St. John's, Nfld., August 4.—D. B. Green, member for Ferryland, will lead the opposition in the House of Assembly on Monday. The sitting is only expected to last two days.

Lawrencetown.

Dr. Haley has been in town the past week. Masterly Elliott is now able to be around again. Mr. and Mrs. Whitman welcomed a daughter on the 1st.

Mr. C. T. U. meets at Mrs. J. R. Elliott's on Thursday evening. Mr. J. B. LeBlanc, of St. John, was in some great public upheaval, like that which confronted the country to-day, the Republic would either lose its civilization through mob law, or in putting down mob law by the strong arm of power, would lose its liberties...

Our baseball nine are at work and some good records are being made. It is expected that Bridgetown will be called upon to "cross bats" with our nine. The music of the Valley Concert Band is highly appreciated by the residents of our town and vicinity. The operetta should have been given every Friday evening as much enjoyed.

Paradise Gleams. Miss Kinley, of F. E. Island, is visiting at the residence of her mother, Mrs. Wm. B. Bustin, of this town. Most of the farmers are doing their hay. Rain is much needed, the brooks are drying and the earth is parched...

Mr. Owen Chipman, of Berwick, and Miss Annie Shaffer were the guests, last week, of Mr. and Mrs. W. W. Bishop. Two daughters of Mr. Fletcher Longley, of Philadelphia, and a son and daughter of Mr. T. L. Longley, are visiting their grandfather, Mr. Isaac Longley...

Most of our farmers have finished haying. Our Sabbath school anticipates a picnic in the near future. THE FUTURE OF THE UNITED STATES.

Lord Macaulay's Prophecy of the Result of Universal Suffrage. In a remarkable speech in the United States Senate during the recent railway strike, Senator Gordon said he recalled with no little pain and some misgiving, that wonderful prophecy of Lord Macaulay, that in some great public upheaval, like that which confronted the country to-day, the Republic would either lose its civilization through mob law, or in putting down mob law by the strong arm of power, would lose its liberties...

THE TIME WILL COME when New England will be as thickly populated as Old England. Wages will be low, and industry as much with you as with us. You will have your Manchester and Birmingham, and there will be some of our kind. Then your institutions will be fairly brought to a standstill. There will be a great deal of laboring and discontented and inclined to listen with eagerness to the cry of the agitator who tells him that it is a monstrous inequality that one man should have a million times as much as another. There will be plenty of grumbling here, and a little rising; but it will be a little, for here the sufferers are not the rulers.

THE SUPREMACY POWER is in the hands of a class, numerous, indeed, but select; of an educated class which will, in consequence, be to be deeply interested in the security of property and maintenance of the status quo. The operators of the system are firmly restrained. The bad time is not over without robbing the wealthy to relieve the indigent. The spring of national prosperity soon begins to flow again, and the people are contented and all is tranquilly and cheerfulness. I have seen England pass three or four such critical seasons as the one we are now passing. Through such seasons the United States will have to pass. It is not the coal and iron ore in this how will you pass through them? I heartily wish you a good deliverance. But your reason and my wish are as that you will be able to restrain a dissipated and a dissipated majority. For with you the majority is the government, and has the right, who are always minority.

ABOLITION AT ITS MERCY. The day will come when, in the state of New York, a multitude of people, of the color of the skin, will be in the hands of a few white men. They will have had more than half breakfast, and expect to have more than half dinner, and are in a state of indigestion. It is not possible that sort of legislature will be chosen. On one side is a strenuous protesting patriotism, respect for vested rights, strict observance of public faith. On the other is a demagogic rabble, who will not be satisfied with the usual and ordinary measures of the legislature, and will insist on a radical and sweeping reform. The Chicago Ship Railway.

