## Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for scanning. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of scanning are checked below.

Coloured covers /
Couverture de couleur
Covers damaged /
Couverture endommagee
Covers restored and/or laminated /
Couverture restauree et/ou pelliculée

Cover title missing /
Le titre de couverture manque
Coloured maps /
Cartes géographiques en couleur
Coloured ink (i.e. other than blue or black) /
Encre de couleur (i.e. autre que bleue ou noire)
Coloured plates and/or illustrations /
Planches et/ou illustrations en couleur
Bound with other material /
Relié avec d'autres documents
Only edition available /
Seule édition disponible
Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.

Additional comments /
Commentaires supplémentaires:

L'Institut a numérisé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-étre uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la methode normale de numérisation sont indiqués ci-dessous.

Coloured pages / Pages de couleur

Pages damaged / Pages endommagées

Pages restored and/or laminated /
Pages restaurees et/ou pelliculees
Pages discoloured, stained or foxed/
Pages décolorees, tachetées ou piquées
Pages detached / Pages détachees
Showthrough / Transparence
Quality of print varies /
Qualité inégale de l'impression

Includes supplementary materials /
Comprend du matériel supplémentaire

$\square$
Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from scanning / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été numérisées.

Tan Caundian Pacific Railway has been granted bonding privileges by the United States Treasury Department for freight destined for the Canadian seaboard via tho Canadian Short Line through the Stato of Maine. The freight tariff has been issued.

Tauro has formed a Board ${ }^{2}$ of Trade and elected the following officors: President, J. F. Bhanchard; vice-presidente, G. Clish and O. C. Cummings; socretary, G. A. Hall; executive, Messr8. Craig, Bligh, Berrill, Turner, Walker, McMullon, Gunn, Spencer, Ohambers and Black.
applioation has been made for the incorporation of the Owen Sound and Sault Ste. Maric Navigation Company. The amount of the capital stock is placed at $\$ 50,000$. The applicants are: John Harrison, John Oorbet, Robert Corbet, John Simpsou and James Clement Miller, all of Owen Sound.

A soint stock company has been formed at Ealifax to run a large summer hotel at Bedford, some nine miles from the cily at the head of Bedford babin, and at a meeting of the company, L. J. Hesblein, W. N. Silver, W. B. Roynolds, W. B. McSweeney, R. O. Mullin and J. A. Loaman, were elected directors, and Geo. G. Faulknor, secretarytreasurer.
Tue copious rain which fell throughout the North-West, between Winnipeg and Regina, on Dominion Day, will do an incalculable amount of benefit to the crops in that district, which had cscaped the continuous wet weather prevailing further enst. Hay and late crops will accordingly show much better returns than had lately been expocted.

Tur wind and rain storm which passed over a large section of western Ontario on the 1st instant, seems to have beon particularly severe in and uear Hamiltou. Considerable damage was done in that city to telegraph and telephone lines and privato residences. R. M.

MONTREAL．

Wanzer \＆Co．＇s sewing machine factory was damaged by water to the extent of $\$ 1,100$ ．

Ed．Patny，trader，city，has assigned with liabilities slightly ox－ cceding $\$ 1,000$ ．

An exploding steam bleacher in the Lyons paper mill at Clinton， lowa，this week，killed two men and completely wrecked the building． Total loss about $\$ 40,000$ ．

Thes rumble of the railroad trains will shortly bo heard in Jerusalem， a company of English and French capitalists have undertaken to build a railway from Joppa to that city with the intention of extending it to Bethlehem．

As Order－in－Council has been passed placing camwood，when im－ ported，to be used for dying or tanning purposea，i．e．，manufacturing purposes，not further manufucturod than crushed or ground，on the list of articles that may bo imported fiec of customs duty，White ash lumber，sawn but not shaped，planed or otherwise mauufactured，may be imported free of duty until the end of next session of next parlia－ ment．

From Essex Centro we learn that J．H．Lamb，assignce of H．W Denre，has declared a first dividend amounting to 20 per cent．；C．B． Armstrong，assignee of G．Gillies，has declared his last dividend of 5 por cont．，makiug $a$ total of $6 \overline{5}$ ．Mr．Gillies has agnin ombarked in business，having opened out a stock of groceries．A joint stock com－ pany is being formed to bore for oil or gas．The work is to be com－ menced at once．

Artioles for the consolidation of the proposed Denver and State line Railway with the Rio Grande and Westera have been filed．The Lew company proposes to build nearly 2,500 miles of new road through the agricultural region between the Great Salt Lake and the Ariston Lino whicltwill cost about $\$ 90,000,000$ ．The capital is now placed at $\$ 16,000,000$ ．The officers are：President，D．C．Dodge； secretary，W．F．Colton；treasurer，C．W．Drake，of Now York．

One day last week the flage of eight nations flonted over ships of war and mercantile marine in tho hirbor of Halifax，viz：Great Brit－ ain，Germany，France，United Statee，Spain，Norway and Sweden； Portugal，and the Dominion of Canada，and a Dutch frigate and an Austrain man－of－war are both reported on the way to Halifax，so that

When these latter arrive oven Now York could not show a greater variety of national flags than Halifax．

The growing crops as reported from many districts through－ out the Dominion，have suffered to a greator or loss extent by tho severe wind and rain storms during the week；in many places the barley and oats have been levelled to the ground and fears are enter－ tained in some localities of rust in the wheat from the continuous wet weather．Haying has commenced in some districts，but the advent of favorable weather is in most places awnited．

