WE request the Ladies to call at No. 11, North Side King's Square, St. John, and judge from personal examination whether it imany exageration to say that for the preparation of Candidates for RAYMOND'S SEWING MACHINES CERTIFICATES OF COMPETENCY.

are the simplest, most durable, least liable to get out of order, and most easily worked of any; and that his MCNALLY & SEATON

will do a greater variety of work than any other Machine. The universal adaptation, un-equaled beauty and simplicity, perfection of material and syle of finish, recommend his several varieties of SEWING MACHINES as the best, while their low price places them within the reach of all.

As Machines rented and sold by instalments. Stitching, hemming, filling, and tucking, done with neatness and despatch.

WE have already drawn attention to the annual meeting of the Society of Arts held on the 23rd ourrent, under the presidentship of M. Th. de Saus-ure, and are now able to furnish some further details.

Professor Socet, in delivering a most interesting report, passed in review the operations of the Industrial section, in reference to Commerce, laying great stress upon the competition that has taken place in the manufacture of chronometers. This competition was instituted with the object of testing the workmanship and precision of chronometers turned out by Genevese manufacturers, and none but those adopted for pocket use were admitted. They were deposited in charge of the authorities at the Observatory, and underwent the most searching ordeal possible to be replied to pocket instruments of this class. The jury specially retained to decide the difficult question as to whom to award the palm of excellency unanimously de-PUBLIC NOTICE! P. O., St. John, Aug. 16, 1872. aug16 3in

Watchmaking in Switzerland. [From the Swiss Times of May 30th.]

We have already drawn attention to the annual meeting of the Society of Arts held on the 23rd current, under the presidentship of M. Th. de Saus-ure, and are now able to furnish some further details.

Professor Soref, in delivering a most interesting report, passed in review the operations of the Industrial section, in reference to Commerce, laying great stress upon the competition that has taken place in the manufacture of chronometers. This competition was instituted with the object of testing the workmanship and precision of chronometers turned out by Genevese manufacturers, and none but those adopted for pocket use were admitted. They were deposited in charge of the authorities at the Observatory, and underwent the most searching ordeal possible to be applied to pocket instruments of this class. The jury specially retained to decide the difficult question as to whom to award the palm of excellency unanimously decided in favor of Messrs, J. M. Badollet & Co. This firm having carried off the sole prize by exhibiting a chronometer which fulfilled in the highest degree every condition required, crowned their first success by gaining honorable mention for two other chronometers. The allusion to this triple honor was received with enthusiastic applicuse, and Professor Humbert, President of the Fine Arts Section, closed the meeting with a happy and humorous dissertation upon subjects connected with this department.
