Start Hens Laying.

The frost binds the earth, and the air cuts sharply; the hens feel the effects of the cold. They molted long ago, and have fully grown their new coats of feathers. They look well with their fresh plumage and bright red combs. Their appetites are good, but they do not lay. Put over the fire a frying pan and heat some fat, either lard or tallow. Into the hot fat pour good, sound, plump oats, in quantity sufficient for the number of hens to be fed. Cook the oats thoroughly. When they are done, remove the frying pan from the fire, and allow the oats to cool. Feed them while warm, but not while hot. Do this for the morning meal. For the mid-day meal give the hens some green food, such as beets, carrots, cabbages or the like, as much as they will eat up in an

hour or so. The cabbage may be suspended from a string, and the roots cut in two. At night give corn, whole or cracked, which has been warmed through in the oven. This like the fried oats, should be fed warm, but not hot. Throughout the day give plenty of water from which the chill has been removed, renewing the supply as may be necessary. It will not be many days, after this method of feeding has been employed, before the hens will go singing about their task of producing eggs. The combination of elements in the oats, reinforced by the fats in the lard or tallow, seems to be just what is needed to start the egg-producing organs into action.

Backbiting.

You tell me, friend, that Mr. Wax

abuses folks behind their backs. I surely do agree with you that such a trick will never do; but Mr. Wax is out of town, and you, who roast him up and down, are guilty of the meanness that you say he keeps beneath his hat. I think it is a vicious plan to score and vilify a man as you are doing here today—and Mr. Wax so far away! I think it best to try to find the goodness in a neighbor's mind, to note the virtues of his heart, and not be tearing him apart, and gloating o'er his little sins with flendish and exultant grins. I hold it wise to seek the best that lies in every human breast, and when that habit's gained, in time, all human nature seems sublime. To look for blemishes and faults in those who on life's highway waltz, to always speak the carping word is foolish, wicked, and absurd. The man who does it narrow grows; he fills his sunny world with foes; he

like the digger in a mine who overlooks the ores that shine, the gems that might be all his own, to gather quartz and worthless stone.—WALT MASON.

Short Sermons.

One true man in a false faith is better than a score of false men in any true faith.

There's a much ignored difference between beating our drums and beating the devil.

Some men measure their truthfulness by their dexterity in juggling with the truth.

Some people who think they are grounded on the faith are only stranded on its shoals.

No man ever paid too little for a selfish indulgence or too much for the joy

of sacrifice.

Some are so anxious about their endings they never get around to making a beginning.

Some men will not be content with their polish until they have ground all principle away.

It's a common delusion that we are overcoming our own sins by advertising those of others.

Hicks' Weather Forecasts.

For FEBRUARY 1911.

A reactionary storm period is central on the 2nd and 3rd, blending with the Mercury period which is central on January 31st and extending up to February 10th. Falling barometer, rising temperature and return of rain, sleet and snow may be expected on and touching the 2nd and 3rd. The Moon being on the celestial equator on the 3rd, suggests electrical storms, especially southward, on and about that date, to be quickly followed by sleet, freeze and blizzard.

The seismic period, central on January 30th, extends at least three days into February. The quadrature of Jupiter with Earth and Sun on the 3rd will intensify this seismic period. Note current reports of earthquakes from about January 28th to February 3rd. A cold wave will dominate most parts of the country from the 4th to the 7th.

A Regular Storm Period, blending with the Mercury disturbance, and the beginning of the Mars period, covers the 6th to the 10th. Western sections will show rising temperature, falling barometer and threatening storms, on or before the 7th, and during the 8th, 9th and 10th, these conditions will grow into active storms of rain, turning to sleet and snow, as they pass progressively from west to east. Change to fair and very cold weather will follow promptly in the rear of these storms, being pushed eastward and south by an energetic, high barometer.

A reactionary storm period recurs from the 13th to 16th, beginning with full Moon on the 13th, and ending with Moon's passage of the celestial equator on the 16th, bringing storms of tropical nature, after several days of threatening weather, all ending in violent change to colder weather.

A Regular Storm Period is indicated from the 17th to the 21st. The reactionary period just preceding this regular period will leave little or no time between the two for fair, open weather, so that by the 18th falling barometer and the oncoming of rain and snowstorms in the West will be in progress. This period will be well into the Mars period, blending also with the Venus equinox, and the Vernal equinox of the Earth. The Mars influence will be dominant at this time, and the character of storms and weather prevailing at this period may be regarded as indicating the kind of storms and weather to be expected, generally through the month of March. We figure that the weather will be rough and wintry, continuing after that manner well through the month of March. If, on the other hand, the general weather and storm conditions should prove to be mild and moderate at this time, look for much the same conditions until the end of the Mars influence, late in March. From the 11th to the 16th, we should have stated, is another marked seismic period. Behold! general rain and snow storms, which will probably pass eastwardly over the country about 19th, 20th and 21st, look for rapid rise of the barometer, attended by a wicked cold wave.

