of Ontario by which he assumes the position of a judge in a court of law, with power to subpoena witnesses, take evidence on oath with special stenographer, and will submit a finding or judgment to the Government.

In an interview with The Planet this moraing Commissioner Saunders said:

"I purpose, under commission from the Government, to hold the fullest public enquiry for the purpose of eliciting the facts in reference to certain allegations made, and to discover, in the public interests, whether there be or be not any founda-ON WEDNESDAY NEXT.

cover, in the public interests, whether there be or be not any foundation for them.

"The court of enquiry to be held will be public and all evidence will be taken on oath. It will be the aim to hear everybody who has charges to make or who is implicated or interested in any way or can full powers of the high court of justice.

Crown Attorney Smith this morning despatched special notification to the members of the License Board and subpoenas re being issued for many witnesses.

Premier Whitney and the Government are to be congratulated on the prompt, public and emphatic means they have taken to deal with these manifold rumors and allegations,

A NEW FINANCIAL BILL

To List Ontario Consols Is the Government's Intention.

Object of Cel Matheson's Bill Is the Creation of a Provincial Stock-Following in Footsteps of Other Provinces-An Amendment of An Imperial Act Will Be Asked For-Proceedings In the Legislature.

Teronto, May 5.—The feature of yes-terday afternoon's session of the Leg-islature was Col. Matheson's explana-tion of the steps the Government have pletion of the Temiskaming Railway and for other purposes. The resolu-tion and the two bills providing the tion and the two bills providing the machinery for floating these loans were taken up in turn. One bill is entitled "an act respecting the Consolidated Revenue Fund, and the raising of loans authorized by the Legislature." It provides that the Government may create a permanent Provincial stock to be known as the "Ontario Government stock" and shall be personal property, and the said stock and the interest thereon shall be chargeaple upon and payable out of the Consolidated Revenue Fund. The stock shall not be paid off before July 1, 1925. The Government may make regulations as to the debt and payment of interest, and may appoint one or more fiscal agents. may appoint one or more fiscal agents in London, England, or eisewhere, and agree with them as to the rate of com-pensation for negotiating loans. It is provided that loans may be raised by the issue of debentures or by the issue of Ontario Government stock, bearing interest not exceeding 4 per cent.

Sinking Fund and Annuities.

The Government may provide a sinking fund for the payment of these loans and may grant terminable an nuities on terms in accordance with the nutties on terms in accordance with the most approved English tables and based on a rate not exceeding four percent; may issue exchequer bills or bonds or treasury bills. The Government may direct that the whole or any portion of the stock of the Province issued or inscribed and forming the whole or part of the public debt of Ontario be inscribed and transferred in a register kept in the United Kingdom, and may take steps to record such inscribed stock or any portion in accordance with the provisions of the Imperial Acts, known as the Colonial Stock Acts of 1877 to 1900. The Government may at any time change the Stock Acts of 1877 to 1900. The Government may at any time change the form of debt. The intention was to issue 40 year debentures or inscribed stock at \$12 per cent. although the bill permits the payment of a rate not exceeding four per cent. He thought the credit of the Province was sufficiently good to secure the more favorable rate.

Press Claims For Subside

Press Claims For Subsidy. Col. Matheson said the Government intended pressing its claims for a subsidy from the Dominion Government for the Temiskaming Railway, and if successful the cost of the road to the people would be reduced. As he stated the other day the total cost of the road would be about nine million dollars. Figures were given showing the earnings and expenses of the first section of the Temiskaming Railway. In January from the 14th to 31st the earnings were \$5,219.17, expenses \$4,566.12; February earnings \$7,542.65, expenses \$6,453.69; March earnings \$10,539.15, expenses \$6,453.59; making a total earnings of \$23,300.97, and expenses \$17,473.06, leaving a balance of \$5,829.91. The earnings for April were \$12,333.78, but he was unable to give a statement of expenditures. Col. Matheson said the Governmen

but he was unable to give a statement of expenditures,

British Act In Way. Mr. Harcourt believed it the proper course to get the direct loan, but pointed out it could not be made through having ontario placed upon the lists as trusts securities, the British Colonial Stocks Act being in the way. This could only be achieved by having the British Government amend the Stocks Act. He protested against the general way the bill was worded

the general way the bill was worded. The ostensible purpose of the bill being to aid the Temiskaming Railway the bill should say so definitely. The bonusing should not intend further than the needs of the Province.

Mr. Whitney said their would be no danger of the Government failing into error as they were taking every precaution as to the steps being taken. Negotiations were already under way to have the Colonial Stocks Acts amended. It was not a new idea for other Provinces were taking the same steps to have themselves listed as trust securities.

obligations of the Province regarding the financial matters as very serious. The Provincial debt was "practically

nothing."

"Six millions," said Mr. Matheson.

"Oh, no! oh no!" cried the ex-premier. He did not think the British Government would veto the bill even if it did pass. He wanted to know what guarantee there would be that the money would not be expended in other ways than upon the Tersiskaming Railway. Tucker's Bill Popular.

Mr. Tucker's bill to widen sleigh runners was strongly supported by Col. Munro, Mr. Hoyle, C. W. Torrance, Dr. Lewis, Mr. Kidd, Mr. Graham and Major Craig, while Mr. McCoig expressed the opinion that it was promoted by the manufacturers. The Premier observed that there seemed to be a strong feeling throughout the country, and he suggested it be sent to the Municipal Committee.

Mr. Lackner's bill to provide for the repayment of municipal debentures in equal annual instalments was read a second time.

equal annual second time.

In reply to Mr. Craig, the Minister of Education gave three as the number of Latin text books authorized for use in the high school and colegists.

In the family circle is the place to talk over matters of interest to the members of your household, but our store is the proper place to talk over Wall Paper and decorations for your home. You can have our ideas or decorations and colorings to guide you through our samples of Wall Paper which are the finest in Ontario. We have a magnificent selection of all grades of Paper that will appeal to the most particular persons. ernment was not yet able to state what its policy will be in regard to the multiplication of text books. A number of private bills were read a first time.

Worried About Indomnity. Mr. Graham asked if it was the in-tention of the Government to cut down the indemnity, and the Premier replied that as long as he remained at the head of the Government and the re-sources of the Province were what

they are now the indemnity would be maintained at a proper figure.

The House got through the order paper at 5.30, and there was no night

During the discussion of the estimates relating to the Educational Department, Preston (Brant) asked what steps were being taken for the pretection of the adult blind in the Protection of the adult blind in the Province. He suggested a census be taken of them and that proper trades be taught them at the Brantford institution. At the present time only plane tuning and basket weaving, two trades not much in demand, were being taught.

Hon. Dr. Pyne said the question had already engaged their attention, and the Government would take it up.

In the Railway Committee.

in the Railway Committee.

Dr. Smellie (Fort William) vigoreusby opposed a bill to incorporate the
Loch Lemend, and Mount McKay Incline Railway Co., which wants the
right to build an incline railway te
Loch Lomond, which Fort William depends upon for its future water supply. The bill was finally withdrawn.
A bill to provide a steam railway between Penetang and Orlilia was passed, and the bills of application from
the Bruce Mines and Algoma Railway
for an extension and of the Hormina.
Railway Co. for privileges were reported.

of The Times at Tokio cables:—The

Japanese ridicule Linevitch's report of the expulsion of the Japanese from five positions and the occupation of Tunghusiang by the Russians on April 29. The facts are that the Rus-

April 29. The facts are that the Russians effected an entry in one quarter of the town, but quickly retired on the approach of the Japanese, who held the place in considerable force.

Transperts Leaving Sevastopol.

The correspondent of The Times at St. Petersburg cables:—Apart from a wild report of Rojestvensky's reaching Vladivestock, the telegrams from Manchuria contain nothing important. The sensational report that Russia has acquired the navies of Chile and Argentina continues to meet with an official denial, but from private sources I learn of several transports leaving Sevastopol for the same destination as the mysterious vessels from Cronstadt.

bamaged By a Typhoon.

Amoy, China, May 5.—A' typhoon which swept over the ceast of south China this week is said to have damaged the Russian second Facific squadron considerably. The lighter vessels are said to have scattered. Shipping men expect further delay in the execution of Admiral Rojestvensky's plans as a result of the damage sustained by the squadron.

sky's plans as a result of the damage sustained by the squadron.

A Press Boat With a Mission
London, May 5.— The Daily Mail's Hong Kong correspondent says that numerous steamers are constantly plying between Saigon and the Russian warships with full cargoes of provisions and cattle. He adds that it is reported that American and German newspaper correspondents at Shanghai have chartered the steamer Fuschang estensibly to view the coming avail battle. The vessel, he reports, is flying the French flag, but it is believed she is really Russian property with a mission to locate Vice-Admiral Togo.

FOUGHT REGULAR BATTLE.

Christians Held Regular Carnival and Plunderes the Jews.
St Petersburg, and b.—Latet news of the anti-Semitic disorders in the Crimea shows that at Melitopel the people set upon the Jews and fought a regular battle with stones and revolvers. The few police and thirty soldiers were pewerless. The Christians from noon until midnight held a carnival of pillage and plunder. Every shop except two jewelry stores were sacked. The arrival of M. Trepoft. Governor of Taurida Province, on the following day, restored order.

Seven Slain at Church.

Lodz, May 5.—A terrible riot occur

Seven Slain at Church.

Lodz, May 5.—A terrible riot occurred at the Church of the Holy Cross.

When a number of Boman Campolics
began sugging revolutionary songs, a
Cossack patrol came up at a gallop
and began firing into a crowd of people huddled on the church steps.

SHERIFF TAKES COMMAND.

Swears In 400 Deputies Against the Advice of Mayor Dunne.