Ar the annual meeting of the Seamane Friend Sosiety of Halifax， it was shown that 2,000 seamen from the mercantile，marine and men－of－war boarded at the Sailors＇Home last year．This society nets af a eailors＇eavinge bank，post office，public library，legal adviser，and in every way attends to the moral and spiritual interests of tho largo number of seamen who make Halifax the centro of their operations． It is an exceedingly useful institution，viewing it from a mercantilo standpoint，and every seaport town in Canada should havo a similar sociely with a well equipped home．

Tre Post Office Department has concluded a convention with the Department of Communications of the Empire of Japan for the ex－ chunge of money orders between tho Dominion and Japan，taking effect on October 1st next．The maximum of orders is to be $\$ 50$ ，the commission to be the same as for all other foreign money orders．Tho amounts of the orders will be expreseed in Canadian currency in both directions，but on account of the frequent fluctuations in the rate of exchange between the two countries，it has boen agreed that all amounts shall be coverted into their equivalonts by the Japaneso official．Tokio，Japan，and Victoria，BC．，will be the exchange offices for the respintive countries：

Judgmest was rendered by Judge Wurtele on Wednesday，in the case of the seizure of the ship＂Ellen R．Read＂by the Canada Sugar Refinery，and Bursley intervenant．Jhe ship carried 2，750 tons of sugar consigned from the Phillipine islande on two bills of lading，one for 2,000 tons for the plaintiffs and the other for the balance in the name of the intervenant．The Canada Sugar Refinery claimed a right to the whole cargo，hence the seizure．Without deciding on the merits of the case as to the claim of the refinery company to the whole cargo， the court decided for the present that the captain should deliver $\mathbf{2 , 5 0 0}$

MONTKRAl, JULY 6, 1889.

## DOMINION DAY.

The general observance of Canada's birthday is full of promise for the future of the Dominion. In every province and among all sects and parties, howevor much they may be divided in opinions or sontiments, the day has been fittingly honored aud has been the occasion for special rejoicings.

The first of July, apart from the event which it was especially chosen to commomorate, was happily chosen for a national day of celebration. The summer season is at its best, and the verdant fields, the forests: mountains, lakes, rivers and streams of Canada are a scene of beauty which cannol bo surpassed anywhere in the world. A day of relaxation at this season, spent in summer fashion, can only have good resulis and must excite the admiration and deepse the love of conatry in the breasts of thousands of our fellowcountrymen In the west, a praiseworthy feature of the holiday armogements was the provision made for addresses in honor of the day and of the country at large. While we do not advocate wild, and far fetched orations the prases of Canada are a fit theme for patriotic effort on these occasions, and suitable speeches, devoid of political bias, are well calculated to keep alive a gemuine national feeling.

The confederation of Canada has been an accomplished fact sivec the first of July, 1867, and as we patise to look back on what has beon achieved since that time we may congratulate ourselves that in spite of numerical weakness our progress in every thing that makes a nation has been rapid and substantial. Ourgreat public works and our private onterprises in manufacture, commerce and aris have not been equalled by any people of the same numbers. Canadian railways, banks and steamship lives have made us known to the outside commercial world for years,

but we have also kept abreast in all other departments of business activity. And what about the newly developed NorthWeet? We will take the testimony of a pominent traveller, who has also visited the United States, on this point. The chairman of the North-Weat Land Compnny, a member of the Royal Crofter Commission, etc., says:-Winnipeg bas altogether recovered its old tone and a substantial and thriving business is heing done. Taking the Cauadian North-West as a whole, the country is superior to that on the other side of the boundary, and nothing has aver been authoritatively stated in England either by tongue or pen, that is not amply borne out by the present coudition of the country. "Canada," says this gentleman, " has the resources of $\Omega$ great nation, and it is questionable if any other country in the world can equal it in agricultural and mineral resources. The climate is well calculated to produce people of the highest physical condition, for since it embraces all the climates of the work, those who are not heallhy in one locality can find another that agrees with them. This is valuable testimony and may surprise some untravelled Canadians who have not formed very exalted ideas of the future of their country.

Twenty-two years have come and gone since Confederation, and looking at the progress mado and the developments possible in the great North-West, Canadians of the new generation have every reason to feel proud of the past and sauguine for the future. A great deal of nousense has been said and written about the country baving attained its majority, as if the life of a nation was measured by years and not by generations. But if Cannda is an infant among the nations, it is a sturdy and a healliy child. As a domestic writer puts it, Canada is a young giant
"Which dreameth of unborn times,
"With manhoods thoughts his mind is braced
"He'l teach the world a lebson yet
"And with the mightiest must be placed."
And again-
"If pure in purpose as he's strong
"Nothing of danger need he fear,
"But better far than base success
"To ride on un untimely bier."
The last lines seem to convey a protest against those who, in every country, scoff at lofty ideas and would sell their birthright for the mere shadowy hope of gain. Fortunately there is a national spirit in spite of the wrangling of loud mouthed agitaturs, who seize upon every pretext to provoke racial and religious strife. "We hear the wrangling," appropriately says the Thoronto Globe, "but what after all does it amount to. Two dogs fighting in the threot make noise enough to excite a considerable village, but the people keep on doing business together notwithstanding a long succession of euch fights. And, in spite of the existence among us of a number of quasi-criminals who constantly watch for and seize every chance to incite English and French Canadians againat one another, they have worked shoulder to shoulder for common objects for a hundred years; they have done wonders together; from the past the future may be reasonably predicted; and the reasonable prediction is that the two peoples will continue to work together, in spite of all family quarrels, till it becomes universally underatood that their reasons for continuing together are so incomparably more important than their reasons for separating that their union cannot be broken hy the efforts of demagogues."