A Reactionary storm period, central on the 24th, 25th and 26th will bring return to rising temperature, falling barometer, cloudiness, rain and snow. The Moon is at greatest declination south at this period, calling for northerly winds and bleak, winter weather. Any storm period in the last half of February may bring dangerous tropical storms in the south, in which event counter boreal storms from the northwest will prevail over interior parts of the country. A seismic period, central on the 28th, covers the 26th to March 5th.

Died of Burns, Alone in House.

Listowel, Ont., Jan 29.—Mrs. Martha Aikens, a widow, about sixty years of age, a life-long resident of Listowel, was yesterday found dead from the effects of burns in her home, where she had lived alone for several years. The neighbors, not seeing her around as usual, and no smoke coming from the chimney, suspected that something might be wrong, and, finding all the doors locked, forced them open.

The body was lying partly on the bed, terribly burnt, and there was a proportion of her clothing on the floor partly burned.

Dr. Dingman and Dr. Philip, the coroner, decided that death was caused by the burns and that she had been dead, from twenty-four to thirty-six hours. Death, they said, was evidently accidental.

Steer Causes Excitement.

A steer which was being driven to Reichenbach's slaughter house on Thursday suddenly became infuriated, and charging madly on the street caused no little excitement in town. As the animal had an iron on its nose with a long rope attached to either side of it, the catching of it looked so easy to the innocents that not a few of them grabbed at the bait. Among the number misled was Mr. Walker C. P. R. operator, who on seeing the animal advancing towards him immediately tried the rope act. By doing so he got the attention of the bovine riveted on him and a hot chase took place for the C. P. R. bridge, which Walker was fortunate enough to reach first. The bridge being a tressie one the animal could not travel on it, hence discontinued the pursuit much to the relief of the pursued. Others who hadn't the light of experience to guide them fell into the trap, and wherever a hand reached out for the rope a chase for the tail timbers began. After acting riotously on the streets for several hours, the steer, like the prodigal son, made for home, but got tangled in the rope on Shaw's hill, where it was finally captured and later despatched.—Bruce Times.

Drowning at Shallow Lake

A sad fatality happened at Shallow Lake Tuesday week, when the eight-year-old son of Mr. and Mrs. William Bailey, of that village, lost his life by drowning. In company with another little fellow of about the same age he was coasting on the hill behind the post office and onto the ice-covered stream. After enjoying their sport till about dusk they were about to go home, when the ice broke beneath their sled, throwing them into the water. The other little fellow managed to scramble out, and ran home, wet to the waist and so frightened that he did not say a word about young Bailey. It was some time later when Mrs. Bailey became alarmed at her son's continued absence, and began to make enquiries concerning him. She learned at last that he had been coasting on the creek, and a visit to the stream revealed the awful truth. The hole in the ice, the floating handsleigh, and the marks around the hole where the poor child had struggled to get out, showed all too plainly what had happened. Search was made for the body which was recovered about 10 o'clock. What makes the affair more sad is the fact that Mr. Bailey who had been at Calgary for some time, had left for home just a day or two previous. It was sad home-coming for him.

Collard vs Brown

A horse case always attracts a crowd and though this was the only case in the Tara court last week the court room was crowded to hear it. The facts were that while George Collard was away in the West the defendant came to his place with his brother and made a horse trade with the two sons at home. A mare was exchanged for a general purpose horse and a difference of \$35 paid. The chestnut mare was a driver valued at \$200. The plaintiff's witnesses swore that the mare had been warranted sound and that after the trade her right eye seemed to be effected. They took her to one V. S. and he declared the eye all right. Later on they took her to Dr. Thomas of Tara and he diagnosed it as a case of Periodic Ophthalmia. It would ultimately end in blindness. The defendant and his witnesses denied the warranty and endeavored to show that the defendant had offered for the mare running up to nearly \$200. Dr. Thomas gave expert evidence and swore that the disease must have existed prior to the trade. There was evidence that the defendant had consulted Dr. Grant of Paisley in March and June before the trade. The judge found in favor of the plaintiff and gave judgment for \$60 damages and costs.

FOR SALE.

John Diebel offers for sale on very reasonable terms, his property on Absalom Street, east, in the village of Mildmay. There is one-third of an acre of land, on which is situated a comfortable frame house, 18 x 24, Kitchen 18 x 24, and an addition 14 x 18. Abundance of hard and soft water. Also a pump factory, equipped with boiler and 5 horse power engine. Property is in good shape and can be bought on easy terms. JOHN DIEBEL, Mildmay.

Will Be Great City.

The story of Winnipeg is one of the most marvellous and impressive records of growth on the continent. Thirty-five years ago Winnipeg's population was less than 1,000, and the school attendance was only 35 pupils; it was but a post of the Hudson's Bay Company, without churches, streets or railroads, and but a few years previously the Indians chased herds of Buffalo across the prairie where the city now stands. It is now the railroad and business centre of the Canadian West. Twenty-two railway tracks radiate from it, and the C. P. R. yard there, with its 120 miles of sidings, is the largest in the world controlled by a single corporation. Winnipeg is the chief central point of the Canadian Northern and Grand Trunk Pacific railway systems—these roads having just built a Union Station at a cost of \$1,500,000. Three thousand six hundred railway employees reside in the city. The streets of the city are generally wide, the principal avenues 132 feet. 120 miles of streets are paved with asphalt, block and macadam. The area of 13,990 acres has been covered by 185 miles of sewers, water mains have been laid down since the city's incorporation 36 years ago.