Chicago, May 5.—Sheriff Thomas E. Barrett, the chief peace officer of Cook County, in response to an impassioned appeal from more than three hundred leading business concerns of Chicago, has taken command of the forces that will endeavor to stop violence and disorder occasioned by the teamstrs' strike. The sheriff at 2 o'clock yesterday afternoon began swearing in deputies. At 6 o'clock last night he had an added force of more than 400. The sheriff's action was taken after a conference with Mayor Dunne, and against the advice and approval of the city's chief executive.

Employers Wen't Parley. County, in response to an impassione

Employers Won't Parley. Attempts of the strike leaders to day to get the employers to agree to arbitration to settle their differences met with a flat refusal. Ricting Continues.

Rieting Continues.

There were small riots in various parts of the city during the day, and upwards of a dozen persons were hurt, but the number of casualties and the violence displayed were not as great as that of the preceding days. Shots were fired during an encounter between non-union teamsters and strikers early in the day at the Hub stables, Nineteenth and Dearborn streets, and two men were shot and painfully wounded. In a riot last night at 18th and Dearborn streets, and two men were shot and painfully wounded. In a riot last night at 18th and Dearborn streets, Thomas McCracken, a striking teamster, was stabbed in the neck and beaten over the head by a colored non-union man. Five coal wagons were attacked at Harrison and Desplaines street last night, one man was shot in the head. Volleys of stones were hurled, wagons and several policemen and drivers were struck.

Million Dollar Convent. City Hall by the Sisters of the Notre Dame Congregation for approval. The new building will be situated on Sherbrooke street: it will be 578 feet long by 50 deep, and will cover 57,418 square feet, and will be five storeys high. The building will cost over a million and a haif, exclusive of equipment.

It was decided to hold the next anual meeting in Winnipeg.

A MERCANTILE ASSOCIATION.

"A movement is being made among the business men to renovate the present composition of the Board of Trade, or failing in that plan, to start a bran new association, found-ed on the young material that has within recent years become an important part of the mercantile community. There are now what is called a picnic-rate board, which meets once a year to hear a report being read, arrange for the annual picnic, and compels the treasurer to periodically show his pockets. There are two subsidiary institutions to this body, called the Retail Merchants' Association and the Industrial Committee, that are doing fairly good work so far as they go, but the order of their going is not very far. There is a big vacancy for such a cosmopolitan body, and lots of material to work on, but with the two other commercial organizations promising a lot and doing little, an independent body is loathe to start out on its own account. The union of the entire three would create an excellent and useful association, and one, if organized and worked on proper and sensible basis, could do a considerable amount of good for the city and the citizens thereof."

The foregoing from the London Free Press applies equally to Chatham. The suggestion is an admirable one and will repay a thorough examination by those interested.

LUCKY WORKMEN

The region beneath the old market shed is said to be a regular silver mine, and many stories are in circulation as to the money that has been found beneath the old landbeen found beneath the old landmark. For the past two days workmen have been engaged demolishing
the structure and it is said that
many of the men are richer by their
finds of silver below the floor. Ed.
T. Jones stated yesterday morning
that one man had found a gold ring
in addition to many silver coins. The
cracks were large in the floor and it
was generally fairly unlucky for the
market woman that dropped any
money.

H. GHLY HONORED

On Tuesday evening, May 2nd, a very pleasant event took place at St. Joseph's Hospital, when an informal reception was held in honor of Dr. J. L. Bray, who recently received from the Queen's University, Kingston, the honorary title of Doctor of Laws.

from the Queen's University, Ringaton, the honorary title of Doctor of Laws.

The Nurses' Lecture Room was handsomely decorated for the occasion, with ine aniversity colors, together with a profusion of carnations, palms and lifes. A delightful little program of high class music, vocal and instrumental, was rendered by young ladies of the Ursulline Academy, at the termination of which one of the nurses came forward and read an address, to which the Doctor feelingly replied. After the singing of God Save the King, all repaired to the dining hall, which was also tastefully decorated with flowers and bunting, red, yellow and blue, and where a sumptuous banquet was prepared.

The following is a copy of the address:—

dress:—
Doctor J. L. Bray, LL, D.:
Dear Doctor Bray, With feelings of anmixed pleasure we learned, some time ago, that your distinguished labors in the cause of medical science had been so fully recognized and appreciated as to win for you the honorary title of "Doctor of Laws." Now that you are the happy possessor of that enviable distinction; it is only fitting that we, the Sisters and Nurses of St. Joseph's Hospital, gather around you to offer our felicitations on the glad occasion, or rather, to participate in the honor, because we have, at all times, regarded you as an important factor of the institution. or, because we have, at all times, regarded you as an important factor of the institution. Verily, we consider the favor to have fallen on the Hospital, so closely and so devotedly have you wrought for its success, from its very inception until now. That you may be given many years to wear the laurels, so worthily bestowed, is the earnest wish of all assembled here, in friendship, to-night.

Practices What He Preaches.

Mr. Edward Carpenter, whose book 5n "Civilization: Its Cause and Cure," has just aroused the cordial appreciation and interest of Tolstot, has put his doctrines into practice by retiring from the world to a small Socialist community, which cultivates the land at Holmesfield, on the Derbyshire moors, between Chesterfield and Sheffield, says The London Star. He was a fellow of his college at Cambridge, and took orders in 1869, but five years later he relinquished his fellowship and his orders. After seven years' activity Practices What He Preaches er he rellnquished his fellowship and his orders. After seven years' activity as a university extension lecturer he visited Walt Whitman in America and visited Walt Whitman in America, and his intimacy with the American thinker seems to have colored his philosophy ever since. "Towards Democracy," one of his best known works, is written under the Whitman influence, and in 1881 Mr. Carpenter commenced the farm life at Holmesfield, to which he subsequently added, as a work of social usefulness, the making of sandals.

THE PECULIAR LOON.

this Bird Has a Hide About as Tough

The loon differs from other birds in a number of ways. I have reason to think that many people are unaware of some at least of these peculiarities. of some at least of these peculiarities.

The loon has a hide as tough as an ox, and its feathers cannot be plucked without first scalding the bird as you would a hog. This incident will give some idea of the toughness of the hide: About thirty-five years ago, when I was living in Michigan, a loon was shot at with a shotgun industriously all summer without apparently doing him any harm. In the fall I killed him with a rifle just to convince the people that a loon could be shot and killed. d many times been shot at with a rife by the same people who had used the shotgun, and they had become convinced that he dived so quickly that he dodged the shot in that way. I had seen them shoot at him a number of times, and I could see the splash of bullet or shot in the water before the loon dived. I ridiculed the idea of the dodging, and that led to my shooting him to support my contention. When I ver a hundred No. 6 shot, all of them nck to the inside of the hide and so ing him no permanent harm. It is markable that he was never hit in

the eye nor sustained a broken wing. Another thing peculiar to the loon is that after the chicks are batched, if the mother wishes to move far, she will make a shallow dive and come up under her babies and swim off with them on her back. The person that succeeds in photographing her under such condi-tions may well claim the pennant. Only ance have I seen a loon shoulder her young, although for over twenty years I lived in the part of Michigan where then there was the best chance imagi-nable to watch loons. Now the timber has been cut off around most of the lakes, and such favorable conditions

for observation no longer exist.

Although I have only once seen a loon shoulder her bables, I have seen her swimming with them on her back many times. Once one swam within twenty feet of me and never suspected

my presence.

One of their calls when sitting on the water for volume beats that of any other bird or beast that I know of. I have heard them in the night when they were more than five miles distant, for they only make that kind of call water, and there was no lake in that direction short of that distance. To say that the loon is a very interest-ing bird is as mild as I can express it.

SETS THE TIME FOR CANADA

Heavy Responsibility Rests Upon Big

Clock in McGill University.

Few people, even in Canada, realize the responsibility resting upon the big timeplece in the observatory of McGill University, Montreal. Even the German fleet in the Azores set their time by it. The clock at McGill is compared at frequent intervals with the clocks at the Toronto and Washington observatories by means of telegraphic communication. As a rule, the signals from Washington are slightly behind those from Montreal, owing to the distance between the two cities, but there have been only about six occasions during the past five years when there was a difference of over one second between the two clocks.

The Canadian Pacific Rallway Co. has an official timekeeper at all terminal points who corrects the watches of the trainmen on his division from the daily messages received from the McGill clock in Montreal. These messages are sent every morning at 11.54, and the seconds are ticked off until 11.56, when the méssage closés. When the ime message is beling sent, the lines have to be cleared of all other business, and this is a rule that on no account is allowed to be broken. The Canadian Pacific telegraph office is connected with the McGill Observatory clock by a special circuit, and signals are continuously sent over this circuit by the clock. These signals are received at the western terminus of the rallway through automatic repeaters at Fort William, Winnipeg, and Switt Current. About 3-100 of a second are occupied in passing through each repeater, and the time occupied on the wire itself is about 2-100 of a second. The actual time consumed between Montreal and Victoria, B. C., is about 15-144 of a second. The signal arrives at Victoria at \$.45 to 8.56 Victoria time. The time signals at Canso, N. S., are automatically répeated to the Azore Islands in the Atlantic and the vessels of the German fleet receive them from the Canadian Pacific. Beliands of the manner of the signals at Canso, N. S., are automatically répeated to the Azore Islands to the islands of Jamaica and Bermuda and from Victoria they are se

Career of Canadian General.

Career of Canadian General.

Further particulars have been received regarding Major-Gen. Samuel Peters Jarvis, C. M. G., a former commandant of the Ontario Rifles and Commandant General of the Colonial Forces at the Cape, who died recently at the age of 85. Gen. Jarvis was the eldest son of the late Col. S. P. Jarvis, Tormerly Superintendent-General of Indian Affairs in Upper Canada, by his wife Mary, daughter of Chief Justice Powell, and was born at Queenston, Ontario. He was educated at the Old Upper Canada College, Toronto, and while still a youth he served as a volunteer at Toronto in the Rebellion of 1837. He purchased an ensign's commission in the Royal Canadian Rifle Regiment in 1845, and exchanged two years later. To say that the 100B 18-18 very interest ing bird is as mild as I can express it —Forest and Stream.