Seusible words these, which commend themselves to all thinking people and all true Canadians. Each race may have its own reasons for standing by the union, aid as our contem-
porary further remarks, English Canadians can justly ask no more from French Canadians than that they shall stand prepared to hazard their lives and their fortunes for the preservation of the union, nor can French Canadians demand more from their English fellow citizens. The French Canadian doubtless values the union because it guarantees him his language, his institutions and his laws, and the Euglish Canadian because it preserves to him the British system of responsible government and Naglish laws and institutions. The union chiefly is a bulwark against the incorporation and assinilation of the English and French Canadian races by the United States, and whilat it does this it preserves to both, rights and privileges which they value more than sordid wealth. The Confederation of Canada has been attacked on all sides, but the fabric rests on a substantial basis and is unshaken, and the prospects are that the common national feeling will grow and strengthen with each succeeding year.

## TEE DU'TY ON LOGS.

The concession made by the Dominion in removing the export duty on logs eleven inches and under, at the but, has given little gatisfaction to American lumbermen and in fact seems to be looked upon as a confession of weakness. The Michigan timber speculatore evidently think that Canadiar forests exist for their sole use and benelit and feel greatly wronged because they have not been allowed to cut them down at pleabure.

Assisted by a few newspapers on this side, anxious to make a point against the present administration the agitation against the duty has been revived in the interast of those mill owners who have invested in Canadian timber limits. 'The pine lumber business is not in any wise aflected by the concession referred to as it would not be a remuerative undertaking to cnt loga in Cunada and tow them to the Michigan mills with none of them exceeding eleven inches in diameter at the butt. In order to pay even a $\mathbb{\$}^{2}$ export duty on logs (the anount levied at the time of the investments in Canadian timber limils by Americau lumbermen) and a $\$ 50$ tow bill, the logs must be of large proportions and fine quality to insure a reliable margin for profit. The sole effect of the change will be to benefit parlies engaged in furvishing piles, and the manulacture of hoops or other products of hardwood timber.
The position is an unfortunate one for those American lumbormen who invested in Canadian timber limits previous to the imposition of the $\$ 3$ export tax on the loge, with the intention of stocking their mills in Michigan and elsewhere. They find themselves with an immense amount of capital locked up and feel that they have got a bitter grievance against Canada. On the other hand it is difficult to see how the government could ignore the important interest threatened with destruction. The question was bound to arise in the natural cause of events sooner or later and no government could stand idly by and witness the destruction of our timber wealth any more than it could allow our waters to be cleared of fish.

As might be expected, threats have been made that the United States will be urged to retaliate upon the sawn timber interests of Canada, and petitions have been presented to Congress urging such action. Whether such extreme measures will be adopted is, of course, doubtful, but the effect is to unsettle the course of trade and cause uneasiness amonget dealers. We notice that the absurd tirades of some of the minor organs of public opinion in Canada have been quoted. One of the Ontario papers published the following:-"And now the latest game is the export duty on saw logs. As a means of revenue, or as a means of keeping labor in our own country the game is unsuccessful, but as a deep-laid scheme to egg on the Americans into retaliating on our sawn lumber, the export duty promises to be successful*** By so doing thay stir up strife, animosity and bitterness against the American people, our own customers, regardless of the moral law.and comity of nations."

This political clap-trap was commented upon as follows by The Timbermen an American publication:-What better argument could be used to prove the iniquitous extortion of the $\$ 3$ export duty on Canadian logs; and what better proof is needed to demonstrate the fear of Canadian lumber manufacturers that retaliation will be resorted to. Or, what betier proof is needed that retaliation will have the desired effect of the revocation of the notorious order in council? And further, what better demonstration can there be that constant agitation is not only excusable but requisite, in order to mould public sentiment up to the standard of demanding and enforcing the righting of any
great wrong? As further proof that the Canadian lumbermen fear retaliation, and that in retaliation lies our hope and certainty of rellef from the iniquitous extortion of the $\$ 3$ export duty on $\log s_{\text {, }}$ it may be noted that the same paper refers to the lettor of U.S. Consul Hotchkiss to Hod. George L. Rives, Assistant Secretary of State at Washington, setting forth the grievances of American lumbermen who invested in Canadian pine previous to the imposition of the $\$ 3$ tax and sajs that Secretary Windom will accept the invitation of the Canadian government to retaliato upon the sawn timber interests of Canada; and further that the injury to these interests is not prospective but present to-day, as the American buyer will only purchase "freight and duty paid," and his excuse is "the uncertainty of the American tarifl. and the result is that "trade is more or less paralyzed."

Whather retaliation will be resorted to, or if resorted to, whether it will have the effect desired by the Michigan lumbermon, is, of conrse, a pare matter of speculation. It seems to be the fashion jush now to speak or "strained relations" and "rotaliation" in discussing any of the coumercio-political questions at isgue between the two conntries. The exercise of common sonse and mutual consideration seoms wanting. An adjustment of real grievances should be possible without proceeding to harsh measures.

## WALL PAPER.

I'here are few branelies of Canadian manufacture which at present labor under more disatvantages than the important industry of manufacturing wallpaper. Since the breaking up of the American manulacturers pool, and the adaption of a policy of oxtormination by the larger makers, American wallpaper hate beon sacrificed in this country at prices from 20 to 25 per cent. under the figure at which they are selling wholesale in the States. In fact wo know of instances where large purchasers of wallpaper in this city have written to their suppliors asking them to invoico their goods at the ordinary price, fearing lest if the real price paid was enterid on the invoice, the Castoms might seize the goods for supposerl undervaluation.