Idle Money

If you have a few hundred of a few thousand dollars that is idle, you can put it to work earning you good interest by placing a Money to Loan Ad. in our Classified Want Columns. People with gilt-edge collateral often require ready cash and will pay good interest for it. Put your money to work.

Why He Quit Editing

"You say you were once the editor of a newspaper?"
"Yes, lady, and it was a very bright little sheet, if I do say it."
"How does it happen then that you are forced to ask at back doors for meals?"
"It is merely a case of the irony of fate. I had a printer who was near-sighted, and one afternoon when he had up the paper he got a wedding notice and a murder trial mixed so the that after describing costume of the bride it said the condemned man 'almost collapsed when sentence was pronounced.'"

Ward—Pennock

A very pretty house wedding took place at the home of Mr. and Mrs. Wm Ellis, Clifford. On Wednesday morning January 18th, when the latter's sister, Miss Alice Pennock, was united in marriage to Mr. Leo S. Ward of Toronto. Rev. J. A. Evans of Drew officiating. The bride who was unattended was gowned in a very pretty white dress of figured silk mull over white silk and trimmed with braided net and lace applique and carried shower bouquet of white roses and maiden hair fern, was given away by her father. The wedding march was played by Miss Edna Ellis. After the ceremony and congratulations the wedding break-fast followed, tables being prettily decorated with white roses and ferns. The bride was the recipient of many handsome gifts. The groom's gift to the bride was a beautiful set of black Persian lamb furs and to Miss Ellis a pretty pearl brooch. Mr. and Mrs. Ward left on the afternoon train for their new home in Toronto; the bride going away in a smartly tailored suit of brown cloth with hat to match. The newly married couple left amid showers of confetti and followed by the hearty good wishes of their many friends.

Mrs. Malaprop.

On a busy day a woman walked into the office of the court room at Atlanta, Ga., and addressing Judge Blank, said:
"Are you the reprobate Judge?"
"I am the probate judge."
"That is what I was saying," she said, "and I have come to you because I am in trouble. My husband was studying to be a minister at a college seminary, and he died detested and left three little infants, and I have come to be appointed their executioner."

Items of Interest.

Damp shoes or boots can be given a good polish in a few minutes if a drop or two of paraffine oil is added to the blacking. This also prevents the leather from cracking.

Here's a warning now! A citizen of Port Perry died very suddenly while shovelling snow. If some of our citizens do not shake off this mortal coil until it results from over-exertion shovelling snow from the sidewalks in front of their dwellings, they'll live a long time yet.

Last week partridges were seen feeding on apple buds in an orchard in East Wawanosh. One of them came to its death by flying against a wire fence, breaking its breast bone.

Brantford hotelmen have banded together to prevent the sale of liquor to minors, and to prosecute under-age persons who try to buy the stuff.

A correspondent of the Stratford Herald states that he has pure bred White Wyandotte hens that laid 200 eggs each during 1910, and at 35c a dozen, each hen's product was worth \$6.41.

Sheldon Winners may Disgorge

The few Sheldon winners in Walkerton who drew more of the filthy than they invested with the blindpool artist, may be compelled to disgorge if the curators of the Sheldon estate are successful in their action against S C Matthews, who is stated to have been a large winner in the blind pool. The suit is to recover \$7,000 "profits" which Mr. Matthews is alleged to have withdrawn. As were no profits, it is argued that this \$7,000 came out of the hard-earned earnings of other, and therefore that this sum and all other sums obtained over and above the amounts actually put into Sheldon's care belong to the estate. If the curators succeed in winning this case, other suits will be immediately instituted, and it is estimated that in this manner some \$300,000 out of the half or three-quarters of a million "profits" withdrawn can be added to the available assets of the estate.

NERVOUS DEBILITY

OUR NEW METHOD TREATMENT will cure you and make a man of you. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers heal up; the nerves become strong as steel, so that nervousness, heartfulness and despondency disappear, the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and mental systems are invigorated; all drains cease—no more vital waste from the system. You feel yourself a man and know marriage cannot be a failure. Don't let quacks and fakirs rob you of your hard earned dollars.

NO NAMES USED WITHOUT WRITTEN CONSENT
THREATENED WITH PARALYSIS
Peter E. Summers relates his experience: "I was troubled with Nervous Debility for many years. I lay in bed, unable to work or rest. I imagined everybody who looked at me guessed my secret. Imaginative dreams at night, weakened me—my back ached, had pains in the back of my head, hands and feet were cold, tired in the morning, poor appetite, loose, memory poor, etc. Numbness in the fingers set in and the doctor told me the feared paralysis. I took all kinds of medicines and tried many first-class physicians, wore an electric belt for three months, but received little benefit. I was induced to consult Dr. Kennedy & Kennedy, though I had lost all faith in doctors. Like a drowning man I commenced the New Method Treatment and it saved my life. The improvement was like magic—I could feel the vigor going through the nerves. I was cured mentally and physically. I have sent them many patients and continue to do so."