Late Mr. Arthur Harvey.

The late Mr. Arthur Harvey will be much missed from literary and scientific circles in Toyonto, says The Globe. For many years he had taken a prominent part in the proceedings of the Canadian institute, and it was always a pleasure to the other members to hear his contributions to the discussions which followed the reading of acientific papers. His versatility was astonishing, and his culture embraced wide field of literature as well as science. Though he held tenaclously to his own well-thought-out views, he was always ready to hear the other side without impatience. His manner toward his fellow-members was urbanity itself. To even Mr. Harvey's most intimate friends it was matter for surprise how a man of business was able to acquire such a mass of lore and keep it so ready for extempere use. He was, it is needless to say, widely respected by his fellow-citizens, to whom his striking figure and ready greeting have long been familiar.

Lengthening Human Life.

Rip Van Winkle was supposed to have lived longer than his allotted "three score and ten," and many times we are referred to the old days as being prolific in aged people, yet we hear of more people in this soft century living to a hundred years and more than was ever known in the United States before.

United before.

Recent discoveries have proved that it's not only important to have pure red corpuscles but also plenty of white corpuscles, as the se latter act as the scavengers of scavengers of the body. If diseased germs enter the sys-tem, it is the duty of these

diseased germs enter the system, it is the duty of these white bloodeells to destroy the noxious germs. Thus, there is a continual strife going on inside enemy. Dr. R. V. Pierce, the chief medical director of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., early recognized the importance of the blood in the human economy and its relation to health and long life, and set about to find in nature some plants that would stimulate the blood-cells and rejuvenate the whole system. After years of experimenting, Dr. Pierce discovered an alterative extract from roots and herbs, without she use of alcohol, that made rich red blood, and this "Medical Discovery" has been given to the public and can be obtained from any dealer in medicines in this country. Dr. Pierce's Golden Medical Discovery assists in digesting the food and taking from it such elements as are necessary. Because of the good effects of Dr. Pierce's Golden Medical Discovery upon nutrition the tissues are built up and the symptoms of catarrh, threatened consumption, weakness, or debility, such as fever, night-sweats, head-ackes, etc., are dispelled.

Certified British Sea-Cooks.

Certified British Sea-Cooks.

Another blow has been aimed at the romance of the sea. The day of the haphazard ship's cook, better known as "the doctor," has passed says The London Express.

The Board of Trade proposes to keep a paternal eye on the culinary department of the merchant marine, and to this end Mr. Gerald Balfour has introduced a bill into Parliament. It provides for certificated cooks being carled by every British foreign-going ship of a thousand tons and upwards. "A cook shall not be considered "certificated" unless he is passed as competent in cooking by the Board of. Trade or by some school of cookery or other institution approved by the Board. As an alternative he must hold certificates of discharge showing at least two years' service as cook.

Moreover, the cook must be able to prove six months' service at sea in any capacity, and shall be rated in the ship's articles as ship's cook or steward. This proviso is for the protection of "doctors" who are seamen first and cooks afterwards. Otherwise, landlubbers of the most objectionable type might find their way into the merchant service solely on their ability to make, puddings and broll mutton cheps.

Although the new act will not be

cheps.
Although the new act will not be effective until December 31, 1907, it is already unpopular with merchant

THE KITAMAAT INDIANS.

No Race Suicide Among Them-Civilization Increases Birthrate on the Pacific Coast.

the Pacific Coast

The recent definite settlement of the new Alaskan boundary, the sea terminal of the G. T. P., the resemblance between the Kitamaat Indians and the Japs, and the discovery of a new Hiawatha on the Pacific—are all epitomized by the Rev. G. H. Raley, who recently passed through Toronto and talked about his home in Kitamaat, B. C.

Mr. Raley, who has been twelve years working on these problems, is a missionary now on extended furlough with Mrs. Raley. He is a canoe voyageur, town-builder, linguist, expert mental gardener, explorer, practical printer, newspaper editor and amateur photographer —a swarthy, mild-voiced man, with an English accent and injettily interesting, the pastor of a peculiar people in a strange land.

"The only Indians that I know of who never lived in tepees or wigwams," he said, showing a picture of old Kitamaat with windowless huts, made of split _edar. "The Kwagiulto, nation, of which the Kitamaats are a branch, have lived in wooden houses ever since the stone age. When Lord Dundonald was out last year I showed him great cedars partly split by the Kitamaat fiint adzes, which are as keen as axes. The Kitamaats are not nomads; cannot be, for they are shut in. Fishers and hunters, they care but little for white man's food if they can get fish. not be, for they are shut in. Fishers and hunters, they care but little for white man's food if they can get fish, collean oil, bark and klitsam root. I have about 500, all told, in a huge parish that I cover three times a year by

Here Mr. Raley produced all the files of the first and only newspaper ever published in the Kitamaat Land—the while he is the Kitamaat Land—the war-wa-Na-Kwa"—down on the Northwest coast, a church quarterly, founded by him in January, '98. The first edition is yellow—not yellow journalism, however, Here is part of its news column:

Mail received at Kitamaat before Xmas, via Hartley Bay, by cance.

Several schools of whales (finback and the several schools of the left this fall

Several schools of whales (finback roarers) passed up the inlet this fall in search of food. One monster came within 200 yards of the mission house on Oct. 10th.

A chief and five Kihmanu people are wintering here. They speak the Kitamaat language.

wintering here. They speak the Kitamaat language.
The Kitamaat tribe is not decreasing.
During the year there have been 13
births, three marriages, 12 deaths.
About 2,500 copies of Na-Na-Kwa
are now printed every quarter.
"Have your Indians no tuberculosis,
Mr. Raley?"
"They have, but we are fighting it.
There is less of it now than when for

Mr. Raley?"

"They have, but we are fighting it. There is less of it now than when \$\mathbb{F}\$ went there. The mortality of our Indians is decreasing with civilization. We are teaching them to take care of themselves. We owe that to a vanishing race. When I went there the children were dying wholesale from exposure in long voyages to the potlach feats. Wherever you find a potlatch village ther are few children. No civilization does not mean race suicide with us—quite the reverse."

"You say the Kitamaars resemble the Japs, Mr. Raley?"

"Yes, at two canneries I have put small Kitamaats alongside big Japs and nobody could tell the difference. Yes, I am quite sure these Indians come from the Orient. Why these very Japs whom we have there are catching fish right along in conjunction with Kitamaats—good fishers they are too."

Kitamaat is now a number of frame houses, population 200; expectantly waiting for the day when the G. T. P. or the C. N. R. or both shall locate a terminus there and when oceangoing ships shall drive out the fin-back roarer whales from the 75-mile harbor."

THE LATE ALEX. BEGG.

A Pioneer Newspaper Man and Crofter Immigrants' Friend.

Immigrants' Friend.

On a recent Sunday in New York the death took place of Alexander Begg. who was for many years one of the best known newspaper men and immigration workers in Canada. Mr. Begg was born on May 7th, 1825, in the parish of Watten, Caithnesshire, Scotland, and was educated at a private school and at the Normal School, Edinburgh, Scotland, obtaining a teacher's first-class certificate. In 1846 he came to Canada, and taught school at West Huntingdon, Madoc and Oshawa. In company with Mr. J. E. McMillan, he started The Messenger and afterwards The Sentinel at Brighton, and The Advocate at Trenton. In later years rerepresented The Globe at Ottawa during several Parliamentary assions, afterwards founding The Muskoka Herald and The Canadian Lumberman. His other literary efforts included a history of British Columbia and many minor publications.

About 1865 he returned to Scotland, and taught scotland, and taught school at the constant of seven days, as at present. The men ask that 8d., 9d. and 10d.

other literary shorts and many minor publications.

About 1855 he returned to Scotland, where he spent a year or two, and, coming back to Canada, he was appointed to the customs staff at Morrisburg, and in 1868 he was made inspector of inland revenue for the Northwest. He left for his new post, and accompanied the Hon. Wm. McRougall and staff, but when they reached Pembinathey had to turn back owing to the Riel rebellion.

The Ontarie Government appointed him Emigration Commissioner to Sootland, and he was very successful. He established a temperance colony almost thirty years ago near Parry Sound, and succeeded, after giving evidence before an Imperial commission, in inducing the British Government to grant \$750,000 for the establishment of Scotch crofters in the Northwest. He gave evidence for the British Columbia Government before the Alaskan Boundary Commission.

Mr. Begg is survived by his widow, a daughter of the late Miles Luke, a U. E. Loyalist, who settled near Oshawa about 1815, and by eleven children.

everal years after we came out
a was trying. Wages were very low at
that time, and provisions and other necessaries very dear. But now around
us things are very different. Trade is
good, and farm wages are high, provisions and other necessaries quite reasonable. Any young man with good
health, not atraid of work, and able
and willing to put up with inconveniences, with great perseverance and
carefulness, no doubt would be much
better off in a few years than he would
have been in England.—English Emigrant in Wolverhampton Journal. The Emigrant In Canada.

so on, aren't enough. The Clothes must be snappy and have a jaunty appearance. We give all these points at

The T. H. TAYLOR Co.

FORTY MILES OF LOCUSTS.

Stopped a Railroad Train in Ugavda While Proceeding to Mombasa. The Daily Express publishes the following:—A remarkable sight was witnessed recently by passengers in one of the down trains on the Uganda Rail-

of the down trains on the Uganda Railway, writes an Express correspondent. When passing Nairoli, the head-quarters of the railway, a dense swarm of locusts, closely followed by an enormous flock of hawks, circling gracefully round in pursuit of their prey, was seen high up in the heavens.

An even stranger sight, and one which told only too plainly of the havoc being wrought in their aerial ranks, was presented by the discarded wings of the locusts which futtered to the ground like falling leaves.

wings of the locusts which interest to the ground like falling leaves. Not long ago, while proceeding from Lake Victoria to Mombasa, a train ran into a perfect bank of these destructive pests, which continued, with more or less density, for a distance of nearly

less density, for a distance or nearly fort; miles.