When the American pool was in existence the policy of subsidizing the smadler makers was followed. Now that the pool has been broken up, a policy of extermination has been decided upon. 'I'he larger firms have resolved on freezing out their weakor competitors, no matter how hoavy the immediate loss may be. lines selling in pool days at 7 cente are now oflered at 32 cents, and finor lines which formerly commanded 32 cents, Lo-day foteh only from 0 to 122 cents. Naturally money is being lost straight along. Ono manaficturer admits dropping $\$ 150,000$ last year, and ohers have lost oven more than that. In fact some wealthy houses have given up rather than lose bard-earned money, and yet it is doubthal whether the "freeze-ont" will be nuccossful.

Naturally our Camadian makers of wallpaper have suftered severoly from the flooding of this market with American wallpaper at prices 20 to 25 per cont. less than the same goods are sold at in New York. Had it not been that the duty has been altored from an ad valorem to a specific tarill; every factory in this country must havo been closed. As it is-even when we consider that at cul rates the specific duty often amonnts to 100 per cent. on tho value-our Canadian makers have a hard struggle to competo with the pupers sent to bo literally slaughtcred on this market for maything they will fetch.

Owing to hoing direatly in contact with a highly protected country, our manufuchuers requito an equally high measure of protection. Now York rules the rate of wages; not England. When a manufacturer in this city imported skilled hands from Ghasgow at an advanco of 25 per cent, on Scotch wages, he was coolly informed that the men must receive the same wages as wore being paid in Now York. In other words he was forced to pay Now York wages while American goods were solling in Montreal at 20 por cent. nader what they would fetch in the States. He had to pay his humds the samo price they would get in an American city, white he was compelled to sell the goods they made at a price perilously close to cost in order to compete with the very place which tixed the scale of wages he was called upou to pry, although it undercut him in has own markot.

Manifestly this is not fair. The American makers do not claim it is. 'lhey simply say that two years of this policy will oxterminate tho woaker makers, and that they are prepared to atiek it ont. 'They have lowared' the quality of their goods all lhoy dare; and have contined themselves to getting out the
cheapest lines possible. The gold paper got out at 6 to $12 \frac{1}{2}$ cents is not what we formerly got for 28 to 32 cents: It is poorer in every way. Consumers get the advantage that, in this country, they can buy American wall-paper for one-fifth less than it fetches in the States; but they get an article made especially for their market, and much inferior to what they would get a legitimate article for at a fair price in the place of its manufacture.

Naturally the Cauadian wall-paper trade is demoralized; and as it is a branch of industry that not only occupies a large number of hands in itself, but has a direct influence on other large manufacturing lines, any draw back it may suffer under reacts upon trade in general. In this country some six million tolls are anntally manufactured, and about a million and three quarters are imported from the States. If we reckon up the employment thus afforded to paper companies, pigment makers, machinists and others, we can see how important an industry it is, and how much it benefits other branches of industry besides its own. To permit the making of Canadian wallpaper to be swamped by "sacrifice lots" of American surplus make, would be to deal a severe blow at one of our most beneficial industries. When directly in contact with a highly protected country, our own should be equally protected. Since our manufncturers liave to pay the same wages as are paid in New York, they are manifestly entitled to an equal measure of protection. To argue otherwise would be not only futile but unjust.

## REMNANTS.

We have to draw the attention of the trade to the fact that some of our Canadian cotton mills are really manufacturing remuants. In other words they are selling new piece goods in twenty to forty yard lengths under this title in order to undercut their competitors. A true remuant shoulit not run over three or four yards in length, but these supposed remuants often lack only ten or fifteen yards of the size of a full piece and are apparently only cut to these lengths in order to evade the guarantee of price.

Of course this deliberate sacrifice of goods entails loss not only on the mill practising it but on the trade in general. Considering the present price of tue raw material, prices of cottons in this country are already far too low. The severity of competition has reduced values until but few of our mills are able to make the slightest return to their shareholders; and yet we find mills, like the ones in question, ready to still further sacrifice their prospects in order to make sales. The effect on the regular trade can well be imagined. They are suddenly confronted with "remnants" which are really piece gooods slightly cut down in length, but which are sold at remnant prices. What is the honcst maker to do? He must either meet the "cut" or lose his customers; and therefore he must either follow the example forced upon him or ran the risk of seeing his buyers go elsewhere. This is all there is to it.

At a time like the present when the price of colton is high in proportion to the cost of its products, and when the course of prices is decidedly upon the upward bend both in Eugland and the States, such a discovery as this is particularly disheartening. To find a mill or firm wiiling to break down what little margin of profit yet remains in order to allract buyers, and thus secure trado by underhand mothods, is certainly not calculated to help public confidence. If the mills would only stick by one another and leave off this kind of business we should soon see a lift in prices from which the consumor would be in no way a sufferer. The present cut-throat policy helps no one excopt a few agents and jobbers. The public pay just as much for their cottons as if the mills got a fair living price for their outpugand the loss to the majority of the latter is out of all proportion to the advantage gained by oue or two.

## APPLICATION.

The necessity of strict attention to business, in order that it may continue to be successful is more than over a vital factor in these years of keen competition and rapid transit of goode from all parts of the globe. Any merchant doing business to-day whose experience recalls the transactions of twenty years back, will note with more accuracy perhaps than pleasure, the changes in every line, from the selling of a spool or a thimble to that of the season's supply of general merchandise to the backwoods farmer who only songht the city or town for purchases perhaps once every three or four months Prices were much higher then than now and there was no such variety of sizes, styles
colors, sbapes or kinds from which to choose, and consequently purchases were made and sales were effected with much less difficulty ; for it was only with the advent of greater varieties of styles and shades, came the apparent necessity of as carefully selecting the particular shape or style desired. Side by side with this change came the necessity of closer application to the wants of the general public, aud auy opposition which presented itself only tended to make still more important the alrict attention required in order to hold the trade already establiehed and aim at its increase rather than allow it to diminish.