CURES GUARANTEED OR NO PAY
We treat and cure VARICOSE VEINS, NERVOUS DEBILITY, BLOOD AND URINARY COMPLAINTS, KIDNEY AND BLADDER DISEASES and all Diseases peculiar to Men.

UNQUENCHABLE FIRE.

Or, The Tragedy of the Wild.

CHAPTER III.—(Cont'd)

And so the days wore on; a fresh snow was added to their daily toil. Each morning Ralph would set out with a feeling of a possible something happening. And that something was a pleasurable anticipation that his mind succumbed to the influence of the excitement of his craft. They were started and rushed through the forest. Ralph would pause ere he used his rifle to assure himself that it was not a woman, garbed in the parti-colored blanket of the Montefoot Indians, and with a face radiant as an angel's. His slow-moving imagination was deeply stirred. From the beginning Nature has spoken in no uncertain language. "Who shall not live alone," she said. Victor Gagnon had roused the two simple creatures. There was a woman in the world other than the mother they had known, and they began to wonder why the mountains should be peopled only by the forest beasts and solitary man. As February came the time dragged more heavily than these men had ever known it to drag before. They no longer sat and talked of the White Squaw, and speculated as to her identity, and the phenomenon of her birth, and her mission with regard to her tribe. Somehow the outspoken enthusiasm of Nick had become silent. And Ralph, the slow wit, needed no longer the encouragement of his younger brother to urge him to think of the strange creature. Each had taken the subject to himself, and nursed and fostered it in his own way. The time was approaching for their visit to Gagnon's store. This was the reason of the dragging days. Both men were eager for the visit, and the cause of their eagerness was not far to seek. They wished to see the halfbreed and feed their passion on fresh words of the lovely creature who had so strangely come into their lives. They went about their duties as men who live in methodical routine in which talk is a luxury. When night closed in Nick saw to the dogs. The great huskies obeyed only one master, who fed them, who cared for them, who flogged them on the trail with club and whip; and that was Nick. Ralph they knew not. He cooked. He was the domestic of the abode; and as just as it should be, for he was of a slow nature which could deal with the small details of such work. Nick was too large and heavy in his mode of life to season a stew. But in the trapper's craft it is probable that he was the better man. So the brothers' nights were passed in long, Indian-like silence, which ended in sleep. Tobacco scented the atmosphere of the hut with a heaviness that was depressing. Each man sat upon his blankets alternating between his pannikin of coffee and his pipe, with eyes lowered in deep thought or turned upon the glowing stove in earnest, unseeing contemplation. The night before the appointed day for starting came round. Tomorrow they would be swinging along over the snowy earth with their dogs hauling their laden sled. The morrow would see them on their way to Little Choyeuse Creek, on the bank of which stood Victor Gagnon's store. There was an atmosphere of suppressed excitement in the doings of that night. There was much to be done and the unusual activity allowed a bustle in so quiet an abode. Outside the door the sled stood piled with the furs which represented their winter's catch. The dog harness was spread out, and all was in readiness. Inside the hut the two men were packing away the stuff they must leave behind. Although there was no fear of their home being invaded, it was their custom to take certain precautions. Besides, there were all their savings in that hut, to lose which would mean to lose the fruits of their life's labors. Nick had just moved a chest from the depths of the patchwork cupboards in which they kept their food. It was a small receptacle hewn out of a solid pine-log. The lid was attached with heavy rawhide hinges, and was secured by an iron hasp held by a clumsy-looking padlock. He set it down upon the blankets. "What'll we put this?" he asked abruptly. Ralph looked at it with thoughtful eyes. "Considerin'," he ob-