In some places they were between four and five inches in depth; but, curtously enough, the entire invasion was confined to a strip of not more than fifty yards on either side of the fourfoot way.

As soon as the engine struck the swarm the train was brought to a standstill, and for the next two hours a breakdown gang had to be employed in shoveling the locusts from the metals and covering them with sand, the stench being described as almost overwering.

THE LOCAL BUDGET

English Pheasant Eggs For Sale-Vm. Mann, Murray St.

A. Scratch, of Kiagaville, was a isitor in the city yesterday. Herb Dennis is on the sick list. He is suffering from an attack of

Only the first 666 people will be granted license on June second, Why?

Miss Kline and Miss E. B. Kline, of Amsterdam, N. Y., were registered guests at the Garner House yester-

Miss Capman, Taylor avenue, who as been seriously ill for some time, a improving nicely and is able to e out again.

Frank Crow and Orville Dolsen yesterday. Mr. Crow was thinking of purchasing a boat. Mr. Dolsen says that Frank did look over the Northland, but, didn't buy it.

James Anderson, formerly superintendent of the Chatham Mfg. Co., broke a blood vessel in his feg while working in the factory at Petrolea. He is now resting at his home on Barthe street.

Chas. E. Goodman, of Windsor, who was formerly connected with the local Pere Marquette freight offices, has returned to the city, having been transferred by the company to his old position here.

T. G. Carscallen, M. P. P., Napanee, and Conservative member for Lenmox, was in the city over last night. He was registered at the Merrill House. Mr. Carscallen left for the West this morning.

The wedding took place at the Victoria avenue Methodist parsonage yesterday afternoon of Miss Lizzie Teer, of Orford, to Nathaniel Churchill, a prosperous young farmer also of Orford. The wedding ceremony was performed by Rev. F. E. Malott. In a the little daughter of Mr.

Ina, the little daughter of Mr. and Mrs. Geo. Wanless, Lacroix street, while playing with aome of her little companions vesterday, received a bad fall and dislocated her shoulder. The little girl will be confined for some time,

home for some time,

Harry Tomlinson, the seven-yearold son of the late Geo. Tomlinson,
late engineer at the Waterworks
station, Head street, died in Kalamazoo and the remsins were brought
to this city this afternoon at three
o'clock, Deceased was the youngest
see of the family. One brother and
two sisters survive. The funeral
took place this afternoon to the
Maple Leaf cemetery.

The non-jury sittings of the High

Maple Leaf cemetery.

The non-jury sittings of the High Court will open here on Monday, May 8th, before Mr. Justice Teetzel. So far only three cases are entered for trial, as follows: Paling vs. Glassford, a breach of land agreement, W. F. Smith for plaintiff, J. S. Fraser contra; Irwin vs. Hawk, administration suit; Wilson & Co. vs. Bartlett & Co., Crawford vs. Magee, action to set aside a deed, Wilson & Co. for plaintiff, P. A. Gahan contra.

Applications for G. T. License will be received until 7.30 p. m., June sec-ond, because—

Geo. Peltier charged Joseph Jubinwith selling and exporting black contrary to law. The witnesses had great difficulty in distinguishing petween black bass and carp. case was dismissed.

A very quiet wedding took place yesterday afternoon at the St. Andrew's manse, when Miss Belle Somerville, eldest daughter of Mr. and Mrs. Wm. Somerville, was married to Claude Bragg, a prosperous young implement dealer of this city. They left on a honeymon trie to worker. left on a honeymoon trip to western

FOOTBALL TO-MORROW

Darrell and Chatham will play a game of football on Tecumseh Park

TO CONSOLIDATE DEBT

Reeve Wm. Hickey and Clerk Alex. Farquharson, of Tilbury East, returned last evening from Toronto, where they appeared in company with Matthew Wilson, K. C., before the Private Bills Committee of the Ontario Legislature, in the interests of a bill to consolidate the debt on the Dauphin drainage scheme. The bill was introduced in the House by Arch. McCoig, M. P. P., and referred to the Private Bills Committee. The bill passed the committee successful-

These gentlemen also interviewed the Commissioner of Public works, Hon. Dr. Reaume, and his assistants, and asked for a grant under the Drainage Aid Act for the work on the outlets to the No. 1 Government Drain and the McDouwell No. Drain and the McDougall Drain, Ra-leigh. They left the maps with the Government officials and they think their chances for getting aid are good. The work on both drains will cost about \$15,600.

ONE YEAR

Such was the Sentence of Wm. Boyd —Largely Signed Petition Presented

London, Ont., May 5.-Wm. Boyd and Hugh Stevenson, found guilty of conspiracy to defraud Hugh M. Douglass, were sentenced on the opening of the Assize Court yesterday. The two men were ordered by Mr. Justice Meredith to be imprisoned in the Central Prison at Toronto for a period of one year. His Lord-ship made the statement that the sentences were made considerably lighter by reason of the fact that he had been handed a number of petitions, strongly signed, asking for

JUDGE ADDRESSES PRISONERS,

JUDGE ADDRESSES PRISONERS.
Addressing Boyd, His Lordship said that there were 'several things to be regretted in his case. He was a young and intelligent Canadian, born of decent people, as able as any man to earn his own livelihood.

"It is to be regretted that you allowed yourself to become the stool pigeon of American crooks," went on the judge, "to decoy Canadian geese across the border to be plucked. If it had been dope for your own benefit there would have been less disgrace in it for you."

Another thing to be regretted was that the "millionaires," his accomplices, were not in the dock with him. It was to be regretted that any man should stoop to methods shown to have been pursued in this case and that any man should let his cupidity and his stupidity lead him into what constituted him a criminal in the eyes of the law.

"Douglass has received his punishment," went on Justice Meredith Douglass has received his punish-

"Douglass has received his punishment," went on Justice Meredith, "And his punishment is not a light one. He has been fined \$10,000, and has paid dearly for his cupidity." "You are a young man," he continued, in passing sentence. "You have made a fake start, a start that if persisted in will lead to one place only, to the penitentiary for the greater tortion of your life. I have great hores that by this stumbling and tripping up you will become a credit to yourself, your family, and the community. This may become a blessing in disguise to you. We are told it is an ill wind that blows nobody good. I hope this will blow you some good."

His Lordship's remarks to Stevenson were much more brief.

WILL PRINT EVIDENCE.

on were much more brief.

Committee's Records Will Be Put Into Print.

Be Put into Print.

Ottawa, May 5.—The Telephone Committee decided yesterday morning to publish the voluminous evidence that has been taken before it with as much of the correspondence as is deemed necessary. When the peint was under consideration Sir William Muleck took the ground that it was best to let the public have all the information obtainable on the subject. No evidence was taken yesterday.

The secretary-treasurer of the New Brunswick Telephone Co. Was, summoded to appear before the committee. The company is allied with the Bell. Three directors are Hon. A. G. Blair, Senator Thompson, and Senator Dandurand.

In response to a director are

Dandurand.

In response to a circular, recently issued by Sir William Mulock's committee, asking for members views on this talephone question, D. W. Bele. M. P. for Winnipes, has written a letter advocating that the Gevernment expropriate the local systems as well as the long-distance lines, on the ground that they alike are a natural monopoly, and can best be regulated therefore by the rational Gevernment. It was decided that the examination of C. M. Hays and D. McNicoll should be in the hands of Mr. Chrysler, the committee's counsel.

After that examination the members will be allowed to question the railway magnates. The same arrangement applies to the examination of Mr. Sise, on Tuesday year

The committee will meet again on Tuesday next.

RODNEY CASE IN COURT.

Mrs. Covell and Alexander Willis Up For Preliminary Hearing.

Mrs. Covell and Alexander Willis Up
For Preliminary Hearing.
St. Thomas, May 5.—Mrs. Benjamin
Covell and Alexander Willis, charged
with the murder of Miss Eliza Lowry
with the murder of Miss Eliza Lowry
on April 18, were taken from the
County laft here yesterday morning to
stand preliminary trial before County
Magistrate Hunt yesterday.

A report from Rodney at neon disclosed nothing new. Dr. Patterson of
Rodney gave his evidence, which was
the same as that before the coroner.
He maintained that the dead woman
had been criminally assaulted by unnatural means.
Rodney, May 5.—At the trial yesterday afternoon, Mrs. Bellwoods, a
trained nurse, made this statement:
"I came to attend to Mrs. Covell only
when Mrs. Lowy teld me that Mrs.
Covell was badly hurt, and that the
case was urgent."

When Mrs. Lowry, who will probably be the first witness today, is
confronted with this declaration, in
the face of her statement that Mrs.
Covell's injuries were trifling, it may
make some important amendments in
her testimony.

Family Nearly Suffocated. Toronto Junction, May 5.—Harry Gibson and wife of Western avenue, and Arthur Gibson, who lives with them, had a narrow escape from being suffocated on Tuesday night owing to gas escaping from the stove. Although unable to be around Wednesday, they were out of danger yesterday.

Mother Sees Son Electrocuted, Quebec, May 5.—Emile Rioux, affeet years of age, was el cirocuted befor his mother's eyes at Roberval, having climbed one of the poles of the electric company to amuse a young sister

He that swells in prosperity will sure to shrink in adversity.

COURT OF ENQUIRY

Any person who wishes to give evidence or can furnish information for evidence in connection with the allegations concerning the matter of Licenses in West Kent, to be investigated by Court of Public Enquiry to open at 10'clock a. m., on Wednesday, May 10th., in the city Council Chambers, Harrison Hall, will please communicate with H. D. Smith, County Crown Attorney, Harrison Hall.

DEATH BY SUFFOCATION.

Cerener's Jury Renders Verdict In Case of James Kirvan.