As opposition became greater the thoughts of each merchant were nafurally directed towards buying as low as possible, and any extra margin obtained on the wholesale price tended to lower the retail fgure in proportion, and the result was the education of the public to the knowlege that certain articles could be purchased for twenty-five cents at one store for which they had paid thirty cents at another. The dear store and the cheap was then the spreading cry among prospective purchasers, or the honest and the dishonest storekeeper, which made the gulf atill wider between the contestants for trade, and the necessity for closer application to purchases made at the wholesale house or of going direct to the city for selectione still more imperative.

Failures were then more the result of inattention; of allowing a more enterprising dealer in the village or neighboring town to attract the bulk of trade by adhering more strictly to the details of his shop; by making a larger display and combining native shrewdecss and judgment of human nature to suit the different classes of callers as they were lured for an initial visit to his store. The merchant who felt his trade thus gradually falling off and knew it must be moving in another direction, had just as much means as his adversary wherewith to hold his trade; his space was just as ample in which to make his stock look as pleasing to the eye, and his location was, if anything, more desirable, but he failed to apply his time in making his store look businesslike and attractive, by grumbling over the dullness of trade and the unsatisfactory condition of business in general, instead of comparing the inducements and attractions he was oflering with those of his new opponent and proceeding to place his business at once on the same level, if not on a bigher scale, by a thorough overhauling and replenishing; placing remnants and old stock in tho foreground at reduced figures, lurning the folds of the various fabrics on the shelves and moving them to a difierent place so as to make it appear the stock was new; of keeping everything neat and orderly, and in making as large a show, inside and out, as possible, with prices on each article, plainly marked, so that customers would at least be prepared to quote his prices if they were not prepared to buy. He, could purchase his goods as cheap, and accordingly sell as close, and even still closer, for a season, in order to win back his old trade, which, even now, could be thus gradually, induced to return, at least to purchase any leaders he may show for a time, which would eventually end in increasing their business with him till they wero his assured customers once more, and for such time as he would continue to make it profitable for them to purchase their requirementa there. But how much wiser would it not have been had he applied himself assiduously in time, the moment he saw that opposition was to be encountered, and even reduce the flgures on certain lines which bad a regular retail price, and which would, in all probability, be the leaders put forth by the opposition house to lure his custom away.

This mode of establishing a trade is the principal one adopted to-day by almost every new concern embarking in any of our towns or villages.; certain leaders are advertised at perhaps flve or ten per cent over cost, and these are principally articles manufactured in a limited number of grades, and the cheapest of these is chosen, so that there can be no further reduction in the ligures without entailing a loss in the transaction.

It seems remarkable how many there are to-day, who have had ample opportunities of noting the various methods employed for enticing trade, who doubt the genuineness of a staple article if the price is lowered to meet active competition, but this may be partly accounted for from the claim of the merchant himself, who, if informed of a certain article selling for a stated figuresomething lower than his price-replies that it must necessarily be inferior in quality or short in weight or defective in manufacture, with the additional remark that "the genuine article could not be sold at that figure." His price is accordingly sustained and the purchaser naturally uses the same argument
against the article which was purchased at the cut price, and it is only when the goods can be plainly compared that this simple everyday excuse does not successfully apply. The following day perhaps, the merchant who used this mode of gaining his price lowers the figure on it himself, fearing the consequence of selling at $a$ higher price than his opponent, but it is infuitely the wiser plan to adopt, for when once a name goes abroad for a high priced store it works injury without :imit, aud the owner in order to have the argument dispelled must set immediately at work to lower the price of several lines to offset the sustainiug of his figures on one or two. Contending that the article offered elsewhere is inferior, even if theraby the salo is effected at the tim ?, still leaves a doubt in the 'mind of the purchasers, and they will give a store a name for selling dear for the simple reason of having paid one cent more for a spool of cotton thread as quickly, and with as disastrous results as if they had been charged one to ten dollars extra on a shawl or cloak.

Thus it is that cutting prices on certain lines on which the figures are expected to be known will continue, and it ouly remains for an offset against such leadera, to adopt the method to a slight oxtent rather than reason against it. This will apply more directly in the case of country merchants and those in small towns against the prices prevailing in the larger markets. The former are losing ground, and accordingly being in a greater or less degree deprived of their very best customers, and it is becoming more apparent every year, from the failure of this one incentive more than from any other cause, and each year marks a wider difference between the country and city stores, which difference can scarcely be accounted for when it is so readily within the province of $a$ dealer in the country village to supply his store with cheap goods and run on low prices and sell certain articles even at cost to sustain the custom which is drifting slowly, but surely, to the city shops ench season. In lines such as furs, millinery, etc., the variely to be found in the exclusive emporiums in the cities cannot, of course, be duplicated in the rural districte, but with few such exceptions, goods could be kept in suflicient variety and offered at such prices as would convince purchasers that a trip of five to fifteen miles to the city would not really prove profitable after the time and expenses of auch a trip were deducted.

Application to these details is wecoming each year a greater necessity, and the time and caroful attention given to working up ideas and planning for their successful adoption is sure to be followed by that success in mercantile pursuits which is the ambition of all who are interested therein.