The outlook now is that H. G. C. Ketchum, C. E., has been successful in raising funds sufficient to complete this most stupendous work. The St. John Record in referring to Mr. Ketchum's success in raising the money for the completion of the work, thus speaks of the undertaking: "The railway is 17 miles long and the immense double tracking is all laid. The dock at the Amherst end of the line is well advanced and the massive stone masonry is splendidly constructed. At the Halifax end the dock is further along, but the channel leading into the dock is longer there and considerable dredging had to be done. Intercommunication between the Bay of Fundy and the Gulf of St. Lawrence, by way of the isthmus of Chignecto, has long been a project of the Government. Early in the century the project of digging a canal was talked of and since then \$10,000,000 a year for 20 years has been made on the matter, in 1825, 1830, 1835, 1840, 1872, 1873 and other dates. The idea of a ship railway was originated by Sir James Brunton, the builder of the great St. Paul's railway in India. It remained for a New Brunswicker to put it into practical execution and to erect the first ship railway in the world. Mr. Ketchum was under Sir James Brunton's plan and he talked of it for many years. In 1875 he wrote for the press of St. John a paper in which he set forth his plan for a ship railway for Chignecto and prepared plans and exhibited them. Mr. Ketchum had the sympathies of Sir Charles Tupper. In that year Mr. Ketchum made a survey of the route, and in 1888 he obtained a charter and authority from the Dominion Government. The railway was surveyed and reports have been made on the matter, in 1825, 1830, 1835, 1840, 1872, 1873 and other dates. It remained for a New Brunswicker to put it into practical execution and to erect the first ship railway in the world. Mr. Ketchum was under Sir James Brunton's plan and he talked of it for many years. In 1875 he wrote for the press of St. John a paper in which he set forth his plan for a ship railway for Chignecto and prepared plans and exhibited them. Mr. Ketchum had the sympathies of Sir Charles Tupper. In that year Mr. Ketchum made a survey of the route, and in 1888 he obtained a charter and authority from the Dominion Government. The railway was surveyed and reports have been made on the matter, in 1825, 1830, 1835, 1840, 1872, 1873 and other dates. The idea of a ship railway was originated by Sir James Brunton, the builder of the great St. Paul's railway in India. Miscellaneous.

Rosa Bonheur and Her Lions. The souls of animals have for her no more secrets than they have for a Toussaint or a Cerville. She seems to have something in her clear straightforward look that tames wild beasts.

They took him away to the Jardin des Plantes. He was led out upon a cart by Rosa Bonheur, but, unfortunately, he had been so much excited that he had made so many wonderful studies from him that he was almost unable to get on the cart.

Consumption of Horse Meat in Paris. In the survey of the butcher shops, one duty is to make sure that the horse meat is not adulterated with beef.

Another animal, a lioness, died at the art of the stables of J. in the arms of the artist, her tongue as rough as a file and her paw holding still the hands of her to whom these last carcasses seemed to say, "Do not leave me!"

The service which a Christian church, rightly managed, can do for the community was wonderfully illustrated by the Reggies street Baptist school in Boston which ministered to the needs of the homeless and the wretched since the Tremont street fire.

Learn to be Short. Long vices, long desires, long exhortations, long prayers, and long editorials, seldom profit those who have to do with them.

No eminence has Hood's Sarsaparilla been that many leading citizens from all over the United States furnish testimonials of cures which seem almost miraculous.

A speaker once addressing an audience of boys and girls, told among other things that either started the appetite for stronger drinks.

Dear Sirs.—I was suffering very much from diarrhoea, and one day I was told of a friend told me of Dr. Fowler's Extract of Wild Strawberry, and a few doses completely cured me.

It has been observed that young people engaged in cigarette and tobacco factories suffer from nicotine poisoning.

Sufferers from La Grippe should be treated with Puttner's Emulsion is the best tonic for them.

Every character has an inward spring, let Christ be it. Every action has a key-note, let Christ set it.

Agricultural.

Tuberculosis in Cattle. The reliable remedy has yet been discovered for this disease, and the only way known of freeing a herd of cattle from it is by the prompt destruction of all affected animals.

The New Shortening, instead of lard. And this is in itself a reason why "the looketh well" in another sense, for she eats no lard to cause poor digestion and a worse complexion.