Brantferd, May 5.—The coroner's in-quest, held yesterday afternoen, on the death of James Kirvan, who early Tuesday morning was found dead in his burning heuse, returned a verdict of death by suffocation, the origin of the fire unknown, and attaching blams te ne one.

the fire unknewn, and attaching blame te ne one.
Lizzie Smith, the Collingwood giri who has been living with Kirvan, con-fessed that she was never married to the decased. She said she had led her parents to believe that she had been, and claimed that Kirvan had promised to make her his wife later on.

on.

The father of the unfertunate young woman took her home to Collingwood yesterday. She is 19 years of age. Kirvah was 32.

KING EDWARD LEAVES PARIS.

His Majesty Returning to London-Loubet and Delcasse Saw Him Off. Loubet and Delcasse Saw Him Off.
Paris, May 5.—King Edward left
Paris at noon yesterday for London.
He was accompanied to the depot by
representatives of President Loubet
and Foreign Minister Delcasse and
many officials. His Majesty hestowed
a number of decorations of the Order
of Victoria and expressed the great
satisfaction which he had experienced
from his spiourn in France.

Canadian Doctors In the States.

Canadian Doctors in the States.

Detroit, May 5.—Dr. Geo. Chene of Windsor and Dr. G. W. Robinson of Scarbore were yesterday appointed house surgeons of St. Mary's Hospital for two years. Dr. Chene is a graduate of Toronto Wniversity. The medical and surgical staff of St. Mary's is now entirely Canadian. Dr. McLean, head surgeon, being a native of St. Mary's, Ont., and Dr. McIntyre, assistant, of Forest. St. Mary's Hospital is one of the largest in the city. It is under Roman Catholic control, but non-sectation in its benefits.

RIVER WATER IS GOOD

Editor London Free Press, - With reference to the article in Wednesday's issue, regarding the shortage of water and what your future plans should be, my attention was particularly drawn to the paragraph which stated that Water Commissioner

Jones was an advocate of river water for all purposes, but that his ideas were not accepted favorably.

If any interested parties, or any deputation from the city of London will make a visit to the city of Ohatham, they will find a modern plant and river water used for every purpose.

proud you are of the purity of Springbank water, but we have it here, superior in every particular. Our system here is conducted by a Board of Commissioners, the same as

Board of Commissioners, the same as in London, and is a paying proposition. Send your Water Commissioners and any others who are interested in good, pure water, and we will be glad to entertain them, and possibly help you out of your difficulty. On the side, we can show your deputation, miles of the best paved streets in brick, asphalt block, bitulithic and creosete block; also our big factories, which are turning out goods for every part of the civilized world, and which are representative of their class in every instance. Good water, good pavements, good factories and lots of them—that is Chatham.

My only excuse for this hastily written letter is my affection for my old home—the beautiful city of London.

Thanking you for the agency which

don.

Thanking you for the space which I have taken, and assuring any deputation our best attention.

I am, yours truly,

W. R. LANDON.

************* RAIN COATS

These are the days of unexpected showers. Every man's **WARDROBE** should include a Raincoat.

Ours however are not made merely to shed the rain. The same careful work is put on them that is characteistic of our clothing. They are Spring Overcoat that can be worn at any time.

AIDS STUDY OF LIFE.

lian Scientist Invents an Instrume Used to Observe Minutest Insects -Smallest Cells Shown.

Many times more powerful than the most highly improved microscope to which modern science is indebted for numerous important discoveries is the "bloscope," recently invented by M. De Gosparis, an Italian scientist, of the University of Naples, Italy.

This wonderful apparatus is a "long focus" microscope, designed, as its name implies, for the study of the phenomena of animal life in all cases in which it is impossible for the observer to get close enough to the object that is being examined, without risk of misinterpreting what is seen.

Ject that is being examined, without risk of misinterpreting what is seen.

The powerful microscope of to-day is capable of revealing the immost structure of minute beings that escape the sight, and of counting the number of cells, of which they are composed, but it is allowed the sight. it is almost impossible to oversee with it the phases of the normal life, of such

How can it be said that observation of the normal life of an organism can be made when, in order to examine it, the investigator is obliged to bring within a fraction of an inch of such an organism an apparatus that can-not fail to frighten it?

an organism an apparatus that cannot fail to frighten it?

In order to observe the normal life of microscopic organisms, another instrument is therefore necessary, capable of being used in cases in which the ordinary instrument becomes inadequate. It is such an instrument that has recently been brought to the attention of the world of scientists by M. de Gosparls, the great value of which discovery he sets forth and describes in a most interesting manner.

The "bloscope" is extremely simple. It is provided with a camera lucida to permit of the drawing of the objects observed. It consists of a tube with a rack provided internally with a system of achromatic objectives perfectly free from spherical ebarration, and with a wide field eyepiece.

The instrument is also provided with

ly free from spherical ebarration, and with a wide field eyepiece.
The instrument is also provided with a system of mensuration of various arrangements for supporting diaphragms. At a distance of 19.5 inches, the microscope has a magnifying power of more than twelve diameters, say of 144 times the surface.

In the field of the "bioscope" the as-

onished eye of the observer perceives new world-a series of scientific

Hatred, anger, joy, and love are de-picted in the acts of the infinitely small; we distinguish their weapons and their wounds and observe their

and their wounds and observe their palpitating viscera through their sides, and see their minute bodies, in the last convulsions of the agony of death, trembling with a final spasm.

Ants furnish a particularly interesting field for observation. We see, in illustration, an ant making its toilet at the entrance of a formicary covered externally with lichens and mosses, and a battle between two ants.

Spiders are no less curlous objects

and a battle between two ants.
Spiders are no less curious objects
for observation. We may see, especially by aid of the bloscope, the common leaping spider, at the moment at which it is leaping from a fissure upon its prey, and remark its preparations previous to leaping.

The struggle for existence among these small organisms takes on a char-

these small organisms takes on these small organisms takes on a character of almost human unsociableness. The smallest animals present themselves in the light of genuine morsters. Their rapid motions, evoked by no external cause, reveal their muscular power. The environment in which they live appears through the apparatus like a landscape with strange and fantactic forms are desirable and fantactic forms.

atus like a landscape with strange and fantastic forms, made attractive by multicolored plants, of which the transparent structure carries our thoughts into other worlds or toward the remote epochs of the prehistoric ages of our planet.

The "bloscope" is no less valuable for scrutinizing the life of aquastic animals through the sides of an aquarium, or evan in their natural element. It permits of studying bodies submitted to high temperatures, electric discharges, etc.

In the domain of medicine it renders possible the observation, under a strong magnification, of dimly lighted cavities (the larynz, ears, etc.), and of formulating a diagnosis in many cases that have up to the present been doubtful.

The "bloscope" therefore cappet followed.

ful.

The "bloscope," therefore, cannot fall to give the sciences of observation a new impulse. It has the advantage over the microscope of not necessitating a knowledge of a special technique, delicate and difficult to acquire. In this respect it puts scientific observation within reach of the amateur, who, as there are many examples to prove, is not to be despised.

Valuable Eggs.

A moa's egg has been found in a mining district in Central Otago, New Zealand. There was a fall of earth in a dredging claim and presently the huse egg was seen floating uninjured in the water. The discovery is the more interesting from the fact that it is the second perfect moa's egg that has ever been found. The only other perfect specimen was unearthed by a man while digging in the alluvial soil at the Kaikoura Mountains in the early sixtles. This egg, which was nine inches in length and seven inches in breadth, was taken to England and soid for \$500. Some idea of the size of these eggs may be gleaned from the fact that a man's hat makes an excellent egg cup for them.

FAMOUS PAINTINGS.

Discovered by Accident and Bough The strange 1.cissitudes through which some of the most highly prized and valuable pictures now preserved in public and private galleries have passed provides romantic reading. Take, for instance, the case of a sea-

scape by Turner.

A Captain Treharne was spending holiday in Barmouth. Chancing one day to be turning over the thousand and one articles in an old curiosity shop, he came across a dirty, ragged painting depicting a sea scene. It was painted on an oak panel, was not framed and was in a terribly disreputable condition. Prompted to buy the derelict, the captain secured possession of it for \$6. The purchaser took it home with him, the painting was cleaned and the varnish removed. Scrutiny then revealed the famous initials of Turner—"J. M. W. T."—and its authority was substantiated when submitted to an expert, who estimated its value at \$3,500.

More remarkable still was the history surrounding Raphael's "Three Graces." While rummaging among a collection of old furniture in Italy a French art lover named Henri Raboul happened upon it. He acquired the painting for a few francs. On his return to France M. Raboul offered it to the Louvre for a modest \$600, but the great Parisian art gallery refused to buy it. The owner finally disposed of it to an Englishman for \$750. In a few years the painting passed through a number of hands. Finally it was purchased by the Duc d'Aumale for \$125,-

More remarkable was the purchase of the second example of Raphael's art.
A gentleman of Pinner while walking along the Harrow road one day had his attention arrested by a painted panel in the window and bought it for 12 cents. The gentleman took it home and cleaned it. At the same time he was mystified by the initial "R." on the back of the panel. It was a genuine Raphael, worth \$3,500.

He Will Cure You First Then You Pay Him

value he has given the patient, but he expects to prove his worth and show positive and satisfactory results before he basks for the fee. So, should he fail to cure the case, the patient loses sothing, while the doctor, when he cures the patient, has given him what is worth much more than money—he has given him his health back. ADVICE TO CANADA.

H. Rider Haggard, Noted Writer, Says This Country Should Advertise Warns Against Farm Exedus.

Warns Against Farm Exedus.