## THE IMPROVEMENT IN IRON.

As was to be expected the decided improvement in the iron and metal trade of Great Britain and the Continent has been followed by a revival in the same industry in the United States. In a former isgue some references were made to the long continued depression in iron and steel in the neighboring Republic, and no developments have arisen to alter the conclusion then arrived at, which was that the enlarged production of pig-iron and the wonderful increase in southern furnaces were chiefly responsible, no general stagnation baing apparent in American trade.

A summary statement, issued at Washington, tells liow American imports compare with former years. Iron ore, pigiron, scrap iron and scrap steel show a slight decrease, but in several classes the imporis this year were in excess of those of the aame period in 1888. During $\Lambda$ pril last the greatest increase was in the imports of tin plates, which amounted to $70,050,357$ lbs-, against 62,344,240 last year. Bar iron shows the next bigh. est increase, as the imports of April 1889 were $1,057,452 \mathrm{lbs}$. over those of the same month in the previous year. The figures for ten months past exhibit a general decrease, tin plates and cot-ton-ties being the principal esceptions. Of the latter the imports were $63,550,113 \mathrm{lbs}$., against $37,533,907 \mathrm{lbs}$. for the same period in 1888.

So far as British trade is concerned all accounts agree that a brisk demand exists and the iron industry was probably never in a sounder or more healthy condition. Ship builders and engineers keep fully employed and the miscellaneous branches of the home trade are taking iron and steel in larger quantities. In spite of the fact that the United States, once Britain's largest customer, has largely reduced its purchases the quantities exported are constantly growing in volume. As the American demand has fallen off, larger requirements have sprong up in other directions, so that in the aggregate the shipmente present a atis-
factory appearance. In the following table particulars are given of the exports to the United States and to other countries in the first four months of the current year, with the figures for the corresponding period of the preceding three years:

The principal expansion in demand has been from the Argentine Republic. Germany, Australia and smaller countries not usually specified. 'l'he increaso in domestic and foreign requirements has been such that stocks in England have been reduced 200,000 tons in four months, and this in spite of the fact that additional furnates have been put into blast. The British ateel rail trade has received a severe blow from the high duties improsed by the States on behalf of their local makers. We notice, howover, that the large orders which have been received from India, from the Australian colonies and from home railway companies are keeping the mills fully employed and the outlook is mansidered good.

An adverse leatare in the outlook is the growing discontent among the collers, and the chance that the price of coals and coke may be still further advanced. It is scarcely likely, however, that there will be such a rise in the price of coals as to check the expansion in the iron and steel trades. A good point is that the improvement is based on solid grounds, and is accompanied by far leas specalation and less intation in prices Lhan could reasonably have been anticipated.

## A OBNTURY'S PROGRBSS

Illo growth of American commerce during the past century has reeently been the subjoct of interesting articles in hading Unitrd Shates journals. The ship-buidding of 1789 was estimated at 18,000 toun, of 1790 at 32,000 tons, and of 1888 at 218,000 tomes The Federal revenues for the first year ware less than $\$ 4,000,000$; for the last year they were more than $380,000,000$. At the close of the Revolulion the public debt approximated $\$ 75,000,000$, which far exceeded the amonut of npecic in tha country ; to-day it is more than $1,000,000,000$, but it is equalled by tho inereased amount of gold and silver in circulation and in tremsury vands. In 1780 American banking was in its infacy, investments not excecling $\$ 10,000,000$. At present the resources of uational, stata and savings bake exceed $\$ 1,500,000,000$. Of intermal commerco und domestic industries it is not easy to present comprehensiva data for comprison, but the contrast is in no respect less striking than those alre dy shown.

The tollowing statement gives the Ieading comntries to which exports were made duriag the fiseal year 1789-90, in comparison with the fisent your 1888:

|  | 1789. | 1888. |
| :---: | :---: | :---: |
| 'ro France............ | \$1,38.4,246 | \$37,180,000 |
| Fronch W. Indies. | 3,284,656 |  |
|  | \$4,068,902 | \$37,780,000 |
| Great Britain......... | \$6,888,978 | \$358,240,000 |
| British W. Tndics..... | 2,077,767 | ......... |
| Nova Scotin.......... | 279,826 | .......... |
|  | \$0,246,562 | \$358,240,000 |
| Britibh N, America.... | \$ 10,362 | \$ 34,430,000 |

Tho louding items of export for 1789, as stated above, comparo with the same items for 1888, us follows:
1780.

Flour. .................. \$4,671 293
Wheat................... 1,308,098
$\$ 50,223,507$
44,151,853
$18,572,689$
20,045,350
1,763,796
$225,122,111$

## COARSL YARN GOTIONS.

The mantinfactory statu of the American market for these goods is duo to the largoly increased prodnction in the South, and unless a foreign mank it is found for the burplus, it is feared the cotton businese, at lages, will suffer. The South is pushing ahead, and in some lines of cotion goods ta not omly produclag enough for its own requirements, Lut is able to supply a portion of the Western demand for low cotton,
doing also something for export. This is a very good showing for an industry which could hardly be said to exist twenty years ago. But the Western people themelves are making both cotton and woolen goods and able partly to cover their own requirements. The consequence of this is the lessening of the demand on New England and a general transformation of the New Eugland cotton industry from coarser to finer goods. There are mills in Fall River which a few years ago made exclusively print clothe, and these are now engaged on finer grades. The Southern competition has deprived Now Liggland of a portion of its home trade and many of the Eastern mills manufaeturing standard cottons now find exporters their best eustomers A New York paper eays:-Since 1880 the Eastern mills have been gradually getting away from such cloths. The Southern mills attributed this to the fact that they could make the goods so much cheaper than others. Whether they deceived themselves or whether those mills making finer yarn cloths bave done very much better than those that continued to make cloth of 12 and 13 yarns it is not for us to say, As it has been with three-yard cottons so hae it been with plaids. The production has been overdone. For soveral years the Southern mills have been frequently reminded that such production was excessive. They attributed this admonition to jealously rather than to candor The time has arrived, however, for the diversion of production, and we do not heritate to state that unless a large diversion is made from the p ofluction of the heavy yarn cloths referred to tho chances for dividends in the noar future will beless than they have been for rome years.

