himself and friends. This speaks for itself!

Now, a word to investors: Buy the shares of Silver Bird at the present first allotment price of 15 cents. Buy all you can of these shares. Place your faith in the most wonderful mining district the world has ever known. Back it up with all the money that you can see your way clear to invest. You will never regret it, but will always rejoice.

Silver Bird will be paying dividends equal to its present purchase price within the next year on every share of its stock

Invest your money in Silver Bird, the greatest bargain that has ever been offered in the Cobalt camp. The property of the Silver Bird Mines, Limited, consists of 20 acres (patented), being the west half of the northeast quarter of North half of lot 3, concession 6, Coleman. Silver Bird lies in the immediate vicinity of the O'Brien, Timmins, La Rose, Colonial, Violet, Trethewey, Right of Way, and immediately between these great mines and the Green-Mechan, Red Rock, Cobalt Contact and Nipissing extension, Silver Bird is working day and night shifts, operating two boilers, steam drills, sinking on three veins, and in the same formation identically as the famous O'Brien, Colonial, Timmins and Right of Way mines, and on the extension of their leads. We predict this first allotment will be largely oversubscribed, and we urge that early application be made.

To guard against over-issue, and to guarantee to investors the genuineness of the certificate when issued—also the prompt and safe delivery of the same—arrangements have been made with the Trusts and Guarantee Company, Limited, 14 King Street West, Toronto, to act as Trustees, Transfer Agents and Registrars. Orders may be telephoned or telegraphed direct to Law & Co., Traders Bank Building, at the expense of Law & Co. Applications and remittances, however, should follow by mail direct to The Trusts and Guarantee Company, Limited, 14 King Street West, Toronto.

appreciate the prices which the leading stocks are now selling at. There is no doubt in our minds but that those people who have these stocks and are now buying them, will make considerable money on their investments at these prices.

We believe that the insiders on Nipissing are preparing to move up this stock in the near future. It may be however, that they will force it lower; that is, a little lower, before beginning the "upturn." We advise our clients, however, to hold this stock and get a little more at this level, and be prepared to buy it in large quantities should it reach \$10,00 or under.

World Office, Friday Evening, Feb. 22.

An almost awe inspiring movement in the Deminion Coal and Dominion Steel shares was the big thing in Canadian markets today. Whether speculators who usually give their interest to thee, New York market, formed a sudden impulse to become nossessed of some of the Nova Scotla industrial shares owing to the closing of Wallstret, or whether the insiders of these particular issues thought the occasion a good one to advertise on and put their specialities up rumor did not disclose to day. Suffice it to say that Coal common moved up about 4 points and Dominion Steel preferred almost, a like amount. The way the alterne was engineered would indicate that the stocks are scarce, and doubtless that are in the ordinary in the stocks are scarce, and doubtless that are in the ordinary in the stocks are scarce, and doubtless that are in the ordinary in the stocks are scarce, and doubtless World Office, and amove in the analysis. The way the state was engineered would indicate that the stocks are scarce, and doubtless they are in the ordinary investors hands, who have grown weary of uursing such expensive luxuries. Another theory suggested for the rise was that it was sympal their with Nova Scotia Steel. A few weeks hence may reveal the actual incentive. The Tero to exchange to day had the now recognized dult tinge to the hustness. Except for the instances noted above there was very little change in prices or quotations. Whimipeg Railway shares advanced 1½ points on the smallest kind of trading, and the price of this security seems to be able to be marked to any kind of figure at the will of the owners. Some of the investment issues sold lower, owing to present light derived for these as for other securities.

The Prairie Cattle Company announce that the surplus realized from the sale of land on the Canadian division was £3018, A dividend of 5 per cent, on the ordinary shares was recommended.

A low, which has resulted in a fight for control, has developed in the Havana Electric Railway Company, a concern which has many Canadian shareholders, and whose steeks are listed on the Toronto and Montreal exchanges. It is argued by a substantial element of the stockholders that the steek is entitled to much larger dividents that here has been a loose administration, Dividonds at the rate of 4 per cent, are paid on the preferred stock and nothing on the common.

Civil Authorities of Devonport Refuse to Attend Function. Devonport, Tng., Feb. 22.-The great

new Keyham docks, which complete the most important naval dock yards scheme of the British empire, were opened yesterday by the Prince of Wales with considerable ceremony. The large gathering of warships

sent here in honor of the occasion were dressed with bunting and the harbor was gay with flags.
Disagreements between the naval and civilian authorities regarding the latter's participation in the ceremon-ies resulted in a notable absence of general decorations ashore, and caused the mayor and corporation to refuse to attend the function.

ENGINEER SERIOUSLY HURT.

Sarnia, Feb. 22.—Engineer Joseph Daniels met with a serious accident last night. He was bringing a westbound freight train into the tunnel yards and had his head out of the cab window when it came in contact with a small shanty, the force of which pulled him thru the window and he fell within a foot's distance of the wheels of the train. The fireman brought the train to a standstill. Daniels was found unconscious. By ncon to-day he was in a partially conscious condition, and there is some hope of recovery.

PENNSYLVANIA, BEECH CREEK AND EASTERN COAL CO. OFFICE OF THE PRESIDENT, WHITEHALL BUILDING.

New York, Jan. 29, 1907. Gentlemen,-Referring to your request for information with reference to the property and earnings of this Company I beg leave to state the Company controls by lease for a period of 999 years from September 1st, 1906, 106,000 acres of coal land, including the property of the well known and long established Pennsylvania Coal & Coke. Co., Beech Creek Coal & Coke Co., Webster Coal and Co ke Co. and other subsidiary companies.

what has becum of the fellers that wuz a writin about coal into your paper and a wishin fur them to send summands to between eight and nine hundred million to ns of high grade bituminous coal of the best steaming and coking quality. don't get none somehow. The bit we large majority of the stock in the North River Coal & W harf Company, the latter company, having valuable docks in New York Harbor, known as Port Liberty, which furnish excellent facilities for its harbor and steamship trade. This Company also owns about 1000 Railroad cars, 937 coke ovens, a large number of dwellings, and has thirtythree shipping points for the coal originating at thirty-nine mining operations as well as a half interest in two other independent coal operations with machinery and all equipment in first-class condition.

It has an annual business of about 4,600,000 tons of coal shipped over the New York Central, Pennsylvania, Philadelphia & Reading and Central Railroad of New Jersey. Notwithstanding the fact that during the first six

> collieries of nearly thirty per cent., the earnings for that period (February estimated) show a surplus over all interest, rentals and other charges, including the interest on the bonds outstanding, equivalent to eight per cent, upon the \$2,250,000 capital stock herein attaching to the bonds as a bonus. The Pennsylvania, Beech Creek & Eastern Coal Co. has secured contracts for a very large amount of