served. And he leant himself against a heavy table which stood by the wall. "We ain't opened it since last fall," said Nick presently, after a long and steady survey of the object of their solicitude. "No." "There's a deal in it." Ralph groped at the neck of his shirt. Nick watched his brother's movements. "Maybe we'll figure it up again." Ralph fell in with his brother's suggestion, and drew out the key which was secured round his neck. He unlocked the rusty padlock and threw open the lid. The chest contained six small bags filled with bursting point, and securely tied with raw-hide; one bag, half full and open; and a thick packet of Bank of Montreal bills. Nick knelt down and took out the bills, and set them on one side. "There's fi' thousand dollars ther'," he said. "I 'lows they've been reckoned careful." Then he picked up one of the bags and held it up for his brother's inspection. "We tied them seven bags up all weighin' equal, but we ain't jest sure how much dust they hold. Seven," he went on reflectively; "ther's on'y six an' a haf now, since them woodbugs got at 'em. 'fore we made this chest. I 'lows Victor's 'cute to locate the dust in them furs. It wa'n't a good lay-out wrappin' the bags in black fox pelts. Howsum, I'd like to know the value o' them bags. Weighs nice on to three poun', I'm guessin'." Ralph took the bag and weighed it in his hand. "More," he said. "There's fi' poun' o' weight ther'." "Guess them bags together means fifteen to twenty thousan' dollars, sure," said Nick, his eyes shining at the thought. "I don't rightly know," said Ralph. "It's a goodish wad, I 'lows." Nick returned the store to the chest, which Ralph relocked. "Wher?" asked Nick, glancing round the hut in search of a secure hiding place. "We'll dig a hole in the floor under my blankets," said Ralph after a pause. "Maybe it'll be to-table safe ther'." And for greater security the chest was so disposed. The work was quickly done, and the clay floor, with the aid of water, was smeared into its usual smooth appearance again. Then the brothers sought their rest. At daybreak came the start. Nick harnessed the dogs, five great huskies who lived in the shelter of a rough shed outside the hut when it stormed, and curled themselves up in the snow, or prowled, baying the moon, when the night was fine. Fierce-looking brutes these, with their long keen muzzles, their high shoulders and deep chests, their drooping quarters which were massed with muscle right down to the higher sinews of their great feet. Their ferocity was chiefly animal antagonism for their kind; with Nick they were easy enough to handle, for all had been well broken beneath the heavy lash which the man knew better than to spare. While the dogs were being hitched into their places Ralph secured the door of the dugout. There were no half measures here. The door was nailed up securely, and a barrier of logs set before it. Then, when all was ready, the men took their poles and Nick broke out the frost-bound runners of the sled. At the magic word "Mush!" the dogs sprang at their breast-draws, and the sled glided away down the slope with Nick running beside it, and Ralph following close behind. Down they dropped into the depths of the silent valley, Nick guiding his dogs by word of mouth alone. The lead dog, an especially vile-tempered husky, needed nothing but the oft-repeated "Gee" and "Haw" where no packed path was, and when anything approaching a trail was struck Nick's commands were silent. These creatures of the Wild knew their work, loved it, lived for it, as all who have seen them laboring over snow and ice must understand. By the route they must take it was one hundred miles to Little Choyeuse Creek. One hundred miles of virgin snow, soft to the feet of the laboring dogs, giving them no foothold but the sheer anchorage of half-buried legs. It was a temper-trying journey for man and beast. The dogs snapped at each other's heels, but the men remained silent, nuzzing their own thoughts and toiling amidst the pleasure of anticipation.

STRANGE RUNS OF LUCK

ONE OF THE LATEST "WINS" AT MONTE CARLO.

Mr. W. Darabrough, an Englishman, Said to Have Made \$320,000 in a Month.

Now and again one hears authentic instances of large sums having been won at the gaming tables at Monte Carlo.

One of the most fortunate players at Monte Carlo for a considerable time past has been Mr. W. Darabrough, whose exploits figured in the newspapers a few weeks ago.

A FORTUNE IN A MONTH.

According to one of the London dailies, he left with \$320,000 in his pockets, as the result of a month's stay and play. But this did not represent all Mr. Darabrough's winnings.

To go a little into details, on the opening day of his play he staked \$6,000, and won all along the line. Emboldened by this success, he continued playing, winning again and again with marvellous luck.

At one period his credit balance amounted to no less than \$465,000, but from this point Dame Fortune ceased to smile upon him. He steadily lost from \$60,000 to \$80,000 per day, until, recognizing that luck had turned against him, he had sufficient strength of mind to turn his back on the tables and strike for home with the very substantial winnings that still remained.

On another occasion a certain well-known member of the London Stock Exchange was said to have walked off from Monte Carlo with little short of \$200,000. This remarkable performance occasioned no small amount of excitement in the rooms, as such an unusual incident invariably does.

Bent on embarking in more or less of a "plunge," he went from one table to another, placing the maximum on the same number. Marvellous to relate, at each table this number came up.

MAN WHO BROKE THE BANK.

Recognizing that this might be his lucky day, the fortunate player wended his way to the gaming room and put the maximum on three of the tables there. To his amazement he found that at each he had selected the right color.

According to one of the head croupiers, this was the worst day that the rooms had had for some time. He gave it as his opinion, too, that what the London stockbroker had netted by his spirited play was little less than the amount above mentioned.

One of the most successful players at the Monte Carlo tables was Wells, who, according to the once popular music-hall song, "broke the bank" there. He was at the zenith of his fame about twenty years ago, when his doings—and winnings—were widely talked about and envied.

In ten days he was said to have made upwards of \$200,000 at the tables after starting with so modest a capital as \$2,000. It must not be forgotten, however, that Wells denied this at his trial, stating that all he made was \$35,000 at three or four consecutive sittings. Even then he claimed to have in the end run out a loser.

The reader can take his choice of the two statements; but amongst frequenters of the rooms at Monte Carlo it is generally considered impossible to amass large winnings without risking large stakes. Even then the chances are a thousand to one in favor of the bank.

Yet there undoubtedly are occasionally wins running into four or five figures.

RAPID RAILROADING.

In a review of recent progress on British railroads, presented before the British Association, Prof. W. E. Dalby calls attention to the remarkable results achieved with automatic power signaling on the underground lines of London. At the Earl's Court Junction box 40 trains per hour can be passed each way, making 80 trains per hour handled by a single signalman. Facing the signalman is a window containing 15 small frames. A click in the box announces the approach of a train, and simultaneously a tablet appears in one of the frames, showing by code the destination of the train. The signalman presses a plug, and a similar tablet appears in the next box on the proper line. As the train passes, the signalman presses another plug, and the warning tablet disappears.