Mr. Rider Haggard, novelist, and sociologist of world-wide fame, was the distinguished guest of the Canadian Club in Toronto the other day. The author of those ever popular classics of English literature, "She." King Solomor's Mines," and "Jess," came not as a writer of fiction, but on a mission which is dearer to his heart than the business of achieving fame through the production of strong, well written and infensely intereasting novels. He came as the commissioner of the British Government and as representing the executors of the late Cecil Rhodes, with a view to investigating the working out of the settlement schemes of the Salvation Army in America. Should he report favorably on the administration of the Army colonies on this continent money will be provided out of the great Imperialist's estate, supplemented by grants from the British Government, to ald in the founding of similar colonies in South Africa. Mr. Haggard is devoting his wergies and abilities to the solution of the slum problems of congested English cities. His message was a plea for the encouragement of a broad and comprehensive campaign to discourage the ill-advised movement, characteristic of all civilized countries, from the farm to the overcrowded cities, and to encourage the unhappy and unfortunate victims of modern urban life to go back to the land and and unfortunate victims of modern urban life to go back to the land and

urban life to go back to the land and find richer opportunities, healthier conditions, and a simpler, more hopeful and better existence in the broad areas of Great Britain's Colonies now awaiting settlement.

The author-commissioner is a well-built man, in the prime of life, with strong, clear-cut features, an intellectual cast of countenance, and of unstenatious manner and appearance. He has no mannerisms, no affectations. He impresses one as being a practical exponent of "the simple life." His twenty-minute address was marked by dry humor, by apiness and economy. dry humor, by aptness and economy in the use of language, and by direct-ness and effectiveness of expression. He is not a rhetorician nor a poseur in

He is not a rhetorician nor a poseur in any sense.

Mr. Haggard was accompanied by his daughter, Miss Angelo Haggard, and Commandant Booth-Tucker, of the Salvation Army in the United States.

He had been interviewed, he said, by about 400 reporters, and he thought that every one had his own original and unique report. He had just received from England a letter from a friend drawing attention to the fact that a newspaper article had referred to Mr. Haggard as having "tousled auburn locks." "The reporter had mixed me up with my daughter," he comed me up with my daughter," he co

mented.

Turning to the object of his mission to this continent, Mr. Haggard referred to his present work in seeking to solve some of the great problems connected with the life of the great cities in English some of the great problems connected with the life of the great cities in England. Only one-seventh of the population of England, he said, now dwelt on the farm. The glamor of city life had steadily drawn into its deadly not the poor yokels from the farm. Young and strong, male and female, they drifted to the cities, only to learn after a few years that their hopes of happiness and success in the restless life of the great cities were doomed to bitter disappointment. Few ever attained their ambitions; most were crushed by the relentless competition of aumbers, and were swept aside in the mad rush. The work of the Salvation Army in, the slum districts of London, where daily poor, unhealthy children were fed by the thousands at charstable institutions, told something of the said story. "When I think," he added, "of the happy conditions surrounding the Salvation Army colonists at Forfamity, in Colorado, and at the other Colonies in California and Ohio, and contrast with these conditions the missues of the said story with these conditions the missues of our English slum districts. contrast with these conditions the mis-

contrast with these conditions the miseries of our English slum districts, I
am amazed at the folly and inhumanity
of a nation that will allow such needless suffering to exist."

The great vital question at the back
of every sociological problem of this
age, he continued, was the prevention
of this baleful exodus from the country
to the city. The great aim of philanthropists should be to devise, if possible, some means of bringing these unfortunates of the crowded cities back te
a clean and healthy existence on the

thropists should be to devise, if possible, some means of bringing these unfortunates of the crowded cities back to
a clean and healthy existence on the
land. To assist in this work was the
object of his present mission.

"I was never in Canada until to-day,"
he said. "But I have read much of
your country. I have studied your Government reports. I know how vast are
Canada's opportunities, how splendid
her resources. May I offer one word in
advice? Why do you not make these
resources and this greatness which you
possess better known to the world? Why
allow so many of our Anglo-Saxon immigrants to be attracted to the United
States and to other foreign countries?
Outside of a tew placards posted in public halls, etc., in England, and with
the exception of an occasional paper
read to some small agricultural gathering, I know of little being done to attract our English emigrants to your
Dominion. You can make yourselves
better known if you will only adopt
more energetic methods of advertising.
And if I may add but one other word of
advice, I would ask you to profit from
the mistakes of the Old World. Prevent in your new and healthy nation
this conglomeration of unfortunates in
your cities. Do not repeat in Canadian
cities the evils of the New York tenaments or of the London slums. Keep
your folk out of the cities. And do
not forget to care for your immigrants
in a sympathetic and generous manner.
Romember that they are Strangers in
a strange land, and need your advice
and your assistance. Wise action and
forethought now will ensure the buildding up here of the most glorious nation
yet fashioned by the genius of the
British mind."

Commandant Booth-Tucker followed

Improving Sheep.

A fairly well bred flock of ewes bred for a few years to none but first-class rams will in a short time give as fine a flock as one could desire for all practical purposes.

"Most of the action in my story," explained Pennibs, "takes place in a cemetery."
"Well," rejoined Criticus, "that's a good place for a plot."

Women in Our Hospitals

Appalling Increase in the Number of Operations Performed Each Year-How Women May Avoid them.

Going through the hospitals in our large cities one is surprised to find such a large proportion of the patients lying on those snow-white beds women and girls, either awaiting or recovering from serious operations.

Why should this be the case? Simply because they have neglected themselves. Ovarian and womb troubles are certainly on the increase among the women of this country—they creep upon them unawares, but every one of those patients in the hospital beds had plenty of warning in that bearing down feeling, pain at-left or right of the womb, nervous exhaustion, pain in the small of the back, leucorrhea, dizziness, flatulency, displacements of the womb or irregularities.

When these symptoms show themselves, do not drag along until you are obliged to go to the hospital and submit to an operation—but remember that Lydis E. Pinkham's Vegetable Compound has saved thousands of women from surgical operations

When women are troubled with irregular, suppressed or painful menstruation, weakness, leucorrhea, displacements, and here womb, leucorrhoe displacements, infammation of the ovaries, backache, bleating (or flath) the saming down feeling, infammation of the ovaries, backache, bleating (or flath) the saming down feeling, infammation of the ovaries, backache, bleating (or flath) the saming down feeling, infammation of the ovaries, backache, bleating (or flath) the saming down feeling, infammation of the ovaries, backache, bleating (or flath) the saming down feeling, infammation of the ovaries, backache, bleating (or flath) the saming down feeling, infammation or the ovaries, backache, bleating (or flath) the saming down feeling, infammation or the ovaries, backache, bleating (or flath) the saming down feeling in flath may be seen them fill to the ovaries, backache, bleating (or flath) the saming down feeling in flath when the saming down feeling, infammation or flath or the saming down feeling in flath when the saming down feeling in flath when the saming down feeling in flath when the saming down feeling in fla

QUEEN VICTORIA.

Nation Not So Grateful as Appeare

Probable at Her Death. Queen Victoria has been dead bu

King in person presides. They comprised, in addition to the statue of the Queen, a semi-circular colonnade, a screen behind the monument in front of Buckingham Palace, and a processional road from Buckingham Palace slong what was formerly the Birdcage walk, terminating in a bridged arch, connecting the two wings of a new Government building on the West Strand. The memorial included marble groups representing the British colonial dependencies—Canada, Australia, India, the West Indies, etc.

At first money came in freely. Then the flow diminished. Finally it has ceased, and so relatively little over the \$750,000 required for the execution of the original design has been subscribed that many of the most attractive features of the monument have had to be abandoned, and others, such as the spiendid colonnade, mutilated. For the species of meagre looking balustrade now in course of erection has little in common with the grand celonnade of which we have seen the delign. Nor are there to be 2ny colonial groups. There is no money for them.

Lydia E. Pinkham's Vegetable Compound Succeeds Where Others Fail.

Queen Victoria has been dead but four years, yet so quickly has she been forgotten that it has been found impossible, owing to lack of funds, to carry out in its details the splendid memorial designed by Thomas Brock and Sir Aston Webb, both members of the Royal Academy, writes the Marquise de Fontenoy. So profound appeared the sorrow throughout the length and breadth of the British Empire at the time of the Queen's death, so immense the appreciation, of the blessings conferred upon her people by her wise and sagacious reign of more than three score years, that no doubt whatsoever was entertained but all the money needed for the erection of a fitting memorial to her would be speedily subscribed many times over.

We have all seen the designs accepted by the commission over which the King in person presides. They comprised, in addition to the statue of the Queen, a semi-circular colonnade, a screen behind the monument in front

Only a small man will blame his

Poor "Old Aristocracy."

Peer "Old Aristocracy."

Never before have there been for rent so many mansions of the great nobility in London, and magnificent old country places in the Provinces. Life nowadays in the United Kingdom is so frightfully expensive, with all the numerous calls of one kind and another on the yurse, that the old aristocracy finds it almost impossible to keep their various country places up. There is an authentic instance of an English duke with a large nominal income—a gautter of a million dollars a year—who actually offered to let his immense and historic country seat in the midlands, not merefered to let his immense and historic country seat in the midlands, not merely rent free but likewise to pay his tenant \$50,000 a year, provided the lessee would undertake to keep the place up properly and in thorough repair. His offer has been investigated by several men of considerable weath, who, however, when they realized the expense involved by the maintenance of such a huge place, with its regiment of servants and army corps of gardeners, farm hands, laborers, and estate office clerks, balliffs, etc., and the acres of roofs to be kept in repair, hastened to decline, without even thanks.

In fact, the day of these grand eld country places has gone by. They

country places has gone by. They lack the modern comforts and luxuries lack the modern comforts and luxuries, which are regarded as necessities by the new multi-millionaires, who alone have money to keep them up, which their present owners are too poor to do any longer. Before many years they will have disappeared. Many fires that have taken place during the last two or three years, resulting from defective insulation of electric wires, among tinder like old wooden paneling and draperies, involving the destruction of grand old country places, have been blessings in disguise and far less of a loss to the owners than has generally been realized. For not only were they in a measure recouped by the insurance but they also were relieved of what had constituted the most frightful drain upon their resources—the maintenance and keeping in repair of a great country place.