A faw yeare ago some Hamburg merchats converted a large stramer into a floating sample room and despatehed her on a cruise to the African and South Americau coasts. The venture was probably successful as a German commercial compan.y has recently raised a sum of nearly half a million sterling to be devoted exclusively to the building and equipment of a large steamer which is to serve as a floating exhibition for the display of German gocds in distaut parts of the world. The Ríaser Wilhelm, for that is the uame the vessel is to bear, will be over 560 feat in leageth, 66 feet in breadth, and 46 feat in depth. She is to be powerfully engined, and evidently speed of movement from one port to noother is cousidered an important element in the schems. There are to be four serew propellers, each driven by a separate set of eugines. The various decks of the great ship will be fitted up for the dieplay of goods under the most invorable conditions. These will be in charge of attendants well versed in commercial matters, and having a knowledge of the languages of the different countries it is proposed to visit. It is expected that the hraiser Wihelm will be rendy to start on her two years' voyage early next year.

Tur United States weekly crop bulletin of June 30th eays:-'The weather has been favorable for all growing crops throughout the central valleys and Northwest, except Dakota, where drought has done some injury to wheat, oats aud barley, but corn is roported as fine and growing rapilly in that state, and generally through the corn belt. From Mimesota reports show that all crops were improved, but more rain is needed in the Red River valley country. Reports from Nebraska, Iowa, Illinois, Indiana, Missouri, Kansns, Kontucky, and Arkausas show that the conditions for the week were especially favorable for corn, which mado rapid growth Harvesting is in progress in 'rennessee and the damage to whent from excessive rains has been overustimuted. Reports from the tobacco region of Kentucky, 'rennesee aud North Carolina show that this crop is doing well and was improved by the favorable weather of the past week. The cotton crop was improved by seasonable weather and well distributed. St. Paul, June 30.-Orop prospects are less favorable than they were a week ago owing to the lack of moisture, and hot dry winds. Advices recoived from all parts of the Northwest indicate that there will be considerably less than an avarage yield of wheat.

Thes resiguation by Albett Fink of his position as Commissioner of the Trunk Lino Association is an event of considerable note in the railroad world. Mr. Fink resigus not because of any dissatisfaction with his work or because of any trouble in the organizntion with which he is connected, but simply becanso he thinks the condition of his health makes it imperative that he should bave absoluteand complete rest for a long period of time. He feels that a were vacation would not answer the parpose. Under the circumstances the 'lrunk line Presidents will probably be obliged to accept the resigantion, reluctant though they may be to take such a step, Mr. Fink's name will always remain identifiod with the history of organized offort to bring United States railronds together, so as to secure harmony of action on points affecting their trafic, rates, and the thousand details of railway management.

Tas receipts of the C. P. B.-last week were $\$ 369,000$, an increase of $\$ 35,000$ over the same period last year.

Tas Fraserville shoe factory, with machinery, was sold by auction on the 3rd inst. to Pelletice \& Co., for $\$ 5,600$. A new company is said to be organized to run the concern.

Soms oighty head of cattle are reported to have died on the SS. "Carthagenian" on her way down from Montreal owing to the exoeesive heat. Some of the other cattle steamers also suffered considerably. The river was strewn with dead carcasess

Tae American Straw Board Company, of Dayton, Ohio, with a capital of $\$ 6000,000$, has, it is said, absorbed fifteen of the largest straw board mills in the country, their daily production being 300 tons. There are only five little mills left out.

The last report of the local timber market says that the few rafts for eale here are held at lifgher rates than those obtained aince the opening of the season, but the scarcity and high rates of tonnage scem to keep the market quict, and no recent sales of any importance have taken place. Still the feeling in England appears to be good, though some houses complain that they are offered lovy rates for first quality pine deals.

Amerioan jurnale are beriously discussing the placing of sugar on the free list, owing to ${ }^{-}$ enhanced price to the consumer. Why, they argue, should we pay a heavy duty on sugar when the government don't know what to do with the money? The position of Canada is gomewhat. different, the Government wants the money aliright, but if thore wns no duty the consumer would get his हugar 2c. to 3 c . per pound cheaper than at present. Granulated is solling in Liverpool to-day retail at 6c. per pound.-Dominion Grocer.

Tae Canadn Pipe and Foundry. Co., of this city, manufacturers of water pipes, who we noted some time since in our columns as applying for incorporation, have some of their production now on the market which are pronounced by experts equal in quality to nay of foreign make. Water pipes have, heretofore, been a large item of import, some thousads of tons being brought into the Dominion annually, and now that our market can be supplied by a local maker with every guaranteo for quality, this large volume of trade should remain in the country. Already the company is runsing to its utmost capacity, having orders on hand for nearly two thousand tons of assorted sizes.