A traveller for a firm of merchants gives a terrible account of the intense cold in Sweden:—"In Haparanda, the day before I left, I attended a performance at the theatre. It was a tragedy. Everybody wept; but it was so terribly cold that the tears of the spectators in the upper galleries fell like hail-stones among the occupants of the pit."

GLASS VS. GRANITE.

Has Resistance of 1,800 Tons Per Square Foot.

Glass put to the crushing test is harder than granite. It has a resistance of 1,800 tons per square foot, while that of granite is 750 tons, limestone 625 tons, brickwork 60 tons, and concrete 97 tons. In view of these figures it is surprising that glass has not before entered into serious competition with the other building materials. Glass bricks are being introduced for a number of purposes, and they are recommended for their strength and hardness of surface, which is a guarantee against chipping and cracking, and entirely sanitary under all conditions. The glass brick consists of a shell with two flat surfaces which form the exposed portions when in place, and after being laid, wet cement is poured into the open ends so the bricks are bound together in a solid mass upon the hardening of the concrete.

Shiloh's Cure
quickly stops coughs, cures colds, heals the throat and lungs. 25 cents.

A MARTYR TO HEADACHES?

NA-DRU-CO HEADACHE WAFERS

MAPLEINE

A glycerine used the same as lemon or vanilla by dissolving granulated sugar in water, and adding Mapleine, a delicate cream gives a syrup better than maple. Mapleine is sold by grocers. If not sold for 1 cent, locate and write to: Crescent Mfg. Co., Seattle, Wa.

MILLION ACRE FARMS

WONDERS OF WIRELESS

SIZE OF THE GREAT SHEEP RUNS OF AUSTRALIA.

ITALIAN ASTONISHES FRENCH WAR OFFICE.

Strange Origin and Marvellous Improvement of Australian Merinos.

C. E. W. Bean, of Sydney, has written in an Australian paper of the great sheep industry. His story is in part as follows:—

A century ago when Australia was but a dumping ground for England's scum, a British fleet received from a Spanish fleet a present of merino sheep, at a time when to export merinos from Spain was a criminal offence. The little flock reached Australia, and from it are descended the hundred million merinos which have made Australia great and wealthy, despite her small population.

Vastly improved is the modern merino, for the original of 3-18 pounds to a fleece has been raised to 12 pounds, and there are rams in Australia which shear 40 pounds.

Nowadays the good land near the coast is being given over to agriculture, and the sheep are driven back further into the desert.

A TERRIBLE DESERT

It is at times, where not one green leaf can be seen, when the red dust with which it is covered gets blown away—and only the bare hard bones of the earth are left. Then sheep die by the million for want of the smallest scrap of nourishment, and are sometimes killed by the thousand because it is hopeless to expect to keep them alive.

Then comes the rain, and as if by a magic miracle the whole land is green again, the flocks increase out of all bounds, and the men who have been nearly ruined, make new fortunes in a few years. That is happening now. From 1896 to 1903 occurred the biggest drought known, and many station-holders lost their all. Since then there has been a steady succession of good seasons and the problem now is what to do with the enormous surplus of old ewes. Such are the vicissitudes of that strange land, the oldest part of the earth's exposed surface.

HUGE, LONELY RUINS.

Some of the great sheep runs cover a million acres, or about 1,500 square miles. Each run is divided into paddocks, which cover all Australia. The average western paddock contains 100 square miles. If one fence is on the horizon behind the other is over the horizon ahead. You could walk till you died in that paddock without seeing a fence. Lost men have before now found the fence and died alongside of it before it led them anywhere.

There may be a hut in each paddock with a boundary rider—sometimes two, living together. Every day except Sunday, the boundary rider is expected to be out in his paddock. About one day in two he may spot something like a line of posts, which is probably a line of sheep in mirage on the horizon. Occasionally he cuts through a wing of them. He sees a man, or gets a mail, perhaps.

ONCE IN THREE WEEKS.

And yet, the boundary men get to like the lonely life.

Then, there is "the boss," the lord of many acres, a man of strong character and a liberal education, living a life not unlike that of an English country gentleman, in his remote home, but carrying on his work with the ability and keenness of a man who has been trained in business.

The third body of men who live by the sheep industry are the shearers, who work through the country from north to south, making plenty of money, and living in a rough way on the fat of the land as they pass from one shed to the other. They are a class unlike any other.

THE POCKET APPARATUS

is a little larger than a pair of field glasses and is operated by attaching its antennae to a post or tree, which, at the height of fifty feet enables communication to be made within a radius of two or three miles. The teleprinter, a local contemporary explains, is a simple little instrument with a keyboard like a typewriter, which can be fixed to any telegraph or telephone installation. This transmits messages which appear on printed slips at the other end, but it has the advantage of being infinitely more simple than anything yet invented, and, besides, can be used with wireless. This should be interesting to railway officials in particular, since such a machine could be put at the disposal of all signalmen, pointmen, station-masters and others, permitting them to communicate quickly and accurately with the head office. It would also be exceedingly useful for small, out-of-the-way Post Offices, since no special training or practice is necessary to operate it.