Show others that your-opinion of them is based upon their actions rather than words.

A good reputation is like good health; it is not fully appreciated until it is lost. nard's Liniment for Sale EveryMany Women Suffer Untold Agony From Kidney Trouble.

"Very often they think it is from so-called "female disease." There is less female trouble than they think. Women suffer from backache, sleeplessness, aervousness, irritability, and a dragging-down feeling in the loins. So do men, and they do not have "female trouble." Why, then, blame all your trouble to female disease? With healthy kidneys, few women will ever have "female disearders." The kidneys are so closely connected with all the internal organs, that when the kidneys go wrong, everything when the kidneys go wrong, everything goes wrong. Much distress would be saved if women would only take DOAN'S KIDNEY PILLS

at stated intervals,
Miss Nellie Clark, Lambeth, Ont., tells ef her cure in the following words:—"I suffered for about two years with kidney trouble. I sched all over, especially in the small of my back; not being able to aleep well, no appetite, menstruction irregular, nervous irritability, and backdust deposit in urine, were some of my symptoms. I took Doan's Kidney Pilla.
The pain in my back gradually left me,
my appetite returned, I sleep well, and
am effectually cured. I can highly
recommend Doan's Kidney Pills to all

sufferers from kidney trouble." Price 80 cents per box, or 8 for \$1.25. All dealers, or DOAN KIDNEY PILL, CO.,

The Stage Iron Foundry. After the liquid air on the stage comes the iron foundry. A performance now being given in one of the London halls has attracted a good deal of attention. The performer pours two powders into a crucible and lights them with a match. The result is a blinding incandescence and in thirty seconds a lump of iron. The experiment is re-peated, and this time a horseshoe is made from the ingot that is cast. The experiment, however, is well known to chemists, the ingredients used being thermite and barium superoxide. The dous temperature.

CROUP IS DEADLY!

It must be stopped quickly. Noth-It must be stopped quickly. Nothing so sure as Nerviline. Give it internally, and rub it on chest and throat—croup soon vanishes. No doctor can write a more efficient prescription than Polson's Nerviline, which reaches the trouble and cures quickly. The marvelous power of Nerviline will surprise you; it's the best household remedy for coughs, colds, core chest, croup, and internal pain of every kind. Large bottles have been sold by all dealers for nearly fifty years at 25c.

Shimose Powder. According to Captain Thacker, a Canadian officer, the new shimose powder used in the Japanese army is two degrees more destructive than dyna-mite. Gun cotton, on which lyddite and other high explosives are based, comes directly below the Japanese directly below the Japanese compound, while the cost of manufacture is onewhile the cost of manufacture is one-half that of gun cotton. Unlike ordi-nary explosives, which explode after they have pierced an iron plate, with shimose powder the piercing and the detonation are practically simultaneous. Thousands of fragments are scat-tered in all directions, which means the most fearful carnage when the explosion occurs on a ship's deck.

MORE DEADLY THAN FAMINE.

Neglected catarrh sooner or later causes consumption, which destroys more human beings than famine and war combined. The way "Catarrhozone" cures catarrh ie yery simple; it first kills the germs that cause the irritation; then by soothing away the coagestion and inflammation it cures the discharge, hawking and dropping in the throat. "I suffered so continually from nasal catarrh," writes Brnest R. Dakin, of Rosemont, "that I scarcely knew what it was to be free from headache, and pain over the eyes Catarrhozone relieved me at once and made a thorough cure." No other remedy cures like "Catarrhozone"—try it for your next cold. MORE DEADLY THAN FAMINE your next cold.

Even after a man has reason to be satisfied he delights to search for something over which he can worry.

Monkey Brand Soap makes copper like gold, tin like silver, crockery like marble, and windows like crystal.

It's easy enough to love your neighbors if they only keep away from you.

Stratford, 4th Aug., 1893. MESSRS, C. C. RICHARDS & CO. MESSRS. C. C. RICHARDS & CO.

Gentlemen, — Exy neighbor's boy, 4
years old, fell into a tub of boiling
water and got scalded fearfully. A
few days later his legs swelled to
three times their natural size and
broke out in running sores. His parents could get nothing to help him
till I recommended MINARD'S LINIMENT, which, after using two bottles, completely cured him, and I
know of several other cases around
here almost as remarkable, cured by
the same Liniment, and I can truly
say I never handled a medicine
which has had as good a sale or given such universal satisfaction.

General Merchant.

A TIP-LESS STATE.

Wisconsin Will Do Away With Petty Graft by Legislation-Hits the Waiters.

the Waiters.

Wisconsin is a tipless State, or will be when Governor La Follette signs the Stout bill against graft, which has been passed by the Legislature.

Senator Stout had no intention of warring on the tip system when he introduced his bill. His intention was to wipe out the petty grafting which has grown up through small commissions paid to buying agents and employes of corporation in making their purchases. It was with such a view that the bill was passed by both Houses.

that the bill was passed by both Houses.

It was not until the final vote was being taken in the Assembly that members discovered that if the bill passed it would wipe out the custom of giving tips or place the giver and receiver in danger of fine or imprisonment.

An attempt was made to have the bil laid over for a week for amendment, but the Assembly, by a large majority, refused to do this, taking the ground that doing away with tips would be a benefit rather than otherwise. The bill, which is very drastic, is as follows:

is as follows:

Whoever corruptly gives, offers or promises to an agent, employe or servant any gift or gratuity whatever, with intent to influence his action in relation to his principal's, employer's or master's business, or an agent, employe or servant who corruptly requests or accent a gift or gratuity and accent a gift or gratuity and accent a gift or gratuity and g ploye or servant who corruptly requests or accept a gift or gratuity or a promise to make a gift or to do an act beneficial to himself, under an agreement or with an understanding that he shall act in any particular manner in relation to his principal's, employer's or master's business, or an agent, employe or servant who, being authorized to procure materials, supplies or other articles either by purchase or contract for his principals, employer or master, or to employe service or labor for his principal, employer or master, receives directly or indirectly, for himself or for another, a commission, discount or bonus from the person who makes such sale or contract of furnishes such materials, supplies or other articles, or from a person who other articles, or from a person whe other articles, or from a person who renders such service or labors and any person who gives or offers such an agent, employe or servant such commission, discount or bonus, shall be punished by a fine of not less than than \$10 nor more than \$500, or by such fine and by imprisonment for not more than one year.

Wisconsin thus has the honor of leading in the war against petty graft for

ing in the war against petty graft, for the law, if properly enforced, will make this sort of robbery a thing of the

The Most Costly Perfume.

Of all floral essences the most fam-ous is the attar of roses, most of which comes from the Province of Kezanlik, in eastern Roumella, where the rose gardens, which lie along the sweet valgardens, which lie along the sweet valley of Maritza, extend for upwards of forty miles. Here nearly 6,000 pounds of the attar is produced every year, to make which 8,000 tons of roses is used, for it takes about 200 pounds of rose leaves to make a single ounce of the attar. The price of the Turkish attar, which is produced by distillation, is from £15 to £20 per pound, but that which comes from the south of France, where only a small quantity is produced, and that accidentally in carrying out another process; is much more costly, ewing to its particularly fine quality. The price of this is as much as £40 to £50 per pound.

Apart from roses, the south of France is the most famous flower-growing district in the world. Around the old-fashioned town of Grasse, which has

fashioned town of Grasse, which has been the centre of the perfume indusbeen the centre of the perfume industry for 200 years and more, there are acres on acres of sky-blue Parma violets, white jasmine, tube-rose, orange blossoms, and red roses. Nearly 4,500,000 pounds of orange blossoms, 4,000,000 pounds of rose leaves, 880,000 pounds, of jasmine and 650,000 pounds of violets are gathered every year at Grasse. At the time of the flower harvest the air is loaded with fragrance. From June to August the fields are full of busy flower pickers.

A party writing to The Post this morning mentions the knife-carrying habit so much in vogue in Cuba, and asks that we continue our campaign against it. We will continue the campaign against this vice until the proper notice has been taken of it, thought this be years from now. All of the lower classes, with hardly an exception, carry murderous knives. If they cannot afford to buy a knife from a store they find a piece of steel and sharpen it into a deadly weapon and carry it wrapped in a piece of paper about their clothes, ready to use on the slightest occasion. The result of this is many murders, which would not occur under other circumstances. If the police were instructed to keep on the watch for knife-carriers it would be but a very short time until the habit would become unpopular. Knives in Cuba.

Tobacco and Government.

Tobacco has a great deal to do with the Governmental affairs of the world. The French Treasury report of the tobacco monopoly for 1904 shows a clear profit of \$71,000,000. The Government receipts from tobacco tax in Great Britain last year were \$60,000,000. In the United States the Government collects \$45,000,000 from tobacco in internal revenue taxes. In Italy tobacco selling is a Government monopoly, and will yield a net profit this year of \$45,000,000, and Austria-Hungary expects to collect about the same amount. Through the clouds of smoke a good many ships of war can be discerned looming up. And through the mighty mist the doctors can discover a good many cases of quickened hearts. Tobacco and Government.

WHEN IN TROUBLE AFTER EATING

Postmaster Jancouski Always Finds Relief in Dodd's Dyspepsia Tab-lets—They Cure as well as Re-lieve.

When you get that uncomfortable feeling after eating don't you just iong for something to give you relief? Mr. R. Jancouski, Postmaster at Fesserton, Ont., will tell you what will just exactly fit your case, Mr. Jancouski says:

"I have given Dodd's Dyspepsia Tablets a fair frid and can with every confidence recommend them. I generally use only one half Tablet after eating and it always gives me relief."

Rut Dodd's Dyspepsie Tablets.

lief,"
But Dodd's Dyspepsia Tablets not only relieve—they cure and cure permanently. Thousands of Canadians have found relief after eating in Dodd's Dyspepsia Tablets and after using them for a time have further discovered that they are no longer necessary—that the stomach has recovered and is able to do its work without assistance.