A Trang-atlantio Guide.-When an American sees a new work of any kind, his first thought is how to produce one of equal utility at a lesber price. The Index Guide to Travel and Arl Stuty in Europe, is doubtless the outcome of eome American tourists' first contemplation of the voluminous guide bonks, somo ten to twelve in number, which have hitherto leen indispunsible compagnoas de voyage of innocents abroad on the continent of Europe. Tho Itdex Guide is a compact little pocket-volume of about 650 pages, and is replete with information. It contains a list of the galleries of painting and sculpture, with critical comments; a list of routes and fa:es with historical references to places on the way; a list of maps; a description of the principal cities, their architecture, parks, museumb, public works, vehicular service, etc.; a condensed chapter on ecenery, ait, history, legend and mythe, and a catalogue of the noted

Workg of art in public and private collections." Engravings of the principal masterpieces of art are also given as a guide to idenlitication. The work is one which any person not in the United Kingdom and the Continent may read with pleasure and perbaps profit. It can re had of Wm. Drysdale \& Co., the well-known booksellers, St. James Street, Montreal.

Frogal Habits.-He who knows how to fave has leazned a valunble leszod, A boy who saves ten dollars a year out of a very meagre salary acquires a habit of taking care of his money which will be of the utmost value to him. -The reason why workingmon as a class do not get ahead faster, are nct more independent, is that they have not learned to save any portion of their enraings. It does not matter a great deal whether a man recelves a salary of two dollars a day or three dollars,$_{1}$ so that there is nothing left Saturday nighit, he will not get rich very rapidly. He will never have much ahead. But the individual who receives a doliar a day and is able to save ten cents is laying up something for a rainy day. Young people who expect to labor with their hands for what they have of this world's goods, who have no ambition or wish to become profesnional men, office bolders or speculators, should by all meang acquire habits of economy, learn to save. So surely as they do this, so surely will they be able to acoumulate, so furely will they be in a situation to ask no apecial favors. Every man wants to look ont for himself and rely upon himself. Every man needs to feel himself the peer of every other man, and he cannot $d$, it if he is penniless. Money is power, aud those who have it exert a wider influence than the destitute. They are more independent. It should be the ambition of every young man to acquire, and to do this he must learn to enve. This is the first lesson to be learned, and the youth who cannot master it will never have anything. He will be a dependent all the days of his life-s mere useless appendage to society. - Trade Reponter.

Seymal sections throngiout western On tario report the ravages of an ingect pest which is attacking the wheat and exciting much alarm in the farming community. Sample heads taken at raudom from a fine looking field in Brantford township, were literally rwarming with small green flies, whose operations on the grain could be easily discovered by the naked eye. The owner of the fiold said ho had noticed after an east wind a short time ago, the presence of black flies among his wheat. Ho concluded from what he had read about them that they were the midge flies, and his diagnosis has now been verified. No little excitement has been created by the discovery of thisspest in a crop, which, for luxuriance and quality, has not been equalled in many years. Castaas.A small green bug is infesting the hoads of the fall wheat in this vicinity, and it is feared will cause a very light yield.

An apreal has béen taken by M Lacoste \& Co. in the case of Mongenais, Boivin \& Co, against the Allan line from the judgment of Judge Taschereau, dismizsing the plaintiffs action. The firm imported some "plate glass which was accidentally broken whille being unloaded. The Oourt decided that the firm had clearly accepted the condition that the steamsbip owners were not to be responsible for damages which might occur. It is claimed that this. bill of lading, which is the no used by all the companies, is subject to the provisions of the civil code, which holds carriers rospon ible for damages to goods accepted by them. The case promises to be an interesting one for the railway and steamehip companies.

## SPECIAL NO'IICES.

I'he Standard Drain Pipe Compnay, of St. Johns, Que., have mado a great hit with their productions, which seems to be the equal, if not the superior, of the famous Scotch goods
which heretofore have had almost a monopoly in this line. The company show testimonials from several places where they liave been subjected to severe tests by experts, and in overy case the verdict has been favorable to the Canadian stook. Tho company cannot supply the domand at the present time, and contemplate exteusive additions to their promises in tho near future

Tar Buantrord Soap Wohks og a. Watts \& Co.-The factory is one of the largest in

I'HE CANADIAN JOURNAL OF COMMERCE.

the Dominion and was established in 1856. The size of the buiding is $175 \times 42$ feat and 3 storeys bigh The building is fitted up with all the modorn appliances. The boiling kettles hold from 60,000 to 70,000 pounds of soap each. The capacity of the works onables the proprietors to turn out 1,000 boxes a week. Their priucipal brand is "Ivory Bar." This soap is a household word in Cauada and is to be found in every Province of the Dominion. The demand for it is conof the Dominion. The demand for it is con-
stanging. No expense has been
spared by the firm to make the "Ivory Bar" soap the leading soap of Canada, and no matter how much the raw material may advance in value, the quality and purity of "Ivory Bar" is always kept up to the standard. They also manufacture numerous other brands, a few of which are the following:" Primrose", "Savon Imperial," " Knights of Labor," "John A," "Tiger," "Princess," "Countess," "Mayflowor," "Sunflower," "Paris Llaundry," "Gem,"' "Elecoh Magic," and "Kleusador Electric," and others. All
their lest soaps are done up in a showy, wazed wrapper under their own patent, Tho sosps turned out by the firm are free from adulteration, and no doubt thits has much to do with the largely increasing trade in the article. This firm wero the first to grapple with the box difficulty and on the list Jan. 1888, put a stop to the charge for boxes. The result ia all boxes are now free. Our travelling correspondent was very much pleased with a visit through the worke at Brantford and sur prised at their oxtent and the large output.