SIMPLE APPARATUS.

The teleautograph is a most simple apparatus, which can also be affixed to any telephone or telegraph line. By this a signature, a drawing, or a holograph manuscript written with a pencil fixed to a flexible carriage is copied exactly on a machine at the other end. Hence a man in Paris could sign a document in Algiers, or a signature in Algiers could be verified from Paris. As if these were not already sufficient, we are further assured that the greater the distance the better the machine will work, although we have not been told why this should be so. The tracing of one's signature seems to be no more difficult than with a pen, and a pencil repeats it automatically wherever we want it, even should it be at the Antipodes.

PRESERVES SECRECY.

Another invention of the professor is an instrument for preserving the secrecy of wireless messages. As is well known, a message sent out by a wireless station is received by all stations within a certain radius, although it is intended for one of them, because the Hertzian waves sent out affect all receivers alike. This new machine, however, allows each of a large number of stations to have its identification number, and when the Hertzian waves are set going with the transmitter at a certain number, only the station bearing the corresponding number can receive the messages, all the others being cut off by a short circuit arrangement.

Shiloh's Cure
quickly stops coughs, cures colds, heals the throat and lungs. 25 cents.

Sometimes you don't Need Enough.

From the "Grocery" to make a respectable delivery—so you don't order at all.

Don't hesitate to send the smallest order.

The satisfaction derived from small purchases made here, is what has built up this business; we give them such careful attention.

Need any of the Following To-day?

A box of Starch or a package of Blueing; Some Laundry Soap or a Scrubbing Brush; A can of Baking Powder or a bottle of Extract. No matter what it is, if it is in our line, we have it, and will be only too glad to send it to your home.

C. Liesemer & Co.

Eaten By Hogs.

Windsor, Jan. 29.—Twelve hours after he had been missed from home the mutilated body of Mr. James Calder, aged sixty years, a well known farmer of Stuyves, twenty-two miles north of this city, was found lying face downwards in a hog pen. The discovery was made by Mrs. Calder, who had become alarmed at her husband's long absence and started in search of him. The man evidently became unconscious and fell among the swine, who ate his flesh. Mr. Calder had been subject to giddiness, and it is believed he fell into the pen, and was eaten as he lay helpless and unconscious.

John McSorley, a half-witted old man living near Jarvis, was the other day given five years in Kingston penitentiary for grave robbing. Travers the bank manager in full vigor of his faculties who committed the crime of bank robbing rendering hundreds of people penniless and others in straightened circumstances for the rest of their lives. He has been driven insane after being given six years in the same institution. O, Consistency though art a thief but you are not found in the Canadian courts of law!

The announcement has been made that the Duke of Connaught is to be the next Governor General of Canada. This announcement was made some time ago but it was afterwards said that the Duke who is an uncle to the present king would be needed in England to advise his Majesty. The Duke will take up his duties in the Fall.

County Council.

Council met pursuant to statute at the Council Chamber, Walkerton on Tuesday evening, Jan. 24th, 1911.

The election of Warden resulted in Mr. Isaac Shoemaker of Paisley securing the office.

The following Committees were appointed for the year:

Finance—Messrs. Kastner, Douglass, Brill, Schmidt, Mewhinney, Mitchell, W. Hunter, Henderson, Wilkinson, Fisher and Cook.

Road and Bridge—Messrs. McLean, Brown, McCallum, Izzard, Smyth, J. Grant, D. A. McDonald, Falconer, Filsinger, Pheasant, Ewart, Wiles, Gillies, Weir, Jas. Hunter and Rusk.

Petitions and By-laws—Messrs. Cook, Jas. Grant, A. J. McDonald, McKay, Rusk, Gillies and Dobson.

House of Refuge—Messrs. D. A. McDonald, Smyth and Filsinger.

Equalization and Salaries—Messrs. Brill, Jas. Grant, Izzard, Mewhinney, Schmidt, Mitchell, McCallum, Ewart and Kastner.

Property—Messrs. Henderson, Wm. Hunter, Fishery, Izzard, and Pheasant.

Education and Printing—Messrs. Douglas, Wilkinson, J. E. Grant, Brown, Falconer, Jas. Hunter, Weir, and Wiles.

Wardens—Messrs. Dobson, McDonald, A. J., McLean and McKay.

The first named on each Committee to be Chairman thereof.

Grants were made to Agricultural Societies, \$75.00; to Farmers and Women's Institutes, \$25.00; to Rural school libraries, \$5.00; to each public library having over 1500 volumes, \$15.00; and \$35.00 to each library having 1500 volumes or over; \$25. to each of Teachers Institutes; Salvation Army \$25.00; Sick Childrens Hospital, \$10.00; Prisoners Aid Society \$100.00; Childrens Aid Society of County of Bruce \$150.00; the usual grant of 25c per day was made to the 32nd Regt. while at camp and \$50 was granted to the Regimental band.

The usual grant of \$500 was made to the four Northern townships.

A committee was appointed to gather information re Government taking control of long distance telephone lines.