Montreal's New Bisnop.

Montreal, May 4.—The consecration Montreal, May 4.—The consecration of Mgr. Racicot as coadjutor bishop of the diocese of Montreal took place in St. James' Cathedral yesterday, and was one of the most imposing religious ceremonies held here for some time. The new bishop was consecrated by Archbishop Bruchesi, and was assisted by Archbishop Langevin of St. Boniface, who is his nephew, and Bishop Emard of Valleyfield, a classmate. Mgr. Racicot is the first coadiutor bishop eyer named in this diofutor bishop ever named in this dio

NOT SLEEPING WELL

Without sleep there can be no bod-Without sleep there can be no bodily or mental vigor, consequently sleeplessness is a dangerous condition. Nothing so surely restores sleep as Ferrozone; it's harmless—just a nourishing, strengthening ton-ic. Ferrozone vitalizes every part of the body, makes the nerves hardy, completely rebuilds the system. The cause of sleeplessness is removed—health is restored—you can work, eat, sleep,—feel like new after using Ferrozone. Don't put off—Ferrozone costs 50c. per box at all dealers; get it to-day.

Fatal Level Crossing Again.

Toronto, May 4.—A team of horses driven and owned by a man named White was struck yesterday by the fast express from Hamilton, at Swansea crossing, and instantly killed. The driver was hardly disturbed in his seat, but the horses were said to have been thrown a hundred feet in the air. The reach of the wagon was broken, but no other injury was done. but no other injury was done

KEEP THE BOWELS REGULAR. KEEP THE BOWELS REGULAR.

If your bowels didn't move for a week you would be prostrated. If more than one day goes by you become languid, blood geta bad, breath horribly offensive, you feel sick all over. To remedy this take Dr. Hamilton's Pills, which regulate the bowels and cure constipation. Taken at night you are well by morning. They purify and cleanse the system, prevent headache, biliousness and sick stomach. Prompt and certain are Dr. Hamilton's Pills of Mandrake and Batternat, 25c. per box or five for \$1.00 at all dealers.

Almost every great result has a small beginning.

Men call their own carelessness

and inactivity fate. put the brake on the wagon go-

ing down the hill is a help to the horse, when the wagon is heavily loaded. But what driver would think of applying the brake to a loaded wagon going up hill? If he did, his sensible horses would probably balk. Many a man is in the condition of pulling a load up hill with the brake to ally balk. Many a man is in the condition of pulling a load up hill with the brake set against him. When his stomach is out of order, and the allied organs of digestion and nutrition impaired in their functions, a friction is set up which has to be overcome in addition to the performance of daily duties. A foil stomach makes a foggy brain, and the man with a disordered stomach has often to grope his way through the day's business like a man in a fog. He forgets appointments Problems seem presented to his mind "wrong end to." This condition is entirely remedied by the use of Dr. Pierce's Golden Medical Discovery. It puts the stomach and digestive and nutritive system into a condition of perfect health, and gives a clear brain, a steady hand and a light step for the day's duties. When constipation clogs the channels of the body, Dr. Pierce's Pleasant Pellets will work an effectual cure of that disastrous disease.

The man who has a commendable fad rarely appreciates it.

When the joke is on you it pays to pretend you enjoy it.

The statement was received and

passed.

The Board wished to put a pipe under the C. P. R. tracks on Jeffrey St., but found there would be so much red tape to secure the consent of the railway that they decided to extend a main from Harvey St. A petition for a water main on Park Ave. was received and laid over till the next meeting.

A petition for a short extension on Richmond St. was referred to the Superintendent with power to propeed with the work.

The coal contract for the year was

The coal contract for the year was for as much business as they can secured, and was found duly signed and executed.

Complaints were made of the care-lessness of street sprinklers taking presses. Apply at tops office.

CALM AFTER THE STORM

House of Commons Held Rather Tame Session Thursday.

Mr. McIntyre of Perth Tells House That His Opposition to Amendment Did Not Make Him Favor Second Reading-But Sir Wilfrid Under stands His Position and So Will

Ottawa, May 5.—After the storm and stress of Wednesday the proceedings of the House of Commons yesterday were peaceful in the extreme. The inevitable reaction was apparent, and the attendance very silm. A number of the Ontario members have left for their house. of the Ontario members have left for their homes. Many left last night for Woodsteck to attend the funeral of the late Mr. Sutherland, and the faithful few that took up the financial clauses of the autonomy bill in committee were not at all disposed to be argumentative. A magnificent wreath was placed on the desk of the deceased Minister of Public Works.

The member for South Perth, Mr. McIntyre, who tried so unsuccessfully to straddle the educational fence, and vote against the amendment and the bill raised an interesting point of privilege. He complained that as the second reading was carried on the

privilege. He complained that as the second reading was carried on the same division reversed, he was placed in the wrong position of having voted, for the bill. He did not like it at all. In fact, he stated so plainly. "Here I have been speaking one way and apparently voting another," he commented sadly. "I don't want my constitueints to think I was guilty of that."

Sir Wilfrid pointed out to his Liberal.

Sir Wilfrid pointed out to his Liberal

Sir Wilfrid pointed out to his Liberal ranker that no one having objected to the main motion being carried on the division reversed, it went that way on record. "I think every one understood the position of the member for South Perth," he added smilingly.

Mr. Borden: "If hon, gentleman had risen and demanded a vete, it would have been necessary." He added that the practice of reversing the division without taking a new vote was adopted for the convenience of the Heuse.

Mr. Ingram protested against the omission in votes, and proceedings of the House, which only recorded the division on the amendment. In his opinion the names should have been published on the second reading, substituting "yeas" for "nays," which was the usual practice. This would place on record those who opposed or supported the bill.

Mr. Fielding. "If that were done, Mr. McIntyre would be placed in a false position."

"Haven't the other 199 members who voted any rights?" retorted Mr. In-

false position."
"Haven't the other 199 members who
voted any rights?" retorted Mr. Ingram. "Ne," added Mr. Bennett. "Only

minorities have rights." This caused a laugh and Mr. McIntyre was left to think of the faise position in which he stood, brought about by his own excessive smariness.

The House then went into committee of the whole on the financial clauses.

PUBLIC HOUSE TRUST. Hon. Mr. Beique Brings Up Seme Tem-perance Legislation.

Hon. Mr. Beique Brings Up Seme Temperance Legislation.

Ottawa, May 5.—In the Senate yesterday Hon. Mr. Beique said he desired to draw attention to another disease, a social disease, attacking the comfort of families and preventing progress. He mamed it imtemperance. He moved, in connection with the drink question, that in the opinion of the Senate, the British Gothenburg experiments and the establishment of public heuse trusts.—Ingland have materially advyed the solution of the temperance question, and of the social reform problem, and that the time has arrived when like experiments should be made and like public house trusts should be established in Canada. After several Senators had expressed views on the subject the debate was adjourned until Wednesday next.

The bill respecting the Canada Atlantic Railway Co., from the Commons, was read the first and second times.

TO ATTEND FUNERA Ottawa Party of Fifty Will Include Sir Wilfrid Laurier.

Wilfrid Laurier.

Ottawa, May 5.—For the Ministers and members who wish to attend the funeral of Hon. James Sutherland, two private cars and two Pullmans will be attached to a regular train leaving here at 11 o'clock to-night for Teronto. From Smith's Falls the train will run in two sections.

Among those who go from here to the funeral at Woodstock will be Sir Wilfrid Laurier, Hon. William Paterson, Hon. Charles Hyman, Hon. Clifford Sifton, W. Calvert, chief Liberal whip, and a large number of Liberal members.

members.

The party will return by regular trains, and is expected to number in the neighborhood of 56.

MURDER WILL OUT.

Galician Missing Year, Found UnderStones in River.

Calgary, N. W. T., May 5.—The dead
body of a Galician named Sadouvery,
who disappeared mysteriously last
September, was found in Bow River,
and every indication points to his murder, which has always been suspected.
He had \$130 on him when last seen
alive and a fellow countryman named
Rusuak is suspected of the crime, and
has always been under surveillance.
Sadouvery's head had been split open
and his body concealed under the
stones in the river.

Lost With Ali on Board.

Newark, R. I., May 5.—The New London tug Gertrude put into Newport harbor yesterday and reported the loss of the barge Moonbeam off Point Judith Wednesday night, with all on board, including the captain, engineer, steward and two children of the captain.

Gould Won't Sell Liquor.
Pittsburg, May 5.—An order was received at the Wabash office here yesterday that there must be no liquors sold in the new Wabash station here.

DAMAGE BY FIRE

One of the oldest landmarks of night about half past nine cclock, when the old Thompson homestead on Joseph street was burned to the ground. It is supposed that the building

on Joseph street was burned to the ground.

It is supposed that the building was set on fire by some boys, but as the building was practically worthless, there is no loss. The flames seemed to start from the ground and worked up to the roof. The whole roof was soon on fire and although the firemen arrived promptly they could not save the doomed building. The old house is situated just at the rear of the present Thompson wagon shop and it looked for a time as if the shop would go too, but owing to the shop was saved.

splendid efforts of the firemen the shop was saved.

The fire was first noticed by Geo. Holmes, son of fireman Alex. Holmes, who pulled the alarm from box 16, corner of Head and Baldoon streets. The firemen made a record run, and one of the meanagers of the show which played in the Opera House last night said it was the fastest run he ever saw.

which played in the Opera House last night said it was the fastest run he ever saw.

The house was built by Mr. Thompson's father many years ago and was first used as a residence. Later on when Mr. Thompson built his present wagon shop it was used as a blacksmith shop, and recently it has been used for storing useless truck. About twenty minutes after ten o'clock last evening a couple of fires were seen in Harwich by the firemen in the fire hall yower. They were in the direction of Blenheim and happened during the heavy rainstorm. It is supposed they were barns struck by lightning. From the fire hall they looked like big fires.