A long discussion took place in regard to the appointment of an agricultural expert in connection with the High Schools, the Government now appointing such an expert. The matter was laid over until June session to allow the members to obtain more information regarding it.

The question of the appointment of an Engineer for the County was again discussed, but no action was taken.

The appointment of a High Constable came up. There were four applications for the position, Messrs. Russel and Briggs of Walkerton, Ward, of Wiarton and J. B. Martin of Ripley. Mr. Ward was appointed.

Reeves of municipalities having county bridges in them were instructed to see that notices were placed on the bridges warning against driving fast over such bridges and instructed to enforce the law against it.

The grant of \$3000 from the Department of Indian affairs in connection with rebuilding Southampton bridge was received.

The allowance for members attending Council was increased from \$3.00 to \$4.00 per day. Most other counties increased their allowance to \$5 but the members thought an increase to \$4 was sufficient. A few small increases were made in salaries of County officials, the most being to Mr. White, keeper of the House of Refuge who received an increase of \$100.

It was decided to have the Council chamber renovated as it was badly in need of being fixed up.

Council adjourned to meet at Port Elgin the second Monday in June at 7.30.

P. A. MALCOMSON,
County Clerk.

Report of S. S. No. 6 Carrick.

Jr. IV—Lizzie Russwurm, Hilda Hill.

Jr. III—Amelia Schickler, Mary Wiseman, Louis Wiseman, Leo Koenig.

No. on roll 40. Average for month 30. Wm. P. McGee, Teacher.

NEUSTADT.

Chas. F. Helwig of Underwood, was in town on business one day last week.

Mrs. James Cochran of Wiarton visited their friends here last week.

Jacob Mauer purchased a carload of horses in this vicinity. From Henry Lanz he purchased a splendid team at a fancy figure.

On account of the soft weather last week, there was nothing doing at the skating rink.

Mr. Louis Kretzer of Alsfeldt sold his splendid driver to Dan Hill for the sum of \$200.

C. W. Helwig and Son have received another carload of corn.

Mr. Arthur Weinert of the Grand Trunk at Listowel has been laid up with the grip for some days at his home here.

Miss Melinda Herr left on Saturday for Wiarton.

R. J. Gebhardt and J. Weinert of Weinert of Walkerton were in town on Sunday.

A number of the members of the Women's Society in Pastor Wittlinger's congregation spent Wednesday afternoon at the residence of Charles Wagner in Carrick.

While Nick Widmeyer was in the act of feeling a tree, he discovered that the contained a quantity of honey, which he gathered and took to the house.

Jacob Stroeder of Litville, N. D., is still with his his brothers here. He likes the outdoor work at this season of the year.

LIVE STOCK MARKETS. TORONTO.

Receipts of live stock were light, only 46 loads being reported by the railways consisting of 665 cattle, 584 hogs, 594 sheep and lambs, 34 calves and 5 horses.

There were few good cattle received on the market to-day, the bulk being common and medium.

Trade was slow at the Union Yards on Monday, and was no better at this market to-day. There were only 665 cattle on sale, a large percentage of which were reported unsold, at the close of the market, drovers preferring to hold them over till Wednesday rather than accept prices offered. The prices bid were good, considering quality, but drovers had paid too high for them in the country.

There was nothing brisk about the trade, and prices were no higher than on Monday. And had there been larger offerings they would have undoubtedly gone lower. There were cattle sold at \$5 75 that cost \$6 00 in the country.

Butchers—Prime picked butchers sold at \$5 75 to \$6, and there were mighty few of them at the latter figures. Loads of good, \$5 50 to \$5 75; medium \$5 25 to \$5 40; common, \$4 90 to \$5 20; cows, \$3 50 to \$4 90, with a very few extra choice at \$5 to \$5 25; bulls \$4 to \$5.

Milkers and Springers—Milkers and springers sold at \$40 to \$70 each, and there was nothing exciting on the cow market either, and drovers need to go easy in buying cows, that is if they don't want to lose money. The proper quotation is \$40 to \$65, as there was only one cow reported at \$70.

Veal Calves—Veal calves sold at steady prices, from \$3 50 to \$8 50 per cwt.

Sheep and Lambs—Wesley Dunn reports prices as follows: Sheep ewes, \$4 to \$4 50; rams, \$3 to \$3 50; lambs, \$6 to \$6 40.

Hogs—With a light run hogs to-day were quoted at \$7 50 for selects fed and watered at the market, and \$7 15 to drovers f.o.b. cars at country points, which means \$7 to the farmer.

Julius Kupferschmidt's stock of dry goods and groceries is beginning to arrive for his store at Decemerton.

The Leading Store

Direct Importations OF New Spring Goods

This week we are opening and passing into stock several large consignments of New Spring Goods from foreign manufacturers. Having bought everything at the lowest possible price, we are prepared to give our patrons the benefit of close buying; therefore if you wish to be careful and economical in your purchases and at the same time select from well chosen lines of the very newest and best Dressgoods and Staple Drygoods, you have only to start at once for our store and both the desirable advantages will be yours without another moment's delay.

Remember we are still slaughtering winter goods regardless of cost.

You cannot invest your money more profitably than to take advantage of our present clearing prices.
